10.12–10.15. Only a partial differentiation is practicable between (10.12) 'turn' in the widest sense 'change the direction of', and (10.13) 'turn around, rotate, revolve, twist' (covering motion around an axis), and again between the latter and certain other more specialized notions involving circular motion, as (10.14) 'turn something about an object', 'wind' thread on a spool, 'wrap' a garment about a person, whence also with change of construction 'wrap' (NE *wind* only rarely so) an object with, as a bundle with twine, a person with a garment, and (10.15) 'roll' in which the central notion seems to be that of progressive movement (not merely around an axis) of, or like that of, a circular or spherical object. These notions doubtless started from quite specific images, such as, for example, the winding of thongs about something, the rolling of a stone, etc. But actually derivatives of the same root may serve for several of these notions in different languages or in the same language. Even where there is a fairly clear difference in dominant value, the idiomatic choice for specific phrases varies from one language to another or even in the same language.

In many languages the same words are used for 'turn' in general and commonly for 'turn around' (often, in fact, the primary sense), even where there are

special words for the latter notion. Thus NE *turn* is far more common for the circular motion than *twist*, which is felt as somewhat strenuous; so Fr. *tourner* vs. *tordre*, etc. But in some languages the circular turning is normally expressed by distinctive words, as Lat. *torquēre* vs. *vertere*, NHG *drehen* vs. *wenden, kehren.* There is considerable interchange between 'turn around, twist' and 'wind' and 'roll'. Definitions are mostly omitted in the following discussion. But the grouping in the lists, despite the overlapping, is roughly approximate for the dominant uses in the several languages.

Most of the forms listed are used transitively, the intransitive being expressed by middle, passive, or reflexive forms, or without change. In a few cases the simple verbs are intransitive, with causative forms or phrases for the transitive use. The difference is ignored in the lists.

Words for 'raise, lift' are but rarely causatives of those for 'rise', like NE *raise*, or related to them except as the latter are reflexives. They are mostly from notions like 'weigh', 'make light', 'make high', 'take up', 'move up', etc.

1. Grk. αἴρω, ἀείρω, prob. (otherwise Solmsen, Unters. 290 ff.) same word as ἀείρω 'bind together, join' (in συν-αείρω, συν-ήορος, παρήορος, etc.), mid. 'hang' (Hom. ἄωρτο 'hung', ἄορ 'sword', etc.), and this perh. fr. *ἀ-ϝερι̯ω : Lett. *vert* 'to

string, thread' (a needle), Lith. *virvė* 'string', etc., IE **wer-*. But the semantic relation is not clear. Walde-P. 1.264. Boisacq, 15 f.

Grk. ἐγείρω 'wake' (4.63), 'rouse', hence also late (esp. NT) 'raise', mid. 'rise'.

NG σηκώνω, Byz. σηκόω = class. Grk. σηκόω 'weigh, balance', beside σήκωμα 'weight in a balance'. Further connection with σηκός 'pen, fold, enclosure' ('weight' only late and fr. the vb.) through an unattested use of the latter for the scale pan of a balance? Walde-P. 1.747.

2. Lat. *tollere* : Skt. *tul-* 'lift, weigh', *tulā-* 'balance', Grk. τάλαντον 'balance', τελαμών 'strap for holding shield or sword, pedestal, pillar' (all fr. 'supporter'), ταλάσσαι, τλῆναι 'support, bear' in figurative sense = 'endure', as also Goth. *þulan*, OE *þolian* (NE dial. *thole*), OHG *dolēn*, NHG *dulden*, etc., IE **tel-*. Walde-P. 1.738 ff. In words for 'fall' the central notion is that of free, rapid, downward motion, as that of an object falling by its own weight. But in many of them the 'downward' element, though become dominant, is of secondary origin, a specialization from some notion of rapid movement. This is especially obvious in the case of the root which serves for both 'fall' and 'fly' in Indo-Iranian and also, though with differentiated forms of it, in Greek (below, 1). Some are probably of imitative origin, based on expressive syllables analogous to NE *plump*, *thud*, etc.

1. IE **pet-*. Walde-P. 2.19.

Grk. πίπτω 'fall', NG pop. πέφτω (πτ > φτ regular; ε from aor. ἔπεσα, cf. Hatzidakis, Μεσ. 2.503), beside πέτομαι 'fly'; Skt., Av. *pat-* 'fall' and 'fly', OPers. *ud-apatatā* 'made an uprising, rebellion'; Lat. *petere* 'go after, seek', etc. The sense 'fly' is the most widespread, notably in the derivs. for 'wing, feather', and was probably the primary use of the root. Cf. 10.36. But the notion of rapid motion unites all the uses.

2. Lat. *cadere* (> It. *cadere*, Sp. *caer*, Rum. *cădea*, OFr. *cheoir*) : Skt. *çad-* 'fall off, out', MIr. *casar* 'hail, lightning', IE **k̂ad-*. Walde-P. 1.339. Ernout-M. 127. Walde-H. 1.128.

Fr. *tomber*, replacing *cheoir* (above) in 18th cent., OFr. *tomber*, *tumber* 'leap, dance, stagger, make tumble', prob. with OFr. *tumer* 'leap', loanword fr. the Gmc. group seen in OHG *tūmōn* 'turn around', NHG *taumeln* 'stagger', OE *tumbian* 'tumble, dance', NE *tumble*, etc., all prob. of imitative origin. REW 8975. Gamillscheg 847.

3. Ir. *do-tuit* (3sg.), NIr. *tuitim*, prob. through 'hit the ground' : Lat. *tundere* 'beat, pound', Skt. *tud-* 'push, thrust, prick', Goth. *stautan* 'smite', etc. Walde-P. 2.618. Pedersen 2.656 ff.

W. *cwympo*, cf. MW *cwymp* 'a fall', of imitative orig.?

W. *syrthio*, perh. (with reg. *s* fr. *st*, as in *seren* 'star', etc.) : OE *styrte* 'jump, leap' (NE *start*). Loth. RC 43.148 f.

4. ON *falla*, OE *feallan*, OHG *fallan*, etc., the main Gmc. group : Lith. *pulti*, Lett. dial. *pult* 'fall', Arm. *p'lanim* 'fall in'. Walde-P. 2.103. Falk-Torp 202.

Goth. *driusan*, OE *drēosan*, ME *drese* (rare), OS *driosan* : OHG *trōren* 'drip, trickle', Grk. θραύω 'break up, shatter', IE **dhreus-*. Walde-P. 1.873. Feist 126.

ME *droppe*, NE *drop*, orig. like OE *dropian* 'fall in drops' (see 10.24), but extended, so that in its intr. use it is common in the sense of *fall*, without by any means displacing it, and in its trans. use is generally substituted for the

phrase *let fall*, NHG *fallen lassen*, Fr. *laisser tomber*, etc., e.g. *drop a pencil, a handkerchief*, etc.

5. Lith. *pulti*, above, 4.

Lith. *kristi*, Lett. *krist;* prob. : Lith. *krėsti*, Lett. *krest* 'shake, shake off'. Leskien, Ablaut 333. Mühl.-Endz. 2.281. Otherwise (: Lith. *kirsti*, Lett. *cirst* 'hew, hack') Walde-P. 2.579.

6. ChSl., SCr. *pasti*, *padati*, etc., general Slavic : Skt. *pad-* 'fall, go', Av. *pad-*, *paδ-* 'move downward, plunge down', prob. the same root as in Skt. *pad-*, Grk. πούς, etc. 'foot'. Walde-P. 2.23.

The extension of 'fall in drops' to 'fall' in general, as seen in NE *drop* (10.23), leads us to consider here the nouns for a 'drop'—despite the fact that in these the notion of motion, the 'dropping', is subordinate in feeling to that of (small) amount (of a liquid), so that the inclusion in this chapter seems illogical.

1. Grk. σταγών, with vb. στάζω 'drip' (*στάγι̯ω), prob. : Lat. *stagnum* 'stagnant water, pool', OBr. *staer*, NBr. *ster* 'river', W. *taen* 'a sprinkling'. Walde-P. 2.612. Pedersen 1.103.

2. Lat. *gutta* (> It. *gotta* 'gout'; deriv., through a vb. **guttiāre*, *goccia*, *gocciola* 'drop'; Fr. *goutte*, Sp. *gota* 'drop' and 'gout'; Rum. *gută* 'gout', dial. 'drop'), etym.? Ernout-M. 439. Walde-H. 1.629. REW 3928, 3929. For the sense 'gout', see NED s.v. *gout*, sb.[1].

Rum. *pic* (also 'a little, a bit'), for 'drop' more commonly *picătură*, fr. vb. *pica* 'drip', this fr. an imitative syllable seen in It. *piccolo* 'small', etc. (1.256). REW 6494. Puşcariu 1304. Tiktin 1154.

Rum. *strop*, back-formation fr. vb. *stropi* 'sprinkle', prob. corruption of a Slavic **sŭ-kropiti* (cf. ChSl. *kropiti*, SCr. *škropiti* 'sprinkle', Berneker 623). Tiktin 1519.

3. Ir. *banna* (K. Meyer, Contrib. 177), Br. *banne*, *bannec'h*, OCorn. *banne* (MCorn. 'a jot, bit') : Skt. *bindu-* 'drop', root connection? Walde-P. 2.110. Pedersen 1.116. A. Mayer, Glotta 29.69 f.

Pol. *kropla* (ChSl. *kroplja* 'stream' of tears, Supr.), fr. the root of ChSl. *kropiti*, etc. 'sprinkle', based on an imitative syllable like that in Lat. *crepere* 'rattle, clatter', etc. Walde-P. 1.416. Berneker 623. Brückner 270.

Besides the words listed as the most generic for 'throw', there are numerous others which are usually expressive of greater violence or are more restricted as to their objects, as NE *fling*, *hurl*, *cast*, It. *lanciare*, Fr. *lancer*, Sp. *lanzar* (extended from 'throw a lance', but still less generic than others), ChSl. *kydati*, Pol. *kidać*, Russ. *kidat'* (: SCr. *kidati* 'break, tear', Boh. *kydati* 'clean out dung'; Berneker 676), etc. The once generic word has sunk to a subordinate position in the case of Sp. *echar* in contrast to It. *gettare*, Fr. *jeter*, or Boh. *metati*, Russ. *metat'*, etc., in contrast to ChSl. *mesti*.

Most of the words are cognate with others denoting some kind of quick motion, as 'turn', 'roll', 'gush', etc. A few come from the notion of 'aim at' or 'draw' (through 'shoot').

1. From various extensions of **wer-* parallel to *wert-* in words for 'turn', as Lat. *vertere*, etc. (10.12). Cf. NE *throw*, orig. 'turn around'. Walde-P. 1.271 ff. Falk-Torp 1370 f.

Grk. ῥίπτω (NG ρίχνω, also ρίφτω, ρίχτω, cf. Hatzidakis, Μεσ. 1.291) fr. **wrīp-*; Goth. *wairpan*, ON *verpa*, OE *weorpan*, OHG *werfan*, etc., fr. **wer-b-*; ChSl. *vrŭgą*, *vrěšti* (*vrŭgnąti*, *vrŭzati*), Boh. *vrhnouti*, *vrhati*, fr. **wer-g-* (in Skt. *vṛj-* 'turn', 10.12).

Among verbs for 'flow' there is one group which clearly reflects a distinctive IE root for this notion, though its survival is more widespread in derivatives than in the verbs. Some are cognate with verbs for 'gush forth, swell' or 'pour' or 'float', or come through 'drip', from 'filter'.

But the commonest situation is the extension of words for 'run' (10.46) to cover 'flow'. Nearly everywhere the words for 'run' may, at least occasionally or colloquially, be applied to liquids. So in NE, despite *flow*, the brook *runs*, water is *running* (in the tap), etc. In many languages they are the regular words for 'flow', either for both 'flow' and 'run' (as NG τρέχω, Lith. *bėgti*) or specialized to 'flow' (as mostly *tek-* in Balto-Slavic). Or the older distinctive word for 'flow' may survive only in technical or literary use, as It. *fluire* beside *scorrere*.

1. IE **sreu-*. Walde-P. 2.702 f.

Grk. ῥέω, Skt. *sru-*, Av. *rud-* (pres. stem *raoδa-*, caus. *raodaya-*; cf. also *raoδah-* 'stream') beside *urvant-* (**sruvant-*) pple. 'flowing'; more widespread in derivs., esp. words for 'river' or 'stream' (1.36).

2. From 'run' (10.46). Grk. τρέχω 'run', NG 'run' and 'flow'; Lat. *currere* 'run', as 'flow' mostly poet., It. *(s)correre*, Sp. *correr* 'run, flow', Rum. *curge* (re-formed after *merge* 'go') formerly 'run, flow', now reg. In verbs for 'sink' the primary notion is taken here as 'become or cause to be submerged', as of a ship in the sea, though many of the words are used also for 'sink' in wider sense = 'go down', 'lower', etc. Several are connected with words for 'bottom' or 'depth'. But in many cases the relations are obscure, and in part a notion of movement downward or into may be earlier than the specific.

The transitive and intransitive 'sink' are expressed by related forms of the same verb, or in part by the same form, as NE *sink*. The primary forms are entered first in the list, whether transitive or intransitive.

1. Grk. δύω (pres. also δύνω), esp. καταδύω, same root as in ἐν-δύω 'put on' (clothing), ἐκ-δύω 'take off', perh. : Skt. *upā-du-* 'put on'; but primary sense of root obscure. Walde-P. 1.777 f. Boisacq 206.

Grk. βυθίζω (rare in classical, common from Hellenistic times, Polyb., NT, etc., Byz., NG), deriv. of βυθός 'depth' (esp. of the sea).

NG βουλιάζω, fr. late Grk. βολίζω 'heave the lead, sound' (NT, Byz.), mid. 'sink' (Geop.), deriv. of βολίς 'a missile, a casting-lead' (: βάλλω 'throw', 10.25). Koraes, Ἄτακτα 4.58. Cf. Fr. *plonger*, below, 2.

2. Lat. *mergere*, esp. *sub-mergere* : Skt. *majj-* 'sink', Lith. *masgoti*, Lett. *masgot* 'wash' (through 'dip, plunge into water'), IE **mezg-*. Walde-P. 2.300 f. Ernout-M. 610. Walde-H. 2.76 f.

Derivs. of Lat. *fundus* 'bottom'. It. *affondare* (cf. *affondo* 'deep'); Fr. *enfoncer* (cf. OFr. *fons*, Fr. *fond* 'bottom'), Sp. *hundir* (*hondo* 'bottom'), Rum. *scufunda* (also *cufunda*, fr. **con-fondāre; s-* from *ex-* or by blend with *sub-*). REW 269, 3585, 8437.

Fr. *couler* = *couler* 'flow', fr. Lat. *cōlāre* 'filter, strain' (10.32).

Fr. *plonger*, fr. **plumbicāre*, deriv. of *plumbum* 'lead' through its nautical sense. REW 6613.

3. Ir. *bāidim* ('drown' and 'sink', cf. K. Meyer, Contrib. 161), NIr. *bāidhim*, *bādhaim* : W. *boddi*, Br. *beuzi* 'drown', Skt. *gāh-* 'plunge (into)', *gāha-* 'depth', IE **gʷādh-*. Walde-P. 1.665. Pedersen 2.458 f.

NIr. (for intr.) *tēighim fē* (or *faoi*), lit. 'go under'.

W. *suddo, soddi*, perh. fr. forms of IE **sed-* 'sit', with semantic development as in NE *settle* (of a ship), but there are phonetic difficulties. Morris Jones 78, 154 (but untenable explanation of the *u*-form).

Br. *goueledi*, fr. *goueled* 'bottom'.

4. Goth. *siggan*, ON *søkkva* (strong vb.), Dan. *synke*, Sw. *sjunka*, OE *sincan*, etc., whence caus. Goth. *saggqja* (= **sagqjan*, cf. *ufsagqjan*), ON *søkkva* (weak vb.), OE *sencan*, etc. (caus. forms lost in NE and Du.), general Gmc. group, but outside connections dub. Walde-P. 2.496. Falk-Torp 1228.

5. Lith. *grimsti*, *gramzdėti*, caus. *gramzdinti*, Lett. *grimt*, caus. *gremdēt*, fr. a root **gremd-*, beside **gren̂g-* in ChSl. *pogręznąti*, *pogrąžati* 'sink', further connections dub. Walde-P. 1.654 ff. Berneker 350.

The verbs for 'sail' are partly from the same root that is widespread also in those for 'float' and 'swim' (cf. 10.34). Others are derivs. of nouns for 'sail', 'ship', or 'sea'. Some are words for 'row' extended to 'travel by water, sail', and some are general words for 'travel, go', used for 'sail'.

1. Grk. πλέω, see 10.34.

2. Lat. *nāvigāre* (> Romance words)

deriv. of *nāvis* 'ship' (10.81). Ernout-M. 624.

3. Ir. *immrāim*, lit. 'row about', but reg. also 'sail, go by ship' (cf. vbl. n. *imrām* 'voyage'), cpd. of *rāim* 'row' (10.852). Pedersen 2.591.

Words for 'fly' are cognate with others applied to various other forms of rapid motion. But in one group the meaning 'fly' is dominant and widespread and, though also extended, was probably the primary sense of the IE root.

1. IE **pet-*. Walde-P. 2.19 ff.

Grk. πέτομαι, NG πετῶ (Hatzidakis Μεσ. 1.413); Skt., Av. *pat-* (also 'fall'; OPers. *ud-apatatā* 'made an uprising, rebellion'); OW *hedant*, W. *hed*, *hedeg* 'flying', whence *ehedeg* 'fly' (cpd. of *eh-* : Lat. *ex*, Pedersen 1.91). In sense of 'fly' more widespread in the derivs. for 'wing, feather', as Skt. *pattra-*, Lat. *penna*, etc. (4.392). Cf. also Lat. *petere* 'go after, seek' and words for 'fall' (10.23).

2. Lat. *volāre* (> It. *volare*, Fr. *voler*, Sp. *volar;* Rum. *sbura*, OIt. *svolare* fr. **exvolāre;* REW 9431, 3115), cf. *volucer* 'winged, swift', perh. (fr. a root **gʷel-*) : Skt. *garut-mant-* 'winged, bird'. Ernout-M. 1131. Pedersen, KZ 36.92 f.

3. Ir. *foluur*, cpd. of *-luur* 'move' (10.11).

MIr. *etelaigim*, NIr. *eiteallaim*, deriv. of Ir. *ette*, NIr. *eite* 'wing, feather', (cpd. with *laigim* 'lie'?).

W. *ehedeg*, cf. above, 1.

Br. *nijal* : MCorn. *nyge* 'fly' (also 'float'), W. *neidio* 'jump, leap', these prob. : Lat. *natāre* 'swim, float'. Loth, RC 46.154.

4. ON *fljūga*, OE *flēogan*, etc., general Gmc. : Lith. *plaukti*, *plaukyti* 'float, sail, swim', IE **pleu-k-*, extension of **pleu-* in Grk. πλέω 'sail, float', Skt. *plu-* 'sail, swim', etc. (cf. 10.34).

5. Lith. *lėkti* (= Lett. *lēkt* 'jump, hop'), ChSl. *po-letěti* (simplex only in iter. *lětati*), SCr. *letjeti*, etc., general Slavic (*let-* fr. **lek-t-* as in *pletą* 'plait' : Lat. *plectere*, etc.; Leskien, Altbulg. Gram. 57) : Grk. λακτίζω 'kick', ON *leggr* 'leg, joint', etc. Walde-P. 2.421. Berneker 703 f. Brückner 292.

Lett. *skriet*, mostly 'run rapidly, etc.' (= Lith. *skrieti* 'move or fly in a circle'), Lith. *skristi* 'fly, circle' : ChSl. *krilo* 'wing', Lith. *kreipt* 'turn around' (10.13), ON *skrīða* 'creep, crawl', etc., fr. **(s)krei-*, etc., extensions of **(s)ker-*. Walde-P. 2.570 f. Mühl.-Endz. 3.897.

Lett. *laisties*, also used of other quick movements 'hurry, go rapidly, ride', orig. 'let oneself out', refl. of *laist* 'let'; Lith. *leisti* 'let', etc. (19.47). Mühl.-Endz. 2.411 ff.

6. ChSl. *poletěti*, SCr. *letjeti*, etc., above, 5.

7. Skt., Av. *pat-*, cf. above, 1.

Av. *vay-* (only with *ā*, *āvayeinti* 3pl., of gods), cf. Skt. (RV) *vēvīyatē* 'flutters' : Skt. *vī-* (*veti*) 'seek, approach eagerly', Lith. *vyti* 'pursue', etc., IE **wei-*. Walde-P. 1.228 ff. Barth. 1355.

Av. *dvan-* (only with preverbs, Barth. 763) : *dvąnman-* 'cloud', Lett. *dvans*, *dvanums* 'vapor, steam', *n*-extensions of IE **dheu-* in Skt. *dhū-* 'shake' (10.26), etc. Walde-P. 1.841.

Many of the verbs for 'blow', including perhaps the inherited group, are of imitative origin. Sometimes there are two common words for 'blow', one in a strong, the other in a weak sense, as NHG *blasen* vs. *wehen*, Russ. *dut'* vs. *vejat'*.

1. IE **wē-*, much more widely preserved in the deriv. sb. for 'wind', Lat. *ventus*, Goth. *winds*, Lith. *vėjas*, ChSl. *větrŭ*, Skt., Av. *vāta-* (1.72). Walde-P. 1.220 f. Feist 541 f.

Grk. ἄημι (poet.); Goth. *waian*, OE *wāwan* (much less common than *blā-*

wan), Du. *waaien*, OHG *wājan*, MHG *wæjen*, NHG *wehen;* ChSl. *vějati* (in Gospels *vŭz-vějati* Mt. 7.25, 27 for πνέω, beside more common *duchati* Lk. 12.55, etc.), Boh. *váti*, Pol. *wiać*, Russ. *vejat'*.

2. Grk. πνέω 'breathe' and the usual word for 'blow', see 4.51.

Grk. φῡσάω, NG φυσῶ (now the usual pop. word), fr. an imitative syllable **bhū̆* beside **pū̆* in Lith. *pūsti*, Lett. *pūst*, SCr. *puhati* 'blow' (Boh. *puchati* 'swell up, stink', *pychati* 'be puffed up', Russ. *puchnut'* 'swell up', *pychnout'* 'breathe hard, pant', etc.), Lat. *pustula* 'blister', etc. Walde-P. 2.81. Trautmann 233.

3. Lat. *flāre* (cpd. *sufflāre* > Romance words; REW 8430), fr. **bhlā-* beside **bhlē-* in OE *blāwan*, ME *blawan*, NE *blow*, OHG *blājan*, MHG *blæjen* (NHG *blähen* mostly 'cause flatulence', refl. 'be puffed up'); and **bhlēs-* in Goth. *-blēsan* (only in *ufblēsan* 'be puffed up'), ON *blāsa*, Dan. *blæse*, Sw. *blåsa*, Du. *blazen*, OHG *blāsan*, etc., all fr. various extensions of an imitative syllable. Walde-P. 2.179. Ernout-M. 369. Walde-H. 1.517. Feist 512.

4. Ir. *sētim*, NIr. *sēidim*, W. *cwythu*, Br. *c'houeza*, fr. **sweizd-*, **swizd-*, with parallel, though not identical, forms in Skt. *kṣvid-* 'hum', Grk. σίζω, Lat. *sībilāre*, ChSl. *svistati* 'hiss', etc., all of imitative origin. Walde-P. 2.517 f. Ernout-M. 936. Pedersen 2.627.

5. Gmc. words, above, 1 and 3.

6. Lith. *pūsti*, Lett. *pūst*, SCr. *puhati*, above, 2.

7. ChSl. *duchati*, *dušą* (reg. in Gospels for πνέω 'blow'), SCr. *duhati*, beside ChSl. *dŭchnąti*, *dychati* (in Gospels *vŭz-* 'sigh'), SCr. *dihati*, etc. 'breathe' (4.51) : Lith. *dusti* 'get out of breath', *dvėsti* 'expire, die', etc., fr. IE **dhwes-*, extension of **dheu-* in Skt. *dhū-* 'shake', etc. (cf. ChSl. *dunąti*, etc., below). Walde-P. 1.846. Berneker 234 f.

ChSl. *dąti*, *dŭmą* (Supr. 'be puffed up'), SCr. *duti*, *dmem* (old), Boh. *douti*, Pol. *dąć*, Russ. *dut'* (here in part) : Lith. *dumti*, Skt. *dham-* 'blow', etc. Walde-P. 1.851 f. Berneker 244.

ChSl. *dunąti*, *duną*, SCr. (old *duti*, *dujem*) *duvati*, Russ. *dut'*, *duvat'*, *dunut'* : Skt. *dhū-* 'shake, agitate', Grk. θύω 'rage, seethe', etc. In part confused with preceding group (where *ą* and *u* were merged). Walde-P. 1.835 f. Berneker 236.

ChSl. *vějati*, etc., above, 1.

8. Skt., Av. *vā-*, above, 1.

Skt. *dham-* : Lith. *dumti*, ChSl. *dąti* 'blow' (above, 7).

Words for 'creep' in the literal sense are also extended to denote slow or stealthy motion, and, conversely, the latter is the primary notion in some of the words included in the list. Apart from an inherited group, several of the words are reflexive or middle forms of those for 'drag', while others are cognate with words denoting such diverse actions as 'slip', 'stroke', 'climb', 'scratch', 'turn', etc.

1. IE **serp-*. Walde-P. 2.502. Ernout-M. 931.

Grk. ἕρπω; Lat. *serpere* (pple. *serpens* 'serpent' > It. *serpe*, whence vb. *serpeggiare*); Skt. *sṛp-* (with *sarpa-* 'serpent'); Alb. *gjarpën* 'serpent'. Clearly an IE root with the dominant sense of 'creep' though in the last analysis, if taken as **ser-p-* beside **ser-* in Skt. *sṛ-* 'flow, hasten, etc.', this would be an early specialization.

2. Grk. ἕρπω (NG esp. fig. 'cringe'), above, 1.

NG σέρνομαι (or with μὲ τὴν κοιλιά 'with the belly'), mid. of σέρνω 'draw, drag' (9.33). Cf. late Grk. σύρεσθαι γαστέρι (LS s.v. σύρω), and συράμενος 'crawling' (Pallad., Migne 34.1084).

3. Lat. *serpere*, above, 1.

Lat. *rēpere* : Lith. *réplioti*, *roploti*, Lett. *rāpuot* 'creep on all fours', perh. fr. **srēp-* beside **serp-* (above, 1). Walde-P. 2.370. Ernout-M. 861, 931. Mühl.-Endz. 3.497.

It. *strisciare*, also and orig. 'touch lightly, stroke', of imitative orig. REW 8309.

It. *serpeggiare*, above, 1.

Fr. *ramper*, formerly 'climb' (cf. also *rampant* 'with raised paws' > NE *rampant*) : It. *rampare* 'clamber up', *rampa* 'claw', etc., all through 'claw, paw', fr. Gmc. **hrampa-* 'hook' (cf. MLG *ramp* 'cramp, misfortune', Du. *ramp* 'misfortune') related to OHG *hrimpfan* 'pull together, wrinkle'. REW 7032. Gamillscheg 739. Falk-Torp 875.

Fr. *se traîner*, refl. of *traîner* 'drag', fr. VLat. **tragīnāre*, fr. **tragere* for *trahere* 'draw' (9.27). REW 8837. Gamillscheg 856.

Sp. *arrastrarse*, refl. of *arrastrar* 'drag' : *rastra* 'track, trail, harrow', fr. Lat. *rāstrum* 'rake'.

Rum. *se tîrî*, refl. of *tîrî* 'drag' (fr. Slavic, ChSl. *trěti*, *tĭrą* 'rub', 9.25). Tiktin 1606.

4. NIr. *snāighim*, fr. root seen in OHG *snahan* 'creep' (rare), OE *snaca* 'snake', etc. Falk-Torp 1098.

NIr. *snāmhaim* 'swim, float' (10.35), also 'creep, crawl'.

NIr. *lāmacān* (sb.), deriv. of *lām* 'hand', is the word used for the child's 'creeping on all fours'.

W. *ymlusgo*, cpd. of refl. *ym-* and *llusgo* 'drag', etym.? Morris Jones 139 (but cf. Loth, RC 36.166).

W. *cropian*, fr. NE (dial.) *crope*, pret. of *creep* (below). But same form in sense of 'grope' fr. NE *grope*. Fynes-Clinton, W. Voc., Bangor Dist., 298. Parry-Williams 182, 220.

Br. *en em stleja*, refl. of *stleja* 'drag', etym.? (Henry 254 : Ir. *slōet* 'a slide', OE *slīdan* 'slide', etc.)

5. ON *skrīða* = OE *scrīþan* 'go, go about, glide', OHG *scrītan*, NHG *schreiten* 'stride' : Lith. *skristi*, Lett. *skriet* 'fly' (10.37). Walde-P. 2.571. Falk-Torp 1027.

Several of the verbs for 'dance' are connected with words for 'jump, leap', or other notions of quick motion; one rests on a specialization of 'enclosure' to 'place for dancing'. Interchange between 'dance' and 'play' is seen in Slavic and by semantic borrowing in Rumanian. Most conspicuous is the extent of loanwords—the Gothic word from Slavic, the OE and OHG from Latin, late Latin from a Greek word, the French from a Gmc. word, and especially the spread from French to the majority of the modern European languages. In part the loanword from French is used mainly with reference to fashionable dancing while the older native word persists in use with reference to folk-dancing, as definitely Russ. *pljasat'* vs. *tancovat'*.

1. Grk. ὀρχέομαι (with ὀρχηστής 'dancer', ὀρχήστρα 'space for dancing', etc.) : Skt. *ṛghāya-* 'rave, rage, tremble', *ṛghāvant-* 'raging, violent', OHG *arag*, OE *earg* 'evil', NHG *arg*, etc., fr. an extension of IE **er-* in Grk. ὄρνῡμι 'stir up, arouse', etc. Walde-P. 1.147. For the semantic relationship, cf. Skt. *nṛt-* (below, 7).

Grk. χορεύω, esp. 'dance the choral dance', but in NG the reg. general word, fr. χορός 'choral dance', also 'place for dancing', the more original application : χόρτος 'enclosed place, courtyard', Lat. *hortus* 'garden', etc. Walde-P. 1.603.

2. Lat. *saltāre* : *salīre* 'jump' (10.43).

Fr. *danser*, OFr. *dancier*, whence the main European words, It. *danzare*, Sp. *danzar*, Rum. *dansa*, Br. *dañsal*, late ON *dansa*, Dan. *danse*, Sw. *dansa*, ME *daunse* (> W. *dawnsio*), NE *dance*, Du. *dansen*, MLG *danzen* (> Lett. *dancuot*), MHG, NHG *tanzen* (> Boh. *tančiti*, *tancovati*, with Pol. and Russ. forms). Doubtless a loanword from Gmc., perh. a Low Frank. **dintjan* = Fris. *dintje* 'tremble, quiver'. REW 2644b. Wartburg 2.82.

It. *ballare*, OFr. *baler* (cf. sb. *bal* > NE *ball*), and also Sp. *bailar* (by a blend with another word), fr. late Lat. *ballāre* 'dance' (Augustine, etc.), loanword fr. Grk. βαλλίζω 'dance' (which *ballō* glosses, CGL 2.255.43, and which is quoted by Athenaeus from Epicharmus and Sophron). Wartburg 1.221. Walde-H. 1.95. Ernout-M. 102. Otherwise REW 909.

Rum. *juca*, orig. 'play' like Fr. *jouer*, etc. (16.27), but used also for 'dance', influenced by the double use of Slavic *igrati* (below, 6).

3. There was apparently no dancing in ancient Ireland (cf. O'Curry 2.406 f.).

'Walk' is most widely expressed by the words for 'go', either alone or in phrases 'go on foot', as Fr. *aller à pied*, NHG *zu fuss gehen*, etc. Rarely is there so specific a word as NE *walk*, clearly distinguished from both *go* and *run* (cf. NED s.v. *walk*, vb.[1] 7). Even where the words for 'go' are not repeated in the list for 'walk', they may be so used. Conversely, some of the other words entered here, as Fr. *marcher*, Sp. *marchar*, may be used in the wider sense of 'go'.

Expressions that are used only for 'take a walk', as Fr. *se promener*, NHG *spazieren gehen*, are not included.

1. Grk. βαδίζω, mostly 'walk leisurely, stroll', βαίνω also 'go', see under 'go' (10.47).

Grk. περιπατέω 'walk about, walk up and down', later simply 'walk' (cf. NT, Mt. 11.5 'the lame walk'), NG. pop. περπατῶ, cpd. of πατέω 'tread, trample' : πάτος 'path', Skt. *panthā-*, ChSl. *pątĭ* 'way', etc. Walde-P. 2.26.

W. *cerdded*, Br. *kerzet* : Ir. *ceird* 'a stepping', *fō-ceird* 'throws' (10.25).

W. *rhodio*, also 'stroll', perh. fr. *rhod* 'wheel, circle' (semantic development 'go in a circle', 'go about', 'walk'?).

Br. *bale*, fr. *bal* 'swing, dance' (fr. Fr. *bal* 'dance', cf. It. *ballare* 10.44), with generalization to 'rhythmic motion' whence 'walk'. Henry 24.

4. Goth. *gaggan*, ON *ganga*, Dan. *gaa*, OE *gangan*, *gān*, etc., all general words for 'go' (10.47).

ME *walke*, NE *walk*, fr. OE *wealcan* 'roll, toss' = OHG *walkan*, MHG, NHG *walken* 'full' (cloth) : Skt. *valgati* 'hops', IE **wal-g-*, extension of **wel-* in Goth. *-walwjan*, OE *walwian* 'roll' (10.15). Walde-P. 1.304. NED *walk*, vb.[1].

Du. *wandelen*, MHG (NHG) *wandeln*, = OHG *wantelōn* 'change, roll', fr. *wantal* (NHG *wandel*) 'a change' : Goth. *wandjan*, NHG *wenden* 'turn', etc. (10.12). Walde-P. 1.261. Weigand-H. 2.1209. Franck-v. W. 774.

Words for 'run' are often related to those for 'flee'. Other affinities are with those for 'jump', 'turn', and 'flow'.

1. IE **drem-*, **drā-*, **dreu-*, apparently extensions of a root **der-* not found in monosyllabic form. Other cognates mean mostly 'step, trample, stumble, etc.'. Walde-P. 1.795 ff.

**drem-*. Grk. aor. ἔδραμον, perf. δέδρομα (poet.), cf. δρόμος 'course'; Skt. *dram-* 'run about, wander'.

**drā-*. Skt. *drā-* (3sg. *drāti*); Grk. ἀποδιδράσκω 'run away', aor. ἀπέδρāν.

**dreu-*. Skt. *dru-* (3sg. *dravati*), Av. *dru-* (caus. *drāvaya-*, pple. *drūta-*, but only of Daevic beings); Goth. *trudan* 'tread, step', etc.

2. Grk. τρέχω, fut. θρέξω, with τροχός 'wheel'; Ir. *droch* 'wheel', Arm. *durgn* 'potter's wheel', fr. **dhregh-* beside **tregh-*(?) in Goth. *þragjan*, OE *þrægan* 'run' (root relations complicated). Walde-P. 1.753 f., 874 f. Feist 500.

Grk. θέω, with θοός 'swift' : Skt. *dhāv-* 'run, flow', *dhāuti-* 'spring, brook', ON *dǫgg*, OE *deaw* 'dew', IE **dheu-*. Walde-P. 1.834.

Byz., NG πιλαλῶ, widespread pop. word for 'run, run hard,' fr. ἐπιλαλῶ (πι- as in πιγούνι 'chin', 4.209), cpd. of λαλῶ (cf. 18.21) in its sense of 'shout' to domestic animals, and so make them run (πιλαλῶ in Patmos, according to an informant, is reg. used for 'drive' sheep, goats, etc.) Korais, Ἄτακτα 1.303 f. Pernot, Phonétique des parlers de Chio 319. Βασ. Φάβης, Ἀθηνᾶ 29, παράρτ. 39 ff.

3. Lat. *currere* (> It. *correre*, Fr. *courir*, Sp. *correr*) : *cursus* 'course', *currus* 'wagon', Gallic *carrus*, Ir. *carr*, Br. *karr* 'vehicle, wagon', further connections (as with OE *hors* 'horse', etc.) dub. Walde-P. 1.428. Ernout-M. 247 f. Walde-H. 1.315 f.

Rum. *alerga* : It. dial. *alargarse* 'withdraw', VLat. **allargāre*, deriv. of Lat. *largus* 'abundant' in its later sense 'wide' (as in It. *largo*, etc., 10.61). REW 352, 4912.

4. Ir. *rethim*, NIr. *rithim*, W. *rhedeg*, Br. *redek* : Ir. *roth*, W. *rhod*, OHG *rad*, Lat. *rota* 'wheel', Skt. *ratha-* 'chariot'. Walde-P. 2.368, Pedersen 2.600 f.

5. Goth. *rinnan*, ON *renna*, OE *irnan*, *rinnan*, ME *rinne*, *renne*, NE *run*, OHG *rinnan*, MHG *rinnen* (NHG *rinnen*); hence NHG *rennen*, Sw. *ränna*, orig. caus. = OHG *rennan*, ON *renna* (pret. *rende*) 'cause to run', Goth. *ur-rannjan* 'cause (the sun) to rise' : Skt. *ṛ-* (3sg. *ṛṇoti*, *ṛṇvati*) 'move, stir' (10.11), Grk. ὄρνῡμι 'rouse, move', etc. Walde-P. 1.138. Falk-Torp 890, 901. Feist 398 f.

Goth. *þragjan*, OE *þrǣgan*, see under Grk. τρέχω, above, 2.

ON *hlaupa* (late in this sense, earlier mostly 'leap'), Dan. *løbe* (Sw. *löpa* 'run' in many phrases, but mostly replaced by *springa;* Hellquist 1051), Du. *loopen*, OHG *hlaufan*, *loufan*, MHG *loufen*, NHG *laufen*, see ON *hlaupa*, OE *hlēapan* 'leap, jump' (10.43).

Sw. *springa*, orig. 'leap, jump', as ON *springa*, OE *springan*, etc. (10.43). Hellquist 1051.

6. Lith. *bėgti*, Boh. *běžeti*, *běhati*, Pol. *biedz*, *biegać*, Russ. *bežat'*, *begat'*, also or orig. 'flee', like Lett. *bēgt*, etc. See 10.51.

Lett. *skriet*, see under 'fly' (10.37).

Lett. dial. *vert*, prob. fr. **wer-* underlying words for 'turn' (10.12). Walde-P. 1.271. Persson, Beiträge 956.

7. ChSl. *tešti*, *tekǫ* 'run, flow', whence the Slavic words for 'flow' (cf. 10.32) : Lith. *tekėti* 'flow, run', Lett. *tecēt* 'flow', Ir. *techim* 'flee' (10.51), Av. *tač-* (3sg. *tačaiti*) 'run, flow', Skt. *tak-* (3sg. *takti*) 'rush'. Walde-P. 1.715.

SCr., Slov. *trčati* : ChSl. *trŭkŭ* 'course, flight', Ir. *trice*, NIr. *tric* 'quick, nimble', root **trek-* : **trek̂-* in Av. *udaro-θrąsa-* 'moving on the belly, creeping' (of snakes)? Walde-P. 1.755.

'Go' is understood here as covering the most generic verbs denoting locomotion, without necessary implication of direction or goal. In so far as they are used for 'go away, go from', it is only by contrast to those for 'come', as in NE *come and go*, etc.

In NE *come* and the other European words listed under 'come' (10.48) there is the implication of approach toward or arrival at a goal (which is often felt as the real or imagined position of the speaker or another; but any such definition is too narrow).

It is probable that this situation fairly reflects the difference in value between the two important IE roots **ei-* and **gʷem-*, as essentially one of aspect. The former expressed the action of going *per se*, while the latter involved the implication of a definite goal. But such a relation is only partially maintained in their derivatives. Skt. *i-* and *gam-* are both used where we must translate 'go' or 'come' according to the situation or the prefix employed (especially *ā-* for 'come', *sam-* for 'come together'), and similarly in Iranian, only that Av. *i-* is rare, *gam-* (*jam-*) frequent and without prefix mostly 'come'. Grk. βαίνω is 'go, walk', and εἶμι sometimes 'come'. The Balto-Slavic words for 'come' (except Lett. *nākt*) are compounds of IE **ei-* with prefixes meaning 'to' or the like (cf. Grk. εἴσ-ειμι 'go to, come').

Grk. ἔρχομαι, aor. ἦλθον, though listed only under 'come', in accordance with what eventually became their prevailing use, are also frequently 'go', especially in Homer, and regularly in ἀπέρχομαι 'go away'.

On the Celtic words for 'go' and 'come', cf. esp. Vendryes, RC 46.217 ff.

1. IE **ei-*, extended **yā-*. Walde-P. 1.102 ff. Ernout-M. 303 ff. Walde-H. 1.406 ff.

**ei-*. Grk. εἶμι (but mostly fut. in sense); Lat. *īre* (> Sp. *ir*, Fr. fut. *irai*, It. inf. *ire*, imperat. *ite*, etc.); Lith. *eiti*, Lett. *iet*, ChSl. *iti*, SCr. *ići*, Boh. *jiti*, Pol. *iść*, Russ. *idti*, Skt. *i-* (3sg. *eti*), Av. *i-* (3sg. *aeiti*, OPers. *aitiy*); Hitt. imperat. 2sg. *it*, 2pl. *iten* (Sturtevant, Hitt. Gram. 95).

**yā-*. Skt., Av. *yā-* : Lith. *joti*, Lett. *jāt*, ChSl. *jachati* 'ride', etc.; uncertain Goth. *iddja*, OE *ēode* 'went', which, moreover, do not coincide (Feist 288 f.); Toch. A *yā-* 'go' (SSS 423, 458); Hitt. *ya-* 'go, march' (Sturtevant, Hitt. Gloss. 184).

2. IE **gʷem-*, **gʷā-*. Walde-P. 1.675 ff. Ernout-M. 1083 ff.

**gʷem-*. Grk. βαίνω 'go, walk'; Lat. *venīre* 'come' (> the Romance words); Goth. *qiman*, OE *cuman*, etc., general Gmc. for 'come'; Skt., Av., OPers. *gam-* 'go, come' (Skt. *gacchati*, Av. *jasaiti*, *sk̂o-* presents like Grk. βάσκω; Av. *jam-* without prefix mostly 'come'; also Av., OPers. *ā-jam-* 'come', whence NPers. *āmadan* 'come'); Toch. *käm-*, *kum-*, etc. 'come' (SSS 428 f.).

**gʷā-*. Grk. aor. ἔβην, Dor. ἔβāν; Skt. aor. *agām*, pres. *jigāti;* Av. aor. *gāt̰;* Lett. *gaju* 'went' (pret. to *iet*).

3. Grk. ἕρπω 'creep, crawl' (10.41), in many dialects simply 'go'. Buck, Grk. Dial. 333.

NG pop. πάω, fr. Grk. ὑπ-άγω 'lead, bring (up, under)', intr. 'go slowly away, retire, withdraw' (of an army, etc.), in NT simply 'go away'. Hence also NG πηγαίνω new pres. to aor. πῆγα = old imperf. ὑπῆγον.

Grk. βαίνω, in NG only in cpds., μπαίνω 'go in', βγαίνω 'go out', fr. ἐμβαίνω, ἐκβαίνω.

4. Lat. *īre*, Sp. *ir*, etc., above, 1.

Lat. *cēdere*, perf. *cessī* (mostly 'go away', but 'go' in cpds., perh. fr. **ce-zd-* with weak grade of **sed-* in ChSl. *choditi*, etc. (below, 8). Walde-P. 2.486. Walde-H. 1.193. Ernout-M. 168 f.

Lat. *vādere* 'go rapidly, rush, advance', in late Lat. simply 'go' (e.g. frequently in Peregrinatio) : Lat. *vadum* 'ford', ON *vaða* 'wade, rush', OHG *watan* 'wade', OE *wadan* 'go, advance' (NE *wade*). Hence the present forms like It. *vado*, *va*, Fr. *vais*, Sp. *voy*, Rum. 3sg. *va*, etc. Walde-P. 1.217. Ernout-M. 1069. REW 9117.

Lat. *ambulāre* 'walk' (10.45), used colloquially for 'go' in Plautus (*quo ambulas tu, bene ambula*) and regularly in late Latin. Hence Fr. *aller*, Rum. *umbla*. REW 412. Wartburg 1.86 f.

It. *andare*, Sp. *andar* (latter mostly 'walk'), much disputed. Apparently fr. a VLat. **ambitāre* (: Lat. *ambīre* 'go around', sb. *ambitus*), but in late Lat. texts there is no trace of such a form beside the common *ambulāre;* hence one suspects some, not precisely explained, reformation of the latter. REW 409, 412.

Rum. *merge*, fr. Lat. *mergere* 'sink, plunge' (10.33). Semantic development perh. 'sink' > 'disappear' > 'withdraw' (cf. Alb. *mërgonj* 'withdraw') > 'go away' > 'go' (so Puşcariu 1058), but may be simply fr. the pop. use of *mergere* for impetuous going, like NE *plunge* into the woods, into the crowd, etc. Cf. *immersit sese in ganeum* 'plunged into a gaming-house', etc. (Plaut.), and *immargebam* in a Roman epitaph from Bulgaria. REW 5525.

5. Ir. *tiagu*, NIr. *tēighim* : Grk. στείχω 'stride, advance, walk' (in Lesb. dial. 'go'), Goth. *steigan*, *-steigan* used for various cpds. of Grk. βαίνω, ON *stīga*, OE, OHG *stīgan*, all used for 'go, go up, go down', Lett. *steigt* 'hasten', etc. Walde-P. 2.614.—Ir. imperat. *eirg*, fut. *-rega*, NIr. *raghaidh*, etc., etym. disputed. Walde-P. 2.364 (: *rigim* 'stretch out'). Pedersen 2.648, Thurneysen, Gram. 473. (: Grk. ἔρχομαι 'come' 10.48).—Ir. pret. *luid* : Grk. ἐλεύσομαι, ἤλυθον (10.48). Walde-P. 2.417. Pedersen 2.378.—NIr. pret. *chuaidh*, Ir. perf. *docuaid*, perh. **dicom-vad-* : Lat. *vādere* (above, 4). Pedersen 2.648.—Ir. inf. *dul*, etym.? (Pedersen l.c. : Alb. *dálë* 'go out, sprout').

W. *myned*, Br. *mont*, *monet*, Corn. *mones* : ChSl. *minąti* 'pass' (of time), Lat. *meāre* 'wander, go', IE **mei-*. Walde-P. 2.241. Pedersen 2.454.—The finite indicative Britannic forms chiefly fr. the root **aĝ-* (in Lat. *agere*, etc.), e.g. (only 3sg. forms quoted) W. pres. *a* (OW *agit*), imperf. *ai*, perf. *aeth;* Br. pres. *a*, imperf. *ae*, pret. *eaz*. Pedersen 2.353, 451 f. (Walde-P. 1.35).—W. subj. (3sg.) *el*, *elo*, Corn. *ello*, Br. fut. *y-elo* : Ir. *adella* 'goes to, visits', either fr. IE **pel-* in Lat. *pellere* 'drive', or fr. **el-* in Grk. ἐλαύνω 'drive'. Walde-P. 1.156. Pedersen 2.353. Thurneysen, Gram. 95.

6. Goth. *gaggan*, ON *ganga*, OE *gangan*, ME *gonge*, OHG *gangan* : Lith. *žengti* 'step, stride', Skt. *jan̄ghā-* 'lower leg', Av. *zanga-* 'ankle'. Walde-P. 1.588. Feist 182.

Goth. *-leiþan* (only in cpds.), ON *līða*, OHG *līdan*, MHG *līden* (OE *līþan* 'go by sea, sail', the latter sense prominent in other dialects also) : Av. *riθ-* (3sg. *iriθyeiti*) 'die' (as 'go away'), IE **leit(h)-*. Walde-P. 2.401. Feist 8.

Goth. *steigan*, etc. : Ir. *tiagu*, above, 5.

Goth. *faran* (but only Lk. 10.7, for μεταβαίνω; *farjan* 'row, sail'), ON *fara*, Dan. *fare*, Sw. *fara*, OE *faran* (also *fēran*, in form = OHG *fuoren* 'lead', but in use = *faran;* NED s.v. *fere*, vb.[1]), ME, NE *fare*, OHG *faran*, MHG *varn* (NHG *fahren*, Du. *varen*), in the modern Gmc. languages mostly 'travel' (but NIcel. *fara* 'go, go away') : Skt. *pṛ-* 'bring across, deliver', Grk. πορεύω 'carry, convey', Lat. *portāre* 'carry', etc. Walde-P. 2.39. Feist 142 f.

Dan. *gaa*, Sw. *gå*, OHG, MHG *gān*, Du. *gaan*, fr. IE **ghē-*, beside OE *gān*, ME, NE *go*, OHG, MHG *gēn*, NHG *gehen*, fr. IE **ghēi-*, prob. : Skt. *hā-*, *hī-* 'leave, give up', in mid. 'go forth, give way' and cpds. 'go up, down, after', etc., Grk. κιχάνω 'reach'. Walde-P. 1.543. Falk-Torp 292.

OE *wadan* : Lat. *vādere*, above, 4.

NE *went*, orig. past of *wend*, OE *wendan* 'turn' (10.12).

7. Lith. *eiti*, Lett. *iet*, above, 1.

8. ChSl. *iti*, SCr. *ići*, etc., above, 1.

ChSl. *choditi*, SCr. *hoditi*, etc., general Slavic (iter. to *iti*, etc.) with sb. ChSl. *chodŭ*, etc. : Grk. ὁδός 'road', ὁδεύω 'wander', Skt. *ā-sad-* 'arrive at, reach', *ut-sad-* 'go away, withdraw', fr. IE **sed-* ultimately identical with **sed-* 'sit' (Lat. *sedēre*, etc.). The sense 'go' might have arisen first by derivation with prefixes (as in Skt.). Walde-P. 2.486. Berneker 392. Otherwise Brückner 181.

9. Skt., Av. *i-*, *yā-*, above, 1.

Skt., Av. *gam-*, *gā-*, above, 2.

Av. *dvar-* 'go' (of Daevic beings) : Skt. *dhorati* 'trots', Grk. ἀ-θύρω 'play', etc., IE **dhwer-* : **dhwen-* in Av. *dvan-* 'fly' (10.37), extensions of **dheu-* in Skt. *dhu-* 'shake' (10.26). Walde-P. 1.842.

'Depart' is simply to 'go away' and is most commonly so expressed (NE *depart* is mostly in literary use). But there are also some terms of different origin.

1. Verbs for 'go' are often used alone for 'go away', as NE *go!*, *begone!*, *he's gone*, It. *andarsene*, Fr. *s'en aller*, Sp. *irse*, etc. Cf. OE *ferde*, Gospels Mk. 5.20 = *eode* Lindisf. = Vulgate *abiit*, Goth. *galaiþ*, ChSl. *ide* in same passage.

2. Verbs for 'go' in compounds or phrases with words for 'away, forth, out', etc. Grk. ἀπ-, ἐξ-έρχομαι, Lat. *ab-*, *ex-īre*, *abs-*, *dē-*, *dis-cēdere* (also *cēdere* alone), Ir. *immthigim* (orig. 'go about' but also 'go away', as NIr.; cf. Windisch 629), W. *ymadael*, *ymadaw* (: *dyfod* 'come', 3sg. *daw*, etc.), Br. *mont kuit* (*kuit* 'free', fr. Fr. *quitte*, sense influenced by *kuitaat* 'quit, leave', fr. Fr. *quitter;* Henry 84), Goth. *afleiþan*, *usgaggan*, ON *ganga af*, *ganga brott*, Dan. *gaa bort*, Sw. *gå bort* (*brott*, *bort* : ON *braut* 'way, road', 10.71. Falk-Torp 95; Dan. also *drage bort* with *drage* 'draw' 9.33, also 'go', Falk-Torp 151), OE *ūtgān*, OHG *ūzgangan*, *argangan*, NHG *weggehen*, *fortgehen*, Lith. *išeiti*, *nueiti*, ChSl. *otiti*, *iziti*, Skt. *apagam-*, etc.

3. Grk. ἀναχωρέω (also ἀπο-), cpd. of χωρέω 'make room, withdraw', fr. χῶρος 'space'.

NG φεύγω 'flee' (10.51), also the most common pop. word for 'go away', e.g. ἔφυγε 'he's gone'.

Byz., NG μισσεύω, in earliest use 'dismiss', then 'be dismissed, depart', fr. μίσσα, eccl. Lat. *missa* 'dismissal' (source of NE *mass*, etc.). G. Meyer, Neugr. Stud. 3.45.

4. It. *partire*, Fr. *partir* (also OFr. *departir* > ME, NE *depart*), Sp. *partir*, fr. Lat. *partīre* 'divide' (fr. *pars*, *partis* 'part'), with semantic development through the use, first in refl., for 'separate oneself' (cf. NE *they parted*). REW 6259. Gamillscheg 673.

Fr. *sortir* ('go forth'), etym. disputed. REW 8110. Gamillscheg 809.

Sp. *salir*, fr. Lat. *salīre* 'jump, leap' (10.43). REW 7540.

Rum. *pleca* (as trans. 'bend'), fr. Lat. *plicāre* 'fold', with sense 'depart' prob. starting in phrase for folding the tents. Note the contrast with Sp. *llegar* 'arrive', fr. the same source (10.55). REW 6601. Puşcariu 1334.

5. OE *gewītan* (usual word for 'depart'), apparently cpd. of *wītan* 'impute' (: Goth. *fra-weitan* 'avenge', OHG *wīzan* 'impute', these : Goth., OE *witan*, etc. 'know'), but semantic development obscure (cf. also OS *giwītan* 'go', OHG *arwīzan* 'depart' in Tat.). Walde-P. 1.238.

Du. (beside *weggaan*, etc.) *vertrekken*, cpd. of *trekken* 'draw' (9.33) and 'march, go'.

NE *leave* (12.18) in phrases like *left the house* is equivalent to 'depart from', hence now also without object, perhaps the most common popular expression, as *he is leaving, he has just left.*

A frequent and obvious relation of words for 'flee' is to those for 'run', just as NE *run away* is the colloquial substitute for *flee*, which is now rather literary. Some are related to those for 'bend', with development through 'bend aside'.

1. Grk. φεύγω, Lat. *fugere* : Lith. *bugti* 'take flight', *buginti* 'frighten', fr. IE **bheug-*, prob. identical with **bheug(h)-* in Skt. *bhuj-*, Goth. *biugan*, 'bend' etc. (9.14). Falk-Torp 242. Feist 499. Weigand-H. 1.553. The view that Goth. *þl-* is from *fl-* and so the whole group connected with that for 'fly' (ON *flj̄ūga*, etc. 10.37), as Zupitza, Gutt. 131, is generally rejected. But there was much later confusion between the two groups. Cf. NED s.v. *flee*.

In words of the inherited group are combined the notions of 'go (come) after, behind' and 'go (come) with, accompany, attend', with dominance of the latter in Indo-Iranian and generally in derivatives. The notion of 'follow aggressively, pursue' was originally foreign to them, though it developed in Latin. Apart from this group, the words for 'follow' are mostly derived from words for 'track, way', but in Celtic (except Br.) from words for 'adhere, stick'.

The literal phrases for 'go after' may also be used everywhere and may even be the more usual popular expressions for 'follow', especially in Slavic.

Many of the words for 'pursue' are connected with, mostly compounds of, those for 'follow'. So in Latin and Romance, and, probably by semantic borrowing, in modern Germanic languages (NHG *verfolgen*, etc.), hence again in Lithuanian and West Slavic.

Some are words that were used primarily of the 'hunt, chase' of animals (3.79) or the 'driving' of cattle. Some are from roots that appear elsewhere in words for 'go', 'run', 'stride', etc., and everywhere the literal phrases for 'run after' or the like may be popular expressions of 'pursue'.

The older European words for 'pursue' and many of the modern cover the more malignant 'persecute', which is the sense of Grk. διώκω in the Gospels, with its translations in Gothic, etc. Less commonly 'persecute' is differentiated either by a new formation as Fr. *persécuter* (> NE *persecute*), back-formation fr. sbs. Lat. *persecūtiō, persecūtor*, or by specialization in this direction of an old word for 'pursue', as Pol. *prześladować* (below, 6).

1. Grk. διώκω (NG pop. διώχνω), perh. pres. formation fr. a perf. *δεδίωκα : δίω 'fly', δίομαι 'drive away', δῑνέω 'whirl', Skt. *dīyate* 'flies, soars'. Walde-P. 1.775. Boisacq 192.

NG κυνηγῶ properly 'hunt' (3.79), but also 'pursue'.

2. Lat. *in-sequī, per-sequī* (late *-sequere* > It. *inseguire*, Sp. *perseguir*, with change of prefix Fr. *poursuivre*, OFr. *porsivre, porsuire*), cpds. of *sequī* 'follow' (10.52).

'Arrive' is most widely expressed by verbs for 'come' or compounds of these. But several new terms have arisen, of diverse sources.

1. Grk. ἀφικνέομαι (or simple ἱκνέομαι), mostly 'arrive at, reach' with acc., but also intr. 'arrive' : ἵκω 'come' also 'reach', prob. : Lith. *siekti* 'reach out with the hand, take oath'. Walde-P. 2.465. Boisacq 372.

Grk. φθάνω in part 'arrive', NG φτάνω usual for 'arrive' (cf. waiter's ἔφτασα lit. 'I have arrived' = 'immediately'), also προφτάνω, see under 'overtake', 10.54.

2. Lat. *advenīre, pervenīre*, cpds. of *venīre* 'come'.

Fr. *arriver* (> It. *arrivare*), in the older language 'reach the shore, land', fr. VLat. **adrīpāre*, deriv. of Lat. *rīpa* 'bank' (1.27). REW 675. Wartburg 1.146 f.

It. *giungere*, fr. Lat. *iungere* 'join', late refl. 'arrive'. Cf. *iunximus nos denuo ad mare rubrum* Peregrinatio 6.3. Similarly Rum. *ajunge* 'arrive' and 'overtake', fr. Lat. cpd. *adiungere*. REW 171, 4620.

Sp. *llegar*, fr. Lat. *plicāre* 'fold', in late Lat., esp. refl., 'turn, approach'. Cf. in Peregrinatio *ut .... sic plicavimus nos ad montem Dei* (2.4), *plicavimus nos ad mare* (6.3), *cum iam prope plicarent civitati* (19.9). So, not fr. *applicāre* as REW 548.

Rum. *sosi*, fr. Grk. σώζω, aor. ἔσωσα 'save', also 'bring safe to', Byz. and NG (new pres. σώνω) also simply 'arrive'. Cf., fr. same source, Alb. *sos* 'finish, arrive' and Bulg. *sosaja* 'come'. Densusianu 358.

The majority of the verbs for 'approach' are based on adverbs for 'near' (12.43). A few are compounds of verbs for 'come' or 'go', or from various other sources.

1. Grk. πλησιάζω, πελάζω fr. πλησίον, πέλας 'near'.

Grk. ἐγγίζω, fr. ἐγγύς 'near'. But NG ἀγγίζω 'touch'.

NG ζυγώνω, fr. class. Grk. ζυγόω 'join'. Cf. Lat. *iungere* 'join', late refl. 'approach', It. *giungere* 'arrive' (10.55).

NG σιμώνω, fr. σιμά 'near'.

NG κοντεύω (fr. κοντά 'near') is rarely used for 'approach' in the literal sense, but reg. in phrases like κοντεύει νὰ πεθάνῃ 'comes near dying'.

2. Lat. *adpropinquāre*, fr. adj. *propinquus* 'near', deriv. of adv. *prope* 'near'. Similarly, late *adproximāre* (> Sp. *aproximar*), through *proximus;* late *adpropiāre* (> OFr. *aprochier*, Fr. *approcher*, Rum. *apropia*). Ernout-M. 815. REW 557–59.

Lat. *accēdere*, cpd. of *cēdere* 'go' (10.47).

Sp. *acercar*, cpd. of *cercar* 'circle, surround' (Lat. *circāre*, REW 1938).

Sp. *allegar* (also 'gather, collect'), fr. Lat. *adplicāre* 'attach, apply', cpd. of *plicāre* 'fold'. Cf. *llegar* 'arrive' (10.55). Ernout-M. 778. REW 548.

3. OIr. *adcosnaim, ascnaim* 'strive for', MIr. *ascnaim, tascnaim* 'approach, visit' (Laws, Gloss.), cpds. of *sni-* orig. 'spin' (6.31), but also 'make an effort'. Pedersen 2.634.

NIr. *druidim* ('close, shut' and 'come close to, approach') : Ir. sb. *drut, druit* 'closing' (**druzd-*?), outside connections? Thurneysen, Idg. Anz. 33.25. Macbain 144.

NIr. *tarraingim* ('draw, pull' and 'draw near to, approach'), fr. Ir. *tairngim*, cpd. of *srengim* 'draw, pull' (9.33). Pedersen 2.637.

W. *nesu, dynesu, neshau*, Br. *nesaat, dinesaat*, derivs. of W. *nes* 'nearer', Br. *nes* 'near'.

Br. *tostaat*, fr. *tost* 'near'.

4. ME *aproche*, NE *approach*, fr. OFr. *aprochier* (above, 2).

5. Lith. *artintis*, refl. of *artinti* 'bring near', fr. *arti* 'near'.

Lett. *tuvoties*, fr. *tuvu* 'near'.

6. ChSl. *približiti sę*, etc., general Slavic, fr. ChSl. *blizĭ*, etc. 'near'.

7. Skt. *abhi-gam-* and other cpds. of *gam-* 'go' or 'come'.

Skt. *upa-sthā* 'stand by' and 'approach', cpd. of *sthā-* 'stand'.

'Enter' is simply to 'go or come in' and is most commonly so expressed, but also in part by compounds of verbs for 'tread, step' or the like, or by a direct derivative of a word for 'within'.

1. Cpds. or phrases with verbs for 'go' or 'come'.

Grk. εἰσέρχομαι, Lat. *introīre*, Ir. *inod-tiagu* (Pedersen 2.645), NIr. *tēighim isteach* (*isteach* 'into', orig. 2. Cpds. of words for 'tread, step, walk', as Lat. *ingredī* (*gradī*, 10.45), NG μπαίνω (fr. ἐμβαίνω, in class. Grk. mostly 'embark'), NHG *eintreten* (*treten* : OE *tredan* 'step upon, tread', etc., outside connections dub. Walde-P. 1.796, Falk-Torp 1291), Dan. *īntræde*, Sw. *inträda* (semantic borrowing?), SCr. *stupiti u*, Boh. *vstoupiti*, Russ. *vstupit'* (: ChSl. *stąpiti* 'tread').

3. Lat. *intrāre* (> It. *entrare*, Sp. *entrar*, Rum. *intra*, Fr. *entrer* > ME *entre*, NE *enter*), deriv. of *intrā* (*inter, intrō*) 'within'. Ernout-M. 482. REW 4511.

4. SCr. *ulaziti* (with sb. *ulaz* 'entrance' = ChSl. *vŭlazŭ* id.) : ChSl. *sŭlaziti* 'descend', etc., this : ChSl. *-lězą, -lěsti* in words for 'ascend, descend'. Berneker 697, 715.

5. Skt. *viç-*, the usual word for 'enter', but this sense perh. extension fr. 'enter the house or home' (cf. NIr. *isteach* 'into', above) in view of the widespread cognate nouns, like Skt. *viç-* 'settlement, dwelling place, house', Grk. οἶκος 'house', Goth. *weihs* 'village', etc. Walde-P. 1.231.

The majority of the old words for 'carry' belong to an inherited group pointing to an IE root of this meaning. Some of this group, like NE *bear*, have ceased to be the common generic words for 'carry' and are used only in more specialized applications. In certain other inherited groups the generic 'carry' is much less widespread and apparently secondary to other notions, such as 'reach', 'support, lift', 'carry by a vehicle'. For the group in which this last is the dominant sense, though sometimes extended to generic 'carry', namely Lat. *vehere*, OE *wegan*, Skt. *vah-*, etc., see under 'ride' (10.66). In the historical period there is development of 'carry' from 'lift', 'carry in a vehicle', 'lead', and 'put, place'.

1. IE **bher-*. Walde-P. 2.153 ff. Ernout-M. 348 ff. Walde-H. 1.483 ff.

Grk. φέρω, NG also φέρνω; Lat. *ferre;* Ir. *biru, berim*, NIr. *beirim;* Goth. *bairan*, OE *beran*, etc., once general Gmc. for 'carry', now in part restricted (Du. *baren*, NHG *gebären* 'bear' children, NE *bear* in this sense, also = 'endure', and in many phrases, as *bear in mind*, but no longer generic 'carry' in common speech); Skt. *bhṛ-*, Av., OPers. *bar-;* Arm. *berem;* Alb. *bie* 'bring'; Toch. *pär-* 'carry, bring' (SSS 448); but ChSl. *berą, bĭrati* 'bring together, collect' (12.21).

2. IE **enk̂-*, **nek̂-*, **n̥k̂-*. Walde-P. 1.1286. Ernout-M. 652.

Grk. aor. ἤν-εγκα (cf. Skt. perf. *ānança*); Lith. *nešti*, Lett. *nest*, ChSl. *nesti, nositi*, etc., general Slavic for 'carry'; Skt. *aç-, naç-* 'reach, attain' (cf. Grk. ποδ-ηνεκής 'reaching to the feet'), Av. *nas-* 'reach, attain', *nāš-* 'carry' (*s*-extension, Barth. 1067); Lat. *nanciscī* 'obtain, receive'; Goth. *ga-nōhs* 'enough', etc.; Ir. *do-iccim* 'come' (10.48). The meaning 'reach, attain' appears to be the primary one and 'carry' a secondary, in part already IE, prob. through 'cause to reach' hence 'bring'.

3. Grk. ἤνεικα or ἤνικα = ἤνεγκα in most dialects except Attic, fr. ἐν- and the root of ἵκω, ἱκνέομαι 'come, reach, arrive at' (10.55). Walde-P. 2.465.

Grk. ἄγω 'lead', orig. 'drive' (10.65), also used for 'carry, bring', but mostly of living creatures.

Grk. βαστάζω 'lift, raise', also 'carry' (Aesch.+, freq. in NT), NG βαστάζω pop. βαστῶ 'support, carry,' and 'bear' = 'endure', etym.? Boisacq 116.

4. Lat. perf. *tulī*, old *tetulī*, pple. *lātus*

Walde-P. 2.39. Ernout-M. 793 f.

Lat. *vehere*, sometimes generic 'carry' but mostly 'carry' on a horse, vehicle, ship, cf. pass. *vehī* 'be carried, ride' and cognates (10.66).

Lat. *gerere*, sometimes 'carry', but mostly 'carry on one's person, wear, conduct oneself, act', etc., root **ges-* (cf. *gessī*, *gestus*) but etym. dub., perh. as **ĝ-es-* : **aĝ-* in *agere* 'drive', etc. Walde-P. 1.37. Ernout-M. 420 f. Walde-H. 1.595 f.

The relation of 'bring' to 'carry' is similar to that of 'come' to 'go' (cf. 10.47). While 'carry' denotes the action without regard to direction, 'bring' involves the implication of a definite goal, often the position of the speaker, but not necessarily so. Generally this notion is either undistinguished from 'carry', as in Grk. φέρω, Lat. *ferre*, etc., which cover both 'carry' and 'bring', or is expressed by compounds of the verbs for 'carry' with prefixes meaning 'to' or the like. For these, as already discussed in 10.47, or obvious compounds of the same, no further comment is needed.

It is only in Germanic that there is a distinctive independent group for 'bring'. But some other words of various primary meanings are also used for 'bring', and the most important of these are listed.

1. Sp. *traer*, fr. Lat. *trahere* 'pull, draw' (9.33).

2. Ir. *to-ucc-* (perfect. to *do-biur*), W. *dwyn*, Br. *dizougen* (= *di* + *dougen*), see under Ir. *ro-ucc-*, Br. *dougen* 'carry', 10.61.

W. *cyrchu* 'approach', but also (prob. through 'go for, go get') 'bring', fr. Lat. *circāre* 'go around' and 'seek', the latter meaning attested by It. *cercare*, Fr. *chercher* 'seek', etc. (11.31). Loth, Mots lat. 157.

Br. *digas*, cpd. of *di-* 'to' and *kas* 'send, lead' (10.63).

3. Goth. *briggan*, OE *bringan*, ME *bringe*, NE *bring*, MLG *bringen* (> Dan. *bringe*, Sw. *bringa*), OHG *bringan*, MHG, NHG *bringen*, beside OE *brengan*, OS *brengian*, MLG, Du. *brengen* (fr. **brangjan*) : W. *he-brwng* 'lead, conduct, bring', MCorn. *hem-bronk* 'will lead', MBr. *ham-brouc*, NBr. *ambrouk* 'lead'. Walde-P. 2.204. Falk-Torp 102. Feist 105.

ON *fœra* (Dan. *føre*, Sw. *föra* 'carry' and 'lead', NHG *führen* 'lead', 10.64), caus. to ON *fara*, Goth. *faran* 'go, travel' (10.47).

ON *koma* 'come' (10.48) with dat. of object, and so reg. NIcel. *koma með*, for 'bring'.

OE *fetian*, ME *fecche*, NE *fetch* (still common locally), prob. as orig. 'go after' : ON *fet* 'a step', *feta* 'find one's way', Grk. πέδον 'ground', etc. Walde-P. 2.24. NED s.vv. *fet* and *fetch*.

OHG *halōn*, *holōn*, MHG, NHG *holen*, Du. *halen* (also 'draw', cf. ME *hale*, NE *haul*) : OE *ge-holian* 'get', perh. Arm. *k'ałem* 'collect, take away', Toch. *käl-* 'lead, bring' (SSS 430). The old comparison with Lat. *calāre*, Grk. καλέω 'call', etc. (Falk-Torp 373, Walde-H. 1.141) is based on the frequent use as 'call' in OHG. But the evidence as a whole indicates that this sense is secondary. Mansion, PBB 33.547 ff. Franck-v. W. 226.

4. Skt. *hṛ-* 'hold, carry, take' and (esp. with *ā-*) 'bring' : Osc. *heriiad* 'capiat', Lat. *hortus* 'garden', etc., IE **ĝher-*. Walde-P. 1.603.

Several of the words for 'send' are derived from words for 'road', with development through an intermediate 'go, travel' to 'cause to go' = 'send'. Some show specialization from 'let go, throw', or 'put, place, prepare, arrange' (an expedition, etc.). Some are connected with words for 'know', 'warn', 'command', and must then have been used first for 'send a message'.

1. Grk. πέμπω, etym.? Boisacq 765.

NG στέλλω, στέλνω, fr. Grk. στέλλω 'make ready, equip, arrange, dispatch' (an expedition), esp. ἀποστέλλω 'send off, dispatch' (an embassy, expedition, etc.) : OE *stellan*, 'set, establish', etc. (12.12).

2. Lat. *mittere* (orig. *sm-*? cf. *cosmittere* Paul. Fest.), etym. wholly uncertain (Av. *maēθ-* 'mittere' Barth. 1105, but?), but meaning 'send' specialization of 'let go, throw', etc., which is also found at all periods and is dominant in the cpds. and in VLat. (whence Fr. *mettre* 'put', etc.). Walde-P. 2.688. Ernout-M. 621 f.

It. *mandare*, Sp. *mandar* (also 'command') = Fr. *mander* 'send word, summon', fr. Lat. *mandāre* 'commit, enjoin', also late 'send word', fr. *man-* = *manus* 'hand' (cf. *man-ceps*, etc.) and *dare* 'give'. Ernout-M. 586. REW 5286.

It. *inviare*, Fr. *envoyer*, Sp. *enviar*, fr. VLat. **inviāre* beside late Lat. *viāre* 'travel', deriv. of *via* 'road' (10.71). REW 9295.

Rum. *trimite*, fr. Lat. *trāmittere* = *trans-mittere* 'send across'. REW 8849. Pușcariu 1763.

3. Ir. *fōidim*, prob. : Skt. *vēdaya-* caus. of *vid-* 'know' (IE **weid-* in Grk. οἶδα 'know', Lat. *vidēre* 'see', etc.), with semantic development 'inform' to 'send (a message)' and 'send' in general. Pedersen 1.359, 2.525.

NIr. *cuirim* 'put, place' (12.12; cf. Ir. *fo-ceird* 'throws' 10.25), also 'send'.

W. *anfon* (and *danfon*, with *dy-* 'to'), perh. fr. **n̥dhi-mon-* : Lat. *monēre* 'warn', caus. of the root **men-* in Lat. *meminī* 'remember', Skt. *man-* 'think'. Pedersen 2.301.

Br. *kas* (also 'lead'), fr. Norm. Fr. *casser* = Fr. *chasser* 'hunt, drive away'. Henry 56.

NHG *schicken*, earlier meaning 'prepare, suit, adapt', so MHG *schicken* = ON *skikka* 'arrange' : OHG *scehen*, NHG *geschehen* 'happen', etc. Weigand-H. 2.702. Kluge-G. 516.

5. Lith. *siųsti*, Lett. *sūtīt*, see under Goth. *sandjan*, etc. (above, 4).

6. ChSl. *sŭlati*, more commonly perfect. *poslati* (iter. *sylati*), etc., general Slavic, perh. : Goth. *saljan* 'offer', ON *selja* 'give over, sell', OE *sellan* 'give, sell'. Walde-P. 2.504 f. Brückner 499.

7. Skt. *pra-iṣ-* in *preṣyati* and caus. *preṣayati* (so also OPers. *frāišayam* 'I sent'; but Av. *fraēšya-* 'impel' and 'promise', not quotable as 'send'), cpd. of *pra-* 'forth' and *iṣ-* 'impel, hurl' = Av. *iš-* 'set in rapid motion' : ON *eisa* 'start violently', Lat. *īra* 'anger', etc., IE **eis-*. Apart from an inherited group in which 'lead' seems to be the primary sense, words for 'lead' are cognate with others for 'draw', 'seek', 'road', 'carry', 'go' (as 'cause to go'), and 'drive'. Strictly, one 'leads' from in front and 'drives' from behind, but in situations where both have in common the notion of 'conduct' the difference may be lost sight of, with resulting interchange.

Apart from the inherited group, some words for 'drive' are cognate with words for 'strike' or 'push', but many are of doubtful origin. Several were clearly used first of driving cattle.

'Drive' is understood here as 'force to move on or away' (from in front of one, action from behind), virtually the opposite of 'lead'. But the words listed, like NE *drive*, have many other, and quite disparate, uses.

Where the object is a horse or a vehicle, NE always uses *drive* (so Grk. ἐλαύνω, e.g. Hom. Il. 23.334, and Lat. *agere*), but the majority of other modern languages use rather a verb for 'lead' (10.64) or 'guide', e.g. NG ὁδηγῶ, It. *guidare*, *condurre*, Fr. *conduire*, Sp. *guiar*, *conducir*, NHG *lenken* (but *vieh treiben*), Russ. *pravit'* ('rule, direct', etc. : *pravyj* 'right').

1. IE **aĝ-*, widespread root in words with primary meaning 'drive' but with highly developed secondary uses. Walde-P. 1.35 ff. Ernout-M. 24 ff. Walde-H. 1.23 f. Pedersen 2.451.

Grk. ἄγω 'lead'; Lat. *agere* 'drive, carry on, act, do', etc.; Ir. 3sg. *ad-aig*, MIr. *imm-aig*, with vbl. n. *immāin*, whence NIr. *iomāinim*, *tiomāinim;* Skt. *aj-*, Av. *az-;* Arm. *acem* 'bring, lead'; ON *aka* 'ride' (in a vehicle); Toch. *āk-* 'lead, conduct' (SSS 422).

2. Grk. ἐλαύνω : Arm. *elanem* 'come out, mount' (Celtic *el-* in W. *elo* 'go', etc. here or fr. **pel-*?; 10.47). Walde-P. 1.156.

NG ἐλαύνω 'drive' is a lit. word. The pop. survivals are λάμνω 'row' (10.852) and ἔλα 'come!' fr. imperat. of ἐλάω in intr. sense.

NG διώχνω 'pursue' (10.53) is used also for 'drive away', e.g., τοὺς ἔδιωχνε ἀπὸ κοντά του.

NG βγάζω, aor. ἔβγαλα, used in many senses but including 'drive out', fr. Grk. ἐκβάλλω (cpd. of βάλλω 'throw'; for pres. βγάζω, see βάζω 'put', 12.12), which in the NT is the usual word for 'drive out', as Mt. 21.12, Mk. 11. 15, etc. (rendered literally as 'throw out' in Goth. *uswairpan*, as *cast out* in K. James version, but as 'drive out' in OE, Luther, ChSl., etc.).

For 'drive' domestic animals, ὁδηγῶ may be used (as for a vehicle, cf. above), and there are various pop. local terms, as πιλαλῶ (see 10.46), σαλαγῶ (beside σάλαγο 'noise'; cf. σαλαγή βοή Hesych.).

3. Lat. *agere*, above, 1.

Lat. *pellere* 'drive, drive out, strike', with *pulsus* 'a blow', Umbr. *ař-peltu* 'adpellito, admoveto', root connections much disputed and various combinations possible. Walde-P. 2.57. Ernout-M. 750. Walde-H. 1.59. Cpd. *impellere* > It. *impellere*, Sp. *impeler*, obs. Fr. *impeller* > NE *impel*, all only rarely used in the literal sense of 'drive'.

It. *spingere*, also 'push, shove' (cf. Fr. *pousser*), fr. VLat. *expingere* 'drive out', cpd. of *pangere* 'drive in, fix'. REW 3048.

It. *cacciare*, Fr. *chasser* 'drive away, drive', also 'hunt' (3.81), fr. VLat. **captiāre* : *capere* 'seize, take'. REW 1662.

Fr. *pousser* (also 'push, shove'), fr. Lat. *pulsāre* 'push, strike, beat' (: *pulsus* 'blow', *pellere* 'drive', above). REW 6837.

Of the numerous Sp. words which may correspond to NE *drive* in special connections, as *guiar*, *conducir* (for vehicles, see above), *impeler* (so in lit. sense NT, Lk. 8.29, but now only fig.) may be mentioned *arrear* (usual word for driving domestic animals), fr. the driver's cry *arre* (cf. Acad. Esp. Dicc. Hist. 1.777); *echar*, esp. 'drive away', orig. 'throw' (10.25).

Rum. *goni*, fr. Slavic, ChSl. *goniti*, etc. (below, 6).

Rum. *mîna* 'drive' (animals), fr. late Lat. *mināre* id., see Fr. *mener* 'lead', etc., 10.64.

4. Ir. *ad-aig-*, NIr. *tiomāinim*, above, 1.

W. *gyrru*, beside *gyrr* 'drove (of cattle)', etym. dub. Walde-P. 1.609. Falk-Torp 524, 1496. Morris Jones 137.

Br. *kas*, apparently the pop. word in this sense, but also 'lead', and 'send', see 10.63.

5. Goth. *dreiban*, *draibjan*, Dan. *drive*, Sw. *driva*, OE *drīfan*, OHG *trīban*, etc. (but ON *drīfa* 'drive' of spray, 'drift, let drift'), outside cognates dub. Walde-P. 1.872. Feist 124 f.

ON *reka*, OE *wrecan* (the latter largely 'drive away, banish, venge') = Goth. *wrikan* 'pursue' (10.53).

ON *keyra*, Sw. *köra*, see under Dan. *køre* 'ride', 10.66.

6. Lith. *varyti* prob. : Lett. dial. *vert* 'run' (10.46) and = ChSl. *variti* 'go before, outstrip, anticipate'. Trautmann 353. Buga, Kalba ir Senovė 298. Otherwise Walde-P. 1.281.

Lith. *ginti*, Lett. *dzīt*, ChSl. *gŭnati*, *goniti* (for ἐλαύνω but also for διώκω 'pursue, persecute'), etc., general Slavic : Skt. *han-*, Grk. θείνω 'strike', Ir. *gonim* 'wound', etc., IE **gʷhen-* (semantic development through 'strike' to 'urge cattle, etc., forward', whence 'drive', then 'pursue'). Walde-P. 1.680 f. Berneker 328. Brückner 146.

7. SCr. *tjerati* = late ChSl. *těrjati* 'pursue, chase' (Miklosich 356), clearly fr. Grk. θηράω 'hunt, chase' (3.81). For *t*, cf. *temelĭ* fr. θεμέλιον.

Boh. *puditi*, Pol. *pędzić* (beside *pęd* 'impulse, speed', *piądz* 'span') = ChSl. *pąditi* 'press, drive' (beside *pędĭ* 'span'), this possibly (semantic development through 'lead cattle by attached rope'?) : Lat. *pendēre* 'hang' (i.e. 'hang by a stretched cord'), Lith. *spęsti* 'set a snare', OLith. *spandyti* 'stretch', IE **(s)pend-*. Walde-P. 2.662. Meillet, Études 264.

8. Skt. *aj-*, Av. *az-*, above, 1.

Skt. *nud-* in this sense mostly 'drive away', also 'push, thrust' (cf. also Romance words), etym. dub., but perh. as *d*-present : Grk. νεύω, Lat. *nuere* 'nod, beckon', etc., also Skt. *nāuti* 'turns, twists' (intr.), fr. a root **neu-* having the notion of 'short, quick motion', whence 'shove', 'nod', etc. Walde-P. 2.323 (316).

'Ride' on a horse or other animal (a) and 'ride' in a vehicle (b) are expressed in part by the same, in part by different, words, as shown in the list. Apart from an inherited group, several are derivatives of the words for 'horse' (3.41), some of these used only in sense (a), some extended to cover sense (b). Some are words for 'drive', which from such phrases as 'drive horses, drive a vehicle' have come to be used intransitively not merely of the person doing the driving but also of anyone being driven in a vehicle (as NE *drive*). Some are words for 'go, travel' used also, or specifically, for 'ride'. In the Romance languages (also NG) 'ride' is expressed only by phrases with words for 'horse' or 'carriage'.

1. IE **weĝh-*, widespread in words for 'carry' or 'be carried' in a vehicle and in those for 'vehicle, wagon', so that this, rather than generic 'carry', is to be assumed as the dominant IE sense. Walde-P. 1.249 f. Ernout-M. 1079 f.

Grk. ϝέχω 'carry, bring' (Cypr., Pamph.; lost in most dial.), ὄχος 'wagon', ὀχέομαι 'be carried' (by wagon, chariot, horses, ship, etc., these usually expressed), sometimes alone 'ride', 'float'; Lat. *vehere* 'carry' (mostly by animal or vehicle), pass. *vehī* 'be carried, ride'; Goth. *ga-wigan*, OHG *wegan* 'move', OE *wegan* 'carry, bear, weigh' (NE *weigh*); Lith. *vežti* 'carry' in a vehicle, *važiuoti* 'ride'; ChSl. *vesti* (*vezą*), *voziti* 'vehere', refl. 'vehī', etc.; Skt. *vah-*, Av. *vaz-* 'carry in a vehicle' and 'ride'.

2. Grk. ἐλαύνω 'drive' (10.65), also intr. 'drive, ride'.

Grk. ἱππεύω, deriv. of ἱππεύς 'horseman' : ἵππος 'horse'.

NG πηγαίνω καβάλλα (καβάλλα used as adv. 'on horseback, muleback', etc.), also καβαλλικεύω (mostly 'mount a horse, mule', etc., but also 'ride'), derivs. of Lat. *caballus* 'horse'. G. Meyer, Neugr. Stud. 3.22.

NG for 'ride' (b) only phrases, πηγαίνω μὲ ἅμαξα, etc.

3. Lat. *vehī*, above, 1.

Lat. *equitāre*, deriv. of *eques* 'horseman' : *equus* 'horse'.

In the modern Romance languages only phrases for 'ride', for which see the list. Rum. *călare* is fr. late Lat. *cabellārius*.

4. Ir. *rīadaim* : OE *rīdan*, etc., below, 5.

Ir. **marcaigim* (cf. *marcaigecht* 'horsemanship'), NIr. *marcuighim*, W. *marchogaeth*, fr. Ir. *marc*, W. *march* 'horse' (on formation, see Loth, RC 37.46). Here also Br. *marc'hekaat*, but replaced now largely by phrases *mont war var'ch*, *mont en eur c'harr* 'go on a horse, in a vehicle' copied after the French. The Irish and Welsh words are now generalized (perh. after the NE *ride*) to both sense (a) and sense (b).

5. ON *rīða*, OE *rīdan*, OHG *rītan*, etc., Gmc. group (chiefly in sense (a) in the older period, but OHG *rītan*, MHG *rīten* also (b)) : Ir. *rīadaim* 'ride', but further connections dub. Walde-P. 2.348 (but on Lett. *raidīt* 'urge', cf. Mühl.-Endz. 3.470, Trautmann 243).

ON *aka*, Sw. *åka* (Dan. *age* mostly replaced by *køra*), orig. 'drive' : Lat. *agere*, Skt. *aj-* 'drive', etc. (10.65).

Dan. *køre* orig. 'drive' (horses, a vehicle, etc.), like Sw. *köra*, ON *keyra* (these only rarely intr.), the latter also 'whip, lash' (horses), 'fling, thrust', outside connections dub., but perh. : SCr. *žuriti se* 'hurry', *gurati* 'shove, press'. Falk-Torp 524, 1496 f. Hellquist 551.

NE *drive* (10.65), used in *drive a horse*, *carriage*, *automobile*, hence also intr. in the same connection (but not for *ride* in a railway car, etc.), e.g. *go driving* vs. *go riding*. NED s.v. B5c.

NHG *fahren* also 'go, travel', etc., cf. Goth. *faran* 'go', etc. (10.47).

6. Lith. *joti*, Lett. *jāt*, ChSl. *jadą*, *jachati*, etc., general Slavic : Skt. *yā-*, Av. *yā-* 'go' (10.47). Walde-P. 1.104. Berneker 442.

Lith. *važiuoti*, ChSl. *voziti sę*, etc., above, 1.

Lett. *braukt*, also 'stroke' = Lith. *braukti* 'stroke, wipe' : Lett. *brukt* 'crumble', *bruzināt* 'whet (a scythe)', fr. **bhreu-k-* : **bhreu-k̂-* in Russ.-ChSl. *brusnuti* 'shave, scrape' (cf. under Russ. *brosit'* 'throw away', 10.25). Walde-P. 2.197, Mühl.-Endz. 1.326, 339. (For a semantic parallel cf. NHG *streichen* 'stroke, rove, wander').

7. Skt. *vah-*, Av. *vaz-*, above, 1.

Av. *bar-* 'bear' also act. and mid. 'ride'. Barth. 936 and 942, note 14, suggesting confusion of *bar-* 'bear' with *bar-* 'move rapidly' (of wind, water).

The notion intended by the heading is that of forcing back either by a sharp impact or by gradual pressure. These two aspects are sometimes distinguished, at least roughly, as in NHG stossen vs. schieben. But, in general, the former is the earlier, as shown by the frequent connection with words for 'strike, hit', 'drive', or 'shoot', or others for 'swift' motion.

1. Grk. ὠθέω : Skt. vadh- 'strike, kill', Av. vādāya- 'force back'. Walde-P. 1.254 f. Boisacq 1080.

NG σπρώχνω, fr. cpd. of preceding, namely *εἰσ-προ-ωθέω (cf. class. προωθέω) > *σπρώθω, whence σπρώχνω after the -νω presents and with guttural fr. aor. ἔσπρωξα for ἔσπρωσα (cf. class. ὦσα and ἔπρωσα; for spread of ξ- vs. σ- aor. cf. Hatzidakis Einleitung 136). Cf. NG dial. ἀμπώθω, ἀμπώχνω, etc. fr. ἀπωθέω ('Ιστ. Λεξ. 1.550).

2. Lat. trūdere : Goth. us-þriutan 'make trouble for, annoy', OE (ā)þrēotan 'make weary', OHG driozan 'press, oppress', ChSl. trudŭ 'trouble', vb. truditi 'trouble', etc. Walde-P. 1.755. Ernout-M. 1060.

Lat. pellere 'drive, strike' (10.65) and cpds., esp. impellere, sometimes 'push'. Hence also, through pulsus 'blow', pulsāre (> Fr. pousser) and impulsāre (> Sp. empujar). Ernout-M. 750. REW 4323, 6837.

Lat. impingere (> Rum. împinge), *expingere (> It. spingere), cpds. of pangere 'drive in, fix'. Ernout-M. 728 f. REW 3048, 4309. Tiktin 764.

Rum. îmbrînci, deriv. of brînca 'paw, hand' (etym. dub., REW 1271).

3. NIr. sāithim, fr. Ir. sāidim 'drive in, fix', caus. of saidim 'sit'. Pedersen 2.605.

W. gwthio, beside sb. gwth 'a push, thrust', etym.?

W. hyrddu, beside sb. hwrdd 'a push', etym.? Loth, RC 36.175 (vs. Morris Jones 153).

Br. poulza, fr. an early form of Fr. pousser, fr. Lat. pulsāre (above, 2).

4. Goth. afskiuban (renders ἀπωθέω), ON skȳfa, Norw. skyve (Dan. skubbe fr. a different but related form), OE scūfan, ME shoue, NE shove (Du. schuiven now less common in this sense), OHG scioban, MHG, NHG schieben, prob. : Lith. skubus 'swift, quick', ChSl. skubati 'pull' (cf. also Skt. kṣubh- 'a jerk'), with common notion of quick motion. Walde-P. 2.556. Feist 9. Falk-Torp 1035, 1047. Weigand-H. 2.703.

Dan. støde, Sw. stöta, Du. stooten, NHG stossen, all also 'hit, strike' as mostly in earlier times (Goth. stautan only in this sense) : Lat. tundere 'strike, beat, pound', Skt. tud- 'hit, push', etc. Walde-P. 2.618. Feist. 451. Falk-Torp 1198.

Dan. puffe, fr. MLG puffen, buffen 'hit, pop' (Du. poffen, boffen), of imitative orig. (cf. NE puff, etc.). Falk-Torp 854.

Sw. skjuta (also 'shoot') : ON skjōta 'put in motion, shoot', etc. (with bātr 'boat' = 'shove off'), OE scēotan 'move or cause to move swiftly or suddenly, shoot', etc. (cf. NE shoot the bolt), OHG sciozan (NHG schiessen), etc. Falk-Torp 1044.

Early ME þrusten, þristan, ME thrist, NE thrust (now mostly a lit. word), fr. ON þrysta 'thrust, press,' this perh. : Lat. trūdere (above, 2). Walde-P. 1.755. Falk-Torp 1294. NED s.v. thrust, vb.

ME pusshe, NE push, fr. Fr. pousser (above, 2). NED s.v. push, vb.

ME putte 'put, place' (12.12), also 'push', NED s.v. put, vb.B1.

Du. duwen : OHG dūhan, OE þȳn 'press', prob. : Grk. τύκος 'mason's hammer', ChSl. tŭknąti 'prick, stab' and with other extensions, Lat. tundere, Goth. stautan, etc. (above), Grk. τύπτω 'strike, hit, beat'. Walde-P. 2.615 ff. Frank-v. W. 144.

5. Lith. stumti, Lett. stumt, fr. another extension of the root *(s)teu- seen in Goth. stautan, NHG stossen, etc. (above, 4). Mühl.-Endz. 3.1106.

6. SCr. gurati, deriv. of gura 'hump'? Berneker 363 (but without this vb.).

SCr. turati, turiti (also 'throw') : Russ. turit' 'urge, drive away', outside connections? Miklosich 365.

Boh. strčiti, strkati (with sb. strk 'a thrust') : Pol. sterczeć 'jut out, project', etc., outside connections? Miklosich 322. Brückner 513.

Boh. šoupati, fr. sb. šoup 'a shove', this fr. NHG schub id. (: schieben, above, 4).

Pol. pchać, Russ. pichat' : ChSl. pĭchati 'strike' (with the fist or the foot), Boh. pichati 'prick', Skt. piṣ-, Lat. pīnsere 'pound, crush'. Walde-P. 2.1. Ernout-M. 770 f. Brückner 401.

Pol. sunąć, suwać = Russ. sunut', sovat' 'thrust, poke, put in', ChSl. sovati 'throw, hurl' : Lith. šauti 'shoot', Walde-P. 2.552. Brückner 526.

Russ. tolkat', tolknut' : ChSl. tlŭką, tlěsti, tlŭknąti 'strike, knock' (9.21).

7. Skt. tud- : Lat. tundere 'strike, beat, pound', Goth. stautan 'hit', NHG stossen, etc. (above, 4).

Although several of the words discussed under 'road' are used to cover any sort of 'way', there are usually other words for the less pretentious 'path'.

1. Grk. πάτος : ChSl. pątĭ 'road, street', Skt. path-, Av. paθ- 'way, road, path', etc. (10.71). Hence Byz. μονοπάτιον, NG μονοπάτι, cpd. with μόνος 'alone, single'.

Grk. ἀτραπός, Hom. ἀταρπός, lit. 'trodden (path)', cpd. of ἀ-cop. and the root of τραπέω 'tread grapes' : Russ. trepat' 'crush, peel, strip', tropat' 'stamp', tropa 'path' (cf. below, 6). Walde-P. 1.756.

Grk. τρίβος, lit. a 'worn, beaten' path : τρῑβω 'rub'.

2. Lat. sēmita (> OFr. sente, Sp. senda), etym.? Ernout-M. 922. Hence adj. sēmitārius > Fr. sentier, Sp. sendero. REW 7813. Gamillscheg 796.

Lat. callis (> Sp. calle 'street', Rum. cale 'road'), etym. disputed, perh. : Bulg. klánik 'space between hearth and wall', SCr. klánac 'narrow passage', etc., NHG helle, hölle 'chimney-corner'. Walde-P. 1.356 f., Walde-H. 1.140.

Sp. vereda, fr. MLat. verēda, properly a road for the verēdī 'post-horses'. REW 9226. Du Cange s.v. veredus.

Rum. cărare (= Sp. carrera 'course, avenue', etc.), fr. VLat. *carrāria 'wagon road', deriv. of carrus 'wagon'. REW 1718.

3. MIr. cassān 'foot-path', NIr. cosān, fr. coss 'foot'. K. Meyer, Contrib. 323.

Ir. conar, see under 'road' (10.71).

W. llwybr, etym.? (Morris Jones 127 : Grk. λείπω, Lat. linguere 'leave'.)

Br. gwenodenn, etym. dub., but perh. fr. gwen 'pliant, flexible' (from the winding course?). Henry 151.

Br. ravent, etym. dub., but perh. for

rao-hent, cpd. of rao 'pole-chain' (on vehicles, etc.) and hent 'road' (in sense of 'twisted road'?). Henry 230.

4. Goth. staiga; ON stīgr, Dan. sti, Sw. stig, OE stīg, ME sti, OHG stīga, MHG stīc, NHG steig; Lett. stiga, ChSl. stĭza, stĭdza, etc., general Slavic : Goth. steigan, ON stīga 'climb, mount', Lett. staigāt 'walk' (10.45), ChSl. stignąti 'arrive', Ir. tiagu 'go' (10.47), etc. Walde-P. 2.615. Falk-Torp 1160. Feist 447.

OE pæþ, ME, NE path, Du. pad, OHG, NHG pfad, much disputed. Possibly (but historically difficult) an early WGmc. loanword of either Grk. (πάτος) or Iran. (cf. Av. paθ-, 10.71) origin. Other etymologies unconvincing. Walde-P. 2.26 f. Weigand-H. 2.401. Kluge-G. 438. Franck-v. W. 485.

5. Lith. takas, Lett. teka, taks : Lith. tekėti 'run', etc. (10.46).

Lett. stiga, above, 4.

6. ChSl. stĭza, stĭdza, SCr. staza, Boh. stezka, Pol. ścieżka, Russ. stezja, above, 4.

Russ. tropa, dim. tropinka (Pol. trop 'track'), see under Grk. ἀτραπός, above, 1.

7. Skt. Av. words for 'path', see under 'road' (10.71).

The distinction between 'road' and 'street' (in a town) is secondary and incomplete. Words for 'road' covered also 'street', and some came to be used mainly in the latter sense, like NE street. Several of the other words that are used mainly for 'street', and listed here only, are sometimes used also for 'road'.

1. Grk. ὁδός 'road' (10.71) also and in NG only 'street' (beside pop. δρόμος).

Grk. ἄγυια (sc. ὁδός), formed with the same suffix as the fem. perf. act. pple. in -υῖα (cf. also ὄργυια, etc.) fr. ἄγω 'lead'.

Grk. πλατεῖα (sc. ὁδός), fem. of πλατύς 'wide', in Hellenistic times the common word for 'street' (freq. in NT and pap.) but in NG the public 'square'.

Grk. ῥύμη 'force, rush' (fr. ἐρύω 'drag'), in Hellenistic times (LXX, NT, pap.) 'street' or 'alley', with development, fr. 'rush through', 'going, passage', like that in Fr. allée (> NE alley) fr. aller 'go'.

2. Lat. via, It. via, see 'road' (10.71).

Lat. platēa, fr. Grk. πλατεῖα (above, 1).

Fr. rue (> Sp. rua 'street in a village'), fr. Lat. rūga 'wrinkle, fold, crease'. REW 7462.

Sp. calle, fr. Lat. callis 'path' (10.72).

Rum. stradă, fr. It. strada 'road' (10.71).

Rum. uliță, fr. the Slavic (below, 6). This is now used for the street in a village, but stradă for the city street.

3. Ir. slige, see 'road' (10.71).

Ir. srāt, NIr. srāid, fr. Lat. strāta (10.71), directly (Pedersen, Vendryes) or through OE (Marstrander, Bidrag 76); in either case the use affected by English. W. ystryd (used locally = heol) fr. ME strete. Parry-Williams 27.

W. heol, formerly also 'course, way' = Ir. seol 'course', etym.?

Br. ru, fr. Fr. rue (above).

4. Goth. gatwō, ON gata (> ME gate), Dan. gade, Sw. gata, OHG gazza, MHG gazze, NHG gasse (in the north mostly 'lane, alley', but cf. Kretschmer, Wortgeogr. 491 f.), etym. disputed and wholly dub. Walde-P. 1.543. Feist 205.

Goth. plapja (once) by assim. or mere error fr. Grk. πλατεῖα or Lat. platēa (above, 1, 2).

OE stræt, OHG strāza, etc., see under Lat. strāta (via) 'paved road' (10.71).

5. Lith. gatvė, Lett. gatva, fr. Gmc., above, 4. Buga, Kalba ir Senovė 114 f. Mühl.-Endz. 1.609.

Lith. ulyčia (now replaced by gatvė in lit. language), fr. Pol. ulica (below).

Lett. iela : Lith. eilė 'row', Lett. iet, Lith. eiti 'go' (10.47). Mühl.-Endz. 2.35.

6. ChSl. raspątije (so reg. for πλατεῖα in Gospels; later also pątĭ or cěsta; Jagić, Entstehungsgesch. 415 f.) cpd. of raz- 'apart' and pątĭ 'road' (10.71).

SCr., Pol., Russ. ulica, Boh. ulice, as orig. 'narrow opening' : ChSl. ulijĭ, Lith. aulys 'beehive', orig. 'hollow' (tree), Grk. αὐλός 'flute, tube, pipe', Arm. ul, uli 'road', etc. Walde-P. 1.25. Brückner 593.

7. Skt. rathyā- 'carriage-road, highway, street', fem. of adj. rathya- 'belonging to a chariot' : ratha- 'chariot, car'.

Skt. vīthi- 'row' and 'road, street' : vī- 'approach eagerly, seek', etc.

It is intended to cover here the most important words for a wheeled vehicle, whether for carrying persons or goods, whether four- or two-wheeled. The differentiation which prevails in the current use of NE carriage, wagon, car, cart (see NED) is secondary and still by no means rigid. Furthermore, there is a wealth of words for special types of vehicle, which must be ignored except as they have become more generic. So the specific words for 'chariot', like Grk. ἅρμα, Lat. currus, are omitted, although 'chariot' is included in the scope of many of those listed and is the usual sense of the only Avestan words quotable.

Many of the words, including those of the inherited group, are derived from verbs for 'carry in a vehicle' or 'ride', with isolated cases from 'draw, pull', 'turn', or 'go'. Others reflect characteristics of the structure, as, in general, the 'wheel' or some feature of special types. Several Gallic words for special types of vehicle were adopted in Latin, and one of these is the most prolific source of European loanwords.

1. Derivatives of IE *weĝh-, in Grk. ὀχέομαι, Lat. vehī, Lith. vežti, ChSl. voziti, Skt. vah- 'ride', etc. (10.66). Walde-P. 1.249 f. Ernout-M. 1080.

Grk. ὄχος, ὄχημα; Lat. vehiculum (> It. veicolo, Fr. véhicule, NE vehicle, but not pop. words); Ir. fēn, NIr. fēan; ON

vagn, Dan. vogn, Sw. vagn, OE wægn, ME wain, MLG wagen, and wage (> Lett. vāg'i, pl. after rati), Du. wagen (> early NE wagan, wagen, NE wagon), OHG wagan, MHG, NHG wagen; Lith. vežimas, ChSl. vozŭ (mostly 'chariot'), Boh. vůz, povoz, Pol. wóz, powóz, Russ. povozka; Skt. vāhana-, vāha- (both also 'draught-animal').

2. Grk. ἅμαξα (NG also pop. τὸ ἀμάξι), in Hom. sometimes the 'framework, chassis' of the wagon, usually the four-wheeled wagon in contrast to the two-wheeled ἅρμα 'chariot', cpd. with second part: ἄξων, Lat. axis, etc. 'axle' (10.77), first part prob. : ἅμα 'together', hence a coll. for the '(wheels) with axles' making up the chassis. Kretschmer, KZ 39.549 ff., Glotta 9.216 ff., 12.216 ff. Otherwise, as orig. 'with one axle', Meringer, KZ 40.217 ff.

Grk. ἀπήνη, prob. as orig. 'wagon with a tentlike top' (the pioneer 'covered wagon' in U.S.), a cpd. ἀ-πήνη with ἀ-cop. (cf. also Thess. καπᾶνα for *κατ-πᾶνα) : πῆνος· ὕφασμα Hesych., Lat. pannus, Goth. fana 'cloth', etc. Bezzenberger, BB 27.149. Meringer, KZ 40.228. Walde-P. 2.5.

NG καρρότσα 'carriage', κάρρο 'cart', see Lat. carrus (below, 3).

3. Lat. vehiculum, above, 1.

Lat. raeda (rēda, rhēda), Gallic word : ON reið, OHG reita 'carriage', Ir. rīadaim, ON rīða, etc. 'ride' (10.66). Walde-P. 2.348.

Lat. carrus, Gallic word = Ir., MW carr, Br. karr : Lat. currus 'chariot', currere 'run', etc. (10.46). Walde-P. 1.427 f. Ernout-M. 157. Walde-H. 1.174.

Hence It., Sp. carro 'cart', Fr. char (mostly 'chariot', etc., now in military use for armored car or 'tank'), dim. charrette 'cart', Rum. car 'heavy wagon', NG κάρρο 'cart' (ON kerra 'chariot'), Sw. kärra, ME carre (fr. ONorthFr.), NE car, Du. kar, MLG kar(r)e (> Dan. karre), OHG carra, carro, MHG, NHG karre (> Lith. karas, Lett. k'erra, Pol. kara 'pushcart', Boh. kara 'cart'); derivs., It. carrozza 'coach' (> NG καρρότσα), Rum. căruță 'light wagon', Fr. chariot, Sp. carruaje, etc. REW 1721. Wartburg 2.426 ff. Falk-Torp 499, 520. NED s.v. car, sb. Berneker 448.

Lat. plaustrum, etym. dub. Walde-P. 2.90. Ernout-M. 777.

It. vettura, Fr. voiture, fr. Lat. vectūra 'transportation, carrying' : vehere 'carry', vehī 'drive', vehiculum 'carriage' (above, 1).

Sp. coche, the same word as, but in much more generic application than, the general Eur. word Fr. coche, NE coach, NHG kutsche, etc., 'coach' fr. Hung. kocsi 'carriage, wagon, cart' (fr. Kocs a place-name). Wartburg 2.830. NED s.v. coach, sb.

Rum. trăsură, deriv. of tras, pple. of trag 'pull, draw'. Tiktin 1638.

4. Ir. fēn, NIr. fēan, above, 1.

Ir. carpat, NIr. carbad (> W. cerbyd), the reg. word also for 'chariot', cognate with or reloaned from Gallo-Lat. carpentum 'two-wheeled carriage or cart' : Lat. corbis 'basket' (with reference to the body of wickerwork). Pedersen 1.118. Vendryes, De hib. voc. 122. Walde-H. 1.171.

Ir. carr, NIr. cārr, Br. karr : Lat. carrus (above, 3).

NIr. cairt, W. cart, ceirt, fr. ME cart(e) (below, 5).

NIr. also carrāiste fr. NE carriage, and cōiste fr. NE coach.

W. ben (men) : Gall. benna 'genus vehiculi', Grk. φάτνη 'crib, manger', orig. of wickerwork, fr. IE *bhendh- in Skt. bandh-, Goth. bindan 'bind', etc. Walde-P. 2.152.

5. ON *vagn*, OE *wægn*, etc., general Gmc., above, 1.

ON *reið*, OHG *reita*, see Lat. *raeda* (above, 3).

ON *kartr*, OE *cræt*, ME *carte* (this form perh. fr. Norse), NE *cart*, perh. orig. with body of basket-work and so : MHG *krenze* 'basket', OHG *kratto*, *krezzo* 'basket', OE *cradol* 'cradle', etc. Walde-P. 1.595. Falk-Torp 499. NED s.v. *cart* sb.

Dan. *karre*, Sw. *kärra*, ME *carre*, etc., see Lat. *carrus* (above, 3).

ME, NE *chariot* (fr. OFr. *chariot*, above, 3), formerly more generic than now. NED s.v.

NE *carriole* (fr. Fr. dim. *carriole*), used only of a special type, but interesting because of the resulting old New England (by pop. etym.) *carryall*.

NE *carriage*, fr. ME *cariage* 'act of carrying' and 'thing carried, burden', fr. ONorthFr. *cariage*, deriv. of *carier* 'carry', this again deriv. of Lat. *carrus* (above, 3). Used for 'wheeled vehicle' since 16th. cent., now esp. one for carrying persons. NED s.v.

6. Lith. *vežimas*, above, 1.

Lith. *ratai*, Lett. *rati*, lit. 'wheels', pl. of *ratas*, *rats* 'wheel' (10.76). Cf. ChSl. *kola* (below, 7) and Toch. A *kukäl*, B *kokale* 'wagon' : Skt. *cakra-*, Grk. κύκλος 'wheel' (10.76).

Lett. *vāg'i*, above, 1.

Lett. *divriči* (esp. 'two-wheeled cart', also *riči*, Mühl.-Endz. 3.522), cpd. of *div-* for *divi* 'two' and form related to *ritenis* 'wheel' (10.76). Likewise *divritenis* 'bicycle' and 'two-wheeled cart'. Mühl.-Endz. 1.473.

7. ChSl. *kola*, *kolesa*, SCr. *kola* (Pol. *kolasa*, *kolaska*, Russ. *koljaska* dim. 'calash'), pl. of *kolo* 'wheel' (10.76). Berneker 548.

ChSl. *vozŭ*, Boh. *vůz*, *povoz*, etc., above, 1.

SCr. *taljige*, Russ. *telega* 'cart' (Pol. *telega*, etc., not ordinary word), fr. Turk. *talika* 'light four-wheeled carriage'. Miklosich, Türk. Elemente 2.46. Brückner 568.

8. Skt. *vāhana-*, *vāha-*, above, 1.

Skt. *yāna-* : *i-* 'go' (10.47).

Skt. *anas-* (mostly 'draught-wagon, cart') : Lat. *onus* 'load'. Walde-P. 1.132 f. Ernout-M. 703.

Skt. *ratha-*, Av. *raθa-* 'chariot' : Lat. *rota*, Lith. *ratas* 'wheel' (10.76).

Av. *vāša-* : *varət-* 'turn' (10.13–14). Barth. 1418.

Words for 'wheel' include an inherited group derived from a root for 'turn' and others from roots meaning 'run' or 'roll'.

1. IE *k^welo-s, *k^wolo-s, redupl. *k^wek^wlo-s, fr. *k^wel- in Skt. *car-* 'move, wander', Grk. πέλομαι 'be in motion', etc. Walde-P. 1.514 ff. Falk-Torp 413.

ON *hvel*; OPruss. *kelan*; ChSl., SCr., Boh. *kolo*, Pol. *koło*, Russ. *koleso*; Grk. κύκλος 'ring, circle', also rarely 'wheel'

(sg. Hom. Il. 23.340, mostly in pl. κύκλα); ON *hvēl*, *hjōl*, Dan., Sw. *hjul*, OE *hweogul*, *hweowol*, *hwēol*, ME *hwele*, *whele*, NE *wheel*, Du. *wiel*; Skt. *cakra-*, Av. *čaxra-*; Toch. A *kukäl*, B *kokale* 'wagon'.

2. Derivs. of IE *reth- in Ir. *rethim*, W. *rhedeg* 'run', etc. (10.46). Walde-P. 2.368. Ernout-M. 871.

Lat. *rota* (> Romance forms); Ir. *roth*, W. *rhod*, Br. *rod*; OHG *rad*, MHG *rat*, NHG *rad*; Lith. *ratas*, Lett. *rats*; Skt. *ratha-*, Av. *raθa-* 'chariot' (10.75). Here NG ρόδα fr. Ven. *roda* = It. *ruota*. G. Meyer, Neugr. Stud. 2.77.

3. Grk. τροχός = Ir. *droch* : Grk. τρέχω 'run', etc. (10.46). Walde-P. 1.874 f.

4. Ir. *roth*, W. *rhod*, Br. *rod*, above, 2.

5. Lith. *ratas*, Lett. *rats*, above, 2.

Lith. *tekinis* : *tekėti* 'run', (10.46).

Lett. *ritenis* : *ritināt*, *rietet*, *rist* 'roll' (10.15). Mühl.-Endz. 3.532.

Lett. *skritulis* : Lith. *skritulys* 'circle, knee-pan', *skrytis*, OPruss. *scritayle* 'felloe', Lith. *skriesti* 'make a circle', OE *scriþe* 'course', *scrid* 'carriage', fr. extensions of *sker- in words for 'turn, bend'. Mühl.-Endz. 3.894. Walde-P. 2.571.

6. SCr. *točak* : *tok*, ChSl. *tokŭ* 'flow', but through the sense of 'run' as in ChSl. *teką*, *tešti* 'run, flow' (10.46).

SCr. *kotač* : *kotrljati*, Russ. *katit'*, etc. 'roll' (10.15). Berneker 591.

7. Skt. *cakra-*, Av. *čaxra-*, above, 1.

10.77 AXLE

Grk.	ἄξων	Goth.	....	Lith.	*ašis*

NIr.	*acastōir*	OHG	*ahsa*	Av.	....
W.	*echel*	MHG	*ahse*		
Br.	*ahel*	NHG	*achse*		

With few exceptions, the words for 'axle' belong to an inherited group.

1. Derivs. of IE *aks-, this prob. fr. *ages- : *ag- 'drive' in Skt. *aj-*, Lat. *agere*, etc. (10.65). Walde-P. 1.37. Ernout-M. 97. Walde-H. 1.89.

Grk. ἄξων; Lat. *axis* (> It. *asse*, Sp. *eje*), It. *sala* (fr. VLat. *axalis), Fr. *essieu* (fr. VLat. *axilis); OE *eax*, ME *ax*, *ax-tre* (*tre* here as 'beam'), NE dial. *ex* (usual pop. form in New England), Du. *as*, OHG *ahsa*, MHG *ahse*, NHG *achse*; Lith. *ašis*, Lett. *ass*; ChSl. *osĭ*, SCr. *osovina*, rarely *os* (Boh. *osa* 'axis'), Pol. *oś*, Russ. *os'*; Skt. *akṣa-* (Av. *aša-* 'shoulder'); ON *ǫxull*, *ǫxul-trē* (> ME *axle-tre*, NE *axle*), Dan. *aksel*, Sw. *axel* (Gmc. *ahsulaz); W. *echel*, Br. *ahel* (fr. *aksilā); Rum. *osie* fr. Slavic.

In late Lat. *axis* became identical with *assis* 'board', whence the two meanings of It. *asse* and the prevalence of derivs. in most Romance dialects. Wartburg 1.160 f., 190.

2. Ir. *fertas* 'distaff, spindle' (6.32), also 'axle' (Laws, Gloss. s.v.).

NIr. *acastōir* (Dinneen, etc.; *acaistēar* McKenna), fr. ME *axtre*.

3. Boh. *náprava*, also 'restoration, repairing', abstract to *napraviti* 'set right, repair', with specialization to 'axle' as the part that breaks down and needs repairing?

10.78 YOKE

Grk.	ζυγόν	Goth.	*jukuzi*	Lith.	*jungas*

NIr.	*cuing*	OHG	*joh, juh*	Av.	....
W.	*iau*	MHG	*joch*		
Br.	*yeo*	NHG	*joch*		

Most of the words for 'yoke' reflect an IE word for 'yoke' derived from a root for 'yoke, join'. In Slavic this has been mostly replaced by a derivative of another root for 'fit, join'.

1. IE *yugo-m, deriv. of *yeug- in verbs for 'yoke, join', as Skt. *yuj-*, Av. *yuj-*, Grk. ζεύγνυμι, Lat. *jungere*, Lith. *junkti*, etc. (this an extension of IE *yeu-, in Skt. *yu-* 'yoke, harness, bind, fasten', etc.). Walde-P. 1.201 f. Ernout-M. 501 f. Feist 304. Berneker 421 f.

Grk. ζυγόν, also ζυγός, NG ζυγός; Lat. *iugum* (> Romance words); Ir. *cuing* (*com-yung-), W. *iau*, Br. *yeo*; Goth. *jukuzi* (*juk* only for ζεῦγος 'yoke of oxen'), ON *ok*, OE *geoc*, etc., general Gmc.; Lith. *jungas* (*-n-* fr. *junkti*), Lett. *jūgs*; ChSl. *igo* (*jĭgo fr. *jŭgo), Boh. *jho* (Pol. *igo-* in place-names; Russ. *igo* now only fig.); Skt. *yuga-m* (Av. form not quotable, but NPers. *juγ*, etc.); Hitt. *yugan*, *yukan*.

2. ChSl. *jarĭmŭ* (late, cf. Jagić, Entstehungsgesch. 348), SCr. *jaram*, Pol. *jarzmo* (> Boh. *jařmo*), Russ. *jarmo* (Slavic *arĭmŭ, *arĭmo) : Grk. ἁρμός 'joint, fastening', ἅρμα 'chariot', Lat. *arma* 'equipment, arms, etc.', *m*-formations to IE *ar- in Grk. ἀραρίσκω 'join together', etc. Berneker 31. Walde-P. 1.73.

'Ship' is understood here as a seagoing vessel of some size in contrast to the smaller 'boat', with disregard of the more specific technical use of NE *ship* and the fact that NE *boat* is also a popular generic term. Furthermore, the IE 'ship', that is, what was denoted by the word which yielded the widespread group for 'ship', was rather a 'boat', and ultimately only a 'dugout'. There is

evidence of IE words for 'oar' and 'row', but not for 'mast' or 'sail'. Cf. Schrader, Reallex. 2.295 ff.

Apart from the inherited group, the most common connection, in part reflecting the primitive 'dugout', is with words denoting some sort of hollow object, as 'vessel' (in orig. sense of *vessel*), 'pot', 'tub', 'trough', 'belly', etc. A late Grk. word for a kind of boat is a prolific source of European loanwords denoting a special type of ship or generic 'ship'. Specialization of 'something built' to 'ship' occurs. Connection with verbs for 'sail, float' is exceptional.

Words for the modern steamship are combinations of those for 'steam' and 'ship' or 'boat', as NE *steamship*, *steamboat*, NHG *dampschiff*, Fr. *navire* (*bâtiment*, *bateau*, etc.) *à vapeur*, NG ἀτμόπλοιο, Russ. *parovoe sudno*, or simply those for 'steam' or derivs., as NE *steamer*, NHG *dampfer*, Fr. *vapeur*, It. *vapore* (> NG pop. βαπόρι), Russ. *parochod*.

1. IE *nāu-, root connection wholly uncertain. Walde-P. 2.315. Ernout-M. 656 f. REW 5863.

Grk. ναῦς; Lat. *nāvis* (> It., Sp. *nave*, obs. Rum. *naie*, *navă*), *nāvigium* (> Fr. *navire*, Sp. *navio*); Ir. *nau*, *nō*; ON (poet.) *nōr*; Skt. *nāu-*, NPers. *nāv* (OPers. *nāviyā* 'navigable'? Av. *nāvaya-* 'navigable'), Arm. *nav*.

2. Grk. πλοῖον = ON *fley* (poet.) : Grk. πλέω 'sail, float', Slav. *ploviti* 'float', etc. (10.34, 10.36).

NG pop. καράβι, fr. καράβιον, dim. of κάραβος 'horned beetle, crayfish' (: κέρας 'horn'), which came to be applied to a kind of boat, apparently from its crab-like appearance (cf. Hesych. ἐφόλκια· μικρὰ καράβια) and is a common Byz. word. Hence also late Lat. *carabus* 'wicker boat covered with hide' (Isid.), It. *caravella*, NE *caravel*, etc., also the Slavic group (below, 7). For the application of other Grk. animal names to certain types of ships (κύκνος, δόρκων, κριός, τράγος) cf. Gelzer, Leont. v. Neap., p. 128.

3. Lat. *nāvis* and derivs., above, 1.

Derivs. of Lat. *vascellum*, dim. of *vās* 'vessel, dish, utensil', show specialization to 'seagoing vessel, ship', as It. *vascello*, OFr. *vessel* (> ME, NE *vessel* in current speech mainly in this sense, cf. NED s.v.), Fr. *vaisseau*, Sp. *bajel*. REW 9163.

It. *bastimento*, Fr. *bâtiment*, derivs. of It. *bastire*, Fr. *bâtir* 'build' (9.44). REW 981.

Sp. *buque*, fr. Cat. *buc* 'belly, ship's hull, ship', this fr. Gmc., OE *būc*, OHG *būh* 'belly'. REW 1376.

Rum. *corabie*, fr. the Slavic (below, 7).

4. MIr., NIr. *long*, W. *llong*, usually considered loanwords fr. Lat. *longa* (*nāvis*), cf. Vendryes, De hib. voc. 152, Pedersen 1.195; but Loth, RC 43.133 ff., takes as Celtic *lungā : Ir. *luighe* 'caldron, kettle, pan', *coblach* 'fleet'.

Br. *lestr*, also 'vessel, pot' (as Ir. *lestar* mostly, but also 'ship'; Laws, Gloss, s.v.), Corn. *lester* 'ship' (OCorn. gl. *nāvis*), W. *llestr* 'vessel, pot', fr. the root *les- in Goth. *lisan*, ON *lesa* 'pick up, collect' (12.21). Walde-P. 2.440. Thurneysen, KZ 37.95.

5. Goth., ON *skip*, OE *scip*, etc., general Gmc. (OHG also 'vessel' in older sense), prob. as 'hewn-out, hollowed log' : Lett. *šk'ibīt* 'hew, cut', ON *skipa* 'arrange, divide', fr. IE *skei-b-, extension of *skēi- in Skt. *chyati* 'cuts off', etc. Walde-P. 2.545. Falk-Torp 992. Feist 434.

ME, NE *vessel*, above, 3.

6. Lith. *laivas* 'ship', Lett. *laiva* 'boat' (Russ. dial. *lajba*, Pol. dial. *łajba*), fr. Finn. *laiva* 'ship'. Berneker 686.

Lett. *kug'is*, fr. MLG *kogge* = MHG *kocke*, late OHG *kocho* 'sort of boat'

(broad with round bow and stern), Icel. *kuggur* 'barge'. Berneker 537. Mühl.-Endz. 2.300.

7. ChSl. *korablĭ*, Boh. *koráb*, Russ. *korabl'* (Pol. *korab* 'boat, skiff'), an old general Slavic loanword (despite *b* for expected *v*) fr. late Grk. καράβιον (above, 2). Berneker 567. Brückner 256. Otherwise Preveden, Language 6.279 ff.

ChSl. *ladĭji*, *aldĭji* (less common than *korablĭ*, cf. Jagić, Entstehungsgesch. 358), SCr. *lađa*, Boh. *lod'* (Pol. *łódź*, *łódka*, Russ. *lodka* 'boat'), perh. as orig. 'hollow vessel' : ON *alda* 'wave', Dan. *olde* 'trough', OE *ealdoþ* 'trough, tub'. Walde-P. 1.92. Brückner 310.

SCr. *brod*, also and orig. 'a ford', as general Slavic (Russ., Boh. *brod*, Pol. *bród*, etc., Berneker 86 f.), hence as means of crossing it 'boat', extended to 'ship', Rječnik Akad. s.v.

Pol. *okręt*, cpd. of *kręt* 'a twist' : *kręcić*, *krącić* 'twist' (ChSl. *krątiti* 'turn', etc. 10.14). Semantic development prob. through 'plaited vessel' of some kind, cf. SCr. dial. *okrut* 'cask', Boh. *krutina* 'knot, cradle'. Berneker 627. Brückner 377 f.

Pol. *statek*, formerly 'property, equipment, implements' (cf. expressions like NHG *fahrzeug*, Dan. *fartøj*, etc.), fr. the root of *stać* 'stand', etc. Brückner 514.

Russ. *sudno* 'vessel' ('ship' or 'boat') : *sosud* 'vessel, vase', Pol. *sąd*, SCr., Boh. *sud* 'vat, tub', etc. Brückner 483. Walde-P. 1.827.

Most of the words for 'sailor' are derivatives or compounds of words for 'ship' or 'sea'; a few are from 'sail, navigate'.

1. Grk. ναύτης (> Lat. *nauta*), Ir. *nōaire*, *noere*, Skt. *nāvika-*, derivs. of Grk. ναῦς, etc. 'ship' (10.81).

2. Fr. *marin*, Sp. *marino*, fr. Lat. *marīnus* adj. 'marine', deriv. of *mare* 'sea'. It. *marinaio*, *marinaro*, OFr. *mariner* (> ME, NE *mariner*, now poet.), Sp. *marinero*, Rum. *marinar*, fr. MLat. *marīnārius*. REW 5359.

Fr. *matelot* (> Rum. *matelot*; pl. > Du. *matroos* > Dan., Sw. *matros*, NHG *matrose*, Russ. *matros*), fr. OFr. *matenot* 'comrade', fr. ON *mǫtunautr* 'mess-companion' (cpd. of *matr* 'food, meal' and *nautr* 'companion'). Gamillscheg 599. Falk-Torp 705. Franck-v. W. 417.

3. Ir. *nōaire*, above, 1.

Ir. *loingseach*, deriv. of *long* 'ship' (10.81).

NIr. *mairnēalach*, cf. *mairnēalacht* 'navigation', apparently fr. Sc. and North E. *marinal* 'mariner, sailor', fr.

OFr. *marinal*, MLat. *marīnālis* (cf. NED s.v.).

W. *morwr* and W. *llongwr*, cpds. of *mor* 'sea' and *llong* 'ship' with *gwr* 'man'.

Br. *merdead*, cf. W. *mordwyad* '(sea) voyage' : MBr. *mordeiff*, Br. (*merdei*) *mordei*, W. *mordwyo* 'navigate, sail' (10.36).

Br. *martolod*, fr. Fr. *matelot*, with *r* fr. *merdead*. Henry 196.

4. ON *skipari*, OE *scipere* (MLG, MDu. *schipper* > NE *skipper* 'captain of a small vessel'), derivs. of *skip*, etc., 'ship' (10.81).

ON *skipamaðr*, *skipmaðr*, OE *scipmann*, ME *schipman*, OHG *scifman*, MHG *schifmann*, cpds. of words for 'ship' and 'man'.

ON (NIcel.) *sjōmaðr*, Dan. *sømand*, Sw. *sjöman*, ME *seman*, NE *seaman*, Du. *zeeman*, NHG *seemann*, cpds. of words for 'sea' and 'man'.

OE *sǣlīþend*, OHG *sēolīdanti* lit. 'seagoing', cpds. of word for 'sea' and pple. of OE *līþan*, OHG *līdan* 'go'.

Dan., Sw. *matros*, Du. *matroos*, NHG *matrose*, above, 2.

NE *sailer*, agent noun of vb. *sail* (10.36), now written *sailor* after the agent nouns of Lat. origin, as distinguished from *sailer* used of a ship (*a fast sailer*).

MHG *marnære*, fr. MLat. *marīnārius* or It. *marinaro* (above, 2).

5. Lith. *jūreivis*, *jūrininkas*, Lett. *jūrnieks*, derivs. of Lith. *jūra*, Lett. *jūr'a* 'sea'.

Lett. *kug'inieks*, deriv. of *kug'is* 'ship'.

6. Late ChSl. *morjaninŭ*, Boh. *námořník*, Russ. *morjak*, derivs. of ChSl. *morje*, etc. 'sea'.

SCr. *mornar*, *mrnar*, Boh. (old) *marinář*, Pol. *marynarz*, fr. It. *marinaro* (above, 2). Berneker 2.19 f.

'Boat' is understood here as a small craft in contrast to the larger 'ship' (10.81). But there is no sharp line, and the words entered here are of diverse scope. Some are the same as those entered under 'ship'. Thus Grk. πλοῖον and dim. πλοιάριον are used in NT without distinction for the fishing boats (e.g. πλοιάριον Mk. 3.9, πλοῖον Mk. 4.1) and rendered by Goth. *skip*, OHG *scif*, ChSl. *korablĭ*. Conversely, some of those entered here, as NE *boat*, Fr. *bateau*, are sometimes also used as generic terms, with reference to even

the largest vessels. Some cover rowboats and small sailing craft, some only the former, and some only still more specific types of small boats. For the scope of the Greek and Latin terms, only a few of which are included here, cf. Torr, Ancient Ships 105 ff., and for the Old Norse, cf. Falk, Wört. u. Sach. 4.85 ff.

1. Grk. λέμβος (> Lat. *lembus*), so Byz. and lit. NG, etym.? Boisacq 568.

Grk. σκάφη (> Lat. *scapha*) also 'trough, tub' : σκάφος 'hollow vessel', σκάπτω 'dig'.

Grk. κύμβη (> Lat. *cymba*), also 'drinking cup, bowl' : Skt. *kumbha-* 'pot', MIr. *comm* 'vessel', W. *cwmm* 'valley', etc., fr. *kum-b-, extension of IE *keu- in words for 'swelling, round', etc. Walde-P. 1.376. Boisacq 534.

NG βάρκα, fr. late Lat. *barca* (below, 2).

2. Lat. *lunter* (> Rum. *luntre*), *linter*, also 'washtub, trough', etc., etym.? Walde-P. 2.437, 440. Ernout-M. 567. Walde-H. 1.809 f.

Lat. *cymba*, *scapha*, fr. Grk., above, 1.

Late Lat. *barca*, fr. *bārica, deriv. of *bāris*, fr. Grk. βᾶρις 'flat-bottomed boat', in origin an Egypt. word (Copt. *barī*). Hence Byz., NG βάρκα; It. *barca* (> Fr. *barque* > NE *bark*), Fr. *barge* (> NE *barge*), Sp. *barca*, *barco*, Rum. *barcă*; MIr. *bārc*; late ON *barki*, MHG *barke*, etc. The words of this group are applied in different languages and periods to the most diverse types, from a small rowboat (only, or covering small sailboat) to a large three-masted vessel (as NE *bark* in the technical sequence according to the rigging, *ship*, *bark*, *brig*, *brigantine*). Ernout-M. 103. Walde-H. 1.96. Wartburg 1.251. NED s.vv. *bark* and *barge*.

Fr. *bateau*, OFr. *batel* (> It. *battello*), deriv. of Anglo-Norm. *bat* fr. OE *bāt* (below, 4). REW 985. Wartburg 1.281.

Sp. *bote*, fr. NE *boat*.

3. Ir. *curach* = NIr. *curach*, W. *corwg*, *corwgl* 'coracle, boat of wickerwork covered with a hide' (in OIr. the regular type of boat) : Grk. κώρυκος 'leather bag', Lat. *corium* 'leather', Skt. *carman-* 'hide, leather'. Pedersen 1.332. Walde-P. 2.574.

MIr. *bāt*, NIr. *bād*, fr. OE *bāt* or ON *bātr* (below). Marstrander, Bidrag 127.

W. *bad*, fr. OE *bāt*. Parry-Williams 34.

W. *cwch*, also 'hive, crown of a hat' : Br. *kouc'h* 'lid of a hive', perh. fr. a MLat. *coccus* for *cocca* 'strong boat', of uncertain origin. Loth, Mots lat., 155. Thurneysen, Keltorom. 55.

Br. *bag*, fr. Fr. *bac* 'ferry, ferryboat', also 'trough', of Gallic origin? Henry 23. REW 862.

4. Goth. *skip*, OHG *scif* 'ship, boat' (10.81).

OE *bāt* (> ON *bātr*, Dan. *baad*, Sw. *båt*), ME *bote*, *boot* (> Du., LG *boot* > NHG *boot*), NE *boat* (> Russ. *bot*, esp. 'ship's boat') = ON *beit* poet. 'ship', orig. perh. as 'hollowed-out tree' : Skt. *bhid-*, Lat. *findere* 'split', Goth. *beitan*, OE *bītan*, etc. 'bite'. Walde-P. 2.139. Falk-Torp, 38 f. NED s.v. *boat*.

ON *nǫkkvi*, OE *naca*, OHG *nacho*, MHG *nache*, NHG *nachen*, as '(boat from hollow) tree trunk' : Skt. *naga-* 'tree, mountain'. Walde-P. 2.304. Falk-Torp 773.

MHG *nāwe* (NHG dial. *naue*), fr. Lat. *nāvis* 'ship' (10.81). Weigand-H. 2.281.

NHG *kahn* : MLG *kane*, Du. *kaan* (obs.) 'ship's boat, yawl', ON *kæna* 'sort of boat' (rare), Dan. *kane* 'sled', also ON *kanna*, etc., 'can', perh. cognate with MIr. *gann* 'vessel' (otherwise only Gmc.). Walde-P. 1.535. Kluge-G. 274. On the use and distribution of the NHG words, see Kretschmer, Wortgeogr. 245 ff.

5. Lith. *laivelis*, *laive* (NSB), Lett. *laiva* : Lith. *laivas*, now 'ship' (10.81).

Lith. *valtis*, prob. same word as the obs. *valtis* 'fishing net, seine' (: Russ. *volot* 'fiber', etc., Walde-P. 1.303), with transfer to 'fishing boat'. Cf. NE *seiner* (NED s.v.) and NG γρῖπος 'seine' and also 'seiner' (e.g. Pernot, Recueil p. 104.9). Otherwise (: OHG *wald* 'woods', etc.) Schrader, Reallex. 2.311.

6. ChSl. *korablĭ*, see 'ship' (10.81).

SCr. *čamac*, fr. *čam* 'pine tree', rarely 'boat', fr. Turk. *çam* 'pine tree'. Rječnik Akad. 1.885.

SCr. *čun*, Boh. *člun* (Pol. *czółno*, Russ. *čeln*, *čelnok* 'skiff, canoe'), as orig. 'dugout' : Lith. *kelmas* 'tree-stump', Lett. *celms* 'stump', OHG *scalm* 'navis' (Graff 6.491), Norw. *skolm* 'pod', etc., fr. IE *skel- in words for 'cut, split, etc.'. Walde-P. 2.594. Berneker 167.

Boh. *lod'ka*, Pol. *łódka*, (also *łódź* larger 'boat'), Russ. *lodka* : ChSl. *ladĭji*, etc. 'ship' (10.81).

7. Skt. *nāu-* 'ship, boat', see 10.81.

Skt. *plava-* (also 'raft, float') : *plu-* 'float, swim' (10.34).

10.84 RAFT

Grk.	σχεδία	Goth.	....	Lith.	*sielis*
NG	σχεδία	ON	*floti*	Lett.	*pluosts, pluts, sielains*
Lat.	*ratis*	Dan.	*flaade*	ChSl.	....
It.	*zattera*	Sw.	*flotte*	SCr.	*splav*
Fr.	*radeau*	OE	....	Boh.	*vor, plt'*

NIr.	*slaod*	OHG	*flōz*	Av.	....
W.	*cludair*	MHG	*vlōz*		
Br.	*radell*	NHG	*floss*		

Many of the words for 'raft' are derived from the verbs for 'float'. A few are connected with verbs for 'slide, slip', here, too, doubtless through the notion of 'float'. Others reflect the construction of rafts of sticks or logs, as 'fastening together, bundle, pile', etc.

1. Grk. σχεδία, fr. fem. (sc. ναῦς) of σχέδιος 'casual, temporary' with reference to a light, hastily made construction. Cf. σχεδιάζω 'do offhand, improvise'. Boisacq 932.

2. Lat. *ratis*, often in pl. and defined as 'logs fastened together' (*rates vocantur tigna colligata, quae per aquam aguntur*, Paul. Fest.), and so perh. : OE *rōd*, OHG *ruota* 'rod, pole'. Walde-P. 2.638. Ernout-M. 852. Hence fr. dim. form (MLat. *radellus*, *rasellus*, *razellus*, Du Cange), Prov. *radel* > Fr. *radeau*; also Br. *radell*, *razell*. REW 7088.

It. *zattera* (Sp. *zata*, *zatara*, but not the usual word), fr. MHG *tatze* 'paw'? REW 8599.

Sp., Port. *balsa* 'raft' (also 'pool', in Port. also 'clump of briar bushes'). 'Raft' prob. based on the material used in its construction, but the ultimate source of the word is unknown (Iber.?). REW 917.

Rum. *plută*, also 'cork', fr. the Slavic, cf. Slov. *pluta*, SCr. *pluto* 'cork', Russ. *plot* 'raft' (below, 5). Tiktin 1193.

3. Ir. *raith*, fr. Lat. *ratis* (above, 2). RIA Contrib. s.v.

NIr. *slaod*, also 'swath, layer or pile, sliding mass' (Dinneen), hence the meaning of 'raft' (in this sense also *bāthshlaod* : *bata* 'stick, timber') = MIr. *slāet* 'a slide' (: OE *slīdan* 'slide', etc., 10.42). Walde-P. 2.707 f. Macbain 327.

W. *cludair,* also 'heap, pile' (Spurrell), hence the meaning 'raft' (fr. 'pile of wood') : *cludo* 'carry, convey', arch. 'heap' (10.61).

Br. *radell, razell,* see above, 2.

4. ON *floti,* Dan. *flaade* (both also 'fleet'), Sw. *flotte* (cf. *flotta* 'fleet'), NE *float* (rare in this sense, NED s.v. 7*a*), Du. *vlot,* OHG *flōz* (mostly 'flux, flow'), MHG *vlōz,* NHG *floss* : ON *fljōta,* OE *flēotan* 'float', etc. (10.34). Falk-Torp 229.

NE *raft,* arch. (ME) 'rafter, beam, spar', fr. ON *raptr* 'rafter', coll. 'roof, ceiling'. NED s.v.

5. Lith. *sielis,* Lett. *sielains,* prob. : Lett. *siet* 'bind'. Leskien, Bildung d. Nom. 275. Mühl.-Endz. 3.858.

Lett. *pluosts* (= Lith. *pluostas* 'ferry') : *plūst* 'overflow', OE *flēotan* 'float', etc. (above, 4). Mühl.-Endz. 3.364, 365.

Lett. *pluts,* fr. ORuss. **plŭtŭ,* Russ. *plot* 'raft' (below, 6). Mühl.-Endz. 3.359.

6. SCr. *splav,* cpd. **sŭ-plav,* cf. *plav* (poet.) 'navis, linter' (Rječnik Akad. 10.22) : *ploviti* 'float', etc.

Boh. *vor,* as orig. 'a binding-together' (of logs) : Pol. *wór* 'sack, bundle', ChSl. *vrŭvĭ,* Lith. *virvė* 'cord', Lith. *verti* 'to thread', etc. Walde-P. 1.263. Trautmann 352. Brückner 382, 634.

Pol. *tratwa,* earlier *trafta,* fr. early NHG *trift* 'a drive of logs' (14th cent., still in local use; cf. Weigand-H. 2.1071 and similar use of NE *drive* in U.S.) : *treiben* 'drive'. Brückner 575.

Russ. *plot,* Pol. *płet,* Boh. *plt'* : Russ. *plavat',* Pol. *pływać,* Boh. *plovati* 'float'. Trautmann 224.

7. Skt. *uḍupa-,* also 'moon', particularly 'new moon' (whence the meaning 'raft, barge' as a 'flat, slightly curved boat'?), MIndic for Skt. **ṛtu-pa-,* lit. 'keeper of the (correct) time'. Wackernagel, Altind. Gram. 1.167 (Uhlenbeck 28, but with unconvincing explanation of the meaning 'raft').

Br.	*roeñv*	NHG	*ruder*		

Many of the words for 'oar' belong to an inherited group pointing to IE words for 'oar' and 'row'. Other connections are with words for 'carry, ride' or for 'rod, pole'.

1. IE **erə-,* **rē-,* **rō-* in words for 'oar, rudder, row' (perh. ultimately connected with IE **er-* in Skt. *ṛ-* 'move', Grk. *ὄρνῡμι* 'rouse, move', but this quite uncertain). Walde-P. 1.143 f. Ernout-M. 859. Pedersen 2.591. Stokes 39.

Grk. *ἐρετμόν* (cf. *ἐρέσσω* 'row', *ἐρέτης* 'rower'); Lat. *rēmus* (> It., Sp. *remo,* OFr. *reime,* W. *rhwyf,* Br. *roeñv;* Fr. *rame,* back-formation fr. deriv. vb. *ramer* 'row'); Ir. *rāme,* NIr. *rāmha;* OE *rōþer* (NE *rudder*), OHG *ruodar,* MHG *ruoder* (also 'rudder'), NHG *ruder;* Lith. *irklas,* Lett. *irkls, irklis* (cf. Lith. *irti,* Lett. *irt* 'row'); Skt. *aritra-* (cf. *aritar-* 'rower').

2. Grk. *κώπη,* NG lit. *κώπη, κωπίον,* pop. *κουπί,* orig. 'handle', hence the 'handle of

the oar', then the 'oar' itself : *κάπτω* 'gulp down' (fr. 'seize'), Lat. *capere* 'seize, take', Alb. *kap* 'grasp', etc. Walde-P. 1.342. Walde-H. 1.159.

3. Lat. *rēmus,* etc., above, 1.

Lat. *tōnsa* (poet.), etym. dub, perh. : Goth. *at-þinsan* 'draw on', OHG *dinsan* 'pull, drag', etc., IE **tens-* extension of **ten-* in Lat. *tendere* 'stretch', etc.; or else : Lat. *tondere* 'shear, crop, cut off' (as 'hewn-out stick'?). Walde-P. 1.720, 727.

Fr. *aviron,* fr. OFr. *avirer* 'turn about' (found only as refl.), cpd. of *virer* 'turn, change course, veer, tack'. Gamillscheg s.v.

Rum. *lopată,* also and orig. 'shovel', fr. Slavic *lopata* 'shovel' (8.24).

Rum. *vîslă,* fr. the Slavic, cf. ChSl. *veslo,* etc. (below, 7).

4. Ir. *rāme,* etc., cf. above, 1.

5. ON *ār,* Dan. *aare,* Sw. *åra, år,* OE *ār,* ME *ore,* NE *oar,* fr. Gmc. **airō-* (cf. Finn. loanword *airo*), without clear outside connections. Walde-P. 1.167. Falk-Torp 7, 1429.

ON *ræði,* prob. : MHG *ruote* 'rod, pole' also 'oar-shaft, oar' (NHG *rute*), OHG *ruota,* OE *rōd* 'rod, pole', etc. Falk-Torp 908 (against connection with OE *rōþer,* etc.).

OE *rōþer,* OHG *ruodar,* above, 1.

Du. *riem,* OHG *riemo,* MHG *rieme* (NHG dial. *riemen*), fr. Lat. *rēmus* (above, 1). Franck-v. W. 547. Weigand-H. 1.587.

6. Lith. *irklas,* Lett. *irkls,* above, 1.

7. ChSl. *veslo,* etc., general Slavic (fr. IE **weĝh-slo-*) : ChSl. *vozą, voziti,* Lat. *vehī* 'ride', etc. (10.66). Walde-P. 1.250.

8. Skt. *aritra-,* above, 1.

Skt. *kṣepaṇi-* (also *kṣepaṇī-, kṣipaṇi-,* etc.) : *kṣip-* 'throw, cast' (10.25), fr. the 'throwing motion' involved in rowing.

Skt. *nāudaṇḍa-, nāukādaṇḍa-* lit. 'boat-pole', cpd. of *nāu-* 'boat' and *daṇḍa-* 'stick, staff'.

10.852. 'Row' (vb.). Nearly all the verbs for 'row' are connected with the nouns for 'oar', mostly those of the widespread group 1 of 10.85—either from their roots or, more commonly, derivatives, compounds, or phrases with them. Thus Grk. *ἐρέσσω;* Lat. *rēm-igere* (cpd. with *agere*), VLat. **rēmāre* (It. *remare,* Fr. *ramer,* Sp. *remar;* Ir. *rāim* (Pedersen 2.591), NIr. *rāmhuighim,* W. *rhyfo,* Br. *roeñvi;* ON *rōa,* Dan., Sw. *ro,* OE *rōwan,* NE *row,* Du. *roeien,* OHG *ruoderōn,* NHG *rudern;* Lith. *irti,* Lett. *irt;* SCr. *veslati* (similarly Rum. *vîsli,* fr. *vîslă*), Boh. *veslovati,* Pol. *robić wiosłem* (lit. 'act with the oar').

But there are a few of different origin. NG pop. *λάμνω,* fr. *ἐλαύνω* 'drive' (10.65), which is used for 'row' in NT, Mk. 6.48, Jn. 6.19, and so rendered in the other versions (Vulgate, Goth., OE, ChSl., etc.).

Fr. *nager,* fr. Lat. *nāvigāre* 'sail' (10.36), now commonly 'swim' or 'float', is also sometimes used for 'row', esp. in phrase *nager de long* 'row with long strokes'.

It. *vogare,* Sp. *vogar,* fr. a Gmc. form like NHG *wogen,* deriv. of word for 'wave' (1.35). REW 9566.

Goth. *farjan* (for *ἐλαύνω* 'row' in Jn. 6.19; also for *πλέω* 'sail') : OE *faran,* etc. 'go' (10.47).

ChSl. *greti,* Russ. *gresti* (latter also 'rake') : Lith. *grėbti* 'rake', Skt. *grabh-* 'seize', etc. Walde-P. 1.652 f. Berneker 347.

		NHG	*steuerruder*		

Many of the names of the 'rudder' are cognates with those for 'oar'. In the older languages they may be the same since the simplest form of 'rudder' is merely an 'oar' trailed in the water behind the boat. With a more advanced form of steering apparatus come special words for 'helm, tiller' (mostly connected with words for 'handle' or 'beam'), and these are sometimes extended to cover the whole 'rudder'. A few words for 'rudder' are from verbs for 'guide, steer'.

1. Grk. *πηδάλιον* : Hom. *πηδόν* 'blade of the oar', pl. *πηδά* also 'rudder', through notion of 'flat surface' : *πέδον* 'ground, earth', *πεδίον* 'plain', *πούς,* Lat. *pēs* 'foot', etc. Walde-P. 1.23 f.

NG *τιμόνι,* fr. It. *timone* (below, 2).

2. Lat. *gubernāculum* (> Fr. *gouvernail,* Cat. *governall* > Sp. *gobernalle*), deriv. of *gubernāre* 'steer, pilot a ship', fr. Grk. *κυβερνάω* 'act as pilot, steer'. Ernout-M. 437.

It. *timone,* Sp. *timón,* also 'helm, tiller, beam, pole' (so Fr. *timon*) fr. VLat. **tīmo,* for *tēmo* (*-ōnis*) 'beam, pole'. REW 8625.

Rum. *cîrmă,* fr. the Slavic, cf. ChSl. *krŭma* (below, 6).

3. Ir. *lue,* W. *llyw,* Corn. *leu,* fr. *[*p*]*luwo-* : Grk. *πλέω* 'sail, float', ON *fljōta* 'float, flow', etc. (10.34). Walde-P. 2.95. Pedersen 1.61 f.

NIr. *failm,* fr. Lat. *palma* 'blade of an oar', like *failm, pailm* 'palm-tree' fr. the same source.

Words for 'mast' are mostly connected with those for 'tree' or 'pole'. There is also specialization from 'something standing, an upright', and from 'equipment'.

1. IE **mazdos.* Walde-P. 2.235. Ernout-M. 584. Walde-H. 2.19. Falk-Torp 704.

Lat. *mālus* (with dial. *l* for *d*); OE *mæst,* OHG *mast,* etc. general WGmc. (Dan., Sw. *mast* fr. MLG), whence also Fr. *mât,* Sp. *mástil* (REW 5397), and Lith. *mastas,* Lett. *masts,* Pol. *maszt,* Russ. *mačta;* cf. NIr. *maide* 'stick, staff', MIr. *admat* 'timber'.

2. Grk. *ἱστός* ('mast' Hom.+, but also 'beam of a loom, loom, pole'), orig. 'an upright' : *ἵστημι* 'stand'.

Byz. *κατάρτιον* (> NG *κατάρτι,* Rum. *catart,* SCr. *katarka,* ORuss. *katart*), orig. 'equipment' (so *καταρτεία, καταρθία* in pap.; cf. *παρέλαβον τὸ πλοῖον σὺν τῇ καταρθίῃ*) : *καταρτίζω* 'adjust, prepare, equip' (: *ἄρτι* 'just now', *ἄρτιος* 'suitable, perfect').

3. Lat. *mālus,* above, 1.

It. *albero* (Venetian *arboro* > NG *ἄρμπουρο*), Sp. *árbol,* lit 'tree' (cf. ON *siglutrē,* below, 5).

Fr. *mât,* Sp. *mástil,* above, 1.

5. ON *sigla,* and cpd. *siglu-trē* (*trē* here 'beam') : *segl* 'sail' (10.88).

OE *mæst,* etc., above, 1.

6. Lith. *mastas* (Kurschat; in this sense now replaced by *stiebas,* NSB s.v. *mastas*), Lett. *masts,* above, 1.

Lith. *stiebas* (in Kurschat as 'mast' of

small craft, but now apparently generic), also 'stake, pole' : ChSl. *stĭblĭ* 'stalk', etc. Walde-P. 2.648.

7. ChSl. *jadro* (Supr. 400 for *ἱστός,* but mostly for *κόλπος* 'bosom'), beside *jadrilo,* SCr. *jedro* 'sail', see 10.88.

SCr. *jarbol, arbuo,* older *arbor,* etc., fr. Venet. *arbolo, arboro* = It. *albero* 'tree, mast' (above, 3). Berneker 30.

Most of the words for 'sail' meant originally 'piece of cloth', and several continued to be used in that sense also. This is true also of many colloquial terms for 'sail' that are not considered here. Cf. Lidén, Stud. 23. More isolated are certain instrument nouns from verbs for 'ride, go' and probable derivatives of nouns for 'mast' and 'wind'. There is no connection with verbs for 'sail' except as the latter are derived from the noun.

1. Grk. *ἱστίον,* mostly pl. *ἱστία* 'sails' already in Homer and so prob. deriv. of *ἱστός* 'mast'. One would prefer development through *ἱστίον* 'piece of cloth', but this use is attested only late and clearly secondary.

NG *πανί,* also and orig. 'cloth', fr. Lat. *pannus* 'cloth' (6.21).

2. Lat. *vēlum,* orig. 'cloth', as 'sail' mostly pl. *vēla* (> It., Sp. *vela,* Fr. *voile*), prob. fr. **weg-s-lo-m,* cf. *vexillum* dim. 'ensign, banner' : Ir. *figim* 'weave', etc., IE **weg-.* Walde-P. 1.247. Ernout-M. 1082.

Rum. *pînză,* also 'linen cloth' (cf. 6.23).

3. Ir. *sēol,* W. *hwyl,* either cognate with or early loanwords fr. Gmc., OE *segl,* etc. Walde-P. 2.475. Falk-Torp 955. Pedersen 1.103.

Br. *gouel,* fr. Lat. *vēla* (above, 2). Loth, Mots lat. 173.

4. ON, OE *segl,* etc., general Gmc. (MHG, NHG *segel* > Pol. *żagiel* > Lith. *žėglius,* formerly in use), fr. Gmc. **segla-,* IE **sek-lóm* as 'piece of cloth' : Lat. *secāre* 'cut', etc. Walde-P. 2.475. Falk-Torp 955.

5. Lith. *burė,* Lett. *bur'a,* cf. Lith. *burva* 'sort of garment', Lett. *burves* 'little sail', prob. : Grk. *φᾶρος, φάρος* 'cloth, cloak' (cf. Hom. Od. 5.258, where Calypso brings *φάρεα* to make sails), *φορμός* 'woven basket'. Walde-P. 2.164. Mühl.-Endz. 1.356.

6. ChSl. *jadrilo* 'sail' (*jadro* 'mast, bosom'), SCr. *jedro,* prob. derivs. of ChSl. *jati* 'ride', etc., IE **yā-* in Skt. *yā-* 'go', etc. (10.47, 10.66). Berneker 442.

Boh. *plachta,* also 'a cloth, bed-sheet' = Pol. *płachta* 'coarse linen cloth' (: *plaszcz* 'cloak', etc., 6.41). Brückner 419.

Pol. *żagiel,* above, 4.

Russ. *parus,* generally taken as old loanword fr. Grk. *φᾶρος* (cf. above, 5). Doubted by Lidén, Stud. 24, n. 2, on the ground that *φᾶρος* is mainly a poet. word. But its use in Hdt. 9.109 shows that it was a prose word somewhere, say in the Asia Minor region, and it may well have come into Russian from the Grk. colonies on the north shore of the Black Sea.

The majority of the words for 'anchor' are borrowed through the Latin from the Greek word, which itself is based on the notion of something bent, 'a hook'. Other connections are with 'cat', 'sink', 'iron'.

1. Grk. *ἄγκῡρα* : *ἀγκύλος* 'crooked', Skt. *añc-* 'bend', OHG *ango* 'hook', etc. Hence ChSl. *ankvra,* Lat. *ancora* and, fr. the latter, the other Eur. forms, as It. *ancora,* Fr. *ancre,* Sp. *ancla* and *áncora,* Rum. *ancoră;* Ir. *ingor,* MIr., NIr. *ancoire* (later borrowing), W. *angor,* Br. *eor;* ON *akkeri,* Dan. *anker,* Sw. *ankare* (> Lith. *inkaras,* Lett. *enkurs,* Russ. *jakor'*), OE *ancor,* etc., the Gmc. words. Walde-P. 1.60. Falk-Torp 30. Berneker 29.

2. NG *σίδερο* 'iron, iron bar' (fr. Grk. *σίδηρος* 'iron'), also pop. nautical term for 'anchor', whence SCr. *sidro* in this sense only.

3. OHG *senchil, senchila,* the early word (replaced by late OHG *anchar,* cf. above) : *senken* 'sink' (10.33).

4. ChSl. *kotŭka,* SCr., Boh. *kotva,* Pol. *kotwica, kotew* : ChSl. *kotŭka,* Russ. *kot,* etc. 'cat'. The application to 'anchor', fr. the hooks resembling the claws of a cat, is paralleled in Du. *kat, katanka* 'small anchor, grapnel' (cf. also the nautical use of NE *cat,* NED s.v. 7), but need not be attributed to borrowing. The origin of words for 'harbor' reflects partly its function as a shelter for ships and partly some physical aspect.

1. Grk. *λιμήν* (in Thess. dial. 'market-place'), NG pop. *λιμάνι* (*a* fr. the Turk. loanword *liman*), beside *λίμνη* 'lake, pool', *Λίμναι* orig. the 'Marshes', *λειμών* 'meadow', all fr. the notion of 'a curve, hollow depression' in the shore or surface of the land, and prob. : Lat. *līmus* 'askew, slanting', ON *līmr* 'limb, twig' (orig. 'flexible'), *m*-formations of a root **(e)lei-* in words for 'bend, crooked', etc. Walde-P. 1.158. Boisacq 565 f.

2. Lat. *portus* (> Romance words), orig. 'passage' : Av. *pərətu-* 'passage, ford, bridge', Ir. *rith,* OHG *furt,* etc. 'ford'. Walde-P. 2.40. Ernout-M. 794.

3. Ir. *cuan,* prob. : ON *hǫfn,* etc. (below, 4). Pedersen 1.94.

W. *porth,* Br. *porz,* fr. Lat. *portus.* Loth, Mots lat. 197. W. *porthladd* apparently new sg. of *porthle,* pl. *porthloedd* (same meaning but not a common word), cpd. of *porth* and *lle* 'place'.

4. ON *hǫfn,* OE *hæfen,* etc., general Gmc. (NHG *hafen* fr. LG; NE *haven* now mostly fig.), prob. as orig. 'container (of ships)' : Goth. *hafjan* 'lift', Lat. *capere* 'seize, take', etc. Derivation fr. ON *haf* 'sea', though fr. the same root, is less probable. Walde-P. 1.342 f. Falk-Torp 387. NED s.v. *haven.*

OE, ME, NE, MHG *port,* fr. Lat. *portus.*

ME *herberwe* (but mostly 'shelter, lodging, etc.'), NE *harbor,* fr. OE **herbeorg* (orig. or fr. ON) : ON *herbergi* 'inn, lodgings', OHG *heriberga* 'camp, lodging', lit. 'army shelter', cpd. of ON *herr,* etc. 'army' and derivs. of root in OE *beorgan* 'save, shelter', etc. NED s.v. *harbor.*

OHG *urfar* gl. *portus,* MHG *urvar* 'landing-place, ford, etc.', cpd. of *ur-* (Goth. *us-*) 'out' and deriv. of root in OHG, OE, Goth. *faran* 'go, travel' (cf. above, 2).

OHG *stad* (*stat*), *stedi,* reg. 'shore', but also 'portus' : Goth. *staþa,* OE *stæþ,* etc. 'shore' (1.27).

6. ChSl. *pristanište* (Supr. reg. for *λιμήν*), Boh. *přístav* (Pol. *przystań,* Russ. *pristan'* mostly 'landing-place'), cpds. of *pri* 'by, at, near' and derivs. of the root in ChSl. *stati, stanq* 'take a stand', *staviti* 'put, place', etc.

SCr. *luka,* also 'field near a river' (Boh. *louka* 'meadow', Russ. *luka* 'bend, meadow-land near a river bend', etc.) : SCr. *luk,* ChSl. *ląkŭ* 'bow', fr. the root of ChSl. *na-lęšti* 'bend (the bow)', etc., with the same semantic relation as in Grk. *λιμήν* (above, 1). Berneker 739.

11.11 HAVE

Grk.	ἔχω	Goth.	*haban* (*aigan*)	Lith.	*turėti*

Br.	phrase with 'be'; *kaout*	NHG	*haben*		

There is considerable overlapping of sense among the verbs listed in 11.11–11.17. There is no sharp line between the colorless 'have' and the stronger 'own, possess'. 'Have' is mostly from earlier 'seize, take hold of', 'hold', or 'take', which are again closely allied with each other and in part with 'get, obtain' and 'keep, retain'.

The oldest method of indicating simple possession, and doubtless that of the IE period, was by means of a phrase containing the verb 'be', expressed or implied, with an oblique case for the person. This is common enough even in languages which also have verbs for 'have' (Grk. μοί ἐστι, Lat. *mihi est*, etc.), and is the normal type in Indo-Iranian, and in the Celtic languages down to the present day.

The secondary use of verbs for 'have' as auxiliaries, esp. for past tenses, but also for future and 'must' (9.94), is not considered here.

Cf. Meillet, Le développement du verbe "avoir", Festschrift Wackernagel, 9 ff.

1. 'Have' regularly expressed by phrases. Ir. *rotbia less lōg dodaggnīma* lit. 'reward shall be to thee with him of thy well-doing' (Wb. 6a11), or using a prepositional phrase, *is ed inso fil lasuide* lit. 'it is this that is with him' (Ml. 63d4), or, taking NT, Jn. 4.17, οὐκ ἔχω ἄνδρα is rendered by NIr *nī fhuil fear agam*, W. *nid oes gennyf wr*, and Br. *n'em eus pried ebet* 'there is not a husband to me'; so also Lett. *man vīra nav*, Russ. *u menja net muža* 'there-is-not a husband to me'. Skt. *as-* or *bhū-* with the gen. may be 'have' or 'own', cf. *tasya çataṁ jāyā babhuvur* 'he had a hundred wives', or *manor ha vā ṛṣabha āsa* 'Manu had a bull' (cf. Delbrück, Altind. Syntax 162), and similarly, Av. *ašava dąna . . . . yå hənti spəntahe mainyəuš* 'those creatures . . . . which the holy spirit possesses' (Yt. 6.2), also with omission of *ah-* : *vahišta īštiš srāvī zaraθuštrahē* 'Zarathustra has the best good known', lit. 'optimum bonum auditum (est) Zarathustri' (cf. Reichelt, Aw. Gramm. 253; Barth. 269).

2. Grk. ἔχω 'hold, possess, have' : Skt. *sah-* 'be able, be powerful, overcome, be victorious', Av. *haz-* 'take possession of, gain', Goth. *sigis*, etc. 'victory'. Walde-P. 2.481 f.

3. Lat. *habēre* (> It. *avere*, Fr. *avoir*, Rum. *avea*) earlier 'hold', whence 'occupy, possess' and finally 'have' : Umbr. *habitu*, *habetu* 'habeto', but the older sense in *haburent* 'ceperint', etc., Ir. *gaibim* 'take, seize', W. *gafaelu* 'hold, grasp' (10.14), perh. Lith. *gabenti* 'carry off, transport', IE **ghab(h)-*. Walde-P. 1.344 f. Ernout-M. 442. Walde-H. 1.630 f.

In most cases any expression for 'have' may be used also for 'own, possess' if the context shows that the relations ip is one of enduring (or legal, etc.) nature, as opposed to the temporary associative notion of 'have', which is often only a weakening of the stronger 'hold, possess'. In Sanskrit and Avestan it is not possible to distinguish between 'have' and 'own' except by context (and so largely still in Breton and Lettic), where both notions are expressed by a phrase (cf. 11.11). Likewise, most of the modern European languages show a distinct preference for expressing ownership by a phrase, as N.E. *it's mine*, or Fr. *c'est à moi*, even where there are also distinctive verbs for 'own'.

The latter are often from the notion of 'rule, have power over'. Several must have been used primarily with reference to lands or houses, as indicated by early usage or the cognates, so notably Lat. *possidēre* with semantic borrowings in Gmc. and (through Gmc.) Slavic.

1. Grk. κέκτημαι, lit. 'have acquired', perf. of κτάομαι 'get, obtain' : Skt. *kṣi-* 'possess, rule over', Av. *xši-* 'have might, rule, be able'. Walde-P. 1.504.

In NG 'own' is regularly expressed by a phrase with ἀνήκει 'it belongs' = class. Grk. ἀν-ήκει 'it comes to'.

2. Lat. *possidēre*, legal term first used in connection with real estate (cf. *uti nunc possidetis eum fundum*, etc., Festus), cpd. of *sedēre* 'sit', first part prob. *potis*, *pote* 'having power, powerful' (otherwise Sommer, Hdb. 266, *por-* as in

por-tendere, etc.). Hence the borrowed Romance forms, It. *possedere*, Fr. *posséder*, Rum. *poseda*, and inherited forms, OIt. *posseer*, OFr. *posseoir*, Sp. *poseer*, etc. NE *possess* fr. OFr. *possessier*, formed fr. Lat. pple. Ernout-M. 795 f. REW 6683.

Lat. *tenēre* 'hold' (11.15), then 'occupy, possess'.

3. Ir. *techtaim* 'own' (esp. in legal use, cf. Laws, Gloss.) : Br. *tizout* 'attain, obtain', ON *þiggja*, OE *þicgan* 'take, receive, accept' (11.13).

Ir. *selbaim*, NIr. *sealbhuighim*, fr. *selb* 'property' (11.41).

W. *meddu*, with 'own' fr. 'rule, have power' : Ir. *midiur* 'judge' (cf. *conmidethar* 'rules, has power'), Lat. *mederī* 'be good for, remedy', *meditāre* 'consider, meditate', Grk. μέδομαι 'be mindful of, provide for', μέδων 'ruler', Goth. *mitan*, etc. 'measure', IE **med-*. Walde-P. 2.259 f. Walde-H. 2.56. Pedersen 2.580.

Br. *kaout* 'own, have' (11.11).

Br. *piaoua* (MBr. *biou*, *biaou* but without inflection), verbal form derived from the locution *piou euz?* 'to whom is (this)?', i.e. 'to whom does this belong?'. Likewise, W. *piau* 'belong' and 'possess', Corn. *pew*, *bew* 'own'. Pedersen 2.200.

4. Goth. *gastaldan*, renders κτάομαι and once ἔχω (*gastaldand* = ἔξουσιν, Cor. 7.28), cf. *andstaldan* 'supply with', OE *stealdan* 'possess' : OE *gesteald* 'dwelling', *hagu-steald*, OHG *hagu-stalt*, etc. 'one living in the lord's house, unmarried person', fr. an extension of the root **stel-* in OE *stellan*, OHG *stellen* 'put, place', etc. Walde-P. 2.646. Feist 50.

Goth. *aigan* (see 11.11), ON *eiga*, Dan. *eje*, Sw. *äga*, OE *āgan*, ME, NE *owe* (now obs. in this sense), OHG *eigan*; also OE *āgnian* 'get possession of, own' (= Goth. *ga-aiginōn* 'gain advantage over', OHG *eigenen* 'appropriate, make one's own', fr. Goth. *aigin*, etc. 'property'), ME *ohne* (rare), NE *own* : Skt. *īç-* 'own, rule, be master of', Av. *išti-* 'possession, riches, power'. Walde-P. 1.105. Falk-Torp 184. Feist 20.

OHG *bisizzan*, MHG, NHG *besitzen*, Du. *bezitten* (Dan. *besidde*, Sw. *besitta* by semantic borrowing fr. MLG) = OE *besittan* 'sit around, besiege, sit in session', rarely 'sit in possession of, possess', all starting fr. the notion of 'sit about' and undoubtedly influenced by Lat. *possidēre*.

5. Lith. *turėti* 'have, own' (11.11).

6. ChSl. *pritęžati*, *sŭtęžati* 'acquire, possess', perfect. of *tęžati* 'work, till' : *tęgnąti* 'pull, stretch', etc. (9.33).

SCr. *posjedovati*, Pol. *posiadać*, cf. SCr. *posjed*, Pol. *posiad* 'property', cpds. of the words for 'sit', probably in imitation of NHG *besitzen*, *besitz* (above, 4).

Boh. *držeti*, Pol. *dzierżeć*, lit. 'hold, keep', hence also 'own' : ChSl. *drŭžati* 'hold', etc. (11.15).

Russ. *vladet'*, *obladat'* (*obŭ-v-*) 'own, rule, govern' : ChSl. *vlasti*, Lith. *valdyti*, Lett. *valdīt* 'rule', Goth. *waldan* id., etc., fr. the root in Lat. *valēre* 'be strong'. Walde-P. 1.219.

Russ. *imet'* 'have', but also 'possess', as less commonly also the corresponding Slavic words for 'have', ChSl. *iměti*, etc. (11.11).

7. Skt. and Av. 'possess' usually = 'have' expressed by 'be' with predicate gen. (cf. 11.11).

Skt. *kṣi-* : Grk. κέκτημαι (above, 1).

Skt. *īç-* : Goth. *aigan*, etc. (above, 4).

'Take' is mostly a weakening of 'take hold of, seize', and in some languages not distinguished from the latter.

1. Grk. λαμβάνω 'seize, take', aor. ἔλαβον, perf. Att. εἴληφα (cf. λάφῡρον 'booty'), prob. : Skt. *labh-*, *rabh-* 'seize, take'. Brugmann, Grd. 2.3.291. Walde-P. 2.385, 707 (with alternative of a root ending in a labiovelar, assumed for Ion. λάζομαι and OE *læccan* 'seize'). NG λαμβάνω or λαβαίνω (new pres. fr. aor.), aor. ἔλαβα, used esp. for 'receive' and in certain formal phrases.

Grk. αἱρέω 'seize, take, catch, etc.' (much less common than λαμβάνω for 'take'), etym. dub. Walde-P. 2.498. McKenzie, Cl. Quart. 15.46 f. Aeol. ἀγρέω : ἄγρα 'the hunt', etc. Walde-P. 1.36 f. Aor. ἑλεῖν prob. : caus. Goth. *saljan* 'offer , OE *sellan* 'give, sell', etc. (as orig. 'cause to take'). Walde-P. 2.504. Feist 408.

NG παίρνω, fr. Grk. ἐπαίρω 'lift up', cpd. of αἴρω 'lift' (10.22), which is itself used for 'take up' and 'take away'.

2. Lat. *capere* 'seize, take' : Goth. *hafjan*, ON *hefja* 'lift', Goth. *haban*, ON *hafa*, etc. 'have' (11.11). Walde-P. 1.342 ff. Ernout-M. 147 ff. Walde-H. 1.159.

Lat. *sūmere* 'take up', fr. **sus-(e)mere*, cpd. of *sub-s-*, *sus-* with *emere* orig. 'take' (attested in Festus; 'buy' secondary) : Ir. *em-* (in cpds., *air-fo-emim* 'take, receive', etc.), Lith. *imti* 'take', ChSl. *jęti* 'seize, take' (but 'take' usually cpds., see below), etc., *iměti* 'have' (11.11). Walde-P. 1.124 f. Ernout-M. 299 ff.; 1102. Pedersen 2.512. Berneker 426 f.

It. *prendere*, Fr. *prendre* (Sp. *prender* 'seize'), fr. Lat. *prehendere* 'seize' (11.14).

Sp. *tomar* (cf. Cat. *tomar* 'stretch out the hands'), much disputed, perh. belonging to the group Fr. *tomber* 'fall', NE *tumble*, etc. REW 8975.

Rum. *lua*, fr. Lat. *levāre* 'lift' (10.22). Cf. Sp. *llevar* 'take away, carry' (10.61) and NG παίρνω 'take' (above, 1). REW 5000.

3. Ir. *gaibim* 'take, seize', NIr. *gabhaim* but mostly replaced by the cpd. *tōgaim* (for *tōgbhaim*, MIr. *tōcbaim* 'lift', fr. **to-od-gab-*) : Lat. *habēre* 'have', etc. (11.11). Pedersen 2.531.

Ir. *air-fo-emim* : Lat. *emere*, *sūmere* (above, 2).

W. *cymeryd*, *cymryd*, MBr. *compret*, Br. *kemer*, *kemeret*, fr. cpd. of IE **bher-* in Ir. *berim*, Grk. φέρω, etc. 'carry'. Pedersen 1.119, 2.472.

4. Goth. *niman*, ON *nema*, OE *niman*, ME *nime*, OHG *neman*, etc., with Lett. dial. *nemt* 'take' (cf. below), prob. : Grk. νέμω 'share' (act. 'give a share', mid. Verbs for 'seize, grasp', besides the usual notion of 'seize with the hand', may come by extension from 'seize by a claw', 'by a hook', 'catch birds', 'overtake', etc.

Several of these, or their compounds, have come to be used for 'understand' (17.16).

1. Grk. λαμβάνω 'take, seize', see 11.13.

Grk. ἁρπάζω 'snatch away, carry off, seize' : ἁρπαγή 'rape, robbery, booty', ἁρπάγη 'hook for drawing buckets up, rake', ἅρπη 'sickle, a certain bird of prey', ChSl. *srŭpŭ* 'sickle', etc. Semantic development fr. 'hook' to 'snatch, seize' as in Br. *kregi* (below, 3). Walde-P. 2.501. Boisacq, 81.

Grk. δράσσομαι 'grasp, clutch' : δράξ 'hand', δραχμή 'drachma' (orig. 'handful'), outside connections dub. Walde-P. 1.807. Boisacq 198 f.

NG πιάνω, new present formed to aor. ἔπιασα, fr. Grk. πιέζω, πιάζω 'press' (9.342), late 'seize' (cf. Theocr. 4.35 ταῦρον . . . πιάξας τᾶς ὁπλᾶς, and so reg. in NT and pap.).

2. Lat. *prehendere*, *prēndere* (> Rum. *prinde* 'seize, effect, begin', etc.; It. *prendere*, Fr. *prendre* 'take') fr. *prae-*

hendere : Grk. χανδάνω 'hold, comprise, contain', Goth. *bi-gitan* 'find', OE *be-gietan* 'get', etc., W. *genni* 'be contained', etc., IE **ghend-*. Walde-P. 1.589. Ernout-M. 803 f.

Lat. *capere*, see 'take' (11.13).

It. *afferare*, also Sp. *aferrar* 'grasp, furl, anchor', fr. VLat. **afferrāre*, cpd. of **ferrāre* (It. *ferrare*, Sp. *herrar*, etc.), deriv. of Lat. *ferrum* 'iron, iron implement' (cf. *ferrātus* 'covered with iron'). REW 256, 3256.

It. *agguantare*, deriv. of *guanto* 'glove'. REW 9500.

Fr. *saisir*, Prov. *sazir* (> Sp. *asir*), etym. disputed, prob. as orig. a legal term (MLat. *sacire* 'make legal claim') fr. a Frank. **sakjan* : *gasacio* 'adversary' (Lex Salica), OS *saca*, OHG *sahha* 'litigation'. Gamillscheg 781. Otherwise, fr. an OHG **sazjan* > *sezzen* 'set' (likewise fr. the legal terminology), REW 7632, Bloch 2.250.

Sp. *agarrar*, fr. *garra* 'claw, talon, clutch', an Iber. word. REW 3690a.

Sp. *coger* ('catch, collect', etc., also 'seize, take hold of'), fr. Lat. *colligere* 'collect'. REW 2048.

Rum. *apuca*, prob. fr. Lat. *aucupārī* 'go fowling, catch birds, give chase', deriv. of *auceps*, *aucupis* 'fowler'. REW 776.

3. Ir. *gaibim* 'take, seize', see 11.13.

NIr. *beirim ar*, lit. 'bear upon', e.g. *beirim air* 'I lay hold of him', the usual locution.

NIr. *glacaim*, fr. *glac* 'half-open fist, grasp, clutch, etc.'.

W. *gafaelu*, fr. *gafael* 'hold, grasp, grip' = Ir. *gabāl*, vbl. n. of *gaibim* (above). Walde-P. 1.345. Pedersen 2.532.

Br. *kregi* and *krogein*, also (earlier) 'hook, bite' fr. *krog* 'hook'.

4. Goth. *fahan*, ON *fā*, OE *fōn*, OHG *fāhan*, MHG *vāhen*, *vān*, the older Gmc. word (but in ON largely 'capture, get', NIcel. *fā*, Dan. *faa*, Sw. *få* 'get', NHG *fangen* 'catch, capture') : Lat. *pangere* 'fasten, fix, infix', Grk. πήγνῡμι 'make fast', Av. *pas-* 'fasten together, join', etc., IE **pāk̂-*, **pāĝ-*. Several of the verbs for 'hold' are the same as those for the weaker 'have' (11.11). But there are other, and diverse, connections.

1. Grk. ἔχω 'hold, have', see 11.11.

Grk. κρατέω 'be strong, rule, be master of' (: κράτος 'strength'), hence also 'take hold of' and 'hold' (both senses in NT, etc.), NG κρατῶ 'hold'.

NG βαστῶ 'carry' (10.61) also 'hold'.

Few verbs in any language show such a variety of idiomatic uses as NE *get*. But it is understood here in its primary sense of 'obtain'. Many of the words listed correspond more nearly in feeling to NE *obtain* than to *get*, to which perhaps the nearest approach is the colloquial NHG *kriegen*.

Besides the words listed as the most important, 'get' is often expressed by the words for 'take', sometimes also by those for 'gain' (Fr. *gagner*, Sp. *ganar*, etc.), 'find', etc. Not included are several words in which the implication of special effort (orig. common to many others for 'obtain') is still dominant, though sometimes ignored (cf. NED s.v. *acquire*), as Sp. *adquirir*, Fr. *acquérir*, NE *acquire* (derivs. of Lat. *quaerere* 'seek'), NHG *erwerben* (: *werben* 'turn, be busy with, seek to obtain'), *erlangen* (MHG 'reach, attain' : *lang* 'long'), Fr. *procurer*, NE *procure* (fr. Lat. *prōcūrāre* 'care for, attend to'), and many other possible substitutes which would swell the list.

The main words are from such notions as 'have, seize, hold, possess, come to, reach, attain, strive for', etc.

1. Grk. κτάομαι, NG ἀποκτῶ, cf. Grk. κέκτημαι 'own, possess' (11.12).

Grk. τυγχάνω 'happen, hit on' (9.993) is sometimes simply 'get'.

NG παίρνω 'take' (11.13) is also frequently equivalent to NE *get* in certain uses.

2. Lat. *nancīscī*, inchoative of an obs. *nancīre*, *nancī* (Gramm.) : Skt. *naç-*, Av. *nas-* 'reach', Grk. aor. ἤνεγκα 'carry', etc. Walde-P. 1.128 f. Ernout-M. 652.

Lat. *adipīscī*, cpd. of *apīscī* 'reach, attain, get' (rare but class.), inchoative to *apere* 'fasten, join' : Skt. *āp-* 'attain, get', Av. *ap-* 'reach', cpd. *fra-ap-* 'reach' and rarely 'get', Hitt. *ēp-*, *app-* 'take' (Sturtevant, Hitt. Gloss. 35). Walde-P. 1.46. Ernout-M. 60 f. Walde-H. 1.57 f.

Lat. *parāre*, commonly 'prepare' but

also frequently and classical 'strive after, get', whence 'get with money, buy', prob. : Lat. *parere* 'give birth, bear' (perh. orig. 'produce'), Lith. *perėti* 'brood, hatch', etc. Walde-P. 2.41. Ernout-M. 734 f.

It. *ottenere*, Fr. *obtenir*, Sp. *obtener*, Rum. *obține*, all late borrowings fr. Lat. *obtinēre* 'get hold of, get possession of, acquire', cpd. of *tenēre* 'hold' (11.15).

Sp. *conseguir* (= It. *conseguire* 'reach'), fr. Lat. *cōnsequī* (VLat. *-sequere*) 'follow up, reach'.

Rum. *căpăta* (= It. *capitare* 'arrive'), fr. VLat. **capitāre*, deriv. (beside *captāre*) of *capere* 'take' (11.13). REW 1635.

3. Ir. *ad-cota* (3sg.), cpd. of *ad-* (pretonic for *en-*) *com-ta* fr. the IE root **stā-* 'stand'. Cf. Lat. *praestināre* 'buy', Arm. *stanam* 'acquire, earn'. Pedersen 2.638 f. Thurneysen, Gram. 351, 420.

NIr. *faghaim* for *faghbhaim* : Ir. *fogabim, fogbaim* 'find', cpd. of *gaibim* 'take, seize' (11.14). Pedersen 2.528.

W. *caffael, cael*, Br. *kavout* (also 'find') : Ir. *gaibim* 'take, seize', perh. by a blend with the root of Lat. *capere*, etc. Walde-P. 1.345. Pedersen 1.187, 2.532.

4. Goth. *gastaldan* 'possess' (11.12), also 'get, acquire' (*gastaistald* = ἐκτησάμην Neh. 5.16).

ON *fā* 'get, seize', Dan. *faa*, Sw. *få* : Goth. *fahan* 'seize' (11.14).

ON *geta* (but not the chief use of the word, cf. Vigfusson and Fritzner s.v.), OE *begietan*, ME *gete*, NE *get*, OHG *bigezzan* : Goth. *bigitan* 'find', OS *bigetan* 'seize', Lat. *prehendere* 'seize', etc. (11.14). Walde-P. 1.589. Falk-Torp 308. NED s.v. *get*, vb.

ME *obteine*, NE *obtain*, fr. Fr. *obtenir* (above, 2).

Du. *krijgen*, MHG (central) *krīgen*, *erkrīgen* 'strive for, acquire, get', hence NHG *kriegen* (now regarded as vulgar vs. *bekommen*, but everywhere heard), deriv. of MDu. *crijch*, MHG *kriec*, (central) *krīc, krīg* 'exertion, endeavor, enmity, conflict' (NHG *krieg* 'war'), outside connections dub. Weigand-H. 1.1151 f. Franck-v. W. 349 f. Paul, Deutsches Wtb. 302.

Du. *bekomen*, NHG *bekommen* : MHG *bekommen* 'arrive at, reach' with gen. 'acquire, win', OHG *biqueman* 'come up to, reach, etc.' = Goth. *biqiman* 'come upon', cpd. of *qiman*, OHG *queman*, etc. 'come'.

5. Lith. *gauti*, Lett. *gūt, gaut* (Lett. mostly 'catch, try to get', but locally 'get') : Av. *gūnaoiti* 'promotes', *gaona-* 'profit'. Mühl.-Endz. 1.687. Walde-P. 1.637.

Lett. *dabūt*, fr. Russ. *dobyt'* (below).

6. SCr. *dobiti*, Boh. *dobyti*, Russ. *dobyt'*, cpd. of *do-* 'until, up to' and *byti* 'be', with semantic development 'be up to' > 'reach, attain' > 'obtain', as in, and perh. influenced by, NHG *bekommen*.

Boh. *dostati*, Pol. *dostać*, Russ. *dostat'*, cpd. of *do-* and *stati* 'stand', semantic development as in preceding.

ChSl. *polučiti*, Russ. *polučit'* (SCr. *polučiti* 'attain, acquire'), cpd. of ChSl. *lučiti*, refl. *lučiti sę* 'happen, must', in Supr. 'hit, touch' (in modern Slavic often also 'aim, throw'), prob. : Skt. *lok-* 'see, behold, look at', Grk. λεύσσω 'see', etc., IE **leuk-*. Semantic development through 'reach, hit' fr. 'take aim, see'. Walde-P. 2.411. Berneker 742 f.

7. Skt. *āp-*, Av. *fra-ap-* : Lat. *adipīscī* (above, 2).

11.17 KEEP, RETAIN

Grk.	*ἔχω*	Goth.	*(ga)fastan*	Lith.	*išlaikyti*
NG	*κρατῶ*	ON	*halda*	Lett.	*paturēt*
Lat.	*tenēre*	Dan.	*beholde*	ChSl.	*drŭžati*
It.	*ritenere*	Sw.	*behålla*	SCr.	*(za)držati*
Fr.	*garder, retenir*	OE	*(ge)healdan*	Boh.	*držeti*
Sp.	*retener, guardar*	ME	*holde, kepe*	Pol.	*(za)trzymać*
Rum.	*ține*	NE	*keep, retain*	Russ.	*deržat'*

W.	*cadw*	MHG	*behalten*		
Br.	*mirout*	NHG	*behalten*		

'Keep, retain' is for the most part expressed by words for 'hold' (11.15), or by compounds of these, e.g. Fr. *retenir* (> ME *reteyne*, NE *retain*), NHG *behalten*, Lith. *išlaikyti*, etc. Or words for 'preserve (from harm), keep safe' (11.24) are also used in the weakened sense of 'retain', as Fr. *garder*, W. *cadw*, etc. (and so sometimes NE *preserve*), and to this group belongs NE *keep* in which 'retain' is now the leading sense. Thus all the words listed belong with those discussed in 11.15 or 11.24.

11.21 GIVE

Grk.	*δίδωμι*	Goth.	*giban*	Lith.	*duoti*
NG	*δίνω, δίδω*	ON	*gefa*	Lett.	*duot*
Lat.	*dare*	Dan.	*give*	ChSl.	*dati*

W.	*rhoi, rhoddi*	MHG	*geban*		
Br.	*rei*	NHG	*geben*		

Except in Celtic and Germanic, the words for 'give' belong to an inherited group.

1. IE **dō-*. Walde-P. 1.814 ff. Ernout-M. 274 ff. Walde-H. 1.360 ff.

Grk. δίδωμι, aor. ἔδωκα, NG δίδω and δίνω (blend of δίδω and δώνω, latter formed to aor. ἔδωσα; Hatzidakis, Einl. 408, note 1); Lat. *dare* (> It. *dare*, Sp. *dar*, Rum. *da;* Fr. *donner*, It. *donare* fr. Lat. *dōnāre* 'present, give as a gift', denom. of *dōnum* 'gift'), perf. *dedī*, Osc. *deded*, Umbr. *dede* 'dedit', Umbr. *dirsa* 'det', etc.; Lith. *duoti*, Lett. *duot;* ChSl. *dati*, etc., general Slavic; Skt., Av. *dā-;* Arm. *tam;* Alb. *dhanë;* Hitt. *dā-* 'take' (Sturtevant, Hitt. Gloss. 146 with refs.). Possibly here also W. *rhoi, rhoddi*, Br. *rei*, fr. **pro-d-*, cf. Ir. *do-rat* 'gave' (suppl. verb to *do-biur*, below) fr. **to-pro-d-* as also W. *dyry* imperat. 'give!', etc. Pedersen 2.380, 473.

There are also forms pointing to an extension **dōu-*, as OLat. subj. *duim, duam*, Umbr. *purdovitu* 'porricito', Cypr. opt. δυϝάνοι, Lith. *dovana* 'gift', etc.

2. Ir. *do-biur* 'give, bring', NIr. *dobheirim*, but commonly dependent *tabhraim*, cpd. of Ir. *berim* 'carry, bring' (10.61).

NIr. *tugaim*, generalized fr. the pret. 3sg. *tug*, Ir. *duic, tuic, tuc* 'brought', fr. **to-ucc-*, etym. dub. See under Ir. *roucc-*, 10.61.

3. Goth. *giban*, etc., general Gmc., prob. : Lat. *habēre* 'have', Ir. *gaibim* 'take, seize' (11.13), despite the semantic polarity, for which there are some parallels. Thus Ir. *gaibim* 'take, seize' and ON *fā* 'seize, get' (11.14) are sometimes used in the sense of 'give', likewise ME *take* (NED s.v. 60), and Hitt. *dā-* 'take' = IE **dō-* 'give' (see above, 1). The relation is perh. explained by the common notion of stretching out the hands, hence 'take' or 'hand over, give'. Walde-P. 1.344. Falk-Torp 312. Kretschmer, Glotta 19.207. See also refs. under Goth. *niman* 'take' (11.13).

4. Skt. *rā-* (Av. *rā-* 'grant') : *rās* 'goods, riches', *rāyi-* 'gift, jewel', Lat. *rēs* 'thing' (early also 'property'). Walde-P. 2.343. Ernout-M. 861 f.

11.22 GIVE BACK, RETURN

W.	*rhoi*	MHG	*widergeben*		
Br.	*rei*	NHG	*zurückgeben*		

For the most part 'give back' is expressed as in English by the words for 'give' with prefixes or adverbs meaning 'again, back, etc.', or by the terms equivalent to the English 'return'.

1. Words belonging with verbs for 'give' (11.21). Grk. ἀποδίδωμι (ἀπο- 'from', but also 'back again'), NG ἀποδίδω; Lat. *reddere* (whence after *prendere* 'take' VLat. **rendere* > It. *rendere*, Fr. *rendre*, Sp. *rendir*); Goth. *at-giban*, etc., all the native Gmc. words and phrases; Lith. *atiduoti*, Lett. *atduot;* ChSl. *vŭdati, vŭzdati, otŭdati*, Pol. *oddać*, Russ. *otdat';* Skt. *prati-dā-*. In the modern Celtic languages there is usually no distinction between 'give' and 'give back'. So NIr. *tabhraim* (also with *tar n-ais* 'back'), W. *rhoi*, Br. *rei*.

2. Words belonging with verbs for 'turn' (10.13). NG ἐπιστρέφω, γυρίζω; Sp. *devolver;* NE *return;* Lith. *atgręžinti* (: *gręžti* 'bore', Lett. *griezt* 'turn'); SCr. *vratiti*, Boh. *vrátiti*, Pol. *wrócić*, Russ. *vozvraščat'* (ChSl. loanword).

3. Lat. *restituere* 'replace, restore' (11.23), also 'return', as It. *restituire*, Fr. *restituer*, Sp. *restituir*.

Rum. *înapoĭa*, fr. *înapoi* 'back, behind' (fr. *apoi* 'after, next').

4. Ir. *aisicim, aiscim* (K. Meyer, Contrib. 69. Laws, Gloss. 45 f.), NIr. *aisigim* (McKenna), *aiseagaim* (Dinneen), deriv. (cpd.?) of *ais* 'back'.

5. ME, NE *restore*, also 'bring back to a previous (or original) condition', now the usual sense (11.23).

Br.	*adsevel*	NHG	*wiederherstellen*		

Words for 'restore' are from 'set in place', 'make straight', 'make firm', 'renew', 'raise, erect', 'make better', etc.

1. Grk. ἀποκαθίστημι, NG lit. ἀποκαθιστῶ, cpds. of ἀπό, in same use as in ἀποδίδωμι 'give back' (11.22), and καθίστημι 'set in order, arrange', NG καθιστῶ 'establish', cpd. of Grk. ἵστημι 'make stand'.

Grk. ἐπανορθόω, NG ἐπανορθώνω, ἐπιδιορθώνω, cpds. of Grk. ὀρθόω 'set straight, right' deriv. of ὀρθός, straight'), NG ὀρθώνω, ὀρθῶ 'erect, straighten'.

2. Lat. *restituere*, orig. 'replace', fr. *statuere* 'set up' : *stāre* 'stand'. Ernout-M. 981.

Lat. *reficere*, fr. *facere* 'make, do'.

Lat. *restaurāre*, beside older *instaurāre* 'restore, renew, repeat', prob. (as denom. of a **stauro-*) : Grk. σταυρός, ON *staurr* 'stake', etc. Walde-P. 2.608. Ernout-M. 490 f. (no etym.).

Hence (lit. words) It. *restaurare*, Fr. *restaurer*, Sp. *restaurar*, Rum. *restaura*. REW 7249.

It. *ristabilire*, Fr. *rétablir*, Sp. *restablecer*, Rum. *restabili*, cpds. of It. *stabilire*, Fr. *établir*, Sp. *establecer*, Rum. *stabili*, fr. Lat. *stabilīre* 'make firm, fix, establish'. REW 8702.

3. Ir. *aisicim*, NIr. *aisigim*, but mostly 'restore' = 'give back', see 11.22.

W. *adfer*, cpd. of *ad-* and the root seen in Ir. *berim* 'carry'. Morris Jones 332.

Br. *adsevel*, cpd. of *ad-* and *sevel* 'lift (10.22).

4. Goth. *aftra gasatjan* (*aftra gasatiþs warþ* = ἀποκατεστάθη Mk. 8.25), lit. 'set again'.

Goth. *aftra gabōtjan* (*aftra gabōteiþ* = ἀποκαθιστᾷ Mk. 9.12), lit. 'better again'.

ON *endrbœta, endrreisa*, cpds. of *endr* 'again' with *bœta* 'better, mend' (: Goth. *bōtjan*) and *reisa* 'raise, erect, build'.

Dan. *genoprette*, lit. 'erect again'.

Sw. *återställa*, lit. 'set (up) again'.

OE *ge-ednīwian*, fr. *nīwe* 'new', with prefix *ed-* 're-'.

OE *ge-edstaþelian*, fr. *staþol* (*staþel*) 'foundation, fixed condition or position'.

ME, NE *restore* fr. OF *restorer*, Lat. *restaurāre* (above, 2).

Du. *weerherstellen*, NHG *wiederherstellen*, lit. 'set in place again'.

OHG *ir-* (or *ar-*) *sezzen* ('restore', Otfr., Tat.; NHG *ersetzen* 'make good, replace'), cpd. of *sezzen* 'set'.

MHG *widermachen*, lit. 'make again'.

5. Lith. *atstatyti*, lit. 'set (up) again'.

Lith. *atitaisyti*, cpd. of *taisyti* 'mend, repair' (: *tiesus* 'straight', etc., 12.73).

Lett. *atjaunuot*, lit. 'make young again, renew' (: *jauns* 'young').

Lett. *atkal sataisīt* (so in NT), lit. 'make, prepare again' (*atkal* 'again', 14.35).

6. ChSl. *ustrojiti* (*ustrojitŭ* = ἀποκατηστήσει Mt. 17.11, ἀποκαθιστᾷ Mk. 9.12), also 'prepare, bring into order', cpd. of *strojiti* 'prepare, arrange'.

ChSl. *utvoriti* (*utvori sę* = ἀποκατεστάθη Mk. 8.25), cpd. of *tvoriti* 'make'.

ChSl. *utvrŭditi* (*utvrŭdi sę* ἀποκατεστάθη Mt. 12.13, Mk. 3.5, Lk. 6.10), also 'make firm, strengthen', cpd. of *tvrŭditi* id. (: *tvrŭdŭ* 'firm', etc.).

SCr. *uspostaviti*, Russ. *vozstanovit'*, lit. 'make stand up again'.

SCr., Boh. *obnoviti*, Russ. *vozobnovit'* lit. 'renew' (ChSl. *novŭ*, etc. 'new').

Boh. *znovu zříditi*, lit. 'establish, arrange anew' (*říditi* : ChSl. *rędŭ* 'arrangement').

Pol. *przywrócić*, lit. 'replace, put (back again)', cpd. of *wrócić* 'replace, give back' (11.22).

Pol. *naprawić*, lit. 'set right, repair', fr. *naprawa* 'betterment', cpd. of *prawy* 'right'.

7. Skt. *prati-sam-ā-dhā-* lit. 'put back together again', cpd. of *dhā-* 'place, put'.

11.24 PRESERVE, KEEP SAFE, SAVE

Grk.	*φυλάσσω, σώζω*	Goth.	*bairgan, (ga)fastan*	Lith.	*(ap)saugoti*
NG	*φυλάω, σώνω (σώζω)*	ON	*bjarga*	Lett.	*sargāt, glabāt*

W.	*cadw*	MHG	*bewarn, bergen*		
Br.	*mirout*	NHG	*bewahren*		

Words for 'preserve' are mostly connected with those for 'guard, watch, protect', etc. Some derivatives of words for 'safe' are used for 'keep safe, preserve' as well as for 'save, rescue' (11.25), and in some other words also the two groups overlap.

1. Grk. φυλάσσω, NG φυλάω, properly 'watch over, guard' (and so mostly in Hom., but Il. 16.30 'cherish' wrath, and Od. 5.208 'keep' i.e. 'remain in' the house), hence also 'preserve', fr. φύλαξ 'guard, watchman', etym.? Walde-P. 2.192.

Grk. σώζω, aor. ἔσωσα, Hom. ἐσάωσα, NG σώνω, used for 'save' both as 'keep safe, preserve' and 'rescue', fr. σάος, σῶς 'safe' (11.26).

2. Lat. *servāre*, whether or not a denom. of *servus* 'slave' in a supposed orig. sense 'guardian' (disputed, see 19.42), is clearly cognate with Av. *pasuš-haurva-* 'guarding the flock', *viš-haurva-* 'guarding the village', *nišhaurvaiti* 'watches over', IE **serw-*, extension of **ser-* in Av. *har-* 'give attention to, watch over', *harətar-* 'watcher'. Walde-P. 2.498 f. Ernout-M. 933.

Hence Lat. *cōnservāre*, with the literary borrowings, It. *conservare*, Fr. *conserver* (> NE *conserve*), Sp. *conservar*, also Fr. *préserver* (> ME, NE *preserve* now more common in this sense than the Fr.), etc.

Lat. *custōdīre*, orig. 'watch, guard' then, like Grk. φυλάσσω, also 'preserve, maintain, keep', fr. *custōs, -ōdis* 'watchman, guard' etym.? Walde-P. 2.551. Ernout-M. 248 f. Walde-H. 1.319.

Fr. *garder*, Sp. *guardar*, also 'guard', fr. 'observe, watch' (as It. *guardare*), fr. the Gmc., cf. OS *wardōn* 'care for, be on the watch', OE *weardian* 'guard, defend', OHG *wartēn* 'watch, wait for', etc. REW 9502.

Rum. *păstra* (cf. Bulg. *pastrja* id.), fr. NG παστρεύω 'cleanse', πάστρα 'cleanliness' (see 15.87), with easy sequence 'cleanse' to 'preserve'. Tiktin 1131.

3. Ir. *con-ōim* (K. Meyer, Contrib. 478) : W. *ewyllys*, Corn. *awell* 'desire', Lat. *avēre* 'desire greatly, be greedy', Skt. *av-* 'urge, favor, help'. Walde-P. 1.19. Walde-H. 1.81. Pedersen 2.586 f.

Ir. *comētaim*, NIr. *coimhēadaim*, fr. Ir. *comēt* 'servatio', vbl. n. of *com-em-* 'protect' (pret. 3pl. *comroitatar*), root *em-* also in *air-fo-emim* 'take', etc. (11.13). Ir. *comēt* serves also as vbl. n. for *con-ōim* (above). Pedersen 2.511 f., 586.

W. *cadw*, perh. : W. *cader* 'fort, stronghold', Ir. *cathir* 'city', OE *heaþorian* 'restrain', etc. G. S. Lane, Language 8.295 f. Otherwise (: W. *cad* 'troop, battle', Ir. *cath* 'battle', etc.) Loth, RC 42.84.

Br. *mirout*, also 'observe, keep' (a commandment, festival, etc.) = Corn. *miras* 'look at, observe', fr. Lat. *mīrāre* 'wonder at'. Loth, Mots lat. 188.

4. Goth. *bairgan*, ON *bjarga*, Dan. *bjærge*, OE *beorgan*, ME *berwe*, OHG *bergan*, MHG *bergen* (NHG rare in this sense) : ChSl. *brěga, brěšti* 'care for', Russ. *berec'* 'take care of, look after', etc., IE **bhergh-*. Walde-P. 2.172. Feist 76. Berneker 49.

Goth. *(ga)fastan* 'keep, watch, guard' (also to 'fast') : OE *fæstan*, ON *fasta*, OHG *fastōn, fastēn* 'make fast, fast', etc., fr. ON *fæst*, ON *fastr*, etc. 'fast, firm' : Arm. *hast* id., Skt. *pastya-* 'homestead' (i.e. 'fixed dwelling place'), IE **pasto-*. Walde-P. 2.7. Feist 143.

OE *healdan*, OHG *haltan* in both senses 'keep, preserve', showing the more orig. sense of the general Gmc. group for 'hold' (see 11.15).

ME *kepe*, mostly 'preserve, observe', NE *keep* with older sense in many phrases (*keep silence, keep guard*), but most commonly merely 'retain', fr. late OE *cēpan* 'watch, observe, regard' also 'take', orig. and history difficult, perh. : ON *kōpa* 'stare, gape'. Walde-P. 1.530. NED s.v. *keep*, vb.

ME, NE *save*, both 'keep safe, preserve' and 'rescue', see 11.25.

Du. *bewaren*, MLG *bewaren* (> Dan. *bevare*, Sw. *bevara*), OHG *biwarōn*, MHG *bewarn*, NHG *bewahren*, less usual also as simplex OHG *warēn*, MHG *warn*, NHG *wahren* = OE *warian* 'beware, warn, guard', ON *vara* 'warn, beware' : Grk. ὁράω 'see', Lat. *verērī* 'be anxious, fear', Lett. *vērt* 'look at, notice', IE **wer-*. Walde-P. 1.284 f.

5. Lith. *(ap)saugoti* 'watch, guard, keep', cf. *saugus* 'careful, cautious', etym. dub. The Gmc. group, Goth. *siuks*, etc. 'sick', if cognate (as Walde-P. 2.247 f.), has secondary meaning.

Lett. *sargāt* : Lith. *sergėti* 'watch, guard', *sargas* 'watcher', etc., prob. fr. a guttural extension of the root **ser-* in Av. *har-*, Lat. *servāre*, etc. (above, 2). Walde-P. 2.499.

Lett. *glabāt* : Lith. *glaboti* 'put away', Lett. *glābt, glēbt* 'save, help', Lith. *glebti* 'clasp, embrace', SCr. *globiti* 'lay together, join', etc., OE *clyppan* 'embrace', OHG *klāftra* 'measure of the outstretched arms', etc., perh. fr. a root meaning 'press, squeeze, put together' or the like. Walde-P. 1.616. Berneker 305.

6. ChSl. *chraniti*, Boh. *chraniti*, Russ. *chranit'*, perh. fr. the root **ser-* in Av. *har-*, Lat. *servāre*, etc. (above, 2). Walde-P. 2.498. Berneker 397 f.

SCr. *čuvati*, orig. iter. to *čuti* 'hear, feel', ChSl. *čuti*, etc. 'feel, notice' : Grk. κοέω 'notice', Lat. *cavēre* 'take care, watch over', OHG *scouwēn* 'regard', Skt. *kavi-* 'wise, seer', etc., IE **(s)keu-*. Walde-P. 1.370. Berneker 162 f.

Boh. *chovati*, Pol. *chować*, etym. dub. Berneker 399 f. Brückner 183 (: ChSl. *čuti*, OHG *scouwēn*, etc., above).

7. Skt. *rakṣ-* 'protect, preserve, save' : Grk. ἀλέξω 'ward off, defend', OE *ealgian* 'protect, defend'. Walde-P. 1.89.

Av. *θrā-*, see 11.25.

Words for 'save, rescue' are in part derivatives of those for 'safe', but come also from various notions like 'let loose, snatch away, set free'.

1. Grk. σώζω, see 11.24.

NG γλυτώνω = ἐκλυτώνω, fr. class. Grk. ἐκλυτός 'let loose, relaxed', vbl. adj. of ἐκλύω 'let loose, free'. Hatzidakis, Μεσ. 1.160.

2. Lat. *servāre*, see 11.24.

Lat. *ēripere*, cpd. of *rapere* 'snatch away, carry off' (11.14).

Late Lat. *salvāre* (> It. *salvare*, Fr. *sauver*, Sp. *salvar*) deriv. of *salvus* 'safe, well' (11.26).

Rum. *mîntuĭ*, prob. through the Slavic (cf. SCr. *mentovati*) fr. Hung. *mend* id. Tiktin 989.

Rum. *scăpa* (also intr. 'escape' = Fr. *échapper*, It. *scappare*, etc.), fr. VLat. *excappāre*, lit. 'un-cloak', deriv. of *cappa* 'cloak'. REW 2952. Pușcariu 1542.

3. Ir. *tessurc*, MIr. *tessargim* (NIr. *teasargaim* Dinneen), cpd. of *to-ess-* with *orgim* 'kill, injure' (4.76). Pedersen 2.588.

Ir. *sōirim*, NIr. *saoraim*, fr. Ir. *sōir*, NIr. *saor* 'free' (19.44).

NIr. *fuasclaim*, fr. OIr. *dufualsci* (3sg.) 'undoes, releases', cpd. of *to-od-ess-* with *lēicim* 'let, leave, let go' (: Lat. *linquere*, etc.). Pedersen 2.564 f.

NIr. *sābhālaim*, prob. fr. NE *save*. K. Meyer ap. Macbain 299.

W. *achub* (older sense 'occupy, seize' hence 'rescue, save'), fr. Lat. *occupāre* 'take possession of, occupy'. Loth, Mots lat. 130.

Br. *savetei* deriv. of *savete* 'safety, security', fr. OFr. *savété(t)*, *salvété(t)*, etc. id. (Lat. *salvitās, -ātis*).

Br. *salvi* deriv. of *salo, salv* 'safe', fr. Lat. *salvus* (11.26). Loth, Mots lat. 204.

4. Goth. *(ga)nasjan*, OE *nerian*, OHG *(ge)nerian*, MHG *(ge)nern*, *nerigen* (NHG *nähren* 'nourish', and so largely also in the older language) = OFris. *nera* 'nourish', caus. to Goth. *ga-nisan*, OE *genesan*, OHG *ginesan*, etc. 'be saved, healed', prob. : Grk. νέομαι 'go, return (safely)', Skt. *nas-* 'approach, embrace'. Semantic development not clear, but perh. 'be saved' fr. 'escape, go safely'. Walde-P. 2.335. Feist 196.

ON *hjalpa* 'help, save' : Goth. *hilpan*, etc. 'help' (19.58).

ON *frjālsa*, Dan. *frelse*, Sw. *frälse*, fr. ON *frjāls* 'free' (19.44). Falk-Torp 272. Hellquist 242.

OE *hreddan*, ME *redde*, Du. *redden* (MLG *redden* > Dan. *redde*, Sw. *rädda*), OHG *rettan* (also 'drive, move'), MHG, NHG *retten*, perh. as 'save' fr. 'move, thrust aside' : Lith. *krėsti*, Ir. *crothaim* 'shake'. The OHG word would then preserve the more orig. meaning. Cf. the semantic development of NE *rescue* (below). Walde-P. 1.484. Falk-Torp 885, 928.

ME, NE *save* fr. OFr. *salver, sauver* (above, 2).

ME *reskowe*, NE *rescue*, fr. OFr. *rescourre* 'to free', cpd. of *escourre* 'shake', fr. Lat. *ex-cutere* 'shake off'. NED s.v. REW 2998.

5. Lith. *išgelbėti*, also 'help' as usually the simple *gelbėti* (19.58).

Lett. *glābt* : *glabāt* 'preserve, lay up' (11.24).

6. ChSl. *sŭpasti*, SCr., Russ. *spasti*, perfect. cpd. of *pasti* 'pasture, tend (sheep)' : Lat. *pāscere* 'pasture, feed', etc. Walde-P. 2.72.

SCr. *izbaviti*, Russ. *izbavit'* = ChSl. *izbaviti* 'free, redeem', cpds. of *iz-* 'off, out' with caus. of Slav. *byti* 'become, be'. Berneker 46 f.

Boh. *zachraniti*, perfect. cpd. of *chraniti* 'preserve' (11.24).

Pol. *ratować*, cf. *rat, rata* 'rescue, help', loanword fr. NHG *retten* (above, 4). Brückner 454.

Pol. *ocalić*, fr. *cały* 'safe, whole' (11.26).

7. Skt. *tāraya-*, 'cause to cross' also 'rescue', caus. of *tṛ-* 'cross over', also 'escape', with Skt. *trā-*, Av. *θrā-* 'protect, save, rescue' : Lat. *trāns* 'across', *intrāre* 'enter', IE **ter(ə)-*, **trā-*, primary sense prob. 'cross, penetrate' or the like. Walde-P. 1.732 ff.

Av. *būj-, bunj-* 'loose, release, rescue', also *avi-būj-* 'rescue' (Barth. 916 f.), cf. NPers. *bōxtan* 'save, redeem' : Goth. *usbaugjan* 'sweep away', perh. also (**bheug-* beside **bheugh-*), Lat. *fungī* 'execute, perform, discharge', Skt. *bhuj-* 'enjoy'. Walde-P. 2.145. Ernout-M. 402. Walde-H. 1.566 (with separation of the two groups).

Words for 'safe' as 'free from danger or harm' are of diverse sources. Several mean literally 'without care, anxiety' (hence first of persons who feel 'safe'), or 'without danger', 'without harm'. Many are words that mean primarily 'whole' or 'well, in good health' (4.83). Most of these are used for 'unharmed', but hardly for 'safe' as 'free from danger'. Other semantic sources are 'strong'(?), 'protected', 'true, trustworthy', 'unconcealed'.

Several words of this group come to mean also or mainly 'sure, certain' (17.37).

1. Grk. σῶς, σῶος, fr. σάος (cf. comp. σαώτερος), σάϝος (cf. Cypr. Σαϝο-κλέϝης), prob. fr. *twə-wo- : Skt. *tāuti*, *tavīti* 'is strong, has power', Av. *tavah-* 'might, strength', etc. Walde-P. 1.706. Boisacq 852.

Grk. ἀσφαλής, lit. 'firm, solid, not liable to fall' neg. cpd. : σφάλλω 'cause to fall, overthrow', etym. dub. Walde-P. 2.599, 678. Boisacq 927.

2. Lat. *tūtus*, pple. (beside *tuitus*) of *tuērī* 'protect', also (poet.) 'look at, see', perh. : Ir. *tūath* 'left, north' (as orig. 'favorable'), Goth. *þiuþ* 'good', ON *þȳðr* 'mild, friendly', etc. Walde-P. 1.706. Otherwise Ernout-M. 1062 f. (as perh. : Skt. *tavīti* 'is strong', etc., above, 1).

Lat. *salvus* (> It., Sp. *salvo*, Fr. *sauf*) 'whole, unharmed, safe' : Skt. *sarva-* 'whole, all', Grk. ὅλος 'whole', etc. Walde-P. 2.510 f. Ernout-M. 891.

Lat. *sēcūrus* (> It. *sicuro*, OFr. *sure*, Fr. *sûr*, Sp. *seguro*), lit. 'without care', neg. cpd. of *cūra* 'care, concern, trouble', hence, but only later, 'safe'. Ernout-M. 246.

Rum. *nevătămat*, lit. 'not injured', neg. of pple. of *vătăma* 'injure, wound' (11.28).

Rum. *teafăr*, orig. ? Tiktin 1570.

3. Ir. *slān*, also 'well, in good health' (4.83).

NIr. *sābhālta*, pple. of *sābhālaim* 'save, rescue' (11.25).

W., Br. *diogel*, cpd. of prefixes *di-* (neg.), *o-* (= *go-*, cf. W. *di-o-ddef* : *go-deff* 'suffer') and the root seen in W. *celu* 'hide', *di-gelu* 'cease hiding, expose'. Cf. W. *digel* 'unconcealed, open'. Hence 'safe' because 'not hidden'.

W. *dianaf*, neg. cpd. of *anaf* 'blemish, defect, wound' : Ir. *anim* 'blemish, flaw', Grk. ὄνομαι 'scold, blame', etc. Pedersen 2.61. Walde-P. 1.180.

Br. *salo*, fr. Lat. *salvus* (above, 2). Loth, Mots lat. 204.

4. Goth. *hails*, *gahails*, ON *heill*, OE *hāl*, OHG, MHG *heil*, all also 'well, whole' (4.83).

ON *ūhættr* (usually impers. as in *ein-hverjum er ūhætt* 'it is safe for someone'), lit. 'not dangerous', neg. cpd. of *hættr* 'dangerous' (*hætta* 'danger', 16.54).

Goth. *arniba* adv. (renders ἀσφαλῶς Mk. 14.44) : ON *ern* 'brisk, vigorous', OE *eornost* 'zeal, earnestness', etc. perh. fr. the root in Skt. *ṛṇoti*, *ṛṇvati* 'arises, moves', Grk. ὄρνῡμι 'arouse, move', etc. Walde-P. 1.138. Feist 58.

OE *sicor*, ME *siker*, NE dial. *sicker*, OHG *sichur*, MHG, NHG *sicher*, MLG *seker* (> Dan. *sikker*, Sw. *säker*), Du. *zeker*, all fr. Lat. *sēcūrus* (above, 2). Falk-Torp 965. NED s.v. *sicker*.

Dan. *tryg*, Sw. *trygg* : ON *tryggr*, Goth. *triggws*, OE *trīewe*, OHG *gi-triuwi*, etc. 'true, trustworthy' (16.66). Falk-Torp 1290.

Dan. *uskadt*, Sw. *oskadd*, *oskadad*, neg. pple. of Dan. *skade*, Sw. *skada* 'harm, injure' (11.28).

OE *orsorg*, OHG *ursurgi* (Tat.), neg. cpd. of OE *sorg*, OHG *sorga* 'care' (16.14), a lit. rendering of Lat. *sēcūrus*, and (at least OE) used in both its orig. and later sense.

ME *sauf*, NE *safe* fr. Fr. *sauf* (above, 2).

ME *sūre* (NE obs. in this sense), fr. OFr. *sure* (above, 2).

ME, NE *unharmed*, neg. pple. of *harm*, OE *hearmian* 'injure, harm' (11.28).

NE *secure* fr. Lat. *sēcūrus* (above, 2).

Du. *veilig* = MLG *vēlich*, OFris. *fēlig* : ODu. *veile* id., OE *fǣle* 'faithful, true, good', root connection dub. Walde-P. 2.70 (top). Franck-v. W. 727.

Du. *onbeschadigd*, neg. pple. of *beschadigen* 'injure, harm' (11.28).

MHG *unversēret*, NHG *unversehrt*, neg. pple. of MHG *versēren* 'wound, injure' (NHG *versehren*), cpd. of MHG *sēren* 'cause pain' (fr. MHG *sēre*, OHG *sēro* 'painful', etc.). Weigand-H. 2.1127, 1163.

5. Lith. *sveikas*, Lett. *vesels*, both also 'well' (4.83).

Lith. *čielas*, also 'whole', fr. Russ. *celyj* (below).

Both these Lith. words (like OE *hāl*, ChSl. *cělŭ*, etc.) are used for 'safe' as 'unharmed', but hardly as 'free from danger', which might be expressed by a phrase *be pavojaus* 'without danger'.

Lett. *druošs*, orig. 'brave, bold' : Lith. *drąsus* 'bold, brave', Lett. *drīstēt*, *drīk-stēt*, Lith. *drįstėti* 'dare'. Mühl.-Endz. 1.508.

6. ChSl. *sŭchranĭno* adv. (renders ἀσφαλῶς Mk. 14.44) : (*sŭ*)*chraniti* 'save, preserve' (11.24).

ChSl. *cělŭ*, SCr. *cio*, Boh. *celý*, Pol. *cały* (and *ocalony* fr. *ocalić* 'save'), Russ. *celyj*, all also 'whole, entire', ChSl. also 'well' (4.83).

SCr. *siguran*, Slov. *siguren*, like NG σίγουρος 'certain, safe', fr. Venet. *seguro* = It. *sicuro* (above, 2). Miklosich 296. G. Meyer, Neugr. Stud. 4.81.

SCr. *čitav*, prob. : Lith. *kietas* 'hard, firm'. Berneker 158.

Boh. *bezpečný*, Pol. *bezpieczny*, lit. 'without care' (Russ. *bezpečnyj* 'careless'), cpd. of *bez* 'without' and second member fr. Boh. *péče*, Pol. *piecza* 'care'.

Boh. *jistý* : ChSl. *istŭ* 'real, actual', *istina* 'truth', etc. Berneker 435.

Russ. *bezopasnyj*, cpd. of *bez* 'without, un-' and *opasnyj* 'dangerous' (cf. 16.54).

7. Skt. *kṣema-*, also 'comfortable, agreeable' : *kṣi-* 'dwell, abide, inhabit'. Uhlenbeck 72.

Skt. *akṣata-*, neg. *a-* with pple. of *kṣan-* 'hurt, wound, break'. Uhlenbeck 69.

Words for 'destroy' reflect a variety of destructive actions, some of them originally applicable to particular kinds of objects, as 'tear down, wreck' (buildings), 'lay waste' (land), 'make perish' (living things), while others like 'scatter, disturb, put down, bring to naught' might be more generally applied, so that the precise history is obscure.

1. Grk. φθείρω (*φθέρι̯ω) : Skt. *kṣar-* 'flow' also 'melt away, perish', Av. *γžar-* 'flow', cf. Grk. φθορά 'destruction' and also (as remnant of orig. meaning) 'mixing of colors in painting'. Walde-P. 1.700. Development fr. 'flow' prob. through 'melt away, dissolve' to 'perish' (as sometimes in Skt.), hence 'cause to perish, destroy', or possibly through 'mix' (> 'destroy the purity of, destroy'). Cf. Ir. *leg-* 'dissolve, melt', cpd. *dolega* 'destroys' (below, 3).

Grk. ὄλλῡμι (poet.), in prose usually ἀπόλλῡμι, beside ὄλεθρος 'destruction, death', ὀλέκω 'kill', with no clear outside connections.

Grk. καταλύω, among other uses also 'destroy' (so freq. in NT), cpd. of λύω 'loose, release' (11.34).

Grk. ἀφανίζω, orig. 'make unseen' (fr. ἀφανής 'unseen'), hence also 'destroy'.

Grk. καταστρέφω 'overturn, upset', sometimes 'ruin', NG 'destroy', cpd. of στρέφω 'turn'.

NG χαλῶ, see 11.29.

2. Lat. *perdere* ('destroy' and 'lose'; > Romance words with latter sense prevailing, 11.33), cpd. like *condere*, etc., of IE *dhē- 'place, put', with development fr. 'put away' (cf. U.S. slang *put away* 'kill'), with *per-* as in *pervertere* 'turn aside, seduce', etc. Walde-P. 1.827. Ernout-M. 277. Walde-H. 1.362.

Lat. *abolēre*, prob. (not : Grk. ὄλλῡμι, but) a new transitive formation to *abolēscere* 'perish, grow old', this a pendant of *ad-olēscere* 'grow up', cpd. of *alere* 'nourish', etc. Walde-P. 1.87. Ernout-M. 5 f. Walde-H. 1.4 f.

Lat. *dēstruere*, mostly late in general sense, earlier 'tear down, demolish', cpd. of *struere* 'build'. Hence the Romance words It. *struggere* 'melt, destroy' (but in latter sense now new cpd. *distruggere* > Rum. *distruge*), Fr. *détruire*, Sp. *destruir*. Ernout-M. 989 f. REW 2606. Tiktin 553.

3. Ir. *do-lega* (3sg.), cpd. of *leg-* 'dissolve, melt' (e.g. 3sg. rel. *legas*, vbl. n. *legad*) : W. *llaith*, Br. *leiz* 'damp', ON *leka*, MHG *leken* 'leak', etc. Walde-P. 2.422 f. Pedersen 1.123, 2.562.

Ir. *millim* (also, as NIr. mostly, 'ruin, spoil'), etym. ? Macbain 249.

Ir. *collim* 'violate, destroy, ruin' (K. Meyer, Contrib. 425), fr. *coll* 'destruction, loss, ruin' = W. *coll*, Br. *koll* 'loss, damage' : Goth. *halts*, ON *haltr*, OE *healt* 'lame', prob. as 'broken' fr. the root *kel- 'strike'. Walde-P. 1.439. Pedersen 1.114.

W. *dinistrio*, fr. *dinistr* 'destruction', older *dinustr*, etym.? Morris Jones 387 (but dub.).

W. *destrywio* fr. Lat. *dēstruere* (above). Loth, Mots lat. 161.

Br. *distruja*, likewise fr. Lat. *dēstruere* through an OFr. form.

4. Goth. *fraqistjan*, *usqistjan*, once simply *qistjan*, OHG *firquistan*, *arquistan*, etym. dub., perh. : Lith. *gesti* 'be quenched, go out' and 'spoil', Grk. σβέννῡμι 'quench', etc. Walde-P. 1.528, 668, 693. Feist 389.

ON *spilla*, OE *spillan*, ME *spille* 'destroy' and 'spoil' (sense obs. in NE *spill*), also OE *spildan* : OHG *spildan* 'waste', OS *spildian* 'ruin, spoil', prob. fr. the root in OHG *spaltan* 'split', etc. (9.27). Walde-P. 2.678. Falk-Torp 1121 f.

Dan. *ødelægge*, orig. 'lay waste' (but now in this sense *lægge øde*), cpd. of *øde* 'waste, desert' and *lægge* 'lay'.

Sw. *förstöra*, fr. MLG *vorstoren*, parallel to NHG *zerstören* (below). Hellquist 1109.

ME *destrui(e)*, NE *destroy* fr. OFr. *destruire*.

The majority of words for 'harm, injure' (and those for the corresponding nouns) were originally applied to living creatures, with reference to bodily (or sometimes mental) injury, coming from notions like 'strike, wound, hurt, cause grief', etc.,—and only secondarily applied to material things. An exception is Lat. *damnum* with its derivatives, like NE *damage*, mostly applied to material things.

1. Grk. βλάπτω, in Hom. mostly 'disable, hinder', later 'harm, injure', beside sb. βλάβη 'harm, injury', also π-forms, as Cret. βλοπία, καταβλάπεθαι, etym. dub. Connection with Skt. *mṛc-* 'hurt, injure' (through *μλαπ-, IE *mḷkʷ-), as Boisacq 120, is impossible if the analysis of Skt. *mṛc-* preferred in 10.27 under Av. *marək-* 'destroy, kill' is the correct one. Walde-P. 2.297.

Grk. λῡμαίνομαι, in earliest use a strong expression 'outrage, maltreat', later also 'cause damage, harm, spoil' : λύμη 'outrage', λῦμα 'dirt, filth', Lat. *lutum* 'mud', *polluere* 'pollute'. Walde-P. 2.406.

NG ζημιώνω, fr. Grk. ζημιόω mostly 'penalize, fine, punish', deriv. of ζημία 'loss, damage', esp. 'penalty, fine', in NG the usual noun for 'harm, damage' and financial 'loss' (11.74).

2. Lat. *nocēre* with dat. 'do harm to' (> It. *nuocere*, Fr. *nuire*, etc., REW 5938), caus. of *nek̑- in Lat. *nex* 'violent death, murder', *necāre* 'kill', Grk. νέκυς, νεκρός 'corpse', Av. *nasu-* 'corpse', Skt. *naç-* 'perish', caus. *nāçaya-* (11.27). Walde-P. 2.326. Ernout-M. 669.

Lat. *laedere*, esp. 'wound, hurt' but also 'injure', etym. dub., but orig. sense 'strike, hit' implied by cpds. *allīdere*, *collīdere*, etc. Ernout-M. 517. Walde-H. 1.749.

Lat. *damnum*, the regular noun for 'harm, injury' (> It. *danno*, OFr. *dam*, Sp. *daño*, Rum. *daună*; deriv. OFr. *damage*, Fr. *dommage*; REW 2468), also in early use 'loss, expense', prob. fr. *dap-no- : Grk. δάπτω 'devour, rend, tear', δαπάνη 'expense', etc. Walde-P. 1.764. Ernout-M. 252 f. Walde-H. 1.322. Its deriv. *damnāre* is 'doom, condemn' (> It. *dannare*, etc.), the orig. sense 'harm' being only rare and early, so that the use of Sp. *dañar* for 'harm' is not inherited but restored from the noun.

Rum. *vătăma* 'injure, wound', etym. dub. Puşcariu 1865.

In the Romance languages generally 'to harm' is most commonly expressed by phrases, as It. *far male*, Fr. *faire* (*du*) *mal*, Rum. *face rău*, all lit. 'do ill' (cf. 'bad' 16.62). Similarly, after French, Br. *ober drouk*, etc. and Du. *kwaad doen*.

3. Ir. *fofichim* 'inflict (injury, damage)', cpd. of *fichim* 'fight' (20.11). Pedersen 2.521.

Ir. *bronnaim* : W. *briwo* 'break, hurt', OE *brȳsan* 'crush' (NE *bruise*), Lat. *frūstum* 'piece, bit', etc. Walde-P. 2.198 f. Pedersen 1.54 f.

Ir. *orgim* 'kill' (4.76), also 'injure, harm' (Laws, Gloss. 597).

NIr. *deanaim olc* 'do ill' and other phrases with *olc* 'bad' (16.62). For *loitim* see under 'spoil' (11.29).

W. *niweidio*, deriv. of *niwed* 'harm, injury', etym.? Morris Jones 106 (fr. *nwyet, *nāw-yat : Lith. *novyti* 'afflict, kill', etc., Walde-P. 2.316).

Br. *ober drouk*, *ober gwall* 'do ill' (like Fr. *faire mal*), phrases with words for 'bad' (16.62), also *ober gaou* 'do wrong' (like Fr. *faire tort*) with *gaou* 'false, wrong, a lie' (16.71).

4. Goth. *ga-skaþjan*, ON *skeðja*, *skaða* (> ME *skathe*, NE *scathe*), Dan. *skade*, Sw. *skada*, OE *skeþþan* (also *sceaþan*), OHG *scadōn*, *scadēn*, NHG *schaden*, *beschädigen*, etc., with sbs. OHG *scado*, etc., general Gmc. : Ir. *scathaim* 'mutilate, lame', Grk. ἀ-σκηθής 'unhurt, unscathed'. Walde-P. 2.557 f. Falk-Torp 978.

Goth. *ga-sleiþjan*, lit. 'endanger' : *sleiþs* 'dangerous, bad', *sleiþi* 'danger', OE *slīþe* 'dangerous, cruel', etc. (16.65).

OE *hearmian*, ME *harme*, NE *harm*, deriv. of OE *hearm* 'hurt, injury, harm' = ON *harmr* 'grief, sorrow', OHG *harm* 'hurt, injustice, grief', NHG *harm* 'grief', etc., prob. : ChSl. *sramŭ* 'shame', but root connection? Walde-P. 1.463. Falk-Torp 381.

NE *damage*, fr. ME, NE *damage* (sb.), fr. OFr. *damage*, deriv. of OFr. *dam* fr. Lat. *damnum* (above, 2).

ME *hurte*, NE *hurt*, fr. OFr. *hurter* (Fr. *heurter*) 'strike, hit, knock' (9.21). English uses 'knock, dash', then 'cause bodily injury, pain to', then more generally 'injure', still mostly with reference to living creatures, but colloquially also with reference to material things. NED s.v. *hurt* vb.

5. Lith. *kenkti*, intr. (cf. *kenkia* 'it hurts, aches'), with dat. 'be harmful to', : Grk. κέγκει· ἐπιδάκνει (Hesych.), κένκω· πεινῶ (Phot.), OE *hungor*, etc. 'hunger' (5.14). Walde-P. 1.401.

ChSl. *otŭštetiti* (Supr., etc.), SCr. *oštetiti*, derivs. of ChSl. *tŭšteta*, SCr. *šteta* 'harm, injury' : ChSl. *tŭštĭ* 'empty' (13.22). Leskien, Serbo-Croat. Gram. 55.

Boh. *ublížiti*, deriv. of *bliz* 'near', through 'come near', cf. NHG *zu nahe treten* 'offend, injure'. Berneker 61.

SCr. (*na-*)*škoditi*, Boh. (*po-*, *u-*) *škoditi*, Pol. (*u-*, *za-*)*szkodzić*, derivs. of SCr., Boh. *škoda*, Pol. *szkoda* 'harm, injury', loanwords fr. OHG *scado*, MHG *schade* (above, 4). Brückner 549.

7. Skt. *hiṅs-*, prob. : *heṣa-* 'missile', fr. an extension of the root in Skt. *hi-* 'impel, hurl', Av. *zaēna-* 'weapon', etc. Walde-P. 1.546.

Av. *zyā-* (pres. *zi-nā-*) 'injure', esp. 'deprive of' (as OPers. *dī-*, 3sg. imperf. *adīnā*), with *fra-* 'lay waste', also sb. *zyāni-* 'harm, injury' : Skt. *jyā-* (3sg.

pres. *jināti*) 'oppress, deprive of', pointing to an IE *ĝyā- beside *gʷyā- in words for 'might, power', as Grk. βία, etc. Walde-P. 1.667. Barth. 1700.

Skt. *riṣ-*, Av. *iriš-* 'be injured' and 'injure' (cf. Av. *raēša-* 'injury', NPers. *rēš* 'wound'), etym. dub. Walde-P. 2.345 f. Uhlenbeck 250. Barth. 1485 f.

The notion 'spoil', as in the prevailing current use of NE *spoil* (vb.), that is, 'injure something seriously', mostly so as to make it useless without entirely destroying it, is midway between 'harm, injure' and 'destroy', so that there is some overlapping of usage. Several of the words listed here may be used also for 'destroy' or for 'injure', but in most there is a close approximation to the use of NE *spoil*.

The etymological connections are too diverse to summarize.

1. Grk. διαφθείρω, cpd. of φθείρω 'destroy' (11.27), orig. 'destroy utterly', then esp. 'corrupt, spoil, ruin'.

NG χαλῶ (or χαλνῶ), aor. ἐχάλασα, also 'destroy' but esp. 'spoil', fr. Grk. χαλάω 'loosen, let fall, drop', with development prob. fr. 'drop' through 'break to pieces, smash'. Earlier sense preserved in nautical use for 'lower' (the mast), 'drop' (the anchor).

2. Lat. *corrumpere* (also 'destroy'; in fig. sense 'corrupt', as mod. derivs. mostly; but ME *corrupt* also 'spoil', as NE in Bible, etc., NED s.v. *corrupt* vb.[1]), cpd. of *rumpere* 'break' (9.26), hence orig. 'break to pieces'. Ernout-M. 876.

It. *guastare*, Fr. *gâter* (It. and formerly Fr. also 'lay waste'; Sp. *gastar* 'waste, spend'), fr. a blend of Lat. *vastāre* and (init. fr.) Gmc. *wōstjan (OS *āwōstian*, OHG *wuosten*), both 'lay waste', and derivs. of the adjs. Lat. *vastus* and OHG *wuosti*, etc. 'empty, waste', themselves cognate. REW 9168. Gamillscheg 461.

It. *sciupare* (also 'waste, squander'), perh. fr. *ex-sūpāre 'drink up' second part fr. Gmc. (MLG *sūpen*, OE *sūpan*, NE *sup*, etc.). REW 3077. Or fr. a blend of this with Lat. *dissupare* (*dissipāre*) 'scatter, disperse, squander'?

Sp. *echar a perder*, phrase with *echar* 'throw' (10.25) and *perder* 'lose' (11.35).

Rum. *strica* 'break in pieces', also 'spoil, ruin, injure', etc. perh. fr. Lat. *ex-tricāre* 'untangle', but semantic development uncertain. Tiktin 1514. Puşcariu 1655.

3. Ir., NIr. *loitim* (also 'injure, hurt, wound', but esp. 'spoil') : Ir. *lot* 'destruction, wound, hurt', further connections dub. Macbain 233. Stokes 258.

W. *difetha*, perh. fr. *di-fed-ha, cpd. of neg. prefix *di-* and *med-* in *meddu* 'possess'. Morris Jones 384.

Br. *gwasta* in use and orig. like Fr. *gâter*, etc. (above, 2).

4. Goth. *frawardjan* ('corrupt, spoil, disfigure', rendering φθείρω, διαφθείρω, ἀφανίζω), OHG *farwarten*, MHG *verwerten*, caus. of Goth. *frawairþan* 'be corrupted', OHG *farwerdan*, cpds. of Goth. *wairþan*, OHG *werdan* 'become' (cf. OE *forweorþan* 'come to naught, perish'). Walde-P. 1.275. Feist 166.

ON *spilla*, OE *spillan*, ME *spille*, see under 'destroy', 11.27.

NE *spoil*, in ME 'despoil', through OFr. fr. Lat. *spoliāre* 'despoil', deriv. of *spolium* 'booty, spoil'. Orig. sense kept in the noun *spoil*, while the verb took on the use of ME *spille* (above), as this became restricted to 'spill'. NED s.v.

NE *ruin*, orig. 'reduce to ruins', hence 'inflict great injury', often 'spoil', fr. Fr. *ruiner*, MLat. *ruīnāre*, deriv. of Lat. *ruīna* 'a falling-down, ruin', fr. *ruere* 'fall down'.

MHG, NHG *verderben*, MLG *vorderven* (> Dan. *fordærve*, Sw. *fördärva*), Du. *bederven*, caus. to MHG *verderben* (intr. str. vb.) 'come to naught, die', OFris. *forderva* 'perish', OE (*ge*)*deorfan* 'labor' and 'be in peril, perish', prob. : Lith. *darbas* 'labor', etc. Walde-P. 1.863, 2.631 (after v. Wijk, IF 24.230 f.).

5. Lith. *gadinti*, Lett. dial. (*sa-*)*gandēt* : Lith. *gesti*, pres. *gendu*, Lett. *g'int*, pres. *g'instu* 'spoil' (intr.), 'perish', Skt. *gandh-* (Dhātup.) 'hurt, injure', etc. Walde-P. 1.672 f.

Lett. *maitāt*, prob. as orig. 'cause to rot', deriv. of Lett. *maita* 'carrion'. Mühl.-Endz. 2.552. Otherwise Walde-P. 2.222 (: Goth. *maitan* 'cut', etc.).

6. ChSl. *tĭlěti* (Gospels, Supr.; also *ras-*), beside *tĭlja* 'corruption, rust, moth' = Russ. *tleti* 'be rotten', *tlja* 'rot', etc. (Miklosich 370), perh. : Grk. τῖλος 'thin stool' (in diarrhea), OE *þīnan* 'be moist', etc. Walde-P. 1.701.

SCr. *pokvariti*, beside *kvar* 'injury', etym.? Berneker 655.

Words for 'find' reflect such notions as 'seize, get', 'come upon, go after', 'see, know' (through 'come to recognize'). Some originated in the language of the chase through 'stir up' or 'scent' (game).

1. Grk. εὑρίσκω, NG βρίσκω : OIr. pret. *fūar* 'found', *frīth* 'was found', Arm. *gerem* 'capture, seize', root **wer-*. Walde-P. 1.280. Thurneysen, Gram. 428, 471.

2. Lat. *invenīre*, lit. 'come upon, meet', whence the usual sense 'find, discover', cpd. of *venīre* 'come'. Ernout-M. 1084.

Lat. *reperīre* 'find out, discover' (but often synonymous with *invenīre*) and 'obtain', cpd. of *parere* (older *parīre*) 'give birth to' for orig. 'get' (cf. *parāre* 'prepare, get', 11.16). Ernout-M. 734.

Fr. *trouver* (> It. *trovare*), Prov. *trobar, trovar* ('find', hence also 'compose poetry'), etym. much disputed, but best fr. Lat. *turbāre* 'disturb' through use as a hunters' and fishermen's term, as actually attested in Sard. *turbare* 'stir up game' and 'frighten fish into a place where the water is poisoned'. REW 8992 (with refs., esp. Schuchardt, Wagner). Iordan-Orr, Introd. to Romance Linguistics 54.

Sp. *hallar*, Port. *achar*, Rum. *afla*, fr. Lat. *afflāre* 'breath upon', through use as a hunters' term, 'scent' (cf. Fr. *flairer*, etc.) game, hence 'track', 'find'. REW 261.

Sp. *encontrar* ('meet, happen on' and so 'find' without searching, in contrast to *hallar*) fr. Cat. *encontrar*, deriv. of *encontra* 'against' (Lat. *in+contrā*), like OFr. *encontrer* (> NE *encounter*). REW 4361.

Rum. *găsi*, etym. unknown. Tiktin 664.

3. Ir. *fogaibim*, NIr. *dogheibhim* (also in NIr. 'get', esp. in orig. dependent form *faghaim* 11.16), cpds. of *fo-* 'under' and *gaibim* 'take, seize' (11.14). Pedersen 1.265.

W. *caffael, cael*, Br. *kavout*, also 'get', see 11.16.

4. Goth. *bigitan* = OE *begietan*, ON *geta*, etc. 'get, obtain' (11.16).

ON, Sw. *finna*, Dan. *finde*, OE *findan*, etc., general Gmc. = Goth. *finþan* 'learn, find out' : OE *fandian*, OHG *fandōn* 'try, examine', OE *fundian*, OHG *funden* 'strive after, go forward, tend to', etc., prob. fr. the root in Skt. *panthās*, ChSl. *pątĭ* 'road, way', etc. (10.71). Walde-P. 2.27. Falk-Torp 218.

Dan. *hitte*, Sw. *hitta* = ON *hitta* 'meet with, hit upon, hit' (> late OE *hyttan*, ME *hitte*, NE *hit*) : W. *cwyddo* 'fall'. Walde-P. 1.364. Falk-Torp 407.

5. Lith. *rasti* (pres. *randu*), Lett. *atrast* (strictly 'find again' but usual for the simple *rast*), prob. : ChSl. *ob-rěsti* (pret. *ob-rětŭ*) 'find', *sŭ-rěsti* 'meet', fr. parallel root forms in *-d* and *-t*, these perh. **wrē-d-*, *wrē-t-* as extensions of the

root **wer-* in Grk. εὑρίσκω (above, 1). Walde-P. 1.280, 2.367. Otherwise (: Goth. *wrātōn* 'go, journey', ON *rata* 'go about', Walde-P. 1.274) Mühl.-Endz. 3.479, Trautmann 236.

Br.	*koll*	NHG	*verlieren*	Av.	....

Words for 'lose' mostly reflect such notions as 'destroy, injure' or 'let loose, let go, throw away', in a few cases 'rub' (through 'rub out, wear out').

In a few languages there are two common verbs for 'lose', with some idiomatic, but not rigid, differentiation. Thus Lat. *āmittere* in part 'lose' by accident or without fault vs. the stronger *perdere* 'lose' so that the object is destroyed or utterly lost. But actually both verbs are quotable with the same objects ('life', 'property', 'a person' by death, etc.) and without difference unless rhetorical. (Cf. e.g. Cic. Fam. 5.16.3).

1. Grk. ἀπόλλῡμι 'destroy' (11.27), also 'lose'.

NG χάνω, new pres. to aor. ἔχασα fr. ἐχάωσα to late χαόω 'destroy, lose', deriv. of χάος 'abyss, chasm'. Hatzidakis, Μεσ. 1.104.

2. Lat. *āmittere*, in earliest use 'dismiss', then 'lose', cpd. of *mittere* 'let go, throw, send' (10.63).

Lat. *perdere* 'destroy' (11.27) and 'lose' (> Romance words for 'lose'). Ernout-M. 277. REW 6403.

3. In older Irish 'lose' is usually expressed by a phrase with *at-baill* 'perishes, dies', e.g. *at-baill a dligid*, lit. 'perishes his right' = 'he loses his right' (Laws 1.118. 4, 9), and more often with the conjunct. form used independently *ēiplid ūad ini dligis* 'perishes from him that which is due (him)' = 'he loses what is due him' (ibid. 1.10).

NIr. *caillim*, W. *colli*, Br. *koll* : Ir. *collim* 'destroy' (11.27).

4. Goth. *fraliusan*, OE *forlēosan* (pple.

forloren > NE *forlorn*), ME *lese*, Du. *verliezen*, OHG *farliosan*, MHG *verliesen*, NHG *verlieren* : Goth. *laus* 'empty, vain', *lausjan* 'release, rescue', ON *lauss* 'free, loose', etc. (NE *loose*), fr. the root in Grk. λύω 'loose, release', etc. (11.34). Walde-P. 2.408. Feist 163.

ON *tȳna* (Norw. *tyne* 'injure, spoil') = OE *tīenan* 'vex, annoy', deriv. of ON *tjōn* 'harm, injury', OE *tēona* 'harm, injustice', etc., perh. : Skt. *du-* 'burn, torment', Grk. δαίω 'kindle', etc. (In any case the Norse meaning 'lose' fr. 'injure, harm' as often.) Walde-P. 1.768. Falk-Torp 1309.

ON *tapa*, Dan. *tabe*, Sw. *tappa*, prob. fr. the root of Lat. *damnum* (**dap-no-*) 'harm, injury' (11.28). Walde-P. 1.765. Falk-Torp 1239 f.

Sw. *förlora* = Dan. (old) *forlore*, re-formations fr. Dan. *forloren* 'lost' (now 'false') fr. MLG *vorloren* pple. of *vorlēren* : Goth. *fraliusan*, etc. (above). Falk-Torp 258 f. Hellquist 260.

ME, NE *lose*, fr. OE *losian* 'perish, be lost', also Northumbr. twice trans. 'destroy, ruin', but trans. use not regular until 13th cent.; deriv. of *los* 'loss', fr. the root in Goth. *fraliusan*, etc. (above). NED s.v.

5. Lith. *pamesti*, Lett. *pamest* (but the latter mostly 'throw away') perfect. cpds. of Lith. *mesti*, Lett. *mest* 'throw' (10.25).

Lith. *prarasti*, cpd. of *pra-* expressing missing or failing and *rasti* 'find' (11.32).

Lith. *nustoti*, cpd. of *nuo* 'from' and *stoti* 'take a stand', hence 'cease' (14.28) and, with gen., 'lose' (NSB s.v.).

Lith. *netekti*, neg. cpd. of *tekti* 'fall to one's share, have enough' : OE *þicgan* 'take, receive', etc. Walde-P. 1.715. Falk-Torp 1258.

Lett. *(pa)zaudēt*, caus. of *zust* 'disappear, be lost' like Lith. *žudyti* 'kill' caus. of *žuti* 'perish, be lost', perh. : OE *(ā)gētan* 'injure, wound, kill'. Walde-P. 1.564.

6. ChSl. *pogubiti*, SCr. *(iz)gubiti*, Pol. *zgubić* (Pol. now 'lose' by accident, as money from one's pocket, etc.), in ChSl. also 'destroy'. See 11.27.

Boh. *ztratiti*, Pol. *stracić*, Russ. *utratit'* (*tratit'* 'spend, waste') : ChSl. *tratiti* 'consume, exhaust, ruin', Goth. *þrōþjan* 'exercise', prob. fr. an extension of the root **ter-* in Lat. *terere*, ChSl. *trěti, tīrą*, etc. 'rub' (9.31), whence also Russ. *terjat'* 'lose'. Walde-P. 1.730. Brückner 575.

7. Skt. *hā-* 'leave' (12.18), 'give up', also 'lose'. But 'lose' mostly expressed as 'be lost by', e.g. *bhraṣṭa-*, pple. of *bhrańç-* 'fall, fall away, be lost'.

Words for 'release' reflect such notions as 'loose' (in lit. sense 'unbind'), 'loosen', 'let go, send forth, let slip', etc. There is frequent connection and some overlapping in use with words for 'leave' (12.18) and 'let, permit' (19.47).

1. Grk. ἀπολύω, cpd. of ἀπό 'away, from' and λύω 'loose, unbind', the latter sometimes also 'release' : Lat. *luere* 'expiate, pay a debt', *solvere* (fr. **seluere*) 'loose, unbind, release, solve', Skt. *lu-* 'cut off', etc. Walde-P. 2.408. Ernout-M. 954. Walde-H. 1.834.

Grk. ἀφίημι 'send forth, let go, release', cpd. of ἵημι 'let go, throw' (10.25).

Grk. ἀπαλλάσσω, cpd. of ἀλλάσσω 'change' (12.93).

2. Lat. *dīmittere, ēmittere*, cpds. of *dī-* (*dis-*) 'apart' and *ē-* (*ex*) 'from' with *mittere* 'let go, throw, send' (10.63).

It. *(ri)lasciare*, Rum. *lăsa*, also 'leave, let' (as Fr. *laisser*), fr. Lat. *laxāre* 'loosen, relax', deriv. of *laxus* 'slack, loose'. REW 4955.

Fr. *(re)lâcher*, deriv. of *lâche* 'loose, slack' = It. *lasco*, fr. **lascus* = Lat. *laxus* with cons. transposition. REW 4918.

Sp. *soltar*, deriv. of *suelto* 'loose, free', pple. of *solver* 'loosen, untie', Lat. *solvere*. REW 8081.

3. Ir. *lēicim*, also 'let, leave' : Grk. λείπω, Lat. *linquere* 'leave', etc. (12.18). Walde 2.396 f.

NIr. *scaoilim* = MIr. *scailim* 'scatter, strew, separate' : Lith. *skelti* 'split', ON *skilja* 'divide, separate' (cf. *skilja eptir* 'leave', 12.18), etc. Walde-P. 2.592.

W. *gollwng*, with secondary pref. *go-*, fr. MW *ellwng* id. = Ir. *inloing* 'claims' (i.e. 'puts in'), fr. IE **legh-* 'lie', in MIr. *laigid* 'lies down', Goth. *ligan*, etc. 'lie'. Walde-P. 2.424. Pedersen 2.570.

Br. *leuskel*, beside adj. *laosk* 'loose, slack', connected in some way with Lat. *laxus* or **lascus*. Loth, Mots lat. 180 f.

4. Goth. *fra-lētan, af-lētan*, ON *lāta laust*, Dan. *løslade*, OE *forlǣtan*, Du. *loslaten*, OHG *furlazzan*, NHG *entlassen, loslassen*, cpds. of Goth. *lētan*, etc. 'let, leave' (12.18).

Goth. *(ga)lausjan*, OHG *lōsen*, MHG *lœsen*, NHG *lösen* (but now mostly in secondary applications), fr. Goth. *laus* 'empty, vain', OHG *lōs* 'free', these fr. the root of Goth. *liusan* in *fraliusan* 'lose' (11.33), etc.

Dan. *slippe*, Sw. *släppa* : ON *sleppa* (str. vb.) 'slip, escape', *sleppa* (wk. vb.) 'let slip, drop', further relations (as with NE *slip*, etc., 10.42) uncertain. Walde-P. 2.433. Falk-Torp 1064.

Sw. *lösgiva* cpd. of *lös* 'loose, free' and *giva* 'give' (11.21).

ME *relese*, NE *release* fr. OFr. *relaisser* : It. *rilasciare*, etc. (above, 2).

5. Lith. *paleisti*, Lett. *atlaist*, cpds. of Lith. *leisti*, Lett. *laist* 'let loose, let', fr. a root with diphthong IE **lēid-*, beside **lēd-* in Goth. *lētan* 'leave, let', etc. Walde-P. 2.395.

6. ChSl. *pustiti, otŭpustiti*, iter. *puštati*, etc., general Slavic, derivs. of *pustŭ* 'empty, waste' = OPruss. *pausto* 'wild', perh. : Grk. παύω 'stop, cease' (?). Walde-P. 2.1 f. Semantic relation similar to that between NE sb. *desert*, fr. Lat. *dē-sertus* 'abandoned, left waste' and vb. *desert* 'abandon, forsake' also sometimes 'relinquish, give up' (cf. NED).

ChSl. *rěšiti* (not in Gospels, but freq. in Supr. = λύω 'loose, release'; SCr. *riješiti* 'solve, dispose of, acquit', Russ. *rešit'* 'solve, decide'), etym.? Walde-P. 2.346, 347. Miklosich 277.

7. Skt. *muc-* : Lith. *mukti* 'slip away', Lett. *mukt* 'strip oneself of, slip off', with *s-* Lith. *smukti* 'slide', ChSl. *smykati sę* 'crawl'. Walde-P. 2.254. Cf. the se-

mantic development of Dan. *slippe* (above).

Skt. *sṛj-*, Av. *harəz-*, both also 'discharge, emit, send out' : MHG *selken* 'drip down', Ir. *selg* 'hunt' (sb.), W. *hela* 'to hunt' (3.79). Walde-P. 2.508.

Av. *zā-* : Skt. *hā-* 'leave, lose', etc. (11.33).

Words for 'property' are mostly connected with verbs for 'own, possess', or 'have', or with adjectives for 'one's own', a few with words for 'need, use' or 'power'; several with words for 'good', not only in the European languages, where the influence of Lat. *bona* is suspected, but also in Sanskrit. Some are based on words for 'cattle', as conversely often 'property' > 'cattle'. See also 3.15, 11.43.

Several of the generic terms came to be specialized to 'money', 'movable property' or 'landed property'. 'Landed property' is popularly expressed by words for 'land' or 'lands and houses'. The technical terms are mostly combinations (cpds. or phrases) of words for 'property' with 'land, ground' (or sometimes 'immobile'), of such obvious make-up, that it does not seem worth while to list them in a separate group.

1. Grk. χρήματα, pl. of χρῆμα 'thing (of use), matter, affair' : χρή 'needs, must, ought' (9.94), χρέος, χρῆος 'debt' (11.64), χρῶμαι 'need, use' (9.423). Generic term, but also often spec. for 'money' and so reg. in NG.

Grk. κτήματα, sg. κτῆμα 'a piece of property' : κτάομαι 'obtain', perf. κέκτημαι 'own', etc. (11.12, 11.16). Generic term (in Homer more common than χρήματα), but specialized to 'landed property' in Hellenistic times, and so reg. in NG.

Grk. οὐσία, lit. 'the substance, being, essence', fr. οὖσα fem. pres. pple. of εἰμί 'am'. Hence Grk. περιουσία 'abundance, surplus', but in NG the reg. word for 'property' in general.

Grk. βίος (ὁ) 'life' (cf. 4.74) as 'mode of life' and esp. 'means of living, livelihood', late 'property', hence NG βιός (τό) 'property' and 'wealth'.

2. Lat. *bona*, nom. pl. neut. of *bonus* 'good'. Hence Rum. *bun* 'good', sb. 'property', pl. *bunuri*.

Lat. *rēs* (also general 'thing, affair, matter' but only secondarily) : Skt. *rāi-* (nom. sg. *rās*, gen. sg. *rāyas*) 'property,

Lat. *fortūnae*, pl. of *fortūna* 'chance, luck, fortune' (16.17), in sense of 'gifts of (good) fortune'.

Lat. *possessiōnēs*, orig. generic but in actual use 'landed property' (cf. *possessiones appellantur agri late patentes, publici privatique*, etc., Festus), sg. *possessiō* prop. 'acquisition, act of taking possession' : *possidēre* 'possess' (11.12).

It. *proprietà*, Fr. *propriété*, Sp. *propiedad* (*propriedad*) fr. Lat. *proprietās, -tātis* 'peculiarity, natural quality' (fr. *proprius* 'one's own, proper', fr. *prope* 'near'), in late use 'ownership, property'. But now Fr. *propriété* in the sense 'property' is mostly used of 'real estate, landed property', etc.

It. *beni*, Fr. *biens* (less usually *bien* sg.), Sp. *bienes*, used like Lat. *bona* but formed fr. the adv. It. *bene*, Fr., Sp. *bien* 'well' (Lat. *bene*).

Sp. *haberes* (less usually sg. *haber*), Rum. *avere*, fr. the vbs. Sp. *haber*, Rum. *avea* 'have' (11.11).

3. Ir. *selb*, esp. 'landed property' or 'cattle' (cf. Laws, Gloss. 652), NIr. *sealbh*, cpd. of *s-* (= *so-* 'well'), second part : NIr. *ealbh* 'flock, herd', W. *elw* 'profit', referring orig. to property in cattle. Cf. *dealbh* 'poor, destitute', fr. parallel cpd. with *d-* (= *do-* 'ill'). Loth. RC 45.187 ff.

W. *meddiant* : *meddu* 'possess, be able' (11.12).

Br. *mad* (pl. *madou*) = *mat* 'good, well', prob. influenced by Fr. *bien(s)*, though not necessarily.

4. Goth. *aihts*, OE *ǣht*, ME *aght, aught*, etc. (Sc. *aucht*), OHG *ēht* (= Av. *īšti-*) : Goth. *aigin*, also 'property', but ON *eign*, OHG *eigan*, MHG *eigen* esp. 'property in land, estate' and particularly 'inherited estates', fr. the root of Goth. *aigan*, etc. 'own' (11.12). Here also Dan. *ejendom*, Sw. *egendom* (infl. of MLG *ēgendom*), Du. *eigendom*, NHG *eigentum*. Walde-P. 1.105. Falk-Torp 184 f.

Goth. *faihu* 'property, money', ON *fē*, OE *feoh* 'cattle, property, money' : OHG *fihu* 'cattle', Lat. *pecu* 'cattle', *pecūnia* 'property, riches, wealth', esp. 'money' (11.43), Skt. *paçu-*, Av. *pasu-* 'cattle', etc. (3.15). Walde-P. 2.16 f. Ernout-M. 746 f.

ON *gōz* (= *gōðs*), Dan., Sw. *gods* (old gen. sg.), OE *gōd* (neut. sg. and pl.), ME *godes* (NE *goods*, but no longer generic), Du. *goed*, OHG, MHG *guot*, NHG *gut*, fr. the adjs. ON *gōðr*, etc. 'good' (16.71). Falk-Torp 337.

Dan. *besiddelser*, Sw. *besittningar*, Du. *bezit*, NHG *besitz* : Dan. *besidde*, etc. 'possess' (11.12).

OE *sceatt*, also 'tribute, money' : Goth. *skatts* 'money', ON *skattr* 'tribute' (NIcel. 'tax'), OFris. *sket* 'money, cattle', OS *skat* 'money, wealth', OHG *skaz* 'money, coin', NHG *schatz* 'treasure', outside connections and orig. meaning dub. Falk-Torp 988. Feist 429.

ME *catel* fr. ONFr. *catel*, and ME *chatel* fr. OFr. *chatel*, both fr. Lat. *capitāle*, neut. of the adj. *capitālis* 'head-, chief-' used in medieval times for 'principal sum of money, property, etc.'. NED s.v. *chatel*.

ME *possessiounes*, NE *possessions*, pl. of *possession* 'act of possession' then 'piece of property' (but in the sg. usually in the abstract sense, the chief use in the modern Romance languages), fr. OFr. *possessiun* borrowed fr. Lat. *possessiō, -ōnis* (above, 2). Generic use for 'property' not directly fr. Lat. *possessiōnēs*, since this was 'landed property', but fr. the vb. *possess*.

NE *property*, ME *proprete* (but rarely in concrete sense before 17th. cent.), fr. OFr. *propriété* (above, 2).

The notion of 'wealth, riches' is not universally distinguished from that of 'property'. Words for 'property' may be used with emphasis implying 'much property, wealth', and in fact in primitive society any 'property' beyond household goods and a few domestic animals constitutes 'wealth'. But in the

European languages there are distinctive words for 'wealth', most of them derived from the adjectives for 'rich' (11.51; but sometimes conversely 'rich' from 'wealth'); and there are also certain of the words for 'property' which are most often used with the implication of 'wealth' and so are also entered here in second place, e.g. NHG *vermögen*.

1. Grk. πλοῦτος (ὁ, but in Byz. declined as neut. σ-stem, hence) NG pop. pl. πλούτη : πολύς 'much, many', πλεῖος, Att. πλέως 'full', etc. Walde-P. 2.64.

NG βιός, see 11.41.

2. Lat. *dīvitiae*, fr. *dīves* 'rich' (11.51).

Lat. *opēs* : Skt. *apnas-* 'property', etc. (11.41).

It. *ricchezza*, Fr. *richesse*, Sp. *riqueza*, derivs. of It. *ricco*, etc. 'rich' (11.51).

Rum. *avere*, see 11.41.

Rum. *bogaţie* fr. the Slavic (below, 5).

3. Ir. *saidbre*, NIr. *saidhbhreas* and *saidhbhreacht*, fr. Ir. *saidbir* 'rich' (11.51).

Ir. *somme*, sb. use of adj. *somme* 'rich' (11.51). Cf. also *somaine* esp. 'profits' (Laws, Gloss. 672).

NIr. *maoin*, fr. Ir. *mōin*, *māin* 'object of value, treasure' (11.46).

W. *golud* : Ir. *folad* 'substance', fr. a cpd. of W. *gwo-*, Ir. *fo-* (IE **upo-*), and a deriv. of the root in Skt. *lota-* 'booty', Goth. *laun*, OHG *lōn* 'pay, reward', etc. (11.78). Walde-P. 2.380. Pedersen 1.54.

W. *cyfoeth*, also (and orig.) 'dominion, power', cf. OCorn. *chefuidoc* 'omnipotens' : Ir. *cumachte* 'power', *con-iccim* 'can', etc. Pedersen 1.124.

Br. *pinvidigez*, fr. *pinvidig* 'rich' (11.51).

4. Goth. *gabei* : *giban* 'give' (11.21).

ON *auðr* (also *auðœfi*, cpd. with second member deriv. of *of* 'excess, multitude'), OE *ēad*, OHG in *al-ōd* 'free possession' (hence MLat. *allodium*), OS *ōd* 'possession' : ON *auðna* 'fortune, fate' *auðinn*, OE *ēaden* 'granted by fate', Goth. *audags* 'μακάριος', etc., perh. of mythological origin, with reference to the weaving of the goddess of fate, fr. the root in Lith. *austi* 'weave', ON *vāð* 'piece of cloth', etc. Walde-P. 1.16 f. Falk-Torp 530. Feist 63.

Dan. *formue*, Du. *vermogen*, NHG *vermögen*, see 'property' (11.41).

Sw. *förmögenhet*, deriv. of *förmögen* 'powerful, wealthy', fr. MLG *vormogen(de)* pple. of *vormogen* 'be able' = Du. *vermogen*, etc. 'be able' as sb. 'power, wealth' (above).

OE *wela*, ME *wele* (NE *weal*), OHG *wolo*, *welo*, etc., with deriv. suffix ME *welthe* (not found in OE), NE *wealth*, OHG *welida* : OE *wel(l)*, OHG *wola*, *wela* adv. 'well', etc.

ME *richesse* fr. OFr. *richesse;* then conceived as pl. form in ME, NE *riches*.

Du. *rijkdom* (MLG *rīkedōm* > late ON *rīkdōmr*, Dan. *rigdom*, Sw. *rikedom*), OHG *rīchiduam*, *rīhtuom*, MHG *rīchtuom*, NHG *reichtum*, orig. and in the earlier language mostly 'power, dominion' (OE *rīcedōm* only in this sense), fr. OHG *rīchi*, OE *rīce*, ON *rīkr*, etc. 'mighty', later 'rich' (11.51).

5. Lith. *bagotystė*, Lett. *bagātība*, ChSl. *bogatĭstvo*, etc., fr. the Baltic and Slavic words for 'rich' Lith. *bagotas*, Lett. *bagats*, ChSl. *bogatŭ* (11.51).

Br.	*arc'hant*	NHG	*geld*		

The chief standard of value in the IE period and in the history of the IE-speaking peoples before the introduction of actual 'money' based on coinage was cattle (in the old wide sense 'livestock'). This is amply attested for the several peoples by direct references and is also reflected in the interchange of 'cattle' with 'property' or 'money' in an inherited IE group and some others (3.15). Cf. Schrader, Reallex. 1.371 ff., and, especially for Celtic, Vendryes, RC 42.381 ff.

Among other standards of value preceding 'money' proper were horses, furs (ORuss. *kuna* 'martin skin, money, a small coin', whence Russ. *kunec* 'merchant'; cf. Berneker 644), linen (whence Slavic verb for 'pay', 11.65), articles of jewelry (Skt. *niṣka-* in RV, cf. Zimmer, Altind. Leben 259; Ir. *sēt*, see below), certain utensils (Grk. λέβης 'bronze kettle', in Crete name of a coin, πέλεκυς 'ax' in Cyprus name of a coin). The immediate precursor of coined money officially standardized and stamped was the use of precious metals in rings (cf. ON *baugr*, below, 4), bars (cf. Grk. ὀβολός 'spit, nail' and name of a small coin), or other forms.

Of the words for 'money', some are those for 'property' used to include or specialized to 'money'. More frequent is generalization from 'coin' or the names of particular coins, the latter in part derived from the name of the metal used, especially 'silver'. In one group 'money' is from 'payment'.

1. Grk. ἄργυρος 'silver' (9.65), also 'money' (Aesch.+) as esp. the deriv. ἀργύριον (both forms as 'money' in Cretan Law-Code).

Grk. χρήματα 'property' (11.41), also and in NG reg. 'money'.

NG pop. παράδες, pl. of παράς, fr. Turk. *para*, the small Turkish coin.

NG pop. λεφτά, pl. of λεπτόν 'centime'.

2. Lat. *pecūnia*, earlier 'wealth in cattle', then 'wealth, money' whence also 'coin' esp. in late Lat. 'copper coins', fr. *pecu* 'cattle', this also sometimes 'money' (like Goth. *faihu*, below).

Lat. *aes* 'bronze' (9.66), hence, since the early coins were of bronze, 'money' esp. in the expression *aes aliēnum* 'another's money' = 'debt' (11.64).

Lat. *argentum* 'silver' (9.65), used also of 'silver coin, money' (so already in Plautus), hence Fr. *argent* in both senses.

It. *denaro*, *danaro* (OIt. *danaio*), Sp. *dinero*, fr. VLat. *dinarius* for Lat. *dēnārius*, name of a Roman silver coin orig. worth ten asses, fr. *dēnī* distributive adj. to *decem* 'ten'. Ernout-M. 245. REW 2553.

Rum. *bani*, pl. of *ban*, name of a coin (11.44).

Rum. *parale*, pl. of *para*, name of a coin, fr. Turk. *para* (see above, 1).

3. In older Irish, the regular method of estimating value is by heads of cattle, chiefly by so many *dairt* 'yearling', or *samaisc* 'three-year-old heifer'. Another standard of value is the *sēt* probably orig. a jewel or brooch of some sort (see 6.72). Schrader, Reallex. 2.335. Laws, Gloss. 657 f.

NIr. *airgead*, W. *arian* (*ariant*), Br. *arc'hant* 'silver' (9.65) and 'money'.

4. Goth. *skatts* (also δηνάριον, μνᾶ), OE *sceatt* 'property, money, coin', OHG *scaz* 'money, coin' (also as in Goth. the name of certain coins), see under 'property', OE *sceatt* (11.41).

Goth. *faihu* (renders ἀργύριον Mk. 14.11), ON *fē*, OE *feoh*, ME *fe*, all 'property, money', see 11.41.

ON *baugr* 'ring' and, from the use of spiral-formed rings as a medium of payment, also 'money', esp. in cpds. as *baug-gildi* 'wergeld', etc. Vigfusson s.v.

ON *peningr*, Sw. *penning* 'coin', esp. a definite coin 'a penny', pl. ON *peningar*, Dan. *penge*, Sw. *pengar* 'money' : OE *pening*, *pending*, etc., OHG *pfennig* 'penny, small coin', orig. dub. Falk-Torp 821. Weigand-H. 2.407 f. NED s.v. *penny*. Hence borrowed Lith. *pinigas*, *piningas* 'coin', pl. 'money', ChSl. **pěnęgŭ*, *pěnęzĭ* 'denarius' (whence *pěnęžĭnikŭ* 'money-changer, banker' Jn. 2.14, Lk. 19.23). Stender-Petersen 385.

ME *mone(ye)* in both senses 'coin, money', NE *money*, fr. OFr. *moneie*, *mon(n)oie* 'coin', cf. Fr. *monnaie* (11.44).

OHG, MHG *gelt*, NHG, Du. *geld*, orig. 'payment, compensation', cf. OE *gild* 'payment, tribute, substitute, offering', ON *gjald* 'tribute, payment', Goth. *gild* 'tax, tribute' : OHG *geltan* 'replace, pay', Goth. *fra-*, *us-gildan* 'repay', outside connections dub. Walde-P. 1.632. Feist 161.

5. Lith. *pinigai*, pl. of *pinigas* 'coin', fr. the Gmc., see above, 4.

Lett. *nauda*, cf. Lith. *nauta* 'use, profit', fr. the Gmc., cf. ON *naut*, OE *nēat* 'cattle, oxen' (3.20). Mühl.-Endz. 2.695 f.

6. ChSl. *sĭrebro*, *sŭrebro* 'silver' (9.65) reg. renders also Grk. ἀργύριον as 'money'.

SCr. *novac* 'coin, money', esp. in latter sense pl. *novci*, fr. *nov* 'new', orig. referring to the 'new coinage' as contrasted to the old, then extended. Rječnik Akad. 8.243 f.

Boh. *peníze*, Pol. *pieniądze* : ChSl. *pěnęzĭ* 'denarius', fr. the Gmc., see above, 4.

Russ. *den'gi*, pl. of *den'ga* 'a copper coin' (> Pol. *dzięga*), loanword fr. a widespread oriental group of terms for 'money' or various coins, as Kasan. *tenk'e*, Kirg. *tenge*, etc. Berneker 183 f. Lokotsch 478.

7. Several of the Skt. words for 'property' or 'wealth' are sometimes rendered 'money', most commonly *dhana-* (11.41), but evidence of actual money is late. For early substitutes, see Zimmer, Altind. Leben 259.

Av. *šaēta-* 'wealth' (11.42) is in certain passages rendered 'Geld' by Bartholomae and 'argent' (also 'trésor') by Darmesteter, but there is no certain reference to actual money in the Avesta, and the payments enumerated in Vd. 7.41 ff. are in terms of domestic animals.

The 'purse' of earlier times was simply a 'money bag' and so was regularly expressed by words for 'bag, pouch'. Some continued to be used for both 'bag' and 'purse', in the latter case with 'money' understood, or explicit as in NHG *geldbeutel*, etc. Others were definitely specialized to 'purse', as Fr. *bourse*, NE *purse*, etc.

Br.	*bank*				

In Greece in early times the temples served for the safe deposit of money, private as well as public. But a regular banking business had evolved from the humble trade of the money changers by the fifth century B.C. Its flourishing state in fourth-century Athens appears in the frequent references in the orators. Hence it spread to Rome and eventually to the rest of Europe. It was in Italy, the home of the great European bankers (cf. the use of *Lombard* for 'banker' or 'bank'. NED s.v.), that the current European word for 'bank' began its career.

Of the terms for 'bank' a few are derivatives of words for 'money', but the more common source is the 'table' of the moneychangers.

1. Grk. τράπεζα 'table' (7.44), hence in special application the 'table' of the moneychangers, then 'bank', whence τραπεζίτης 'banker'. Cf., beside the many examples in the orators, the Boeot. διὰ τραπέδδας τᾶς Πιστοκλεῖος 'through the bank of Pistocles', Schwyzer, Dial. Graec. Ex. 523.170.

2. Lat. *mēnsa* 'table' was sometimes used in the special sense like Grk. τράπεζα. But more commonly *taberna argentāria* (*taberna* 'booth') and simply *argentāria*, with *argentārius* 'banker', fr. *argentum* 'money' (11.43). Similarly W. *ariandy* (beside *banc*), fr. *arian* 'money' and *ty* 'house'.

3. It. *banco*, *banca*, with similar forms in other Romance languages, were borrowed fr. a Gmc. word *bank* 'bench' seen in OHG *banch*, NHG *bank*, OE *benc*, NE *bench*, etc. They were often applied to a 'table, counter' for the display of wares, and through that of the moneychangers became the regular words for 'bank' and in this sense spread to the rest of Europe (except Greece). It was the fem. form that most commonly prevailed in this sense, as It. *banca*, Fr. *banque*, etc.; but cf. also Sp. *banco*, Lith. *bankas* vs. Lett. *banka*, Pol., Russ. *bank* vs. SCr., Boh. *banka*. NED s.v. *bank*, sb. 3. Wartburg 1.235 ff.

4. One cannot, of course, expect to find words for 'bank' in the early period of the European languages other than Greek or Latin except as translations from the latter. The NT passage, Lk. 19.23, ἐπὶ τὴν τράπεζαν, Vulgate *ad mensam*, is rendered as follows.

Goth. *du skattjam*, dat. pl. of *skattja* deriv. of *skatts* 'money' (11.43), hence 'money-dealer, banker'. Similarly ChSl. *pěnęžĭnikomŭ*, dat. pl. of *pěnęžĭnikŭ* deriv. of *pěnęzĭ* 'denarius, money' (11.43), so here likewise 'to the money-dealers'.

OE *to hyre*, that is, a paraphrase giving the proper sense, 'to hire, on loan'. Lindisf. *to wege to disc*, with *disc* = Vulgate *mensam*. Wyclif uses *boord* 'table'.

OHG (Tat.) *zi mazzu*, clearly a distortion or mistranslation of the Vulgate *mensam* (cf. *maz* 'food', *gimazzo* 'table-companion').

In general, words for 'heir' are derived from words for 'share' or 'property', or through the notion of 'patrimony' from words for 'father' or 'grandfather', or meant simply 'follower, successor'. But the notion of 'inheritor of property' common to these is, on the other hand, quite secondary in two important groups, which rest on the notion of 'bereaved', with cognates meaning 'orphan' or 'widow'.

1. Grk. κληρονόμος, cpd. of κλῆρος 'lot, share, heritage' (orig. 'piece of wood used in casting lots' : Ir. *clār*, etc. 'board') and the root of νέμω 'distribute', mid. 'have as one's share'. This is the reg. Attic term, but Cretan has πατρωιῶχος fr. *πατρωιό-οχος, cpd. of πατρώιος 'inherited from the father' (cf. τὰ πατρώια 'patrimony') and -οχος : ἔχω 'hold, have'.

2. Lat. *hērēs*, *-dis* (hence It. *erede*, OFr. *(h)eir*, *(h)oir* > Br. *hêr*, ME, NE *heir;* Fr. *héritier*, Sp. *heredero*, fr. Lat. *hērēditārius* adj. 'hereditary'; REW 4114) : Grk. χῆρος 'bereft', χήρα 'widow', Skt. *hā-* 'leave, lose', etc. Walde-P. 1.543. Ernout-M. 448 f. Walde-H. 1.641.

Rum. moştenitor, fr. moşteni 'inherit', this again fr. arch. moştean 'heir', beside which also arch. moşan 'heir', all derivs. of moş 'grandfather, ancestor' (cf. stramori 2.56). Densusianu 354.

3. Ir. orbam (RAI Contrib. s.v.), also comarbe 'co-heir' (comarbi, gl. coheredes Wb. 19c20), fr. orbe 'inheritance' : Goth. arbi 'inheritance', etc., below, 4. Pedersen 1.32.

5. Lith. paveldėtojas, fr. paveldėti 'inherit', cpd. of veldėti id., beside valdyti 'rule' (19.31).

Lith. įpėdinis, 'successor' and 'heir', fr. pėda 'footstep, track'.

Lett. mantinieks, fr. manta 'property' (11.41).

6. ChSl. naslědĭnikŭ, SCr. nasljednik, Russ. naslednik, fr. ChSl. naslěditi 'inherit', etc. cpd. of na 'on' and slěditi 'follow' (10.52).

SCr. baštinik, fr. baština 'patrimony', this fr. the rare bašta 'father'. Berneker 46.

Boh. dědic (Pol. dziedzic formerly the usual word, now mostly 'landed proprietor', Russ. dedič now obs.), fr. Boh. děd, etc. 'grandfather' (2.46). Berneker 191.

Pol. spadkobierca, cpd. of spadek 'a fall, that which falls by lot, heritage' (: paść, ChSl. pasti 'fall', 10.23) and brać 'take'. Brückner 37,390.

7. Skt. dāyāda-, fr. dāya- 'share, inheritance' (: dāti 'cuts off, divides, shares') and -āda- 'taking-, receiving-' (fr. ā-dā- 'receive').

Skt. rikthin- (adj. and sb.), fr. riktha- 'inheritance', whence also cpds. for 'heir', rikthagraha-, rikthabhāj-, rikthahāra-, etc. : ric- 'leave', etc. (11.34).

Most of the common words for 'poor' as the opposite of 'rich' are also used with strong emotional value (depreciatory or affectionate) for 'unfortunate, wretched', etc., and this latter use is by no means always the secondary one. That is, besides the words in which lack of wealth is the primary notion, as shown by their etymology (e.g. neg. cpds. of words for 'rich' or 'wealth'), there are many others in which, as the cognates show, the development has been in the opposite direction, namely from an expressive term for 'unfortunate' or the like to 'poor' = 'not rich'.

1. Grk. πένης (adj. 'poor' and sb. 'a poor man') : πένομαι 'toil, work' also 'be poor', πόνος 'toil, work', etc. (9.12).

The πένης was the one who toiled for a living, 'poor' by contrast to the rich, but distinct from the πτωχός 'beggar' (11.53) who had nothing (cf. Aristoph., Plutus 553). But already in the NT πτωχός has displaced πένης as the common word for 'poor', hence NG φτωχός.

2. Lat. pauper, prob. an old cpd. *pau-paro-s 'getting little' (cf. ON fātækr, below, 4), first member : paucus 'little', Goth. fawai, ON fār 'few', and the second : parāre 'get, prepare' (11.16). Hence It. povero, Fr. pauvre (OFr. povre > Br. paour, ME pou(e)re, NE poor), Sp. pobre. Walde-P. 2.75. Ernout-M. 744. REW 6305.

The majority of the words for 'beggar' are from verbs for 'ask for' (18.35). But several are in origin opprobrious epithets (like NE bum), based in part upon certain physical or mental defects.

1. Grk. πτωχός : πτώξ 'timid, fearful, cowering', πτώσσω 'cower, cringe', πτήσσω 'cower, crouch', (these : πίπτω 'fall', πέπτωκα, etc.). Walde-P. 2.19. Boisacq 823.

NG ζητιάνος, fr. ζητῶ 'seek, ask for' (11.31, 18.35).

NG διακονιάρης, fr. διακονῶ 'serve' (formerly also 'beg', now διακονεύω), fr. διάκονος 'servant, deacon'.

2. Lat. mendīcus (> Sp. mendigo), prob. orig. 'defective, unsound' : mendum and menda 'physical defect, fault', W. man 'spot, mark (on the body)', Skt. mindā- 'physical defect' (fr. the same root also Lat. mendāx 'lying', etc., with divergent semantic development). Walde-P. 2.270. Ernout-M. 605. Walde-H. 2.69.

Hence vb. mendīcāre 'beg' > It. mendicare, Fr. mendier, Sp. mendigar with pples. for 'beggar', It. mendicante, Fr. mendiant, Sp. mendigante.

It. accattone, fr. accatare 'beg, go begging', fr. VLat. *accapitāre, cpd. frequent. to capere 'seize, take'. REW 62.

It. pitocco (but now generally 'miserable', hardly used for 'a beggar'), fr. Grk. πτωχός. REW 6803.

Rum. cerşetor, fr. cere 'ask for' (cf. pple. cerşit, aor. cerşui, etc.). Tiktin 328. Puşcariu 337.

3. Ir. foigde 'begging' (related form for 'beggar' apparently not quotable), vbl. noun fr. cpd. of guidim 'ask for, pray' (22.17). Pedersen 2.551.

NIr. bacach, also and orig. 'cripple' = bacach 'lame' (4.94).

W. cardotyn : cardota 'beg', MW cardotta, deriv. of cardawt (W. cardod) 'charity' fr. Lat. caritātem. Loth, Mots lat. 144 f.

Br. klaskerbara, cpd. of klasker agent noun to klask 'seek' (11.31) and bara 'bread' (5.51).

4. Goth. bidagwa (read bidaga?), fr. bida 'prayer' : bidjan 'ask for', etc. Feist 89.

ON gǫngumaðr, cpd. of ganga 'walking, going' and maðr 'man'.

ON ǫlmusumaðr, lit. 'alms-man' (ǫlmusa 'alms').

Dan. tigger, Sw. tiggare, fr. tigge, Sw. tigga 'beg' (ON þiggja 'accept', Ir. techtaim 'own', etc. 11.12). Falk-Torp 1258. Hellquist 1181 f.

OE wǣdla, see under 'poor' (11.52).

ME begger(e), NE beggar, fr. ME begge(n), NE beg 'ask alms, beg' (of dub. orig. NED s.v.).

Du. bedelaar, OHG betalāri, MHG betelære, NHG bettler, fr. Du. bedelen, OHG betalōn, etc. 'beg', frequent. to Du. bidden, OHG bitten 'ask for'. Weigand-H. 1.224.

5. Lith. elgeta : Arm. alkalk 'miserable, needy, bad', perh. also Lith. alkti 'be hungry', etc. Walde-P. 1.160 (159).

Lith. ubagas, Lett. nabags, fr. Slav. ubogŭ, nebogŭ 'poor' (11.52).

Lett. diedelnieks 'vagabond, beggar', fr. diedelēt 'bum around, beg', prob. : diet 'dance'. Mühl.-Endz. 1.479 (with another suggestion).

6. ChSl. ništĭ, Russ. niščij, see under 'poor', 11.52.

SCr. prosjak, fr. prositi 'beg' : ChSl. prositi 'ask', etc.

Boh. žebrák, Pol. żebrak, fr. early NHG seffer 'vagabond, tramp, beggar' (slang. Cf. Grimm s.v.). Brückner 663.

7. Skt. bhikṣu- : bhikṣ- 'beg', desid. to bhaj- 'share, divide'. Uhlenbeck 200.

Skt. daridra- sb. form of daridra- 'poor' (11.52).

Although there is obviously a distinction between 'avaricious' and 'parsimonious, stingy', as excessively desirous of either accumulating wealth or retaining it, and the majority of the words listed belong under one or the other, either in actual use or in origin, nevertheless the two characteristics are so commonly associated that a single epithet, of whatever origin, is often applied without any conscious differentiation of the two notions. Hence they are united here.

Words for 'avaricious' may contain explicit reference to 'money', lit. 'fond of money', etc., or mean originally simply 'eager, grasping', in some cases related to those for 'greedy'. 'Stingy' may be euphemistically expressed as 'sparing, thrifty', or by terms analogous to NE colloquial near, tight, or close. Many are opprobrious epithets of the most diverse sources with specialized application, as Lat. sordidus, Fr. chiche, NE stingy, mean, NG filzig, and others too numerous to be included in the list.

1. Grk. φιλάργυρος, φιλοχρήματος, lit. 'money-loving', cpds. of φίλος 'friend' with ἄργυρος 'silver, money', and χρήματα 'property, money'.

Grk. φειδωλός, orig. 'sparing' without derogatory connotation : φείδομαι 'spare, be sparing', prob. as orig. 'separate oneself from something' : Lat. findere, Skt. bhid- 'split'. Walde-P. 2.138.

NG pop. σφιχτός (: σφίγγω 'bind tight') 'tight' in literal sense and also 'stingy', like NE tight.

2. Lat. avārus (> It., Sp. avaro, OFr. aver, Fr. avare, Rum. avar) : avēre 'desire vehemently', avidus 'greedy'. REW 814. Wartburg 1.187. Walde-P. 1.19. Ernout-M. 85 f. Walde-H. 1.79.

Lat. tenāx, lit. 'tenacious, grasping', fr. tenēre 'hold' (11.15).

Lat. sordidus, lit. 'dirty, filthy', fr. sordēs 'filth'. Ernout-M. 958.

Fr. chiche : Sp. chico 'small', etc. (12.56).

Sp. mezquino (= It. meschino 'wretched, paltry'), fr. Arab. meskīn 'poor, wretched'. REW 5539.

Rum. sgîrcit, fr. sgîrci 'draw together, cramp', fr. Slavic, cf. SCr.-ChSl. sĭgrĭčiti sę 'contract' (Berneker 369). Tiktin 1812 f.

Rum. scump, fr. Slavic, ChSl. skąpŭ, etc. (below, 6). Tiktin 1396, 1813.

3. Ir. santach, NIr. sanntach, fr. sant 'greed, avarice', loanword fr. W. chwant 'desire, appetite, lust', Br. c'hoant 'desire' (: Grk. χάτις 'need', etc.). Pedersen 1.24, 139 f.

W. cybyddlyd, fr. cybydd 'miser' (11.55).

W. crintach, apparently a popular term derived from crin 'withered, dry', arch. 'niggard' (cf. arch. crinwas 'niggard', cpd. with gwas 'youth, servant').

Br. piz 'stingy', prob. a semantic borrowing fr. Fr. chiche 'stingy' (above) taken to be the same word as chiche 'chick pea', i.e. Br. piz 'peas'. G. S. Lane, Language 13.26.

4. Goth. faihu-friks, ON fē-frekr, Goth. faihu-gairns, ON fē-gjarn, OE feoh-georn, OE feoh-gīfre, all cpds. of Goth. faihu, etc. 'property' (11.41) with words for 'greedy' (Goth. -friks, ON frekr = OE frec; OE gīfre) or 'eager' (Goth. -gairns, etc.).

ON hnøggr, Sw. njugg, OE hnēaw : MHG nouwe 'close, careful', cpd. MHG genouwe, NHG genau 'precise, exact', also ON hnøggwa 'strike, hit', Grk. κνύω 'scratch'. Walde-P. 1.396. Falk-Torp 335, 785. Hellquist 700.

Dan. gerrig, Sw. girig, fr. MLG girich = OHG girīg 'greedy' : Skt. hṛ- 'desire', Grk. χαίρω 'rejoice', etc. Walde-P. 1.601. Falk-Torp 316 f.

Dan. karrig, NHG karg : OHG carag, OE cearig 'sad', NE chary 'careful, sparing of', Goth. kara, OE cearu 'care', etc. Falk-Torp 499.

Sw. snål = Norw. snaal(en) 'greedy, stingy', lit. 'sniffing after' : Norw. snaala 'sniff after, rummage'. Falk-Torp 1088. Hellquist 1019.

ME avarous, fr. OFr. averos, deriv. of aveir, avoir 'possession' but confused with Fr. avare (above). NED s.v.

NE avaricious fr. OFr. avaricieux, deriv. of avarice, Lat. avaritia 'avarice'. NED s.v.

ME nigard (also sb. 'miser'), NE niggard(ly), also ME nigon 'miser', nig 'niggardly or mean person'. NED s.vv. nig, sb.[1], niggard says "of obscure origin". But they are obviously based on some Scand. form belonging with Sw. njugg, etc. (above). Cf. esp. Skeat, Etym. Dict. s.v. niggard.

NE stingy, orig. 'having a sting' then 'mean, bad-tempered', fr. sting. NED s.v.

OHG gīri (generally renders avārus), MHG gīric, gīrisch, (cf. NHG habgier 'avarice'), Du. gierig : Goth. faihu-geiro, OS fehu-girī 'avarice', perh. through the notion of standing 'open, yawning', fr. the root in OHG gīen, etc. 'yawn'. Walde-P. 1.549. Franck-v. W. 198. Feist 136 f.

OHG gītag, MHG gītec, NHG geizig, fr. OHG gīt, MHG gīte, gīze 'avarice' : Lith. geisti 'desire, wish', ChSl. žĭdati 'wait', etc., IE *gheidh-. Walde-P. 1.553. Weigand-H. 1.661.

NHG habsüchtig, adj. to habsucht 'avarice', cpd. of haben 'have' and sucht 'sickness, disease' (: siech 'sickly'), with development of sense of 'tendency to, passion for', esp. in cpds. (cf. trunksucht, sehnsucht, etc.) and popular association with suchen 'seek'. Weigand-H. 1.785, 2.1006. Paul, Deutsches Wtb. s.v. Sucht.

NHG filzig, adj. to filz 'miser' (11.55).

5. Lith. godingas, godus : Lett. (sa)gāds 'supply, store', gādāt 'care for', Ir. gataim 'steal', Skt. gadhya- 'to be seized', etc. Walde-P. 1.532.

Lith. gabštus, gabšus (also gobštus, gobšus; see NSB) : gobėtis 'be avaricious, greedy' (gobus 'greedy'), WhRuss. habáć 'take, seize', etc. (11.11). Walde-P. 1.345. Berneker 287 f.

Lith. šykštus (-as Kurschat), Lett. sīksts, orig. 'hard' or 'tough'. Cf. NE tight, close for 'stingy'. Mühl.-Endz. 3.853.

The majority of the words for 'miser' are connected with those for 'avaricious' or 'stingy' (11.54), either the same in substantive use or derivatives or compounds. But several are contemptuous terms of different origin.

1. Grk. φειδωλός, sb. form of adj. for 'stingy' (11.54).

Grk. κίμβιξ, etym. dub. Boisacq 456.

Grk. κυμῑνοπρίστης, lit. 'a cummin seed splitter', cpd. of κύμῑνον 'cummin' and πρίστης : πρίω 'saw, cut to pieces'.

NG τσιγγούνης, fr. Turk. çingâne 'gypsy' and as adj. 'shameless, stingy'.

NG (ἑ)ξηνταβελόνης, lit. 'one who has sixty needles', hence, as one who saves small things, 'miser'. Cf. δὲν λείπει βελόνι 'nothing (lit. 'not a needle') is missing'.

2. In Latin 'miser' is expressed by homo with words for 'avaricious, stingy' avārus, tenāx, sordidus, etc.

It., Sp. avaro, Fr. avare, Rum. avar, sb. use of adj. for 'stingy'.

It. spilorcio, less usually pilorcio, prob. as a term of abuse = the obs. pilorcio 'scraps of waste leather'. Cf. NHG filz (below, 4).

Fr. *ladre* 'leper' and 'miser', fr. the biblical *Lazarus*. REW 4958.

Rum. *sgîrcit,* sb. use of adj. for 'stingy'.

3. Ir. *dībech,* also as adj. 'churlish, niggardly' (NIr. *dībheach* 'grudging' as sb. 'niggard'), fr. *dībe* 'a denying, refusing, churlishness, stinginess', vbl. n. of *do-benim,* cpd. of *benim* 'strike, slay'. K. Meyer, Contrib. 633–34.

NIr. *sprionnlōg* (also *spriūnlōg, sprionnlōir,* etc.), etym.?

W. *cybydd,* fr. Lat. *cupidus.* Loth, Mots lat. 155.

Br. *piz,* sb. use of adj. for 'stingy'.

4. Goth. and ON sbs. for 'miser' lacking. Presumably expressed by phrases analogous to Lat. *homō avārus.*

Dan. *gnier* = Sw. *gnidare* (but not the usual word), fr. Dan. *gnie,* Sw. *gnida,* Norw. *gni* 'be stingy, pinch and spare'. For the modern feeling the word appears as 'one who rubs his money' (cf. Dan. *gnide,* Sw. *gnida* 'rub'). The connection is probably rather through the notion of 'tormenting and afflicting (oneself)' to save rather than directly from 'rub'. Falk-Torp 334 f.

Sw. *girigbuk,* lit. 'stingy-belly', where *buk* 'belly' is used for 'person' in pejorative sense. Hellquist 110.

OE *gītsere,* fr. *gītsian* 'covet, desire' (: MHG *gīt(e)sen* 'be greedy'); MHG *gītegære* fr. *gītec* 'avaricious'; NHG *geizhals* lit. 'greedy-neck' : OHG *gīt* 'avarice', *gītag* 'avaricious', etc.

ME *nigarde,* NE *niggard,* cf. ME *nigarde* 'stingy'.

NE *miser,* formerly also 'miserable' and 'a miserable, wretched person', fr. Lat. *miser* 'miserable, wretched'.

Du. *gierigaard,* fr. *gierig* 'stingy', with pejorative suffix *-aard* (fr. Fr. *-ard*). Franck-v. W. 198.

Du. *vrek,* sb. form fr. MDu. *vrec* 'covetous, greedy, evil' = OHG *freh* 'covetous, greedy', ON *frekr,* Goth. *-friks* in *faihu-friks* 'avaricious', etc. Franck-v. W. 762.

MHG *vilz,* NHG *filz* 'felt', in MHG also 'an uncouth person' and 'miser', NHG 'miser', with reference to one clad in felt or in felt slippers (as the miser was often pictured). Paul, Deutsches Wtb. s.v.

5. Lith. *gabas* (also *gobas*) : *gabštus, gabšus* 'avaricious'.

Lith. *godišius* : *godingas, godus* 'avaricious'.

Lith. *šykštuolis,* Lett. *sīkstulis,* fr. Lith. *šykštus,* Lett. *sīksts* 'stingy'.

Lett. *mantrausis,* lit. 'money-raker', cpd. of *manta* 'property' and deriv. of *raust* 'rake, poke together (the fire, etc.)'.

6. SCr. *škrtac,* fr. *škrt* 'stingy'.

SCr. *tvrdica,* fr. *tvrd* 'stingy'.

Boh. *lakomec,* fr. *lakomý* 'avaricious'.

Boh. *skrbec, skrblik,* beside vb. *skrbiti* 'be niggardly' : ChSl. *skrŭbĕti* 'be sad', *skrŭbĭ* 'grief', etc. (16.32). Brückner 493.

Boh. *držgrešle,* lit. 'pinch-penny', cpd. of *drzeti* 'hold' and *grešle* dim. of *groš* fr. older NHG *grosch* = *groschen.*

Boh. *skupec,* Pol. *skąpiec,* Russ. *skupec,* fr. Boh. *skoupý,* Pol. *skąpy,* Russ. *skupoj* 'stingy'.

Russ. *skrjaga,* etym.?

7. Skt. *kṛpaṇa-,* sb. use of adj. for 'stingy'.

Some of the words for 'steal' rest on notions like 'hide, carry off, collect'. Some seem to have first denoted various rascally actions, specialized to 'steal'.

For an important IE group, see under 'thief' (11.57).

Several of the words for 'thief' are derived from those for 'steal', as in part conversely. But more often there is no connection, as in the Gmc. group (NE *steal,* but *thief*). Several of the words for 'thief' were originally more general terms for 'evildoer, rascal, bandit, robber', etc.

1. IE group based on *(*s*)*tāi-*. Walde-P. 2.610.

Ir. *tāid;* ChSl. *tatĭ,* etc.; Skt. *tāyu-* (RV), also *stāyu-,* Av. *tāyu-,* Skt. *stena-;* cf. ChSl. *taj* 'secretly', *tajiti* 'hide', Grk. τητάομαι 'be in want, bereft of', Hitt. *tāyēzzi* 'steals' (Sturtevant, Hitt. Gloss. 157).

2. Grk. κλέπτης, NG κλέφτης : κλέπτω 'steal' (11.56).

Grk. φώρ (Hdt.+), as 'one who carries off' : Grk. φέρω, Lat. *ferre* 'carry'. Walde-P. 2.154 ff.

3. Lat. *fūr,* either cognate with or loanword fr. Grk. φώρ. Ernout-M. 403. Walde-H. 1.569.

It. *ladro,* Fr. *larron,* Sp. *ladrón,* fr. Lat. *latrō* 'mercenary soldier' (so in Plaut., class. also), 'bandit, highwayman', loanword fr. Grk. λάτρον 'pay, wage', λατρεύς 'hired servant', etc. Ernout-M. 527. Walde-H. 1.771. REW 4931.

Fr. *voleur,* fr. *voler* 'steal' (11.56).

Sp. *hurtador,* fr. *hurtar* 'steal' (11.56).

Rum. *hoț,* also 'robber, rascal' and prob. orig. a general abusive term, but source unknown. Tiktin 739.

4. Ir. *tāid,* see above, 1.

NIr. *gadaidhe,* fr. *gadaim* 'steal' (11.56).

W. *lleidr,* Br. *laer,* fr. Lat. *latrō.* Loth, Mots lat. 181.

5. Goth. *þiufs,* OE *þēof,* OHG *diob,* etc., general Gmc. : Goth. *þiubjō* 'secretly', and so perh. as 'cowering, crouching' : Lith. *tupėti* 'cower, squat', Lett. *tupt* 'squat'. Walde-P. 1.714. Falk-Torp 1310 f. Feist 497.

Gorh. *hliftus* : *hlifan* 'steal' (11.56).

6. Lith. *vagis* : *vagiu, vogti* 'steal' (11.56).

Lett. *zaglis* : *zagt* 'steal' (11.56).

7. ChSl. *tatĭ,* SCr. *tat,* Russ. *tat'* (obs.), see above, 1.

SCr. *kradljivac,* Boh. *kradce,* fr. Slavic *krasti* 'steal' (11.56).

Boh. *zloděj,* Pol. *złodziej* = Russ. *zlodej* 'villain, rascal, wretch', ChSl. *zŭlodějĭ* 'evildoer' (*zŭlŭ* 'evil' and *děti* 'put, place'). Berneker 193. Brückner 654.

Russ. *vor* : Pol. *wór,* Boh. *vor* a kind of 'sack', SCr. *verati* 'stick away, hide' Lith. *verti* 'open or shut' (Trautmann 351 f., without Russ. *vor*), etc. Miklosich 382. Brückner 631.

8. Skt. *stena-, tāyu-, stāyu-,* Av. *tāyu-,* see above, 1.

Skt. *cāura-,* fr. *cur-* 'steal' (11.56).

11.58. 'Rob, robber'. These differ from 'steal, thief' by the implication of violence. But the distinction is often ignored. Many of the verbs listed under 'steal' (11.56) are used also for 'rob'. So It. *rubare,* Sp. *robar* (these two orig. 'rob'), Fr. *voler,* Rum. *fura,* Br. *laerez,* Lith. *vogti,* Skt. *muṣ-* (or cpds. for 'rob', as Boh. *o-krásti,* Pol. *o-kraść*). Of course the difference may always be brought out, when required (as in law), by the addition for 'rob' of a phrase expressing the violence involved, e.g. Fr. *voler à main armée.*

Or 'rob' may be included in the scope of verbs for 'seize, plunder', etc., as Grk. ἁρπάζω (11.14), σῡλάω (etym.?), Lat. *rapere* (11.14; source of NE *rape* and *ravish*), Lat. *spoliāre* (fr. *spolium* 'spoils, booty', 20.48), W. *ysbeilio* (fr. Lat. *spoliāre,* Loth, Mots lat. 216).

Owing to this situation a formal list is omitted, and further comment limited to the only distinctive and widespread group (the Gmc.) and a few other words.

1. Goth *biraubōn* (renders ἐκδύω Lk. 10.30 and σῡλάω 2 Cor. 11.8), (ON *raufa* 'break open'), Dan. *røve,* Sw. *röva* (fr. MLG *rōven?*), OE *rēafian,* ME *reve,* NE *reave* (now arch. or poet.; replaced by ME, NE *rob* through Fr.), Du. *rooven,* OHG *roubōn,* MHG *rouben,* NHG *rauben* : OE *rēofan,* ON *rjūfa,* Lat. *rumpere* 'break', etc. Walde-P. 2.354 f. Falk-Torp 914. NED s.v. *reave* vb.[1].

Hence as loanwords fr. OHG or NHG, OFr. *rouber, rober* (> ME, NE *rob*), It. *rubare,* Sp. *robar,* SCr. *robiti,* Boh. *rabovati,* Pol. *rabować.*

2. Grk. λῃστής 'robber, pirate', fr. the same root as λεία 'booty' (20.48), namely that in ἀπολαύω 'enjoy, take advantage of', Lat. *lucrum* 'gain, profit', etc. Walde-P. 2.379. In the NT the sense is clearly 'robber, highwayman' (cf. esp. Lk. 10.30), though rendered as 'thief' in the OE Lindisf., Wyclif, Tyndale, and K. James versions, that is in the extended but now obs. use of *thief* (NED s.v. b). It is rendered in the Vulgate by *latrō* (see It. *ladro* 'thief', 11.57), in Goth. by *waidedja* lit. 'evildoer' (cf. OE *wēa-dǣd* 'ill deed'; Feist 542), in OE mostly by *sceaþa* (: OE *sceaþan* 'harm', 11.28), in ChSl. by *razbojĭnikŭ* (similar forms in modern Slavic; fr. cpd. of *biti* 'strike', Berneker 68).

Grk. λωποδύτης 'clothes-stealer' (: λῶπος, λώπη 'robe'), also in more general sense 'robber', hence vb. λωποδυτέω also 'rob'. Cf. LS s.v.

3. Ir. *arcelim* 'take away, rob', cpd. of *celim* 'hide'. Cf. Grk. κλέπτω 'steal', fr. an extension of the same root (11.56). Pedersen 2.482.

NIr. *slaidim, sladaim,* fr. *slad,* MIr. *slat* 'robbery, plundering', etym.? Stokes 314. Walde-P. 2.636.

4. Lith. *plėšti* 'tear' (9.28), also 'rob'.

Lith. *grobti* 'seize, rob', Russ. *grabit'* 'rob' : ChSl. *grabiti* 'snatch away', Skt. *grabh-* 'seize', etc. (11.14). Berneker 344.

Lett. *laupīt,* Boh. *loupiti,* Pol. *łupić* 'peel' and 'rob, plunder' : Lith. *lupti,* Russ. *lupit* 'peel', Skt. *lup-* 'break' also 'rob, plunder, destroy', etc. Walde-P. 2.417 f. Berneker 746.

Words for 'lend' are partly derivatives of nouns for 'loan' or 'debt', these of various sources, and partly from more general notions of 'furnish, provide, give', 'exchange', 'leave', etc.

1. Grk. δανείζω, fr. δάνος 'loan, debt', prob. fr. IE **də-* weak grade of **dā(i)-* in Grk. δαίομαι 'distribute', etc. Walde-P. 1.763. Boisacq 166.

Grk. κίχρημι, aor. ἔχρησα : χρή 'needs, must' (9.94), χρέος 'debt' (11.64), etc. For frequent use as 'lend', cf. refs. in LS 2001 (esp. Schwyzer, Dial. Graec. Ex. 324 for early technical use) and Moulton-Milligan 344.

2. Lat. usually phrase *mūtuum* (*argentum, frumentum,* etc.) *dāre* lit. 'give (silver, grain, etc.) loaned'; *mūtuus* : *mūtāre* 'change, exchange' (12.93) Ernout-M. 648.

It. *prestare, imprestare,* OFr. *prester,* Fr. *prêter,* Sp. *prestar,* fr. Lat. *praestāre* 'be at the disposition of, be responsible for, fulfill, furnish', with adv. *praestō* 'at hand', orig. much disputed, but perh. simply fr. *prae* 'in front of' and *stāre* 'stand', with divergent semantic development from that seen in *prae-stāre* 'surpass'. Ernout-M. 805, 982. REW 6725.

Rum. *împrumuta,* also 'borrow' = Fr. *emprunter* 'borrow', etc. (11.62). Also differentiated by *da* 'give' or *lua* 'take' with *cu împrumui* 'by way of loan'.

3. Ir. *airlēicim,* NIr. *airleagaim,* cpd. of *lēicim* 'leave, let' (12.18) with *air-* 'pre-, pro-'. Pedersen 2.563.

Ir. *oidim,* with sb. *oin* 'loan', etym. dub. Walde-P. 1.204. Pedersen 1.65, 2.587.

W. *echwyna,* also 'borrow', fr. sb. *echwyn* 'loan', this prob. fr. *cwnnu, cynnu* 'raise'. Evans W. Dict. s.v. Or more specifically for 'lend' *rhoi echwyn* 'give a loan'.

W. *benthycio* (with *i* 'to' = 'lend', with *gan* 'from' = 'borrow'), fr. *benthyg* 'a loan', older *benffyg* fr. Lat. *beneficium* 'favor'. Loth, Mots lat. 138. Or more specifically for 'lend' *rhoi benthyg* 'give a loan'.

Br. *presta,* fr. OFr. *prester* (above, 2).

The majority of the words for 'borrow' are akin to those for 'lend', already discussed (11.61). The verb may be in the same form, the difference in application being shown by construction (e.g. with 'to' = 'lend', but with 'from' = 'borrow'), or in a differentiated form (e.g. mid. or refl., or with prefix) for 'borrow'. Thus Grk. δανείζομαι, mid. of δανείζω 'lend'; Lat. *mūtuārī* fr. *mūtuus* 'lent, borrowed' (in *mūtuum dāre* 'lend', etc.); W. *benthycio, echwyna* 'borrow, lend'; Br. *empresta* (or *ampresta*), a blend of *presta* 'lend' and Fr. *emprunter;* Goth. *leihwan sis* refl. (with *af.*); Dan. *laane,* Sw. *låna* 'lend, borrow'; NHG *leihen* 'lend, borrow'; MHG *entlēhenen,* NHG *entlehnen* fr. MHG *lēhenen* 'lend', etc.; Lith. *skolinti* 'lend, borrow'; Lett. *tapināt* 'lend, borrow'; SCr. *posuditi,* Pol.

pożyczić 'lend, borrow'; Boh. *vypůjčiti se* refl. cpd. of *půjčiti* 'lend'.

Furthermore 'borrow' is frequently expressed by a phrase with words for 'loan, loaned, debt', and in some languages this is the usual locution. Thus Lat. *mūtuum sūmere;* It. *prendere in prestito* 'take in loan', Sp. *tomar prestado* 'take loaned', NIr. *faghaim ar iasacht* 'get on loan' (*iasacht* 'loan', etym.?), ON *þiggja* (*nema*) *at lāni* 'receive (take) as a loan', Skt. *ṛṇaṁ kṛ-* lit. 'make a debt' (*ṛṇa-* 'debt' 11.64), also *ṛṇaṁ dā-* with abl. (cf. 11.61).

Of independent origin are the following:

1. Fr. *emprunter,* Rum. *împrumuta* (the latter also 'lend'), fr. VLat. **imprōmūtuāre,* deriv. of Lat. *prōmūtuum* 'a loan' (cpd. of *mūtuum,* cf. 12.61). REW 4319. Gamillscheg 354.

2. OE *borgian,* ME *borwe,* NE *borrow,* Du., MHG, NHG *borgen* (MHG also like OHG *borgēn* 'give heed to', etc.), fr. OE *borg, borh* 'pledge, surety', MHG *borg,* Du. *borg* 'pledge, loan', etc. (hence orig. 'take on pledge', or in MHG, NHG also 'give on pledge, lend'), fr. the root of OE *beorgan,* OHG *bergan,* ON *bjarga* 'keep, preserve', etc. (11.25). Walde-P. 2.172. NED s.v. *borrow,* vb.[1]

OHG *wehslōn* 'change, exchange' (12.93), also 'borrow' (Tat. Mt. 5.42).

3. Lett. *aizn'emt,* cpd. of *ńemt* 'take' (11.13), cf. *aizduot* 'lend' (11.61).

4. ChSl. *zajęti,* Russ. *zanjat',* cpds. of the Slavic verb for 'take', ChSl. *jęti,* etc. Hence the sb. ChSl. *zajĭmŭ,* etc. 'loan', and fr. this SCr. *po-*(or *u-*) *zajmiti* 'lend, borrow' and many phrases not entered in the list but frequently used for 'lend' or 'borrow', e.g. Russ. *dat' vzaimy* 'lend', *vzjat'* (or *brat'*) *vzaimy* 'borrow'. Berneker 426.

'Owe' is frequently expressed as 'be in debt', that is by phrases containing words for 'debt' or adjectives derived from them, or more rarely by verbal derivatives therefrom. But in several cases the verb is conversely the source of the noun, or is unrelated. In some of these the underlying notion is 'have, hold' (something belonging to another).

1. Grk. ὀφείλω, Hom., Aeol., Arc. ὀφέλλω, Cret. ὀφήλω, Arc. perf. pple. ϝοφληκόσι, etc., etym.? Boisacq 731 f.

Late Grk. χρεωστέω, NG pop. χρωστῶ, deriv. of χρεώστης 'debtor', this of χρέως 'debt' (11.64).

2. Lat. *dēbēre* (> It. *dovere,* Fr. *devoir,* Sp. *deber*), fr. *dē-habēre,* with semantic development through 'have (something) from (someone)', that is, 'have something belonging to another'

hence 'owe', or through 'withhold'(?). Ernout-M. 255. Walde-H. 1.326.

Rum. *datori,* deriv. of *dator* 'debtor', fr. Lat. *debitor.* REW 2493.

3. Ir. *dlegair domsa,* lit. 'claim is had on me', with passive of *dligim* 'have claim to, have the right to', also used in personal construction with person owed as subject and prep. *do* with person owing (e.g. *dligim nī duit* 'I have a claim for something upon thee' = 'thou owest me' Wb. 32a20), so also NIr. *dlighim airgead dīot* 'you owe me money' (cf. Dinneen) beside the transitive use as 'owe'; W. *bod mewn dyled*(*i*) 'be in debt (to)', *dyled* 'debt'; Br. *dleout* 'owe, ought' : Ir. *dliged* 'law, right'. Pedersen 2.506.

4. 'Pay' may be expressed simply as 'give' or 'give back', as 'weigh out' or 'count out', or with primary reference to the debt or the creditor as 'release, discharge, fulfil, recompense, appease', etc. According to their source they would originally differ in construction, namely 'pay an amount to a person' if the source is 'give' or the like, but 'pay a debt or a person' if the source is 'fulfil, appease', etc. But as consciousness of the original meaning was lost, the words of the latter type came also to be used with the amount paid as the direct object, e.g. Grk. ἀποτίνω (no less than ἀποδίδωμι), Lat. solvere, Fr. payer, NE pay, etc.

1. Grk. ἀποδίδωμι 'give back, return' (11.22) is the most common term for 'pay'.

Grk. ἀποτίνω 'requite, repay', then 'pay' (as a penalty) and simply 'pay' (ἀργύριον, etc.), less commonly in this sense ἐκτίνω, cpds. of τίνω 'requite, atone for, repay' (rarely 'pay' money) : Skt. ci- (cayate) 'hate, punish', Av. či- 'atone for, pay' (see below, 7); common meaning of this root 'requite' in good or bad sense (cf. the derivs. Grk.

τιμή 'reward' or 'penalty', ποινή 'penalty', Av. kaēna 'penalty', ChSl. cěna 'reward'). Walde-P. 1.509.

Grk. τελέω 'finish, fulfil' (fr. τέλος 'end, fulfilment', 14.26), also sometimes 'pay' (Hom.+).

Grk. πληρόω 'fill, fulfil' (: πλήρης 'full'), also 'make good, supply' (with χρεία 'need', etc. Thuc.), and in late times 'pay' (pap.), hence NG πληρώνω.

2. Lat. pendere, orig. 'hang' (trans.) whence 'weigh' and 'pay' (from the weighing out of silver in payment), trans. to the intr. pendēre 'hang, be hanging'. Ernout-M. 750 ff.

Lat. solvere, 'loose, release' (11.34), then in legal terminology 'acquit oneself of, discharge' (debitum, rem, vōtum, etc.), 'pay'. Ernout-M. 954.

It. pagare, Fr. payer (> Br. paea, ME paie, NE pay), Sp. pagar, fr. Lat. pācāre 'pacify' (through 'appease' and esp. 'appease with pay'). REW 6132.

Rum. plăti, fr. Slavic (below, 6).

3. Ir. direnim, asrenim cpds. of renim 'sell' (11.82). Pedersen 2.596 f.

NIr. dīolaim (also 'sell' and 'betray') beside dīoghlaim 'betray', fr. Ir. dīgalim 'avenge' : Ir. dīgal, W. dial 'vengeance', cpd. of Ir. gal 'valor'. Pedersen 1.101. Macbain 134. Development of 'pay' through 'atone for, pay the penalty' (cf. Grk. ἀποτίνω, above, 1), and of 'sell' through 'betray' (as Judas betrayed Christ for thirty pieces of silver)?

W. talu, with tal 'payment, recompense, reward', prob. also Ir. -tal in tuarastal 'wages' (11.78), taile gl. salarium, MBr. talvout 'be worth, reward', etc., outside connections? (Stokes, 130 : Lat. tollere 'lift', etc.; rejected by Walde-P. 1.739).

Br. paea, fr. Fr. payer (above).

4. ME paie, NE pay, fr. Fr. payer (above, 2).

5. Lith. mokėti 'understand, know how' ('can' in this sense, as 'can read') and 'pay' (už- only in this sense) : mokti 'learn', Lett. māku, mācēt 'understand, be able', mācīt 'teach', OPruss. mukint 'teach'. Mühl.-Endz. 2.575. Semantic development prob. 'know how' (to count), 'count out' > 'pay' (cf. NHG zahlen, above).

Lett. maksāt, fr. maksa 'payment' (Esth. or Liv. maks id.). Mühl.-Endz. 2.555.

6. ChSl. vŭzdati 'give back' (11.22), in Gospels reg. for ἀποδίδωμι also when it means 'pay, repay'.

SCr. platiti, etc., general Slavic (but not in old ChSl.), deriv. of word for linen (ChSl. platŭ, platĭno, 6.23). According to the chronicle of Helmold the Slavs used linen cloth as the standard of value in trade. Brückner 420. Schrader, Reallex. 1.325.

7. Skt. dā- 'give' (11.21) also the usual word for 'pay'.

Av. či- 'atone for' and so 'pay' (e.g. čikayaṯ Vd. 13.10; cf. Barth. 103 s.v. afša- and 464) : Grk. τίνω 'atone for', etc. (above, 1).

Some of the words for 'account' are related to those for 'number' or 'count', while others are based on a more general notion of 'reason, right' or the like.

1. Grk. λόγος (also 'reason, word', etc.) : λέγω 'gather, recount, say', etc., Lat. legere 'gather, select, read', etc. Walde-P. 1.422. From same source also λογισμός : λογίζομαι 'count, reckon', and Byz., NG λογαριασμός : Byz. λογαριάζω 'calculate', fr. λογάριον dim. of λόγος.

2. Lat. ratiō : reor, rērī, ratus 'reckon, judge', etc., Goth. raþjō 'number, count', OHG reda, radia 'account, speech, tale', etc., fr. IE *rē-, *rə-, prob. related ultimately to the root of Grk. ἀραρίσκω 'join together, fit', Lat. artus 'joint', etc. Walde-P. 1.73 f. Ernout-M. 860 f. Feist 394.

It. conto, Fr. compte, Sp. cuenta (fr. cuento), Rum. cont (lit. loanword) fr. late Lat. computus 'computation', fr. computāre 'reckon', cpd. of putāre 'reckon, consider, think'. Ernout-M. 828. REW 2109.

Rum. socoteală, fr. socoti 'heed, pay attention to', fr. the Slavic, cf. Bulg. dial. sokoti 'guard'. Tiktin 1451 ff.

3. Ir. airem, comairem 'number, reckoning, account' (cf. Laws, Gloss. 37), NIr. comhaireamh, W. cyfrif, cpds. fr. rīm-, W. rhif 'number' (13.12), vb. Ir. airmin 'count' (ad-rīm-, Pedersen 2.602).

Here is intended the material security offered, not the personal promise as in the now most common use of NE pledge.

1. Grk. ἐνέχυρον, cpd. of ἐν- 'in' and ἐχυρός 'strong, secure, safe' (: ἔχω 'hold, have').

Grk. ἐγγύη (cf. ἔγγυος the personal 'surety', ἐγγυάω 'give surety', etc.) : ἐγγύς 'near', both prob. orig. 'in the hand', cpds. of ἐν- 'in' and *γυ- : Av. gu- 'hand'. Walde-P. 1.637. Boisacq 211.

Grk. ἀρραβών 'earnest-money, pledge' (NG pop. ἀρραβῶνα id. and esp. 'betrothal ring', pl. 'betrothal'), loanword fr. Semitic, prob. a Phoen. word = Hebr. ʿērābōn 'pledge'. Hence Lat. arrabō and abbr. arra > It. arra, Fr. arrhes. Boisacq 82. Ernout-M. 75. Walde-H. 1.69. REW 665.

2. Lat. pignus (> It. pegno) perh. as 'mark (for remembering a contract)' : pingere 'embroider, paint'. Ernout-M. 766 f.

Fr. gage, OFr. also wage, fr. Gmc., Goth. wadi, etc. (below, 4). REW 9474. Gamillscheg 451.

Sp. prenda, fr. prender 'take'. Diez 646.

Rum. amanet, through NG ἀμανέτι 'pawn, pledge', fr. Turk. emanet 'security'. Lokotsch 66. Tiktin 56.

Rum. zălog, fr. Slavic, ChSl. zalogŭ, etc. (below, 6).

3. Ir. gell (cf. Thurneysen, Z. celt. Ph. 15.266 ff.), NIr. geall (hence vb. gell- 'promise, pledge'), fr. *ghislo- : Ir. gīall, W. gwystl 'hostage', Br. gouestl 'pledge, security', ON gīsl, etc. 'hostage' (*gheislo-), root connection dub. Walde-P. 1.554. Pedersen 2.537.

W. adneu : Ir. aithne gl. depositum, abstract of aith-no- 'entrust', perh. : Lat. ad-nuere 'nod to, assent'. Pedersen 1.441, 2.586.

4. Goth. wadi, ON veð, OE wedd, ME wed(de), OHG we(t)ti (NHG wette 'bet', cf. NE wager orig. 'pledge' : wage, Fr.

gage), OS weddi : Lat. vas, vadis 'surety' (the person), cpd. praes, praedis, Lith. vaduoti 'redeem, ransom (a pledge)'. Walde-P. 1.216. Feist 539. Ernout-M. 804, 1075.

ON pantr, Dan., Sw. pant (fr. MLG pant), Du. pand, OHG, MHG pfant, NHG pfand (cf. also MHG pand 'loss, damage', esp. by war, panden 'rob', MHG pfenden 'rob one of something, take a pledge'), orig. dub., but perh. of Romance origin, cf. OFr. pan 'pledge, security, surety' (> NE pawn), if this is the same word as pan 'piece' (orig. of cloth, fr. Lat. pannus) and not conversely fr. Gmc. as some think. Falk-Torp 813 f. Kluge-G. 439, Franck-v. W. 487 f.

ME surete, NE surety (in this sense fr. 14th cent., NED s.v. 5) fr. OFr. surte, fr. Lat. sēcūritās 'security, whence the now more common NE security.

ME plege, NE pledge, fr. OFr. plege 'surety' (Fr. pleige), MLat. plevium, plebium, plivium, etc. (cf. also MLat. plevina, OFr. plevine, NE plevin, replevin), beside vb. OFr. plevir 'warrant', prob. fr. a Gmc. form belonging with OHG, OS plegan 'take responsibility for'. REW 6592. Gamillscheg 701. NED s.v. pledge.

5. Lith. užstatas : už-statyti 'set up, place behind'; cf. Boh. zástava (below).

Lett. k'ila (k'īls, k'īlis), fr. Liv. kīl 'pledge'. Mühl.-Endz. 2.388.

6. ChSl. zalogŭ, SCr., Russ. zalog, cpds. with za- 'behind' and deriv. of root in ložiti 'lay', ležati 'lie', etc., IE *legh-. Walde-P. 2.425. Berneker 727 f.

Boh. zástava, Pol. zastawa, cpds. of za- 'behind' and deriv. of the root in Boh. státi, Pol. stać 'stand'.

Russ. zaklad, fr. za- 'behind' and kladu, klast' 'put, place' (12.12).

7. Skt. nyāsa-, lit. 'a setting down', fr. ni-as- 'throw, lay, or put down' (as- 'throw', 10.25).

Skt. nikṣepa-, fr. ni-kṣip- 'throw down' (kṣip- 'throw', 10.25).

Skt. ādhi-, fr. ā-dhā- 'put in' (dhā- 'place, put').

Words for 'interest' on money are specialized from more general notions like 'growth, produce, profit, income', also 'interest' (in wider sense). Several old words for 'interest' come to mean 'excessive interest, usury' (e.g. Fr. usure, NE usury, Dan. aager, NHG wucher, Russ. lichva) through their use by church writers to whom all 'interest' was 'usury'.

1. Grk. τόκος 'childbirth, offspring' and (as product of money) 'interest' : τίκτω 'beget, bear' (4.71) and 'produce'.

2. Lat. ūsūra, prop. 'use', then through specialization 'use of loaned money' > 'interest' (paid for the use) : ūsus 'use,

utility', ūtor, ūtī 'use, make use of'. Ernout-M. 1142.

Lat. fēnus : fēlix, fētus 'productive', etc. Ernout-M. 345. Walde-H. 1.479.

It. interesse, Sp. interés, Rum. interes, Fr. intérêt, fr. MLat. interesse (and 3sg. interest) 'concern' (lit. 'be between'). Hence NE interest (early NE also interesse), and other Eur. words, less commonly used in financial sense, a Sw. intresse, Du. interest, NHG interesse, SCr., Russ. interes. NED s.v. interest sb.

Rum. dobîndă, formerly 'profit, gain', fr. dobîndi 'earn, acquire', fr. Slavic dobyti 'get, obtain' (11.16). Tiktin 556.

3. Ir. fuillem, fr. *fo-slī-mo- cpd. deriv. of the root slī- as in adroilliu 'earn' (*ad-ro-slī-), IE *slē-, perh. fr. the root *sel- in Ir. selb 'property', etc. (11.41). Walde-P. 2.504. Pedersen 2.630 f.

NIr. breis : MIr. breis 'increase, profit' (K. Meyer, Contrib. 254), orig.? Perh. (orig. a comp.?) : Ir. bress, NIr. breass 'great'.

NIr. gaimbīn 'morsel, bit', also 'interest' or 'usury' (cf. Dinneen, s.v., McKenna 683), etym.?

W. llog, back-formation to llogi 'hire, engage, lend at interest', fr. Lat. locāre 'place, let, lease, hire'. Loth, Mots lat. 182.

Br. kampi, fr. MLat. cambium (> It. cambio 'exchange, rate of exchange', etc.), itself of Celt. orig. (cf. 12.93). Henry 52.

Br. mad 'property' (11.41) also 'interest'.

4. Goth. wōkrs, ON okr (partly 'usury', as Dan. aager, Sw. ocker, all fr. MLG wōker), OHG wuochar (but mostly 'increase, gain; offspring'), MHG wuocher (NHG wucher 'usury'), OFris. wōker (OE wōcor 'increase, fruit, offspring'), either fr. the root of Goth. wahsjan, OHG wahsan, etc. 'make grow', Goth. aukan, Lat. augēre 'increase', etc.; or fr. that of Goth. wakan, OE wæcnan 'wake' (cf. OE wæcnian 'be born', Lat. vigēre 'thrive'). The former connection is simpler semantically and without serious phonetic difficulty, but the latter is now preferred by many. Walde-P. 1.23, 247 (but cf. Walde-H. 1.479 s.v. fēnus). Feist 572. Falk-Torp 3. Hellquist 723. Weigand-H. 2.1287.

Words for 'tax' (for older periods more appropriately 'tribute') are from words meaning 'carry, bring, contribute, pay' or 'put on, assess, rate'. NE tax is the most generic term and in U.S. covers virtually every form of tax except import duties and bridge or road tolls (many other duties in British usage which are taxes in U.S.; see NED s.vv. tax and duty). Elsewhere too, beside the most generic word, others may be used for special forms of 'tax', as the import duty (NHG zoll, etc.).

1. Grk. φόρος 'tribute' : φέρω 'carry, bring' (10.61).

Grk. τέλος, prob. the same word as τέλος 'fulfilment, completion, end' (14.26), with easy development fr. 'fulfilment' to 'expense' (cf. εὐτελής 'cheap', πολυτελής 'costly') and 'service, duty, dues, tax' (cf. ἀτελής 'free from tax'). Otherwise (: τλῆναι 'bear, endure', Lat. tollere 'lift', etc.) Walde-P. 1.739, Boisacq 953.

Grk. εἰσφορά 'contribution' and at Athens 'property-tax', fr. εἰσφέρω 'bring in'.

2. Lat. vectīgal, neut. subst. of vectīgālis 'pertaining to taxation, taxable', orig. in detail dub., but prob. based on a *vectis 'delivery' : vehere 'carry'. Walde-P. 1.250. Ernout-M. 1078 (suggesting a loanword).

Lat. stipendium (also 'soldiers' pay'), fr. *stipi-pendium (cf. Varro militis stipendia ideo quod eam stipem pendebant) cpd. of stips 'small piece of money' and deriv. of pendere 'pay' (11.65). Ernout-M. 977.

Lat. tribūtum, fr. tribuere 'assign, allot, yield, pay', deriv. of tribus 'tribe'. Ernout-M. 1056.

It. imposta, Fr. impôt, Sp. impuesto, Rum. impozit, fr. Lat. imposita (-tum),

pple. of impōnere 'put on'. REW 4314. Gamillscheg 526.

It. tassa, Fr. taxe (> Rum. taxă), back-formation fr. It. tassare, Fr. taxer 'assess, tax', fr. Lat. taxāre 'censure, appraise, rate' loanword fr. Grk. τάσσω, aor. ἔταξα 'appoint, fix (a payment or tax)', lit. 'set in order, arrange'. Ernout-M. 1019. Gamillscheg 837.

Fr. contribution, Sp. contribución, fr. Lat. contribūtiō, -ōnis 'distribution, contribution' (: tribuere, etc. above, 2).

3. Ir. cīs 'tribute' (in Laws 'rent'), fr. Lat. cēnsus (cf. below OHG zins, etc.). Vendryes, De hib. voc. 126. Pedersen 1.209.

NIr. cāin 'law, rule' and 'tribute, tax', fr. Lat. canōn 'rule' (fr. Grk. κανών id., orig. 'rod') and under the emperors 'a tribute (in money or kind)'. Vendryes, De hib. voc. 119. Pedersen 1.193. Zimmer, KZ. 36.440 ff.

W. treth, orig.? Loth, Mots lat. 212 (rejecting deriv. fr. Lat. tribūtum, Stokes).

Br. tell, abbreviated fr. Lat. telōnium 'toll-house' (cf. ON tollr, etc., below). Henry 262.

4. Goth. gild = OHG gelt 'payment, money', etc. (11.43), fr. the root in Goth. (fra)-gildan, OHG geltan 'pay' (11.65). Hence also Goth. gilstr, OHG ghelstar, kelstar (also 'sacrifice'). Feist 214 f.

Goth. gabaur (renders φόρος Rom. 13.7, but otherwise λογία 'collection') : ga-bairan 'bring together', bairan 'bear'.

Goth. mōta (for τέλος and τελώνιον), OE mōt (only Gospels, Mt. 22.19, Lindisf.) = OHG mūta 'teloneum' (prob. fr. Goth.), ON mūta 'fee', orig. disputed, but prob. fr. MLat. mūta (cf. Du Cange) : Lat. mūtāre 'exchange'. Feist 365. Falk-Torp 703. Otherwise, as Gmc. word (whence MLat. mūta) : Goth. mitan 'measure', Walde-P. 2.260, Kluge-G. 383.

ON skattr, Dan. skat, Sw. skatt, OE sceatt : Goth. skatts 'money', etc. (11.43).

ON tollr, OE toll, OHG, MHG zol, all used esp. in the restricted sense of the modern words (Dan. told, Sw. tull, NHG zoll, NE toll) but also as general words for 'a tax' (cf. ON sauða-tollr, OE cynelīc toll, and OHG zol often gl. vectigal), fr. MLat. tol(l)ōnium by influence of tollere 'lift' for lat. Lat. telōnium 'tollhouse', fr. Grk. τελώνιον id. Falk-Torp 1269. NED s.v. toll sb.[1].

OE gafol, also 'interest' (11.68).

ME taxe, NE tax, fr. the verb ME taxe, fr. OFr. taxer (above, 2). NED s.v.

Du. belasting, lit. 'a loading', fr. belasten 'load, burden'.

OHG, MHG zins (general for 'any sort of tribute from the subject to the lord', MHG also in the modern sense 'interest'), fr. Lat. cēnsus 'census, register' (of citizens and property), late 'tax' (so Grk. κῆνσος in NT). Ernout-M. 173. Weigand-H. 2.1330. Kluge-G. 713.

OHG tribuz (Tat.), fr. Lat. tribūtum.

NHG steuer : MHG stiur(e), OHG stiura 'prop, support' (also 'rudder', 10.36). Weigand-H. 2.967 f. Paul, Deutsches Wtb. s.v.

5. Lith. mokestis, lit. 'payment' (beside mokesnis), fr. mokėti 'pay' (11.65).

Lett. nuoduoklis, fr. nuoduot 'give up, deliver' (: duot 'give').

Lett. mesls (pl. mesli 'dice, lot'), fr. mesti 'throw'. Mühl.-Endz. 2.603. Semantic development through 'that which is one's lot (to pay)'?

6. ChSl. danĭ, Boh. daň, SCr. danak; Pol. podatek, Russ. podat' : ChSl. dati, etc. 'give' (11.21). Berneker 179, 180.

ChSl. myto (not quotable for 'tax', but mytarĭ reg. for τελώνης and mytĭnica for τελώνιον in Gospels), Bulg. mito, Boh.

mýto, Pol. myto, etc. 'toll', fr. Gmc., Goth. mōta, etc. (above, 4). Stender-Petersen 324.

SCr. porez, lit. 'assessment' : porezati 'cut up, separate, divide' (rezati 'cut' 9.22). Miklosich 278.

Boh. berně, Pol. pobór : Boh. bráti, Pol. brać 'take' (11.13). Berneker 51, 75 f.

Boh. poplatek, also plat (but this mostly 'pay, payment') : platiti 'pay' (11.65).

Russ. nalog, cpd. of na 'on' and deriv. of root in Slavic loziti 'lay' (cf. zalog 'pledge', 11.67). Semantic borrowing fr. the Romance group (It. imposta, etc.) possible.

7. Skt. kara-, perh. (like kara- 'ray', but with independent semantic development), fr. kar-, kir- 'pour out, scatter' (as what is 'poured out' to the ruler). Uhlenbeck 45.

Skt. bali-, etym.? Uhlenbeck 188.

Skt. çulka- (in RV 'price', later 'tax'), etym.? Uhlenbeck 313.

OPers. bāji-, as orig. 'assessment' or more prob. 'contribution' : Av. baj- 'assign as a share', Skt. bhaj- 'divide, share, furnish', etc. Barth. 953.

Most of the words for 'income' (from property of any sort, more comprehensive than 'interest' on money, though sometimes specialized in this direction, and than produce of land) meant literally what 'comes in' or 'comes back' or is 'taken in'. From the older period of several languages quotable examples for financial 'income' seem to be lacking.

1. Grk. πρόσοδος 'approach' and 'income', cpd. of πρός 'to, toward' and a form of IE *sed- in the sense shown by Grk. ὁδός 'way, road', ChSl. choditi 'go', etc. (10.47, 10.71).

NG εἰσόδημα, new formation to εἴσοδος 'entrance' (εἴσοδος, like πρόσ-οδος, above), the latter also sometimes 'income' in late times. Hence also NG ἔσοδο (mostly in pl.).

2. Lat. frūctus 'use, enjoyment', 'products' (in widest sense) and often 'income' : frūgēs 'fruit', fruī 'enjoy', Goth. brūkjan 'use', etc. Walde-P. 2.208. Ernout-M. 393 f. Walde-H. 1.552.

Lat. vectīgal 'tax, public revenues' (11.69), also used for private 'income'.

Lat. reditus (u-stem), a 'return' in lit. sense, later as commercial term 'return, revenue, income', deriv. of red-īre 'come back'. In this sense often written redditus (late inscr., Cassiod.) showing association with pple. of reddere 'give back, return'. Replaced in VLat. by rendita fr. pple. of VLat. *rendere = reddere (11.22), hence It. rendita, Fr. rente, Sp. renta. REW 7141.

Rum. venit, fr. veni 'come'.

3. NIr. teacht isteach, lit. 'coming in' (teacht : tigim 'come', 10.48; isteach 'in, within', orig. 'into the house'), prob. semantic borrowing of NE income.

W. cyllid, orig.? Loth, Mots lat. 147.

W. incwm, fr. NE income.

Br. leve, fr. OFr. levée, fr. lever 'raise, lift' (10.22). Henry 185.

4. ON taka, late tekja (pl. tekjur, reg. in NIcel.), Dan. indtægt, fr. ON taka, Dan. tage 'take' (11.13).

Dan. indkomst (usually pl. inkomster), Sw. inkomst, NE income, Du. inkomst, NHG (pl.) einkünfte, more usually einkommen, all orig. 'in-come'. Also NHG einnahme, fr. einnehmen 'take in'.

ME, MHG, NHG rente (NE rent now obs. in this sense) fr. OFr. rente (above, 2). NED s.v. rent, sb.[1].

MHG gülte, gelt, lit. 'payment', but frequently also 'income' (cf. Lexer) : OHG geltan, etc. 'pay' (11.81).

5. Lith. pajamos (pl.; now definitely established, Senn, Sprachl.), fr. paimti 'take in', cpd. of imti 'take' (11.13).

Lett. ienākšana, ienākums, fr. ie-nākt 'come in'.

6. ChSl. dochodŭ (only late), SCr. dohod(ak), prihod, Boh. důchod, Pol. dochód, Russ. dochod, cpds. of Slavic do 'to', pri 'at', and chodŭ : choditi 'go'.

Boh. příjem 'reception, receipt', and 'income' (so esp. pl. příjmy), fr. přijati, přijmouti 'accept, receive', cpd. of jati = ChSl. jęti 'take' (11.13).

7. Skt. āya-, āgama-, fr. ā-i-, ā-gam- 'come to, approach'.

Br.	miz, dispign, koust	NHG	spesen, ausgabe, kosten		

Words for 'expense, cost' are partly from verbs for 'spend', 'pay', or 'cost' as originally 'stand at' (a price), and partly 'what goes out' or 'what is given out'. A few meant originally 'waste', hence 'excessive expense', then simply 'expense'.

Some of the words are used only as plural collectives (Fr. frais, NHG spesen, kosten) and many of the others, though listed in the singular, frequently so (NE costs, expenses, It. spese, Sp. gastos, NHG ausgaben, etc.).

1. Grk. ἀνάλωμα, deriv. of ἀναλίσκω (fut. ἀναλώσω etc.) 'use up, spend', cpd. of ἀνα- 'up, again' and ἁλίσκω mostly in mid. ἁλίσκομαι 'be seized' (dial. ϝαλίσκηται, ϝαλόντοις) : Lat. vellere 'pluck, tear out', Goth. wilwan 'seize, rob', etc. Walde-P. 1.305. Boisacq 45.

Grk. δαπάνη : δάπτω 'rend, devour', Skt. dāpayati 'divides', etc., extension of the root *dā(i)- in Grk. δαίομαι 'divide, share'. Walde-P. 1.764. Boisacq 166.

NG ἔξοδο, usually pl. ἔξοδα, fr. ἔξοδος 'exit, issue' also frequently (inscr., Polyb. and Byz.) 'outgoing of money, expenditure', cpd. of ἐξ 'out' and ὁδός 'way'.

2. Lat. sūmptus, fr. sūmere 'take, take up' (11.13) and 'spend'.

Lat. impendium, impēnsa, fr. impendere 'expend', cpd. of pendere 'pay' (11.65). Similarly late Lat. expē(n)sa > It. spesa, OFr. espoise, in learned form > Anglo-Fr. expense > ME, NE expence, expense; also MLat. dispensa or -um > Fr. dépense. Ernout-M. 751 f. NED s.v. expense. Wartburg 3.97.

It. costo, Sp. coste (costo, costa), OFr. cost, coust (> Br. koust, ME, NE cost) back-formations fr. vbs. It. constare, Sp. costar, OFr. coster 'cost', fr. Lat. cōnstāre 'stand fast, be settled, agreed', then in commerce (already in Plaut.) 'stand at (with abl. of price), cost'. Ernout-M. 982. REW 2170.

Hence also the loanwords in Gmc. and through Gmc. in Celtic and Slavic; also NG κόστος 'cost, price', but not in such common use as the vb. κοστίζω, e.g. πόσο κοστίζει 'how much does it cost, what is the price?'

Fr. frais (pl.), OFr. sg. fret, frait, pl. fras, fr. Lat. fractum 'broken'. Cf. OFr. fret 'damage by breaking', hence 'damage, expense', REW 3468. Wartburg 3.755 f.

Sp. gasto, also and orig. 'waste', fr. gastar 'waste, spend', this fr. Gmc., OHG wuostan, etc. 'lay waste'. REW 9168.

Rum. cheltuială, fr. cheltui 'spend, expend', fr. Hung. költ 'spend'. Tiktin 334.

3. NIr. costas, W. cost, fr. ME, NE cost.

W. traul, also and orig. 'wear, waste', perh. fr. a form of the root *ter- 'rub' in Grk. τείρω, Lat. terere. Lloyd-Jones, Bull. of Celt. Stud. 2.292. G. S. Lane, Language 7.283.

Br. miz (and pl. mizou), fr. OFr. mise (misse, mize), lit. 'action of placing' (Fr. mise), but frequently found in sense of 'expense' (through notion of 'sum of money put out' for a thing), cf. Godefroy. G. S. Lane, Language 13.26.

Br. dispign, fr. Lat. dispendium (cf. above, 2). Loth, Mots lat. 161.

4. Goth. manwiþa (renders δαπάνη Lk. 14.28, but more precisely ἑτοιμασία 'preparation' Eph. 6.15), fr. manwus 'ready', manwjan 'prepare'. Feist 345.

ON kostnaðr, Dan. omkostning (also be-), Sw. (om)kostnad, fr. ON (late in this sense) kostr, older Dan., Sw. kost fr. MLG kost(e) = Du. kosten, OHG chosta, MHG kost(e), NHG kosten (sg. kost obs.), derivs. of the vbs. MLG, MHG kosten, etc., fr. VLat. costāre, Lat. cōnstāre (above, 2). Falk-Torp 569. Weigand-H. 1.1127 f.

Dan. udgift, Sw. utgift, fr. MLG ūtgift 'what is given out', hence used like NHG ausgabe.

OE andfengas (Lk. 14.28 renders sumptus), pl. of andfeng 'assuming, reception, etc.' : fōn (feng) 'take, seize'. Semantic borrowing fr. Lat.?

OE dæg-wine 'day's pay' also glosses Lat. expensa and impensum.

ME, NE cost, fr. OFr. cost, (above, 2).

ME, NE expence, expense, fr. Anglo-Fr. expense (above, 2).

NE outlay, sb. fr. lay out.

OHG gifuori (renders sumptus Tat. 67.12), usually 'what is advantageous or fitting' (as gifuari Otfr. etc.) : OS gifōri 'use, advantage', ON fœri 'opportunity', etc., fr. the root in OHG fuoran, etc. 'bring, lead'. Falk-Torp 291.

NHG spesen, fr. It. spese, pl. of spesa (above, 2). Weigand-H. 2.912.

NHG ausgabe, mostly in pl. ausgaben, lit. 'what is given out'.

5. Lith. išlaidos, pl. of išlaida 'outlet', fr. išleisti, intens. išlaidyti 'let out' and 'give out, spend'.

Lith. kaštas, fr. Pol. koszt (below).

Lett. maksa (so Lk. 14.28; this sense not given by Mühl.-Endz., but cf. Ulmann-Brasche s.v. kosten), lit. 'payment, pay', fr. Liv. or Esth. maks 'pay'. Mühl.-Endz. 2.554 f.

Lett. izdevumi (so Drawneek), pl. of izdevums 'expenditure' fr. iz 'out' and devums 'giving, gift' (: duot 'give'), semantic borrowing of NHG ausgabe(n).

6. ChSl. dovolŭ (for δαπάνη Lk. 14.28, otherwise αὐτάρκεια 'sufficiency') : do-vĭlěti 'suffice'. 'Cost' fr. 'sufficient amount'. Meillet, Études 224.

SCr. trošak, fr. trošiti 'spend, consume' = ChSl. trošiti id. : Boh., Pol. trocha 'a bit', root connection? Brückner 576. Miklosich 362.

SCr. rashod, Russ. raschod, cpd. of ras-, raz-, 'dis-' and chodŭ : choditi 'go, come' (opp. to SCr. prihod, dohod, etc. 'income', 11.75).

Boh. výdaj, vydání, Pol. wydatek, fr. vy-dati, wy-dać 'give out, spend'.

Boh. náklad (also 'load'), fr. na-klasti 'put on' (klasti, 12.12). Berneker 507.

Boh. výloha, fr. vy- 'out' and the root of lehnouti 'lie down', ChSl. legą, lešti (12.14), hence like NE outlay.

Boh. útrata = Russ. utrata 'loss', cf. Boh. stratiti 'lose' fr. the root in ChSl. tratiti 'consume' (11.33).

Pol. koszt, fr. MHG kost. Brückner 260. Berneker 586.

Russ. izderžka, fr. izderžat' 'spend, consume', cpd. of deržat' 'hold, keep'.

7. Skt. vyaya-, lit. 'disappearance, loss' (as adj. 'passing away, liable to change'), fr. vi-i- 'disperse, be lost, perish', cpd. of i- 'go' (cf. Uhlenbeck 298 s.v. vyayati).

'Profit' is understood here as a commercial term, but most of the words listed are also used for 'gain, profit' in the wider sense. They are mostly from verbs for 'gain, earn, win' or the like. But in one case the underlying notion is 'skill' or 'craftiness'.

1. Grk. κέρδος, sense of 'profit' fr. 'skill' or (as first pejorative in feeling) 'craftiness', shown in pl. κέρδεα 'cunning arts, wiles' and κερδαλέος 'crafty, wily' : Ir. cerd 'art, handicraft', W. cerdd 'art, poetry, music'. Walde-P. 1.423.

2. Lat. lucrum (prob. fr. *lu-tlo-m) : Ir. lōg, 'price', Goth. laun, etc. 'reward, wages', Grk. ἀπο-λαύω 'enjoy', λεία 'booty', ChSl. loviti 'hunt', etc. Walde-P. 2.379 f. Ernout-M. 564. Walde-H. 1.826.

Fr. profit (> It. profitto, Rum. profit), fr. Lat. profectus 'progress, increase, growth, success', fr. proficere 'advance, derive advantage, profit'. REW 6769.

It. guadagno, Fr. gain, fr. vbs. It. guadagnare, Fr. gagner (OFr. gaaignier) 'gain, earn', fr. a Gmc. (Langob. or

Frank.) *waidenjan : OHG weidenen 'hunt, pasture', ON veiða 'hunt', etc. REW 9483. Gamillscheg 451.

Sp. ganancia, fr. ganar 'win, gain', orig. dub., perh. fr. a Goth. form belonging with OE gīnan, gānian, etc. 'yawn, gape' (4.52), with semantic development through 'open the mouth for, snap at'. Br.	koll	NHG	verlust		

To a great extent words for 'loss' of money, property, etc., are the same as those for 'loss' in general and are the usual nouns corresponding to the verbs for 'lose' already discussed (above, 11.33). Such are : It. perdita, Fr. perte, Sp. perdida, Rum. pierdere (: It. perdere, etc.); NIr. cailleamhain, W. coll(ed), Br. koll (: NIr. caillim, W. colli, Br. koll); ON tjōn, esp. cpd. fjār-tjōn 'loss of money' (: tȳna), Dan. tab (: tabe); Sw. förlust, OE lȳre, OE lor, ME lore, ME loss(e), NE loss, Du. verlies, OHG farloranissa ('damnum, perditio', but forlust 'perditio', cf. Graff 2.266), MHG verlornisse, verlust, NHG verlust (but Goth. fralusts 'destruction, ruin'); Lith. nuostolis (: nustoti), Lett. zaudejums (: zaudēt); SCr. gubitak (: gubiti); Boh. ztráta, Pol. strata (: Boh. ztratiti, etc.); Skt. hāni (: hā-).

There are however some other special terms used in this sense, mostly from notions like 'injury, damage, penalty'.

1. Grk. ζημία, Dor. ζāμία, also 'penalty, fine', perh. (as ζā-μία) : ζῆλος (ζā-λος) 'ardor, zeal, jealousy', ζητέω 'seek' (11.31), but semantic development not clear. Boisacq 309.

2. Lat. damnum, also 'harm, damage' see 11.28.

3. Ir. dīth, also 'destruction, ruin, death' : Arm. di 'corpse', OE dwīnan 'waste away', ON dvīna 'dwindle, pine away'. Walde-P. 1.835.

Ir. dochor, NIr. dochar, cpd. with do- 'ill-' (: Grk. δυσ-, etc.), opp. to sochor 'profit' (11.73).

NIr. dīoghbhāil, fr. Ir. digbāil 'diminution, injury, harm', vbl. n. of di-gaibim 'take away, diminish' (cpd. of gaibim 'take', 11.13).

4. Goth. sleiþa (renders ζημία Ph. 3.7, 8) : sleiþei 'danger', sleiþs 'bad, dangerous', ON slīðr 'fearful', OE slīþe 'dire, cruel, dangerous'. Walde-P. 1.401. Feist 437.

ON fjārskaði, fēskaði, cpd. of fē, gen. fjār 'money, property, cattle' and skaði 'harm, damage, destruction' (= OHG scado, NHG schade, etc.).

5. Lith. nuostolis (above), now reg. word for 'loss' of any kind, replacing

iškada (in NT versions) fr. Pol. szkoda 'damage' (11.28) and blėdis in this sense.

Lett. skāde (in NT, Ph. 3.7, 8 and Ulmann; Mühl.-Endz. 'damage, misfortune'), fr. MLG schade 'damage' (11.28). Mühl.-Endz. 3.879.

6. Russ. ubytok, cpd. formed with u- 'away' as opp. to dobytok 'acquisition, (acquired) possessions', ChSl. pribytŭkŭ, SCr. dobitak 'profit, gain', etc. (11.73). Berneker 113.

7. Skt. kṣaya-, lit. 'destruction, decrease' : kṣi- 'destroy' (11.27), etc. Walde-P. 1.505.

Av. afša- (Vd. 13.10 aδāṯ paiti afšə čikayaṯ 'then he shall pay for the loss', of one who has injured a watch-dog so that the property is stolen) : Skt. apvā- 'a disease' (RV), Lith. opus 'sensitive (to pain)'. Walde-P. 1.47. Barth. 103.

NE lease and rent (and several of the other words listed) are used both of the owner who lets out property and the one who receives it on rental, only let in connection with property being unambiguous. There is some tendency now to prefer lease in the former and rent in the latter use (though rent is the popular word for both), and we shall adopt this distinction as a matter of convenience in the following discussion, using 'lease' for the notion in 11.75 and 'rent' for that in 11.76.

For the most part, though not universally, 'lease' and 'rent' (as defined above) are expressed by the same or by differentiated forms (voice, cpds.) of the same word. In some cases the former, in some the latter, use is the original.

Only the more general terms which may refer to any kind of property rented are listed. Those which apply only to the rental or 'farming out' of land for agricultural purposes are omitted, e.g. words like Fr. affermer, NHG pachten (and verpachten), Eng. farm (in the older sense), Lith. randuoti, etc.

1. Grk. μισθόω, fr. μισθός 'wages, pay' (11.78).

Grk. ἐκδίδομαι, mid. of ἐκδίδωμι 'give out', is sometimes 'let out' for hire (Hdt.+, so NT).

Byz., NG ἐνοικιάζω, fr. ἐνοίκιον 'house-rent', sb. fr. adj. ἐνοίκιος 'in the house'.

2. Lat. locāre (> Fr. louer), orig. 'to place', fr. locus 'place'. Ernout-M. 559. Walde-H. 1.817. REW 5094.

It. affittare, fr. affitto 'rental' (esp. of land), cpd. of fitto 'rental' (now mostly 'horse-hire'), this sb. to adj. fitto 'thick, close', fr. Lat. fīctus (Varro) pple. of fīgere 'fix, infix'. REW 3280.

It. appigionare (or dare a pigione), fr. pigione 'rent', fr. Lat. pēnsiō 'payment' (fr. pendere 'pay', 11.65), late 'rent'. REW 6393.

Sp. alquilar, fr. alquiler 'wages, rent', loanword fr. Arab. kirāʾ 'pay, rent'. REW 4703a. Lokotsch 1181.

Sp. arrendar (but esp. 'lease land'), fr. Cat. arrendar, cpd. : Sp. rendir, etc. 'return, give back' (11.22). REW 7141.

Rum. închiria, fr. chirie 'rent, hire', fr. Arab. (through Turk.) kirāʾ 'pay, rent' (cf. Sp. alquilar, above). Tiktin 344. Lokotsch 1181.

3. Ir. tabraim ar fochruic (of land, Laws 3.127, 129, 131, etc.), lit. 'give on pay', with fochricc 'pay, reward, wage' (11.78).

NIr. leigim ar ghabhāil, lit. 'let on taking' with gabhāil vbl. n. of gabhaim 'take' (11.13).

W. ardrethu, fr. ardreth 'rent, toll, revenue', lit. 'over-tax', cpd. of treth 'tax' (11.69) with ar 'upon, over' (but often with mere intensive force).

W. rhentu, fr. NE rent. Parry-Williams 119.

Br. feurmi, fr. feurm 'rent', loanword fr. Fr. ferme 'leasing (of land), farming out'.

4. Goth. anafilhan (renders ἐκδίδομαι Mk. 12.1, Lk. 20.9 'let out', of the vineyard), so also OHG bifelahan ('locare' Tat. 124.1, 4), both mostly 'give over, entrust', cpds. of Goth. filhan 'hide, bury', OHG felahan 'bury' : OE befēolan 'commit, deliver, grant', ON fela 'hide, cover', etc. (4.78, 12.27).

ON selja ā leigu, lit. 'give (sell) on hire, rent', with leiga : leiga (vb.) 'rent' (11.76).

Dan. leje (ud), see leje 'rent' (11.76).

Sw. (ut)hyra, ME hire (e.g. Wyclif Mk. 12.1 for 'let out'), Du. verhuren, see under 'hire' (11.77).

OE lǣtan, ME, NE let (in this sense quoted from 909 in NED s.v. let, vb.[1] 8) = OE lǣtan 'leave', etc. (11.34).

OE gesettan (with mid renders locāre Mk. 12.1, Lk. 20.9), lit. 'set, place'.

ME lese, NE lease, fr. OFr. lesser, Fr. laisser 'let, leave' (11.34).

NE rent, earlier (ME) 'provide with revenue, endow', fr. ME rente 'source of revenue, revenue, income' (11.71), later 'rent'.

MHG, NHG vermieten, cpd. of OHG miaten, etc. 'rent' (11.76).

5. Lith. samdyti : samdas 'hire, rental', cpd. of IE *som- (Skt. sam-, etc.) 'together' and root *dhē- 'place, put', cf. Skt. samdha- 'union', etc. Walde-P. 1.827, 2.490. Cf. SCr. posuditi 'lend', etc. (11.61).

Lett. izīrēt, iznuomāt, cpds. of īrēt and nuomāt 'rent' (11.76).

6. ChSl. vŭdati (for ἐκδίδομαι 'let out' Mk. 12.1, etc.; mostly for ἀποδίδωμι 'give over, pay', etc.), cpd. of dati 'give'.

SCr. iznajmiti, Boh. pronajmouti, Pol. wynająć, cpds. of SCr. najmiti, etc. 'rent' (11.76).

SCr. dati u najam, Russ. otdat' vnaem, SCr. dati pod kiriju, all lit. 'give in rent'.

7. Skt. ā-dhā- 'give, lend', etc., prob. used also for 'lease'. Cf. sb. ādhi- 'pledge', etc. used for 'rent' (Āpast. 1.18.20).

Verbs for 'hire' with reference to persons, are mostly used also in the sense 'rent' of objects, and have been already discussed (11.76). A few, which are used entirely in the former sense or belong here primarily, are discussed here.

1. NG *μισθώνω*, in form fr. Grk. *μισθόω* 'lease' (11.75), but semantically as if a new deriv. of *μισθός* 'wages', and used mostly for 'hire' (persons).

2. It. *prendere a servizio* (used of hiring servants, etc.), lit. 'take in service'.

It. *fissare*, lit. 'fix', hence also 'come to an agreement, engage, hire', fr. VLat. **fīxāre*, fr. *fīxus* pple. of *fīgere* 'fix, fasten'. REW 3335.

Fr. *engager*, fr. *gage*(*s*) 'wages' (11.78).

Rum. *tocmi*, lit. 'bring to order, agree, stipulate', fr. Slavic, ChSl. *tŭkŭmiti* 'compare, liken'. Tiktin 1619.

3. Ir. *gaibim ar faichill* (quotable ?), lit. 'take on wages'; cf. *ocus ni fuil ar cur na ar faichill* 'and (if) he is not on placement or hire' (Laws 3.384 1.17), with *foichell* 'wages, pay' (11.78).

NIr. *fostuighim*, lit. 'fasten, hold, secure' (cf. *fosta* 'prop, buttress'), hence also 'engage, hire'.

W. *hurio*, fr. NE *hire*.

Br. *gopra*, fr. *gopr* 'wages, pay', (11.78).

4. OE (*ā*)*hȳrian*, ME, NE *hire*, MLG *hūren* (> Dan. *hyre*, Sw. *hyra*), Du. *huren* (MHG *hūren* 'hire' a horse and wagon, NHG *heuren* 'hire' esp. sailors), all primarily 'hire', but several also 'rent' (11.76) or even 'lease' (11.75), etym.? NED s.v. *hire*, vb. Falk-Torp 445. Weigand-H. 1.859.

OHG *gileiten*, lit. 'lead', but twice 'hire' in Tat. 109.1 after Lat. *condūcere*.

OHG, MHG *dingen* 'negotiate' (esp. in a court), settle by agreement' (fr. OHG *dinc* 'legal negotiation'), then esp. 'take into one's service on agreed terms, engage', in NHG 'hire' (formerly a horse, carriage, etc., now persons, esp. workmen; *mieten* still 'hire' of personal servants). Paul, Deutsches Wtb. 109, 349).

5. Lett. *derēt*, lit. 'come to an agreement' : Lith. *derėti* 'bargain', etc. Mühl.-Endz. 1.456.

6. Russ. *rjadit'* : *rjad* 'row, range, order', ChSl. *rędŭ* 'order', etc.

Many of the words for 'wages, pay' (for work done), including an inherited group, rest on the more generic notion of 'reward'. Others are simply 'pay', derivatives of the verbs for 'pay'. Some are from notions like 'pledge, bargain, price', etc.

Besides the generic terms there are others of more restricted scope. Thus NG *μεροκάματο* 'day's work' and 'day's wages', similarly Sp. *jornal*, SCr. *nadnica* (cf. It. *mesata* 'month's wages', etc.). For 'soldier's pay', Lat. *stipendium*, whence NE *stipend* formerly 'soldier's pay', but now applied to the pay of clergymen, professors, etc. (cf. NED) where *salary* would be U.S. usage, similarly It. *stipendio*, etc.; cf. also below, It. *salario*, etc. and It. *soldo*, etc.

The application to particular classes is highly idiomatic. For example the pay of a university professor is *stipend* in England (cf. NED) but *salary* in U.S., *traitement* in France, *stipendio* in Italy, *gehalt* in Germany, etc. Such special terms (for the great variety in French, cf. Vendryes, Le langage 263) are omitted in the following, except so far as they have become more generic.

1. IE **mizdho-* in words for 'reward' and 'wages, pay', root connection? Walde-P. 2.301. Feist 364 f.

Grk. *μισθός*; Goth. *mizdō*, OE *meord*, and *mēd* (NE *meed* poet. 'reward'), OHG *miata*, MHG *miete* (NHG mostly 'rent'), OS *mēda*; ChSl. *mĭzda*, Boh. *mzda* (Russ. *mzda* 'reward, profit', Pol. obs.); Skt. *mīḍha-* 'contest', Av. *mīždа-* 'reward' (always in religious sense), NPers. *muzal* 'reward, wages'.

2. Lat. *mercēs, -ēdis*, also 'price payed for merchandise' : *merx, -cīs* 'merchandise', *mercārī* 'trade', outside connections? Walde-P. 2.283. Ernout-M. 611. Walde-H. 2.78 f.

It., Sp. *paga*, Fr. *paye*, fr. It. *pagare*, etc. 'pay' (11.65).

Fr. *gages* ('wages' of a domestic), pl. of *gage* 'pledge' (11.67).

'Earn' in the sense of 'get by labor' (NE *earn wages, earn one's bread*, etc.) is in many languages merely covered by the more generic 'get' or 'gain'. This is probably the case also where no words are entered in the list. Where there are more distinctive terms, they are mostly based on the notion of labor or service.

Even where there are such, the use of 'get' or the like may be the more colloquial, e.g. NE *how much do you get a day?*

1. Grk. *μισθοφορέω* and *μισθαρνέω*, cpds. of *μισθός* 'wages' with *φορέω* 'carry, bear' or *ἄρνυμαι* 'win, gain', are used for 'receive wages, work for wages', but not with other object of the amount earned.

Grk. *κτάομαι* 'get, obtain' (11.16) or *ἄρνυμαι* 'win, gain' would cover 'get by labor, earn'.

NG *κερδίζω*, or *κερδαίνω*, fr. *κέρδος* 'gain, profit' (11.73), is 'gain' by business or by labor.

NG *βγάζω*, aor. *ἔβγαλα* (fr. Grk. *ἐκβάλλω*) 'take out', etc., also 'earn', as *βγάζω τὸ ψωμί μου* 'I earn my bread'.

2. Lat. *merēre* 'deserve, gain, earn' : Grk. *μέρος* 'share', *μείρομαι* 'receive one's share', etc. Walde-P. 2.690. Ernout-M. 609 f. Walde-H. 2.75 f.

It. *guadagnare*, Fr. *gagner*, Sp. *ganar*, Rum. *cîstiga*, all 'gain' and 'earn', see sb. 'gain, profit' (11.73).

There are two main lines of development in the history of words for 'buy' and 'sell'. Either they are derived from some notion common to both, as 'trade', 'price', 'tradesman', 'market place', with differentiation into 'buy' or 'sell', which are therefore often expressed by cognate forms. Or, conversely, words for 'take, obtain' and 'give', by absorbing the notion of trade from the situation, are specialized to 'take in trade, buy' and 'give in trade, sell'.

1. IE k^w*rei-*, k^w*rī-*. Walde-P. 1.523 f.

Grk. aor. *ἐπριάμην* (reg. aor. for 'buy' Hom.+ and in dialects); Ir. *crenim*, W. *prynu*, Br. *prena* 'buy'; ORuss. *krĭnuti*, *krenuti* 'buy' (Berneker 633); Skt. *krī-* 'buy', *vi-krī-* 'sell', NPers. *xarīdan* 'buy' (no Av. form quotable). Cf. OLith. *krieno* (gen.) 'pretium pro sponsis', Lett. *kriens* 'bridal gift', Toch. B *kāry-* 'trade' (vb.), sbs. A *kuryar*, B *karyor* 'trade', A *kuryart* 'trader' (SSS 6, 12).

2. IE **per-*, prob. the same ultimately as that in words for 'pass through, travel', as Grk. *περάω*, Goth. *faran*, etc. Walde-P. 2.40. Pedersen 2.339, 596.

Grk. *πέρνημι*, aor. *ἐπέρασα*, in Hom. always 'sell abroad' (esp. captives), as prose word for 'sell' most common in mid., as perf. *πέπρᾱμαι*, Ion. *πέπρημαι*, hence new pres. *πιπράσκομαι*, later act. *πιπράσκω*; Ir. *renim* 'sell', also vbl. n. *reic*, whence *recaim*, NIr. *reicim* (now less common than *dīolaim* for simple 'sell', but Gael. *reic* the usual word); Lith. *pirkti*, Lett. *pirkt* 'buy'.

3. Derivs. of nouns for 'price', etc.

Grk. *ὠνέομαι* the usual word for 'buy' in the present (aor. *ἐπριάμην*, above, 1), Cret. *ὠνέω* 'sell', fr. *ὦνος* 'price', *ὠνή* 'buying, purchase' : Skt. *vasna-m* 'price', Lat. *vēnum* (or *vēnus?*, nom. not quotable) 'sale' whence *vēnum dare*, *vendere* 'sell' (> the Romance words), IE **wes-no-*, etc., fr. a root **wes-* seen in Hitt. *was-* 'buy', *ussniya-* 'sell'. Walde-P. 1.311. Ernout-M. 1086. Sturtevant, Hitt. Gloss. 171, 178.

Grk. *ἀγοράζω* 'frequent the market place', then 'buy' (Aristoph.+, gradually replacing *ὠνέομαι*), fr. *ἀγορά* 'market-place' (11.85).

Ir. *cennaigim*, NIr. *ceannuighim* 'buy', fr. *cennach* 'purchase' or *cennaige* 'trader' (11.84).

W. *gwerthu*, Br. *gwerza* 'sell', fr. W. *gwerth* 'value, price, sale', Br. *gwerz* 'sale', prob. : Goth. *wairþ*, OHG *werd*, etc. 'value, price' (11.87), Lat. *vertere* 'turn', etc. Walde-P. 1.275. Pedersen 2.526.

ChSl. *věniti sę* 'be sold' (rendering *πωλέομαι* Mt. 10.29, Lk. 12.6) : *věno* 'dowry', Grk. *ἕδνον* 'wedding-gift'. Walde-P. 1.256, 312.

4. Lat. *caupō* 'petty tradesman, huckster, tavern-keeper (Plautus), itself of unknown origin, is the probable, though not undisputed, source of the widespread Gmc. group of words for 'trade, buy, sell, tradesman', etc., whence also the Slavic verb for 'buy'. Cf. the Gmc. loanwords based on Lat. *mangō* 'dealer, trader' (11.83, 11.84). Ernout-M. 465 f. Walde-H. 1.189. Falk-Torp 521. Feist 309. Berneker 647. Stender-Petersen 374 ff.

Goth. *kaupōn* 'carry on business' (*πραγματεύεσθαι*, Lk. 19.3), ON *kaupa* 'bargain, trade, buy', sb. *kaup* 'bargain, pay', Dan. *kjøbe*, Sw. *köpa* 'buy', OE *cēapan* 'trade, bargain', rarely 'buy', sb. *cēap* 'bargain, trade, market, price' (NE adj. *cheap*), Du. *koopen* 'buy', *verkoopen* 'sell', OHG *koufen* (*koufōn, chaufan*, etc.) 'trade, buy, sell', *firkoufen* 'sell', sb. *kauf* 'bargain, trade', *koufo* 'tradesman', NHG *kaufen* 'buy', *verkaufen* 'sell', etc. Hence, prob. through a Goth. **kaupjan*, ChSl. *kupiti*, etc., general Slavic for 'buy'.

5. 'Buy' fr. 'take, obtain'.

Lat. *emere*, orig. 'take' (11.13).

It. *comprare*, OFr. *comperer*, Sp. *comprar*, Rum. *cumpăra*, fr. Lat. *com-parāre* 'prepare, provide, obtain'. Ernout-M. 735. REW 2094.

Fr. *acheter*, OProv. *acapter*, OIt. *accattare*, fr. VLat. **accaptāre*, a recomposition of *acceptāre* 'take, receive' after *captāre* 'strive to seize'. REW 65. Wartburg 1.12.

ME *purchase*, NE *purchase*, in ME mostly 'contrive, obtain', etc., fr. Anglo-Fr. *purchaser* = OFr. *purchasser* 'seek to obtain', cpd. of *chasser* 'chase', fr. VLat. **captiāre*. NED s.v.

6. 'Sell' fr. 'give'.

Grk. aor., *ἀπεδόμην*, fut. *ἀποδώσομαι*, the regular Attic and most widespread terms for 'sell' in these tenses, mid. of *ἀποδίδωμι* 'give back, pay' (11.65).

Lith. *parduoti*, Lett. *pārduot*, ChSl., SCr., Boh. *prodati*, Pol. *przedać*, Russ. *prodat'*, all cpds. of verbs for 'give' (11.21).

ON *selja*, OE *sellan* 'hand over, give' and 'sell' (both senses also in ME), hence, with specialization to 'sell' complete, Dan. *sælge*, Sw. *sälga*, NE *sell* (also LG *sellen* esp. of the small tradesman) : OHG *sellen* 'hand over, give up', Goth. *saljan* 'offer' (sacrifice), caus. of **sel-* in Grk. *ἑλεῖν* 'take'. Walde-P. 2.504. Falk-Torp 1231. Feist 408.

7. Miscellaneous.

Goth. *bugjan* 'buy', *fra-bugjan* 'sell', OS *buggian*, OE *bycgan*, ME *bugge, bigge*, NE *buy*, all 'buy', ON *byggja* 'buy' (a

wife), 'lend' (money), 'let out' (land), root connection (as with Goth. *biugan* 'bend'?) dub. Falk-Torp 121. Feist 111.

Grk. *πωλέω*, the usual word for 'sell' in the present (Hdt.+), NG pop. *πουλῶ*, is according to the prevailing view fr. a root **pel-* seen in Lith. *pelnas* 'profit', OHG *fāli* (beside *feili*) 'for sale', Skt. *paṇ-* 'bet, bargain, buy', etc. (cf. below). Walde-P. 2.51. Boisacq 830. Falk-Torp 202. But in view of the internal relations and the frequent derivation of 'trade' fr. 'travel' (above, 2 and 11.83, 11.84), more prob. a new act. (cf. Cret. *ὠνέω* 'sell' beside *ὠνέομαι* 'buy') to *πωλέομαι* 'go and come, frequent' (Hom.+) : *πέλομαι* 'become', Lat. *colere* 'cultivate', Skt. *car-* 'move', etc. Schrader, Reallex. 1.437.

NIr. *dīolaim* 'pay' and 'sell', see 11.65.

Skt. *paṇ-* 'bet' (cf. *paṇa-* 'gaming, a wager') sometimes also 'bargain, buy' (cf. *paṇyā* 'wares', etc.) and *vi-paṇ* 'sell' : Lith. *pelnas* 'profit', OHG *fāli* 'for sale'. Walde-P. 2.51.

Verbs for 'trade' are in part derived from nouns for 'merchandise', 'merchant', 'commerce, business', or 'market-place'. But several are based on the notion of 'travel', specialized to 'travel for trade' (cf. also NE *traveler* = *commercial traveler*, NED s.v.), and one group is from 'handle'.

1. Grk. *ἐμπορεύομαι*, orig. 'travel (in or to)', then 'travel on business' whence 'trade, import', see *ἔμπορος* 'traveler, merchant' (11.84).

Grk. *πραγματεύομαι* 'transact business, trade' (cf. NT, Lk. 19.13), fr. *πρᾶγμα* 'affair'.

2. Lat. *mercārī*, cpd. *commercārī*, with sb. *commercium* (> It., Sp. *comercio*, Fr. *commerce*, whence the new vbs. It. *commerciare*, Fr. *commercer*, Sp. *comerciar*, all lit. loanwords), fr. *merx* 'merchandise'. Walde-P. 2.283. Ernout-M. 611.

Lat. *negōtiārī* (hence as lit. loanwords It. *negoziare*, Fr. *négocier*, Sp. *negociar*, Rum. *negocia*), fr. *negōtium* 'business, affair', deriv. of phrase like *mihi neg ōtium est* 'I have not leisure' where *neg* is a parallel form of *nec* (**ne-ge*? beside *ne-que*), as in *negāre*, etc. Ernout-M. 659, 664.

It. *trafficare* (> Fr. *trafiquer*, Sp. *traficar*, Rum. *trafica*), fr. *tra-*, Lat. *trāns* 'across' and *ficcare* 'thrust in' (fr. VLat. **fīgicāre*, fr. *fīgere* 'fix', REW 3290), in the sense 'put across, transport' wares). Gamillscheg 856.

Rum. *negustori* deriv. of *negustor*

'merchant', fr. *neguţa* 'traffic, haggle, bargain', fr. Lat. *negōtiārī* (above). Tiktin 1048.

3. Ir. (?), NIr. usually a phrase ('there is trade') with sbs. for 'trade', either *trācht* (also 'treatment, course', etc.; fr. Lat. *trāctus*) or *ceannaidheacht* (fr. *ceannuighim* 'buy'). Cf. also *dīol agus ceannacht* 'selling and buying' (Z. celt. Ph. 9.140.2).

W. *masnachu*, fr. *masnach* 'business, trade', orig.?

Br. *prena ha gwerza* 'buy and sell' = 'trade' (Vallée s.v. *trafiquer*).

Br. *kenwerza*, cpd. of *ken-* 'cum' (cf. Ernault s.v.) and *gwerza* 'sell'.

4. Goth. *kaupōn*, ON *kaupa*, OE *cēapian*, OHG *koufen*, etc., see 11.81, 11.82.

ON *manga*, OE *mangian*, ME *mange*, OS *mangōn*, fr. Lat. *mangō* 'dealer, monger' (who adorns his wares to give them an appearance of greater value), beside *mangōnium* 'displaying of wares', prob. loanword based on Grk. μάγγανον 'means of charming or bewitching'. Walde-P. 2.233. Ernout-M. 588. Walde-H. 2.28 f. NED s.v. *mong*, vb.[1].

ME *marchaunde*, fr. OFr. *marcheander* (Fr. *marchander* 'haggle, bargain'), fr. *marchand* 'merchant' (11.84). NED s.v.

NE *trade* orig. (early NE) 'tread (a path), traverse (the sea), lead (one's life)', etc., then (like Grk. ἐμπορεύομαι, above) 'resort to a place for the sake of business, carry on trade', fr. sb. *trade*, orig. 'course, way, path', fr. MLG *trade* 'track' = OHG *trata* 'track, trace, way', etc. : OE *tredan*, NE *tread*, etc. NED s.v.

Du. *handelen*, NHG *handeln* (> Dan. *handle*, Sw. *handla*), in this sense specialization of more general 'treat', orig. 'handle, touch with the hands', MHG *handeln*, OHG *hantalōn*, fr. *hant* 'hand'. Weigand-H. 1.806. Paul, Deutsches Wtb. 240. Falk-Torp 378.

5. Lith. *pirkliauti*, beside *pirklys* 'merchant', fr. *pirkti* 'buy' (11.81).

Lith. *prekiauti*, fr. *prekė* 'wares, merchandise' (formerly 'trade' and 'price'; see 11.87), this also : *pirkti* 'buy'.

Lett. *tirguot*, fr. *tirgus* 'market place' (11.85).

6. ChSl. *kupljq dějati* (renders πραγματεύεσθαι Lk. 19.13), also *kupljq sŭtvoriti* (διαπραγματεύεσθαι Lk. 19.15), lit. 'make trade', with *kuplja* fr. *kupiti* 'buy' (11.81).

SCr. *trgovati*, Russ. *torgovat'*, fr. SCr. *trg*, Russ. *torg* 'market place' (11.85).

Boh. *kupčiti*, Pol. *kupczyć*, fr. Boh. *kupec*, Pol. *kupiec* 'merchant' : ChSl. *kupiti* 'buy'.

Boh. *obchoditi* or *obchod vesti* (with *vesti* 'lead, carry on') fr. *obchod* 'commerce, business', cpd. of *ob* 'around, about' and *chod* 'passage, gait' (: *choditi* 'go, walk', etc.).

Pol. *handlować*, fr. NHG *handeln*. Brückner 168.

7. Skt. *vāṇijyaṁ kṛ-*, lit. 'make, do trade', with *vāṇijya-* 'trade, traffic', fr. *vaṇij-* 'merchant' (11.84).

Most of the words for 'merchant, tradesman' are connected with those for 'trade', 'buy', or 'market place', discussed elsewhere.

1. Grk. ἔμπορος 'traveler', then 'merchant', esp. one who trades on a large scale, usually but not necessarily by sea, with ἐμπορία and ἐμπορεύω, becoming the usual generic sb. and vb. for 'trade', all : πόρος 'passage, ford', πορεύω 'convey', περάω 'traverse', OE *faran* 'go, travel', etc. Cf. the use of the same root in words for 'sell' or 'buy', Grk. πέρνημι, Lith. *pirkti*, etc. (11.81). Walde-P. 2.39. Boisacq 248.

Grk. κάπηλος, the 'local retail dealer, shopkeeper' (also 'tavern-keeper'), etym.? Boisacq 408.

On the distinction between ἔμπορος and κάπηλος, see now M. I. Finkelstein, Cl. Ph. 30.320 ff.

Grk. πραγματευτής 'merchant' (Plut.+, Byz.), but NG 'small tradesman' or 'pedler', fr. πραγματεύομαι 'trade' (11.83).

2. Lat. *mercātor*, fr. *mercārī* 'trade' (11.83).

Lat. *negōtiātor*, fr. *negōtiārī* 'trade' (11.83), whence also Rum. *negustor* through vb. *neguţa*. Tiktin 1048.

It. *mercante*, older *mercatante*, Fr. *marchant*, (Cat. >) Sp. *mercader*, derivs. of It. *mercato*, Fr. *marché*, Sp. *mercado*, etc. 'market' (11.85). REW 5516.

It. *commerciante*, Fr. *commerçant*, Sp., Rum. *comerciante*, fr. It. *commerciare*, etc. 'trade' (11.83).

3. Ir. *cennaige*, NIr. *ceannaidhe* beside Ir. *cennach* 'purchase' and 'redeeming' (K. Meyer, Contrib. 343), cf. also *cendaige, cendaithe* 'bequest', also 'head-money' (so translated by Atkinson, Laws 1.185), all apparently fr. Ir. *cend*, NIr. *ceann* 'head'. 'Purchase (price)' perh. as 'sum paid per capita'? On suffix cf. Pedersen 2.23.

W. *masnachydd*, fr. *masnachu* 'trade' (11.83).

W. *marsiandwr*, lit. 'merchant-man', *marsiand*, fr. ME *marcha(u)nd*.

Br. *marc'hadour*, fr. *marc'had* 'market' (11.85).

Sw. *handlare*, NHG *händler*, fr. Sw. *handla*, NHG *handeln* 'trade' (11.83).

ME *marcha(u)nd*, NE *merchant*, fr. Fr. *marchant* (above, 2).

NE *trader, tradesman*, fr. vb. *trade* (11.83).

5. Lith. *pirklys*, fr. *pirkti* 'buy' (11.81).

Lith. *prekiautojas*, fr. *prekiauti* 'trade'

(11.83), and *prekijas*, fr. *prekė* 'merchandise', both neologisms, given by NSB s.v. *kupčius*.

Lith. *kupčius* (formerly the usual word), fr. Pol. *kupiec* (below).

Lett. *tirguotajs*, also *tirguonis*, fr. *tirguot* 'trade' (11.83).

6. ChSl. *kupĭcĭ*, Boh., Russ. *kupec*, Pol. *kupiec*, fr. ChSl. *kupiti*, etc. 'buy' (11.81).

SCr. *trgovac*, Russ. *torgovec*, fr. SCr. *trgovati*, Russ. *torgovat'* 'trade' (11.83).

Boh. *obchodník*, fr. *obchoditi* 'trade' (11.83).

7. Skt. *vaṇij-* (also *vāṇij-, vaṇija-*, etc.), perh. fr. **vṛṇij-* : OE *waru* 'wares', *weorþ* 'worth, price', etc., but doubtful. Uhlenbeck 268. Wackernagel, Altind. Gram. 1.192.

Words for 'market place' are partly connected with words for 'trade', and partly specialized from 'meeting place' or 'open place'. The spread of loanwords is extensive.

1. Grk. ἀγορά, orig. (and so only in Hom.) 'assembly, place of assembly' : ἀγείρω 'gather, assemble'.

NG παζάρι, fr. Turk. *pazar*, this fr. Pers. *bāzār* 'market' (etym.? Horn 166). The Persian word has been the source of a general Eur. borrowing, used more or less generally for 'market' as Russ. *bazar*, or with restricted use as NE *bazaar*, Fr., Sp. *bazar*, It. *baz(z)ar*. Lokotsch 278.

2. Lat. *forum*, orig. prob. 'inclosure about a house, court' (cf. its old use for 'forecourt before a tomb'), then in general 'public place, open market place' : ChSl. *dvorŭ* 'court' and the words for 'door', Lat. *forēs*, Grk. θύρᾱ, etc. (7.22). Ernout-M. 378, 383. Adversely Walde, IF 39.75 ff., Walde-H. 1.537 f.

Lat. *mercātus* 'trade' and 'market place' (> It. *mercato*, Fr. *marché*, Sp. *mercado*) : *mercārī* 'trade' (11.83). REW 5516.

Rum. *tîrg*, fr. Slavic, ChSl. *trŭgŭ*, etc. (below, 6).

3. Ir. *cēte* 'market, fair, gathering' (K. Meyer, Contrib. 356), NIr. *cēide* 'an assembly, a fair' (Dinneen 183), etym.?

The place where goods are sold is *shop* in British, but *store* in native U.S. and colonial usage. The words are in only a few cases connected with words for 'sell' or 'trade'. Several are from the notion of 'storehouse', some of these still used preferably for the larger establishments (as Fr. *magasin*, NE *store* in British use). Others are from various terms appropriate to the antecedent crude form, as 'hut, tent, booth, stall, shed, corner'.

1. In Grk. there was no generic term in common use (πωλητήριον : πωλέω 'sell' being rare, and ἐργαστήριον mostly 'workshop'), but rather specific words. Thus with suffix -εῖον words for the place where particular articles were made (and sold), as ἀρτοκοπεῖον 'bake-shop', καπηλεῖον 'huckster's shop, tavern' (κάπηλος 'huckster, tavern keeper'), and cpds. in -πώλιον or -πωλεῖον, as κρεοπώλιον 'butcher's shop', ἀρτο-πώλιον 'baker's shop'.

NG pop. μαγαζί, fr. Turk. *magaza*, this fr. Arab. *maḫzan* 'storehouse, barn'. Cf. Fr. *magasin*, etc. below.

NG κατάστημα, class. Grk. 'state, condition', now esp. 'shop, store'. Cf. the

occasional use of NE *establishment* for a 'business house'.

2. Lat. *taberna*, orig. 'hut (of boards)' then 'booth, shop, workshop' and esp. 'inn, tavern' (in this sense in Romance, It. *taverna*, Fr. *taverne*, etc.), prob. fr. **traberna* : *trabs* 'beam', Ir. *treb* 'dwelling', etc. Walde-P. 1.757. Ernout-M. 1011, 1050 (suggesting also possibility of Etruscan origin).

It. *bottega*, Fr. *boutique* (Sp. *bodega* 'wine shop, storehouse', *botica* 'drug store'), fr. Grk. ἀποθήκη 'storehouse' (ἀποτίθημι 'put away'). REW 531.

It. *negozio* 'trade, business', also 'place of business, shop', fr. Lat. *negōtium* 'business, affair' (cf. *negōtiārī* 'trade', 11.83).

It. *magazzino* (but chiefly 'storehouse, warehouse'), Fr. *magasin* (> Rum. *magazin*, Russ. *magazin;* also NE *magazine* in *powder-magazine*, but mostly through 'storehouse of information' to current use), Sp. *almacén*, all orig. Although *store* definitely replaced *shop* in this sense (*shop* only as *workshop*, *blacksmith's shop*, etc.) and was the only term so used in my boyhood, the vb. *shop*, *go shopping* remained usual, and recently the sb. *shop* has been coming back, esp. for the more fashionable *shops* in the cities.

The 'price' of an article is at least assumed to be its 'value', and many of the words for 'price' are such as were used also for 'worth, value' in general. Several of these and some of the others involve the notion of 'return' or 'recompense'. The spread of Lat. *pretium* has furnished a more distinctive word to most of the western European languages.

1. Grk. ὦνος (reg. word for 'price' in Hom.) : Skt. *vasna-m* 'price' (RV, AV), Lat. *vēnum* 'sale', etc. (11.81, Grk. ὠνέομαι).

Grk. τῑμή, also 'worth, honor, reward, penalty' : τίω 'estimate, value, honor', τίνω 'pay', etc. (11.65).

Grk. ἀξία, mostly 'worth, value', also 'money-value, price' : ἄξιος 'of like value, worth(y)', lit. 'weighing as much', fr. **ἄγ-τιος* : ἄγω 'lead', but also 'draw down the scales, weigh'. Walde-P. 1.36. Boisacq 65.

2. Lat. *pretium* (> It. *prezzo*, Fr. *prix*, Sp. *precio*, Rum. *preţ;* OFr. *pris* > Br. *priz*, ME *pris* [> W. *pris*], NE *price*, MLG *prīs* [> Dan., Sw. *pris*], Du. *prijs*, MHG *prīs*, NHG *preis*), prob. as orig. 'return, recompense' neut. of an adj. **pretios* fr. the IE prep. **preti*, **proti* in Skt. *prati* 'against, back', ChSl. *protivŭ* 'towards', etc. (these fr. IE **per*, *pro*, etc. and so ultimately connected with Grk. πέρνημι 'sell', Lith. *pirkti* 'buy', etc., 11.81; but this remote formal connection is without bearing upon the semantic development). Walde-P. 2.38. Ernout-M. 808. REW 6746. Falk-Torp 850.

3. Ir. *lōg, lūag* (also 'value'), NIr. *luach* (also 'value, cost') : W. *golud* 'riches' (11.42), Goth. *laun*, etc. 'wages' (11.78), etc. Walde-P. 2.380. Pedersen 1.54.

Lith. *kaina* is now the accepted word for 'price', whence vb. *kainoti* 'cost' in *kiek kainoja* 'how much does it cost?', etc. Cf. NSB and Hermann, Lit.-deutsches Gesprächsb. 144. Lalis and Kurschat have *prekė* or *prekia* for 'price', but this is now 'wares' like Lett. *prece* (: Lith. *pirkti* 'buy', etc.). Fraenkel, Z. sl. Ph. 6.87.

Br.	*ker*	NHG	*teuer*		

A few of the words listed are derivatives of those for 'price', 'cost, expense', or the like; and a few come through the notion of 'stingy'. But the most widespread development is from 'dear, beloved' or 'esteemed, worthy' through 'highly valued' to 'dear, expensive'. This may rest in part, but not wholly, on semantic borrowing from Lat. *cārus*. There is no trace of such use of Grk. φίλος.

Omitted are the words which, while meaning literally 'costly', are not the common words for 'dear' as applied to an article for sale, but are used mostly in in a figurative sense, more nearly 'costly', 'precious' or 'extravagant'. Thus Lat. *pretiōsus* fr. *pretium* 'price' and sometimes 'dear, expensive', but mostly 'valuable, precious'; and the numerous derivatives of It. *costo*, etc. 'cost' (11.72), as It., Sp. *costoso*, OFr. *costeus* (> ME *costouse* > W. *costus*), Fr. *coûteux*, NE *costly*, NHG *kostbar*, etc.

1. Grk. πολυτελής, cpd. of πολύ 'much' and last member fr. τέλος 'tax, toll, duty' (11.69).

Grk. τῑμιος, fr. τῑμή 'price' (11.87).

NG ἀκριβός, fr. class. Grk. ἀκριβής 'exact, precise, accurate' then (fr. 'exact in money matters') 'parsimonious, stingy' and hence 'dear' (as SCr. *skup*, below).

2. Lat. *cārus* (> It., Sp. *caro*, Fr. *cher*) 'dear' = 'beloved' (16.28) and 'expensive' (Plaut. in both senses).

Rum. *scump*, fr. Slavic, cf. Bulg. *skąpŭ*, etc. below, 6.

3. Ir. *lōgmar*, cpd. of *lōg* 'price' and *mār, mōr* 'great'.

NIr. *daor*, fr. ME *dere*. Macbain 123 (quoting Stokes). But undoubtedly confused with *daor* 'enslaved' and hence *saor* 'free' acquires the sense 'cheap' as antonym of *daor*.

W. *drud*, 'dear' fr. earlier sense 'mad, bold, daring, reckless, grievous' (Spurrell); MIr. *drūth* 'mad, foolish', orig. dub. Loth, RC 38.174 f.

Br. *ker* 'dear' in both senses, MBr. *quer*, fr. Norm. Fr. *quer* = Fr. *cher* (above). Henry 63.

4. Goth. *galaufs* = πολυτελής 'expensive', also *filu-galaufs* = πολύτιμος 'very precious' : *liufs*, ON *ljūfr*, etc. 'dear, beloved' (16.28).

ON *dȳrr*, Dan., Sw. *dyr*, OE *dēore*, OHG *tiuri*, etc. in early periods 'esteemed, valued, worthy' (later 'dear, beloved') and 'dear, expensive', etym. dub. Falk-Torp 172. Weigand-H. 2.1040 f.

In parts of the U.S. *dear* is not the colloquial word, but rather *high* = 'high-priced'.

NE *expensive* (in U.S. less restricted than in England), fr. a Lat. type **expensīvus*, fr. *expendere* 'spend', but associated with *expense* (11.72). NED s.v.

Some of the words for 'cheap' are formed as opposites (negative compounds or otherwise) to those for 'dear', but most of them are unrelated to the latter. They rest on notions like 'good trade, bargain', 'abundant', 'fair, reasonable', or 'easy, light'.

Some of the words for 'cheap' are used also as derogatory terms, as Lat. *vīlis* (hence mostly 'vile' in its derivs.), NE *cheap*, but this is by no means general (and quite the opposite in NHG *billig*, in accordance with its origin).

1. Grk. εὐτελής, cpd. of εὐ- 'well' and τέλος 'tax, toll, duty' (11.68), hence 'easy to pay for', opp. to πολυτελής 'dear'.

Grk. εὔωνος, cpd. of εὐ- and ὦνος 'price' (11.87).

NG pop. φτηνός, lit. εὐθηνός, through 'abundant' fr. post-class. εὐθηνός 'thriving, flourishing', beside class. Grk. εὐθηνία 'prosperity, plenty', εὐθηνέω, εὐθενέω

'thrive', etc., prob. : Skt. *ghana-* 'compact, firm', Lith. *gana* 'enough', etc. (13.18).

2. Lat. *vīlis* (> It. *vile,* sometimes 'cheap' but mostly 'mean, vile'), etym. dub. Walde-P. 1.214, 312. Ernout-M. 1108.

It. *a buon mercato,* Fr. (*à*) *bon marché,* lit. 'at good trade', with *mercato, marché* 'trade (= sale, purchase), market' (11.85).

Sp. *barato,* fr. *baratar* 'buy a thing at less than its value' : It. *barattare* 'exchange', OFr. *barate* 'strife, trade, deceit', etc., a widespread group, including NE *barrat* (obs.) and *barter,* but of uncertain orig. 3. Ir. word for 'cheap'?

NIr. *saor,* orig. 'free' (19.44). The sense 'cheap' is prob. acquired by contrast with *daor* 'enslaved, captive' and 'dear, expensive' (11.88). The sense 'free' lent itself readily to 'cheap' (cf. W. *rhad*).

W. *rhad,* orig. 'gratuitous, free' = sb. *rhad* 'grace, gift' (fr. adv. and predicate noun constructions as *yn rhad* 'gratis') : Ir. *rath* 'grace, reward, success, result', etym. dub. Stokes 225. Pedersen 1.144. Thurneysen, Gram. 131.

'Place' is understood here in the wide sense of NE *place* (sb.). Besides the words listed as the most important, there are many others which are used for 'place' mainly in the geographical sense, 'region' or 'town', as NG μέρος (properly 'part', 13.23), Sp. *paraje* (: *parar* 'stop'), etc.

1. Grk. τόπος, etym. dub., perh. : Lith. *tapti* 'become', Lett. *tapt* 'become, attain', OE *þafian* 'consent to, allow' (as orig. 'give place to', like NE *allow* through Fr. *alouer* fr. Lat. *adlocāre*). Walde-P. 1.743. Boisacq 975.

2. Lat. *locus,* early *stlocus* (Festus), etym. disputed, but prob. (**stl-o-ko-*) fr. the root **stel-* in OHG *stellan* 'set up', etc. (12.12). Walde-H. 1.818. In most of the languages cited there is no single word of such general application as NE *put,* but rather a variety of expressions the choice of which depends on the nature of the object and the position it is placed in, but with variable idiomatic usage and much overlapping.

In derivs. of IE **dhē-* the meaning 'put, place' is inherited, and nothing further can be said of its origin. Of the other words, some are derived from nouns meaning 'place' (12.11). But most of them come by generalization of more specific notions, esp. 'cause to sit, lie, or stand' or 'throw' or 'thrust'. Such sources are illustrated in NE *set, lay, stand* (trans.), of which the transitive use of *stand* (recent and colloq., NED s.v. 65) is restricted to 'put in an upright position' and 'lay' is mostly 'put in a lying position' (one may *lay* a book down or *stand* it on edge), while in *set* the original notion of 'make sit' is only rarely present.

In general, words of the 'set' and 'lay' group were commonly or frequently used without reference to the original sense, and to a less extent those of the 'stand' group. In the Gospels Goth. *lagjan,* OE *lecgan,* OHG *leggan* were commonly used (beside Goth. *satjan,* etc.) to render Grk. τίθημι or Lat. *pōnere.* So also regularly ChSl. *položiti* (vs. *postaviti* for ἵστημι, Jagic, Entstehungsgesch. 381).

1. IE **dhē-.* Walde-P. 1 826 ff. Walde-H. 1.440 ff. Here as 'put', Grk. τίθημι, NG θέτω (new pres. to late aor. ἔθεσα, Hatzidakis, Μεσ. 1.315 ff.; also τοποθετῶ, cpd. with τόπος 'place'); Lith. *(pa)dėti,* Lett. *dēt* (but mostly in special phrases, Mühl.-Endz. 1.464); ChSl. *děti,* etc., general Slavic, but not usual for 'put', mostly in some secondary senses, 'do, make' or 'say' (Berneker 192); Skt. *dhā-,* Av. *dā-;* Hitt. *dāi-;* Toch. A *tā-, tās-,* B *tes,* etc. (SSS 438). Here also Lat. *condere* 'found', etc., *facere* 'do, make', OE *dōn* 'do' etc. (9.11).

2. NG βάζω, aor. ἔβαλα, the pop. equivalent of NE *put,* fr. Gr. βάλλω 'throw', which is also occasionally 'put' (LS s.v. A II 6). The same semantic development in Fr. *mettre,* etc. (below, 3) and NE *put* (below, 5). The present βάζω (more usual than βάλλω, for which also βάνω, βαίνω) is explained by Hatzidakis, Einleitung 410 and 'Αθηνᾶ 22.232 ff., as a blend with βιβάζω 'lift up'.

3. Lat. *pōnere,* fr. **po-s(i)nere* (cf. pple. *positus*), cpd. of **po-* (= Lith. *pa-,* ChSl. *po-*) and *sinere* in old sense of 'place' as in pple. *situs* 'placed', hence orig. 'put down, put aside'. Outside connections of *sinere* doubtful. Walde-P. 2.461. Ernout-M. 787, 945 f.

Hence It. *porre,* Sp. *poner,* Rum. *pune,* all in general sense, but Fr. *pondre* only in specialized sense of 'lay eggs', which also occurs elsewhere. REW 6647.

Lat. *conlocāre, collocāre* (> It. *collocare,* Sp. *colocar;* VLat. development in Fr. *coucher,* Rum. *culca* 'put to bed', Sp. *colgar* 'hang', REW 2052), cpd. of *locāre,* deriv. of *locus* 'place' (12.11).

It. *mettere,* Fr. *mettre,* fr. Lat. *mittere* 'let go' (whence the usual but secondary 'send'), 'throw' (*hastam, lapides,* etc.), 'put forth' (*radices, florem,* etc.), in late Lat. 'put forth, put in, put'. Cf. *manum autem nemo mittit ad tangendum* (Peregrinatio), [*ova*] *ut in tepida acqua mittantur* (Anthimi de observatione ciborum epistula), *mittis et modicum sale* (Oribasius), etc. Ernout-M. 621. REW 5616.

Fr. *poser,* fr. Lat. *pausāre* 'pause, rest', whence in late Lat. also 'cause to rest, put down' (cf. It. *posare* 'lie' and 'lay'), in this sense possibly, though not necessarily, influenced by forms of Lat. *pōnere* like *positus.* REW 6308. Gamillscheg 710.

Fr. *placer,* deriv. of *place* 'place' (12.11).

Rum. *băga,* esp. 'put in, thrust in', with numerous idiomatic uses similar to those of NG βάζω (above, 2), or its cpd. μπάζω (bazo) 'put in'. Some connection with the latter seems likely, though no explanation of the Rum. *g* is apparent. Tiktin 143 mentions βάζω, but not μπάζω.

4. Ir. *cuirim* (suppl. vb. *fo-cerd-*) 'throw' and 'put', NIr. *cuirim* 'put', perh. : Grk. σκαίρω 'skip, frisk', Skt. *kūrd-* 'jump', in any case with Irish development of 'put' from 'throw'. Walde-P. 2.567. Pedersen 2.498 ff.

Ir. *fo-rimim, fuirmim* : Goth. *rimis* 'rest', Lith. *rimti* 'become quiet', Grk. ἠρέμα 'gently', Skt. *ram-* 'stand still, rest', IE **rem-.* Walde-P. 2.372. Pedersen 2.602. Laws, Gloss. 432.

W. *dodi,* etym.? (Morris Jones 332, fr. IE **dō-* 'give' or **dhē-* 'place'; not included by Walde-P. or Stokes with either).

W. *gosod,* MW *gossot,* prob. a deriv. (through an abstract in *-otā,* for which cf. Pedersen 2.36 ff.; change to masc. gender as in all verbal nouns, Morris Jones 395 ff.) of an adj. **goss,* this fr. **upo-sto-,* parallel to Ir. *ross,* W. *rhos,* fr. **pro-sto-,* and other like derivs. of IE **stā-* 'stand' (Walde-P. 2.604). G. S. Lane, Language 13.24 f.

Br. *lakaat,* fr. Lat. *locāre* (above, 3). Loth, Mots lat. 180.

5. Goth. *(ga)satjan,* ON *setja,* Dan. *sætte,* Sw. *sätte,* OE *settan,* ME *sette,* NE *set,* Du. *zetten,* OHG *sezzen,* NHG *setzen,* caus. of Goth. *sitan* 'sit', etc. (12.13).

Goth. *(ga)lagjan,* ON *leggja,* Dan. *lægge,* Sw. *lägga,* OE *lecgan,* ME *leye,* NE *lay,* Du. *leggen,* OHG *leggan,* NHG *legen,* caus. of Goth. *ligan* 'lie', etc. (12.14).

Dan. *stille,* Sw. *ställa,* OHG *stellan,* MHG, NHG *stellen* (OE *stellan* mostly 'stand'), fr. **stalljan* : Grk. στέλλω 'make ready, fit out' and 'send', Skt. *sthal-* 'stand' (Dhātup.), etc., IE **stel-* beside **stā-* 'stand'. Walde-P. 2.643 ff. Falk-Torp 1167. Weigand-H. 1.963.

ME *pute,* NE *put* (same word as *put* in golf with differentiated pronunciation), fr. OE **pūtian, potian, pyten* 'thrust, push' : Sw. dial. *putta* 'strike, knock', Norw. dial. *pota* 'prick, poke', etc., perh. of imitative origin. Walde-P. 2.119. Falk-Torp 841. Grk. ἵσταμαι, beside trans. ἵστημι; new pres., formed to perf. ἕστηκα in στήκω (NT), NG στέκω (Hatzidakis Μεσ. 1.279); Lat. *stāre* (> It. *stare,* OFr. *ester,* Sp. *estar,* Rum. *sta,* mostly in secondary sense 'be', etc.; for 'stand' in phrases); Ir. *duairsiur* fr. cpd. of reduplicated form (Pedersen 2.628 ff.), NIr. *seasuighim* : *seas,* MIr. *sessam* 'standing' (sb.) fr. reduplicated form (Pedersen l.c.); here also with *m-* suffix (Walde-P. 2.606. ChSl. *stati, staną* 'take a stand' (rendering Grk. aor.), but Boh. *stati,* Pol. *stać* simply 'stand'; Skt. *sthā-,* Av. *stā-.*

2. In the Romance languages where the derivatives of Lat. *stāre* have so expanded their use, 'stand' in the literal sense of 'be standing' is generally expressed by phrases with words for 'feet' or 'upright'. Thus It. *stare* (*essere*) *in piedi,* Fr. *être* (*rester*) *debout,* Sp. *estar de pie, tenerse derecho,* Rum. *sta in picioare.*

[1] The root is given in this form **stā-,* here and elsewhere, to avoid repeating the clumsy **st(h)ā-.* Furthermore, the Skt. *th* is due to some special cause—according to current theory, the former presence of a voiceless laryngeal. Similarly **stel-,* not **st(h)el-.*

Words for 'remain, stay' (in one place as opposed to 'move, go') coincide in part with those for 'remain' = 'be left over' (12.17), the development being mostly from the first to the second, but sometimes the opposite. Furthermore, just as words for 'remain' may be used for 'await, wait for' (as Grk. *μένω* Hom. Il. 16.620, etc., Lat. *manēre hostem*, OPers. *mām amānaya* 'awaited me'), so conversely there is a group of words which, from such notions as 'watch, look for, hope for', have come to mean 'wait for' and may then be used also intransitively for 'wait' closely approaching 'remain, stay'. Hence such words are added in the list, even though most of them are still distinguished in feeling and range of use from those given in the first place.

1. IE *men- 'remain', to be distinguished from *men- 'think', even though they may be ultimately the same. Walde-P. 2.267. Ernout-M. 587. Walde-H. 2.26.

The words listed under 'quiet' may refer to the absence of rapid motion, exertion, noise, or any physical or mental disturbance. They differ somewhat in range and in dominant application. Thus in what is perhaps the most popular use of NE *quiet* (e.g., *be quiet! keep quiet!*) reference to absence of noise is the dominant feeling, though not unmixed. But other uses are common enough, and the basic notion in the large group to which the word belongs, and in several of the others, is a 'state of rest'. Occasional semantic sources are 'even' (through 'calm'), 'peaceful', 'silent', 'orderly', 'obedient', 'weary'.

For one or another of the applications other words may be used in much the same sense, as NE *calm, still, peaceful*, etc.

1. Grk. *ἥσυχος, ἡσύχιος*, with sb. *ἡσυχία*, etym. dub., perh. based on a *sē-tu- (> *ἡσυ-*), fr. the root *sē- in Goth. *seiþus*, Lat. *sērus* 'late', Skt. *sāti-* 'conclusion, end', etc. Walde-P. 2.461. Boisacq 330.

Grk. *ἠρεμαῖος, ἤρεμος* : Goth. *rimis*, etc. (below, 4).

2. Lat. *quiētus* (> It. *quieto, cheto*, Sp. *quieto, quedo*, OFr. *quiete*, ME, NE *quiet*), pple. of *quiēscere*, this fr. sb. *quiēs, -ētis* 'quiet' : OPers. *šiyāti-*, Av. *šāiti-* 'well being', Av. *šyāta-, šāta-* 'happy', ON *hvīla* 'bed', Goth. *hweila*, OE *hwīl*, etc. 'time' (NE *while*), ChSl. vb. *po-čiti*, sb. *po-kojĭ* 'rest', all based on a notion of 'rest'. Here also Lat. *tranquillus* (> It. *tranquillo*, etc.), cpd. with *trāns*, here in its intensive force (cf. the resulting Fr. *très*, also NE *thorough* beside *through*, NHG *durchaus*), and *lo-* suffix. Walde-P. 1.510. Ernout-M. 840 f., 1052 (otherwise on the semantics of *tranquillus*).

Rum. *liniştit*, pple. of *linişti* 'make quiet', with sb. *linişte* 'quiet', fr. *lin* 'still, quiet', this fr. Lat. *lēnis* 'mild'. Tiktin 914.

Several of the words for 'collect' belong to inherited groups from roots with prevailing sense of 'collect' or 'select'. Others are from such notions as 'bring (together)', 'join, unite', 'pile up', with a number of derivatives of words for 'together' or 'heap', 'mass', 'crowd', etc.

1. Grk. *συλλέγω*, Lat. *colligere*, cpds. of *συν-*, *con-* 'with, together' and *λέγω*, *legere* 'pick out, choose, select' (both also 'collect' but more usually the cpds. in this sense) : Alb. *mbleth* (i.e. *mb-leth*) 'collect, harvest', IE *leĝ-. Walde-P. 2.422. Ernout-M. 535 f. Walde-H. 1.780.

Grk. *συνάγω*, cpd. of *ἄγω* 'lead, bring'.

NG *μαζεύω, μαζώνω*, fr. *μαζί* 'together', this orig. *μαζίον* dim. of Grk. *μᾶζα* 'barley-cake' in its late sense of 'lump, mass' (hence Lat. *massa*, NE *mass*, etc.). Hatzidakis, Μεσ. 1.117 ff.

2. Lat. *colligere* (above, 1) > Rum. *culege* (It. *cogliere*, Fr. *cueillir*, Sp. *coger* mostly in more specialized uses); Lat. *re-colligere* > It. *raccogliere* (blend with *accogliere* fr. **ad-colligere*), Fr. *recueillir*, Sp. *recoger*. REW 2048, 7127.

It. *radunare*, cpd. of *adunare* 'assemble' = Rum. *aduna* 'collect', fr. Lat. *adūnare* 'unite'. REW 209.

Fr. *rassembler*, fr. *assembler* 'assemble', MLat. *adsimulāre* fr. Lat. *simul* 'together'. REW 731. Gamillscheg 53. Wartburg 1.159 f.

Sp. *juntar*, also and orig. 'join' (12.22).

3. MIr. *tinōlaim* (OIr. 3sg. *do-in-ola* Ml. 25b3 but gl. *adplicat*), fr. **to-in-od-el-*, beside MIr. *tecmallaim* (OIr. 3sg. *do-ec-malla* Wb. 9d5), fr. **to-in-com-el-*, cpds. of the root *el-* seen in supplementary forms of the vb. 'go', as W. 3sg. subj. *el*, etc. (see 10.47). Pedersen 2.510, 511.

NIr. *bailighim*, fr. Ir. *bailighim* 'I husband' (K. Meyer, Contrib. 167), cf. NIr. *bailech* 'thrifty', Ir. *bailech* 'prosperous, successful' (op. cit.), prob. fr. Ir. *bail* 'excellence, prosperity, success'.

NIr. *cruinnighim*, fr. *cruinn* 'round', also used in sense 'assembled, gathered up'. Cf. NE *round up* (e.g. cattle) = 'collect'.

W. *casglu*, also *clasgu* : Br. *klaskout* 'seek' (11.31).

W. *cynnull*, Br. *kuntuilh*, Corn. *cuntell*, with sbs. OCorn. *cuntellet*, Ir. *comthinōl* 'assembly', cpd. of the same root as in Ir. *tinōlaim*, etc. (above). Pedersen 2.511 (without the Britannic words). Ernault, Glossaire 138.

Br. *dastumi*, cpd. of *das-* (iter. prefix), second part perh. : Ir. *tomm* 'little hill', W. *tom* 'mound, dung heap', Grk. *τύμβος* 'mound', etc. Stokes 135. Henry 90. Ernault, Glossaire 146 f.

4. Goth. *(ga)lisan*, ON *lesa*, OE *lesan*, OHG *lesan*, MHG, NHG *lesen* : Lith. *lesti* 'pick up (grains with the beak)', *aplasyti* 'pick out, separate'. Walde-P. 2.440. Falk-Torp 677.

ON *samna*, OE *samnian*, ME *samne*, OHG *samanōn*, MHG *samenen*, hence by dissimilatory change of suffix, Dan. *samle*, Sw. *samla* (also cpds. *indsamle*, *insamla*), Du. *verzamelen* (*zamelen* rare), MHG *samelen*, NHG *(ver)sammeln* : ON *saman*, OE *samen*, OHG *saman* 'together', Grk. *ἅμα*, Lat. *simul* id., etc. Falk-Torp 949.

Apart from the inherited group, words for 'join, unite' are most frequently connected with those for 'bind' or 'fasten', or with those for 'one'.

1. IE *yeug- 'join', already in the IE period applied esp. to the yoking-together of beasts of burden or hitching them to a vehicle. This use is reflected in all the older derivs. beside the more general sense of 'join'. IE *yeug- is probably an extension of the simple root *yeu- in Skt. *yuvati, yāuti* 'harnesses, yokes, binds', Av. *yu-* 'attend to, be occupied with', etc. Walde-P. 1.201f. Ernout-M. 501 ff. Walde-H. 1.730.

Grk. *ζεύγνῡμι*; Lat. *iungere* (> Fr. *joindre*, but It. *giungere* 'arrive', Sp. *uñcir* 'yoke together', deriv. Sp. *junta* 'union' whence *juntar* 'join', REW 4620), Lat. *coniungere* (> It. *congiungere*); Lith. *sujungti* (simple *jungti* mostly 'yoke, harness'); Skt. *yuj-*, Av. *yuǰ-*.

2. Grk. *συνάπτω*, cpd. of *ἅπτω, ἅπτομαι* 'fasten, grasp, touch', beside *ἁφή* 'touch' (15.71).

Grk. ἑνόω, NG ἑνώνω 'unite', fr. stem of εἷς, ἑνός 'one'.

3. It. *unire*, Fr., Sp. *unir*, Rum. *uni*, fr. late (and rare) Lat. *ūnīre*, fr. *ūnus* 'one'. REW 9073a.

Rum. *împreuna*, fr. adv. *împreuna* 'together', this fr. Lat. phrase *in-per-ūnam*. Tiktin 769.

4. Ir. *adcomla* (3sg.), cpd. of *ad-com-* and the same root *el-* as in *tinōlaim* 'collect' (see 12.21). Pedersen 2.509.

NIr. *ceanglaim*, also and orig. 'bind', see 9.16.

W. *cydio*, fr. *cyd* adj. 'common, united' (sb. 'junction, joint') : Br. *ket-* 'con-', etym.? Pedersen 2.213. Morris Jones 264.

W. *cysylltu*, fr. *cyswllt* 'junction, joint', fr. Lat. *consolidāre* 'make solid, confirm'. Loth, Mots. Lat. 158.

Br. *staga kevret*, lit. 'bind together' (*staga* 'bind', 9.16), apparently the only popular term.

Br. *unani* 'unite' fr. *unan* 'one'.

5. Goth. *gawidan* (συζεύγνυμι Mk. 10.9), OHG *giwetan* 'bind, yoke', cf. Goth. *gawiss* 'bond', *diswiss* 'ἀνάλυσις, departure', OHG *wadal*, OE *wætla* 'bandage' : Ir. *fedan* 'yoke (of animals), harness', W. *gwedd* 'yoke, team', Skt. *vīvadha-* 'shoulder-yoke for carrying burdens'. Walde-P. 1.256. Feist 211 f.

ON *samtengja*, cpd. of *tengja* 'bind, tie together'.

ON *samlaga*, fr. *samlag* 'partnership, union', lit. 'a lying together'.

OE (*ge*)*fēgan*, early ME *feȝen*, *feien*, Du. *voegen*, OHG *fuogen*, MHG *vüegen*, NHG *fügen* (esp. cpd. *zusammenfügen*), MLG *vōgen* (> Dan. *føie*, Sw. *foga*): Grk. πήγνῡμι 'make fast, solid, fix', Lat. *pangere* 'fix in, fix, settle', Skt. *pāçaya-* 'bind', Av. *pas-* 'fasten, fetter together', IE **pāk̂-*, **pāg-*. Walde-P. 2.2 f. Falk-Torp 290.

OE *gesamnian*, also 'collect, gather' like the simple *samnian* (12.21).

MLG *vorbinden* (> Dan. *forbinde*, Sw. *förbinda*), Du., MHG, NHG *verbinden*, cpds. of *binden* 'bind, tie'. Falk-Torp 253.

MLG *vorēnigen* (hence by semantic borrowing Dan. *forene*, Sw. *förena*), Du. *vereenigen*, MHG, NHG *vereinigen* 'unite', fr. word for 'one'.

ME *ioigne*, *ioyne*, etc., NE *join* fr. OFr. *joign-* in old forms of *joindre* (above, 1). NED s.v. *join*, vb.[1].

NE *unite*, late ME *unyte*, fr. Lat. pass. pple. of *ūnīre* (above, 3).

6. Lith. *sujungti*, above 1.

Lith. *suvienyti*, Lett. *savienuōt*, fr. Lith. *vienas*, Lett. *viens* 'one'.

Lett. *salikt*, cpd. of *likt* 'set by, leave' (cf. *kuopā likt* 'join together' with loc. sg. of *kuopa* 'heap' in sense 'together') : Lith. *likti* 'leave', etc. Mühl.-Endz. 2.468, 3.671.

7. ChSl. *sŭčetati* : SCr.-ChSl. *četa* 'procession, crowd', Russ. *četa* 'pair, couple', Lat. *caterva* 'crowd, troop', Umbr. *kateramu* 'congregamini'. Walde-P. 1.383. Berneker 152 f.

SCr. *sastaviti*, lit. 'put together', cpd. of *staviti* 'place, put' (12.12).

SCr., Boh. *spojiti*, Pol. *spoić*, *spajać*, cpds. of simple vb. seen in Boh. *pojiti* 'bind', Russ. *pajat'* 'solder', etc., outside connections? Brückner 426.

Verbs for 'separate' are mostly from various inherited roots with the notion of 'cut', 'split', etc., but several are formed with disjunctive prefixes from words for 'join' or 'put, place'.

1. Grk. χωρίζω, NG ξεχωρίζω (ξε- fr. ἐξ-ε- in augmented forms), fr. χωρίς 'separately, apart' : χῶρος (empty) space, place, country', χῆρος 'bereft', Skt. *hā-* 'leave, abandon', etc. Walde-P. 1.543. Boisacq 1059.

Grk. σχίζω 'split' (9.27), also 'separate' : Goth. *skaidan*, etc. 'separate' (below, 4), Lith. *skiesti* 'separate', Lat. *scindere* 'split, rend, tear', Skt. *chid-* 'cut (off), tear, bite, divide', etc., all fr. parallel *-t-* and *-d-* extensions of the root **skei-* seen in Skt. *chyati* 'cuts off', Ir. *scian* 'knife', etc. Walde-P. 2.54 ff. Ernout-M. 906. Feist 427.

2. Lat. *sēparāre* (> lit. loanwords It. *separare*, Fr. *séparer*, Sp. *separar*, Rum. *separa;* VLat. **sēperāre* > OFr. *sevrer* > ME, NE *sever*), cpd. of *sē-* 'apart' and *parāre* 'prepare, get' (11.16). Ernout-M. 785. REW 7826.

Lat. *dīvidere*, cpd. *dis-* and **videre* (not found as simplex) : Umbr. *vetu* 'dividito', *vef* 'partis', Skt. *vidh-* 'pierce, perforate'. Walde-P. 1.239. Ernout-M. 274.

Lat. *sēiungere*, *disiungere* (> OFr. *desjoindre*, Fr. *dé-* or *dis-joindre*, NE *disjoin*, etc.), neg. cpds. of *iungere* 'join' (12.16).

Rum. *despărți* fr. VLat. **dispartīre* (> Fr. *départir* 'leave' etc.), for Lat. *dispertīre* 'distribute, divide', cpd. of *partīre* 'share, divide', fr. *pars* 'part'. REW 2679. Pușcariu 523.

3. Ir. *scaraim* : W. *ysgar* 'to part', sb. 'divorce', ON *skera*, OE *sceran*, etc. 'cut, shear', Lith. *skirti*, Lett. *šk'irt* 'separate', Grk. κείρω 'cut off, shear', etc., IE *(*s*)*ker-* 'cut'. Walde-P. 2.575.

W. *gwahanu*, fr. *gwahan* 'separation, separate', cpd. of *gwa-* 'sub-' (= Ir. *fo* : Grk. ὑπό, etc.) and OW *han* gl. 'alium' (W. *han-* as prefix) : Ir. *sain* 'different, special', Lat. *sine* 'without', OE *sundor* 'apart, special', etc. Walde-P. 2.495. Pedersen 1.138, 2.661.

Br. *dispartia*, prob. through OFr., fr. VLat. **dispartīre* (above, 2).

4. Goth. (*af*)*skaidan*, OE *sc*(*e*)*ādan*, ME *schede*, *schode* (NE *shed*), OHG (*ar*)-*sceidan*, Du., MHG, NHG *scheiden* : Grk. σχίζω, etc. (above, 1).

ON, Sw. *skilja*, Dan. (*ad*)*skille;* OE *scylian*, ME *skilen*, *schille* (more probably Norse loanwords than cognates) : Lith. *skelti*, NIr. *scoiltim* 'split' (9.27). Walde-P. 2.592. Falk-Torp 994. NED s.vv. *shill*, vb.[2], and *skill*, vb.

ME, NE *separate*, deriv. of pass. pple. of Lat. *sēparāre* (above, 2).

MHG, NHG *trennen*, OHG *-trennen* only in cpds., prob. caus. to MHG *trinnen* (NHG *entrinnen* = *ent-trinnen*) 'separate oneself from, run away' : Goth.

dis-tairan 'tear to pieces', Grk. δέρω 'flay', etc. Walde-P. 1.798. Weigand-H. 2.1067.

5. Lith. *skirti*, Lett. *šk'irt* : Ir. *scaraim*, etc. (above, 3).

Lith. *skiesti* : Grk. σχίζω (above, 1).

6. ChSl. *lǫčiti*, *razlǫčiti* (in Gospels cpd.), SCr. (*raz*)*lučiti*, Boh. *od-*, *roz-loučiti*, Pol. *roz-*, *od-łączyć*, Russ. *razlučit'*, beside Boh. *loučiti* 'join' and 'separate', Pol. *łączyć* 'join' : Lith. *lenkti*, ChSl. *-lęšti*, *-lęką* 'bend', with divergent development in Slavic to 'join' or 'separate', mostly distinguished by prefixes. Walde-P. 2.435. Berneker 738, 707.

SCr. *rastaviti* (**raz-staviti*), lit. 'set apart', cpd. of *staviti* 'put, set, place' (12.12).

SCr. *razdvojiti*, cpd. of *dvojiti* 'divide in two', fr. *dvoj*, collective form of *dva* 'two'. Berneker 247.

Boh. *od-*, *roz-děliti*, Pol. *roz-*, *od-dzielić*, Russ. *ot-delit'*, cpds. of ChSl. *děliti*, etc. 'divide', fr. *dělu* 'part, portion' etc. Berneker 195.

7. Skt. *vi-yuj-*, cpd. of *vi-* 'apart' and *yuj-* 'join' (12.16).

12.232. 'Divide' is simply 'separate into parts', and so may be covered, in part, by forms in 12.23. So notably Lat. *dīvidere*, whence It. *dividere*, Sp. *dividir*, ME *devide*, NE *divide;* Fr. *diviser* (> Rum. *diviza*), formed fr. the pple. *dīvīsus*.

But this notion is more distinctively expressed by derivs. of words for 'part' (13.23). Thus Grk., NG (δια)μερίζω; Lat. *partīre* (or *-īrī*), It. (*s*)*partire*, OFr. *partir* (whence sb. *partage* and new vb. *partager; partir* now 'depart'), Sp. *partir*, Rum. *împarți;* Ir. *rannaim*, NIr. *roinnim*, W. *rhannu*, Br. *ranna*, *kevrenni;* Goth. *dailjan* (or cpds.), OE *dælan* (NE *deal* now mostly of cards), OHG *teilan*, etc., general Gmc.; Lith. *dalinti*, Lett. *dalīt;* ChSl. (*raz*)*děliti*, etc., general Slavic.

Dividing into parts is often for the purpose of giving away the parts, distributing them; and this notion is strong or sometimes dominant in such verbs. Conversely, the notion of separation may become dominant as in the history of Fr. *partir* and NE *part* (NED s.v. *part*, vb. 4 vs. 1).

2. Lat. *operīre*, but chiefly 'cover': *aperīre* 'open' (12.24).

It. *serrare*, Sp. *cerrar* (Fr. *serrer* 'keep shut, hold tight, squeeze'), fr. VLat. *serrāre* for late Lat. *serāre*, fr. *sera* 'bar, bolt, lock' (7.23). Ernout-M. 927. REW 7867.

Fr. *fermer*, fr. Lat. *firmāre* 'make firm, fast' (*firmus* 'strong, firm'). REW 3318.

3. Ir. *iadaim*, perh. fr. a cpd. **epi-dhē-*, with IE **dhē-* 'place, put', cf. Grk. ἐπι-τίθημι 'lay, put on'. Pedersen 2.551, 653. Stokes 328.

MIr., NIr. *dūnaim*, fr. *dūn* 'fortress, castle', either through the sense 'enclosure' (cf. W. *cau*, below) or through 'fortify, barricade'.

NIr. *druidim*, fr. Ir. *druit* 'close, firm, trustworthy', etym. disputed. Walde-P. 1.806. Osthoff, Parerga 132 f.

W. *cau*, MW *caeu*, fr. *cae* 'enclosure, field, fence, hedge' (: OE *hecg*, NE *hedge*, etc., Walde-P. 1.337).

Br. *serra*, fr. OFr. *serrer* : It. *serrare*, etc. (above, 2).

Br. *prenna*, orig. 'bar, bolt (a door)', fr. *prenn* 'wood', esp. 'wooden bar'.

The majority of words for 'hide' are connected with others for 'cover' or 'put away' or 'keep, preserve', the notion of concealment being secondary, though dominant in an inherited group (below, 1). But this latter notion is inherent in a few that are connected with words for 'steal', 'lie, deny', or 'secret'.

Few of the words listed are so generic as NE *top*, which may denote the upper part or surface of any object, regardless of shape. Most of them are used primarily with reference to something high, as a mountain, hill, or tree. With certain objects words for 'point' or 'end' or 'head' are often used. The top of a flat surface (top of a table, of the water), may be expressed quite differently, as NHG *oberfläche* 'upper surface', etc. Or more generic expressions may be supplied by phrases like It. *il di sopra*, Fr. *le haut*, NHG *das obere*, etc.

1. Grk. ἄκρος, adj. 'highest, topmost, extreme', used with sb. to express 'top', e.g. ἐπ' ἄκρων ὀρέων 'on mountain tops', etc. : Lat. *ācer* 'sharp', etc. Walde-P. 1.28. Boisacq 32 f. Hence also sb. ἄκρον 'highest or farthest' point.

Grk. κορυφή, esp. (Hom.+) 'crown on the head, mountain-top, peak', also general 'top' : Grk. κόρυς 'helmet', κόρυμβος 'top of a hill', pl. Hom. 'sterns of ships', prob. fr. an extension of the root **k̂er-* in words for 'head, horn, etc.', in Grk. κάρ, κάρα 'head', κέρας 'horn', Skt. *çiras-* 'head, point', etc. Walde-P. 1.406.

2. Lat. *summus* 'highest, topmost', used like Grk. ἄκρος, e.g. *in monte summo* 'on the top of the mountain', *in aqua summa* 'on the top of the water'; hence also sb. *summum* (> OFr. *som*, whence dim. 'End' is understood here, of course, in the spatial sense, not in the temporal, though the latter is to a large extent expressed by the same words (14.26), nor in the frequent secondary sense of 'purpose'. In Greek and Latin 'end' is often expressed by adjectives in agreement with nouns denoting the object referred to.

1. Grk. ἄκρος 'at the farthest point, uttermost' (also 'highest', whence its use for 'top', 12.33), e.g. ἄκρη χείρ 'end of the arm' = 'hand' (Hom.), ἀπ' ἄκρων οὐρανῶν ἕως ἄκρων αὐτῶν 'from one end of heaven to the other' (NT). Hence also as sbs. ἄκρον and ἄκρα, NG pop. ἄκρη.

Grk. πέρας, Hom. πεῖραρ, fr. **πέρϝαρ* : πέρᾱν 'on the other side', Skt. *para-* 'far,

opposite, last', Goth. *fairra* 'far', etc. Walde-P. 1.31 ff.

Grk. τέρμα, τέρμων, Lat. *terminus* 'boundary, limit', only rarely for more generic 'end', fr. the root of Lat. *trāns* 'across', Skt. *tṛ-* 'pass over, cross', etc. Walde-P. 1.733. Ernout-M. 1032.

2. Lat. *extrēmus* 'outermost', e.g. *in extrēmō ponte* 'at the end of the bridge', *in extrēmō librō* 'at the end of the book'. Hence also sb. *extrēmum* (> It. *estremo*, Sp. *extremo*, etc.).

For Lat. *fīnis*, which though orig. a spatial notion is in actual use 'border, limit', and 'end' only as 'purpose' or temporal, see 14.26.

It. *capo*, Sp. *cabo*, fr. Lat. *caput* 'head'; pl. *capita* > Rum. *capete*, hence new sg. *capăt*.

In Italian and Spanish various other words are used for 'end' in particular connections, as *fondo* 'bottom' (12.34) for 'lower end' or simply 'end' of a room, garden, etc., *punta* 'point, tip' for the end of a stick, etc., It. *coda* 'tail' for the end of a rope, a train, etc.

Fr. *bout* (OFr. also 'blow', hence 'end' as 'striking end'?), back-formation fr. OFr. *bouter* 'strike, thrust', this fr. Frank. **bōtan*, cf. OHG *bōzan*, OE *bēatan* 'strike, beat'. REW 1228c. Wartburg 1.459 f.

3. Ir. *cend, cenn*, W. *pen*, Br. *penn* all lit. 'head' (4.20), esp. as 'end' also Ir. cpd. *for-cenn*, with *for* 'on, upon'.

Words for 'point' (here intended as 'sharp end') are in several cases, as might be expected, cognate with words for 'sharp' or names of particular sharp-pointed objects. Some are the usual words for 'end', used also for 'point', with or without a distinguishing adj. for 'sharp'. Or, since the 'top' of an upright object may also be a 'point', a word for 'top' may also cover 'point' (Rum. *vîrf*), as conversely NHG *spitze* is used for the 'top' (of a mountain, etc.).

But in the group of which NE *point* is representative the sense here intended is secondary in its historical development to that of 'point' as a small spot or mark (orig. a 'puncture'), whence any sharply defined 'point' in space, time, or thought (in this sense Lat. *pūnctum* also > NHG *punkt*, etc.).

These two notions, expressed by quite unrelated words in most languages and somewhat differentiated in Romance (Fr. *point* vs. *pointe*, etc.) are merged in NE *point* with the addition of a great variety of idiomatic uses. Cf. NED s.v. *point*, sb.[1].

1. Grk. ἀκμή ('point' or 'edge', more common in secondary senses), ἀκίς, ἀκωκή (usual word in Hom.) : ἄκρος 'topmost', Skt. *açri-* 'edge', Lat. *acūtus*, Lith. *aštrus*, etc. 'sharp' (15.78).

NG (beside lit. ἀκίς, etc.) pop. μύτη 'snout, nose' (4.23), also 'point' (hence μυτερός 'pointed, sharp').

Words for the 'edge' of a knife, sword, etc. are mostly connected with adjectives for 'sharp' or verbs for 'cut'. In one group the words for 'thread' are used (through its fine line) for 'edge'. Some words for 'mouth' (through 'front') or 'lip' are also used for 'edge'.

But for the common secondary sense which developed in ME *egge*, NE *edge*, as in *edge of the table, forest*, etc. (NED s.v. III), other languages have quite different words and sometimes in great variety according to the subject referred to. A few words are included in the list (but in parentheses) which are quotable only for the 'edge, fringe' of a garment,

this being the only occurring sense of Grk. κράσπεδον in the NT.

1. Derivs. of IE *ak̂- in words for 'sharp' (15.78). Walde-P. 1.28 ff. Ernout-M. 7 ff. Falk-Torp 182. Pedersen 1.123, 412.

Several of the words for 'side' were first used only for the 'side' of the body and are connected with words for 'rib'. Others are from such notions as 'half' or 'part, region'; and, in general, words for 'part' (besides those included in the list here) are often used in the sense of 'side'.

1. Grk. πλευραί, pl. of πλευρά 'rib', used for 'side' of the body (Hom.+), then for 'side' in general (πλευρά sg. for 'side' of the body in NT and NG); similarly πλευρά, pl. of πλευρόν 'rib', in narrow sense (Hom.) and later generic, etym.? Boisacq 794.

Grk. μέρος 'part, portion' (13.23), late 'region', NG μέρος, pop. μεριά usual word for 'side'.

2. Lat. latus (> It. lato, Sp. lado, OFr. lez, Rum. arch. laturi), prob. fr. another grade of the root in Lat. lātus 'wide' (12.61). Walde-P. 2.427. Walde-H. 1.772. Otherwise Ernout-M. 528.

Lat. costa 'rib' (4.162), also 'side'. Hence, through sb. form of Lat. costātus 'ribbed', Fr. côté, Sp. costado (It. costato 'region of the ribs'). REW 2280.

It. canto 'edge, corner' (12.76), also freq. 'side' (cf. accanto 'beside').

Rum. parte (replaces older laturi, above), fr. Lat. pars, -tis 'part'. Pușcariu 1274.

3. Ir. tōib, NIr. taobh, W., Br. tu, etym. dub., but perh. (as *toigʷes) : Arm. t'ēkn 'shoulder', ChSl. stĭgno 'femur'. Walde-P. 2.614. Otherwise Pedersen 1.116 (: Lat. tībia, Lith. staibiai 'shin-bone', etc.).

Most of the words for 'middle' are derivatives of a single IE form. The others are from 'inner part', 'heart', and 'channel'. A recurring secondary sense of sb. 'middle' is 'means' (the medium by which one attains results), as in Fr. moyen, NHG mittel, etc. This notion is otherwise expressed by a case-construction (the old instrumental), a preposition ('through'), or by words for 'way, manner'.

1. IE *medhyo- Walde-P. 2.261. Ernout-M. 601. Walde-H. 2.57 f. Falk-Torp 719 f.

Hence, either directly or in derivs., all the words listed, except in Britannic and Balto-Slavic, where the word survives in W. mewn 'within', ChSl. meždu 'in the middle, between' and mežda 'street', etc., but as the adjective for 'middle' is displaced by other terms.

The original form is represented by Grk. μέσος, dial. μέσσος, μέττος (all fr. *μέθιος); Lat. medius (> It. mezzo, medio, Fr. mi-, Sp. medio, etc.), Osc. loc. sg. fem. mefiaí; Ir. mid-; Goth. midjis, ON miðr, OE midd, OHG mitti, etc.; Skt. madhya-, Av. maiδya-.

But many of these came to be partly replaced as adjectives for 'middle' by derivs., e.g. NG μεσαῖος, late Lat. mediānus (> It. mezzano, Fr. moyen), Ir. medōnach, fr. sb. medōn 'middle' (this also a deriv. form), OE middel, and the comp. and superl. forms like NHG mittler, OE midlest (more common than the positive), midmost, Sw. mellerst, Av. maδəma-; or by phrases, as Fr. au (or du) milieu, It. nel mezzo; or by derivs. of cpds., as Rum. mijlociu fr. sb. mijloc, this like Fr. milieu, fr. cpd. with forms of Lat. locus 'place'.

2. W. canol (sb. and adj.), fr. Lat. canālis 'channel, groove'. Loth, Mots lat. 143.

W. perfedd (cf. Corn. a berwedh 'within'), fr. Lat. per medium. Loth, Mots lat. 195.

Br. ekreiz cpd. of e, en 'in' and kreiz 'center = Ir. cride 'heart', etc. The simple kreiz is used as prefix 'mid-', e.g. kreizdeiz 'midi', kreiznoz 'minuit', etc.

3. Lith. vidurinis, Lett. vidējs fr. Lith., Lett. vidus 'middle, inner part', this prob. : Skt. vidhu- 'solitary, isolated', Lat. dī-videre 'separate, divide'. Walde-P. 1.239.

4. SCr. srednij, Boh. střední, Pol. średni, Russ. srednij, fr. the sbs. ChSl. srěda, etc. 'middle' : ChSl. srŭdĭce 'heart', etc. (4.44). Brückner 534.

12.38. 'Center'. Substantive forms of the adjectives for 'middle' were used for 'the middle', or in some cases the adjectives were derived from the nouns (cf. 12.37). These words originally covered 'middle' and 'center' without distinction. For the latter arose also cpds. like NHG mittelpunkt and Russ. sredotočie (-točie : toc' 'exactly'). But the widespread Eur. word for 'center' as applying especially to a circle or sphere, goes back to a development in Greek.

Grk. κέντρον 'sharp point, goad, sting' (: κεντέω 'prick, stab') was used also for the 'point' of a pair of compasses and for the 'center' of a circle or sphere. Hence in this sense Lat. centrum and the almost universal Eur. word.

The history of words for 'right' and 'left' shows that they were used primarily with reference to the hands.

Many of those for 'right' belong to an inherited group pointing to an IE word for 'right' with reference to the hand, but without clear antecedent root meaning. Others are from notions like 'straight, correct, right (vs. wrong)', 'good', 'stronger' or 'easier', all with obvious reference to the right hand.

1. IE *dek̂s(i)-, with various suffixes, ultimate root connection (: Grk. δέκομαι 'receive', Skt. dāç- 'make offering, honor'?) dub. Walde-P. 1.784. Ernout-M. 264. Walde-H. 1.346 f. Feist 471.

Grk. δεξιός (prob. *δεξιϝός, cf. Goth. taihswa), Hom. and poet. δεξιτερός; Lat. dexter (> It. destro, OFr. destre, Sp. diestro), Osc. destrst 'dextra est', Umbr. destram-e 'in dextram'; Ir. dess, NIr. deas, W. de, deheu, Br. dehou; Goth. taihswa, OHG zeso, MHG zese; Lith. dešinas, ChSl. desnŭ, SCr. desni (Russ. desnoj 'right', desnica 'right hand' fr. There is no such single widespread inherited group for 'left' as for 'right'. But there are some cases of correspondence between Greek, Latin, Celtic, and Baltic or Slavic, and between Slavic and Indic, all words without certain root connections.

Of the others, several are from notions applicable to the inferior left hand, as 'weak, useless', 'limp', 'bent, crooked', this last relation prob. in part through an intermediate 'awkward' (cf. NE awkward orig. 'turned the wrong way'), but also as opposite of 'straight' = 'right'.

Several are in origin terms applied to the normally inauspicious left side in taking omens, either 'inauspicious' or more frequently euphemistic 'good, better, friendly, pleasant, auspicious'.

1. Grk. ἀριστερός, orig. euphemistic 'better' : ἄριστος 'best', etc. Walde-P. 1.69. Boisacq 77 f. (with other views).

Grk. εὐώνυμος, likewise euphemistic, 'of good name' (ὄνομα 'name'), 'auspicious'.

Grk. σκαιός, Lat. scaevus, perh. : Lith. kairias 'left', kairė 'left hand', NIr. ciotach 'left-handed', ciotān, cotōg 'left hand', W. chwith 'left', but ultimate root connection? Walde-P. 2.537. Pedersen 1.77. Ernout-M. 899 f.

Grk. λαιός, Lat. laevus, ChSl. lěvŭ, etc., general Slavic, prob. as orig. 'bent' (cf. Serv. Gram. laevi [sc. boues], quorum cornua ad terram spectant) : Lith. išlaivoti 'make bends'. Walde-P. 2.378 f. Ernout-M. 518 f. Walde-H. 1.751. Berneker 714 f.

NG ζερβός 'left-handed' and simply 'left', Byz. ζαρβός, with metathesis fr. ζαβρός (extant dial.), this prob. with -ρός after ἀριστερός, fr. ζαβός 'crooked, inept', though this itself is of unknown age and origin. Hatzidakis, Glotta 1.127.

2. Lat. sinister, prob. euphemism, perh. : Skt. sanīyān- 'more useful, more advantageous'. Hence It. sinistro, but OIt. sinestro, OFr. senestre, Sp. siniestro, fr. VLat. *sinester (cf. senexter, senester in late inscr.) after dexter 'right'. Ernout-M. 945. REW 7947.

Osc.-Umbr. nertro- (Osc. nertrak 'sinistra', Umbr. nertru 'sinistro' : Grk. (ἐ)νέρτερος 'lower', etc., with development 'lower' > 'inferior' > 'left'. Walde-P. 2.333 f.

Fr. gauche, back-formation to gauchir 'turn aside, dodge' (fr. OFr. guenchir 'turn' fr. Frank. *wankjan = OHG wankōn 'stagger', crossed with OFr. gauchier 'full cloth', fr. Frank. *walkan : OHG walchan 'full cloth', etc.), with sense of 'left', prob. through 'uneven, awkward'. Gamillscheg 462. Bloch 1.329. Otherwise REW 9492.

Sp. izquierdo, fr. Basque ezker 'left'. REW 3116.

Rum. stîng, fr. VLat. *stancus 'weak' (cf. It. stanco 'tired', but OIt. mano stanca 'left hand', OFr., Prov. estanc 'weak'), ultimate orig. dub. REW 8225. Pușcariu 1647.

3. Ir. clē, Br. kleiz, Corn. cledh, W. (arch.) cledd : Goth. hleiduma 'left', Lat. clīvius 'inauspicious' (of omens), as orig. 'oblique', fr. the root *klei- in Lat. clīvus 'hill' (orig. 'slope'), clīnāre, Grk. κλίνω 'incline, lean'. Walde-P. 1.490. Ernout-M. 198. Feist 262.

Ir. tūath (esp. adv. tūaith; NIr. tuath mostly in secondary sense), euphemistic term : Goth. þiuþ sb. 'good', ON þȳðr 'friendly', Lat. tūtus 'safe', etc. Walde-P. 1.706. Vendryes, RC 33.255. Pedersen, Don. Nat. Schrijnen 422.

W. aswy, perh. fr. *ad-seuyo : ChSl. šujĭ, Skt. savya- 'left' (below). Pedersen 2.16.

W. chwith : Grk. σκαιός, above, 1.

4. Goth. hleiduma : Ir. clē, etc., above, 3.

ON vinstri, Dan. venstre, Sw. vänster, OE winestra, OHG winistar, MHG winster, orig. as euphemistic 'more desirable, friendlier' : ON vinr, OHG wini, OE wine 'friend', OHG wunnia, OE wynn 'joy', Skt. van- 'desire, seek, gain', etc. Walde-P. 1.260. Falk-Torp 1367.

ME luft, lyft, lift, left, NE left, fr. OE left 'weak' (this, if a separate word from lyft, perh. : Grk. λεπτός 'peeled, fine, delicate, weak') and OE lyft 'weak' : MDu. lucht, luft 'left', fr. a root *leup-). Walde-P. 2.430. Falk-Torp 658. NED s.v. left, adj.

Du. linker, MHG linc, lenc, NHG link (OHG lenka 'the left hand') : Dan. linke, Sw. linka, 'limp', etc., beside Sw. slinka 'dangle, slip', OE slincan 'crawl', OHG slinc, MDu. slink 'left', Lat. languēre 'be weak, faint, weary', Ir. lacc 'loose, weak', etc. Walde-P. 2.713. Falk-Torp 664.

For other MHG words for 'left', tenc, lerc, lerz, see G. S. Lane, JEGPh. 32.483 f.

5. Lith. kairias, perh. : Grk. σκαιός (above, 1).

Lett. kreiss, cf. Lith. kreisa 'vice, defect' : Lett. kreilis 'left hand', krievs 'crooked', Slavic krivŭ 'crooked'. Mühl.-Endz. 2.271. Berneker 618. Walde-P. 2.570.

6. ChSl. šujĭ : Skt. savya-, Av. haoya- 'left', prob. through 'bent', fr. the root *seu- in Ir. sōim 'turn', etc. G. S. Lane, Language 11.195.

ChSl. lěvŭ : Grk. λαιός (above, 1).

7. Skt. savya-, Av. haoya-, above, 6.

Skt. vāma-, prob. = vāma- 'dear, pleasant, desirous of', fr. the root in van- 'desire, gain', etc. (cf. ON vinstri, etc., above, 4). Walde-P. 1.259. Uhlenbeck 282.

Av. vairyastāra- : vairya- 'the best', fr. var- 'choose'. Cf. Grk. ἀριστερός 'left' : ἄριστος 'best' (above, 1). Barth. 1373 f.

Skt.	pūrvā-(diç-), prācī-(diç-)	pratīcī-(diç-), paçcimā-(diç-)	uttarā-(diç-), udīcī(diç-)	dakṣiṇā-(diç-)
Av.	upaošaŋhva-, ušastara- (adjs.)	daošatara- (adj.)	apāxtara- (adj.)	paurva-, rapiθwitara- (adjs.)

The majority of words for the main points of the compass are based either on the position of the sun at a given time of day ('sunrise, dawn, morning' = 'east'; 'sunset, evening' = 'west'; 'midday' = 'south') or on one's orientation, which among the IE-speaking peoples was usually facing the sunrise ('in front' = 'east'; 'behind' = 'west'; 'right' = 'south'; 'left' = 'north'), though there are also traces of orientations toward the north or south (the latter in the Avesta, where 'in front' = 'south'; 'behind' = 'north'). Cf. Schrader Reallex. 1.500 f.

A few are from names of characteristic winds, and among those for 'north' some are connected with the name of a constellation in the north, with 'winter', or with 'midnight' as opposite of 'midday' = 'south'.

Notable is the spread of the English words, first as nautical terms, to the Romance languages.

The attested Goth. words for 'east' and 'west' (Mt. 8.11; those for 'north' and 'south' are not quotable) are not general Gmc. terms, but literal translations of the Grk. Cf. G. S. Lane, Phil. Quarterly 12.323 f.

But it may be noted that Luther used the Gmc. terms only for the winds, otherwise those for 'morning', 'evening', etc., and that these or others had almost replaced the old terms for a while. Paul, Deutsches Wtb. 379.

The words are listed in the sb. forms so far as possible. But some of the early

Gmc. forms are quotable only as advs. or in cpds., as OE ēast, etc. (see NED s.v.). The Av. forms are adjs., and the Skt. are fem. adjs. with diç- 'direction', esp. 'cardinal point of the sky' (: diç- 'point out') either expressed or understood.

12.45. Words for 'east' are connected with words for 'dawn' or 'morning', with verbs for 'rise', or with words for 'before' or 'in front', all referring to the direction of the rising sun.

1. IE *āus-, *āusos-, *usos-, etc., in words for 'dawn' and 'east', beside verb forms as Skt. ucchati, Av. usati 'lights up' (esp. of the dawn), Lith. aušti, Lett. aust 'to dawn'. Walde-P. 1.26 f. Ernout-M. 93. Walde-H. 1.86.

Grk. Aeol. αὔως, Dor. ἅως, Hom. ἠώς, Att. ἕως 'dawn' and 'east'; Lat. aurōra (*ausōs-ā) 'dawn' and (mostly poet.) 'east' (prob. also auster 'south wind', 12.48); ON austr, OE ēast, OHG ōstan, etc., general Gmc., with various suffixes; Lith. aušra 'dawn', Lett. austrums 'east'; ChSl. za ustra 'in the morning'; Skt. uṣās, Av. ušā 'dawn', whence Av. ušastara-, upaošaŋhva- (fr. *upa-ušah-) adjs. for 'east'.

2. Grk. ἀνατολή 'a rising', esp. pl. ἀνατολαί ἡλίου 'sunrise', hence 'east' : ἀνατέλλω 'rise' (esp. of the sun).

3. Lat. oriēns, pres. pple. of orīrī 'rise'. Hence as literary terms, It., Sp. oriente, Fr. orient.

It. levante (> Sp. levante, Fr. levant), fr. levāre 'raise, lift', refl. 'rise'. REW 5000.

Fr. est (> It., Rum. est), Sp. este fr. ME est. REW 2917a. Wartburg 3.247.

Rum. răsărit, lit. '(sun)rise', fr. răsări, 'go up, climb, rise' (of sun), cpd. of raz- (Slavic) and sari 'spring' fr. Lat. salīre. Tiktin 1300, 1367.

4. Ir. airther, NIr. oirthear, Br. reter, fr. Ir. air-, Br. ar- 'before' (: Skt. pari 'against, toward', Grk. περί 'around', etc.), but also 'east' in advs. t-air 'in the east', s-air 'to the east', an-air 'from the east'. Walde-P. 2.33. Pedersen 2.187. Ernault, Glossaire 572.

W. dwyrain, orig. 'sunrise', perh. fr. a cpd. of the root in Ir. rigim 'stretch out', Lat. regere 'direct, rule', etc. Pedersen 1.237, 2.56, 596 note 3.

Br. savheol, cpd. of sav 'upright, raised' and heol 'sun'.

5. Goth. urruns (lit. translation of Grk. ἀνατολή) : urrinnan 'run out, go up, rise (of sun)', ON renna, OE rinnan 'run', etc. Feist 528.

6. Lith. rytai, Lett. rīti, pl. of Lith. rytas, Lett. rīts 'morning' (14.34).

7. ChSl. vŭstokŭ, SCr. istok, Russ. vostok, orig. 'sunrise', lit. 'a running up, out' : ChSl. tešti, teką 'run', etc. (10.46).

Boh. východ, Pol. wschód, orig. 'sunrise', lit. 'a going out, up' : Boh. choditi, Pol. chodzić 'go' (10.47).

8. Skt. pūrvā-(diç-) fr. adj. pūrva- 'in front, former, eastern' = Av. paorva- 'in front, former', but 'southern' (see 12.48). OPers. paruva- 'eastern' (Barth. 871) is to be deleted. The correct reading is paradraya 'beyond the sea'. Cf. Cameron, J. Near East. Stud. 2.307 f.

Skt. prācī-(diç-), fr. prāñc- 'directed forward, in front, facing, eastern'.

12.46. Words for 'west' are derived from those for the 'setting, going down' (of the sun), or 'evening' or 'behind' (as opposed to 'in front' = 'east', cf. 12.45).

1. Grk. ἑσπέρα 'evening' (14.36) and 'west'.

Grk. δυσμή (esp. pl. δυσμαί), and δύσις, both lit. 'the setting of the sun' (sc. ἡλίου) : δύω 'sink, go down, set' (of the sun). Walde-P. 1.777 f.

2. Lat. occidēns, pres. pple. of occidere 'fall down, perish, set (of the sun)', cpd.

of cadere 'fall'. Hence the lit. Romance words It., Sp. occidente, Fr. occident 'occident'.

Lat. occāsus (sc. solis), lit. 'sunset' : occidere (above).

It. ponente, Sp. poniente, fr. It. porre, Sp. poner 'put, place' (12.12). REW 6647.

Fr. ouest, Sp. oeste (> It. ovest), fr. OE west (below, 4). REW 9526.

Rum. vest, fr. NHG west.

Rum. apus, lit. '(sun)set', pple. of apune 'sink, go down, set (of the sun)', fr. Lat. ad-pōnere 'place near'. Tiktin 86.

3. Ir. īarthar, fr. īar 'behind', and 'west' in advs. t-īar 'in the west', s-īar 'toward the west', an-īar 'from the west' (: Skt. api, Grk. ἐπί). Pedersen 1.93. Walde-P. 1.123.

W. gorllewin, older gollewin, OW gullengin, etym.? Pedersen 1.107.

Br. kuzheol, lit. 'sunset', cpd. of kuz 'hiding' and heol 'sun'.

Br. kornaoueg, kornog, orig. only 'west wind', lit. 'trumpeter' fr. korn 'horn, trumpet'. Henry 76.

4. Goth. saggqs (only dat. sg. saggqa Mt. 8.11, rendering δυσμῶν) : sigqan 'sink, go down'. Feist 403.

ON vestr, OE west, OHG westan, etc., general Gmc., prob. deriv. of a Gmc. *wes- : Skt. avas 'down' beside ava 'down from', and Grk. ἕσπερος, etc. 'evening' (14.46). Walde-P. 1.15. Falk-Torp 1371 f.

5. Lith. vakarai, Lett. vakari, pl. of Lith. vakaras, Lett. vakars 'evening' (14.36).

Lett. rietums, esp. pl. rietumi, fr. riets 'sunset' : riest 'roll, fall'. Mühl.-Endz. 3.550.

6. ChSl. zapadŭ, SCr., Russ. zapad, Boh. západ, fr. za- 'behind', and padą, pasti 'fall' (with reference to the disappearance of the sun behind the horizon).

Pol. zachód fr. zachodzić 'go behind, go down (of sun)'.

7. Skt. pratīcī-(diç-), fr. pratyañc- 'turned toward, facing, behind, western' ('west' from 'behind').

Skt. paçcimā-(diç-), lit. 'hinder-(most), last', fr. paçca- 'behind, after' and 'in the west'.

Av. daošatara-, daošastara-, adj. (-s- fr. ušastara- 'eastern'), fr. *daoša- 'evening, west' = Skt. doṣā- 'evening, darkness' (prob. : δύσις, etc., above, 1). Barth. 674. Walde-P. 1.777 f.

12.47. Words for 'north' are from the name of a north wind, a northern constellation, 'midnight', 'winter', 'upper region', and from 'left', or under a southern orientation 'behind'.

1. Grk. βορέᾱς, Att. βορρᾶς, NG pop. βοριάς (βορῐάς, two syll.), orig. 'north wind' (personified), source uncertain, perh. a northern loanword related to Slav. burja 'storm'. Walde-P. 1.682.

2. Lat. septentriō, orig. pl. septentriōnes 'the seven plow-oxen' (triō 'plow-ox'), name of a constellation in the north (the great or little bear). Ernout-M. 925 f.

Fr. nord (> It., Rum. nord, Sp. norte), fr. OE norþ. REW 5957.

3. Ir. tūascert, NIr. tuaisceart, cpd. of *tūas : tūath 'left' (12.42) and cert (as in des-cert 'south') 'part, region', perh. orig. 'quarter' : Lat. quartus, etc. Loth, RC 43.160 ff. Pedersen, Don. Nat. Schrijnen 423 ff.

W. gogledd, cf. Ir. fochla 'the North' (as a section of Ireland), cpd. W. go-, Ir. fo- 'sub-' and last member : W. cledd, Ir. clē 'left' (12.42). Pedersen 1.68.

Br. hanternoz, 'midnight' (lit. 'half-night', fr. hanter 'half', 13.24) and 'north', as opposed to kreisteiz 'noon' and 'south'.

4. ON norðr, OE norþ (adv.), etc., general Gmc., prob. : Osc.-Umbr. nertro- 'left' (12.42), Grk. νέρτερος 'lower', with development 'lower' > 'inferior' > 'left', and fr. 'left' to 'north' as one faces the rising sun. Walde-P. 2.333 f. Falk-Torp 770 f.

5. Lith. šiaurė, ChSl. sěverŭ, etc., the latter also 'north wind', beside Lith. šiaurys 'north wind' : Lat. caurus 'northwest wind', Goth. skūra windis 'whirlwind', OHG scūr 'storm', etc. Walde-P. 1.377.

Lith. žiemiai, Lett. ziemel'i fr. Lith. žiema, Lett. ziema 'winter'.

6. ChSl. sěverŭ : Lith. šiaurė, above.

Boh. půlnoc, Pol. północ 'midnight' and 'north', cpds. of půl, pol 'half' and noc 'night'.

7. Skt. uttarā-(diç-), fr. uttara- 'upper, higher' also 'left, northern', deriv. of ud- 'up, out'.

Skt. udīcī-(diç-), fr. udañc- 'upward, northward', fr. ud- 'up, out'.

Av. apāxtara-, apāxəδra-, deriv. of apąnk- 'turned backwards', adv. 'back', in accordance with the southern orientation in the Avesta. Barth. 79 f., 82.

12.48. Words for 'south' are often the same as those for 'midday, noon'. Other sources are '(rainy) south wind', 'sunny region'(?), and 'right', or with a different orientation 'in front'.

1. Grk. νότος, properly 'south wind', as 'rainwind' : νότιος, νοτερός 'damp, rainy', νοτία 'moisture, rain', etc., prob. fr. the root in Grk. νάω 'flow', Lat. nāre 'swim', etc. Walde-P. 2.692 f. Boisacq 673.

Grk. μεσημβρία, also and orig. 'midday' (14.45).

2. Lat. merīdiēs, also and orig. 'midday' (14.45). Similarly in the Romance languages It. mezzogiorno, mezzodì, Fr. midi, Sp. mediodia, all lit. 'noon, midday'.

Lat. auster 'south wind', also 'south', prob. orig. 'east wind' : ON austr, etc., 'east' (12.45), with shift through 'southeast' explained by the diagonal position of the axis of Italy. Walde-H. 1.87. Ernout-M. 94 (with some doubt).

Fr. sud (> It., Rum. sud), Sp. sud, sur, fr. OE sūþ (below, 4). REW 8424.

3. Ir. descert, NIr. deisceart, cpd. of dess 'right, southern' (12.41), with cert as in tūascert 'north' (12.47).

Ir. tūas, NIr. thuas, adv. 'above' and 'in the South', that is, t-ūas, fr. ūas 'above' : Grk. ὕψι 'on high'. Pedersen, Don. Nat. Schrijnen 424.

W. deheu, de, lit. 'right (hand, side)', as adj. 'right, southern' (12.41).

Br. kreisteiz, also and orig. 'midday' (14.45).

4. ON suðr, OE sūþ, etc., general Gmc. (the MHG and NHG form without -n- fr. LG), Gmc. *sunþa-, orig. perh. 'toward the sun, the sunny region' : Goth. sunnō, etc., 'sun', like the words for 'east' fr. 'dawn'. Walde-P. 2.447. Falk-Torp 1224 f.

5. Lith. pietūs (pl.) also and orig. 'midday meal, midday' (14.45).

Lett. dienvidus, also and orig. (beside dienasvidus) 'midday' (14.45).

6. ChSl. jugŭ, SCr., Russ. jug, Boh. jih, etym. dub. Walde-P. 1.25. Berneker 458.

Pol. południe, also and orig. 'midday' (14.45), similarly Boh. podoní adj. 'midday-, southern', k podeni 'to the south'.

7. Skt. dakṣiṇā-(diç-), fr. dakṣiṇa- adj. 'right, southern' (12.41).

Av. paurva- 'in front, former' and 'southern' in contrast to Skt. pūrva- 'in front, eastern', owing to the southern orientation in the Avesta. Barth. 870 ff.

Av. rapiθwitara-, rapiθwənatara- 'southerly', derivs. of unattested simple adj. forms fr. rapiθwā- 'midday' (14.45). Barth. 1509.

Br.	furm, neuz, aoz	NHG	gestalt		

Some of the words for 'shape, form' have also the more generic sense of 'appearance' and are connected with the IE root for 'see' and 'know'. Others are from verbs for 'fashion, mold, create, make' or from such diverse notions as 'hold', 'strike', 'grow', etc.

1. Grk. μορφή, etym.? Walde-P. 2.274. Boisacq 645.

Grk. σχῆμα, deriv. of ἔχω 'hold, have', fut. σχήσω, hence orig. 'manner of holding oneself', then 'form, shape, bearing, manner', etc., like Lat. habitus : habēre. Walde-P. 2.482.

Grk. εἶδος, orig. 'appearance, aspect', hence 'form, shape, kind' (NG 'kind'), fr. the root of εἶδον 'saw', οἶδα 'know', like Lith. veidas 'face, appearance', Lett. veids 'form, appearance', ChSl. vidŭ 'look, appearance', etc. Walde-P. 1.239. Boisacq 220.

2. Lat. fōrma (> It. forma, OFr. fourme > ME forme, NE form; Fr. forme, Sp. forma, Rum. formă are lit. borrowings), etym. dub. Connection with Grk. μορφή, either by borrowing and transposition of consonants (through Etruscan?) or otherwise is possible. Ernout-M. 378 f. Walde-H. 1.530 f.

Lat. fōrma has given a more or less literary or technical word in most of the Eur. languages, as Dan., Sw., NHG form, in Slavic languages forma.

Lat. figūra, properly 'shape given to an object' : fingere 'shape, mold', figulus 'potter', Skt. dih- 'smear', etc. Walde-P. 1.833. Ernout-M. 361 f. Walde-H. 1.502.

Most of the words for 'size' are obvious derivs. of the adjectives for 'large, big' (12.55), that is, 'bigness' is used for 'the degree of bigness', as Grk. *μέγεθος* : *μέγας*, Lat. *magnitūdō* : *magnus*, Goth. *mikilei* : *mikils*, etc.—all the words listed, with the following exceptions:

1. Sp. *tamaño*, sb. of adj. *tamaño* 'so large' (Lat. *tam magnus* 'so large'). REW 8552.

2. Ir. *mēit*, NIr. *mēid*, W. *maint*, Br. *ment*, perh. **manti*, old abstract formation fr. root in Ir. *mār* 'large' (12.55). Pedersen 1.242 f., 2.48. Walde-P. 2.238.

3. ME *syse*, NE *size*, fr. OFr. *sise*, *cise* for *assise* lit. 'act of settling or fixing something' (esp. assessments, levies, etc.), pple. of OFr. *asseir* 'sit at, set down, settle' (Lat. *adsidēre*). The modern sense is late in ME, earlier 'assize' then esp. 'regulation of amount, quantity (of a tax, etc.)' and 'fixed quantity or size'. NED s.v. *size*, sb.[1].

4. Skt. *māna-*, esp. cpds. *parimāṇa-*, *pramāṇa-*, lit. 'measure' : *mā-* 'measure' (12.54).

Most of the words for 'grow' were probably used primarily with reference to plant life, as is demonstrably the case for NE *grow*.

1. IE **aweg-* (**aug-*, **ug-*, and with *-s-* extension **aweks-*, etc., orig. desid. formation). Walde-P. 1.22 f. Ernout-M. 88 ff. Walde-H. 1.82 f., 850. Falk-Torp 1390. Feist 67, 541.

Grk. *αὐξάνω*, also *αὔξω*, *ἀέξω* (**ἀϝέξω*) 'increase' (trans.) with mid. *αὐξάνομαι* etc. 'grow' (intr., but NG *αὐξάνω* trans. and intr.); Lat. *augēre* 'increase' trans., rarely also intr. 'grow', inchoat. *augēscere* intr.; Goth. *wahsjan*, OE *weaxan* etc., general Gmc. (NE *wax* of the moon, but mostly arch.); Lith. *augti*, Lett. *augt;* Skt. *ukṣ-*, Av. *uxš-* (3sg. pres. *uxšyeiti*);

Toch. A *oks-* 'grow', *okṣu*, B *aukṣu* 'old' (SSS 426).

2. NGr. *μεγαλώνω*, fr. *μεγάλος* 'large' (12.54).

3. Lat. *crēscere* (> It. *crescere*, Fr. *croître*, Sp. *crecer*, Rum. *creşte*) : *creāre* 'produce, create', Arm. *sernem* 'beget', Lith. *šerti* 'nourish, feed', Grk. *κορέσκω*, *κορέννῡμι* 'satiate'. Walde-P. 1.408. Ernout-M. 232. Walde-H. 1.288.

4. Ir. *āsaim*, NIr. *fāsaim*, cf. Ir. *ās* 'growth', perh. (with loss of init. *w* in sandhi) fr. **wōks-* : Goth. *wahsjan*, etc. (above, 1). G. S. Lane, Language 13.21. Otherwise Strachan, IF 2.370.

Ir. *forbiur*, cpd. of *biru* 'carry' and *for* 'on', hence lit. 'carry on'. Pedersen 2.467 f.

W. *tyfu* : Lat. *tumēre* 'swell, be swollen', fr. an extension of the root **tēu-* in Skt. *tāuti* 'is strong', ChSl. *tyti* 'become fat', etc. Walde-P. 1.708. Ernout-M. 1064.

Br. *kreski*, prob. fr. Lat. *crēscere*. Henry 81. Loth, Mots lat. 154 (with some question on account of the short vowel).

5. ME *growe*, NE *grow*, Du. *groeien*, but OE *grōwan*, ON *grōa*, OHG *gruoan* only 'grow' (of plants), 'spring up, become green, etc.' : MHG *gruose* 'shoot of a plant, sap', Goth., ON, OHG *gras* OE *graes* 'grass', ON *grœnn*, OE *grēne*, OHG *gruoni* 'green', Lat. *grāmen* 'grass'. Many of the words for 'large, big' belong to inherited groups, one of them so widespread as to leave no doubt that it reflects the chief IE expression for 'great, large' with the familiar extensions beyond the notion of size.

Yet this group is represented in the present European languages only by NG *μεγάλος* or by dialect forms like NE *mickle* and *muckle* (also NE *much* but no longer used of size). As Lat. *magnus* was replaced by *grandis*, so Goth. *mikils*, OE *micel*, etc., were replaced in Scandinavian by ON *stōrr*, Dan., Sw. *stor*, in West Gmc. by the group represented by NE *great*, which in turn is now used mostly in secondary senses or with emotional value, and with reference to size, except in certain phrases, compounds, and place names, is replaced by *large* or its more colloquial and expressive equivalent *big*.

The words not of the inherited groups reflect such diverse notions as 'thick, coarse', 'abundant, spacious', 'swollen', 'strong', etc.

'Large' and 'small' (12.56) are, of course, understood here in reference to size. For the corresponding notions of quantity, amount, or number, which are partly expressed by the same terms but partly differentiated, see 13.15, 13.17.

Br.	*bihan*	NHG	*klein*		

There is no widespread inherited group for 'small' parallel to that for 'large', and the majority of the words are of uncertain origin. Several seem to be based upon expressive (symbolic) syllables. 'Crushed, ground (fine)' is the certain source for one word and a possible one for some others. A peculiar development from 'bright, shining' through 'clean, delicate, fine, thin', etc., is seen in NHG *klein* vs. NE *clean*.

Words for 'small' naturally develop secondary opprobrious senses, 'petty, trivial, mean', etc. Conversely, for certain groups (Goth. *leitils*, etc., and OE *lȳtel*, etc.) in which the majority of the cognates have the notion of 'deceit, abuse' or the like, one must reckon with the possibility that this is the more original and 'small' in the literal sense secondary (cf. the history of 'right' and 'left', 12.41, 12.42).

1. Grk. *μῑκρός*, Ion., early Att. *σμῑκρός*, also hypocoristic *μικκός* (attested as Dor., Boeot. and prob. widespread pop. form, as in proper names *Μίκκος* etc.) : Lat. *mīca* 'crumb, little bit', ON *smār* 'little', OHG *smāhi* 'little, insignificant', perh. fr. an extension of a root **smē-*, **smēi-* in words for 'smear, rub'. Walde-P. 2.685 f. Boisacq 885. Falk-Torp 1075.

2. Lat. *parvus* (also 'little' in quantity) : Grk. *παῦρος* 'little', pl. 'few', Lat. *paucī*, Goth. *fawai*, etc. 'few' (13.17). Walde-P. 2.75. Ernout-M. 737, 742.

Replaced in pop. Lat. and the Romance languages as 'small' by a variety of obscure forms apparently based on expressive syllables like **pikk*, **pitt*, **pits*, etc. REW 6494, 6544a, 6550. Goldberger, Glotta 18.52.

Late Lat. *pisinnus* (first in Att. Labeo for 'child', in Peregrinatio *a pisinno = a puero; ecclesia pisinna* 'small church', also in Marc. Emp., Isid., etc., cf. App. Prob. *pusillus non pisinnus*), *pitinnus*

(CIL 6.35915), *pitulus* (Anton. Itin.). Löfstedt, Peregrinatio 197.

It. *piccolo*, *piccino*, cf. Rum. *pic* 'drop', *picĭu* 'little child', Calabr. *pikka* 'little (in quantity)', etc.

Fr. (also Prov., Cat.) *petit*, cf. Rum. *piti* 'make oneself small, hide', It. dial. *pitu* 'small', *pitin* 'little' (in amount), etc.

Sp. *pequeño*, Port. *pequeno*.

Sp. *chico* (beside other Romance forms), prob. fr. an expressive *čikk*, parallel to *pikk*, etc. REW 2451b, 9653 (p. 806). Or fr. Lat. *ciccum* in its use for something small or worthless (as Plaut. Rud. 580)? So Diez 98, Gamillscheg 218 ("vielleicht"), M. Pidal, Manual 120 (on *ch*), 125.

Rum. *mic*, prob. (not for Lat. *mīca* 'crumb', but) fr. Grk. *μικκός* (above, 1). Densusianu 1.201. Puşcariu 1067. REW 5559.

3. Ir. *becc*, *bec*, NIr. *beag*, W. *bach*, *bychan*, Br. *bihan*, etym. dub. Walde-P. 2.150. Pedersen 1.385. Stokes 166.

4. Goth. *leitils*, ON *lītill*, Dan. *lille* (for *liden*, older *lidel*), Sw. *liten*, cf. ON *lītt* adv. 'little, badly', prob. : Goth. *lita* 'hypocrisy', OHG *liz* 'pretext', *lizzōn*, *lizitōn* 'simulate', MHG *liz, litze* 'humor', outside connections dub., perh. Grk. *λοιδορέω* 'abuse, revile'. IE **leid-* beside a parallel **leud-* with similar semantic relations in the following. Walde-P. 2.402. Falk-Torp 640 f. Feist 328.

OE *lȳtel*, ME *litel*, NE *little*, OHG *luzzil*, *luzzig*, MHG *lützel*, *lütze*, prob. : Goth. *liuts* 'hypocritical', *liutai* 'conjurers', OE *lot* 'deceit', ON *lȳta* 'dishonor, blame'; and further Russ. *ludit'* 'deceive', ChSl. *ludŭ*, SCr. *lud* 'foolish', etc.; cf. also Ir. *lūta* 'little finger'. Walde-P. 2.416. Falk-Torp 641.

Goth. *smals* (only superl. *smalista*), late ON *smalr* 'little', OE *smæl*, ME *smal*, NE *small*, OHG, MHG *smal* 'slender, narrow, small' (NHG *schmal* 'narrow'), etym. dub., perh. best as orig. 'ground fine' : Norw. dial. *smola* 'grind to pieces', Sw. *smula* 'break into crumbs', etc., fr. **smel-* beside **mel-* in Goth. *malan*, Lat. *molere*, etc. 'grind'. Cf. ChSl. *malŭ*, below, 6. Walde-P. 2.296. Falk-Torp 1076.

ON *smār*, Dan. *smaa*, Sw. *små* (in Dan. and Sw. only as pl. to *lille, liten*), OHG *smāhi*, *smōh*, MHG *smœhe* (in OHG often and in MHG mostly 'insignificant, despised, shameful', cf. NHG *schmach* sb. 'dishonor') : Grk. *μῑκρός* 'small' (above, 1).

Du., MHG, NHG *klein*, in MHG mostly 'pure, neat, fine, pretty' (cf. NHG *kleinod* 'jewel, gem'), OHG *kleini* 'shining, slender, fine', etc., OE *clǣne* 'pure, clean' (NE *clean*), prob. : Grk. *γλαινοί· λαμπρύσματα* Hesych., *γλήνεα* 'bright things, trinkets, stars', *γλήνη* 'pupil of the eye', *γελεῖν· λάμπειν, ἀνθεῖν* Hesych., and other words with common notion of 'bright, shining'. 'Bright' > 'clean, neat', as in Lat. *nitidus* > Fr. *net*, etc. (15.87), hence through 'fine, delicate' to 'small'. Walde-P. 1.623.

5. Lith. *mažas*, Lett. *mazs*, cf. OPruss. *massais* 'less', Lith. *možis* 'smallness, trifle', etym.? Walde-P. 2.228. Mühl.-Endz. 2.574.

Lat. *longus* (> It. *lungo*, Fr. *long*, Rum. *lung*); Goth. *laggs* (attested of time only), ON *langr*, OE *long*, etc., general Gmc.

3. Grk. *μακρός*, NG pop. *μακρύς* (after old *υ*-stem adjs. like *πλατύς*, *παχύς* etc. Hatzidakis, *Μεσ.* 2.12 f.), beside *μῆκος*, Dor. *μᾶκος* 'length' : Lat. *macer*, ON *magr*, OE *maegr*, etc. 'lean', Av. *mas-* 'long' (etc., below, 9). Walde-P. 2.223. Walde-H. 2.2.

4. Sp. *largo*, fr. Lat. *largus* 'abundant' (cf. Fr. *large*, etc. 'broad', 12.61).

5. Ir. *cīan* 'long, far, distant', as sb. 'long time', etym.? Deriv. fr. pron. stem in Ir. *cē* 'this', Grk. *ἐκεῖ* 'there', Lat. *-ce*, etc. (Stokes 75, Rozwadowski, Quaest. gram. 10) not convincing.

Ir. *long*, *lang*, loanword fr. Lat. *longus* or cognate? Vendryes, De hib. voc. 152.

Ir. *fota*, NIr. *fada*, cf. Ir. *fol* 'length', perh. : Lat. *vastus* 'vast, immense'. Walde-P. 1.220. Pedersen 1.32. Thurneysen, Gram. 50.

W., Br. *hir* = Ir. *sīr* 'long' (of time) : Lat. *sērus* 'late', Goth. *seiþus* 'late', etc. Walde-P. 2.462. Ernout-M. 933.

W. *maith*, MW *meith* fr. **mag-tio* : Ir. *mag-* in *mag-lorg* = *mor-lorg* 'big club', *magh-slaibh* 'big mountain', OW *digourmechis* 'added' (?), Ir. *do-for-maig* 'increases', etc., prob. fr. the root in Lat. *magnus* 'large', Grk. *μέγας*, etc. Loth, RC 40.342 f. Walde-P. 2.258 (without W. *maith*).

6. Goth. *laggs*, etc., above, 2.

7. Lett. *gar'š*, cf. Lith. *gargaras* 'lean, long-legged, long-necked horse', *gingaras* 'long-legged man', outside connections? Mühl.-Endz. 1.608.

8. Russ. *dlinnyj*, with sb. *dlina* 'length', vb. *dlit'* 'prolong' : ChSl. *produliti* 'prolong', Boh. *(pro)dliti* 'delay', etc., fr. the root seen in the general Slavic word, ChSl. *dlŭgŭ*, etc. (above, 1). Berneker 252 f.

9. Skt. *dīrgha-*, Av. *darəga-*, above, 1.

Av. *mas-* 'long', but superl. *masišta-*, OPers. *maθišta-* 'greatest' (12.55) : Grk. *μακρός*, above, 3.

12.58. 'Tall'. The sense of NE *tall* (used of persons, animals, trees, buildings, etc.), that is, 'of considerable height', 'vertically long', is most commonly covered by the usual words for 'high' (12.31), but in part, esp. with reference to persons, by those for 'large' (12.55), as Grk. *μέγας*, NG *μεγάλος* (but NG *ψηλός* more common even of persons), Fr. *grand*, NHG *gross*, or by those for 'long', as OE, ME *long* (cf. NED s.v.), Du. *lang*, Sw. *lång*.

Other words are:

1. Lat. (besides *celsus, altus, grandis, magnus, longus*) esp. *procērus*, cpd. of *prō* and the root of *crēscere* 'grow'. Ernout-M. 813.

2. NE *tall*, fr. ME *tal*, *talle*, mostly 'stout in combat, brave, bold', OE *getæl* 'quick, prompt' : OHG *gizal* 'quick', Goth. *untals* 'disobedient', prob. fr. same root as Gmc. **taljan* 'count, tell'. Walde-P. 1.808. NED s.v.

Words for 'short' (opposite of both 'long' and 'tall') are mostly from the notion of 'cut off' or 'broken off'. In one case the notion is abstracted from a noun denoting a (short) 'pole, goad', etc.

1. IE **mreĝhu-*, **mr̥ĝhu-*, root connection? Walde-P. 2.314. Ernout-M. 117. Walde-H. 1.115.

Grk. *βραχύς*; Lat. *brevis;* Av. *mərəzu-* in *mərəzu-jīti-* 'short-lived' : OHG *murgfāri* 'transitory, fragile', Goth. *gamaurgjan* 'shorten', OE *myrge* 'pleasant' (NE *merry*) through notion of 'shortening, entertaining'.

2. Byz., NG *κοντός* (also attested in late Grk. *κοντός* or *κονδός* 'short'; cf. LS s.v. and *κοντο-πορεία* prob. 'short way', Polyb.), adj. use abstracted (prob. first in cpds.) fr. *κοντός* (Hom. +) 'pole, pike, goad' : *κεντέω* 'prick, goad'. Hatzidakis, Festschrift Kretschmer 35 ff.

3. Lat. *brevis* : Grk. *βραχύς* (above, 1). Hence It. *breve*, Fr. *bref* (> ME *bref*, NE *brief*), now mostly of time and generally replaced by the following (but It. *breve* also spatial beside *corto*).

It., Sp. *corto*, Fr. *court*, Rum. *scurt* (*s-* fr. MLat. derivs. in *ex-*) fr. Lat. *curtus* 'cut off, broken, mutilated, shortened' : Grk. *κείρω* 'cut off, shear', etc. Ernout-M. 248. Walde-H. 1.316 f. REW 2421.

4. Ir. *gerr*, NIr. *gearr* : Skt. *hrasva-*

'short, little', Grk. χερείων 'poorer, worse', Ir. *gair, garait* 'short (of time)', etc. Walde-P. 1.604 f. Pedersen 1.83.

5. ON *skam(m)r*, OHG *skammēr*, beside OHG *hammēr* 'mutilated, feeble', perh. fr. *(s)kap-mó- : Grk. σκάπτω 'dig', κόπτω 'strike, cut off', etc. Walde-P. 2.560. Or fr. *skambh-no- : Av., OPers. *kamna-* 'small' in quantity or number? Walde-P. 2.601. Falk-Torp 1003.

Dan., Sw. *kort*, Icel. *kortr*, Du. *kort*, OHG *churz, kurt, churt*, MHG, NHG *kurz*, prob. fr. Lat. *curtus* (cf. It. *corto*, above, 3). Falk-Torp 568. Weigand-H. 1.1179.

OE *sceort*, ME *schort, short*, NE *short*, OHG *scurz* : ON *skort, skortr* 'lack', *skorta* 'be lacking', OE *sceortian* 'become shorter, be lacking', MHG *scherze, scherzel* 'cut off piece', etc., fr. an extension of the IE root *(s)ker- in Lat. *curtus*, etc. (above, 3). Falk-Torp 1019. NED s.v. *short*.

6. Lith. *trumpas* : *trupiti* 'crumble, break in fragments', *trupus* 'brittle', OPruss. *trupis* 'block of wood', Grk. τρυπάω 'perforate, bore', etc. Bezzenberger, BB 27.142. (Walde-P. 1.732).

Lith. *įsas, ysas* (NSB, but prob. obs.), Lett. *īss*, OPruss. (acc. sg.) *īnsan*, etym.? Mühl.-Endz. 1.837. Trautmann, Altpreuss. 346.

7. ChSl. *kratŭkŭ*, etc., general Slavic : ChSl. *sŭ-kratiti* 'shorten', Russ.-ChSl. *črĭtu, črěsti* 'cut', fr. the root in Lat. *curtus*, OE *sceort*, etc. (above, 3, 5). Berneker 576 f. Walde-P. 2.579.

8. Skt. *hrasva-* : Ir. *gerr* (above, 4).

Words for 'wide, broad' rest on the more general notion of 'spread out, spacious, extensive', and the specialization to extent in a given direction, that is 'wide' in distinction from 'long' and the opposite of 'narrow', is only partial. For all of them may also be used in the more general sense. In the two Gmc. groups represented by NE *broad* and *wide* the wider sense is generally stronger in the second group, and dominant in NHG *weit*, which is no longer used as the opposite of *eng* 'narrow', while, conversely, NE *wide* is the technical term in actual measurement (e.g. *six inches wide by three feet long*).

1. IE *pḷtu-, *pḷtn̥o-, etc., fr. an extension of *pel- (*pelə-, *plā-, etc.) in words for 'spread out, flat' as Lat. *plānus* 'flat', ChSl. *polje* 'field', OE *feld* 'field', etc. Walde-P. 2.99 f., 61 f. Thurneysen, Gram. 129, 131.

Grk. πλατύς; Ir. *lethan*, NIr. *leathan*, W. *llydan*, Br. *ledan* (beside W. *lled*, Br. *led* 'breadth'); Lith. *platus*, Lett. *plats*; Skt. *pṛthu-*, Av. *pərəθu-*; Arm. *lian*.

2. IE *weru-, *uru-, etc., root connection? Walde-P. 1.285.

Grk. εὐρύς; Skt. *uru-* beside *varas-* 'breadth', Av. *vouru-* (in cpds. as *vouru-kaša-* 'having broad bays', *vouru-gao-yaoti-* 'possessing broad meadows', etc.).

3. Byz., NG φαρδύς, orig. dub. G. Meyer, Neugr. Stud. 4.94, connects with NG dial. φάρδος 'large (meal-)bag', loanword fr. Ital. *fardo* or its source Arab. *farda* 'bundle of goods'. Hatzidakis, Μεσ. 2.29, suggests deriv. fr. εὐφραδής with semantic extension through 'copious in speech' > 'wide' in general. But the actual use of the rare εὐφραδής connotes skill, rather than copiousness, of speech.

4. Lat. *lātus* (> Rum. *lat*), prob. fr. *stlātos (cf. *stlatta*, Festus) : ChSl. *stĭlati* 'spread out', *stelĭ, postelja* 'bed'. Walde-P. 2.643. Ernout-M. 527 f. Walde-H. 1.172.

It. *largo*, Fr. *large* (Rum. *larg* 'extensive, spacious', but under influence of Fr. *large* sometimes used for *lat* 'wide', cf. Tiktin s.v.), fr. Lat. *largus* 'abundant, copious', etym.? Ernout-M. 524. Walde-H. 1.764. REW 4912.

Sp. *ancho*, fr. Lat. *amplus* 'large, spacious, abundant', etym.? Ernout-M. 47. Walde-H. 1.42. REW 430.

5. Ir. *lethan*, etc., above, 1.

Ir. *fairsiung*, W. *eang* 'broad, ample', cpds. (Ir. *for-ess-*, W. *ess-*) of *enghi-, etc. : OE *enge* 'narrow', etc. (12.62). Walde-P. 1.62. Pedersen 2.10.

'Thick' in density may be expressed by the same word as that for 'thick' in dimension, as in NE *thick* (soup, hair, woods, etc.) beside which *dense* is in more restricted use (*dense* or *thick* woods, forest, etc., only *dense* crowd, but never *dense* soup or hair). But more commonly it is expressed by quite different words, with primary notion of compactness.

1. Grk. πυκνός, Hom. πυκινός, beside adv. πύκα 'thickly', πυκάζω 'cover up tight', perh. : Alb. *puthë* 'kiss' (as orig. 'embrace'). Walde-P. 2.82. Boisacq 826.

NG πηχτός, fr. class. Grk. πηκτός 'fixed, jointed' (: πήγνῡμι 'fix'), also of milk 'curdled'.

2. Lat. *dēnsus* (> Rum. *des*; lit. words It., Sp. *denso*, Fr. *dense*) : Grk. δασύς 'shaggy, rough, thick with leaves, trees, etc.' Walde-P. 1.793 f. Ernout-M. 261. Walde-H. 1.341.

Lat. *spissus* (> It. *spesso*, Fr. *épais*, Sp. *espeso*) : Grk. σπιδνόν· πυκνόν, συνεχές, πεπηγός Hesych., ἀσπιδής 'extended', Lett. *spiest* 'press', etc., dental formations fr. the root in Skt. *sphāyati* 'increases, thrives, grows fat'. Walde-P. 2.658. Ernout-M. 966.

Lat. *crassus*, usual for 'thick' of dimension (12.63) but also used of density, esp. of clouds, darkness, dust, etc.

It. *fitto*, fr. Lat. *fīctus* 'fixed'. REW 3280.

3. Ir. *dlūith* : *dluimm* 'mass, multitude', W. *dylwf* 'bundle', outside connections? Pedersen 1.169 f.

NIr. *tiugh*, W. *tew*, Br. *teo* also 'thick' of dimension (12.63).

Br. *stank*, adj. fr. *stank* 'pool' (fr. OFr. *estanc* 'pool'), with sense 'thick' fr. phrase for stagnant water? Henry 252. Ernault, Glossaire 651.

4. ON *þykkr*, OE *þicce*, OHG *dicchi*, etc. (12.63) are also used with reference to density, but in this sense partly replaced by forms of the following group. Thus NHG still *dicke suppe, dicker* or *dichter wald*, but *dicht* the more distinctive word in this sense. Similarly in Dan. and Sw.

ME *thycht*, fr. an ON *þēhtr (cf. *þēttr* 'water-tight'), this with Dan. *tæt*, Sw. *tät*, MLG, MHG *dīhte*, Du., NHG *dicht* : Lith. *tankus* 'thick, standing close together', fr. the root in Goth. *þeihan* 'thrive' (= 'become solid'), Ir. *contēcim* 'coagulate', Skt. *tañc-* 'contract', etc. NED s.v. *thight*, adj. Falk-Torp 1313. Walde-P. 1.725 f. Weigand-H. 1.352.

5. Lith. *tankus*, see just above.

Lith. *tirštas* 'thick' of liquids (this perh. fr. 'turbid'), beside *tiršti* 'become thick' : *teršti* 'soil, pollute', East Lith. *tresti* 'manure', Lat. *stercus* 'dung, excrement', W. *trwnc* 'urin, lye', etc. Walde-P. 2.641.

Lett. *biezs*, also 'thick' of dimension (12.63).

6. ChSl. *čęstŭ* (renders πυκνός, but mostly in temporal sense 'frequent' as in modern Slavic; cf. esp. adv. *čęsto* 'often') : Lith. *kimšti* 'stuff full'. Berneker 154 f.

SCr. *gust*, Boh. *hustý*, Pol. *gęsty*, Russ. *gustoj* (Russ.-ChSl. *gustŭ*), Slavic *gąstŭ fr. *gonĝ-to- : Lith. *gunga* 'ball (of thread, of the foot, etc.)', *gungti* 'bend, crook', Grk. γόγγρος 'growth on tree-trunks', γογγύλος 'rounded', etc., all prob. fr. a root meaning 'to swell, become thick', or the like. Berneker 341, 343. Walde-P. 1.638.

7. Skt. *ghana-*, beside sb. *ghana-* 'solid mass, lump, club', fr. *han-* 'strike, slay'. Uhlenbeck 84.

Skt. *sāndra-*, etym.? Uhlenbeck 333.

Skt. *bahula-*, also 'thick' of density (12.63).

'Thin' comes from the notion of 'stretched out' in the large inherited group, and similarly from 'spread out' in the Baltic words. Otherwise it is from various sources through the notion of 'fine, delicate'.

1. IE *tenu-, *tn̥u- with meaning 'thin' fr. 'stretched', deriv. of *ten- in Skt. *tan-*, Grk. τείνω, Lat. *tendere*, etc. 'stretch' (9.32). Walde-P. 1.724. Ernout-M. 1029.

Lat. *tenuis* (> lit. words It., Sp. *tenue*, Fr. *ténu*); Ir. *tana*, W. *teneu* (*e* fr. 2. Grk. λεπτός, lit. 'peeled' (of grains) hence 'fine, thin' : λέπω 'peel, husk', λέπος 'rind, husk', etc. Walde-P. 2.424. Boisacq 569.

Byz. πτενός (Const. Porph.), NG pop. φτενός, perh. fr. πτηνός 'flying, winged' (Eust. 855.42, Koraes, Ἄτακτα 1.123), despite the difficulty in form (ε fr. πτερόν?) and sense ('thin' as what easily flies?).

3. It. *sottile*, Rum. *subțire* fr. Lat. *subtīlis* 'fine, delicate' (of thread, Lucr.), prob. orig. a weavers' term 'finely woven' with the last part related to *tēla* 'web, loom', *texere* 'weave'. Ernout-M. 995. REW 8399.

Sp. *delgado*, fr. Lat. *delicātus* 'charming, tender, delicate'. REW 2538.

4. Ir. *sēim* 'thin, slender', of liquor 'mild, thin', perh. fr. *spei-mi- : Grk. σπι-νός 'lean', fr. the root *spēi- in Grk. σπάω 'draw out, pull, pluck out', OHG *spannan* 'stretch, span', etc. Walde-P. 2.656. Stokes 295.

5. Lith. *plonas*, Lett. *plāns*, the latter also 'flat' and 'weak' : Lat. *plānus* 'flat', etc. (12.71), with meanings 'flat' and 'thin' fr. 'spread out', common to the large group of cognates. Walde-P. 2.61. Mühl.-Endz. 3.330.

'Thin' in density is expressed by the old words for 'thin' in dimension in Celtic and Germanic, but elsewhere mostly by different words based on such notions as 'clear, bright' (what one can see through, hence 'thin') or 'loose, separated'. Many of these come to be used also or mostly for 'rare, scarce'.

But even where there are different words, there is some overlapping in idiomatic usage.

1. IE *erə-, *rē-, etc. in various derivs. meaning 'loose, thin (not dense), separated' etc.; vb. forms in Lith. *irti* 'dissolve, separate', ChSl. *oriti* 'dissolve, destroy', etc. Walde-P. 1.142 f. Ernout-M. 852.

Lat. *rārus* (> It. *rado*, Sp. *ralo*, Rum. *rar*; lit. words It., Sp. *raro*, Fr. *rare*); Lith. *retas*, Lett. *rets*; (with *-dh-* extension) ChSl. *rědŭkŭ*, etc., general Slavic; Skt. *vi-rala-*.

2. Grk. μανός, μᾱνός (*μανϝός) 'thin, sparse' (opp. to πυκνός in Emped., etc.) : Arm. *manr* 'small', Ir. *menb* 'small', Lith. *menkas* 'small, petty', Skt. *manāk* 'a little' (adv.), Toch. A *maṅk*, B *meṅki* 'fault, lack', Hitt. *maninkwess-* 'become short' (Sturtevant, Language 6.217 f., Hitt. Gloss. 97). Walde-P. 2.266 f. Ernout-M. 618.

Grk. ἀραιός (ἀ- Hdn.), in earliest use 'slender, narrow', later 'thin' vs. πυκνός, etym.? Sommer, Gr. Lautstud. 114.

Byz., NG also (cpd. with ἀνα-) ἀνάριος.

3. Fr. *clair*, Sp. *claro*, lit. 'clear', hence 'letting the light through, not dense', fr. Lat. *clārus* 'clear, bright'. Hence cpd. Fr. *clairsemé* (with *semé* 'sown'), used esp. of grass, grain, trees.

4. Ir. *tana* (cf. Thes. 2. xxii *is tana an dub* 'the ink is thin'), W. *teneu*, Br. *tano*, also 'thin' of dimension (12.65).

5. ON *þunnr*, etc., general Gmc. for 'thin' in both senses (12.65).

Sw. *gles*, older and dial. *glis* : older and dial. Sw., Norw. *glīsa* 'peep through', OE *glisian* 'shine, glisten', etc. Hellquist 286.

In several languages 'shallow' is expressed simply as 'not deep' or 'little deep'. So Grk. ἀβαθής, Lat. *nōn altus*, It. *poco profondo*, Fr. *peu profond*, etc., NIr. *ēadoimhin* (Ir. *ēdomain* quotable?), Du. *ondiep*, NHG (*untief* rare, but sb. *untiefe* common) *nicht tief*.

Most of the other words for 'shallow' were first used only with reference to water, some still so restricted, but more of them extended to 'shallow' dishes, etc. Words for 'low, short' and 'flat' are sometimes used for 'shallow'.

1. NG ρηχός, back-formation to Grk. ῥᾱχία, Ion. ῥηχίη 'roar of the breakers, rocky shore' (: ῥάσσω, Ion. ῥήσσω 'strike, dash') through 'shoals, shallows' (cf. βράχεα καὶ ῥηχίαι καὶ τενάγεα Arr. Ind. 38.8), and with η in the κοινή (as also in the vb. ἑήσσω), perh. through pop. association with ῥήγνῡμι 'break'. Now used not only of 'shallow' water, but of 'shallow' dishes, etc.

2. Lat. *brevis* 'short' (11.59) sometimes 'shallow', as with *puteus* 'well', *vada* 'fords'; so *brevia* 'shoals', like Grk. βράχεα 'shoals' : βραχύς 'short'.

It. *basso*, Fr. *bas*, Sp. *bajo* 'low' (12.32), also for 'low' = 'shallow' water.

3. W., Corn., Br. *bas* (Br. *bas* Vallée, not in Ernault), fr. VLat. *bassus* 'low' (12.32), hence of 'low' = 'shallow' water. Loth, Mots lat. 137.

4. ON *grunnr*, Dan., Sw. *grund* : sbs. ON *grunnr* 'bottom', OE *grund* 'bottom, ground', etc. (12.34). Falk-Torp 352.

OE *sceald*, ME *schold(e)*, NE *shoal*, used only with reference to water, beside ME *schalowe*, NE *shallow* used also of dishes, etc., also LG *schol* 'shallow', etym. dub. Possibly through the notion of 'thin layer' : OE *scealu* 'shell, dish', etc. NED s.v. *shoal*.

MHG *sīhte*, NHG *seicht* 'shallow', but only of water or figurative : OHG *sīhan* 'flow slowly, drip', Skt. *sic-* 'pour out', etc., or (as fr. **senktis-*) : Lith. *senku*, *sekti* 'fall, sink' (of water), *seklus* 'shallow'. Walde-P. 2.473. Falk-Torp 1228. Weigand-H. 2.835.

NHG *flach* 'flat' (12.71), used also of what is approximately flat in contrast to high or deep, as of 'shallow' dishes, etc. Paul, Deutsches Wtb. s.v.

5. Lith. *seklus* (of 'shallow' water), Lett. *sekls* (also of dishes, etc.) : Lith. *senku*, *sekti* 'fall, sink' (of water), ChSl. *sęknąti* id., etc. Walde-P. 2.473. Mühl.-Endz. 3.814.

Lith. *lėkštas* 'flat' (12.71) used esp. of 'shallow' dishes.

6. Late ChSl. *mělŭkŭ*, OSCr. *mioki*, Boh. *mělký*, Pol. *miałki* (also 'finely ground'), Russ. *melkij* (also 'small, fine'), prob. through 'finely ground, fine' : ChSl. *mlěti*, Lat. *molere*, etc. 'grind'. Berneker 2.48.

SCr. *plitak*, Pol. *płytki* : SCr. *plivati*, Pol. *pływać*, ChSl. *plavati* 'swim, float' (11.34), hence of fordable water (cf. Pol. *płyt* 'a raft, float'), that is, 'shallow', then also of dishes. Brückner 422.

The majority of the common words for 'flat' belong to an inherited group with basic notion of 'spread out'.

1. But many words for 'equal' (12.91) or 'even' are also used for 'level, flat'. With a few exceptions (where there seem to be no more common words for 'flat') these are not included in the list. Thus Grk. ὁμαλός 'even, level' : Lat. *similis* 'similar', Grk. ὁμός 'the same', Goth. *sama* 'the same', Skt. *sama-* 'equal, same', also 'even, level, flat' (cf. *sama-bhūmi-* 'plain' sb.); Grk. ἴσος 'equal' also 'level, flat', NG ἴσιος 'even', 'straight', and 'level, flat'; Lat. *aequus* 'equal' and 'level, flat'; Fr. *uni* 'united, uniform' and 'level, flat'; Goth. *ibns*, OE *efen*, etc. (see below); Lith. *lygus*, Lett. *līdzens* 'equal' (: Goth. *ga-leiks* 'like', etc.) and 'level, flat'; ChSl. *ravinŭ* (renders πεδινός Lk. 6.17, elsewhere in Gospels ἴσος), etc., general Slavic for 'equal, even' and so sometimes 'level, flat', whence words for 'plain' sb. (1.23) : Goth. *rūms* 'roomy, spacious', Av. *ravah-* 'open space', Lat. *rūs* 'country', etc.

2. Derivs. of IE **pelə-*, **plā-* with notion of 'spread out flat', seen in Lith. *ploti* 'flatten' etc., also in several words for 'wide, broad' (12.61). Walde-P. 2.61, 90 f., 99 f. Ernout-M. 776. REW 6581, 6586. Falk-Torp 230.

Br.	*kleus*	NHG	*hohl*		

'Hollow' is understood here primarily in the less common sense of NE *hollow* as 'having a depression in the surface, concave' (NED s.v. *hollow*, adj. 2) rather than in its more usual sense of 'having an empty space inside', as opposite of *solid*. The latter sense is, to be sure, common also to many of the other words listed and indeed dominant in several. But words that are used for 'hollow' only in this latter sense as NG κούφιος (: Grk. κοῦφος 'light, unsubstantial', late also 'empty'), and others listed under 'empty' (13.22), Pol. *próżny*, Russ. *pustoj*, Skt. *çūnya-*, are not included in this list.

1. Derivs. of IE **k̑eu-* seen in numerous words with common notion of curved, whether convex (as Skt. *çvā-*

'swell', Grk. κυέω 'be pregnant', κῦμα 'wave', etc.) or concave, as here. Walde-P. 1.365 ff. Ernout-M. 167, 203. Walde-H. 1.191.

Grk. κοῖλος (*κοϝιλος); Lat. **covus* (> Port. *covo*), *cavus* (> It. *cavo*); Ir. *cūa*, W. *cau* (this with Br. *keo* 'cave', fr. **kowio-*, cf. Loth, Mots lat. 145).

2. NG βαθουλός, dim. of βαθύς 'deep' (12.67).

3. Fr. *creux*, OFr. *crues*, Prov. *cros*, orig. dub., but prob. Celtic. REW 2257. Gamillscheg 277. Bloch 1.190.

Br. *kleus*, fr. Fr. *creux* with *l* fr. *kleuz* 'ditch'. Henry 70.

5. ON *holr*, OE, OHG *hol*, etc., general Gmc. (Sw. *ihålig*, *hålig* fr. *hål* 'hole', sb. fr. OSw. *hul* adj.), perh. : Grk. καυλός 'stalk of a plant, shaft of a spear, quill', Lat. *caulis* 'stalk of a plant', etc., Skt. *kulya-* 'bone', all fr. the notion 'hollow (shaft)'. Walde-P. 1.332. Walde-H. 1.189. Otherwise (: OE *helan* 'hide', etc.) Falk-Torp 427.

6. Lith. *dubus*, Lett. *duobs* : Goth. *diups* 'deep', etc. (12.67).

7. SCr. *izduben*, lit. 'hollowed out' fr. *iz-dupsti* (1sg.-*dubem*) 'hollow out' : Russ. *dolbat'* 'chisel, mortise', etc. Berneker 251.

Boh. *dutý*, through 'blown up, swollen', fr. the root of OBoh. *dunuti* 'blow' (ChSl. *dunąti*, etc. Berneker 236), Boh. *duoti* 'blow', refl. 'swell'.

Pol. *(wy)drążony*, lit. 'hollowed out', fr. *(wy)drążić* 'hollow out, dig out', older *drożony*, *drożić*, etc. : Boh. *drážiti* 'groove', Russ. *dorožit'* 'flute', etc. Berneker 212. Brückner 97.

Russ. *vognutyj* 'bent, concave', fr. *vognut'* 'bend, fold in' (9.15).

Russ. *glubokij* 'deep' (12.67), also 'hollow' (of dishes, etc.).

8. Skt. *uttāna-* 'stretched out' (fr. *tan-* 'stretch'), also 'hollow'.

Many of the words for 'straight' are the same as those for 'right, upright'. Some words for 'equal, even' are used also for 'straight', as well as 'level, flat'. Others are of various sources.

1. Derivs. of IE **reĝ-* in Skt. *ṛj-* 'straighten out, make straight', Grk. ὀρέγω 'reach, stretch', Lat. *regere* 'direct, lead', Ir. *rigim* 'stretch out', Goth. *uf-rahjan* 'stretch out', etc. Walde-P. 2.362 ff. Ernout-M. 855, 856 ff. Falk-Torp 891. REW 2648.

Lat. *rēctus* (> Sp. *recto*), *dīrēctus*, VLat. **dērēctus* (> It. *diritto*, *dritto*, Fr.

2. Grk. εὐθύς, Ion. ἰθύς, relation and orig. obscure. Walde-P. 2.450. Boisacq 294, 370.

Grk. ὀρθός (ϝορθο-, *ϝορθϝο-), orig. and in actual use mostly 'upright, vertically straight' : Skt. *ūrdhva-* 'upright, raised', *vṛdh-* 'increase', mid. 'grow', Av. *varəd-* 'increase', etc. Walde-P. 1.289. Boisacq 711.

NG ἴσιος 'straight, even, flat', fr. ἴσος 'equal' (12.91).

3. W. *union*, cpd. of *un-* 'one' and *iawn* 'right, just' = Br. *eeun* 'straight, right, just', etym. dub. (see 16.73).

4. ON *beinn*, Norw. *bein*, Sw. dial. *ben*, beside ON *beinka* 'straighten', etym.? Falk-Torp 70. Torp, Nynorsk 20.

Dan. *lige*, also 'equal, alike', weak form of *lig* 'like, similar, equal to' (: ON *līkr*, Goth. *galeiks* 'like', etc.). Falk-Torp 642.

ME *streiȝt*, NE *straight*, orig. 'stretched out, extended', pple. of ME *strecche*, NE *stretch*. NED s.v. *straight*.

NHG *gerade*, fr. MHG *gerat*, *gerade* 'quick (with the hand), agile, capable', OHG *giradi* 'velocissimus' : OE *gerœde* 'swift', related to OHG *(h)rato*, OE *hrœde* id. Semantic development through attested 'quickly grown, shooting up long and slim', Weigand-H. 1.685. Paul, Deutsches Wtb. 201.

5. Lith. *tiesus*, Lett. *tiešs* and *taisns* (the latter also 'even, like, just, true') beside Lith. *tiesti* 'make straight', *taisyti* 'prepare', Lett. *taisīt* 'make, prepare' : Lith. *teisus* 'just, true', OPruss. *teisi* 'honor' (fr. 'uprightness'), Slav. *těsiti* 'comfort' (fr. 'set right'), ChSl. *tichŭ* 'calm, quiet' (fr. 'even'), root connection? The sense 'straight, even' seems the more original in the group. Mühl.-Endz. 4.124, 125, 215.

Lett. *līdzens* 'equal, even' (12.91) used reg. for 'straight' in NT, Mk. 1.3, Lk. 3.4, 5, etc. (this use not given by Mühl.-Endz. s.v.).

6. ChSl. *pravŭ* (the regular word for εὐθύς in Gospels), SCr. *prav* (also 'right, upright, just' as Boh. *prav*, Pol. *prawy*, Russ. *pravyj*), prob. as orig. 'straight, forward' : Skt. *pravaṇa-* 'inclined forward, steep', Lat. *prōnus*, Grk. πρανής 'inclined forward', derivs. of IE **pro*, **prō*, etc., 'forward, in front' in Skt. *pra*, Grk. πρό, etc. Walde-P. 2.38.

SCr. *ravan*, Boh. *rovný*, also 'equal, even, level', the prevailing Slavic meaning (see 12.91).

Boh. *přímý*, Russ. *prjamoj* : ChSl. *prěmŭ*, esp. adv. *prěmo* 'over against', orig. obscure. Meillet, Études 2.427. Vondrák 1.553. Gebauer 1.41.

Pol. *prosty*, also 'simple' the usual Slavic sense, as in ChSl. *prostŭ* (for ἁπλοῦς in Gospels, but also for ὀρθός in Supr., etc.), Boh. *prostý*, Russ. *prostoj*, prob. orig. 'straightforward' (hence 'upright, straight' and 'simple'), fr. **prosto-* (in form like Skt. *prastha-* 'plateau'), cpd. of **pro* 'forwards' and a vbl. adj. fr. **stā-* 'stand'. Walde-P. 2.604. Meillet, Études 1.611. Brückner 439.

Br.	*kamm, kromm, gwar*	NHG	*krumm*		

NE *crooked* is clearly the most distinctive opposite of *straight*. But many of the words listed as such opposites are terms that answer to both *crooked* and *curved*, that is, they are used without differentiation (except in technical language) as to whether the deflection is in the form of a curve or one or more sharp angles. They are derived from a variety of roots for 'bend' or 'turn'.

1. Grk. σκολιός : OHG *scelah* 'oblique, squinting', OE *sceolh* 'oblique, wry', Skt. *kuṭila-* 'crooked', NPers. *kul* id., etc., fr. IE **(s)kel-* in words for 'bent, crooked' (esp. in the name of crooked parts of the body, Grk. σκέλος 'leg', etc.) Walde-P. 2.598. Boisacq 873.

Grk. καμπύλος, beside καμπή 'a bend, crook', κάμπτω 'bend' : Lith. *kumpas* 'crooked', *kumpti* 'bend', Lett. *kumpt* 'become crooked, hunched', Goth. *hamfs*, OHG *hamf* 'mutilated', etc. Walde-P. 1.350. Boisacq 404.

Grk. ἀγκύλος : ἄγκιστρον, Lat. *uncus* 'hook', etc. (12.75).

Grk. στρεβλός, στραβός (latter 'squinting', but NG 'crooked' in general), fr. a by-form of root in στρέφω 'turn' (10.12). Boisacq 918.

2. Lat. *curvus* 'crooked, curved' (> Sp. *corvo*, *curvo*; It. *curvo*, Fr. *courbe*, mostly 'curved') : Grk. κυρτός 'humped, convex', Ir. *cor* 'circle', Av. *skarəna-* 'round', etc., fr. a root **(s)ker-* with numerous extensions. Walde-P. 2.568. Ernout-M. 248. Walde-H. 1.317 f.

Lat. *prāvus* (partly 'crooked' in lit. sense, but mostly fig. 'perverse, wrong'), etym. dub. Walde-P. 2.86. Ernout-M. 806 f.

It. *torto* (*storto*, *distorto*), Sp. *torcido*, lit. 'twisted', pples. of It. *torcere*, Sp. *torcer* 'twist' (10.13); Fr. *tortueux*, fr. Lat. *tortuōsus*; Fr. *tortu* (so in NT, Lk. 3.5, but now obs. or arch.), re-formed fr. *tort* : Gamillscheg 851.

Rum. *strîmb* (cf. It. *strambo* 'squinting, bandy-legged, distorted, queer'), fr. VLat. *strambus* for Lat. *strabus* 'squinting', this fr. Grk. στραβός (above, 1). Ernout-M. 985. REW 8281. Puşcariu 1658.

3. Ir. *camm*, NIr., W. *cam*, Br. *kamm* : Gall. *cambio-* (in *Cambiodūnum*), Gallo-Lat. *cambiāre* 'exchange' (orig. 'turn') Grk. σκαμβός 'crooked, bowed (of the legs)', Sw. *skumpa* 'limp', etc. Walde-P. 2.539 f. Pedersen 1.118 f.

Ir. *cūar* (K. Meyer, Contrib. 544), prob. fr. **kom-waro-* : Br. *gwar* 'crooked, curved', this : Lat. *vārus* 'bowlegged'. Loth, RC 42.83.

Ir. *cromm*, NIr. *crom*, W. *crwm*, Br. *kromm*, prob. fr. **krombos* : OE *gehrumpen* 'wrinkled', OHG *hrimfan* 'to wrinkle', Grk. κράμβη 'cabbage' (as orig. 'curly'), etc. (Walde-P. 2.589 ff., with-

out the Celtic words). G. S. Lane, Language 8.296.

4. Goth. *wraiqs* (= OFris. *wrāk* 'crooked'), prob. fr. a by-form of **wreik̑-* in OE *wrīgian* 'turn, move, tend', ME *wrien* 'swerve, turn obliquely' (whence adj. ME *wrye*, NE *wry*), Grk. ῥοικός 'crooked' (esp. of legs), Av. *urvis-* 'turn around'. Relationship of Grk. ῥαιβός (esp. of legs, like ῥοικός) obscure. Walde-P. 1.279. Feist 573. Falk-Torp 1397.

ON *krōkōttr*, Dan. *kroget*, Sw. *krokig*, ME *croked*, NE *crooked*, fr. ON *krōkr*, Dan. *krog*, Sw. *krok*, ME *crok* 'hook' (12.75).

OE *crumb* (rarely in general sense, mostly of persons or parts of body), OHG *crumb*, MHG *krump*, NHG *krumm*, MLG *krum* (> Dan., Sw. *krum*), beside OE *crump*, Du. *krom*, OHG *krumpf* id. : OHG *krimpfan* 'draw together, shrink', ON *kreppa* 'clinch, clasp', Russ. *gorb* 'hump, bump', *gorbit'* 'bend, bow', Ir. *gerbach* 'wrinkled', etc. Walde-P. 1.596.

OE *þweorh* : ON *þverr* 'crosswise', OHG *dwerah* 'slanting, oblique, across' (NHG *zwerch* 'across'), Goth. *þwairhs* 'angry', root connection dub., but possibly as orig. 'cut (crosswise)' : Av. *θwarəs-* 'cut', Grk. σάρξ 'flesh', root **twerk̑-*; or as 'twisted' fr. the root in OHG *dweran* 'turn rapidly', OE *þweran* 'twirl, stir', Skt. *tvṛ-* 'hasten', etc. Walde-P. 1.736. Words for 'hook' belong to an inherited group based on the notion of 'bent', or are cognate with others for various bent or crooked objects. Besides the words listed, there are, of course, many others in less common or more specialized use.

1. Derivs. of IE **ank-* in Skt. *añc-* 'bend', etc. (9.14). Walde-P. 1.60 f. Ernout-M. 1124. Walde-H. 1.46.

Grk. ἄγκιστρον, NG ἀγκίστρι (both mostly 'fishhook', but also general); Lat. *uncus*, late *uncīnus* (> It. *uncino*); ChSl. *ąkotĭ*; Skt. *añka-* (also 'bend', esp. 'side between breast and hip'), *añkuça-*, Av. *aka-* ('hook' or 'peg', part of the equipment for harnessing horses to wagon), *anku-* (in *anku-pəsəmna-* 'adorned with hooks or clasps'); also derivs. in special sense 'fishhook', as MIr. *ēcath*, OHG *ango*, *angul*, ON *ǫngoll*, OE *angel*, etc.

2. Lat. *uncus*, above, 1.

Lat. *hāmus*, esp. 'fishhook' (> It. *amo*, Fr. *hain* arch., dim. *hameçon* id.), etym. dub., perh. : Grk. χαμός· καμπύλος Hesych.; or (fr. **hāb-mos*) : χαβόν· καμπύλον, στενόν Hesych. Ernout-M. 444. Walde-H. 1.633. REW 4025.

It. *gancio* (> Sp. *gancho*) fr. Turk. *kanca* 'hook, barb, grapnel' (hence also Rum. *cange* 'claw, grapnel'). REW 4673.

Fr. *croc* (dim. *crochet*), fr. ON *krōkr*, etc. (below, 4). REW 4780.

Sp. *garabato*, deriv. of Lat. *carabus* 'crab' (fr. Grk. κάραβος 'crayfish, beetle'). REW 1671.

Rum. *cîrlig*, orig.? Tiktin 296.

3. Ir. *baccān*, fr. *bacc* 'turn, crook, bend, angle, hollow' (K. Meyer, Contrib. 160), W. *bach*, Br. *bac'h* 'hook', perh. : (or back-formation fr.?) Lat. *baculum* 'staff'. Walde-P. 2.105. Walde-H. 1.92.

NIr. *cromōg*, fr. *crom* 'crooked' (12.74).

NIr. *crūca*, prob. fr. NE *crook*.

Br. *krog* fr. Fr. *croc*. Henry 82.

4. ON *krōkr* (> ME *crok*, NE *crook*), Dan. *krog*, Sw. *krok* : OHG *crācho* 'hooked tool', ON *kraki* 'boathook, sort of anchor, stake', OE *crycc*, OHG *krucha*, NHG *krücke* 'crutch, crook', fr. guttural extensions of the root **ger-* 'turn', cf. Lith. *grežti* 'bore', Lett. *griezt* 'turn, wind', etc. Walde-P. 1.593 f. Falk-Torp 581.

OE *hōc*, ME *hok*, NE *hook*, OHG *hāko*, MHG *hāke(n)*, NHG *haken*, Du. *haak*, also with different vowel, Dan. *hage*, Sw. *hake* (= OE *haca* 'bolt, lock') fr. a root **keg-*, **keng-*, cf. Lith. *kengė* 'clamp, iron piece on door-jamb for catching bolt', Ir. *alchaing* 'rack for hanging up arms', Russ. *kogot'* 'claw, talon', etc. Walde-P. 1.382. Falk-Torp 371.

5. Lith. *kablys* (also *kablelis*, *kabliukas*, *kabė*, etc.) : *kabėti* 'hang' (intr.), *kabinti* 'hang' (trans.), prob. ChSl. *skoba* 'fibula', Russ. *skoba* 'cramp, clamp', fr. **(s)kab-*, by-form of **(s)kamb-* in

Words for 'corner' are connected with roots for 'bend' or with words which, whatever their root connections, suggest the notion of a sharp bend or angle, as those for 'knee', 'elbow', 'wedge', 'hook'. From such a common notion arises the interchange, observed in several groups, between 'corner' and 'edge' or 'point'. Noteworthy is the relation to words for 'horn', which may involve in part semantic borrowing. This relation might also rest on the general notion of 'bent, crooked' (so Schuchardt, Z. rom. Ph. 41.254), but probably comes more specifically through the use of words for 'horn' for projecting parts, as Lat. *cornua* for the tops of a mountain, ends of a sailyard, wings of an army, and (most relevant to 'corner') the tips of a bow or the crescent moon and the corners of the eye (cf. Thes. 4.470).

It is the notion of 'corner' viewed from the outside that is mainly dominant in the origin of the words. But they came to be used equally for the 'corner' viewed from the inside (e.g. 'corner' of the room vs. 'corner' of the house), and a few became more or less specialized in this direction, as Sp. *rincón*, ME *hirne* (see quotations in NED), NHG *winkel*.

12.77 CROSS

Grk.	*σταυρός*	Goth.	*galga*	Lith.	*kryžius*
NG	*σταυρός*	ON	*kross*	Lett.	*krusts*
Lat.	*crūx*	Dan.	*kors*	ChSl.	*krĭstŭ, križĭ*

NIr.	*cros*	OHG	*krūzi*		
W.	*croes, crog*	MHG	*kriuz*		
Br.	*kroaz*	NHG	*kreuz*		

Most of the words for 'cross' are derived from Lat. *crūx*, which spread as the 'cross' of Christian terminology, with secondary development of generic use for an object or mark of similar shape.

1. Grk. *σταυρός* 'an upright stake' (Hom.+), later used regularly to render the Latin *crūx* : ON *staurr* 'stake', Skt. *sthavira-*, *sthūra-* 'thick, solid, strong', OHG *stūri* 'strong', etc. fr. a by-form of *stā- 'stand'. Walde-P. 2.608 f.

2. Lat. *crūx*, the Roman instrument of punishment upon which criminals were impaled, prob. at first a stake, then a wooden frame in various forms (cf. illustrations in Daremberg et Saglio) but most commonly in the form of a cross, prob. : Goth. *hrugga* 'staff', ON *hryggr*, OE *hrycg*, OHG *(h)rucki* 'back, ridge', etc., fr. an extension of the root in Lat. *curvus* 'crooked', etc. Walde-P. 2.573. Walde-H. 1.296 f. Otherwise Ernout-M. 236, assuming a loanword from some Mediterranean language, perh. Punic. But, while the form of punishment prob. came from the Orient through Punic influence, there is no definite support for the view that the word itself was borrowed.

Hence the Romance words (REW 2348); the Celtic, Ir. *croch* (NIr. 'gallows, bar with hooks', etc.), W. *crog*, fr. acc. *crūcem*, but MIr. *cross*, NIr. *cros*, W. *croes*, Br. *kroaz* fr. nom. *crūx* (Pedersen 1.1926, 217. Vendryes, De hib. voc. 132. Loth, Mots lat. 154); most of the Gmc., with great variety of form and partly through Ir. and Fr. (Falk-Torp 567. NED s.v. *cross*); Lith. *kryžius* (through Pol.), late ChSl. *križĭ, kryži* (vs. *krĭstŭ* in Gospels, etc.; see below, 4), SCr. *križ*, Boh. *kříž*, Pol. *krzyż*, in general, West Slavic and Catholic, through Gmc. or Romance? (Berneker 619).

3. Goth. *galga* (reg. for *σταυρός*) = OE *galga*, OHG *galgo*, etc. 'gallows' (these also sometimes for the cross), prob. (as orig. simply the bent limb of a tree) : Lith. *žalga* 'rod, pole', Arm. *jałk* 'branch, twig'. Walde-P. 1.540. Falk-Torp 296. Feist 189.

OE *rōd*, orig. 'rod' as in cpd. *seglrōd* 'sailyard', but reg. for Lat. *crūx* (ME *rood* 'crucifix', NE in this sense archaic; OE *rood*, NE *rod* fr. a different form; ON *rōða* 'crucifix' fr. OE) : OHG *ruota* 'rod' (NHG *rute*), etc., outside connections dub. Walde-P. 2.368. Falk-Torp 908. NED s.v. *rood*.

4. ChSl. *krĭstŭ* (often written *krŭstŭ*), the reg. word for Grk. *σταυρός* in Gospels, Supr., etc. (cf. Jagić, Entstehungsgesch. 203, 356), SCr. *krst*, Russ. *krest* (White Russ. *krist*, East Lett. *krists;* Lett. *krusts* with *u* by influence of Lat. *crūx*? Mühl.-Endz. 2.290), in orig. the same word as ChSl. *Chrĭstŭ* 'Christ' (fr. Grk. *χρῑστός* through Goth. *Xristus*), but fr. an unattested Goth. *Kristus* (cf. OHG *Krist*), and differentiated in use through 'Christ on the cross, crucifix' to 'cross'. Berneker 634. Stender-Petersen 419 ff.

Words for 'circle' are from various roots with the notion of 'turn'. But in several groups the most widespread and probably the earliest use was to designate a specific object of circular shape, especially 'wheel' or 'ring'.

1. Grk. *κύκλος*, also, esp. in neut. pl. *κύκλα*, 'wheel' : Skt. *cakra-* 'wheel, circle', Av. *čakra-*, ON *hjōl*, OE *hwēol*, etc. 'wheel' (10.76), fr. reduplicated forms of the root *kʷel- in Grk. *πέλομαι* 'be in motion, be', Skt. *car-* 'move about', etc. Walde-P. 1.575.

2. Lat. *circulus* (> It. *cerchio*, Fr. *cercle;* lit. loanwords It. *circolo*, Sp. *círculo*), dim. of *circus* (> Rum. *cerc* 'circle', but It. *cerco* obs., Sp. *cerco* in secondary uses), which it replaced in the sense 'circle', the latter coming to be the 'circus' (esp. *Circus Maximus*, and then others) : Grk. *κίρκος, κρίκος* 'ring', fr. the root *(s)ker- in Lat. *curvus* 'crooked', etc. (12.74). Walde-P. 2.569. Ernout-M. 188 ff. Walde-H. 1.220 f. REW 1947, 1948.

3. Ir. *cūairt*, perh. loanword fr. Lat. *cohors, -tis* (> *cōrs, -tis*) 'court, enclosure'. Pedersen 1.205.

Ir. *circul*, NIr. *ciorcal*, fr. Lat. *circulus*. Vendryes, De hib. voc. 124 f.

W. *cylch*, Br. *kelc'h*, fr. Lat. *circ'lus* = *circulus*. Loth, Mots lat. 156.

W. *cant*, Br. *kant*, prob. : Gallo-Lat. *cant(h)us* 'iron rim of a wheel', etc. (see 12.353). Walde-P. 1.351 f.

4. ON *hringr*, OHG *(h)ring*, MHG *rinc*, OE *hring* (but the latter mostly 'ring'; this meaning also in ON, OHG, and MHG, and in the modern languages the usual one) : Umbr. *cringatro* 'cinctum, band about the shoulder as a sign of office', ChSl. *krągŭ* 'circle', etc. (below, 6), fr. extensions of the root *(s)ker- as in Lat. *circus*, etc. (above, 2). Falk-Torp 901.

ON *kringla, kringr*, Du. *kring*, MLG *krink*, MHG *krinc, kranc* (NHG *kringen, kringel*) : Norw. *krenkja* 'wrench', Lith. *gręžti* 'bore', Lett. *griezt* 'turn', nasalized forms of the root in ON *krōkr* 'hook' (12.75). Walde-P. 1.594. Falk-Torp 580 f. Weigand-H. 1.1153.

Late OHG *creiz*, MHG *kreiz* (> Dan. *kreds*, Sw. *krets*), NHG *kreis* : MLG *krēt(e), kreit*, MDu. *krīt* id., MHG *krīzen* 'make a circular line', perh. further related to OHG *krizzōn*, MHG *kritzen* 'scratch, engrave', root connection? Weigand-H. 1.1145, 1155. Falk-Torp 578.

OE *trendel*, cf. MLG *trendel* 'round disk', MHG *trendel* 'ball, circle', OHG *trennila* 'ball, sphere', MLG *trint, trent* 'circular' : OE *trenden* (rare), ME *trende* 'turn round, rotate' (NE *trend*), but further root connections (as with NHG *trennen* 'separate') dub. Walde-P. 1.798. Falk-Torp 1283. NED s.v. *trend*.

ME *cercle*, NE *circle*, fr. Fr. *cercle* (above, 2). NED s.v.

5. Lith. *apskritis* : Lith. *skriesti* 'make a circle', *skrieti* 'run or fly in a circle', *skristi* 'fly', fr. an extension of the root in Lat. *circulus* (above, 2) and ON *hringr*, ChSl. *krągŭ*, etc. (above, 4). Walde-P. 2.571. Trautmann 267.

Lith. *ratas* 'wheel', also 'circle' : Lat. *rota*, OHG *rad*, etc. 'wheel' (10.76; cf. Lat. *rotundus* 'round', 12.81). Walde-P. 2.368.

Lett. *rin'k'is*, also 'ring', fr. MLG *rink* 'ring, circle' (above, 4). Mühl.-Endz. 3.529.

6. ChSl. *krągŭ*, etc., general Slavic : ON *hringr*, etc. 'ring, circle' (above, 4). Berneker 626.

Pol. *koło* 'wheel' (10.76), also 'circle', mostly replacing the older *krąg* in this sense.

7. Skt. *maṇḍala-*, etym. dub., perh. : Ir. *mell* 'globus'. Walde-P. 2.295. Uhlenbeck 211.

Skt. *cakra-* : Grk. *κύκλος* (above, 1).

Words for 'sphere' as the generic and more or less technical terms are such as were popularly applied to particular objects of spherical shape, esp. 'ball' (several of the words listed are also or commonly 'ball') or 'clod, lump', these again based on various notions including 'blown up, swollen' or 'pressed together'.

1. Grk. *σφαῖρα*, etym. dub., perh. : *σφυράς, σπυράς* 'fall of dung (from sheep, goats, etc.), pill', Lith., Lett. *spira* 'sheep-dung', NIcel. *sparð* 'sheep-dung', *sperðill* 'goat-dung'; or : Grk. *σπαίρω* 'quiver', Skt. *sphur-* 'spring, quiver, trouble', etc. Walde-P. 2.672, 668. Boisacq 926, 900.

2. Lat. *globus* (hence the lit. words, It., Sp. *globo*, etc.) : *glēba* 'lump, clod', fr. *gleb- in Lith. *glėbti, globti* 'take in the arms, embrace', Pol. *głobić* 'press, join together', etc., beside *glem- in Lat. *glomus* 'ball (of yarn)', Lith. *glomoti* 'embrace', fr. extensions of *gel- in words for 'press together', 'lump, ball', etc. Walde-P. 1.615. 12.84. 'Line' (straight or curved 'line'). A list is omitted, since with few exceptions the Eur. words are obvious derivs. of the Latin. For a line of writing or printing there are often different words (18.63).

1. Grk. γραμμή, fr. γράφω 'write', hence orig. a stroke or line of the writing implement.

2. Lat. *līnea*, orig. 'linen thread, line', secondarily 'line' in sense here intended, sb. form of *līneus* 'made of flax, linen', fr. *līnum* 'flax, linen' (6.23). Hence the usual words for 'line' in most of the Eur. languages (Romance, Celtic, Gmc., Balto-Slavic).

3. Boh. *čara*, etym.? Berneker 136.

Skt. *reknā-*, fr. *rikh-* 'scratch' (with development like that in Grk. γραμμή) : Grk. ἐρείκω 'bend, bruise', OHG *rīga* 'line' (NHG *reihe* 'row, order'), OE *rǣw*, *rāw* 'row', etc. Walde-P. 2.344.

Several of the words for 'hole' denoted primarily a hollow place (NE *hole* in the ground, foxes' *holes*, etc.) and are cognate with adjectives for 'hollow' or with words for 'pit' or the like. Others, with the primary notion of perforation or opening, are derived from verbs for 'bore, pierce', 'tear' or 'split'. One of the Greek words is cognate with those for 'eye', and the use of 'eye' for the hole in a needle is widespread.

1. Grk. ὀπή, fr. the same root as words for 'eye', Skt. *akṣi-*, Grk. ὄσσε (dual), Lat. *oculus*, etc. (4.21). Cf. Arm. *akn* 'eye' and 'opening, hole'. Walde-P. 1.170. Boisacq 707.

Grk. τρύπημα, fr. τρυπάω 'bore' (9.46), whence also the back-formation Byz., NG τρῦπα.

2. Lat. *forāmen*, fr. *forāre* 'bore' (9.46).

Lat. *cavum* 'hollow, hole', sb. fr. adj. *cavus* 'hollow' (12.72).

It. *buco*, prob. fr. VLat. *voc(u)us* = *vacuus* 'empty' (13.22). Cf. Sp. *hueco* 'hollow' (12.72). REW 9115.

Sp. *agujero*, fr. *aguja* 'needle' (6.37) and must have referred first to the eye of a needle, or possibly to the hole pierced by a needle.

Sp. *hoyo* ('hole' as a hollow place, like one made by a bomb), beside *hoya*, fr. Lat. *fovea* 'pit'. REW 3463.

Rum. *gaură*, fr. **cavula*, dim. sb. fr. Lat. *cavus* 'hollow'. REW 1795. Puşcariu 701.

3. Ir. *toll* (also adj. 'hollow'), W. *twll*, Br. *toull*, perh. (**tukslo-*) : Grk. τύκος 'mason's hammer', ChSl. *tŭknąti* 'pierce, prick'. Walde-P. 2.615. Stokes 134.

NIr. *poll* = Gael. *poll* 'hole, pit, pond', W. *pwll*, Br. *poull* 'pool', prob. loanwords fr. OE *pōl* 'pool'. In any case the Ir. use is clearly a secondary extension of 'pool', through 'pit' or the like.

4. Goth. *þairkō* (quotable only in phrase for 'eye of a needle'), OE *þyrel*, ME and NE dial. *thirl*, fr. the root seen in Goth. *þairh*, OE *þurh*, etc. 'through'. Feist 489. NED s.v. *thirl*, sb.

OE *hol*, ME, NE *hole*, Dan. *hul*, Sw. *hål*, in earliest use mostly 'hollow place' (ON, OHG *hol* rarely otherwise), sb. of adj. for 'hollow' (12.72). NED s.v. *hole* sb.

ON *rauf* : ON *rjūfa*, OE *rēofan* 'break' (9.26). Falk-Torp 938.

ON (rare), OS, LG, Du. *gat* = OE *geat* 'gate' (specialization of 'hole, opening'), etym.? Connection with Skt. *had-*, Grk. χέζω 'void excrement' (Walde-P. 1.571 f., Falk-Torp 302) improbable. Franck-v. W. 176.

OHG *loh*, MHG, NHG *loch* = ON *lok* 'cover, lid', OE *loc* 'lock', etc. : Goth. *galūkan*, OE *lūcan* 'shut, fasten', etc. Semantic development through 'enclosed place' ('prison' and 'hiding place' attested in MHG) > 'hollow, hole'. Weigand-H. 2.75. Kluge-G. 362.

5. Lith. *skylė* : *skelti* 'split' (9.27). Leskien, Ablaut 341.

Lett. *caurums* : *caurs*, Lith. *kiauras* 'full of holes', *kiurti* 'become full of holes', outside root connections? Mühl.-Endz. 1.366.

6. ChSl. *dupina* (Supr. = ὀπή) : Russ. *duplo* 'hollow' (of a tree, etc.), Lith. *dubus* 'hollow, deep', Goth. *diups* 'deep', etc. (12.67). Berneker 237 f.

In the Gospels τρύπημα, τρυμαλιά, in the phrase 'eye of a needle' are rendered by *ucho* 'ear'.

SCr. *rupa* (also Slov., Ukr. for 'hole in the ground, ditch'), fr. an extension of the root in ChSl. *rŭvati* 'tear', *ryti* 'dig', like that in Lat. *rumpere*, OE *rēofan* 'break', etc. (9.26). Cf. ON *rauf* 'hole' (above, 4). Walde-P. 2.355.

Boh. *díra*, Pol. *dziura*, Russ. *dyra* : ChSl. *dĭrati* 'tear' (9.28). Berneker 201. Brückner 113.

The notion 'equal' and the following 'like, similar', and 'change' (vb.) are of course by no means confined to spatial relations (NE *equal* more often of quantity, number, strength, etc.), and least of all 'sign' (sb.). But they are conveniently added here.

The distinction between the absolute 'equal' and the approximate 'like, similar' (12.92) is not always sharply marked. Both notions are sometimes covered by the same word (at the same or different periods) or more often by members of the same cognate groups. This is notably true in the two groups represented by NE *same* and *like*.

Words for 'equal' are cognate with others for 'body, form', 'same, together', 'one', 'balance', etc. Several are used also of 'even, level' ground; and in some of these this is probably the earlier sense.

The notion of identity is also expressed by words for 'same' (in addition to those included in the list), like Lat. *idem* (whence NE *identity*, etc.), NE *same*, etc.

1. Grk. ἴσος, Hom. ἶσος, dial. ϝίσϝος, prob., with secondary σϝ, fr. *ϝίτσϝος : εἶδος 'form' (12.51). Bechtel, Phil. Anz. 1886.15. Brugmann, Ber. Sächs. Ges. 1897.29, Grd. 2.205. As already observed in 12.91, the words for 'equal' and those for 'like, similar' are partly overlapping in use. The majority of those for 'like, similar' belong to groups discussed in 12.91, or are from similar sources, as 'same' or 'body, form'. Other semantic sources are 'suitable', 'going (or carrying) after', 'measuring up to'.

1. Derivs. of IE **somo-* 'same' (itself related to others for 'together'). Walde-P. 2.488 ff. Boisacq 702. Ernout-M. 942. REW 7925–28. Pedersen 1.47, 165.

Grk. ὅμοιος; Lat. *similis* (in form : Grk. ὁμαλός 'even, level'), hence It. *simile* (loanword), OFr. *semble*, and, through Lat. vb. *similāre*, Fr. *sembler*, etc., Fr. *semblable*, *ressemblant*, or, through VLat. **similiāre*, It. *somigliare*, Sp. *semejar*, the pple.-adj. It. *somigliante*, Sp. *semejante;* Rum. *asemenea* (also 'equal', esp. before introduction of *egal* fr. Berneker 203 f.

SCr. *sličan* and *nalik*, both cpds. of *lik* 'countenance, appearance, form'. Berneker 719 f.

Russ. *pochožij* : *pochoditi* 'be like, resemble', lit. 'go after', cpd. of *choditi* 'go'. Berneker 392.

7. Skt. *upama-* and *pratima-*, both frequent at end of cpds. meaning 'similar to—', representing the sbs. *upamā-*, *pratimā-* 'comparison, similarity', these fr. vbs. *upa-mā-* 'compare', *prati-mā-* 'imitate', cpds. of *mā-* 'measure'.

The majority of the words listed cover 'change' in the sense of 'make different, substitute another', and also 'exchange' involving a reciprocal give and take (for which NE *exchange* is now usual). But cf. NHG *verändern* 'change' in the former sense vs. *wechseln* mostly 'exchange' (but *meinung* or *kleider wechseln* on the border line) and *tauschen* 'exchange'. Either notion readily extends to the other. Thus Grk. ἀλλάσσω, of similar semantic origin to NHG *verändern* and NE *alter*, came to cover also 'exchange'.

There is a widespread cognate group in which the primary notion seems to be that of mutual exchange. Other words are derived from those for 'other', 'apart, differently', 'divide', and 'turn' (cf. NE *turn* in this sense, NED s.v. *turn*, vb. 35–39).

1. IE **mei-*, **meigʷ-*, **meit-* in words for 'change, exchange', 'paired', 'common', etc. Walde-P. 2.240 f., 245, 247 f. Boisacq 51. Ernout-M. 648 f. REW 5785. Berneker 2.48 f., 62 f.

Grk. ἀμείβω (reg. word in Hom., 'change' and esp. Words for 'sign' (sb.), denoting something which 'points out, indicates', are from verbs for 'point out, observe, see, know, teach'.

1. Grk. σῆμα, Dor. σᾶμα, fr. **dyā-men-* : Skt. *dyā-na-* (the oft quoted *dyā-man-* seems to be a ghost word) 'thought, reflection', but orig. 'observation', fr. *dhī-*, *dhyā-* 'think', orig. 'observe' : Av. *dī-* 'look at, observe' (15.51). Walde-P. 1.832. Boisacq 861.

Hence σημεῖον (in prose more common than σῆμα, which came to mean esp. 'tomb, grave') and late σημάδιον, NG σημάδι.

2. Lat. *signum* (> Romance words), generally taken as orig. 'cut mark' fr. the root of *secāre* 'cut' (so Walde-P. 2.478, Ernout-M. 939), but much more probably fr. the root of *in-seque* 'say' in its earlier sense of 'point out' (18.22).

3. Ir. *arde*, cpd. *comarde*, NIr. *comhartha*, W. *arwydd*, Br. *arouez*, fr. **arwid-* cpd. of *ar* 'before, for' and the root of Lat. *vidēre* 'see', etc. Pedersen 2.6. Henry 18.

4. Goth. *taikns*, ON *tākn*, *teikn*, OE *tācn*, OHG *zeihhan*, etc., general Gmc., fr. **deiĝ-* beside **deiḱ-* in Grk. δείκνῡμι, Skt. *diç-*, etc. 'point out'. Walde-P. 1.777. Falk-Torp 1251. Feist 472.

ME *signe*, NE *sign*, becoming more common than *token*, fr. Fr. *signe*, Lat. *signum* (above, 2).

Cf. also the group (not included in the list) OE *mearca*, NE *mark*, NHG *merkmal*, etc., orig. 'boundary' like Goth. *marka* (19.17), but also used for 'sign'.

5. Lith. *ženklas*, *žymė*, Lett. *zīme* (Baltic *ī* fr. *in*), ChSl. *znamenĭje* (Gospels, Supr., etc.), SCr., Boh., Pol., Russ. *znak*, and the less common, or partly specialized in use (e.g. to 'omen' or 'token, badge'), SCr. *znamen*, *znamenje*, Boh. *znamení*, Pol. *znamię*, Russ. *znamenie*, all fr. the root of Lith. *žinoti*, ChSl. *znati*, etc. 'know' (17.17).

Pol. *cecha*, fr. NHG *zeichen.*

W.	*maint*	MHG	*(menige)*		
Br.	*ment*	NHG	*quantität*		

'Quantity' in the abstract is a sophisticated notion. It was expressed in Greek by ποσότης, perhaps a coinage of Aristotle, meaning literally the 'how-much-ness', which the Romans rendered by the equivalent *quantitās*, whence, directly or by further semantic borrowing, most of the European terms.

The nearest equivalent, preceding the adoption of these terms, would be the words for 'great quantity or number', which might come to be used for 'quantity' in general, just as words for 'great size' furnished most of the words for 'size' (12.52). Some of them are quotable for 'quantity, amount' or 'number' in the abstract, as Grk. πλῆθος ('amount' of the penalty, 'number' of the ships, etc.), Lat. *magnitūdō* or *multitūdō*, Russ. *množestvo*, etc. Accordingly, such words are entered in the list (but in parentheses) where abstract forms are lacking or

doubtful. But they are omitted from the discussion, since they are obvious derivatives or cognates of the words for 'much, many' (13.15) or 'great, large' (12.55).

Among other near equivalents to 'quantity' are NE *amount*, fr. vb. *amount*, orig. 'mount' (fr. OFr. *amonter*, Lat. *ad montem*), hence 'rise in quantity or number' (similarly Fr. *montant*, etc.); Lat. *summa* 'sum, amount' (> Fr. *somme*, NE *sum*, NHG *summe*, etc.), fem. of *summus* 'highest'.

1. Grk. ποσότης (Aristot.), fr. πόσος 'how much?' which served as a model for Lat. *quantitās* fr. *quantus*. Hence the Romance and Germanic words, It. *quantità*, Fr. *quantité* (> ME *quantite(e)*, NE *quantity*), Sp. *cantidad*, Rum. *cantitate;* Dan., Sw. *kvantitet*, NHG *quantität* (> Lett. *kvantitate;* so Drawneek, not in Mühl.-Endz.); further, by semantic borrowing, Du. *hoeveelheid* (*hoeveel* 'how much?'), Lith. *kieka, kiekybė* (*kiek* 'how much?'), SCr. *količina*, Boh. *kolikost*, Russ. *količestvo* (ChSl. *koliko* 'how much?', etc.), Pol. *ilość* (*ile* 'how much?').

2. Ir. *mēit*, NIr. *mēid*, W. *maint*, Br. *ment*, also 'size' (12.52).

3. Skt. *māna-* and cpds., *pra-māṇa-*, *pari-māṇa-*, all also 'size, measurement' (of any sort) : *mā-* 'measure' (12.54).

Many of the words for 'number' are connected with the words for 'reckon, count', these of various sources. Some rest on the notion of 'arrangement, order', or 'distribution'.

1. Grk. ἀριθμός, beside νήριτος 'uncounted', Arc. Ἐπάριτοι 'picked soldiers', fr. the root of ἀραρίσκω 'fit together' and its cognates in other languages, which often reflect such secondary uses as 'arrange, reckon, count', hence 'number', prob. through 'arrangement, order'. Br.	*holl*	NHG	*ganz, all*		

On the various notions involving totality, and their expressions, cf. Brugmann, Ausdrücke für den Begriff der Totalität, and Sapir, Totality (Language Monograph 1930). The broad distinction between the collective 'whole' and the individualizing 'every', pl. 'all', is the most important, and even this is only partially observed in linguistic expression (cf. NE *all* in *all day* and *all men*).

In several cases 'whole' comes from an earlier attested 'whole in body, sound, well' (so NE *whole* and its cognates; NHG *ganz*, etc.; Lat. *integer* 'intact, whole' most commonly in body), and in these, and a few of the other words listed, there is no confusion with 'every, all'. In some others, 'whole' is clearly the more original and mainly the dominant sense, but with secondary develop-

ment of pl. 'all' and, through that, in part also sg. 'every' (Grk. ὅλος only 'whole', but NG pl. ὅλοι 'all', and the cognate Skt. *sarva-* 'whole' and 'every', pl. 'all'; Lat. *tōtus* 'whole', but later extended to cover 'every', pl. 'all'). In still other groups, of uncertain origin but probably with similar development from 'whole', the singular is used for 'whole' or 'every', the plural for 'all' (so Grk. πᾶς. Lat. *omnis*, the Gmc. *all-* group, and the group Lith. *visas*, ChSl. *vĭsĭ*, Skt. *viçva-*, etc.). All these words though appearing also and more conspicuously in the list for 'every', pl. 'all', are discussed here.

1. IE *sol-wo, *sol-no-, etc. Walde-P. 2.510 f. Ernout-M. 891. Pedersen 1.413.

Grk. ὅλος, Hom. οὖλος (*ὄλϝος) 'whole', NG ὅλος (also οὖλος) 'whole', but pl. ὅλοι 'all'; Lat. *salvus* early 'whole', usually 'safe, well, sound', Osc. *sullus*, pl. 'all'; Ir. *(h)uile*, W., Br. *holl*, Corn. *oll* 'whole', pl. 'all'; but NIr. mostly *gach uile* 'every' (*gach* 'each'), with pl. *na h-uile* 'all'; Skt. *sarva-* 'whole' and 'every', pl. 'all', Av. *haurva-*, OPers. *haruva-* 'whole'; Alb. *gjallë* 'strong, lively, gay'; Arm. *olj* 'sound, well, whole'; Toch. A *salu*, B *solme*, advs. 'entirely' (SSS 278 f.).

2. Grk. πᾶς 'whole' and 'every', pl. 'all' (rarely also 'whole'), prob. through 'comprehensive' or the like fr. a participial form of the root seen in Dor. πέπᾱμαι 'possess', Skt. *çvā-* 'swell', Grk. κυέω 'be pregnant', κῦρος 'power', etc. Walde-P. 1.366 f. Brugmann, Totalität 60 ff.

Grk. ὅλος (above, 1) has been partly displaced by other, orig. more emphatic, terms for 'whole', as follows: Grk. ὁλόκληρος 'complete, perfect, sound', compound of κλῆρος 'lot' is simply 'whole' in late times (cf. quotations in LS) and lit. NG. Grk. ἀκέραιος 'unmixed' (: κεράννῡμι 'mix') is also 'intact, perfect', hence (blend with ὅλος) NG pop. ὁλάκερος, ἀλάκερος 'whole'.

3. Lat. *tōtus* 'whole' (> Sp. *todo;* VLat. *tōttus* > It. *tutto*, Fr. *tout*, Rum. *tot;* sg. 'all' = 'whole' and, except It., 'every'; pl. 'all'), prob. fr. *toweto- 'packed full'(?), fr. the root *teu- in Skt. *tu-* 'be strong', Lat. *tumēre* 'swell', etc. Walde-P. 1.707. Brugmann, Totalität 55. Ernout-M. 1049 f. (without above etym.).

Lat. *omnis* 'every' (> It. *ogni* 'every') and also 'whole', pl. 'all', etym. dub. Ernout-M. 702 f. Brugmann, Totalität 64 ff.

Lat. *integer* 'intact, whole' (> It. *intero*, Fr. *entier*, Sp. *entero*, Rum. *întreg*), neg. cpd. of the root of *tangere* 'touch'. Walde-P. 1.703. Ernout-M. 1016. Walde-H. 1.708.

4. Ir. *(h)uile*, W., Br. *holl*, above, 1.

NIr. *iomlān* 'whole' = MIr. *immlān* 'full, complete', cpd. of *lān* 'full' (13.21).

NIr. *lēir*, usually as adv. *go lēir* with sg. 'whole', with pl. 'all' (*ē go lēir* 'it entirely, all of it', *iad go lēir* 'they entirely, all of them'), Ir. *collēir* 'wholly' : W. *llwyr* 'entirely, entire'. Stokes 242, Macbain 227 without further connection. Atkinson, Pass. and Hom. Gloss. 781 f. equates with *lēir* 'visible' as 'visibly' > 'wholly'.

NIr. *ar fad*, lit. 'in length', but commonly 'altogether, whole' (*an scēal ar fad* 'the whole story').

W. *cyfan*, cpd. of *cy* (= *cyf-*, Ir. *com-*, Lat. *com-*) and mutated form of *man* 'place'. Evans, s.v.

W. *cwbl*, Corn. *cowal*, etym. dub. Loth, RC 37.37 f. (vs. Morris Jones 310).

5. Goth. *alls*, ON *allr*, OE *eall*, etc., general Gmc., outside connections dub., perh. : Lith. *aliai* adv. 'all-, completely' in *aliai vienas* 'every one', *aliai metai* 'every year' (NSB), if these are not fr. Gmc. Mikkola, BB 25.73 ff. Walde-P. 1.90 (but Osc. *allo* almost certainly not 'tota'). Feist 40.

The general usage of this group is sg. 'all' = 'whole', pl. 'all'. The use of the sg. for 'every' is not properly Gothic (where Grk. πᾶς in this sense is expressed by pl. forms or by the neut. sg. with part. gen., cf. Streitberg, Got. Bibel, s.v.) nor OE (sometimes in ME, obs. in NE, cf. NED s.v. *all* 3), and in general is uncommon or restricted to certain phrases. Cf. Paul, Deutsches Wtb. for NHG *all* and the larger dictionaries for Du. *al*, Dan. *al*, Sw. *all*.

Dan., Sw. *hel*, ME *hole*, NE *whole*, Du. *geheel* (*heel* less usual), in the older languages Goth. *hails*, ON *heill*, OE *hāl*, OHG *heil* 'sound, well, uninjured' (4.83) : ChSl. *cělŭ* 'well, sound, unharmed', SCr. *cio*, etc., 'whole' (below, 7), W. *coel* '(good) omen', OW *coilou* 'auspiciis'; cf. ON *heil* 'good sign, happiness', OE *hǣl* id. Walde-P. 1.329. Falk-Torp 393 f.

OHG, MHG, NHG *ganz*, MLG *gans*, Du. *gansch* 'whole' and in older languages 'sound, uninjured', etym. dub. Kluge-G. 185. Weigand-H. 1.620.

6. Lith. *visas*, Lett. *viss*, ChSl. *vĭsĭ*, SCr. *sav* (pl. *svi*, deriv. *svaki*, all with transposition of *vs-*; Leskien, SCr. Gram. p. 53), Russ. *ves'* sg. 'whole', pl. 'all' (Boh. *vše* pl. rare), hence derivs. ChSl. *vĭsěkŭ* (renders πᾶς 'every' and in Gospels also ἕκαστος), SCr. *svaki*, Russ. *vsjakij* 'every', Boh. *všechen*, Pol. *wszystek* sg. 'whole, every', pl. 'all (also Boh. *všecek* id.) fr. *wi-so-, beside *wi-k̑wo- in Skt. *viçva-*, Av. *vispa-*, OPers. *vispa-* and *visa-* 'whole, every', pl. 'all', perh. all derivs. of the adverbial *wi- 'apart', but semantic relation far from obvious. Walde-P. 1.312. Brugmann, Grd. 2.1.200.

Lith. *čielas* (cf. NSB s.v.), fr. Slavic (below, 7).

7. SCr. *cio*, Boh. *celý*, Pol. *caly*, Russ. *celyj* 'whole', in part also in the older sense of 'well, sound', like ChSl. *cělŭ* : Goth. *hails*, etc. (above, 5).

8. Skt. *sarva-*, Av. *haurva-*, OPers. *haruva-*, above, 1.

Skt. *kṛtsna-* 'whole', perh. (as 'solid', fr. 'twisted tight'?) : *kṛt-* 'spin, twist' (thread). Walde-P. 1.421. Otherwise Uhlenbeck, p. 63.

Skt. *sakala-* 'whole', lit. 'having (all its) parts', cpd. of *sa-* cop. and *kalā-* 'part'.

Skt. *viçva-*, Av. *vispa-*, above, 6.

9. Hitt. *pankus* 'whole, all' : Skt. *bahu-* 'much', etc. (13.15). Sturtevant, Hitt. Gram. 118, Glossary 115.

Words that were used in the singular for 'whole' or 'every' and in the plural for 'all' have already been discussed (13.13), and these cover all the words listed here for 'all' pl. But the use of these words in the singular for 'every' has been more or less displaced by other words, mostly of pronominal origin. Only these remain to be discussed here. Most of them are used without the distinction which is now felt between NE *every* and *each* (as, in fact, the OE form of *each*). Their primary sense was 'every, each' taken separately (that is more nearly = NE *each*); but, with weakening of the distributive feeling, they encroached upon or displaced those expressions for 'every' in which the notion of totality was original. However, certain words in which the distributive sense remained more distinctively dominant, like Grk. ἕκαστος, are not included here.

1. NG κάθε (indecl. adj.), fr. καθείς, καθένας 'every one', fr. Grk. καθ' ἕνα, καθ' ἕν 'one by one'. Hatzidakis, Μεσ. 2.152.

2. Lat. *quisque*, sb. and adj. pron. 'each (one)', 'every (one)', in early use also rel. 'whoever', fr. interrog. indef. *quis* with generalizing *-que*. Ernout-M. 844 f.

Fr. *chaque*, OFr. *chasque*, back-formation fr. *chacun*, OFr. *chascun*, like It. *ciascuno*, fr. a blend of VLat. *cisque* (Lat. *quisque*) *unus* and *cata unum* (cf. Sp. *cada*, below). REW 6968. Gamillscheg 200, 207. Wartburg 3.483.

Sp. *cada* (indecl. adj.), fr. VLat. *cata* (fr. Grk. κατά, cf. above, NG κάθε), which appears frequently in church writings in distributive phrases modeled on the Greek, e.g. *cata mane mane* in the Vulgate, *cata mansiones, cata singulos ymnos*, etc. in the Peregrinatio.

Rum. *fiecare*, cpd. of *fie* 3sg. and pl. subj. of *fi* 'be' and *care* 'who, which' (Lat. *quālis*), hence orig. 'whoever it may be'.

3. Ir. *cach* (and *cech*), NIr. *gach*, W. *pob*, Br. *pep* : Lith. *koks*, ChSl. *kakŭ* 'what sort?', fr. $*k^w\bar{a}$-k^wos, deriv. of pron. stem $*k^w\bar{a}$- (cf. Lat. *quā-lis*). Thurneysen, Gram. 310 f.

4. Goth. *hwazuh* (reg. for πᾶς 'everyone'), *hwarjizuh* (but mostly for ἕκαστος), fr. the interrog. indef. *hwas, hwarjis* with the particle *-uh* : Lat. *-que*. Feist 283 f.

ON *hverr* (also the interrog. indef. pron.), Dan. *hver*, Sw. *var* = Goth. *hwarjis* (cf. above), also ON *sērhverr* (*sēr* dat. of refl. pron.), Dan. *enhver* (*en* indef. article), Sw. *varje* (old oblique case of *var*).

In West Gmc. the earlier forms were various compounds of Gmc. *līk- 'form, appearance, body' (Goth. *leik*, OE *līc*, etc.), in contrast to the use of the indef. pron. (or cpds.) in East and North Gmc.

OE *ǣlc*, ME *elch*, NE *each*, Du. *elk*, fr. *aiwa-līka-, beside OHG *iogilīh*, MHG *iegelīch* (NHG *jeglich*), fr. *aiwa-galīka-, cpds. of *aiwa-, OE *ā, ǣ-*, OHG *eo*, Goth. *aiw* adv. 'ever', and *(ga)līka-, Goth. *galeiks* adj. 'alike', *leik* 'body', etc. NED s.v. *each* (but precise equation of Eng.-Du. form with High German certainly wrong). Weigand-H. 1.946. Franck–v. W. 154 (but takes Eng. and Du. form fr. *aina-līka-), 271.

ME *everi(ch)*, NE *every*, fr. OE *æfre* *ǣlc*, with *æfre* 'ever' related to the obscured first member of *ǣlc* (above). NED s.v. *every*.

OE *gehwilc*, early ME *iwilch, iwulch*, OHG *gi(h)welīh*, and, strengthened with OE *ǣ-*, OHG *eo* 'ever' (cf. above), OE *ǣghwilc*, ME *ewilc euych*, OHG *eogiwelīh*, MHG *iewelīch*, cpd. of interrog. OE *hwilc*, OHG *(h)welih* 'which?' (Gmc. *hwa-līka- 'what sort?', with *līka-, cf.

above); similarly MHG *iet-welīch, ietes-welīch*, cpd. of *ie-* (= OHG *eo*, above) and OHG *et(t)es-, et(t)e-(h)welīh* (adj.) 'aliquis'.

OHG *eo(h)wedar* 'each' (of two), MHG *ieweder* (and *iet-weder*, for *iet-*, see above) also 'each, every' (of several), NHG *jeder* (replacing *jeglich*, MHG *iegelīch*, etc., in late MHG). Paul, Deutsches Wtb. 272 f. Weigand-H. 1.946.

5. Lith. *kiekvienas*, fr. *kiek* 'how much?' and *vienas* 'one'.

Lett. *ikviens*, cpd. of *ik* 'ever' (: Lith. *jiek in obs. *jiekas* 'something', and parallel to *kiek*, above) and *viens* 'one'; for use of *ik* alone with gen. in locutions expressing 'each, every', cf. Mühl.-Endz. 1.703.

Lett. *ikkatrs*, cpd. of *ik* and *katrs* interrog. 'who, which (of two)?', used also as indef. 'each' (of two'), and generally now also 'every' (of several). Mühl.-Endz. 2.172.

Lett. *ikkur's*, cpd. of *ik* and *kur'š* 'who' (interrog. and rel.), also used alone as indef. 'each, every'. Mühl.-Endz. 2.327.

6. ChSl. *kŭž(i)do* (Supr., etc. for ἕκαστος, which in Gospels is rendered by *vĭsěkŭ*), Boh. *každý*, Pol. *każdy*, Russ. *každyj*, all derivs. of the interrog.-indef. stem in ChSl. *kŭ-to* 'who, what?', etc. Berneker 675.

'Much' in quantity and 'many' in number are generally expressed by sg. and pl. forms of the same word or by adv. phrases applied equally to both (Fr. *beaucoup de*, NIr. *a lān*, Lith. *daug* with gen., etc.). Occasionally the sg. is used also with reference to number, 'many a', as Latin *multus* in poetry and late prose, OE *monig*, NHG *mancher*, etc.

The connections are mostly with words for 'full' or 'great, large'.

1. Derivs. of IE *pel(ə)-, *plē- in words for 'fill' and 'full' (Grk. πίμπλημι, πλήρης, Lat. *plēre, plēnus*, etc.; cf. 13.21), esp. *pelu, *pḷu, etc., neut. sg. sb. and adv. (Goth. *filu*, Grk. πολύ, Skt. *puru*), whence also adj. forms (Grk. πολύς, Skt. fem. *pūrvī*). Walde-P. 2.64 f. Ernout-M. 783. Falk-Torp 235. Feist 152 f.

Grk. πολύς, sg. 'much', pl. 'many', comp. πλείων, πλέων; Lat. *plūs* 'more'; Ir. *il* 'much' (rare in this sense, but cf. *cosintaidbse il* 'cum multa ostensione' Ml. 30b11), mostly pl. *ili, ile* 'many', NIr. *il-, iol-* (only as prefix), now usually *a lān* with gen. (: *lān* adj. 'full'), comp. *lia* 'more' (pl.), Br. *lies* 'several'; Goth., OHG *filu*, MHG *vil(e)*, neut. sb. with

gen. sg. or pl., NHG *viel*, Du. *veel* adj., OE *fela*, with gen. or as indecl. adj., ME *fele* pl. adj., ON *fiǫl-* only as prefix, comp. ON *fleiri*, Dan., Sw. *flere* 'more' (pl.); Skt. *puru-* (not fully declined; mostly nom.-acc. neut. sg. or pl., with fem. *pūrvī*, etc.), Av. *paru-* 'much', pl. 'many', comp. Av. *frāyah-* 'more' (Skt. *prāyas* adv. 'mostly').

2. Lat. *multus* 'much', pl. 'many' (> It. *molto*, OFr. *mout*, Sp. *mucho*, Rum. *mult*), prob. : Grk. μάλα 'very', Lett. *milns* (rare) 'very much', Lat. *melior* 'better'. Walde-P. 2.272. Ernout-M. 639. Walde-H. 2.63.

Fr. *beaucoup*, cpd. of *beau* 'beautiful, fine' and *coup* 'blow', replaces OFr. *mout* in 13/14th century. Gamillscheg 92. Wartburg 2,868.

3. Ir. *mōr*, NIr. mostly *a mhōr* or usually deriv. *mōrān*, sb. with gen. or partitive prep. *de*, fr. adj. *mōr* 'great, large' (12.55).

Ir. *imde*, NIr. *iomdha*, sg. 'many a', pl. 'many', fr. *imbde : Ir. *imbed* 'copia, multitudo' (this of dub. etym., Walde-P. 1.125).

Ir. *il*, NIr. *lān*, above, 1.

W. *llawer* (with and without *o* 'of') : Ir. *lour, lōr* 'enough', perh. (with dissim.) fr. *rowero- : Ir. *ro-fera* 'suffices' (: OHG *werēn* 'preserve', Pedersen 2.518). Thurneysen, Gram. 119.

Br. *kalz*, also and orig. sb. 'a heap' : Corn. *cals* 'heap', W. *cargl* 'heap, collection', outside connections? Thurneysen, IF 42.148.

4. Goth. *manags* 'much', pl. 'many', comp. *managiza* 'more' (sg. and pl.), ON (late) *mangir*, Dan. *mange*, Sw. *många*, OE *monige*, ME *monie* (pl.; sg. For the most part, forms of the same word (or the same indeclinable form) are used with the singular for 'more' in quantity and with the plural for 'more' in number. But some words are mainly, if not absolutely, restricted to one or the other of these uses and are marked in the list as (sg.) or (pl.).

Many of the words for 'more' are comparatives, in form as well as in meaning, of words for 'much, many', though not always of those in use in the same languages (e.g. Lat. *multus* but *plūs*). Most of these have been included in the discussion of the latter (13.15), leaving only the following for notice here.

1. Grk. περισσότερος, comp. of περισσός 'beyond the usual quantity or number, superfluous' (deriv. of περί), is in NT sometimes 'more' (mostly in adv.) and the reg. word for 'more' in NG (πλείων archaic even in lit.; adv. πλέον pop. but 'more' in sense of 'in addition, any longer', etc.).

2. Sp. *mas*, fr. Lat. *magis* adv. 'more' : *magnus* 'great', etc.

Rum. *mai mult* (pl. *mai mulți*), comp. of *mult* 'much'; *mai* fr. Lat. *magis* (above).

3. Ir. *mō*, W. *mwy*, Br. *mui*, *muioc'h*, comp. of Ir. *mōr*, W. *mawr*, Br. *meur* 'great' (12.55).

Ir. *lia* (pl.) : Grk. πλείων, Lat. *plūs*, etc. (13.15).

NIr. *tuilleadh* (followed by nom. or gen. or by *de* or *is*, freq. also with proleptic *a* 'its', cf. Dinneen), lit. 'addition', Ir. *tuilled* id., fr. a verbal stem *to-līn-*, cpd. of *līnaim* 'fill' : Lat. *plēnus* 'full', etc. (13.21). Pedersen 2.567.

4. Goth. *maiza*, usually 'greater' (μείζων), as 'more' only neut. *maizo* (πλεῖον), *mais* adv. (μᾶλλον, πλεῖον), ON *meiri* adj. Several of the words for 'small, little' in size (12.56) are used also for 'little' in quantity, either in the same declined form (as Lat. *parvus*) or more commonly in a neut. sg. or adv. form with following gen. sg. for 'small quantity of, little' or gen. pl. for 'small number of, few' (as Goth. *leitil* with gen. sg., Lith. *maž*, ChSl. *malo*, etc., with gen. sg. or pl.).

But there are others of which the prevailing use is in the sg. 'little' in quantity, in the pl. 'few'. Such words are also occasionally used with reference to number even in the sg., that is, with a sg. coll. in sense of 'not numerous'.

1. IE *pau- with various suffixes. Walde-P. 2.75 f., Ernout-M. 742. Feist 147. NED s.v. *few*.

Grk. παῦρος, poet. word for usual ὀλίγος, in sg. 'little' in quantity, time, or number (παῦρος λαός), pl. 'few'; Lat. *parvus* (fr. **pauros*, like *nervus* : Grk. νεῦρον, and Gall. *tarvos*, Ir. *tarb* : Lat. *taurus*, Grk. ταῦρος) 'little' in size, quantity, or time; Lat. *paucī* 'few', sg. *paucus* rare in class. Lat. but reg. in VLat. for *parvus* with reference to quantity (in late Lat. texts sometimes *parvī* for *paucī* by overcorrection), hence It., Sp. *poco*, Fr. *peu;* Goth. *fawai*, ON *fāir*, Dan. *faa*, Sw. *få*, OE *fēawe*, *fēawa*, ME *fewe*, NE *few*, OHG *fōhe* (sg. ON *fār* 'scarce, not numerous' with collectives; sg. forms in Goth., OHG rare); cf. also Lat. *paul(l)us* 'little', *pauper* 'poor'.

2. Grk. ὀλίγος 'little' (also 'small' of size, esp. in Hom.), pl. 'few' (not Hom. in this sense), perh. : λοιγός 'ruin, de-

struction', Lith. *liga* 'sickness', etc. Walde-P. 2.398. Boisacq 697.

Grk. βραχύς 'short' (12.59) is also sometimes used for 'little' in size or quantity, and 'few' esp. 'few words', like NE *in short* (LS s.v.).

3. Rum. *puțin* 'little', pl. 'few', fr. some variety of the VLat. forms *pisinnus*, *pitinnus*, *pusillus*, etc., 'small' (12.56). REW 6550, 6890.

4. Ir. *becc* 'little' of size or quantity (cf. 12.56), NIr. *beag* with gen. sg. or *de'n* with dat. sg. 'little' in quantity, as *beag airgid*, *beag de'n airgead* 'little money', with nom. sg. 'little' in quantity *beagān airgid* (*arāin*) 'little money (bread)'.

Ir. *terc*, NIr. *tearc* 'scarce', used often in the sense of 'little' and 'few' (e.g. *terca* gl. 'exigua' Ml. 48c30; *ba terc for bith mnai* 'few women in the world', Passions and Homilies 1.830, p. 64, etc., NIr. sometimes used for 'few' like *beag* above, perh. : Lat. *tesca*, *tesqua* 'waste, uncultivated regions'. Pedersen 1.81. Ernout-M. 1035.

Ir. *uath* 'few' (e.g. *is-na huathib laithib-se* 'in paucis istis diebus', Passions and Homilies 1.4992, p. 180), more usually sb. *uathad* 'fewness' (with gen.), etym. dub., perh. : ON *auðr*, OHG *ōdi* 'desert, waste', etc. Walde-P. 1.14.

'Enough' is in part expressed by a declinable adj., but more commonly by an adv. form which is used also in the function of an adj. or sb. Such forms are given preference in the list even where there are also adj. forms in less common use.

Besides the words listed, there are others that answer more nearly to NE *sufficient* (fr. pres. pple. of Lat. *sufficere* 'put into, make take the place of', and so also 'suffice'), which with reference to quantity or number is only a less colloquial equivalent of *enough* but which carries the notion of 'adequate' and is used in many phrases where *enough* could not be substituted.

Semantic sources are notions of 'reaching, attaining', 'satiety' (orig. with reference to food), 'fulness, plenty', what is 'fitting', 'desirable, preferable', hence 'suitable', what will 'do' (cf. NE *that will do*) or 'hold out, last'(?).

1. Grk. ἱκανός : ἵκω, ἱκάνω, ἱκνέομαι 'come, reach, attain to', Lith. *at-siekti* 'reach, attain'. Walde-P. 2.465, Boisacq 372. Cf. NHG *aus-reichend*, *hinreichend*, *hin-länglich* 'sufficient'. In the NT ἱκανός is mostly an emphatic 'enough', that is, 'much, many', 'long' (time), etc., and so in NG or 'capable, adequate'.

Grk. ἀρκέω 'ward off, assist' and 'suffice, be enough' : Lat. *arcēre* 'inclose, contain', then esp. 'ward off'. Walde-P. 1.80. Ernout-M. 67 f. Hence ἀρκῶν' διαρκής, ἐξαρκής 'enough', and late ἀρκετός 'enough' in NT, etc., and the reg. word in NG.

NG also very commonly the vbl. φτάνει 'is enough', 3sg. of φτάνω 'arrive' (10.55).

Grk. ἅλις, adv. 'in plenty' and often 'enough' (cf. also γάλι· ἱκανόν Hesych.) : ἀλής 'crowded', εἴλω 'press', etc. Walde-P. 1.295, Boisacq 45, 223 ff.

2. Lat. *satis*, adv. (phrase cpd. *ad satis* > Fr. *assez*) : *satur* 'sated, full of food', Ir. *sāith* 'satiety, sufficiency', Goth. *saþs*, ON *saðr*, OHG *sat*, Lith. *sotus* 'sated' (ChSl. *sytŭ* 'sated' apparently here, but difficult), Grk. ἄω 'satiate', Skt. *a-sinva-* 'insatiable'. Walde-P. 2.444. Ernout-M. 897 f.

It. *abbastanza*, used as adv., adj., and sb. (also *bastante* adj. and *basta* 'enough, stop!'), Sp. *bastante*, adj. and adv., fr. It. *bastare*, Sp. *bastar* 'suffice' (cf. also Sp. *basto* 'supplied with provisions, coarse, rude', Port. *basto* 'pressed'), orig. disputed but best through It. fr. Grk. βαστάζω, late βαστῶ 'lift, carry, endure', then also 'hold out, last'. (Cf. NG δὲν βαστᾷ 'it won't hold out, last, be enough'.) Schuchardt, Z. rom. Ph. 33.339 ff. Wartburg 1.277. REW 984.

Rum. *destul*, adj. and adv., fr. cpd. of *de* and *satul* 'satiated', fr. Lat. *satullus* id. : *satur*, *satis*, etc. (above, 2). Pușcariu 1531. REW 7620.

3. Ir. *lour*, *lōr*, NIr. *leor* : W. *llawer* 'much, many' (13.15).

NIr. *dōthain* (South Ir.) sb. 'sufficiency, plenty', used with gen. to express 'enough', e.g. *ata mo dhōthain ārain agam*, lit. 'is my sufficiency of bread with me' = 'I have enough bread'; MIr. *doethain* (Windisch 495), orig. 'what comes to one', hence 'suffices' : *do-ethaim* 'go to, approach' (Zimmer, KZ 30.72. Pedersen 2.514).

NIr. *sāith* (North Ir.) 'sufficiency, satiety' (used exactly as *dōthain*, above) : Lat. *satis*, etc. (above, 2).

W. *digon*, MW *digawn*, orig. vbl. form fr. a phrase like *digawn hynny* 'that will do' : OW *digoni* 'make, do' (etym.?). Morris Jones 375. Loth, RC 37.43.

Br. *a-walc'h*, adv., lit. 'in sufficiency', fr. *gwalc'h* 'sufficiency', MBr. *gwalch* 'superfluity', W. *gwala* 'fulness' : Lat. *vulgus* 'the common people', Skt. *varga-* 'group'. Walde-P. 1.296. Pedersen 1.34.

4. Goth. *ganōhs* adj. (renders ἱκανός only in sense 'much, many', e.g. Lk. 7.11, 12, etc.; also once *ganōh* = πολλά Jn. 16.12, but in sense 'enough' *ni ganōhai sind þaim* = οὐκ ἀρκοῦσιν αὐτοῖς Jn. 6.7), ON *nōgr*, *gnōgr* adj., OE *genōg* adj. and adv., etc., general Gmc. (Dan. *nok* fr. MLG *nōch*) : Goth. *ganah*, OE *geneah*, OHG *ginah* 'it suffices' (fr. 'reaches'), Lat. *nanciscī* 'reach, obtain', Skt. *naç-* 'reach, attain', etc. Walde-P. 1.129. Falk-Torp 769. Feist 92,196.

5. Lith., Lett. *gana* (or shortened *gan*) : ChSl. *goněti* 'suffice', Skt. *ghana-* 'compact, tight, thick', *ā-hanas-* 'swelling, exuberant', Grk. εὐ-θενέω 'thrive, bloom', etc. Walde-P. 1.679.

6. ChSl. *dovolĭnŭ*, adj. beside *dovĭlěti* 'suffice', SCr. *dovoljno*, Russ. *dovol'no* advs., cpds. of *do-* 'to' and second member : ChSl. *volja* 'will', *voliti* 'wish, prefer' (: Lat. *velle*, etc.). Miklosich 377. Semantic development through 'desirable, preferable, suitable'.

SCr. *dosta*, *dosti*, Boh. *dost*, *dosti*, Pol. *dość*, *dosyć*, fr. a phrase like ChSl. *do syti* 'εἰς κόρον, to satiety' (Supr., etc.) : ChSl. *sytŭ*, etc., 'sated' (cf. Lat. *satis*, above, 2). Brückner 94. Gebauer 1.286, 392.

Boh. *dostatečný*, Pol. *dostateczny*, Russ. *dostatočnyj*, adjs. (with corresponding adverbial forms), fr. *dostati* in sense of 'suffice' (as ChSl.), orig. 'reach, attain' (whence 'obtain, get' in Boh., Pol., Russ.), cpd. of *do-* 'to' and *stati* 'stand'. Brückner 514.

7. Skt. *alam*, adv. used also as adj., prob. = *aram* 'suitable, right, sufficient', Av. *arəm* 'suitable, corresponding' : Grk. ἀραρίσκω 'join together, fit', Skt. *ṛta-* 'fitting', etc. Walde-P. 1.69 (without *alam*). Uhlenbeck 14, 12.

The majority of the words for 'multitude' are derivs. of, or cognate with, those for 'much, many' (13.15). Some of these are formally of learned origin and not frequent in common speech, e.g. Sp. *multitud* vs. *muchedumbre*, or Fr., NE *multitude* vs. *foule*, *crowd*.

Of the popular words for 'crowd', some are based on the notion of 'turmoil, disorder', these (and some of the others, too) often used in a derogatory sense. More frequently, as in NE *crowd*, *throng*, etc., they are derived from verbs for 'press' and properly denote a closely packed number of persons, but with this notion sometimes fading into that of large number. Many of the words for 'people' (19.21) are also used for 'crowd', e.g. very frequently in biblical renderings of Grk. ὄχλος, Lat. *turba*. Words for 'heap' are also often used for a large number or quantity, and in colloquial speech many others, not entered in the list, as NE *lot(s)*, *pile*, *mass*, *sight*, *power*, etc. Furthermore, many of the collective words commonly applied to certain animals, like NE *drove*, *flock*, *herd*, *school*, *swarm* (13.192), are also quotable with reference to a large number of persons.

1. Grk. πλῆθος, fr. the same root as πολύς 'much', pl. 'many'.

Grk. ὄχλος, often, but not necessarily, with derogatory sense, perh. : Goth. *agls* 'shameful', *aglus* 'difficult', etc. Walde-P. 1.174. Feist 15.

2. Lat. *multitūdō* (> It., Fr., Sp. learned forms, also ME, NE; Sp. *muchedumbre* with pop. form of suffix as in *dulcedumbre*, etc.), fr. *multus* 'much', pl. 'many'. Rum. *mulțime*, new deriv. of *mult* (suffix *-ime* fr. Lat. *-īmen*).

Lat. *turba* 'turmoil, disorder', and 'crowd', generally with pejorative force, either loanword from or cognate with Grk. τύρβη 'turmoil, disorder', prob. fr. the root in OE *þweran* 'stir, shake', ON *þorp* 'hamlet, village', *þyrpask* 'crowd' (vb.), etc. Walde-P. 1.750. Ernout-M. 1065.

It. *folla*, Fr. *foule*, back-formation fr. vbs. *follare*, *fouler* orig. 'full cloth', hence 'press, crowd', fr. VLat. *fullāre* (pple. *fullātum* in gloss), deriv. of Lat. *fullō* 'fuller'. REW 3560.

Sp. *gentío*, fr. *gente* 'people'.

Rum. *gloată*, fr. Slavic, late ChSl., Bulg. *glota* 'crowd', etc. Tiktin 687 f. Berneker 306.

W. *lliaws* : Br. *liez* 'several', Ir. *lia*, Grk. πλέων, etc. 'more' (13.15). Walde-P. 2.65. Pedersen 1.68, 2.120.

W. *torf*, fr. Lat. *turma* 'troop, throng' (: *turba*, above, 2). Loth, Mots lat. 211.

Br. *niver bras* 'large number' (12.55, 13.12).

Br. *engroez*, deriv. of *enk* 'narrow' (12.62), with semantic development as in NE *throng*, *crowd*. Henry 114.

4. Goth. *managei*, ON *mengi*, OE *menigeo*, OHG *menigī*, etc., general Gmc. (but lost in ME, NE), fr. Goth. *manags* 'much, many', etc.

ON *margr*, sb. use of adj. *margr*, pl. *margir* 'many'.

ON *þrǫng*, OE *geþrang*, ME *thrang*, NE *throng*, Du. *gedrang*, OHG *githrengi* (Otfr.), NHG *gedränge*, all orig. involving the notion of pressure : ON *þrǫngr* 'narrow', etc. (12.62).

Dan. *hob*, Sw. *hop*, fr. LG *hōp* 'heap' (= OE *hēap*, etc.). Cf. the colloq. use of NE *heap* for a large number (NED s.v. 4, but rarely of persons), NHG *haufe*. Falk-Torp 413.

ME, NE *press* (in this sense now mostly replaced by *crowd*), fr. Fr. *presse*, back-formation fr. *presser*, Lat. *pressāre*, frequent. of *premere* 'press'. NED s.v.

NE *crowd*, fr. vb. *crowd*, this fr. OE *crūdan* 'press' = MDu. *crūdan* 'press, push', MHG *kroten* 'oppress', etc. NED s.v.

5. Lith. *daugybė*, Lett. *daudzums*, fr. *daug*, *daudz* 'much, many'.

Lith. *minia*, fr. *minti* 'tread, trample on'. Leskien, Ablaut 336.

Lett. *pulks* (= Lith. *pulkas* 'regiment', 'flock, herd' of animals, etc.), fr. Slavic, esp. Pol. *pułk* 'regiment' (late ChSl. *plŭkŭ* 'crowd, band', etc.), the Slavic words fr. Gmc., OHG *folc*, etc. 'people, army'. Stender-Petersen 194 ff. Mühl.-Endz. 3.407.

6. ChSl. *mŭnožĭstvo* (in Gospels for πλῆθος), etc., general Slavic, fr. ChSl. *mŭnogŭ*, etc. 'much, many'.

ChSl. *narodŭ* (in Gospels for ὄχλος), reg. Slavic word for 'people' (19.21).

ChSl. *tlŭpa* (Supr.), Russ. *tolpa*, Boh. *tlum*, Pol. *tłum* (**tŭlp-m-*), perh. : Lith. *tilpti* 'have room for'. Brückner 572.

SCr. *naloga*, fr. the root of ChSl. *ležati* 'lie' (12.13) with *na-* 'upon', hence the notion of 'pressure' and 'crowd'. Berneker 728.

SCr. *tišma*, Pol. *ciżba*, fr. the root of ChSl., SCr. *tiskati* 'press' (Pol. *ciskać* 'throw'). Miklosich 357. Brückner 64.

Boh. *zástup*, fr. *zastoupiti* 'step behind, obstruct' (ChSl. *stąpiti* 'tread').

Boh. *dav*, fr. *dáviti* 'press (obs.), strangle'. Berneker 181.

7. Skt. *bāhulya-*, fr. *bahu-* 'much, many'.

Skt. *samūha-*, orig. 'heaping up, heap', fr. *sam-ūh-* 'sweep together'.

Av. *frəni-* (fr. **fr-ani-*, **pr-ani-*), fr. the same root as *paru-* 'much, many'. Barth. 1022.

13.192. Note on other words for a collective body (of persons, animals, or things). NE *group* (fr. Fr. *groupe*, fr. Ital. *gruppo* : *groppo* 'knot'), in earliest use an art term (group of sculptured or painted figures), has become the most nearly generic term; but even this is not applied to animals. For the most part, instead of any generic term, there is a wealth of individualistic terms, differentiated according to the object referred to. Thus, to illustrate from one language only, though a parallel variety may be seen elsewhere, note the following NE words (excluding military terms like *battalion*, *brigade*, *squadron*, etc., and otherwise far from exhaustive), with their most familiar applications (these are not exclusive; in fact, most of those commonly used of certain animals are sometimes used also of others and of persons). For the etymology and range of use, cf. NED.

Band (armed men, robbers, musicians); *bevy* (girls, roes, some birds); *body* (people, soldiers); *bunch* (grapes, flowers, keys, etc.; also people in U.S.

slang); *cluster* (flowers, stars, also people); *covey* (partridges); *crew* (workmen, sailors); *drove* (cattle, sheep, etc.); *flock* (sheep, goats, geese, formerly also of people); *gang* (esp. workmen or criminals); *herd* (domestic animals, also bison, elephants, etc.); *horde* (nomadic tribes); *lot* (persons and things); *pack* (dogs, wolves); *school* (esp. fish); *shoal* (esp. fish); *squad* (soldiers, police); *stud* (esp. horses); *swarm* (esp. bees); *troop* (esp. soldiers, actors).

Nearly all the words for 'full' belong to an inherited group reflecting IE words for 'fill' and 'full'.

1. Derivs. of IE **plē-*, etc., seen in verbs for 'fill', as Grk. πίμπλημι, Lat. *plēre* (mostly in cpds.), Ir. *līnaim*, Skt. *pṛ-*, *pūr-*, *prā-*, etc. All but the Greek are formed with the *-no*-suffix, and the majority of these from the weak grade of the dissyllabic stem, that is IE **pḷ-no-*. Walde-P. 2.63 ff. Ernout-M. 779 f.

Grk. πλήρης (cf. Lat. *plērus* 'very many'); Lat. *plēnus* (> Romance words); Ir. *lān*, W. *llawn*, Br. *leun;* Goth. *fulls*, etc., general Gmc.; Lith. *pilnas*, Lett. *pilns;* ChSl. *plŭnŭ* (renders μεστός and in phrases γέμω; cpd. *isplŭnŭ* = πλήρης), etc., general Slavic; Skt. *pūrṇa-*, Av. *pərəna-*; Arm. *lī*, Alb. *pl'otë*.

2. Grk. μεστός, etym. dub., perh. : μέζεα, Hom. μήδεα 'genitals', Ir. *mess* 'mast', W. *mes* 'acorns', fr. an unattested root **med-* in sense of 'swell'(?). Walde-P. 2.231. Walde-H. 2.7.

NG γεμᾶτος (already in late Byz.) formed with suffix fr. Latin *-ātus* (Hatzidakis, Μεσ. 1.422), fr. γέμω 'be full', beside γεμίζω 'fill' : Lat. *gemere* 'groan' (fr. 'be pressed, oppressed'), Umbr. *gomia* 'gravidas', ChSl. *žimą*, *žęti* 'press', all prob. fr. a common notion of 'press'. Walde-P. 1.572 f. Walde-H. 1.588 f.

The usual verbs for 'fill' are cognate with the adjectives for 'full', either their source (cf. above, 1) or derived fr. them, as Grk. (beside πίμπλημι) πληρόω (also 'fulfil' and 'pay', as NG πληρώνω), μεστόω (fr. μεστός, above, 2), Sp. *llenar*, Goth. *fulljan*, OE *fyllan*, etc. (general Gmc., all fr. adj.), ChSl. (*is*)*plŭniti*, SCr. *puniti*, etc., Lith. *pildyti*, Lett. *pildit*, with dental extension of the root (cf. Grk. πλήθω 'be full'). There is often a preference for cpd. forms, as Lat. *im-*, *re-* (also *com-*, etc.) *plēre* (simplex only in Festus), It. *empire*, *riempire*, Fr. *emplir*, *remplir*, Rum. *umplea* (also Sp. *henchir* beside *llenar*), ChSl. *isplŭniti*, Russ. *napolnit'*, etc.

But there are some alternative terms for 'fill' in certain connections, e.g. Fr. *combler*, fr. Lat. *cumulāre* 'heap up', hence 'fill up, fill' (esp. a void); Russ. *nabit'*, cpd. of *bit'* 'strike, beat', hence 'drive in, cram in' and so 'fill' (a pipe, etc.).

Several of the words for 'empty' are cognate with words for 'loose, free', some of them more specifically derivs. of words for 'freedom from duties' or 'leisure', being first applied to persons who were unoccupied and then extended to things. Some others must have been first applied to land that was 'waste, wild' or 'stripped of crops'. Several are obscure. Specialization of 'empty' to 'vain' or 'idle' is frequent, as in NE *vain, idle*, NHG *eitel.*

1. Grk. κενός, Ion. κεινός (*κενϝός) beside Hom. κενεός, Cypr. κενευϝός (*κενεϝός) : Arm. *sin* 'empty, vain', root connection? Walde-P. 1.390.

NG ἄδειος (hence vb. ἀδειάζω 'empty'), ἀδειανός, derivs. of Grk. ἄδεια, orig. 'freedom from fear' (: δέος 'fear'), then as technical term 'amnesty, immunity, license', NG 'permission' and 'leisure'. The adj. ἄδειος must have been applied first to persons who enjoyed freedom from duties, leisure, and so were unoccupied, whence it was extended to objects that were unoccupied 'empty'. Buck, Cl. Ph. 15.198.

2. Lat. *vacuus* : *vacāre* 'be empty, be free', prob. fr. an extension of the root in Lat. *vānus* 'empty, idle, vain', Goth. *wans*, ON *vanr* 'lacking', Skt. *ūna-*, Av. *ūna-* 'insufficient', NPers. *vang*, Arm. *unayn* 'empty'. Walde-P. 1.108. Ernout-M. 1068 f.

Lat. *inānis*, plainly neg. cpd. with *in-*, but last member obscure. Walde-P. 1.57. Ernout-M. 482. Walde-H. 1.688.

It. *vuoto*, Fr. *vide*, OFr. *vuide* (also OFr. *voide* > ME *voide*, NE *void*), fr. VLat. **vocitus*, deriv. of VLat. *vocuus*, for Lat. *vacuus* (above). Cf. Lat. *vocīvus* Plaut. and inscr. *vocātiō* = *vacātiō*. Ernout-M. 1069. REW 9429.

Words for 'a part' as opposite of 'the whole' are such as are also used in general for 'portion, share', often also 'locality, region', and are derived from various roots for 'share, divide', etc.

1. Grk. μέρος (also 'share, portion' beside μερίς 'portion') : Hom. μείρομαι 'receive as one's portion', μερίζω 'divide', μόρος 'lot, fate', etc., Lat. *merēre* 'receive as portion or price', 'earn, merit', fr. a root *(*s*)*mer-*, perh. the same as *(*s*)*mer-* in Lat. *memor* 'mindful of', Skt. *smr-* 'remember'. Walde-P. 2.690. Ernout-M. 609 f. Walde-H. 1.75 f.

NG μέρος in pop. speech mostly 'locality, region' and in sense of 'part' often replaced by κομμάτι 'piece', fr. a dim. form of class. Grk. κόμμα 'piece cut off' (also 'stamp', etc.), fr. κόπτω 'strike, cut'.

2. Lat. *pars, -tis* (> It., Sp., Rum. *parte;* Fr. *part* now mostly 'portion, share'), prob. fr. the root of Ir. *ro-ir* '(he) granted', Grk. ἔπορον 'gave, brought', πέπρωται 'it is fated', and also Lat. *parere* 'bear, give birth to' (fr. 'obtain, get'). Walde-P. 2.41. Ernout-M. 735.

Fr. *partie* (now usual for 'part' of a whole, for older *part*), fr. *partir* in arch. sense 'divide' (now 'part, leave'), fr. VLat. *partīre* (for Lat. *partīrī*) 'divide', fr. *pars* (above). REW 6259.

3. Ir., Br. *rann*, W. *rhan*, generally taken as (**pr̥snā-*?) : Lat. *pars* (above, 2). Pedersen 1.52. Stokes 227. Or as orig. 'border' : OE *rand* 'border', etc.? Loth, RC 41.400 f. (but see also 43.411 f.).

Ir. *cuit*, NIr. *cuid* (in the older language chiefly 'portion, share') : W. *peth* 'thing', Br. *pez* 'piece', further connection doubtful. Pedersen 1.160 (: ChSl. *čęstĭ* 'part', etc.; rejected by Walde-P. 1.393). Henry 222.

Ir. *pairt* (NIr. *pāirt* now 'regard, sympathy', etc.), fr. Lat. *pars*. Vendryes, De hib. voc. 164.

4. Goth. *dails*, OE *dǣl*, OS *dēl* (MLG > Sw. *del*, and Dan. *del* as old masc.), ME *deel* (NE *deal*), etc., general WGmc., ON *deild* (> Dan. *del* as old fem.), beside vb. forms, Goth. *dailjan*, ON *deila*, OE *dǣlan*, etc. 'divide', etym. dub. ON *hlutr, hluti*, 'share, lot' and also 'part' : OE *hlot*, Goth. *hlauts* 'lot', etc., root connection dub. Walde-P. 1.493. Falk-Torp 651. Feist 262.

ME, NE *part*, fr. Fr. *part* (above, 2).

5. Lith. *dalis*, Lett. *dal'a*, OPruss. *dellīks*, with vbs. Lith. *dalyti*, Lett. *dalīt* 'divide' : Russ. *dolja* 'lot, share', Skt. *dala-* 'fragment, piece', fr. the root in Skt. *dal-* 'burst', Lat. *dolāre* 'hew', etc. Walde-P. 1.811. Mühl.-Endz. 1.435. Berneker 209.

6. ChSl. *čęstĭ*, SCr. *čest*, etc., general Slavic, as orig. 'bite, bit' : Lith. *kasti*, Lett. *kuost*, SCr. *kusati*, etc., 'bite'. Walde-P. 1.393. Berneker 155.

ChSl. *dělŭ* (late, but *raz-děliti* reg. in Gospels for 'divide'), SCr. *dio*, Boh. *díl*, Pol. *dział* (Russ. *djal* obs., but *delit'*, *razdelit'* 'divide'), prob. (as **dai-lo*), fr. the root **dā*(*i*)- in Skt. *dā-* 'cut off, divide, separate', Grk. δαίομαι 'divide, distribute', etc.; relationship to Goth. *dails*, etc. dub. (both as **dhai-l-* fr. a parallel root **dhā*(*i*)-??). Walde-P. 1.764, 811. Berneker 195.

7. Skt. *bhāga-*, also 'portion, share, allotment', Av. *baga-, baγa-* 'share, lot', *baγā-* 'part, piece' (of the holy word) : Skt. *bhaj-* 'deal out, divide, distribute', Av. *bag-* 'allot (as one's share)'. Walde-P. 2.127 f. Barth. 921 f.

Skt. *aṅça-* (Av. *ąsa-* 'party', i.e. one of the two religious divisions), prob. (as orig. 'share') : Skt. *naç-*, Av. *nas-* 'reach, attain'. Walde-P. 1.128. Uhlenbeck 1. Barth. 361.

In contrast to the words for 'a third', 'a fourth', and other fractions, which are all numeral derivs., those for 'half' (adj.) or 'a half' have no connection with a numeral. There is an inherited group which probably rests on the notion of a single or even division, and in Latin 'divided in the middle' was 'half'. Other words, some of them used also for 'side' and some cognate with verbs for 'cut, divide', etc., must have gained the meaning 'half' through specialization of 'part, division'.

1. IE **sēmi-* in cpds., prob. with reference to a single or even division : IE **sem-*, **somo-*, etc., in Grk. ὁμός, Skt. *sama-*, Goth. *sama* 'same', Lat. *semel* 'once', Grk. εἷς 'one', etc. Walde-P. 2.493 (with doubt of the connection with **sem-*, etc.). Ernout-M. 921 f.

Grk. ἡμι- in cpds., hence ἥμι-τυς, orig. sb. 'a half', then as adj. (cf. Cret. ἡμιτύεκτον), Att. ἥμισυς (adj., with neut. ἥμισυ as sb.), many dial. also ἥμισσος (*ἡμιτϝος), Cret. ἡμίνα sb. 'half'; ἥμισυς > NG pop. μισός adj., τὸ μισό sb.; Lat. *sēmi-*, OE, OS *sām-*, OHG *sāmi-*, Skt. *sāmi-* in cpds.

Of similar ultimate orig. prob. W. *hanner*, adj. and sb. (in cpds. *haner-*), Br. *hanter* adj. and sb. (fr. **sm̥-tero-*) : Grk. ἄτερος, Att. ἕτερος 'one or the other of two'. Walde-P. l.c. Pedersen 1.138 (with different root connection).

2. Lat. *dīmidius* (VLat. *dīmedius* > Fr. *demi*), orig. (with *pars*) 'divided in the middle', cpd. of *dis-* 'apart' and *medius* 'middle' (12.37). From the latter, It. *mezzo*, Sp. *medio*, and through sb. Lat. *medietās* 'middle, center' and 'half', It. *metà*, Fr. *moitié*, Sp. *mitad*. Ernout-M. 601. REW 2644, 5461.

Rum. *jumătate* (sb.), fr. Lat. *medietās* or *dimidietās*, with peculiar phonetic development. Tiktin 879, Elementarbuch 208. Densusianu 295 f. (assuming blend with a loanword fr. Alb. *gjysmë* 'half', this fr. Grk. ἥμισυς).

3. Ir. *leth* ('side' and 'half'), NIr. *leath* (fem. 'side', masc. 'half'), orig. 'side' : Lat. *latus* 'side' (12.36). Hence for adj. mostly cpds. with *leth-, leath-*.

W. *hanner*, Br. *hanter*, see above, 1.

4. Goth. *halbs*, etc., general Gmc., perh. (as orig. 'divided') : Lat. *scalpere* 'cut, carve, scrape, scratch', Lith. *sklempti* 'hew off smooth, polish', Grk. σκόλοψ 'pointed stake', etc. Walde-P. 2.595. Falk-Torp 375. Feist 239.

5. Lith. *pusė*, Lett. *puse* sb. (with gen.), also freq. Lith., Lett. *pus-* in cpds. : OPruss. *possisawaite* 'mittwoch', *esse ... pausan* 'on the part of', Toch. A *poṣi* 'side, wall'. Mühl.-Endz. 3.426. Fraenkel, IF 50.229.

6. ChSl. *polŭ*, SCr. *po* (dial. *pol*), Pol. *poł*, Boh. *půl* sbs., Russ. *pol-* (in cpds.

only in nom. and acc. with gen. of second member, in other cases *polu-* with second member regularly inflected), also adjs. Boh. *poloviční*, Pol. *połowiczny;* Slavic *polŭ* 'half' = *polŭ* 'side, shore' (cf. above Ir. *leth* 'side, half') : ChSl. *rasplatiti*, OHG *spaltan* 'split', Skt. *spāṭaya-* 'split', etc. Walde-P. 2.678. Miklosich 256 f. Brückner 429.

7. Skt. *ardhá-*, beside sb. *árdha-* 'side, part, half' : Lith. *ardyti* 'divide, split', etc. Walde-P. 1.143. Uhlenbeck 14.

Av. *naēma-* (NPers. *nēm*) : Skt. *nema-* 'the one, the other', also 'half', orig. dub. Barth. 1036. Uhlenbeck 151.

13.31. NOTE ON THE NUMERALS

No class of words, not even those denoting family relationship, has been so persistent as the numerals in retaining the inherited words.

Except for some suffix-variation and actual substitution in the case of 'one' (13.32), the IE words for 'one' to 'ten' have persisted everywhere with only slight changes other than phonetic; likewise the IE word for 'hundred', while for 'thousand' there are several different groups.

The '-teens' are expressed by cop. cpds. of the digits with 'ten', with the exception of the Gmc. words for 'eleven' and 'twelve' (Goth. *ain-lif, twa-lif*) and the whole Lith. series (*vienio-lika, dvylika, try-lika, keturio-lika*, etc. for 11–19), which are cpds. with a form of IE **leikʷ-* 'leave, remain' (Grk. λείπω, etc., Walde-P. 2.396 f.), hence orig. 'one over' (the ten), etc.

For 20–90 certain IE cpds., the second part of which seems to be obscurely related to the numeral for 'ten', have been partly retained (for 20 Grk. εἴκοσι, Dor. ϝίκατι, Lat. *vīginti*, Skt. *viṅçati-*, etc.; for the others Grk. -κοντα, Lat. *-ginta*, Skt. *-çat-*, etc.), and partly replaced by more transparent phrases or cpds. (as for 20 Goth. *twai tigjus*, OE *twen-tig*, Lith. *dvi-dešimt*, Rum. *două-zeci*).

The decimal system, based on counting the fingers, prevails. But the influence of a duodecimal or sexagesimal system is indicated by certain breaks in the type of formation as that between 12 and 13 in Gmc., between 60 and 70 in Grk., Goth., etc.

The ordinals are formed from the cardinals, mostly with a *-to-* or *-mo-* suffix. Exceptions are those for 'first' (13.33), and many of those for 'second', which are literally 'the other' (Goth. *anþar*, OE *ōþer*, ChSl. *vŭtorŭ*, etc.) or 'the following' (Lat. *secundus* : *sequī* 'follow'; similarly Grk. δεύτερος prob. orig. 'the one after', cf. Hom. δεύτατος 'last').

For detailed discussion of the IE numerals, cf. Brugmann, Grd. 2.2.1 ff.

In the following we list and discuss only those for 'one' and 'first', and for 'three' with derivs., choosing these last as convenient illustrations of the various types.

Where the adjectives 'alone' and 'only' are distinguished as in NE *alone* vs. *only*, NHG *allein* vs. *einzig*, etc., the differentiation is idiomatic and mainly one of position, predicative vs. attributive. In many languages the same word is used in both ways, e.g. Grk. μόνος, Lat. *sōlus*, Fr. *seul*, Goth. *ains*, etc. The underlying notion is an emphatic 'one', and it is most commonly expressed by

the numeral, either by itself or in derivs. or phrases.

1. 'One' used by itself for 'alone'. So Lat. *ūnus* (beside the more distinctive *sōlus*), Goth. *ains* (reg. for μόνος), ON *einn*, OE *ān*, etc., but esp. with weak inflection OE *āna*, OHG *eino;* Lith. *vienas;* ChSl. *jedinŭ*, Russ. *odin*, and for attrib. 'only' with def. adj. inflection, SCr. *jedini*, etc. (but Russ. *jedinyj* now arch., usually *jedinstvennyj*); Skt. *eka-*, Av. *aēva-*.

Derivs. of 'one'. Grk. μόνος (? see below, 2); Lat. *ūnicus* (> It. *unico*, etc.); Ir. *ōenur*, NIr. *aonar*, W. *unig;* Goth. *ainaha* (for μονογενής), ON *einga-*, OE *ānga*, OHG *einac, einig*, MHG *einec*, Du. *eenig*, NHG (*einig* obs. in this sense, replaced by) *einzig;* OE *ānlīc*, ME *onely*, NE *only;* Sw. *ende*, Dan. *eneste;* Lith. *vienatinis*, Lett. *vienīgs;* Skt. *ekaka-*; cf. also, fr. stem **sem-* in words for 'same', Rum. *singur* 'alone', fr. Lat. *singulus* 'single' (Ernout-M. 944 f. REW 1945) and SCr., Boh., Pol. *sam* 'alone' (ChSl. *samŭ* 'self').

Phrases with 'one'. Br. *e-unan* (*e* poss. pron.), *unan-penn* (*penn* 'head'), etc. (Vallée s.v. *seul*); ME *al(l) on(e)*, *alone*, NE *alone* (hence *lone, lonely, lonesome*, now mostly in emotional sense, as also NHG *einsam*), LG *alēne* (> Dan. *alene*, Sw. *allena*), MHG *aleine*, NHG *allein*, fr. *all* as adv. 'wholly' and word for 'one'; Lith. *vienas sau* (*sau* 'for oneself'), Lett. *viens pats* (*pats* 'self').

2. Grk. μόνος, Ion. μοῦνος (*μονϝος), generally taken (after Brugmann) as cognate with μανός, μᾱνός (*μανϝος) 'thin (in density), rare', etc. (12.66). Walde-P. 2.266 f. Ernout-M. 618. Miss Hahn, Language 18.88 f., reviving and improving an older suggestion, derives fr. *σμονϝος, formed fr. **sem-* in Grk. εἷς, μία (*σμία), ἕν 'one', Grk. ὁμός, Goth. *sama*, Skt. *sama-* 'same', etc. This is better on the semantic side, as in line with the most common source of 'alone' (above, 1), and quite possible, though complicated, on the formal side. Hence μοναχός 'unique', NG = μόνος.

3. Lat. *sōlus* (> It., Sp. *solo*, Fr. *seul*), etym. dub., perh. deriv. of refl., stem seen in *sē, sibi* and so orig. 'by oneself'. Walde-P. 2.458. Ernout-M. 954. Brugmann, Totalität 48 f.

4. Many of the adverbs for 'only' are simply adv. forms of (or phrases with) the adjectives, e.g. Grk. μόνον, Lat. *sōlum*, Fr. *seulement*, Goth. *þatainei* (fr. *þatain* 'that one'), OE *ān* (so reg. in Gospels for 'only'), ME *onliche, onely*, NE *only*, Lett. *vien*, ChSl. *jedino*, SCr. *samo*, Boh. *jen*, Pol. *jeno*, etc. But many others are of quite different origin.

Lat. *tantum*, fr. *tantus* 'so great, so much', hence as 'just so much and no more' to 'only'.

Lat. *modo*, fr. *modus* 'measure'. Hence also, with the preceding, *tantummodo.*

Rum. *numai*, fr. Lat. *nōn magis* 'not more'. Cf. OFr. *ne mais—que*, Fr. *ne—que.* REW 5228.

Ir. *nammā*, NIr. *amhāin*, fr. *na* 'not' and *mā, mō* 'more' (13.16). Br. *nemet* also fr. negative, but formation obscure. Pedersen 1.165, 2.261.

Br. *hepken*, fr. *hep* 'without' and *ken* 'more'.

Dan. *blot*, Sw. *blott*, NHG *bloss*, fr. the corresponding adjs. meaning 'naked, bare' (4.99). Cf. NE *barely.*

Dan. *kun*, fr. older *ikkun*, this fr. *ikke uden* 'not without' (cf. following). Falk-Torp 460.

ME, NE *but*, in this sense orig. with neg., fr. OE *ne būtan* 'not without'. NED s.v.

Du. *slechts*, fr. adj. *slecht*, now 'bad', but orig. 'level, smooth' (Goth. *slaihts*, ME, NE *slight*, etc.), with adj. development through 'evenly, directly, wholly' > 'only'. Franck–v. W. 614.

OHG *ekkorodo, ekrodo* : ON *ekla* 'dearth, want', adv. 'scarcely', Lat. *egēre* 'be in need'. Walde-P. 1.114.

MHG *ni wære, ni wer*, NHG *nur*, orig. phrase 'were it not, unless'. Weigand-H. 2.319. Kluge-G. 421.

On the distribution of *nur* and *bloss*, cf. Kretschmer, Wortgeogr. 130 f.

Lith. *tik*, earlier *tikt, tiktai*, Lett. *tik(ai)* : Lith. *tiek* 'so much', *tikti* 'fit, suit', with development through 'exactly, just' to 'only'.

Boh. *toliko*, Pol. *tylko*, Russ. *tol'ko*, fr. adj. ChSl. *tolikŭ*, etc. 'so much', with same development as in Lat. *tantum.*

The words for 'first' have no connection with the cardinal for 'one'. Most of them belong to a group in which the original sense was 'foremost'.

1. Derivs., with various suffixes, of IE **pro* 'before, in front' (Grk. πρό, Lat. *pro*, Goth. *fra*, Skt. *pra*, etc.) or allied forms. Walde-P. 2.29 ff., esp. 33, 37.

Grk. πρῶτος, Dor. πρᾶτος (these two not fr. the same form; πρᾶτος fr. **pr̥-to-*, a blend with **pr̥-mo-* seen in Lith. *pirmas;* **pr̥-* also in Skt. *pūrva-* 'former'; Schwyzer, Gr. Gram. 595); Lat. *prīmus* (fr. **prīs-mo-*, cf. Pael. *prismu* 'prima' and Lat. *prīscus;* Umbr. *promo* 'primum' adv., like Grk. πρόμος 'foremost man'), whence It. *primo*, Rum. *prim*, but Fr. *premier*, Sp. *primero* fr. Lat. *prīmārius* 'of the first rank' (of persons); ON *fyrstr*, Dan. *første*, Sw. *förste*, OE *fyrst*, ME, NE *first*, OHG *furisto* (NHG *fürst* 'prince'), Goth. *fruma, frumist*, OE *forma, fyrmest;* Lith. *pirmas*, Lett. *pirmais;* ChSl. *prŭvŭ*, etc., general Slavic (cf. 2. Rum. *întîiŭ*, once the usual ordinal (*prim* a Latinism), fr. **antāneus*, deriv. of Lat. *ante* 'before'. Puşcariu 883, 1384.

3. Ir. *cētne, cēt-* in cpds., NIr. *cēad*, W. *cyntaf*, Br. *kenta* (cf. Gall. *Cintugnātus* 'first born'), prob. : ChSl. *načęti* 'begin', *konŭ* 'beginning', Lat. *recēns* (*re-cēns*) 'fresh, young', Goth. *hindumists* 'outermost'. Walde-P. 1.398. Pedersen 1.120. Brugmann, Grd. 2.2.52.

4. OE *ǣrest* (NE *erst* 'in former time'), OHG *ēristo*, MHG *ēr(e)st*, NHG *erst;* superl. of Goth. *air* 'early', OE *ǣr* (NE *ere*), OHG *ēr* (NHG *ehe*) 'early, formerly', hence orig. 'first' in time. Walde-P. 1.3. NED s.v. *erst*, Weigand-H. 1.405, 469.

Many of the adjectives for 'last' are derivs. (most of them in superl. form) of words for 'up, out, after, behind' or 'late'. Several are formed from nouns for 'end', and a few from verbs for 'follow' (or through this sense from a noun for 'footstep, trace') or 'be left, remain'.

1. Grk. ὕστατος : Skt. *uttama-* ('highest' and 'last'), Av. *ustəma-*, superl. (beside comp. Grk. ὕστερος, Skt. *uttara-*) of an adv. seen in Skt. *ud-* 'up, out', Goth., OE *ut* 'out', etc. Walde-P. 1.189 f.

Grk. τελευταῖος (the most common prose word), deriv. of τελευτή 'end' (14.26).

Grk. ἔσχατος, 'uttermost, farthest' and 'last' in time (in this sense Pind.+, the only word in NT, and freq. in pap.), deriv. of ἐξ 'out'. Walde-P. 1.116 (with refs.).

NG ὑστερινός, pop. στερνός, in earliest use 'latter, next', deriv. of ὕστερος (cf. above, 1).

2. Lat. *ultimus* (> It., Sp. *ultimo*, Rum. *ultim*, all learned forms), superl. (beside comp. in *ultrā* 'beyond', etc.) based on the pron. stem seen in *uls* 'beyond', OLat. *ollus* = *ille*, etc. Walde-P. 1.84. Ernout-M. 475, 1121.

Lat. *extrēmus, postrēmus*, superl. formations (beside comp. in *extrā, posterus*, etc.) based on *ex* 'out' (cf. Grk. ἔσχατος) and *post* 'after'. Ernout-M. 313, 797.

Lat. *novissimus*, superl. of *novus* 'new', hence lit. 'newest, latest' but frequently 'last', even in position (in the Vulgate the reg. rendering of Grk. ἔσχατος).

Fr. *dernier*, fr. OFr. *deerrain, derrain*, deriv. of *derrière* 'backwards, behind', fr. Lat. *dē retrō* id. (*retrō* fr. *re-* like *intrō* fr. *in*). Ernout-M. 854. REW 2582.

3. Ir. *dedenach*, W. *diweddaf*, Br. *diweza*, derivs. of Ir. *deod*, W. *diwedd*, Br. *diwes* 'end' (14.26). Pedersen 1.309.

Ir. *derednach* (K. Meyer, Contrib. 619), NIr. *deireannach*, deriv. of Ir. *dered*, NIr. *deireadh* 'end' (12.35).

W. *olaf*, superl. form based on *ol* 'trace' and adj. 'behind'. Pedersen 2.123.

4. Goth. *aftumists* (once also *aftuma*), OE *æftemest*, superls. based on Goth. *afta* beside *aftra* 'behind, backwards', OE *æft* 'afterwards' beside *æfter* 'after', etc. Feist 12.

Goth. *spēdists* (also *spēdumists, spēdiza* once each), superl. of a form = OHG *spāti* 'late', etc. (14.17).

ON *sīðastr, sīðarstr*, Dan. *sidst*, Sw. *sist*, superl. based on ON *sīð* adv. 'late' (14.17). Falk-Torp 962.

OE *lætest, læt(e)mest* (quotable only in Northumbrian), ME, NE *last*, Du. *laatst*, OHG *lazzōst, lezzest*, MHG *lezzist, lest*, NHG *letzt* (this fr. LG), general W. Gmc., superl. of OE *læt*, OHG *laz*,

etc. 'slow, late' (14.22). NED s.v. *last* adj. Weigand-H. 2.57. Kluge-G. 356.

5. Lith. *paskutinis*, deriv. of *paskui* 'after, behind' (: Skt. *paçcā*, Lat. *post*, etc.; Walde-P. 1.79). Leskien, Bildung d. Nom. 407.

Lett. *pēdīgs*, deriv. of *pēds* 'footstep, trace' : Skt. *pād-*, Lat. *pēs, pedis*, etc. 'foot'. (Suffix = Lith. *-ingas*, Leskien, Bildung d. Nom. 528).

6. ChSl. *poslědĭnĭjĭ*, etc., general Slavic for 'last' except Pol. (where *pośledni* is 'inferior, mediocre'), fr. ChSl. *poslěditi*, etc. 'follow' (10.52).

SCr. *zadnji*, deriv. of *zad* beside *za* 'behind, after' (cf. adv. *nazad* 'back', ChSl. *za-dŭ, na-dŭ*, etc.).

Pol. *ostatni*, fr. the vb. seen in ChSl. *ostati* 'be left, remain', Pol. *ostać* 'hold out, remain', etc., cpd. of ChSl. *stati* 'take a stand', Pol. *stać* 'stand', etc. (12.15). Brückner 385.

7. Skt. *uttama-*, Av. *ustəma-*, above, 1. Skt. *antima-*, fr. *anta-* 'end' (12.35).

13.41. IE stem **tri-*, nom. pl. **treyes*. Walde-P. 1.753. Brugmann, Grd. 2.2.11 f.

Here belong all the words listed, likewise Alb. *tre*, Toch. B *trai*, A *tre*, fem. *trī-*, Hitt. *tri-*.

A peculiar fem. form **tis(o)res* is attested by Skt. *tisras* (cf. also *catasras*, fem. of *catvāras* 'four'), Av. *tišrō*, Ir. *teoir, teora*, MW, Br. *teir*, W. *tair*. This is prob. fr. **tri-sores* (with dissimilatory loss of *r*), a cpd. with a word for 'woman' seen in IE **swe-sor-* 'sister' and perh. Lat. *uxor* 'wife'.

13.42. The ordinals for 'third' are derived from the cardinal, most of them

in an inherited type but some in new formations.

1. Inherited type, with suffix *-to-* or *-tio-*. Walde-P. 1.753. Brugmann, Grd. 2.2.53 ff.

Suffix *-to-*. Grk. τρίτος, Toch. A *trit*.

Suffix *-tio-*. Lat. *tertius* (> It. *terzo*, OFr. *tierz*, etc.); W. *tryddydd*, Br. *trede*; Goth. *þridja*, etc., general Gmc.; Lith. *trečias*, Lett. *trešais* (OPruss. *tirtis*, but also *tīrts*); ChSl. *tretĭjĭ*, etc., general Slavic; Skt. *tṛtīya-*, Av. *θritya-*, OPers. *θritiya-*.

2. Fr. *tiers*, Sp. *tercio* (fr. Lat. *tertius*) were specialized to 'a third' (fraction), the former replaced by *troisième*, with the same new formation as the other ordinals (orig.? Meyer-Lübke, Frz. Gram. 2.177); the latter by *tercero*, like OFr. *tercier*, fr. Lat. *tertiārius* (cf. Sp. *primero*, Fr. *premier* fr. Lat. *prīmārius*).

Rum. *al treilea*, fem. *a treia*, formed fr. the cardinal with preceding article and nom.-acc. sg. of the postpositive article. Tiktin, Rum. Elementarbuch 97.

3. Ir. *tris(s), tres*, fr. **tristo-* or **tristi-*, in form like Lat. *testis* 'witness' fr. **terstis*, **tristis*. Walde-P. 1.753. Pedersen 2.135. Thurneysen, Gram. 249 f.

NIr. *triomhadh*, formed after Ir. *cethramad* 'fourth', etc., with suffix *-meto-* starting in the ordinals for 7, 9, 10. Similarly, Br. *trivet* with suffix *-eto-* after *pemp(v)et* 'fifth', etc. Pedersen 2.135.

13.43. 'A third' (fraction) is often expressed by a cpd. or phrase containing the ordinal for 'third' and the word for 'part'. Such terms are so transparent, taken in connection with 13.23 and 13.42, as to require no further comment.

Or the ordinal is used alone, either in a form agreeing with the word for part understood (as Lat. *tertia* beside *tertia pars*) or in the neuter (or later indeclinable) form. Among such forms, Fr. *tiers*, Sp. *tercio* are now specialized to the fractional sense since their replacement as ordinals by *troisième, tercero* (13.42); and Skt. *tṛ́tīya-* neut. is distinguished by the accent from the ordinal *tṛtī́ya-*.

There are also some derivs. formed with various suffixes from the ordinal or cardinal, as follows:

1. Lat. *triēns, -ntis* 'a third' in general, but esp. 'a third of an *as*', a participial deriv. like *quadrāns, sextāns*, etc. Thurneysen, IF 39.201.

2. Rum. *treime* 'trinity' and 'a third', deriv. of the cardinal with suffix *-ime* fr. Lat. *-īmen*. Meyer-Lübke, Rom. Gram. 2.486.

3. Ir. *trīan*, NIr. *trian*, W. *traean*, derivs. of the cardinal. Thurneysen, Gram. 250.

4. ON *þriðjungr*, deriv. of the ordinal with suffix *-ungr*.

OE *þrimen* (rare), OFris. *thrimin*, deriv. of the cardinal.

5. SCr. *trećina*, Boh. *třetina*, formed fr. the ordinal with suffix *-ina*, like ChSl. *desętina* 'tithe'.

6. Av. *θrišva-*, like *čaθrušva-* 'a fourth', *haptahva-* 'a seventh', formed fr. the cardinals (*paṇtahva-* 'a fifth' fr. an ordinal?) with suffix *-sva-*, IE **swo-*, and perh. : Grk. θρῖον 'fig-leaf' (*θρί-σϝον). Barth. 812. Brugmann, Grd. 2.1.200.

13.44. For 'three times' there was an IE simple adv., reflected by forms in several of the IE languages. But, just as NE *thrice* is now obsolete in common speech and replaced by *three times* (in contrast to the living *twice*), such forms were sooner or later replaced by phrases with the numeral and words for 'time', 'turn', 'going, course', 'stroke', etc.

Forms of the cardinal meaning properly 'for a third time' also came to be used for 'three times'.

1. IE **tris*, that is, **tri-s* with the stem of the cardinal and adv. *-s*, analogous to **dwi-s* 'twice'. Walde-P. 1.753.

Grk. τρίς; Lat. *ter* (fr. **tris*); Skt. *tris*, Av. *θriš*; with added suffix Av. *θrižvaṭ*; with added suffix and influenced by forms of the cardinal (cf. Loewe, KZ 47.98 ff.) ON *þrysvar*, (ODan. *thryssæ, trysse*, OSw. *þryswar, þriswa*), OE *þriwa* (*þrywa, þreowe*, etc.), OS *thriwo, thrio*, OHG *driror* (rare).

2. Grk., besides usual τρίς (above, 1), also (rarely) τριάκις, and regularly, from 'four times' on, τετράκις, πεντάκις, etc., Lac. τετράκιν, ἑπτάκιν, etc., with adv. -κις (-κιν).

Grk. τρίτον 'for a third time' was used in late times also for 'three times'. Dieterich, Untersuch. 188 f. Jannaris, Hist. Grk. Gram. § 652.

Hellenistic τρεῖς καιρούς (e.g. LXX, Ex. 34.23), phrase with καιρός 'time'.

Byz., NG τρεῖς φοράς (φορές), phrase with φορά 'rapid motion, rush'. Cf. Grk. πίνειν κατὰ φοράν (Hippocr.) 'drink at a gulp'.

NG dial. also τρεῖς βολές, with βολή 'blow, stroke'.

3. Lat. *ter* (above, 1), and likewise *quater* 'four times', fr. **quatrus* : Av. *čaθruš* 'four times'. But from 'five times' on, *quīnquiēns*, etc., like *quotiēns* : Skt. *kiyat* 'how much', with suffix *-yent-, -yṇt-*.

Umbr. *trio-per*, nom.-acc. pl. neut. of the cardinal with postpositive *-per*, as in Lat. *sem-per* 'once' (less prob. : Skt. *-kṛt* in *sa-kṛt* 'once', etc., below, 8), and, by analogy of such a form, Osc. *petiro-pert* 'quater' fr. **petriā-pert*.

In late Latin *tertium* and *tertiō* 'for a third time' are also used for 'three times' (like τρίτον in late Grk.). Cf. Schulze, Graeca Latina. 13 ff.

Late Lat. *tribus vicibus* (e.g. Palladius) with abl. pl. of *vicis* 'change, turn', hence Fr. *trois fois*, Sp. *tres veces*.

It. *tre volte*, with *volta* 'turn', deriv. of Lat. *volvere* 'turn around'.

Rum. *de treĭ orĭ*, with *oara* fr. Lat. *hōra* 'hour, time'. Cf. Alb. *herë* (e.g. *tricherë* 'three times'), OIt. (and dial.) *ora*, OFr. *heure* in similar phrases. But 'once' is *odată*, fr. *o* fem. of *un* 'one' and Lat. *data* 'given'. Tiktin 507 f.

For other words formerly used in such phrases, as Fr. *voie, coup, bout*, etc., cf. Meyer-Lübke, Rom. Gram. 3.65. Tobler, Verm. Beitr. 183 ff.

4. Ir. *fo thrī*, NIr. *fā thrī*, phrase with prep. *fo* 'under, by' and the cardinal. Thurneysen, Gram. 250.

NIr. *trī h-uaire* : *uair* 'hour, time' (fr. Lat. *hōra*).

W. *teirgwaith*, Br. *teir gwech*, with W. *gwaith* 'act, turn', Br. *gwech* : Ir. *fecht* 'journey' (cf. also *ōen-fecht* 'once'), Lat. *vehere* 'carry', etc. Cf. Dan. *tre gange*, etc. Walde-P. 1.250. Pedersen 1.123 f.

5. Goth. *þrim sinþam*, ON *þrim sinnum* (also pleonastic *þrysvar-sinnum*), OE *þrim sīðum*, ME *thre sithes*, phrase with dat. pl. of words for 'going, journey', OE *sīþ*, etc. : Goth. *gasinþa* 'fellow-traveler', ON *sinna*, OHG *sinnan* 'travel'. Walde-P. 2.496. NED s.v. *sithe* sb.

Dan. *tre gange*, Sw. *tre gånger*, with Dan. *gang*, Sw. *gång* 'going, course'.

ME *thre tiden* or *thre times*, with *tide* or *time* 'time' (14.11), NE *three times*.

ME *þrīes, thryes*, etc., NE *thrice*, MHG *drīes, drīs*, formed fr. the cardinal with adv. *-s*, after the analogy of ME *ānes, ōnes*, MHG *eines* 'once'.

OHG *thrīa stunta, drīostunt*, MHG *drīestunt*, with forms of *stunta, stunt* 'point of time' (NHG *stunde* 'hour').

OHG *ze drin mālen*, MHG *drīmal*, NHG *dreimal*, Du. *driemaal*, with *māl* 'point of time' : Goth. *mēl* 'time' (14.11).

For the above Gmc. expressions, and others less common, cf. R. Loewe, KZ 47.95 ff.

6. Lith. *tris kartus*, Lett. *trīskārt*, ChSl. *tri kraty*, SCr. *trikrat* (obs.), Boh. *třikrat*, Pol. *trzykroć*, Skt. *trikṛtvas* (cf. below, 8), with a word meaning orig. 'blow', fr. the root of Lith. *kertu, kirsti*, Russ.-ChSl. *črĭtu, črěsti*, Skt. *kṛt-* 'cut'. Walde-P. 2.577 ff. Berneker 576.

Lith. also *tris sykius*, with *sykis* orig. 'blow', prob. : ChSl. *seką, sešti*, Lat. *secāre* 'cut'. Walde-P. 2.475.

Lett. *trīsreiz* (cf. OPruss. *ainan reisan* 'once'; Lith. dial. *tris reizus*, cf. Kurschat s.v. *reizas*), with a loanword fr. MLG *reise* 'journey', which was also used in such phrases. Mühl.-Endz. 3.507. Endzelin, BB 27.179.

7. ChSl. *tri kraty* (so reg. in Gospels), etc., above, 6.

ChSl. *triš(ĭ)dy, trišdi* (Supr.), Russ. *triždy*, with forms belonging to ChSl. *chodŭ* 'going, course' (cf. *šĭdŭ* pret. pple. of *iti* 'go') : Grk. ὁδός 'way', etc.

SCr. *tri puta*, with *put* 'road, way, journey' : ChSl. *pątĭ* 'road, way'.

Pol. *trzy razy*, Russ. *tri raza*, with *raz* 'blow, stroke'.

8. Skt. (besides *tris*, above, 1) *triṣ kṛtvas* and *tri-kṛtvas*, a combination of either the adv. (and so pleonastic, like ON *þrysvar-sinnum*) or the stem of the cardinal with *kṛtvas* (cf. *sakṛt* 'once' and *bhūri kṛtvas* 'many times' already in RV) : Lith. *tris kartus*, ChSl. *tri kraty*, above, 6. Wackernagel, Altind. Gram. 3.425 f.

Skt. also later *tri-vāram*, cpd. with *vāra-* 'appointed time, turn'. Wackernagel, op. cit. 3.427.

Av. (besides *θriš, θrišvaṭ*, above, 1) *θri-sarəm*, cpd. with second part prob. : *sar-* 'unite'. Barth. 810. Wackernagel, op. cit. 3.427.

Av. *ā-θritīm*, cpd. of the ordinal and so properly 'for a third time', but used mostly as 'three times'. Cf. Grk. τρίτον and late Lat. *tertium* so used. Barth. 324.

13.45. Adjectives co-ordinate with the advs. for 'three times', etc., and meaning 'occurring three times' occur only in NHG and in some of the Balto-Slavic languages most subject to German influence. NHG *dreimalig* was formed from *dreimal* in the 17th century, and probably by semantic borrowing the analogous Lett. *trīsreizējs* and *trīskārtējs* (Mühl.-Endz. 4.241), Boh. *třikrátný*, Pol. *trzykrotny*. But also Russ. *trojekratnyj*.

13.46. The multiplicative adjs., like Lat. *triplex*, etc., are mostly cpds. of words for 'fold' or the like. Their earliest extension from the literal sense must have been to 'consisting of three parts', as in Lat. *triplex mundus* 'the threefold world' (of sky, sea, and land). This sense shades off to that 'of three kinds', as in Lat. *triplex ratiō* 'a triple system, three kinds of reasoning', a notion for which there may be also other more distinctive terms (13.47). Or the notion of subordination of parts to a whole may be lost, so that 'a whole consisting of three parts' becomes 'three making up a whole, three in a group or series', as in Lat. *triplex mūrus* 'a triple wall' or *triplex aciēs* 'a triple line of battle'. In such use the multiplicatives approach the collectives (13.51). Again, a group of three may be felt as one taken three times, a given unit raised to the third power, as in Lat. *triplex equitī* 'triple pay for the horseman'. This proportional use, though occasionally marked off from the others by a distinctive formal type (as Att. τριπλάσιος) becomes in general the commonest use, and the only one which leads to a full series running up

into the high numerals ('a hundred fold', etc.).

In many of the modern languages this proportional sense, though included in the uses of the adjs. listed, is more commonly expressed by a substantive phrase 'three times as much', as Fr. *trois fois autant*, etc. (below, 4), Lith. *tris karts tiek*, Russ. *tri raza bol'še*, etc.

1. From IE **pel-*, **pelt-*, **plek-* in words for 'fold' or 'plait'. Walde-P. 1.55 f., 97.

Grk. τριπλόος, Att. τριπλοῦς, the usual type of multiplicative in all dialects and in all uses, most commonly proportional and so used even in Attic (beside τριπλάσιος). Precise origin of formation uncertain, but separation from the main group and connection with πλέω 'sail', πλόος 'voyage' improbable. Forms like ἁπλός, διπλός are analogical fr. forms like fem. sg. ἁπλῆ, neut. pl. ἁπλᾶ, and not independent formations corresponding to Lat. *triplus*, etc. Cf. also Locr. διπλεῖος, Cret. διπλεία.

Att. τριπλάσιος, proportional, fr. -πλατιος formed to -πλατος, like τριφάσιος to -φατος. Later τριπλασίων with comp. suffix. Ion. διπλήσιος, etc. (in Hdt., but not found in Ion. inscr.) with η fr. fem. διπλῆ(?).

Lat. *triplex* : *plicāre* 'fold', *plectere* 'plait', etc.; or, on account of Umbr. *tuplak* ('furca'?), more directly : Grk. δίπλαξ, τρίπλαξ 'twofold, threefold' (mostly in literal sense, as of a cloak in Homer).

Lat. *triplus* (cf. Umbr. *tripler* 'trinis'), proportional, and eventually replacing *triplex*. Hence OFr. *treble* (> ME, NE *treble*) and as bookwords It. *triplo*, Fr. *triple* (> NE *triple*), Sp. *triplo* or *triple*, Rum. *triplu*.

Goth. **þrifalþs* (cf. *fidurfalþs* 'fourfold', etc.), ON *þrīfaldr*, Dan. *trefold(ig)*, Sw. *trefaldig*, OE *þrīfeald*, ME *threfold*, NE *threefold*, OHG *drīfalt*, MHG *drīvalt(ec)*, NHG *dreifaltig*, Du. *drievoudig*.

2. A recurring phenomenon is the use of words for 'twofold, double' to indicate any degree of multiplication, that is, simply '-fold'. Thus NG pop. τρί-διπλος 'threefold', τετρά-διπλος 'fourfold', etc. Lat. *duplus* must have come to be used the same way in VLat., as indicated by phrases like It. *a tre doppj* 'threefold', etc. (numerous quots. in Voc. degli Accad. della Crusca 863), OFr. *a cent doubles* 'hundred fold', Sp. *al tres doble* 'threefold', etc. Cf. Meyer-Lübke, Rom. Gram. 3.65, Tobler, Verm. Beitr. 1.148 ff. The idiom, as well as the word passed into the Celtic and Gmc. languages. Ir. *cōic-dīabuil* 'fivefold' (K. Meyer, Contrib. 412), W. *tridyblyg* 'three-fold' (*dyblyg* fr. Lat. *duplicem*; Loth, Mots lat. 162), Du. *driedubbel*, Dan. *tredobbelt*, Sw. *tredubbel*, NHG *drei(ge)doppelt* (poet. or dial.), NE *three-double* (NED quots. fr. 16th, 17th cent.; said to be still in use locally in U.S.).

3. Other Grk. types besides τριπλοῦς.

Grk. δί-πτυχος, τρί-πτυχος (: πτύξ, πτυχή 'fold') mostly in lit. sense, as Hom. δίπτυχος λώπη 'robe with two folds', sometimes as '-fold' as δίπτυχον δῶρον.

Grk. τριφάσιος, see 13.47.

Grk. τριφυής or -φυιος, see 13.47.

Grk. τρισσός, τριξός, see 13.48.

4. In the Romance languages (beside forms cited above, 1 and 2) the proportional sense is commonly expressed by phrases like It. *tre volte tanto*, Fr. *trois fois autant*, formerly also It. *tre tante*, Fr. *trois tanz*, as still Sp. *tres tanto*. Meyer-Lübke, Rom. Gram. 3.65.

Rum. *întreit*, pple. of *întrei* 'make threefold', formed fr. the cardinal like *îndoi* 'to double'.

5. Ir. *trēode* (cf. sb. *trēde*, 13.49), deriv. of the cardinal with suffix *-de*

(*-odyo-*). Pokorny KZ 47.161. Thurneysen, Gram. 222, 243.

NIr. *trifhillte* (Lane, McKenna, O'Reilly; not in Dinneen), fr. *fillim* 'fold' (9.15).

But proportional sense expressed by Ir. *fo thrī* 'three times' (13.44) or NIr. *tri oiread* (*oiread* 'amount, quantity, number').

W. *triphlyg*, deriv. of *plyg* 'fold', vb. *plygu*, fr. Lat. *plica, plicāre*.

W. *tridyblyg*, above, 2.

Br. *tric'hement* in proportional sense, cpd. of *kement* 'as much', and doubtless modeled on OFr. *trois tans*, etc. (above, 4).

6. Most Gmc. words, above, 1 and 2.

ON *þrennr* sg. 'threefold', pl. coll. : Lat. *trīnī* (13.51).

NHG *dreifach* (late MHG *zwīvach*, etc.), cpd. of *fach* 'compartment, part', etc. (MHG *vach* also 'fold' of a garment, hence use in place of *-valt*), OHG *fah* 'wall' = OE *fæc* 'interval of space or time' : Grk. πήγνυμι 'fix' (cf. ἅ-παξ 'once'), etc. Walde-P. 2.3. Weigand-H. 1.487. Paul, Deutsches Wtb. 152. Kluge-G. 142.

7. Lith. *trigubas* (also *dvigubas*, OPruss. *dwigubbus*, but series not carried above 'threefold'), ChSl. *trigubŭ* (with numerals 1–4, not beyond; SCr. *dvogub, trogub*, Russ. *sugubyj* 'double', arch.) : Lett. *gubt*, ChSl. *gŭnati* 'bend'. Berneker 360, 366.

Lith. *trilinkas* (etc., with numerals 1–9) : *lenkti* 'bend'.

Lith. *trejopas* is used in proportional sense, and this is the type that runs up to the high numbers (cf. *vaisų šimteriopą* = καρπὸν ἑκατονταπλασίονα Lk. 8.8, Trowitsch NT). It is based on an adv. phrase, a case form of the coll. *treji* (13.51) with some postpositive form of *po*, hence orig. 'by threes', etc. The use in the sense of 'of three kinds' is secondary, *-opas* taking the place of older *-okas* (13.47). Leskien, Bildung d. Nom. 515, 589. Brugmann, Distrib. 52.

Lett. *trīskārtīgs*, formed fr. *trīskārt* 'three times' (13.44).

8. ChSl. *trigubŭ*, above, 7.

The proportional sense is also expressed by the instr. sg. of *-ica* derivs. of the coll. numerals (Leskien, Gram. 120), e.g. *četvericeją* = τετραπλοῦν Lk. 19.8, *sŭtoriceją* (so Zogr., etc.; *sŭtokraticeją* Mar.) = ἑκατονταπλασίονα Lk. 8.8.

ChSl. *trojinŭ*, Boh. *trojný*, Pol. *potrójny*, Russ. *trojnoj*, deriv. of the coll. adj., ChSl. *trojĭ*, etc. (13.48).

SCr. *trostruk*, cpd. of *struk* 'stalk, form, figure' (cf. *struka* used like NHG *fach*).

Boh. *trojnásobný*, Pol. *trójnasobny*, esp. in adv. *-násob, -nasób*, in proportional sense, cpd. of a word for 'folding, multiplying' (Boh. *nasoba*, not separately in Pol.; orig. *na* with reflexive pron. 'on itself').

9. Skt. *triguṇa-*, etc. (full series in proportional sense), cpd. of *guṇa-* 'thread, strand'.

Less common and only with the low numerals are cpds. with *vṛt-* 'turn', *bhuj-* 'bend', *dhātu-* 'layer', and *vayā-* 'branch' (*catur-vaya-* 'fourfold' RV).

Av. *haptaiθya-* 'of seven parts' (the earth), deriv. of *haptaθa-* 'seventh'.

Av. *vīsaitivant-* 'twenty fold', deriv. of *vīsaiti* 'twenty' with suffix *-vant-* (so *čaθwarəsaθwant-* 'forty fold', *pañčasaθwant* 'fifty fold', etc., long series in Yt. 10.116). Cf. Ved. *çatavant, sahasravant-* in similar use.

13.47. The notion 'consisting of three kinds' is included among the various uses of the multiplicative adjs. for 'threefold, triple' (13.46), and of some of the coll. adjs. (13.48). In some languages there are also more distinctive types for

this notion, though few of them are in such common use as NHG *dreierlei*.

1. Grk. (Ion.) δι-φάσιος, τρι-φάσιος, e.g. Hdt. διφασίοισι δὲ γράμμασι χρέωνται 'they [the Egyptians] use two kinds of writing', μουνομαχία τριφασία 'a duel of three kinds' (man vs. man, horse vs. horse, dog vs. dog), fr. -φατος (cf. δίφατος Hesych.), this : φαίνομαι 'appear'. So Brugmann, Grd. 2.2.71 (vs. 2.1.186, followed by Walde-P. 1.680, Boisacq 191).

τρι-(δι-)φυής and -φυιος (: φύσις 'nature'), e.g. Hdt. ἔχιδνα διφυής 'viper of double form' (woman and snake), Theophr. διφυεῖς καὶ τριφυεῖς '(date-palms) of double and triple form'. But Elean ζίφυιος is used in proportional sense = Att. διπλάσιος.

2. Late Lat. *trifārius*. Both adj. form and the sense 'of three kinds' are some three centuries later than the adv. form in *-fāriam*. The latter (prob. : *fās* and *fā-ri* 'speak') occur from Plautus on, e.g. Plaut. *edixit mihi ut dispartirem obsonium hic bifariam* 'told me to distribute the food in two parts', Liv. *castra bifariam facta, trifariam adortus castra* 'the camp in two, three sections'. Adjectives formed from these appear in the second century A.D. in the sense 'of three kinds, in three ways' and are common in late and medieval Latin, including *multi-fārius* whence NE *multifarious*. Skutsch IF 14.488 ff. Walde-H. 1.105.

3. NHG *dreierlei*, indeclin. adj. and sb., based upon MHG phrase with *lei* 'manner, condition', e.g. *nach irer ley, deiner lei, einer lei*, etc., the word being borrowed fr. OFr. *lei* (Fr. *loi*), which is often used in the same way, e.g. *a la lei de sa tere*. Kluge-G. 352. Weigand-H. 2.42. Paul, Deutsches Wtb. 319 (with strange denial of the obvious Fr. origin).

4. Lith. *trejokas*, formed on the analogy of *toks* 'talis', *koks* 'qualis', is used in 16th- and 17th-cent. writings, but is now replaced by *trejopas*, formerly only proportional (13.46). Thus in Jeremiah 15.3 Luther's *mit viererlei Plagen* was rendered by Bretkun *keturokais vargais*, where a modern version has *keturopomis slogomis*. Leskien, Bildung d. Nom. 515, 589.

Lett. *trijāds*, formed after *tāds* 'talis', *kāds* 'qualis'.

5. ChSl. *trojakŭ* (late), SCr. *trojak*, Pol. *trojaki*, Russ. *trojakij*, formed fr. the coll. adjs. *trojĭ*, etc. (13.48) after the analogy of ChSl. *takŭ* 'talis', *kakŭ* 'qualis', exactly like Lith. *trejokas* (above).

But Boh. *trojaky* has been in this sense mostly replaced by *troji* belonging to the coll. type (13.48).

6. Skt. *trividha-*, cpd. of *vidhā-* (*vi-dhā-* 'set apart') 'manner, kind', forming thus a distinctive series used mostly in sense of NHG *dreierlei*, etc.

13.48. The notion 'consisting of three together, three in a group' is included among the various uses of the multiplicative adjs. for 'threefold, triple' (13.46), e.g. Grk. τριπλαῖ ἁμαξιτοί 'the meeting of three roads', Lat. *triplex murus* 'a triple wall' = 'a set of three walls'. But in several of the IE languages there are also types with more distinctive coll. force. Thus Lat. *trīnī*, etc. were orig. coll., as in Lat. *bovēs bīnī* 'a pair of oxen', *trīnī annī* 'a period of three years', and (beside their secondary distrib. use, 13.52) are preferred to the cardinal with *pluralia tantum* or plurals that differ in sense from the singular, as Lat. *bīna castra* 'two camps', *bīnae litterae* 'two letters' (epistles) in contrast to *duae litterae* 'two letters' (of the alphabet). Hence they may become merely variant forms of the cardinals and tend to disappear. Cf. Brugmann, Die distributiven und die kollektiven Numeralia der idg. Sprachen 30 ff.

1. IE **treyo-, *troyo-*.

Lith., Lett. *treji;* ChSl. *trojĭ*, neut. sg. *troje*, the latter esp. general Slavic; Skt. *traya-*, as in Ved. *trayī vidyā* 'the triple science', the group of three holy actions. This type is represented in Greek only by δοιός 'double', esp. in pl. δοιοί 'both', mostly poetical.

2. With suffix *-no-*. Lat. *trīnī* (also in part *ternī*, though mostly distrib.); ON *þrennir* (for use cf. Sievers ap. Brugmann op. cit. 71 ff.), OE *þrinna* (prob. fr. ON), Goth. *tweihnai*. Cf. Lith. *dvynai* 'twins' (formerly dual *dvynu*), *trynučiei* 'triplets'.

3. Grk. τρισσός, Att. τριττός fr. *τρι-χιος, also τριξός (Ion., but τετραξός, πενταξός also in Aristotle), fr. *τριχθιος, formed fr. the advs. τρίχα and τριχθά 'in three parts'. In use often not distinguishable from τριπλοῦς in its various uses (which include the coll.) or in pl. from the simple cardinal. But the coll. sense seems dominant. Cf. Hdt. διξὸς λόγος 'twofold account' = 'two accounts', Aristot. Metaph. ἐπίπεδα τριττά, γραμμαὶ τετραξαί, στιγμαὶ πενταξαί 'three (four, five) classes of planes (lines, points)', and esp. the frequent use in the papyri for triplicate (etc.) copies, as πρᾶσις τρισσὴ γραφεῖσα 'triplicate bill of sale' (POxy. 1698.23), γράμματα τετρασσὰ (ὀκτασσὰ) γραφέντα 'contract in four (eight) copies' (POxy. 1638.30, 171.4), etc.

Grk. συνδύο, συντρεῖς (both Hom.), cpds. with σύν 'together'.

4. NIr. *triūrach*, deriv. of sb. *triūr* 'group of three persons' (13.52).

5. Skt. *trika-* (*dvika-*, etc.), in part coll., deriv. of the cardinal with suffix *-ka-*.

Ved. *çatin-, sahasrin-* 'in hundreds, thousands', with common suffix *-in-*, also *daçagva-, daçagvin-, çatagvin-*, for which see M. Bloomfield, AJPh. 17.42 ff.

13.49. Nouns for a 'group of three', etc., are formed either from the cardinals with a coll. suffix or from the coll. adjs. (13.48).

Such terms tend to become specialized according to the nature of the things grouped, as the general Eur. ecclesiastical 'trinity' or musical 'trio'; the political Grk. τριττύς; the mathematical *ternion, quaternion;* the It., Sp. *terno* in dice-playing, lottery, etc.; NE *quartette* in music, *quatrain* in verse, *foursome* in golf, *decade* of years; Russ. *trojka* 'three-horse team'.

It is only in such specialized uses that these words belong to popular speech. A truly generic coll. sb. may be only a rare sophisticated term or may even be lacking in some of the IE languages. We have listed those that are generic or come nearest to this in that they cover a variety of specialized uses (like Sp. *terno*). Words for the 'trinity' are omitted, except as they are also sometimes used in a wider sense or are the only ones available.

1. Grk. τριάς, gen. -άδος, etc., full series, prob. starting from forms like δεκάδ- parallel to Skt. *daçát-* 'decade'. Used for a triad, the number three, and in Christian times for the 'trinity', as in NG pop. τριάδα. Hence in its wider sense (as 'trinity' it was rendered by *trīnitās*) late Lat. *trias*, It., Fr. *triade*, NE *triad*.

Att. τριττύς, used for a sacrifice of three animals and for a division of the tribe, fr. *τρικτύς (with ττ after τριττός), like τετρακτύς, formed fr. the adverbs τρίχα, τέτραχα (or fr. *τρικο-, like Skt. *trika-* 13.48) with suffix -τυ-, as also in πεντηκοστύς 'group of 50', etc.

NG δεκαριά, εἰκοσαρια, etc. formed fr. the cardinals with suffix -αριά, Byz. -αρέα, fem. of -άρις (fr. Lat. *-ārius*, 13.53). These are coll. equivalents of the numerals, like Fr. *dizaine*, etc. or NE *dozen* (fr. Fr. *douzaine*) and *score*, e.g. καμιὰ πενηνταριά 'some fifty' = 'about fifty'. Cf. also δεκάρα 'ten-centime piece' and δεκάρι 'ten-spot' in cards.

2. In classical Latin the only numeral coll. sbs. are *decuria* and *centuria* for groups of 10 or 100. This type prob. started in a **quetur-ia* or the like (with second syllable of *quattuor* in weak grade, as in Skt. *catur-*). Another type is seen in Umbr. *puntes* 'pentads', formed like Skt. *pañk-ti-* 'group of five'.

Late Lat. *terniō* and *trīniō* 'the number three', deriv. of *ternī, trīnī* (13.48). Similarly, *quaterniō, quīniō*, etc. Hence NE *ternion, quaternion*, mostly math., but also of persons (cf. NED).

From forms of Lat. *ternī* also It., Sp. *terno* (in a variety of highly specialized uses), Fr. *terne*, NE *tern*.

Late Lat. *trīnitās*, deriv. of *trīnī* and used for 'triad', but esp. the 'trinity'. Hence, mostly in latter sense, It. *trinità*, Fr. *trinité*, NE *trinity*, etc.

Still another type derived fr. the coll. adjs. is seen in Fr. *centaine* 'group of 100' (by analogy *dizaine*, etc.), fr. VLat. *centēna*, orig. neut. pl. of *centēnī*.

It. *trio*, a musical term formed after the analogy of *duo* 'duet'. As a musical term it spread to many of the modern Eur. languages (Fr., NE *trio*, etc.) but has also developed a wider use, e.g. It. *trio sorelle*, NE *trio of cousins*, etc. (cf. NED).

Rum. *treime* (and so *cincime, optime*, etc.), formed fr. the cardinal with the abstract suffix *-ime*. Meyer-Lübke, Rom. Gram. 2.486.

3. Ir. *trēde*, neut. sg. of adj. *trēode* 'threefold' (13.46). Thurneysen, Gram. 243.

Ir. *triar*, NIr. *triūr* 'group of three persons', cpd. of the cardinal with *fer* 'man'. Thurneysen, Gram. 243 f. Otherwise Pedersen 2.51, 136 (suffix *-aro-*).

W. *tri* 'three' is also used as sb., pl. *trioedd* 'threes'.

Br. *trioz*, pl. *trioed*, the latter = W. *trioedd*.

4. ON *þrenning*, used for the 'trinity' but also in wider sense, deriv. of *þrennr* 'threefold' (13.46).

OE *þrines*, OHG *drinissa*, mostly the 'trinity', fr. the cardinal with suffix = NE *-ness*. Later OE *þrinnis* with *nn* fr. *þrinna*, ME *þrinness* (cf. NED).

MHG *drīheit*, NHG *dreiheit*, Dan. *trehed*, Sw. *trehet*, fr. the cardinal with coll. suffix.

NE *triad, trio*, above, 1, 2.

ME *thresum* (*twasum, hundredsome*, etc.), NE *threesome*, etc., now chiefly Sc., whence the familiar *foursome* in golf, cpds. with *-sum* = OE indef. pron. *sum* as used after numerals. NED s.v. *-some*.

5. Lith. *trejetas* (so *dvejetas, penketas*, etc.), deriv. of the coll. adj. *treji*. Leskien, Bildung d. Nom. 571. Cf. Lett. *trijats* 'three-leafed clover' (also generic?), adv. *trijatā* 'by threes'. Mühl.-Endz. 4.233.

6. ChSl. *trojĭca*, Boh. *trojice*, Pol. *trojca*, Russ. *troica*, but SCr. *trojstvo*, all mostly but not exclusively the 'trinity', derivs. of the coll. adj. *trojĭ*.

7. Skt. *trayam*, neut. sb. of the coll. adj. *traya-*.

Other types in *pañkti-* 'group of five', with abstract suffix *-ti-* (cf. Umbr. *puntes*, above, 2), and *daçad-* 'group of ten' (cf. Grk. δεκάς, above, 1).

13.51. 'By threes'. The coll. notion is expressed more commonly by adv.

phrases than by the adjs. (13.51). These may consist (1) of a preposition with the cardinal (or coll.), (2) of a repetition of the cardinal, (3) a combination of the two preceding ('three by three').

Several of these phrases are also used, and more originally, for the distrib. 'three apiece' (13.52). In fact, they are all commonly called "distributive phrases." It is remarkable that Brugmann, Die distributiven und die kollektiven Numeralia, while clearing up the relations of the distrib. and coll. uses of Lat. *bīnī*, etc., failed to make a similar distinction in the adv. phrases and lumped together phrases so distinct as NE *by threes, three by three*, and *three each, three apiece*. They are all distrib. in a loose sense (distributed in groups of three), but only the latter type in a technical sense. The former type 'by threes' is obviously co-ordinate with the coll. adjs. and sbs.

1. With preposition. Grk. ἀνὰ τρεῖς or κατὰ τρεῖς; It. *a tre*, Fr. *à trois*, etc. (but more commonly with repetition, below, 3); Goth. *bi twans* 'by twos' (1 Cor. 14.27; but Mk. 6.7, Lk. 10.1 *twans hwanzuh*, as if distrib.), ME *by thres*, NE *by threes, in threes*, NHG *zu (je) dreien*, Du. *bij drieën;* Lith. *po tris*, Lett. *pa trim;* ChSl. *po trŭmŭ*, SCr. *po tri*, Boh. *po třech*, Pol. *po trzech, w trzech*, Russ. *po tri*.

2. Repetition, with or without 'and'. Grk. μία μία 'one by one' (Soph.), but common only in late times, e.g. in NT δύο δύο Mk. 6.7 (= ἀνὰ δύο Lk. 10.1, κατὰ δύο 1 Cor. 14.27), τρία τρία POxy. 121, NG τρεῖς τρεῖς; late Lat. *duo et duo*, also *duo duo* (cf. Arch. f. lat. Lex. 2.323); Br. *tri ha tri;* OE *þrīm and þrīm* (so Aelfric, Gram. for Lat. *ternī*), NE *three and three*, NHG *drei und drei*, ON *þrīr ok þrīr*, Dan. *tre og tre*, Sw. *tre och tre*, Du. *drie en drie* (obs.); Skt. *dvā́-dvā* (Ved.).

3. Preposition and repetition. Late Grk. ἀνὰ δύο δύο (Ev. Petr. 35); It. *tre a tre*, Fr. *trois à trois*, Sp. *tres a tres*, Rum. *trei cîte trei* or *cîte trei trei;* NIr. *'na dtriūr is 'na dtriūr* (with *triūr* 'trio' 13.52); NE *three by three*, Du. *drie aan drie*.

4. Miscellaneous. Ir. *trēdaib*, dat. pl. of the coll. sb. *trēde* (13.49).

W. *bob yn dri*, or simply *bob dri*, with *pob* 'every', also and orig. distrib. (13.52). Morris Jones 260.

OHG *io drī*, NHG *je drei*, orig. and still mainly distrib., cf. 13.52.

Skt. *triças* (so *ekaças* 'one by one', *çataças* 'by hundreds', etc.), with adv. suffix *-ças* : Grk. -κας in ἀνδρακάς 'man by man'.

13.52. Three each, three apiece. In general, the distrib. notion is not expressed by any distinctive deriv. of the numeral itself, but independently in the context.

1. Numeral with words for 'each one, every one'. Thus in Grk. with forms of ἕκαστος according to construction, and esp. καθ' ἕκαστον or καθ' ἕνα. Similarly in the Romance languages except Rum. (Fr. *chacun*, etc.), Celtic (Ir. *cach*, W. *pob*, etc.), and most of the Gmc. (OE *ǣlc*, NE *each*, Dan. *hver*, etc.). And even where other expressions are usual (as listed) this form is always a possible alternative, e.g. NHG *jedem gab er drei* beside *ihnen gab er je drei*.

NE *apiece* is virtually the same thing, orig. *a pece* 'a piece'; likewise NIr. *an ceann* 'the head' (cf. McKenna p. 371, col. 1, bottom).

2. In a sentence like NE *the pails held ten quarts each*, the *ten quarts* might be felt as coll. (cf. *ten-quart pail, gallon jug, bushel basket*) and so expressed. This is conspicuously the case in Latin, where the orig. colls. *bīnī*, etc. (13.48), were regularly so used (with usual but not complete differentiation of *ternī* and *trīnī*) and thus came to be called 'distributives'. [In Umbrian the multiplicatives like Lat. *duplus, triplus* are used with a following distrib. phrase, as *numer tupler* (*tripler*) *pusti kastruva* 'nummis binis (ternis) in singulos fundos'.] Similarly, ON *tvennir, þrennir* are used in distrib. phrases but usually in connection with a form of *hverr* 'each, every one' (cf. Sievers ap. Brugmann, Distrib. 71). So Goth. *tweihnōs paidōs haban* = ἀνὰ δύο χιτῶνας 'have two coats apiece' Lk. 9.3.

3. Many of the adv. phrases that have been listed under the coll. 'by threes' are also used in distrib. sense, and in some the latter is probably the more original. Thus OHG *io drī* (*io siben* quotable), MHG *ie drī*, NHG *je drei*, with *io, je* 'always, in each case'. Lith. *po tris*, etc., general Balto-Slavic, with the same distrib. use of *po* as in Lith. *ten raste kožnas po lovą* 'there you will find each a bed, a bed apiece' (Leskien, Lit. Lesebuch, p. 4), or ChSl. *po* often = Grk. κατά.

Byz., NG ἀπὸ τρεῖς, quotable from 7th. century, is unequivocally distrib. (not coll.), e.g. τοὺς ἔδωσα ἀπὸ τρία μῆλα 'I gave them three apples apiece'.

4. Skt. *trayas prati-* (quotable?) with distrib. use of *prati* as in *pratyekam* 'one by one', *yajñam prati* 'at each sacrifice', etc.

13.53. Miscellaneous. Various types of numeral derivs. are used with specialized application, e.g. to the sequence of days or years.

Grk. τριταῖος 'on the third day', and so a whole series, πεμπταῖος (Hom.), ἑκταῖος, δεκαταῖος, etc., derivs. of the ordinal with suffix -αῖος.

Grk. τριτεύς 'third part of a μέδιμνος', and so also as a measure τεταρτεύς and ἑκτεύς (but δυωδεκατεύς 'twelfth month').

Grk. τριτεῖα, τά 'third place, third prize', and so δευτερεῖα, πρωτεῖα.

Grk. τρεῖος, τετρῷος 'three (four) on the dice' (μοῦνος 'ace' Ion. form of μόνος 'alone').

Lat. with suffix *-ārius;* fr. the cardinal, *triāriī* 'soldiers in the third rank'; fr. the ordinal, *tertiārius* 'of the third part', hence NE *tertiary* in geology, mathematics, etc.; fr. the coll., *ternārius* 'consisting of sets of three', hence NE *ternary* (*binary*, etc.) in mathematics and other sciences; the same formation with different specialization, late *octōgenārius, nōnāgenārius* 'eighty (ninety) years old', hence NE *octogenarian, nonagenarian* (both also *-ary*); with suffix *-ānus* fr. ordinal, *tertiānī* 'soldiers of the third legion' and *tertiānae febrēs* 'tertian fever', whence NE *tertian*.

Lat. *triēns* 'third part' mostly as a measure, and similarly *quadrāns, sextāns, dōdrāns*, participial formations. Thurneysen, IF 39.201.

For years of age (aside, of course, from cpds. with words for year), cf. (beside Lat. *octōgenārius*, above) Ir. *nōichtech* 'ninety years old' (Pedersen 2.130, 136); Lith. *treigys* 'three years old' (so *dveigys, ketvergis, penkergis*, etc.; Leskien, Bildung d. Nom. 524); Skt. *ṣāṣṭika-, sāptatika* 'sixty (seventy) years old', with the same suffix as the multiplicative *trika-*, etc., but with vṛddhi in the forms of the cardinal (Wackernagel, Altind. Gram. 3.421).

[1] Words for several of the notions classified under "Spatial Relations" or "Quantity and Number", like 'long', 'short', 'first', 'last', are applied equally to time, or in some cases specialized in this direction, e.g. Lett. *ilgs* 'long' only of time, NE *brief* 'short' mostly of time.

Some of the words for 'time' are from roots for 'stretch' or 'measure', with established temporal, rather than spatial, application. Others are of diverse and partly obscure orig.

Besides the most generic terms, there are others which are used mostly for a point or period of time (not time in its duration). These may become more generic (as Grk. καιρός) but, more frequently, are further specialized (e.g. to 'year', 'day', or esp. 'hour') or restricted to certain phrases (e.g. NE *while*).

1. Grk. χρόνος, etym. dub. Possibly, with analysis χρ-όνο-ς (cf. θρ-όνο-ς) and as orig. 'the comprehensive', fr. the root seen in Skt. *hṛ-* 'bring', Osc. *heriiad* 'capiat', etc. Boisacq 1071 f.

Grk. καιρός 'fitness, opportunity' and esp. 'fitting time, season', used of special times, not duration of time, but in NG the pop. word for 'time' (χρόνος pop. 'year'), root connection dub., perh. best as orig. 'section of time' fr. *καρ-ιός : κείρω 'cut off, shear', etc. Walde-P. 1.419, 2.584. Boisacq 538 ftn. Walde-H. 1.206.

Grk. ὥρα 'period of time', in Hom. esp. 'time of year, season' or 'fitting time', later esp. 'time of day, hour', but wider use continued in part (so even NG κάμποση ὥρα 'considerable time, quite a while') : Av. *yarə*, Goth. *jēr*, etc. 'year' (14.73), Slavic *jaro* 'spring' (14.75), all prob. fr. **yē-, yō-* beside **yā-* (cf. Skt. *yā-* 'go', Lith. *joti* 'ride', etc.), extensions of *ei-, i-* 'go'. Walde-P. 1.105. Boisacq 1083.

2. Lat. *tempus* (> Romance words), etym. much disputed, but prob. as 'stretch of time' : Lith. *tempti* 'stretch', etc., fr. **tem-p-*, beside **ten-d-* in Lat. *tendere* 'stretch', extension of **ten-* in Skt. *tan-*, Grk. τείνω 'stretch' (cf. Ir. *tan*, below, 3). Walde-P. 1.721. Ernout-M. 1025 f. (without etym.).

Rum. *vreme* (mostly replaced now in lit. language by *timp*), fr. Slavic (cf. below, 6). Tiktin 1780 f.

3. Ir. *aimser*, etc., general Celtic, deriv. of simple form in Ir. *amm* 'time, occasion, point of time', NIr. *am* (general term now; *aimsir* esp. 'weather', cf. McKenna), etym.? Pedersen 1.80.

Ir. *tan*, rare in later period in lit. sense, mostly used as conjunction *in tan, in tain* 'when' : Skt. *tan-*, Grk. τείνω, Lat. *tendere* 'stretch'. Walde-P. 1.723. Stokes 128. Otherwise Pedersen 2.14.

Ir. *trāth* 'time, period', esp. 'canonical hour' = W. *trawd* 'course, journey', prob. : Skt. *tṛ-* 'pass', Lat. *trāns* 'across', etc. Pedersen 1.52.

W. *pryd*, Br. *pred*, OCorn. *prit* (gl. *hora*) : Skt. *sa-kṛt* 'once', *tri-kṛtvas* 'thrice', Lith. *kartas*, ChSl. *kratŭ* in numeral advs. (13.44). Pedersen 1.43. Henry 227.

4. Goth. *þeihs* : OE *þing-gemearc* 'measured time', ON, OE *þing* 'judicial assembly', prob. fr. IE **ten-k-*, extension of **ten-* 'stretch'. Walde-P. 1.724. Falk-Torp 1263. Feist 494.

Goth. *mēl* (usually χρόνος, once ὥρα) : ON *māl*, OE *mǣl*, OHG *māl* 'fixed time, mealtime, etc.', fr. the root in ON *mǣla*, Lat. *mētīrī*, Skt. *mā-*, etc. 'measure'. Walde-P. 2.237. Falk-Torp 685. Feist 353.

Goth. *hweila*, mostly 'period of time, hour' (renders both χρόνος and καιρός, but chiefly ὥρα), OE *hwīl*, OHG *(h)wīla*, etc. = ON *hvīla* 'resting place, bed' : Skt. *cira-* 'delay', adj. 'long (of time)', Lat. *quiēs* 'rest', ChSl. *po-čiti* 'to rest', etc. Walde-P. 1.510. Falk-Torp 440. Feist 284. NED s.v. *while*, sb.

ON *tīð*, OE *tīd*, OHG *zīt*, etc., general Gmc. except Goth. (NE *tide*), fr. Gmc. **tī-d-*, beside **tī-m-* in ON *tīmi* (often 'period of time, appointed time', mod. Scand. 'hour'), OE *tīma*, ME, NE *time* (NHG dial. *zīme* 'opportunity, time'), prob. as 'period of time' : Grk. δαίομαι, Skt. *day-, dā-* 'divide, share' (cf. fr. the same root Arm. *ti* 'age, year, time'). Walde-P. 1.764. Falk-Torp 1256. Kluge-G. 706.

ON, OE *stund*, ME *stounde*, OHG *stunta*, MHG *stunde*, mostly 'period of time' (whence 'hour' in NHG), as orig. 'fixed time' : Goth. *standan*, etc. 'stand'. Walde-P. 2.603. Falk-Torp 1190 f.

5. Lith. *laikas*, Lett. *laiks* : Lith. *palaikis* 'remainder', *laikyti* 'hold, keep (over)', *likti* 'remain', Grk. λείπω 'leave', etc. (12.16–18), semantic development through 'time left over'(?). Walde-P. 2.397. Mühl.-Endz. 2.407.

Lith. *metas* 'time' but mostly pl. *metai* 'year', see 14.73.

Lith. *čėsas* (fr. Pol. *czas*, below, 6), formerly the usual word (so in versions of the NT, in Kurschat, etc.) but now rejected in favor of the native *laikas*.

6. ChSl. *vrěmę*, SCr. *vrijeme*, OPol. *wrzemię*, Russ. *vremja*, Slavic **vermen-* perh. fr. **vert-men-*, fr. the root in ChSl. *vratiti*, Lat. *vertere*, etc., 'turn'; for form cf. Skt. *vartman-* 'course'. Semantic development from the notion of time as a '(turning) cycle' of seasons, etc. Cf. Lat. *annus* (*mēnsis*) *vertēns* 'the course of a year (month)'. Pokrowsky, Symbol. Gram. Rozwadowski 1.225. Brückner 634.

ChSl. *časŭ*, Boh. *čas*, Pol. *czas* (Russ. *čas* 'hour') : OPruss. *kisman* 'time', Alb. *kóhë* 'time, weather', perh. (as 'observation, calculation'?) fr. the root of ChSl. *čajati* 'expect, wait, hope', Skt. *cāy-* 'perceive'. Walde-P. 1.508. Berneker 137. Brückner 73.

ChSl. *godŭ*, in Gospels for ὥρα as a 'period of time' (hence Russ. *god* 'year' and derivs. for 'hour', 14.51) : ChSl. *u-goditi* 'be pleasing', OHG *gigat* 'fitting', etc. Walde-P. 1.531 f. Berneker 316 ff.

SCr., Boh., Pol. *doba*, used for 'time' in special senses or phrases, orig. 'fitting time' : ChSl. *po-doba jestŭ* is fitting', *u-dobĭ* 'easily', *po-dobĭnŭ* 'similar', Goth. *ga-daban* 'be suitable', etc. Walde-P. 1.824 f. Berneker 203 f.

7. Skt. *kāla-*, etym. dub. Uhlenbeck 52. Wüst, Z. Ind. Iran. 5.164 ff. (: *kălaya-* 'drive', as orig. 'morning' = 'time for driving cattle to pasture').

Av. *zrvan-*, cf. MPers. *zarman* 'age, time', prob. : Av. *zaurvan-* 'old age, weakness of age', Skt. *jarant-* 'old, frail', Grk. γέρων 'old man', etc. Walde-P. 1.599.

'Age' is understood here primarily as 'period of existence, time of life' (*how old?*). Many of the words are also used for a (long) period of time in general, esp. 'eternity' or 'lifetime', this being the more orig. sense in some groups. Others reflect the notion of 'oldness' ('old age' > any 'age'; cf. 'greatness' > 'size', 12.52),

'strength, vigor' (through 'prime of life'), or 'grown stature' (due to the double use of Grk. ἡλικία).

1. Grk. ἡλικία 'age' and secondarily 'bodily growth, stature', fr. ἧλιξ 'of the same age, comrade', Dor. ἇλιξ, fr. **swā-lik-*, formed fr. the refl. stem in Grk. ὅς, Cret. ϝός, Skt. *sva-*, etc. For the *ā*-stem and suffix, cf. ἡλίκος, τηλίκος, Lat. *quālis, tālis*. Boisacq 320 f. Brugmann, Grd. 2.1.382. Walde-P. 2.455.

2. Lat. *aetās, -tātis* (> It. *età*, OFr. *aé*, Sp. *edad*, lit. loanword Rum. *etate;* VLat. **aetāticum* > Fr. *âge*), early Lat. *aevitās*, fr. *aevum* 'eternity, lifetime, age (in wide sense), generation' : Grk. αἰών with similar uses (cf. also αἰϝεί, Att. ἀεί 'always'), Goth. *aiws* 'αἰών', Skt. *āyu-* 'life, lifetime, living being', Av. *āyu-* 'duration, age', etc. Walde-P. 1.6 f. Ernout-M. 21. REW 251.

Rum. *vîrstă*, fr. Slavic, cf. ChSl. *vrŭsta*, etc. (below, 6). Tiktin 1754.

3. Ir. *āis*, NIr. *aois*, W. *oes*, and W. *oed*, cpd. *oedran*, Br. *oad*, etym. dub. Pedersen 1.56, 176 : Lat. *aetās*, etc. Adversely, Thurneysen, Idg. Anz. 6.196, Walde-P. 1.7, Walde-H. 1.21.

4. Goth. *alds* (renders αἰών, γενεά, βίος; *wahstus* 'growth' renders ἡλικία, but in the sense 'stature'), ON *ǫld* ('age' in wider sense), *aldr*, Dan. *alder*, Sw. *ålder*, OE *ealdor* (mostly 'life'), *ield, yld*, ME *elde*, OHG *altar*, MHG, NHG *alter*, Du. *ouderdom* (like NHG *altertum* in form but used of a person's age), all fr. the Gmc. adj. for 'old' (14.15).

ME, NE *age*, fr. Fr. *âge* (above, 2).

Du. *leeftijd* ('time of life', not 'lifetime'), cpd. of *leven* 'live' and *tijd* 'time'.

5. Lith. *amžius* : *amžiauti* 'last forever', *amžinas* 'eternal', etym.?

Lett. *vecums*, fr. *vecs* 'old' (14.15).

6. ChSl. *vŭzdrastŭ*, (cf. *vŭzdrastŭ imatŭ*, lit. 'has his growth' = 'is of age', ἡλικίαν ἔχει Jn. 9.21, 23), fr. *vŭzdrasti* 'grow up' (cpd. of *rasti* 'grow'). So Russ. *vozrast*, usual word for a person's age.

ChSl. *vrŭsta* (Supr. freq. for ἡλικία; SCr. *vrsta* 'sort, class', Pol. *warsta* 'layer'), beside *vrŭstĭ* 'situation, condition', Bulg. *vrŭstĭ* 'age and stature', fr. the root of ChSl. *vrŭtěti* 'turn', Lat. *vertere*, etc. Cf. fr. the same root Skt. *vṛtta-m* 'occurrence, behavior, appearance'. Walde-P. 1.275. Brückner 603.

SCr. *dob* : *doba* 'period of time, season' (see 14.11).

Boh. *věk*, Pol. *wiek*, SCr. *vijek*, also 'age' as 'period of time', 'lifetime', as ChSl. *věkŭ* (renders αἰών), Russ. *vek*, all : Lith. *viekas* 'strength, life', *vykis* 'life', fr. the root in Lith. *veikti* 'make, work', Goth. *weihan* 'fight', Lat. *vincere* 'conquer' (semantic development 'strength', 'life' to 'lifetime, age'). Walde-P. 1.233. Brückner 615.

7. Skt. *vayas-*, also 'vigor, strength, prime of life' : Grk. ἶς, Lat. *vīs* 'strength', etc. Walde-P. 1.230. Uhlenbeck 272.

Av. *āyu-* 'duration, age', cf. Lat. *aetās* (above, 2).

14.13 NEW

Grk.	καινός, νέος	Goth.	*niujis*	Lith.	*naujas*
NG	καινούργιος	ON	*nȳr*	Lett.	*jauns*
Lat.	*novus*	Dan.	*ny*	ChSl.	*novŭ*
It.	*nuovo*	Sw.	*ny*	SCr.	*nov*
Fr.	*neuf, nouveau*	OE	*nīwe*	Boh.	*nový*
Sp.	*nuevo*	ME	*newe*	Pol.	*nowy*
Rum.	*nou*	NE	*new*	Russ.	*novyj*
Ir.	*nūe, nūide*	Du.	*nieuw*	Skt.	*nava-, navya-*
NIr.	*nua, nuadh*	OHG	*niuwi*	Av.	*nava-*
W.	*newydd*	MHG	*niu(we)*		
Br.	*nevez*	NHG	*neu*		

With but few exceptions the words for 'new' and those for 'young' (14.14) belong to inherited groups pointing to IE words for 'new' and 'young' respectively. But the Grk. word of the 'new' group was used chiefly, from the earliest times, for 'young', and the Lett. 'young' word serves also for 'new'. Furthermore, 'young', though primarily used of living things, is freq. applied by analogy to such objects as moon, month, and other periods of time, wine, etc. So NE *young* (NED s.v. 5), and similarly in other languages.

1. IE **newo-* (a), **newyo-* (b). Walde-P. 2.324. Ernout-M. 681.

a) Grk. νέος (chiefly 'young', but also in part 'new'; NG 'new' only in phrases like τί νέα; 'what news?'); Lat. *novus* (hence the Romance words; dim. Lat. *novellus* > Fr. *nouveau*); ChSl. *novŭ*, etc., general Slavic; Skt., Av. *nava-*; Toch. A *ñu* (SSS 47); b) Ir. *nūe* (older *nōe, nāue*), W. *newydd*, Br. *nevez*, and with *d*-suffix Ir. *nūide*, NIr. *nuadh*; Goth. *niujis*, etc., general Gmc.; Lith. *naujas;* Skt. *navya-*.

2. Grk. καινός : Skt. *kanīna-* 'young', Lat. *recēns* 'fresh, recent', Ir. *cinim* 'spring from, descend', ChSl. *na-čęti* 'begin', etc. Walde-P. 1.397 f. Boisacq 391 f.

Hence, through cpd. καινουργής (: ἔργον 'work') 'newly made', καινούργιος (5th. cent. A.D.+), in NG the pop. word for 'new'.

3. Lett. *jauns* 'young' (14.14) also 'new'.

Most of the words for 'young' belong to an inherited group. The others come by extension from 'new' (Grk. νέος) or from the notion of 'tender'.

1. IE **yuwen-* (a), **yuwn̥ko-* (b), comp. **yeu-yes-* fr. simple **yeu-*. Walde-P. 1.200. Ernout-M. 509. Walde-H. 1.735 f. Falk-Torp 1334.

a) Lat. *iuvenis* (> Romance words; but Rum. *june* sb. 'young man', as adj.

due to Fr. influence); Lith. *jaunas*, Lett. *jauns*, ChSl. *junŭ* (positive not in Gospels, but *juněji* = ὁ νεώτερος, Lk. 15.12), Russ. *junyj*, Bulg., Slov. *jun;* Skt., Av. *yuvan-*, *yūn-* (Av. quotable only as sb. 'young man'); b) Ir. *ōac, ōc*, NIr. *ōg*, W. *ieuanc*, Br. *yaouank;* Goth. *juggs*, ON *ungr*, etc., general Gmc.; cf. Lat. *iuvencus, -a* 'steer, heifer', Umbr. *iuenga* 'iuvencas', Skt. *yuvaça-* 'youthful'.

2. Grk. νέος, orig. 'new' (cf. 14.13), but chiefly 'young' from Hom. to the present day.

3. Rum. *tînăr*, fr. Lat. *tener* 'delicate, tender', and also often 'of tender age' (cf. *tenerī* 'the young, boys'), but this use strengthened by the similar development in Bulg., SCr. *mlad* (below). Ernout-M. 1029. REW 8645.

4. Bulg., SCr. *mlad*, Boh. *mladý*, Pol. *młody*, Russ. *molodoj* (also OPruss. *malda-* 'young') = ChSl. *mladŭ* 'tender' (of the branch of the fig tree) : Lat. *mollis*, Skt. *mṛdu-* 'soft, tender', etc. Walde-P. 288 f. Berneker 2.70.

5. Skt. *kanīna-* : Grk. καινός 'new', etc. (14.13).

Most of the words for 'old' are used alike for 'old' vs. 'new' and 'old' vs. 'young', and this is to be understood in the following, except as otherwise noted. But a few are used wholly or chiefly in the latter sense, esp. of old persons; and this was the orig. application of many of the others, as indicated by their etym.

1. IE **sen-*. Walde-P. 2.494. Ernout-M. 922 f.

Lat. *senex* (of living things, mostly persons); Ir. *sen*, NIr. *sean*, W. *hen* (Br. *hen-* as prefix, as often Ir. *sen-* and mostly NIr. *sean-*); Goth. *sineigs*, superl. *sinista* (only of persons, 'πρεσβύτης, πρεσβύτερος'); Lith. *senas*, Skt. (Ved.) *sana-* (opp. to *nava-* and *yuvan-*), *sanaya-*, Av. *hana-* (quotable only for old persons); Arm. *hin;* cf. Grk. ἔνος 'of last year', ἔνη καὶ νέα (sc. ἡμέρα) 'the old and new day' = 'last day of the month', ON *sina* 'dry standing grass from the previous year'.

2. IE **wetus-* (**wetos-*?), prob. : Grk. ϝέτος 'year', etc. (14.73), as orig. 'full of years' or even 'one year old' (which would be 'old' vs. 'new' for wine, grains, fruits, etc.). Walde-P. 1.251. Ernout-M. 1100 (with doubt).

Lat. *vetus, vetustus*, dim. *vetulus* (> VLat. *veclus* > It. *vecchio*, Fr. *vieux*, Sp. *viejo*, Rum. *vechiu*), Lat. *veterānus* 'veteran' (> *vetrānus* > Rum. *bătrîn*); OLith. *vetušas*, Lett. *vecs;* ChSl. *vetŭchŭ* in the Gospels 'παλαιός'.

3. Derivs. of IE **ĝer-* perh. orig. 'become old, ripe, frail, etc.', vb. forms in Skt. *jarati* 'makes frail, causes to age', *jīryati* 'becomes frail, decays, grows old', ChSl. *zĭrěti* 'ripen', etc. Walde-P. 1.599 f.

Grk. γεραιός (mostly of men, 'old, revered'), γέρων (mostly sb. 'old man', pl. 'elders', but also adj. of things as shield, bronze, etc.; NG γέρων, γέροντας, γέρος sb. 'old man'), γραῦς and γραῖα 'old woman'; Skt. *jīrṇa-* (pple. of *jīryati*, above), *jarant-* (= Grk. γέρων); cf. Av. *azarəšant-* 'not growing old', *zaurura-* 'weakened by age', etc.

4. Grk. παλαιός (NG pop. παλιός, mostly of things; of persons only in derogatory sense as παλιάνθρωπος 'worthless fellow, rascal'), fr. adv. πάλαι 'of old, long ago' : τῆλε, Lesb. πήλυι 'far away', W. *pell* 'far distant', Skt. *carama-* 'the last', etc. Walde-P. 1.517.

Grk. ἀρχαῖος, lit. 'belonging to the beginning', hence 'ancient, old', fr. ἀρχή 'beginning' (14.25).

5. Fr. *ancien* (> NE *ancient*), both mostly with reference to things 'of former times', but also in Fr. and formerly in NE 'old' of persons, fr. deriv. of Lat. *ante* 'before'. REW 494. NED s.v. *ancient*.

6. NIr. *aosta*, lit. 'aged' (: *aois* 'age', 14.12), but now most general word for 'old'.

NIr. *crīonna*, properly 'wise, experienced', but commonly 'old' of persons (Munster), MIr. *crīnda* 'prudent, wise' (K. Meyer, Contrib. 518), orig.? Connection with *crīn* 'withered, shrunk, worn out, old', as sb. 'dry wood fagots'? For the latter cf. Pedersen 2.498.

Br. *koz*, Corn. *coth*, cf. Gall. *Cottos*, etym.? Henry 78.

7. Goth. *fairneis* ('παλαιός'), ON *forn* ('old' and 'of old, of former times'), OE *fyrn* 'ancient', OHG *firni*, MHG *virne* ('old' and of persons 'experienced, wise') : Goth. *af fairnin jēra* 'of the previous year', Lith. *pernai* 'in the previous year', etc., all fr. **per-* in Skt. *para-*, OE *feor* 'far, distant', Grk. πέρā 'beyond', etc. Walde-P. 2.31. Feist 140.

Goth. *alþeis* ('γέρων' and neut. pl. 'τὰ ἀρχεῖα'), OE *eald*, ME, NE *old*, Du. *oud*, OHG–NHG *alt*, all lit. 'nourished, grown' fr. the root of Goth. *alan* 'grow up', ON *ala*, Lat. *alere* 'nourish'. Walde-P. 1.86.

ON *gamall* (of persons), Dan. *gammel*, Sw. *gammal*, OE *gamol* mostly of persons (but also of sword in Beowulf), etym. dub., but prob. as orig. 'of many winters' : Lat. *hiems*, Ir. *gemred* 'winter', etc. (14.64). Walde-P. 1.547. Falk-Torp 298 f. Hellquist 269.

8. ChSl. *starŭ* (in Gospels 'πρεσβύτης, γέρων'), etc., general Slavic : Lith. *storas* 'thick, bulky', ON *stōrr* 'large, big', fr. the root **stā-* 'stand', semantic development from 'standing (firm)' to 'solid', whence 'large' and 'old'. Walde-P. 2.607.

9. Skt. *sana-*, Av. *hana-*, above, 1.

Skt. *jīrṇa-*, above, 3.

Skt. *vṛddha-* 'grown', pple. of *vṛdh-* 'grow', often used of 'old' persons.

The majority of the words for 'early' denoted primarily 'early in the day, in the morning', and a few that are used only in this more specific sense are included in the list (in parentheses). Most of the other expressions are connected with words for 'time', that is, 'in time, in good time', etc.

1. Grk. πρωΐ, mostly 'early in the day, in the morning', but also generic 'early' (but NG only 'in the morning' or sb. 'morning'; in generic sense replaced by ἐνωρίς; cf. even ἐνωρὶς τὸ πρωΐ 'early in the morning') : OHG *fruo*, MHG *vruo, vrüe*, NHG *früh*, MDu. *vroech*, Du. *vroeg* 'early', Skt. *prā-tar* 'early in the morning', fr. the adv. and prep. stem in Skt. *pra-* 'before, forward, away', Grk. πρό 'before', Lat. *prō* 'before, for', etc. Walde-P. 2.36. Weigand-H. 1.592. Franck-v. W. 763.

NG ἐνωρίς, formed fr. the phrase ἐν ὥρᾳ 'in season, in time' (cf. τώρα 'now' fr. τῇ ὥρᾳ), with -ις fr. other advs. in -ις (Koraes, Hatzidakis, Μεσ. 1.584).

2. Lat. *mātūrē* adv., *mātūrus*, adj., orig. 'taking place at the proper time, seasonable' (of fruits, etc. 'ripe, mature'), and *mātūtīnus* adj. (adv. *mātūtīnē*) 'early in the morning, pertaining to the morning' (deriv. of *Mātūta* 'Goddess of the morning'), all derivs. of a stem **mātu-*, fr. the same root as the following.

Lat. *māne*, adv. 'early in the morning' and sb. 'morning' : OLat. *mānus, mānis* 'good'. Walde-P. 2.220. Ernout-M. 588, 597 f. Walde-H. 2.25.

It. *per tempo*, Rum. *de vreme*, lit. 'through, of time', that is, 'in time'.

It. *di buon' ora*, Fr. *de bonne heure*, lit. 'of good hour'.

Sp. *temprano* : *tiempo* 'time', etc.

Rum. *de dimineaţă*, lit. 'of morning' (14.44).

3. Ir. *moch*, loanword (?) fr. MW *moch* 'early, soon' : Ir. *mos-*, Lat. *mox* 'soon', etc. (14.19). Walde-P. 2.303 f.

NIr. *go luath*, lit. 'quickly', adv. fr. adj. *luath* 'swift', but usual for 'early' (*moch* mostly 'early in the morning').

Words for 'late' rest on such notions as 'slow', 'behind, after', or 'end'.

Except for a few adj. forms marked as such, they are listed in the adv. forms.

1. Grk. ὀψέ (NG only in ἀπόψε 'this evening' and ψές 'last evening' and 'yesterday'), prob., as orig. 'afterward', based on an *ὀψ, that is *ὀπ-ς (cf. ἄψ 'backward' beside ἀπό 'away from') beside ὄπισθεν 'behind', ὀπίσω 'backward' : Lat. *obs-, ops-* in *o(p)s-tendere*, etc., beside *ob* (cf. *abs, ab*), Osc. *op* 'apud', Grk. ἐπί 'on, to', Skt. *api-* 'to, by', etc. Walde-P. 1.122 f. Among the words for 'now' there is a large inherited group connected with the IE adj. for 'new'. The others are mostly from phrases with words for 'time' or from pronominal stems with adv. endings of time.

1. IE **nŭ*, etc., related to the adj. **newo-* 'new' (14.13). Walde-P. 2.340. Ernout-M. 685. Widespread in its orig. temporal sense and also, with loss of temporal force, in numerous idiomatic uses introducing a phrase or sentence.

Grk. νῦν (in pop. NG replaced by τώρα, below 2); Lat. *nunc* (fr. **num-ce*); Goth. *nu* (*nū?*), ON, OE *nū*, OHG *nŭ*, etc., general Gmc.; Lith., Lett. *nu*, Lith. *nūnai* (all obs.); ChSl. *nyně*, Boh. *nyní* (Pol. *ninie* obs., Russ. *nyne* lit.); Skt. *nŭ, nūnam*, Av. *nū, nūrəm;* Toch. A *nŭ*, B *no* 'but' (SSS 308).

2. NG τώρα, quotable from the 12th cent., fr. τῇ ὥρᾳ, quotable from the 7th cent. in the sense of 'at this time, just now'. Hatzidakis, Glotta 3.77 ff.

3. It. *adesso* = OFr. *ades*, OSp. *adieso* 'at once', Rum. *ades* 'often', fr. a blend of Lat. *dēnsus* 'thick' and *ad pressum* in It. *appresso* 'near', Fr. *après* 'after'. REW 2558. Otherwise (fr. *ad id ipsum*) Wartburg 1.30.

It. *ora* 'hour, time' used also as adv. 'now'. Similarly, Sp. *ahora*, OSp. *agora*, fr. *hāc hōrā*. REW 4176. Hanssen, Sp. Gram. 198.

Fr. *maintenant*, pple. of *maintenir* 'hold in the hand, maintain', with development through 'at hand, handy' to 'at once, soon' (12th cent.), then 'now'. REW 5339. Gamillscheg 581.

Rum. *acum* (also *acuma* and *acu*), fr. VLat. *eccum modo* 'just now'. Puşcariu 18. Tiktin 17.

4. Ir. *indorsa, indossa, innossa*, etc., NIr. *anois*, perh. fr. **ind ōr-sa* 'this hour' : *ōr, ūar* 'hour, time' (14.51). Pedersen 1.207, O'Connell, Ir. Gram. 137. Otherwise Bergin (ap. Strachan, Stories from the Tain[2], 74) as *ind fhoss-sa* 'this staying' : *foss* 'staying, rest'.

W. *yn awr*, phrase with *awr* 'hour' (14.51).

Br. *brema*, MBr. *breman*, fr. **predman*, this fr. *pred* 'time', with *man* 'here'. Henry 43. Ernault, Dict. étym. s.v. *breman*.

5. Goth. *nu*, etc., above, 1.

MHG *ietso, iezuo, ieze*, etc., NHG *jetzt*, fr. a combination of *ie* (NHG *je*) and *zuo* (NHG *zu*). Weigand-H. 1.948. Kluge-G. 268.

6. Lith. *dabar*, etym.?

Lett. *tagad*, fr. a form of the pron. stem *to-* and *gad* : ChSl. *godŭ* 'time' (14.11), hence similar to ChSl. *tŭgda* 'then'. Mühl.-Endz. 4.122.

7. ChSl. *nyně*, above, 1.

SCr. *sada*, fr. stem of the pron. seen in ChSl. *sĭ* 'this' and *-da* as in *tada* 'then', *kada* 'when', etc. Leskien, Serbo-kroat. Gram. 405.

Boh. *ted'*, fr. pron. *to-* with adv. ending.

Pol. *teraz*, fr. pron. *to-* and *raz* 'time' in *trzy razy* 'three times', etc. (13.44).

Russ. *teper'*, fr. *to pervo* : *pervyj* 'first'. Vondrák 2.271.

8. Skt., Av. *nū*, etc., above, 1.

Words for 'soon' (in a short time) and 'immediately, at once' (without any delay) are separated in the list by a semicolon. But in some cases there is no sufficiently clear differentiation to justify this, the same word being used to cover the mild 'soon' and the emphatic 'immediately'. A positive transition from the latter to the former is seen in the history of OE *sōna*, NE *soon*.

The majority of the words for 'soon' are, or were once, simply 'quickly', advs. to adjs. for 'swift, quick'. There are generally alternative expressions, mostly not included in the list, parallel to NE *in a little while, in a short time, shortly*, e.g. Lat. *brevī tempore* or simply *brevī*, It. *poco tempo* or *poco* (*poco dopo* 'soon after'), Pol. *wkrótce* (: *krótko* 'shortly, briefly'), and formerly NHG *kürzlich* (now obs. in this sense and only 'shortly before').

Expressions for 'immediately' are too numerous to be listed in full (cf. NE *immediately, at once, directly*, the now archaic *straightway, forthwith*, etc.), and of the most diverse orig. They may come from words for 'straight', 'immediate', 'actually, exactly', 'place', with specialization to temporal sense, or from words for 'time' ('this time' or 'in time'), or again from the pronoun for 'this' with 'time' understood.

1. IE *mok̑s. Walde-P. 2.303 f., Ernout-M. 635. Pedersen 1.78.

Lat. *mox;* Ir. vbl. particle *mos-* (*mo-, mu-*), MW *moch;* Skt. *makṣū*, Av. *mošu*.

2. Grk. τάχα, ταχύ, ταχέως : ταχύς 'swift, quick'.

Grk. αὐτίκα : αὐτός in intensive sense.

Grk. εὐθέως : εὐθύς 'straight'.

NG γρήγορα, γλήγορα 'quickly' : γρήγορος 'quick' (14.21) may serve for 'soon'; or, more exactly, σὲ λίγο (lit. ἐντὸς ὀλίγου) 'in a little while'.

NG ἀμέσως : ἄμεσος 'immediate', neg. cpd. of μέσος 'middle'. Used reg. of time, like NE *immediately*.

3. Lat. *mox*, above, 1.

Lat. *statim* : *status* 'standing', hence in early use 'steadfastly', then 'immediately', like NE *on the spot* in temporal sense (NED s.v. *spot* 9), Fr. *sur le champ*. Ernout-M. 980.

It., Sp. *presto* (mostly stronger than 'soon'), fr. Lat. *praestō* 'at hand, ready' (14.29). REW 6726.

It. *subito*, fr. Lat. *subitō* 'suddenly', adv. to *subitus* 'sudden', pple. of *sub-īre* 'come upon'. REW 8366.

OFr. *tost*, Fr. *tôt*, now mostly in *bientôt* 'soon', *aussitôt* 'immediately', *plutôt* 'sooner, rather', It. *tostō* ('soon' in some phrases) fr. Lat. *tostus* 'roasted, baked', semantic development uncertain, but prob. through 'hard, firm' (attested in

It. dialects), hence somewhat as in Lat. *statim* (above) and NE *fast* in sense of 'swift' (14.21). REW 8814. Gamillscheg 851.

Fr. *tout de suite*, lit. 'all in succession', fr. *suite* 'succession, sequence', etc. fr. VLat. **sequita* : Lat. *sequī* 'follow'.

Sp. *luego* 'presently, soon, immediately', fr. Lat. *locō* 'at the right place or time', abl. of *locus* 'place'.

Sp. *pronto* 'ready' (14.29), also 'quickly, soon'.

Rum. *îndată*, cpd. of *în* 'in' and *dată* in phrases *odată* 'once', etc., fr. Lat. *data* neut. pl. of *datus* 'given'. Tiktin 507 f.

4. Ir. *mos-*, above, 1.

NIr. *go gairid*, lit. 'shortly' : *gairid* 'short'.

NIr. *lāithreach*, adv. use of *lāithreach* 'spot, site'.

NIr. also for 'immediately' *ar an mball* 'on the spot', *ar āit na mbonn* 'on the spot of the sole', etc.

W. *yn fuan* : *buan* 'swift, quick' (14.21).

W. *yn y fan*, lit. 'on the spot' : *man* 'spot, place'.

Br. *hebdale*, lit. 'without delay', fr. *hep* 'without' and *dale* 'delay'.

Br. *bremaik* ('bientôt' Ernault; 'tout de suite' Vallée p. 66) : *brema* 'now' (14.18).

Br. *kerkent*, fr. *ken, ker* 'so', and *kent* 'before'. Henry 63.

5. Goth. *sprautō* 'quickly, soon' (cf. 1 Tim. 3.14 'soon'), see 14.21.

Goth. *suns* 'immediately, at once' ('εὐθέως' Mk. 1.21, etc.), as also OE *sōna* (ME *sone*, NE *soon* with gradual weakening to 'soon'), OS, OFris. *sān*, OHG *sār* (also *sān*), MHG *sār, sā*, outside connections? Feist 460. NED s.v. *soon*.

ON *brātt* (*brāðum, brāðan*), advs. fr. *brāðr* adj. 'sudden, hasty, hot (of temper)', Dan. *brad*, Sw. *bråd* 'sudden' : OE *brǣþ* 'vapor, breath', OHG *brādam* 'steam, breath, heat', etc. Semantic development prob. through 'hot'. Cf. NE *a hot race*. Falk-Torp 96.

ON *fljōtt*, esp. comp. and superl. *fljōtara, fljōtast*, advs. : adj. *fljōtr* 'swift' (14.21).

Dan., Sw. *snart*, adv. to *snar* 'swift, quick' (14.21).

Dan. *straks*, Sw. *strax*, fr. MLG *strakes* (Du. *straks*) = MHG *strackes*, adv. gen. of *strack* 'straight'. Falk-Torp 1176.

OE (beside *sōna*, above) *hrædlīce*, adv. to *hrædlīc* beside *hræd* 'swift, quick' (14.21).

NE *immediately*, formed with adv. *-ly* fr. MLat. *immediātē*, adv. of MLat. *immediātus* : Lat. *medius* 'middle'. NED s.v.

NE *at once, directly, straightway*, all of obvious derivation, with temporal sense secondary.

Du. *weldra*, fr. MDu. *wel drāde*, with *wel* 'well' and *drāde* = MLG *drade* (MHG *drāte*, OHG *drāto*) 'quickly'. Franck-v. W. 129, 785.

Du. *spoedig*, adv. use of *spoedig* 'speedy' (14.21).

Du. *dadelijk*, fr. *daad* 'deed, act', and in earlier use 'actually'. Franck-v. W. 104.

Du. *onmiddellijk*, fr. neg. cpd. of *middel* 'middle', and so parallel to NE *immediately*.

OHG *baldō*, MHG *balde* 'impetuously, boldly' and 'quickly, immediately', NHG *bald* 'soon' : adj. MHG *bald* 'bold' and 'swift, quick', OE *beald, bald* 'daring, bold', NE *bold*, Goth. *balþei* 'boldness', etc., outside connections dub. Walde-P. 2.179. Falk-Torp 91. Weigand-H. 1.141. Kluge-G. 34.

NHG *sofort*, lit. 'so forth' (without delay).

NHG *gleich* 'alike, exactly', hence also 'immediately' (*gleich kommen*), and in this sense esp. *sogleich*.

6. Lith. *greit* : *greitas* 'swift, quick' (14.21).

Lith. *tuojau*, fr. *tuo*, old instr. sg. of *tas* 'this'; hence lit. 'with this' (moment).

Lett. *drīz* : *drīzs* 'swift, quick' (14.21).

Lett. *tūlin*, prob. through a **tū-le* (like *nū-le* beside *nū* 'now'), fr. **tū* : *tas* 'this' (cf. Lith. *tuojau*, above). Mühl.-Endz. 4.280.

7. ChSl., SCr., Russ. *skoro* : ChSl. *skorŭ* 'swift, quick' (14.21).

ChSl. *abĭje*, perh. with init. vowel lengthening fr. **obĭ je* (*obŭ* 'at' and *je* acc. sg. neut. of sem *jo-* 'this'), hence 'at this' (time), like Lith. *tuojau*, etc. Walde-P. 1.52. Berneker 23.

SCr. *odmah*, fr. *od* 'from' and *mah* 'blow, stroke', also 'time' in phrases *jedan mah* 'once', etc. Berneker 2.4.

Boh. *brzo* : *brzý* 'swift', ChSl. *brŭzo*, SCr. *brzo* 'quickly', etc. (14.21).

Boh. *hned* (also OPol. *hnet*, Pol. *wnet*), fr. *nhed, inhed*, fr. *in-* : ChSl. *inŭ-* 'one', and second part : ChSl. *-gda* in *tŭ-gda* 'then'. Gebauer 1.230, 545. Brückner 627.

Pol. *rychło* : *rychły* 'early', Boh. *rychlý* 'swift, quick' (14.21).

Pol. *zaraz*, fr. *za* 'in, on' and *raz* 'time', as in *teraz* 'now' (14.18), etc.

Russ. *totčas*, fr. *tot* 'this' and *čas* 'time, hour' (14.11).

8. Skt. *makṣū*, Av. *mošu*, above, 1.

Skt. *sadyas*, lit. 'on the same day', fr. cop. *sa-* and second part : *div-, dyu-* 'sky, day'.

There is a wealth of words denoting rapid motion (besides those listed, e.g. NE *rapid*, NHG *schleunig*) from which it is not always easy to select the most generic and usual and between which the choice is too idiomatic, according to the context, to permit any generalization. NE *swift* or the now more common *fast* may apply to rapid motion of any duration, while in *quick* (in accordance with its original sense of 'live, lively') there is a notion of 'sudden' or 'soon over'. We speak of a *fast* horse or runner in a race, a *quick* starter but not a *quick* horse. A somewhat similar feeling may distinguish NHG *schnell* and *rasch*, or it may be more a matter of local preference (for which cf. Kretschmer,

Wortgeogr. 385). And so in the other languages one could show the differentiation only by quoting phrases in great number.

The semantic sources are too diverse to summarize.

1. IE *ōku-. Walde-P. 1.172. Ernout-M. 696.

Grk. ὠκύς (poet.); Skt. *āçu-*, Av. *āsu-*; Lat. *ōcior, ōcissimus* 'swifter, swiftest'; OW *di-auc*, W. *diog*, Br. *diek* 'lazy' (lit. 'not swift').

2. Grk. ταχύς, beside τάχος 'speed', τάχα 'quickly, soon, at once', etym. dub. Boisacq 946. G. S. Lane, Language 11.191.

Grk. θοός (poet.) : θέω 'run', etc. (10.46). Boisacq 342 f.

Grk. ὀξύς 'sharp' (15.78), but also (post- Hom., Hdt., etc.) 'swift'.

Byz., NG γρήγορος, pop. γλήγορος, through 'prompt, ready' (and perh. first in adv. γρήγορα), fr. Grk. ἐγρήγορα 'am awake', perf. of ἐγείρω 'awaken'.

3. Lat. *celer* : Grk. κέλης 'courser (horse), fast sailing ship', κέλομαι 'drive on, incite', Skt. *kal-* 'drive', etc. Walde-P. 1.443 f. Ernout-M. 170. Walde-H. 1.194 f.

Lat. *vēlōx* (> It. *veloce*, Sp. *veloz*), cf. *vēles* 'light-armed infantryman', etym. dub., perh. (**weg-slo-*) fr. the root of *vegēre* 'move, excite', *vegetus* 'live, animate' (cf. the semantic development of NE *quick*, below, 5); or (**wegh-slo-*) : *vehere* 'drive, transport'?). Ernout-M. 1082.

Lat. *citus*, pple. of *ciēre* 'set in motion, excite' : Grk. κίω 'go', κῑνέω 'move'. Ernout-M. 185 f. Walde-H. 1.213 f.

Lat. *rapidus* (> It. *rapido*, Sp. *rápido*, Rum. *repede;* Fr. *rapide* > NE *rapid*), orig. 'violent, tearing away' (esp. of swift-flowing currents), fr. *rapere* 'snatch, carry off, plunder'. Ernout-M. 854. REW 7054.

It., Sp. *presto* (Fr. *prêt* 'ready'), fr. late Lat. *praestus* fr. adv. *praestō* 'at hand, ready' (14.29). REW 6726.

Fr. *vite* (adv., but until 17th cent. also adj.), OFr. *viste* : It. *visto, vispo* 'quick, brisk, smart', prob. of imitative orig. REW 9379a. Otherwise Gamillscheg 894.

Rum. *iute*, also 'violent, impetuous', fr. the Slavic, cf. ChSl. *ljutŭ* 'cruel, fierce', etc. Tiktin 862.

4. Ir. *dīan*, beside *dēne* 'swiftness', prob. : Grk. δίω 'flee', Skt. *dī-* 'fly', etc. Walde-P. 1.775.

Ir. *lūath*, NIr. *luath*, also Ir. *luam* id., beside *luas* 'speed', fr. *lu-* 'move' (10.11).

Ir. *crib* (*cribb, crip*), etym. dub. Pedersen 1.161. Walde-P. 1.472, 2.568.

Several of the vbs. for 'delay' are from those for 'slow'. But there are many other semantic sources, such as 'take time', 'grow old', 'drag out', 'be long, prolong', 'be behind', 'put off', etc.

1. Grk. μέλλω, mostly 'be destined to, be likely to, be about to', but also 'delay', perh. : Lat. promellere 'postpone' (only in promellere = litem promovere, Paul. ex. Fest.), Ir. mall 'slow'. Walde-P. 2.291. Boisacq 625.

Grk. χρονίζω, fr. χρόνος 'time' (14.11). Cf. NE take one's time.

Grk. βραδύνω, fr. βραδύς 'slow' (14.22).

2. Lat. cunctārī, prob. : Skt. çaṅk- 'be anxious, fear', etc. (only of mental hesitation), Goth. hāhan, OE hōn, hangian, etc. 'hang'. Walde-P. 1.461. Ernout-M. 242. Walde-H. 1.307.

Lat. morārī, fr. mora 'delay' : Ir. maraim 'remain', and prob. ultimately (as orig. of mental hesitation) Lat. memor 'mindful', Grk. μέριμνα 'care', Skt. smṛ- 'remember', etc. Walde-P. 2.689 f. Ernout-M. 629 f. Walde-H. 2.67. Hence demorārī in same sense, VLat. demorāre in Romance languages mostly 'remain, dwell' (Fr. demeurer, etc.), but Sp. demorarse 'delay'.

It. tardare, Fr. tarder, Sp. tardar, fr. Lat. tardāre, deriv. of tardus 'slow' (14.22). Rum. întîrzia, through VLat. *tardīvus (Rum. tîrziu 'late'). REW 8572–77. Puşcariu 887.

It. indugiare, fr. sb. indugia 'delay', fr. Lat. indūtiae 'truce', sometimes also 'cessation, delay'. REW 4388.

Rum. zăbovi, fr. Slavic, cf. SCr. se za-baviti 'delay' (e.g. NT, Lk. 1.21), lit. 'be behind' (baviti : biti, ChSl. byti 'be'). Tiktin 1785 f.

3. Ir. foregar, arfuiregar (assumed fr. the few quotable pass. forms.), pass. to fo-reg-, air-fo-reg- 'detain, delay' (trans.), cpds. of reg- 'bind'. Pedersen 2.592 f.

NIr. moillighim, fr. sb. moille 'delay' : Ir. mall 'slow' (14.22). Also phrase NIr. doghnīm moille 'I make delay'.

W. oedi, also trans. 'delay, postpone', fr. oed 'age' (14.12). Cf. Grk. χρονίζω (above, 1).

Br. dalea, fr. OFr. délaier 'delay' (cf. NE delay, below, 4). Henry 86.

4. Goth. latjan (χρονίζω Lk. 1.21), OHG lazōn, lazēn = ON letja, OE lettan 'hinder' (ME lette also rarely 'delay, tarry, wait'), derivs. of Goth. lats, OHG laz 'lazy' (4.22), OE læt 'slow, late' (14.22), etc.

Goth. sainjan (βραδύνω, 1 Tim. 3.15), ON seina : ON seinn, OE sǣne 'slow' (14.22).

ON dveljask, refl. of dvelja 'delay' (mostly trans.), OHG twellen, twālōn (sb. twāla), MHG twellen, twālen (OE dwellan 'mislead, delay, remain', NE dwell) : Goth. dwals, OE dol, OHG tol 'foolish', Ir. dall 'blind', Grk. θολός 'mud, dirt', all with a common notion of physical or mental confusion, more precise orig. use of root uncertain. Walde-P. 1.843. Falk-Torp 169.

Dan. nøle, fr. LG nölen 'be slow, delay, growl', prob. orig. 'growl, mutter' and of imitative origin. Falk-Torp 785.

Dan. tøve (also Sw. töva impers.) = MLG tōven, Du. toeven : ON tefja 'hinder, delay' (trans.), outside root connection dub. Falk-Torp 1319 f. (1237, 1240). Franck-v. W. 700.

Sw. dröja : dryg 'lengthy' (also 'large, stout', etc.), ON drjūgr 'substantial, ample', etc. Hellquist 159. Falk-Torp 161.

OE ildan, yldan = OHG altēn, eltēn 'grow old' and 'delay' (Otfr.), derivs. of OE eald, OHG alt 'old'. Holthausen 186.

ME tarie, NE tarry (now virtually obs. in spoken use, except locally in U.S. or 'remain, stay'), etym. disputed, but prob. another form of OE tergan 'vex, provoke', ME targe fr. OFr. targier, VLat. *tardicāre, deriv. of tardus 'slow'. NED s.v. tarry, vb.

NE delay, fr. ME delaye only trans. 'delay, hinder', fr. OFr. delaier 'put off, retard' (whence Fr. sb. délai 'delay'), cpd. of OFr. laier 'leave'(?). NED s.v. Gamillscheg 302. REW 2542, 4955.

Du. dralen : LG dial. drälen 'drawl, be slow', further history obscure. Franck-v. W. 130.

Du. talmen = MLG talmen 'talk stupidly, drawl, babble', ME talme 'become exhausted, faint', ON tālma 'hinder', root connection dub. Franck-v. W. 686 f. Falk-Torp 1320. Walde-P. 1.812.

Du. toeven, vertoeven : Dan. tøve, etc., above.

MHG sich sūmen (sūmen trans. 'delay'), NHG sich säumen, now simply säumen (OHG sūman in farsūman = NHG versäumen 'miss, neglect'), root connection dub. Walde-P. 2.472. Weigand-H. 2.659. Kluge-G. 501.

NHG zögern, fr. MHG zogen 'draw, go', also 'postpone, delay' : NHG ziehen 'draw', etc. (9.33). Weigand-H. 2.1335 f. Kluge-G. 714.

5. Lith. gaišti (also 'disappear, perish'), gaišuoti (gaišinti trans.) : Lat. haerēre 'stick to' also 'hesitate'. Walde-P. 1.528. Ernout-M. 443. Walde-H. 1.632.

Lith. užtrukti (so for 'delay' in NT, both Trowitsch ed. and Kurschat), cpd. of old trukti, also 'delay', beside trūkti 'break, be wanting', Lith. traukti 'draw' (9.33), etc. Leskien, Ablaut 312 f.

Lett. vilcināties, refl. of vilcināt frequent. to vilkt 'draw'. Mühl.-Endz. 4.585.

Lett. kavēties (so for 'delay' in NT), refl. of kavēt 'pass the time', etym.? Mühl.-Endz. 2.181 f.

6. ChSl. mąditi, muditi (on interchange with kŭsněti, cf. Jagić, Entstehungsgesch. 365) : mądĭnŭ, mudĭnŭ 'slow' (14.22).

ChSl. kŭsněti : kŭsĭnŭ 'slow' (14.22).

SCr. o-klijevati, perh. : Lett. klīt 'wander about', etc. Berneker 518.

Boh. prodlévati (prodliti, dliti) : ChSl. prodĭliti 'prolong', Russ. dlit', prodlit' 'prolong', etc. : ChSl. dlŭgŭ, etc. 'long' (12.57). Berneker 252 f.

Boh. meškati, Russ. meškat' (Pol. mieszkać formerly 'delay', now 'dwell'), fr. meška, old pop. form of word for 'bear' (ChSl. medvědĭ, etc., 3.73), with reference to the slow, clumsy movement of the bear. Berneker 2.30 f. Brückner 335.

Boh. odkladati, Pol. odkładać (with sbs. odklad, odkład 'delay'), cpds. of the root in ChSl. klasti, kladą 'put, lay' (12.12), hence lit. 'put off', then 'delay' trans. or intr.

Pol. ociągać się : ciąg 'draught, course of time', ciągnąć 'draw, pull' (9.33).

Pol. odwlekać, zwloczyć, cpds. of the root in wlec 'drag', ChSl. vlesti 'draw, pull' (9.33), are used also for 'delay'.

Russ. medlit' : medlennyj 'slow' (14.22).

7. Skt. vi-lamb-, cpd. of lamb- 'hang down', also sometimes 'remain behind, delay'.

Br.	deraoui, derou	NHG	anfangen, beginnen; anfang		

Words for 'begin, beginning' are most commonly based upon notions like 'seize upon' or 'enter upon', but there are also other and diverse sources.

1. Grk. ἄρχομαι (act. ἄρχω in this sense more freq. in Hom., but in Att. prose mostly 'be first, rule'), NG ἀρχίζω and also (pop.) ἀρχινῶ, beside sb. ἀρχή ('beginning' Hom.+; 'rule' later), perh. through an old aor. form : ἔρχομαι 'come' ('came to > started, began'). McKenzie, Cl.Q. 15.44 f. Fraenkel, IF 49.203.

2. Lat. incipere (> Rum. începe with sb. început), cpd. of capere 'take, seize' (11.13). Ernout-M. 148. REW 4353.

Lat. coepere, orig. only perf. coēpī with pres. sense 'I begin' but which early acquired perf. sense 'I have begun', hence the formation of a new pres.; cpd. of *ēpi, perf. of apere 'fasten, attach', hence coēpī orig. 'have fastened together' > 'begin'. Ernout-M. 202. Walde-H. 1.57 f.

Lat. initium, fr. inīre 'go into', whence 'enter upon', 'begin', cpd. of īre 'go'; hence late Lat. initiāre 'begin, initiate', VLat. cpd. *cominitiāre > It. (in)cominciare, Fr. commencer (sb. commencement), Sp. comenzar. Ernout-M. 304 f. REW 2079.

Lat. prīncipium (> It., Sp. principio, with deriv. vb. It. principiare), fr. prīnceps lit. 'taking the first (place, rank, etc.)' whence 'chief, first person, etc.', cpd. of prīmus 'first' and capere 'take'. Ernout-M. 809 f.

Fr. début, back-formation fr. débuter 'make first move at a game', fr. but 'goal', but prob. in sense of 'point from which the play is made', cf. de but en blanc (artillery), where blanc indicates the center of target aimed at. Bloch, s.v. but. Wartburg 1.652.

Sp. empezar, prob. fr. pieza 'piece' (= It. pezza, Fr. pièce, etc.), perh. through notion of 'break open', cf. It. spezzare 'break in pieces'. REW 6450.

3. Ir. doinscanna 3sg. (*to-ind-scann-), and intinscanna 3sg. (*ind-to-ind-scann-), cf. f-a-scannat (fo-scann-) 'they toss it', NIr. foscnaim 'toss, winnow, purge, cleanse', etym. dub. Walde-P. 2.564. Pedersen 2.613.

Ir. sb. tossach, NIr. tosach, fr. the shorter form Ir. tuus, NIr. tūs, lit. 'a leading forth' : W. tywys 'lead' (10.64). Hence NIr. tosnuighim (also tosuigim, etc.). Pedersen 1.308.

W. dechreu, Br. deraoui, with sbs. W. dechreuad, Br. derou, etym. dub. Pedersen 1.484 (as perh. orig. 'draw blood' = 'begin battle' : Lat. cruor, etc.).

4. Goth. duginnan; OE onginnan, aginnan, rarely beginnan, ME aginne, beginne (and with dropping of prefix simply ginne), NE begin, with sbs. OE angin, ongin, ME beginnunge, -ynge, NE beginning; Du. beginnen (MLG beginnen > Dan. begynde, Sw. begynna, with sbs. begyndelse, begynnelse), OHG biginnan, inginnan, MHG, NHG beginnen, sbs. Du., MHG begin, OHG anagin, MHG anegin, etym. dub. Walde-P. 1.589. Falk-Torp 58. Feist 128.

Goth. anastōdjan, dustōdjan, with sb. anastōdeins, cpds. of -stōdjan (ON stæða 'cause to stand, establish'), caus. of standan (pret. stōþ) 'stand', etc. Feist 44 f.

Goth. frumisti, fr. frumists superl. of fruma 'first', OE frum id. (mostly in cpds. frum-), whence fruma, frymþ 'beginning' : Lith. pirmas, Grk. πρόμος 'first', etc. Feist 170. Walde-P. 2.37.

ON hefja 'lift' (10.22), also 'begin', in the latter sense esp. hefja upp (hence upphaf 'beginning').

ON byrja (not so freq. in older language in this sense as hefja, but reg. in NIcel., also 'be fitting' and 'beget'), Sw. börja = MLG boren 'lift, carry' and 'be due', OHG burien 'lift up', giburien 'happen, be fitting', etc. : ON bera, Goth. bairan, etc. 'bear, carry'. Walde-P. 2.156. Falk-Torp 118. Hellquist 125.

ME, NE commence, commencement, fr. OFr. commencer, commencement (above, 2).

Du. aanvangen, OHG anafāhan, MHG anvāhen, NHG anfangen, beside sbs. Du. aanvang, OHG anafang, MHG anvanc, NHG anfang, cpd. of Du. vangen, OHG fāhan, NHG fangen 'seize, grasp, take' (like Lat. incipere fr. capere, cf. above, 2).

5. Lith. pradėti, also refl. prasidėti, sb. pradžia, cpd. of dėti 'put, place, lay'.

Lett. sākt, and cpd. iesākt with sbs. sākums, iesākums, prob. = Lith. šōkti 'jump' (10.43), rarely also 'begin'; semantic development through 'jump' = 'hasten (eagerly to do something)', hence 'begin', Mühl.-Endz. 3.801. Fraenkel, IF 49.203 f.

6. ChSl. načęti (zaćęti 'conceive'), SCr. početi, Boh. začíti, počíti, etc., general Slavic in cpds. only, with sbs. ChSl. načęlo, načętŭkŭ, etc.; Ir. cinim 'spring from, be born', Grk. καινός 'new', etc. (14.13). Walde-P. 1.398. Berneker 168.

7. Skt. ā-rabh-, and pra-ā-rabh-, with sbs. ārambha-, prārambha-, cpds. of rabh- 'take, grasp, seize'.

Av. aiwigarəd-, lit. 'go toward', esp. 'begin' a hymn or some part of the ritual, cpd. of garəd- : Lat. gradī 'step, go', etc. Cf. Lat. ingredī 'enter upon' and freq. 'begin', esp. a speech. Barth. 514 f. Walde-P. 1.651 f.

Av. sb. frataurunа-, prob. as 'entrance', fr. tar- 'cross over'. Barth. 980. (Walde-P. 1.733).

Av. sb. aiwigati-, lit. 'entrance, coming forward', fr. aiwi-gam- 'come forward'. Barth. 88.

14.252 LAST (vb.)

Grk.	διαρκέω	Goth.	....	Lith.	tęstis, trukti
NG	διαρκῶ, βαστῶ, κρατῶ	ON	haldask	Lett.	ilgt, būt ilgi
Lat.	dūrāre	Dan.	vare	ChSl.	trajati
It.	durare	Sw.	vara	SCr.	trajati
Fr.	durer	OE	lǣstan	Boh.	trvati
Sp.	durar	ME	laste, (en)dure	Pol.	trwać
Rum.	dura	NE	last (endure)	Russ.	dlit'sja
Ir.	maraim	Du.	duren	Skt.	(sthā-)
NIr.	mairim	OHG	werēn	Av.	....
W.	parhau	MHG	dūren, wern		
Br.	padout	NHG	dauern (währen)		

The verbal notion of 'last', that is, 'continue', with special reference to the lapse of time, is mostly either included in the scope of, or specialized from, vbs. for 'continue, follow, remain, hold out, prolong', the last derived from adjs. for 'long'.

1. Grk. διαρκέω, cpd. of ἀρκέω 'ward off, assist' (poet.), mostly 'suffice', also sometimes 'hold out, last' : Lat. arcēre 'inclose' (old sense, but rare), 'keep off'. Walde-P. 1.80. Ernout-M. 67 f.

NG βαστῶ 'support, carry' (10.61), also 'bear' = 'endure', and intr. 'hold out, last'.

NG κρατῶ 'hold, keep' (11.85), also 'last'.

2. Lat. dūrāre (> Romance words, etc.), orig. 'make hard', then 'make ready, inure' and intr. 'endure, hold out, last', fr. dūrus 'hard' (15.74), also 'hardy'. Ernout-M. 291 (but with needless assumption of two orig. different vbs.). Walde-H. 1.386. REW 2805.

3. Ir. maraim 'remain' (12.16), also 'live, survive' and 'hold out, last', likewise NIr. mairim.

W. parhau 'continue' and 'last', prob., like paru 'suit, match', deriv. of par, fr. Lat. par 'equal'. Morris Jones 384 (but with dub. reconstruction).

Br. padout, fr. Lat. patī 'suffer, endure'. Loth, Mots lat. 194.

4. ON haldask (-ast), refl. of halda 'hold' (11.15), is used for 'continue, last'. Fritzner 1.694. Vigfusson 234.

OE lǣstan, ME laste, NE last, earliest sense 'follow, perform' (only in OE, where also already 'continue, last') : Goth. laistjan 'follow', etc. (10.52). NED s.v. last, vb.[1].

OHG werēn, MHG wern, NHG währen (mostly replaced by dauern except in pple. während 'during'), MLG waren (> Dan. vare, Sw. vara), fr. the same root as Goth. wisan 'be, remain', etc. (9.91). Weigand-H. 2.1202. Falk-Torp 1353.

ME, NE dure (now arch. or dial.), ME, NE endure, Du. duren, MHG dūren, NHG dauern, fr. Fr. durer or in part directly fr. Lat. dūrāre (above, 2). NED s.v. dure, vb. Franck-v. W. 143. Weigand-H. 1.334. Kluge-G. 97.

5. Lith. tęstis, refl. of tęsti 'extend, continue', fr. IE *tens- (Skt. taṅs- 'shake', etc.), extension of *ten- in Skt. tan-, Grk. τείνω, etc. 'stretch' (9.32). Walde-P. 1.727.

Lith. trukti (pres. trunku) : trūkti (pres. trūkstu) 'tear, break' intr., traukti 'draw, pull' (9.33). Walde-P. 1.731. Leskien, Ablaut 312. Semantic development through some such use as that of NHG sich hinziehen 'drag on, be prolonged'.

Lett. ilgt (Mühl.-Endz. 1.706), fr. ilgs 'long' (12.51). Or commonly phrases with adv. ilgi 'long' and būt 'be' (ilgi nebija 'it was not long'), palikt 'remain', etc.

6. ChSl., SCr. trajati, Boh. trvati (OBoh. tráti), Pol. trwać, prob. : Ir. trāth 'time, hour', Skt. tṛ- 'cross over', trā- 'rescue' (secondary sense, 11.25), Lat. trāns 'across', etc. Trautmann 325 f. Brückner 578. Pedersen 1.52.

Russ. dlit'sja, refl. of dlit' 'prolong' : ChSl. pro-dĭliti 'prolong', fr. the root seen in ChSl. dlŭgŭ 'long', etc. Walde-P. 1.812. Berneker 252.

7. Skt. sthā- 'stand', also 'remain, hold out', and prob. the nearest approach to a verb for 'last'.

14.26 END (sb., temporal)

Grk.	τέλος, τελευτή	Goth.	andeis	Lith.	galas, (pa)baiga
NG	τέλος	ON	endi, lok	Lett.	gals, beigas
Lat.	fīnis	Dan.	ende, slutning	ChSl.	konĭčina, konĭcĭ
It.	fine	Sw.	ände, slut	SCr.	konac, svršetak
Fr.	fin, bout	OE	ende	Boh.	konec
Sp.	fin	ME	ende	Pol.	koniec
Rum.	sfîrşit	NE	end	Russ.	konec
Ir.	cend, dered, deod	Du.	einde, slot	Skt.	anta-, prānta-
NIr.	deireadh, crīoch	OHG	enti	Av.	θraošti-, θwarəsah-, karana-
W.	diwedd	MHG	ende		
Br.	diwez	NHG	ende, schluss		

Nouns for 'end' in the temporal sense, the opposite of 'beginning', are in large measure the same as those used for 'end' in a spatial sense, for which see 12.35.

But some are different, though also connected with words for spatial application. Only those are discussed here.

1. Grk. τέλος with central notion of 'fulfilment, completion', hence 'end' and in latter sense esp. τελευτή, prob. as orig. 'turning-point' : πέλομαι 'be in motion' (Aeol. π), πόλος 'pivot, axis', Lat. colere 'cultivate', Skt. car- 'move, wander, go', etc., IE *k^{w}el-. Walde-P. 1.514. Boisacq 952. Walde-H. 1.246.

2. Lat. fīnis (> It. fine, Fr., Sp. fin), in earliest and most common use 'limit, boundary' (of field, territory, etc.), prob. as 'fixed mark' : fīgere 'fix, fasten'. Walde-P. 1.832. Ernout-M. 363. Walde-H. 1.503.

Rum. sfîrşit : vb. sfîrşi 'finish' (14.27).

3. NIr. crīoch, also and orig. 'limit, boundary, furrow', as Ir. crīch, fr. the root in Grk. κρῖνω 'decide, distinguish', etc. Walde-P. 2.584.

Ir. deod, W. diwedd, Br. diwez, perh. cpd. of *di- 'from' and root *wedh- 'lead' in Ir. fedim, W. ar-weddu, cy-weddu, Lith. vesti 'lead', etc. Morris Jones 251.

4. ON lok (pl. or sg., also cpd. endalok, endilok), also 'lid, cover' : ON lūka 'shut, finish' (14.27).

Dan. slutning, fr. slutti 'close, conclude' (Sw. sluta) fr. MLG slūten 'close, finish', beside sb. slut 'end, close' (> Dan. slut in cpds., Sw. slut), Du. slot = NHG schluss (MHG sluz, rare) :

OHG *sliozan*, NHG *schliessen*, etc. 'close, shut' (12.25). Cf. NE *close* in *close of the day*, etc. Falk-Torp 1070.

5. Lith. *baiga* (more usually *pabaiga*), Lett. *beigas*, beside vbs. Lith. *baigti*, Lett. *beigt* 'finish', etym.? Walde-P. 2.150. Mühl.-Endz. 1.277.

6. ChSl. *konĭcĭ*, etc. (12.35), also temporal, but deriv. ChSl. *konĭčina* more common for τέλος in the Gospels.

SCr. *svršetak* : *svršiti* 'finish' (14.27).

7. Av. *θraošti-* : *θraoš-* 'come or bring to maturity or completion', *θru-* 'rear, support', OHG *trowwen* 'grow, mature', etc. Walde-P. 1.754. Barth. 801.

Av. *θwarəsah-*, lit. 'the point at which something is cut off', fr. *θwarəs-* 'cut off'. Barth. 796.

Temporal use of Av. *karana-* (12.35) attested only in cpds. Barth. 451.

The majority of the vbs. for 'finish' are derived from the sbs. for 'end' (14.26), hence lit. 'make an end of, bring to an end', and so also 'complete, accomplish, etc.'. But in some the latter is the primary notion and the temporal secondary. Cf. NE *complete, fulfil*, etc.

1. Grk. τελέω, τελευτάω, NG τελειώνω, fr. τέλος, τελευτή 'end' (14.26).

2. Lat. *perficere, conficere*, perfect. cpds. of *facere* 'do, make'.

Lat. *fīnīre* (> It. *finire*, Fr. *finir*), fr. *fīnis* 'end' (14.26).

Sp. *acabar*, fr. *cabo* 'end' (12.35).

Rum. *isprăvi*, fr. Slavic, cf. ChSl. *ispraviti* 'make straight', etc. Tiktin 857 f.

Rum. *sfîrşi*, fr. Slavic, cf. SCr. *svršiti*, etc. (below, 6). Tiktin 1418.

Words for 'cease' are based on such notions as 'stop', 'leave off', 'make an end', 'rest', etc., most of which appear also in NE substitutes for *cease*, which, though the distinctive word, is now little used in common speech. Of these the most common is *stop*. For *rest*, now esp. in law *the defense rests*, see NED s.v. *rest*, vb. 2.d, e.

1. Grk. παύω 'check, cause to cease', mid. παύομαι 'cease', NG παύω in both senses, etym. dub., perh. : OPruss. *pausto* 'wild', ChSl. *pustŭ* 'desert', *pustiti* 'let go', etc. Walde-P. 2.1. Boisacq 752 f.

Grk. διαλείπω 'leave an interval', only late 'cease', as in NT, Lk. 7.45, and pap.

2. Lat. *dēsinere*, cpd. of *dē* 'from, down' and *sinere* 'let, permit', earlier 'place, put'. Ernout-M. 945.

Lat. *dēsistere* (> OFr. *desister* > NE *desist*), cpd. of *dē* 'from, down' and *sistere* 'make stand, stop'.

Lat. *cessāre* 'be slow, inactive, remiss', hence also 'cease' (> It. *cessare*, Fr. *cesser*, Sp. *cesar*), frequent. of *cēdere* 'go, go away, withdraw, yield'. Ernout-M. 169. Walde-H. 1.193.

Rum. *înceta* 'be still, quiet', and

'cease', deriv. of *încet* 'gentle, slow' (14.22). Puşcariu 814.

3. Ir. *anaim* 'remain, rest', but also 'cease' (with prep. *o* or *di* 'cease from'), and cpd. **com-od-ess-an-* 'end, rest, cease' (e.g. 3sg. *con-osna*, etc.) : Skt. *an-* 'breathe', etc. (4.51). Here also Br. *ehana* = W. *ech-ain* 'to rest'. Pedersen 2.295, 455 f.

NIr. *stadaim* 'stop' with *de* 'cease (from)' : *stad* 'stop, pause', fr. Lat. *status* 'state, condition'. Pedersen 1.218.

W. *peidio*, through an earlier sense of 'suffer, endure' fr. VLat. **patīre*, Lat. *patī* id. with development through 'submit to, acquiesce in' (attested in Lat.), 'cease resistance'. Loth, Mots lat. 194.

Br. *paouez* (cf. Ernault s.v.), fr. sb. *paouez*, OBr. *poues* 'rest' = Corn. *powes* id., fr. Lat. *pausa* 'pause'? Pedersen 1.211. Henry 217. Not discussed in Loth, Mots lat.

4. Goth. *ga-nanþjan* in *gananþida* = ἐπαύσατο Lk. 5.4, but perh. to be read *ga-andida*, lit. 'ended'. Feist 174.

Goth. *sweiban* (in *swaif* = διέλειπεν Lk. 7.45) : ON *svīfa* 'turn, drift', refl. 'turn away from, shrink from', and perh. ultimately Grk. σīγάω, σιωπάω 'be silent'. Walde-P. 2.534. Falk-Torp 1216 f. Feist 465.

ON *hætta*, prob. same word as *hætta* 'risk, stake', fr. **hanhatjan* : Skt. *çank-* 'be in doubt', Lat. *cunctārī* 'delay'. Walde-P. 1.461. Falk-Torp 448.

ON *lētta* (with dat. or *af* with dat.) also and orig. 'lighten, lift' fr. adj. *lēttr* 'light' = Goth. *leihts*, etc. id. (15.82). Falk-Torp 637.

Dan. *ophøre*, Sw. *upphöra*, fr. NHG *aufhören*, MLG *uphōren* (below). Falk-Torp 796.

OE *geswīcan* : *swīcan* 'wander, depart', also sometimes 'cease', OHG *swīhhan* 'be weary, desert', ON *svīkja* 'betray', Lith. *svaigti* 'grow dizzy', etc. Walde-P. 2.519, 534. Falk-Torp 1215.

OE *linnan*, mostly *blinnan*, OHG *bilinnan* : Goth. *af-linnan* 'depart', ON *linna* 'stop', perh. ON *linr* 'soft, gentle', Grk. λίναμαι· τρέπομαι Hesych., λιάζομαι 'shrink, sink', etc. Walde-P. 2.387 f. Falk-Torp 645 f.

ME *cesse*, NE *cease*, fr. Fr. *cesser* (above, 2).

NE *stop* (*stopped speaking*, etc.), in this sense only a special variety of its common meaning 'come to a stand' (also and earlier 'bring to a stand'). NED s.v.

Du. *ophouden*, cpd. of *houden* 'hold', hence 'hold up' = 'support' and = 'cease'. Cf. NE *hold up* in many senses including 'stop, cease'.

MHG *hœren* 'hear, obey' and also (from a situation in which a command 'obey' was implicitly equivalent to 'stop, cease') 'cease', hence in this sense esp. MHG *ūfhœren*, NHG *aufhören*. Weigand-H. 1.103, 890.

5. Lith. *liauti*, esp. refl. *liautis* and perfect. *paliauti*, Lett. *l'aut* 'permit, allow', refl. *l'auties* 'cease, end' : OPruss. *aulāut* 'die', Lith. *lavonas* 'corpse', Goth. *lēwjan* 'betray', etc., all from a common notion of 'leave, let'(?). Cf. NE *leave* in sense of 'cease' (cf. Lk. 5.4 *when he had left speaking*, now obs., but *leave off* common; NED s.v. 10b, 14c). Walde-P. 2.405. Mühl.-Endz. 2.533.

Lith. *nustoti*, cpd. of *nuo-* 'from' and *stoti* 'take a stand'. Cf. Lat. *dēsistere* (above, 2), NHG *abstehen von* 'desist from, give up', etc.

Lett. *beigties*, refl. of *beigt* 'bring to an end' : *beigas* 'end' (14.26). Mühl.-Endz. 1.277. (Lith. *baigtis* 'come to an end', but not 'cease' with vbs. of action.)

6. ChSl. *prěstati*, etc., general Slavic (Lith. *perstoti* also used for 'cease' but

prob. semantic borrowing), or less commonly ChSl., Boh. *ustati*, Pol. *ustać*, perfect. cpds. of *stati*, etc. 'take a stand', hence 'come to a standstill'. Cf. NE *stop* in sense of 'cease'.

7. Skt. *upa-ram-* and *ni-ram-* lit. 'come to rest', cpds. of *ram-* 'rest'.

Skt. *ni-vṛt-*, cpd. of *ni-* 'down, back' and *vṛt-* 'turn', hence 'turn back, abstain from, cease'.

W.	*parod*	MHG	*gare, bereite, gereite*		
Br.	*dare*	NHG	*bereit, fertig*		

Words for 'ready' are mostly based on notions like 'prepared, arranged', or 'at hand'.

1. Grk. ἑτοῖμος, ἕτοιμος, (cf. Hdn. 2.938), etym.? Boisacq 292.

2. Lat. *parātus* 'prepared' and hence 'ready', pple. of *parāre* 'prepare'.

Lat. *praestō* (adv.) 'at hand, ready', whence late adj. *praestus* (> Fr. *prêt* 'ready', It., Sp. *presto* 'quick, soon, at once'), fr. *prae* 'in front of, before', second part prob. : *stāre* 'stand' or *sinere* 'place, put' (i.e. **prae-sitō*, cf. *po-situs*). Ernout-M. 805 f.

Lat. *prōmptus* 'at hand, ready, prompt' (> It., Sp. *pronto*), pple. of *prōmere* 'produce'.

Rum. *gata*, fr. Slavic, ChSl. *gotovŭ*, etc. (below, 6).

3. Ir. *airlam* (*aurlam, irlam, erlam*), NIr. *urlamh, ullamh*, fr. **ar-ro-lām*, lit. 'at hand' : *lām* 'hand'.

W. *parod*, fr. Lat. *parātus* (above, 2). Loth, Mots lat. 193.

Br. *dare*, older *darev* (also 'done' = 'cooked', as now), orig. 3sg. (= MW *deryw* 'happens') of *darbout* 'be on the point of (doing something)', now *darv(ez)out* 'happen', cpd. of *bout* 'be'. Henry 89. Pedersen 2.442.

4. Goth. *manwus*, etym. disputed but prob. as orig. 'at hand' : Lat. *manus* 'hand'. Walde-P. 2.272. Feist 345.

ON *būinn*, pple. of *būa* 'prepare', hence 'prepared, ready', like Lat. *parātus*.

Dan. *færdig*, Sw. *färdig*, fr. MLG *verdich* = NHG *fertig* (below). Falk-Torp 289.

OE *gearo*, ME *yare* (NE *yare* now obs. or dial.), OHG *garo*, MHG *gare*, NHG *gar* (now mostly of finished products, as cooked food, dressed skins, etc.), prob. cpd. of Gmc. *ga-, ge-*, with forms like OE *earu*, OS *aru*, ON *ǫrr* 'swift, ready' : Skt. *aram* 'suitably', Grk. ἀραρίσκω 'join, fit', etc. Walde-P. 1.69 ff., 688. Weigand-H. 1.620. NED s.v. *yare*, adj.

OE *gerǣde* ('arranged, skilled'), ME *rædi(g)*, NE *ready*, OHG *bireiti*, MHG *bereite, gereite*, NHG *bereit*, Du. *bereid, gereed* : Goth. *garaiþs* 'arranged, appointed', *garaidjan* 'order', ON *greiðr* 'straight, clear, free' (> ME *graith* 'ready'), *greiða* 'arrange', OE *(ge)rǣdan*

'arrange, advise', etc. Walde-P. 1.75, 2.348. The development is clearly fr. 'arranged', like 'prepared', to 'ready'. There is no direct formal or semantic connection with OE *rīdan*, OHG *rītan* 'ride' (as Falk-Torp, Weigand-H., Kluge-G.), even if the two groups are ultimately related.

NHG *fertig*, fr. MHG *vertic, vertec* 'ready', esp. 'mobile, skilful, dexterous' (as still in part NHG *fertig* and Du. *vaardig*), OHG *fartig*, deriv. of *fart*, MHG *vart* 'journey', but prob. in the freq. special sense of 'military expedition'. Weigand-H. 1.522. Sperber, Einleitung 41. The present dominant sense of 'ready' = 'finished with preparations', whence even 'finished' in phrases like *er ist mit seinem gelde fertig*, is here, in contrast to the case of Lat. *parātus*, the end rather than the beginning of the evolution.

5. Lith. *gatavas*, Lett. *gatavs*, fr. Slavic (below, 6).

6. ChSl. *gotovŭ*, etc., general Slavic, etym.? Berneker 337 f. (but Alb. *gat* prob. loanword fr. Slavic, like Rum. *gata*).

SCr. *spreman* : *spremiti* 'prepare, make ready', cpd. of *-premiti* (i.e. *s-premiti*, like *o-premiti*, etc.) = late ChSl. *prěmiti*, deriv. of *prěmŭ* 'straight'. Miklosich 263.

7. Skt. *kḷpta-, upa-kḷpta*, pass. pple. of *kḷp-* 'be suitable, adapted to', hence 'arranged, prepared, ready'.

Words for 'always' are most commonly connected with those for 'all', either derivs. with adv. suffixes of time or cpds. with words for 'time' or the like. Several are derived from a form appearing in a numeral for 'one' and in words for 'together', the development here being probably through 'once for all'. Some are cognate with words for 'age, lifetime'. More isolated semantic sources are 'until night' ('all day' > 'always'), 'steadily'.

1. Derivs. or cpds. of words for 'all' (13.14).

Grk. πάντοτε, formed fr. stem of πᾶς, παντός after temporal advs. like ὅτε, τότε; NG pop. πάντα; Fr. *toujours*, fr. OFr. *toz jorz*, also *tozdis*, lit. 'all days'; Rum. *totdeauna* fr. *tot* 'all', and *de-a-una* 'at once', phrase based on fem. of Lat. *ūnus* 'one', like Rhaet. *adüna* 'always' (Tiktin 1628, REW 211); NIr. phrases with *cach, gach, gach uile* 'every' (Dinneen s.v. *gach;* McKenna s.v. *always*); W. *bob amser* (*pob* 'every', *amser* 'time', 14.11), Br. *bepred* (*pep* 'every', *pred* 'time', 14.11); ON *alla tīð*, Dan. *altid*, Sw. *alltid*, Du. *altijd*, fr. words for 'all' and 'time' (14.11); OE *ealne weg*, phrase with *weg* 'way' (10.71) and presumably

at first spatial 'all the way' but in actual use temporal, hence ME *alweye, alwaye*, NE *alway* now displaced by *always* fr. ME *alleweyes, alles weis* a gen. phrase (NED s.v.); Lith. *visada, visados*, ChSl. *vĭsegda*, Boh. *vždy*, Russ. *vsegda*, derivs. with suffixes of temporal advs. (also Lith. *vis*, Russ. *vse*); Pol. *zawsze*, phrase with *za* 'in'; Skt. *sarvadā*, deriv. with suffix of temporal advs. like *tadā* 'then'.

2. Derivs. of **sem-* in Grk. εἷς, μία, ἕν 'one', Lat. *semel* 'once', etc. Walde-P. 488 f. Ernout-M. 922. Feist 423.

Lat. *semper* (> It., OFr. *sempre*, Sp. *siempre*); Goth. *sinteinō*, adv. fr. *sinteins* 'daily', cpd. with second part : ChSl. *dĭnĭ*, Skt. *dina-*, etc. 'day' (14.31); OE *sym(b)le* (reg. for 'always' in Gospels), OHG *simbolon* (Goth. *simlē* 'once').

3. Grk. ἀεί, fr. αἰϝεί (attested in dial.) : Grk. αἰών, Lat. *aevum*, Goth. *aiws* 'lifetime, eternity, age', Skt. *āyu-* 'life', etc. Walde-P. 1.6.

4. Ir. *do grēs* ('always' in pres., past, or fut.), phrase with *grēss* 'attack, onset' : *in-grenn-* 'pursue', Lat. *gradī* 'step, go'. Pedersen 1.136.

Ir. *caidche*, NIr. *choidhche* (of future time), orig. *c-aidhche* 'until night' (*aidche* 'night' 14.42), Zimmer, KZ 30.55 ff. K. Meyer, Contrib. 299.

NIr. *riamh* 'always' or 'at any time' (used of past or pres. time, rarely of fut.; cf. Dineen s.v.), fr. Ir. *riam* 'formerly' : Lat. *prior* 'former', *prīmus* 'first', etc. (details of formation disputed). Walde-P. 2.34. Thurneysen, Gram. 528.

5. OE *ā*, OHG *eo, io* 'always' and 'at any time' (NHG *je*) : Goth. *aiws* (acc. *aiw* adv.), Lat. *aevum*, Grk. αἰών, etc., like Grk. ἀεί, αἰϝεί (above, 3).

OE *ǣfre*, ME *ever(e)*, NE *ever* 'always' (in Chaucer *ever* and *alwey* both common, but NE in this sense now arch.; cf. *it was ever thus* = *it was always so*), also 'at any time' (e.g. *did you ever see him? Never*), deriv. of *ā* (above), and prob. *feor* 'life'. Cf. *ā to feore* 'forever more'. NED s.v. *ever*, adv. Holthausen 9.

OHG *iomēr* (*iamēr, iemēr*), MHG, NHG *immer*, fr. *eo, io* (= OE *ā*, above) and *mēr* 'more' (13.16), hence at first only with reference to fut. time, but actually not so restricted. Weigand-H. 1.918. Kluge-G. 262.

NHG *stets*, adv. fr. *stet* 'fixed, steady' : *stehen* 'stand'. Weigand-H. 2.967.

6. SCr. *uvijek*, fr. *u* 'in' and *vijek* 'lifetime' = ChSl. *věkŭ* (reg. in Gospels for αἰών).

Boh. *stále*, fr. *stálý* 'fixed, constant' : *státi* 'stand' (cf. NHG *stets*).

'Often' is equivalent to 'many times' and may be so expressed, at least alternatively, beside other terms. Otherwise the most striking semantic source is 'thick, dense, crowded together' or 'heap, mass', with shift from spatial to temporal notion.

1. From words for 'many' (13.15), either adv. derivs. or phrases for 'many times' parallel to those for 'three times' (13.44). Grk. πολλάκις, with same suffix as in τριάκις 'three times', NG πολλὲς φορές, Fr. *bien de fois*, Sp. *muchas veces*, W. *llawer gwaith*, Br. *alies* (i.e. *a lies*) and *lies gwech* (*lies* 'several' : Ir. *lia* 'more', etc. 13.16), NE *many times*, etc. Most of these and other similar phrases are omitted from the list. Cf. also Ir. *menic* (below, 4).

2. Grk. συχνά, sometimes 'often' and so reg. in NG (beside freq. πολλὲς φορές), fr. συχνός 'abundant, long (in time), numerous, populous, many together', etc., prob. based on a common notion of 'compact' and perh. fr. a form of the same root as in σάττω 'stuff full'. Boisacq 926.

Grk. πυκνά, sometimes 'often' (e.g. NT, Lk. 5.33) fr. πυκνός 'thick, compact' (12.64) and 'frequent'; cf. NG συχνὰ πυκνά 'very frequently'.

3. Lat. *saepe*, neut. of an adj. **saepis*, prob. as orig. 'crowded together' : *saepēs* 'hedge, fence'. Walde-P. 2.445 f. Ernout-M. 885.

Lat. *subinde* 'immediately after', hence 'now and then, repeatedly, often' (> Fr. *souvent* > It. *sovente*). Ernout-M. 993. REW 8363.

It. *spesso*, fr. adj. *spesso*, Lat. *spissus* 'thick, dense' (12.64). REW 8160.

Sp. *à menudo*, phrase with *menudo* 'small' (fr. Lat. *minūtus*), with development through 'at short intervals, closely following'.

Rum. *adeseaorĭ, adesea, ades*, phrases with *des* 'thick', also adv. 'often', fr. Lat. *dēnsus* 'thick' (12.64). Tiktin 19, 524.

4. Ir. *menic* (adj. 'frequent', *in menice* adv. 'often'), NIr. *minic* (adj. and adv.), W. *mynych* (adj., *yn fynych* adv.) : Goth. *managς*, etc. 'much, many' (13.15). Pedersen 1.159.

5. Goth. *ufta*, ON *opt*, OE *oft*, OHG *ofto*, etc., general Gmc., but with no certain etym. Falk-Torp 788. Feist 513. Weigand-H. 2.333.

Du. *dikwijls*, fr. MDu. *dicke wīle(n)*, fr. *dick* 'thick' (12.63) here 'abundant' and *wīle* 'time' (: Goth. *hweila*, etc. 14.11). Cf. MLG, MHG, and NHG dial. *dicke* 'often'. Franck-v. W. 117.

NHG *häufig* (adj. and adv.), first 'in heaps, crowds' (fr. *haufe* 'heap'), hence 'abundant(ly)', and later 'frequent(ly)'. Weigand-H. 1.822. Paul, Deutsches Wtb. s.v. *haufe*.

6. Lith. *dažnai*, fr. *dažnas* 'many a, frequent' : Lett. *dažs* 'many a', OPruss. *ko-desnimma* 'so often as', root connection? Leskien, Bildung d. Nom. 355.

Lith. *tankiai*, fr. *tankus* 'thick, dense' (12.64).

Lett. *bieži*, fr. *biezs* 'thick, dense' (12.64). Mühl.-Endz. 1.307.

7. ChSl. *čęsto*, etc., general Slavic, fr. adj. ChSl. *čęstŭ*, etc. orig. 'thick, dense' (12.64) but mostly 'frequent'. Berneker 154 f.

'Sometimes' is generally expressed either by temporal advs. formed from prons., esp. the indef. 'some', or by forms of, or phrases with, words for 'time', esp. 'at times, sometimes'.

Omitted here are those words which are used for the indef. 'at any time' mainly in neg., interrog., and subordinate clauses, rarely affirmative, such as Grk. ποτε, Lat. *umquam*, NE *ever*, NHG *je*, etc. But most such words are mentioned in the discussion, either here or in 14.31 or 14.34.

1. Pronominal advs. : Grk. ἐνίοτε, fr. phrase *ἔνι ὅτε = attested ἐσθ' ὅτε, lit. 'there are (times) when'. NG κάποτε fr. κά- (fr. κἄν, καὶ ἄν as in κάποιος 'some, somebody') and ποτέ indef. beside πότε 'when?'; Lat. *aliquandō*, fr. *aliquī* 'some' (Lat. also *nōnnumquam* 'not never'); Goth. *hwan*, OHG *wanne* ('when' and indef.); OHG *sumes, sumenes*, Du. *soms* : Goth. *sums*, etc. 'some'; Lith. *kada nekada* (NSB 2.143; *kada* 'when' and indef.); ChSl. *někŭgda* (cf. *ně-kŭto* 'someone', positive fr. neg.; Brugmann, Grd. 2.2.351 f.), Boh. *někdy*, Pol. *niekiedy*, SCr. *kad kad, katkada* (cf. *kada* 'when' or indef.), Russ. *inogda* (= ChSl. *inogda* 'at one time', fr. *inŭ* indef. 'Never' is expressed by combinations of the neg. with advs. for 'at any time, ever', many of these of pronominal origin, others cognate with words for 'time', 'age, lifetime', 'more', etc.

But in many cases the neg. sense has been absorbed and the formal neg. omitted—the familiar phenomenon observed in Fr. *pas* 'not', *rien* 'nothing', NG *τίποτε* 'nothing', *κανένας* 'no one', etc.

1. Grk. *οὔποτε, οὐδέποτε*, neg. of *ποτέ* 'at some time', indef. beside *πότε* 'when?'

NG *ποτέ* with neg. notion absorbed.

2. Lat. *numquam* (> Sp. *nunca*), fr. neg. *ne* and *umquam* 'at any time, ever'. Ernout-M. 1123.

It. *giammái*, Fr. *jamais*, Sp. *jamás*, fr. Lat. *iam* 'already' and *magis* 'more'. Used orig. and still in part for 'at any time, ever', but mostly after neg. and with neg. notion absorbed.

Rum. *nicĭ-odată*, fr. *nicĭ* 'not' (fr. Lat. *neque*) and *odată* 'once'. Tiktin 507 f.

3. Ir. *nī caedche*, NIr. *nī choidhche* ('never' in future), neg. of *caedche* 'always' (14.31).

Ir. *nī riam*, NIr. *nī riamh* ('never' in past time) neg. of Ir. *riam* 'formerly', NIr. *riamh* 'always, at any time' in past (14.31).

W. *ni byth*, neg. with *byth* 'ever' = Ir. *bith* 'world' used also in cpds. for 'ever' (K. Meyer, Contrib. 220. Pedersen 1.24). Also either *ni* alone or *byth* alone used for 'never'.

Br. *nepred* ('never' in pres.), neg. with *pred* 'time' (14.11).

Br. *biskoaz* ('never' in past), fr. *bis* = W., Corn. *byth* (above) and *choaz* 'still' = Corn. *whath, wheth* id., with neg. notion absorbed. Cf. MCorn. *ny bythqueth* 'never'. Pedersen 1.379. Henry 36.

Br. *birviken, birken* ('never' in future), fr. MBr. *bizhuyquen* = Corn. *bys vycken* 'forever', with *biz* as in *biskoaz* (above) + *huy*, Corn. *vy* (form of the vb. 'be'?) + *quen* 'as much, so', the whole with neg. notion absorbed. Henry 36. Ernault, Glossaire 61, Dict. étym. s.v. *bizhuyquen*.

4. Goth. *ni hwanhun*, neg. with deriv. of *hwan* 'when' and 'at any time', like *ni hwashun* 'no one', etc. Feist 281.

Goth. *ni aiw*, neg. with *aiw* adv., orig. acc. of *aiws* 'age, eternity'. Cf. OE *ā*, OHG *eo* 'always, at any time' (14.31), and OHG *nio* 'never'.

ON *aldri, aldrigi*, Dan., Sw. *aldrig*, fr. dat. sg. of *aldr* 'age, lifetime' (14.12) + indef. particle *-gi*, and with neg. notion absorbed, so orig. '(not) in a lifetime'. Falk-Torp 20. Hellquist 10.

OE *nǣfre*, ME *neuer(e)*, NE *never*, fr. neg. with OE *ǣfre*, etc., 'always' and 'at any time' (14.31).

Du. *nooit*, neg. with *ooit* 'at any time, ever', this fr. forms corresponding to OE *ā*, Goth. *aiw* and OE *giet* 'yet', and so like OE *nǣfre giet* (NED s.v. *yet*, 4.a). Franck–v. W. 475.

OHG *nio*, MHG, NHG *nie* (NHG *niemal*, now *niemals*, with *mal* as in *dreimal* 'three times', etc.), fr. neg. with OHG *io*, etc., 'always, at any time' (14.31). Weigand-H. 2.297, 299.

OHG *niomēr*, MHG, NHG *nimmer*, fr. neg. with OHG *iomēr*, etc. 'always' (14.31). Similarly Du. *nimmer*. Weigand-H. 2.303.

5. Lith. *niekad* (or *-a, -os*, NSB 2.185), Lett. *nekad*, neg. with Lith. *kada*, Lett. *kad* 'when?' and indef. : Skt. *kadā* 'when?', fr. interrog.-indef. stem *ka-*, IE *$*k^wo$-*. Walde-P. 1.521, 571.

6. ChSl. *nikoli*, more commonly *nikoli-že* with indef. particle *-že*, neg. with *koli* 'at some time', deriv. of interrog.-indef. stem *ko-*. Berneker 673.

ChSl. *nikŭgda-že* (Supr.), Russ. *nikogda*, neg. with *kogda, kŭgda* 'when, at any time', fr. stem *ko-* (as above) with *-gda* as in *togda, tŭgda* 'then', etc. Berneker 673.

ChSl. *nikŭda-že*, SCr. *nikada*, neg. with ChSl. **kŭda*, SCr. *kada* 'when, at any time' : Lith. *kada*, Skt. *kadā* id. (above, 5).

Boh. *nikdy*, Pol. *nigdy*, may belong in either of the two preceding groups. Berneker 675. Brückner 138, 363.

7. Skt. *na kadā cana*, neg. with *kadā* 'when?' (like Lith. *kada*, above, 6) and the indef. *cana*. Also with *na* omitted in same sense, as RV 1.150.2. Also *na kadācit* (cf. 14.33).

Several of the words for 'again' have such obvious semantic sources as 'another time, a second time', or 'anew'. But the most striking development is from the notion of 'back' or 'against', through 'back again, returning'.

1. Grk. *πάλιν*, in early use 'backwards', orig. acc. sg. of a **πάλις* 'turn' : *πόλος* 'pivot', etc. Walde-P. 1.515. Boisacq 743.

NG *ξανά*, fr. the freq. prefix *ξανα-*, orig. *ἐξ-ανα-* denoting repetition.

2. Lat. *iterum*, fr. **i-tero-*, pron. stem *i-* of *is* and suffix *-tero-* of contrasting relation (*dexter*, etc.). Walde-P. 1.100. Ernout-M. 499. Walde-H. 1.723 f.

Lat. *dēnuo* 'anew' and so freq. 'again', fr. *dē novō* (*novus* 'new'). Cf. Fr. *de nouveau*, and similar phrases elsewhere (not entered in the list except where the usual term, as Pol. *znowu*).

Lat. *rūrsus, rūrsum* 'backwards, in return' and often (Plautus+) 'again', fr. pass. pple. of *revertere* 'turn back'.

OFr. *oncore*, Fr. *encore* (> It. *ancora*), fr. *umquam hōra*. REW 4176, 9051.

Sp. *otra vez*, lit. 'another time', like Fr. *autrefois* 'formerly'.

Rum. *iar, iară*, etym.? REW 2886. Tiktin 748. Puşcariu 756.

3. Ir. *arithissi, arīs*, etym.? Macbain 292.

W. *eilwaith*, lit. 'a second time', fr. *eil-* 'second' and *gwaith* in cpds. like *teirgwaith* 'three times', etc. (13.44).

W. *drachefn*, 'backwards' and 'again', fr. *tra* 'beyond' and *cefn* 'back' (4.19). Morris Jones 410.

Br. *c'hoaz*, MBr. *hoaz* = Corn. *hweth* 'yet, again', etym. dub. Pedersen 1.379. Henry 170. Ernault, Dict. étym. 312.

4. Goth. *aftra* (reg. for *πάλιν*, but also 'backwards'), ON *aptr* ('backwards', late 'again'), Dan. *atter*, Sw. *åter*, OE *eft* (beside *aefter* 'after') : Goth. *aftarō* 'behind', Skt. *apataram* 'farther away', etc., derivs. of IE **apo* in Grk. *ἀπό*, Skt. *apa*, Lat. *ab*, etc. Walde-P. 1.49. Falk-Torp 36. Feist 12.

Dan., Sw. *igen* = ON *ī gegn* beside *gegn* 'against' = OHG *gegin* 'against', etc. Similarly OE *ongegn, ongeān* 'back, against', whence ME *aȝen*, NE *again* 'again', but locally also 'back' or 'against' (cf. U.S. rural *I'm agin it*). Falk-Torp 314. NED s.v. *again*.

Du. *weer*, OHG *widar*, MHG *wider*, also and orig. 'against', like OE *wiþer* : Goth. *wiþra* 'opposite, in the presence of', Skt. *vitaram* 'further', fr. **vi-* 'apart', in Skt. *vi-*, etc., with suffix *-tero-* in words of contrasting relations. NHG *wieder, wiederum*, with differentiated spelling for sense 'again' vs. *wider* 'against'. Walde-P. 1.312 f. Feist 570. Weigand-H. 1255.

NHG *nochmal(s)*, fr. *noch* 'still' and *mal* as in *dreimal* 'three times', etc. (13.44). Similarly *abermal(s)*, fr. *aber* in its sense of 'again'. Weigand-H. 1.6.

5. Lith. *vėl, vėlei* (Lett. *vēl* 'still') : *velti* 'to full' (orig. 'turn'), Lat. *volvere* 'turn around', etc. (10.13). 'Again' fr. 'turn' as Grk. *πάλιν* (above, 1). Walde-P. 1.303. Mühl.-Endz. 4.556.

Lett. *atkal* : Lith. *atkalas* 'turned around', this : *atsikalti* 'lean on'. Mühl.-Endz. 1.163. Trautmann 114.

6. ChSl. *paky* : *opako, opaky* 'backwards, behind', Pol. *opak* 'turned around, wrong way', Skt. *apāka-* 'far off', derivs. of **apo-* in Grk. *ἀπό*, Skt. *apa*, etc. Walde-P. 1.50. Brückner 380.

SCr. *opet*, Boh. *opět*, Pol. (obs.) *opięć*, Russ. *opjat'* = ChSl. *opętĭ* 'backwards' : Lith. *atpent, atpenč* 'back, in return, on the contrary' (cf. NSB), cpds. of words for 'heel', ChSl. *pęta*, Pol. *pięta*, Russ. *pjata*, OPruss. *pentis* (Lith. *pentis* now 'butt end of an ax'), and so orig. 'on the heels of'. Trautmann 214. Brückner 380, 412.

Boh. *zase* 'backwards' and 'again', fr. *za* 'behind' and refl. *se*, like Pol. *zaś* 'but', earlier *zasię*. Gebauer 1.206. Linde 6.887.

Pol. *znowu*, fr. *z* with old gen. sg. of *nowy* 'new', hence orig. 'anew', like Lat. *denuō*, etc., but now the reg. Pol. word for 'again'.

7. Skt. *punar* 'again' and 'back' : Grk. *πύματος* 'last', fr. **pu-* beside **po-* and **apo*. Walde-P. 1.48.

The majority of the words for 'day', certainly those of the large inherited group, denoted the bright 'day' vs. 'night', and only secondarily (like 'summers' or 'winters' for 'years') the comprehensive 24-hour 'day' (for which Dan., Sw. have distinctive forms).

1. Derivs. of IE **dei-* 'shine', rare in verbal forms (Skt. 3sg. imperf. *adīdet*, etc.), but widespread in words for 'sky, heaven' as Skt. nom. sg. *dyāus* and the personified Grk. *Ζεύς*, Lat. *Iūpiter, Iovis*; 'god' as Skt. *deva-*, Lat. *deus*, etc.; and 'day'. Walde-P. 1.772 ff. Ernout-M. 268 ff. Walde-H. 1.350. Here as 'day'.

a) IE **dyeu-, *diw-*, etc.

Lat. *diēs* (> It. *dì*, OFr. *di*, Sp. *dia*, Rum. *zi*); Ir. *dia, die*, W. *dydd*, Br. *deiz*; Skt. *diva-* (in *dive dive* 'day by day', otherwise *divasa-*); Arm. *tiw*. Br.	*noz*	NHG	*nacht*		

Most of the words for 'night' belong to an inherited group, pointing clearly to an IE word for 'night'. In Irish, except for an adv. relic, and in Indo-Iranian, except in Vedic and a classical Skt. adv. relic, the old word was displaced by others, but elsewhere has persisted as the usual word to the present day.

1. IE **nokt(i)-*. Walde-P. 2.337 ff. Ernout-M. 682. Sturtevant (connecting this group and that for 'naked', 4.99) JAOS 52.10, Hitt. Gram. 122 f.

Words for 'dawn' denote strictly the period just before sunrise, but some of them may be extended to cover 'sunrise' or even 'morning'. They are mostly, including the inherited group, connected with words meaning 'grow bright, shine, light', or 'white, gray, red', or in a few cases with the word for 'day'.

1. IE **ausos-*, etc., fr. a root seen in the vbl. forms Skt. *ucchati*, Av. *usaiti* 'it grows bright, shines (of the dawn)', Lith. *aušta*, Lett. *aust* 'it dawns', etc. Cf. also **aus-tero-* in words for 'east' (12.45). Walde-P. 1.26 f. Ernout-M. 93. Walde-H. 1.86. Pedersen 1.82.

Grk. Hom. *ἠώς*, Aeol. *αὔως*, Att. *ἕως*; Lat. *aurōra* (mostly poet., as also the lit. It., Sp. *aurora*, Fr. *aurore*, Rum. *auroră*); Ir. *fāir* ('sunrise'), W. *gwawr* (Br. *gwere-laouen* 'morning star'); Lith. *aušra*, Lett. *ausma* (new formation fr. *aust*, above); Skt. *uṣas-*, Av. *ušah-* (also Skt. *uṣ-, uṣa-*, Av. *uš-*, but secondary).

2. Grk. *ὄρθρος*, prob. 'dawn' fr. 'sunrise' : *ὀρθός* 'upright, straight', Skt. *vṛdh-* 'grow', ChSl. *rano* 'early in the morning', etc. (14.16). Walde-P. 1.289 f.

Grk. *αὐγή* 'light', esp. 'daylight', hence late (NT, pap.), NG 'dawn' : Alb. *agon* 'it dawns', *agim* 'dawn', ChSl. *jugŭ* 'south'. Walde-P. 1.25.

NG *χαράματα*, for *χαράγματα* pl. of *χάραγμα* 'incision, cut' : *χαράζω* 'cut, carve, engrave' (*χαράζει* 'it dawns'), prob. with reference to the sharp streaks of light on horizon. NG *χαραυγή*, a blend with *αὐγή*.

3. Lat. (beside poet. *aurōra*) often *prīma lūx*, lit. 'first light', esp. in abl. *prīmā lūce* 'at dawn'. Also *dīlūculum* : *dīlūcēscere* 'grow light, dawn', likewise fr. *lūx* 'light'.

It., Sp. *alba*, Fr. *aube* (Rum. *albă* rare in this sense), fr. fem. of Lat. *albus* 'white'. REW 331.

Rum. *zorĭ*, esp. pl. *zori*, fr. Slavic, cf. below, 7. Tiktin 1829.

Words for 'morning', though many of them orig. denoted the time of dawn or sunrise, are used more comprehensively to include all the early part of the day (up to noon, and even in this scope not ousted by new terms like NE *forenoon*, etc.). Several are connected with the advs. for 'early' (14.16), others with the old word for 'dawn' (14.43) or from notions applicable to the dawn or sunrise.

1. Grk. *ἕως* 'dawn' (14.43) sometimes extended to 'morning', for which there is no distinctive word in classical Greek.

Late Grk. *πρωΐα* (LXX, NT+), for *πρωΐα ὥρα* 'early time of day', fr. adj. *πρώϊος*, fr. adv. *πρωΐ* 'early' (14.16), NG 'in the morning' and sb. *τὸ πρωΐ* 'morning'.

2. Lat. *māne*, indecl. sb. 'morning'

and adv. 'in the morning, early' (14.16). Hence (through **maneana*) Sp. *mañana*. REW 5295.

Lat. *mātūtīnum* (Plin.) and *mātūtīna dies, tempora*, fr. adj. *mātūtīnus* 'of the morning, early' (cf. *mātūtīnē* adv., 14.16). Hence It. *mattino, mattina*, Fr. *matin*, Ir. *maten*, NIr. *maidin*. Ernout-M. 598. REW 5434. Vendryes, De hib. voc. 154.

Rum. *dimineaţă*, deriv. of late Lat. *dē-māne* (> Fr. *demain* 'tomorrow', etc.), fr. *māne* (above). REW 2348. Puşcariu 1083.

3. Ir. *maten*, NIr. *maidin*, above, 2.

W. *bore*, Br. *beure* : Ir. *imbārach* 'tomorrow', but etym.? Pedersen 1.99. Zimmer, KZ 30.17 f. Loth, RC 36.179 (vs. Morris Jones 163).

4. Goth. *maurgins*, ON *morginn*, OE *morgen*, etc., general Gmc. (ME *morwening*, NE *morning*, with addition of suffix *-ing*) prob. (as orig. denoting the morning twilight) : ChSl. *mrŭknąti*, *mrŭcati* 'become dark', Lith. *merkti* 'shut the eyes, wink', ChSl. *mrakŭ* 'darkness', beside Lith. *mirgėti* 'glimmer, twinkle', fr. a guttural extension of the root in Grk. *μαρμαίρω* 'flash, gleam', Skt. *marīci-* 'beam of light'. Walde-P. 2.274. Falk-Torp 731.. Feist 350.

5. Lith. *rytas*, Lett. *rīts* : Lett. *rietēt* 'come out, break forth' (sun, light, etc.), Goth. *urreisan*, ON *rīsa*, etc. 'rise'. 'Morning' fr. '(sun)rise'. Walde-P. 1.141. Mühl.-Endz. 3.541.

6. ChSl. *utro, jutro*, SCr. *jutro*, Boh. *jitro*, Russ. *utro* (Pol. *jutro* now adv. 'tomorrow'), prob. (despite the phonetic difficulty of *tr* fr. *str*, perhaps due to a blend) fr. **ustro* (cf. ChSl. *za ustra* = *za utra*), **ausro-* : Skt. *uṣas-*, Lith. *aušra*, etc. 'dawn' (14.43). Berneker 462 f. Meillet, Études 406. Brückner, KZ 46.212 ff.

Boh. *ráno*, Pol. *rano*, (*po*)*ranek* : ChSl. adv. *rano* 'early in the morning' (14.16).

7. Skt. *prātar*, adv. 'early', and 'in the morning' (14.16), more usual than sb. forms (*prātaḥ prātaḥ* 'every morning', *prātaḥkāla-* 'morning time', etc.).

Skt. *vastu-* (RV) 'early morning', lit. 'time of dawn', fr. *vas-* (3sg. *ucchati*) 'grow bright, shine (of dawn)', the same root as in the old word for 'dawn' (14.43). Cf. Zimmer, Altind. Leben 361.

Skt. *apiçarvara-* (RV) 'early morning', lit. '(bordering) on the (starry) night', fr. *çarvara-* 'gay, speckled', fem. 'starry night'. Cf. Zimmer, Altind. Leben 361 f. (with other terms used for various times of morning, as *saṁgava-* 'time for gathering the cattle for milking', *prapitva-* lit. 'pressing forward' (of the day), fr. *pī-* 'swell, become fat').

Av. *sūr-*, only in acc. sg. *sūrəm* as adv. : Skt. *çvas* 'tomorrow', Av. *savahī-* 'the east', with *n*-suffix Skt. *çoṇa-* 'red', etc. Walde-P. 1.368. Barth. 1631.

Most of the words for 'noon' are such as mean lit. 'mid-day', or in some cases 'half-day', rarely 'high-day'. A few orig. denoted the (principal, i.e. midday) 'meal'. Quite otherwise NE *noon* (see below, 5).

1. Combinations of words for 'middle' (12.37) and 'day' (14.41). Grk. μεσημβρία (: ἡμέρα with reg. μρ > μβρ), NG τὸ μεσημέρι (formed anew, with dim. type); Lat. *merīdiēs* (for *medīdiēs* by dissim.), It. *mezzogiorno, mezzodì*, Fr. *midi* (OFr. *di* 'day'), Sp. *mediodia*, Rum. *amiazi, amiaḍi* (Lat. *ad mediam diem*), *miezul zilei;* Ir. *medōn lāi* (*laithe*), NIr. *meadhon lae;* W. *canol dydd*, Br. *kreisteiz;* ON *miðr dagr* (also cpd. *miðdagr*), *miðdegi*, OE *middæg*, OHG *mittitag*, etc. (also two words as in ON, OE *midd dæg*, OHG *mitti, mitter tag*, MHG *mitter tac*); Lett. *dienasvidus* (lit. 'day's middle'); Skt. *madhyāhan-, madhyaṁdina-*.

2. Combinations of words for 'half' (13.24) and 'day'. W. *hanner dydd;* Lett. *pusdiena;* ChSl. *poludĭne*, etc., general Slavic.

3. ON *hādegi* (usual word in NIcel.), lit. 'high-day' (cf. also early NE *high-day* in this sense, NED s.v. 2).

4. NIr. *eadradh*, gen. *eadartha* (Dinneen, McKenna), fr. *eadar* 'between', but perh. blended with a form like Ir. *anteirt*, W. *anterth* 'forenoon', fr. Lat. *ante* (or *inter, intrā*) *tertiam* (*hōram*). Loth, Mots lat. 133.

5. ME *none*, NE *noon*, fr. Lat. *nōna* (sc. *hōra*) 'ninth hour' (about 3:00 P.M.), but since 14th cent. usually 'noon', owing to a change in the time of the eccl. office or a mealtime (cf. the shifts of time among terms for 'breakfast', 'lunch', and 'dinner', 5.42–5.44). NED s.v. Similarly, OFr. *none* (still dial. for 'mid-day meal'), Du. *noen* (now mostly obs.), and W. *nawn* (as 'noon' prob. semantic borrowing fr. English).

6. Lith. *pietūs*, also and orig. 'the mid-day meal, dinner' (5.44). Cf. Av. *pitu-* 'food', whence *arəm-piϑwā-, rapiϑwā-* 'noon', lit. 'suitable for food'. Barth. 189.

Apart from an inherited group, of obscure relations, words for 'evening' are most commonly connected with words for 'late', these in part orig. 'slow'.

1. IE *wespero- and *wekero-, parallel forms with first part prob. *wes- and *we- : Skt. *avas, ava* 'down' and OE *west*, etc. 'west' (12.46). Walde-P. 1.15, 311. Falk-Torp 1371 f.

Grk. ἑσπέρα (sc. ὥρα) fr. ἕσπερος 'of the evening', also as sb. 'evening' (Hom., etc.); Lat. *vesper* (> Ir. *fescor*, NIr. *feascar* now 'twilight'), and *vespera;* Lith. *vakaras*, Lett. *vakars*, ChSl. *večerŭ*, etc., general Slavic.

2. Grk. ὀψία (sc. ὥρα), fr. ὄψιος adj., ὀψέ 'late' adv. (14.17), cf. NG ἀπόψε 'this evening, tonight'.

NG pop. τὸ βράδυ, fr. Grk. βραδύς 'slow' (14.22), through 'late'.

3. It. *sera*, Rum. *seară*, fr. late Lat. *sēra* 'evening' (freq. in Peregrinatio); Fr. *soir*, fr. Lat. *sēro* (adv.); both fr. Lat. *sērus* 'late' (14.17). Ernout-M. 933. REW 7841.

Sp. *tarde*, fr. Lat. *tardē* 'slowly', fr. *tardus* 'slow'. REW 8573.

4. NIr. *trāthnōna*, properly the early evening (from three o'clock on, Dinneen), lit. 'time of the nones' (*nōin* 'nones, evening prayer'; *trāth*, 14.11).

W. *min nos*, lit. 'brink of night'.

W. *hwyr*, fr. Lat. *sērus* 'late' (cf. It. *sera*, above). Pedersen 1.208. Loth, Mots lat. 178.

For 14.47–14.49, cf. Brugmann, Zu den Wörtern für 'heute', 'gestern', 'morgen' in den idg. Sprachen, Ber. Sächs. Ges. 1917, No. 1.

The expressions for 'today' are all derived from the words for 'day' (14.41), but many of them are, unlike NE *today*, so disguised in form that there is no consciousness of the relationship. The combination with the pron. stem IE *ki-, seen in Lat. *cis, citra* 'on this side', Lith. *šis*, ChSl. *sĭ-* 'this' is common to Grk., Balto-Slavic, and a part of the Gmc. forms.

1. Grk. Ion. σήμερον, Dor. σάμερον (Att. τήμερον rare), NG pop. σήμερα, fr. *κιάμερον, fr. ἡμέρα 'day' and pron. stem *ki-, *ky-. Walde-P. 1.452 f. Boisacq 861.

Most of the expressions for 'tomorrow' are derived from words for 'morning' (14.44), the semantic development being 'in the morning' = 'on the following morning', whence with extension to the entire day 'tomorrow'.

1. Grk. αὔριον, fr. *αὔσριον : Lith. *aušra* 'dawn', etc. (14.43). Walde-P. 1.27. Schwyzer, Gr. Gram. 1.282.

2. Lat. *crās*, etym.? Ernout-M. 227 Walde-H. 1.285.

It. *domani*, Fr. *demain* fr. VLat. *dēmāne*, phrase cpd. of *māne* 'morning' (> Rum. *mîine* 'tomorrow'). REW 2548, 5294.

Sp. *mañana* = *mañana* 'morning'.

3. Ir. *imbārach*, NIr. *i mbāireach*, W. *yfory* : W. *bore* 'morning' (14.44). Pedersen 1.99.

Br. *arc'hoaz* (also *warc'hoaz*, cpd. with *war* 'on'), MBr. *arhoaz* (beside *an hoaz*), cpd. *ar-* 'on' and *hoaz* (Br. *c'hoaz*) 'again' (14.35). Henry 277. Ernault, Dict. étym. s.v. *an hoaz*.

4. Goth. *du maurgina*, ON *ā morgin*, Dan. *i morgen*, Sw. *i morgon* (but ON *i morgin* 'this (last) morning'; change of prep. in modern Scand. due to *ī dag* 'today', *ī gǣr* 'yesterday'?), OE *tō morgen* (also *on morgen*), ME *to morwen, to morwe*, NE *tomorrow*, OHG *in morgan*, phrases with prepositions 'to, in, on' and 'morning', beside adv. dat. in OHG *morgane*, MHG *morgen(e)*, NHG, Du. *morgen*. Weigand-H. 2.219. Franck–v. W. 422 f. NED s.v. *tomorrow*.

Goth. *gistradagis* (adv. gen.) : OE *geostra-dæg*, etc. 'yesterday' (14.49), renders αὔριον Mt. 6.30, with puzzling shift of meaning if not merely a blunder in translating. Cf. Brugmann, op. cit. p. 15.

5. Lith. *ryto(j)*, Lett. *rīt, rītu, rītā*, orig. 'in the morning', fr. Lith. *rytas*, Lett. *rīts* 'morning'.

6. ChSl. *utrě* loc. sing. (renders reg. αὔριον in Gospels), also phrase *za utra* (but in Gospels only 'early in the morning, πρωΐ'), similarly SCr. *sjutra*, Boh. *zejtra*, Russ. *zavtra*, but Pol. simply *jutro* (acc. as. adv.), all fr. ChSl. *utro*, etc. 'morning'. Berneker 462.

7. Skt. *çvas* : Av. *sūr-* 'morning'. Walde-P. 1.368. Walde-H. 1.285. Brugmann, op. cit., p. 17.

Most of the words for 'yesterday' belong to an inherited group, pointing clearly to an IE adv. of this meaning. The others (the Balto-Slavic, and pop. NG) meant orig. 'in the evening' or 'late', whence 'in the past evening', and with extension to the entire day 'yesterday'. Cf. the parallel but forward shift in the history of words for 'tomorrow' (14.48).

1. IE *ĝhes, etc. (variant init. combinations). Walde-P. 1.664. Ernout-M. 449. Walde-H. 1.642 f. Falk-Torp 292.

Grk. χθές, and ἐχθές, adj. χθιζός, χθεσινός; Lat. *herī*, later *herĭ* (> Romance words), adj. *hesternus;* Ir. *indhē*, NIr. *indē, inē*, W. *doe*, Br. *dec'h* (cf. The Greeks borrowed the division of the day into hours from the Babylonians (cf. Hdt. 2.109). However, the hour of the Babylonians was actually a double hour, i.e., $\frac{1}{12}$ the entire day, whereas the Greeks divided only the period of light (day vs. night) into twelve parts. This system was adopted likewise by the Romans. Much later the night was divided in similar fashion. Consequently, the period of time covered by an hour was variable according to the length of the day, depending upon the seasons. This state of affairs lasted well up into the Middle Ages. Cf. Schrader, Reallex. s.v. *stunde;* Kubitschek, Grd. d. antik. Zeitrechnung 178.

The 'hour' was designated by words which were originally, and often continued to be, used as more general terms for 'time' or for various periods of time. But Grk. ὥρα, through Lat. *hōra*, in its specialized sense, eventually spread over western Europe, either as 'hour' or as 'clock' (14.53).

1. Grk. ὥρα, 'period of time, season', etc. (14.11), specialized to 'hour'. Hence Lat. *hōra*, whence It. *ora*, Sp. *hora*, (Rum. *oara* only dial. 'hour', or pl. *ori* in phrases for 'what time' or 'so many times'), Fr. *heure*, OFr. *(h)ure, (h)ore* > ME *(h)ure, (h)oure*, NE *hour;* also Ir. *ōr, ūar*, NIr. *uair*, W. *awr*, Br. *eur*, Du. *uur*, MDu., MLG *ūre* > MHG *ūr(e)*, NHG *uhr*. REW 4176. Loth, Mots lat. 135.

2. Rum. *ceas* fr. Slavic, cf. ChSl. *časŭ*, below 5.

3. Goth. *hweila* 'period of time' (14.11), but most commonly 'hour'.

ON *tīð*, OE *tīd*, ME *tide*, OHG, MHG *zīt*, general words for 'time' also (14.11).

ON *stund* (sometimes 'hour'), NHG *stunde* (as 'hour' since 15th cent.), orig. 'period of time' (14.11).

Dan. *time*, Sw. *timme* fr. ON *tīmi* 'time' (often also 'period of time, fixed time', but NIcel. also 'hour'), see 14.11.

4. Lith. *valanda*, formerly 'a period of time, a while' (Kurschat), but now the standard word for 'hour' (cf. NSB. sv. *adyna*) : Lat. *volvendus* 'rolling on' (of years, months), *volvere* 'turn, roll', ChSl. *valiti* 'roll', etc. Semantic development through the notion of 'time' as a turning cycle (cf. Slavic *vrěmę*, 14.11). Walde-P. 1.303.

Lith. *adyna* (formerly the usual word), beside *gadynė* 'age, epoch, period', fr. WhRuss. *hodzína* 'hour, time', cf. ChSl. *godina*, etc. (below). Brückner, Sl. Fremdwörter 83.

Lett. *stunda* (also Lith. *stundas*, Kurschat, etc.), fr. MLG *stunde* 'hour'. Mühl.-Endz. 3.1106 f.

5. ChSl. *godina* (reg. rendering of ὥρα in this sense in Gospels), Boh. *hodina*, Pol. *godzina*, fr. ChSl. *godŭ* period of 'time' (14.11). Berneker 316 ff.

ChSl. *časŭ* (renders ὥρα, but in Gospels only in sense 'period of time'), Russ. *čas* : Boh. *čas*, Pol. *czas* general 'time' (14.11).

SCr. *sāt* and *sahat* 'hour' and 'clock', fr. Turk. *sāāt* id.

SCr. *ura* likewise 'hour' and 'clock', fr. NHG *uhr*.

6. The Sanskrit division of the day does not, of course, agree with the European, and the systems of division mentioned by the Hindus themselves vary according to period and type of literature. The later division consists of the *ghaṭaka-* (*ghaṭikă-, ghaṭa-*, etc.), *pala-*, *vipala-, prativipala-*, the relation being 60 *ghaṭikas* to the day, 60 *palas* to the *ghaṭaka*, etc. (cf. Sewell-Dīksit, Indian Calendar, p. 2). The first term is prob. identical with *ghaṭa-, ghaṭakă-* 'jar, pitcher' through use as a measure. The origin of *pala-*, used also of a certain weight (4 *karṣas*) and a liquid measure

(cf. BR), is doubtful (: *pālavī-* 'sort of dish', Lat. *pēlvis* 'basin', etc.? Walde-P. 2.56).

For other systems (e.g. 30 *muhūrtas* in the day; *muhūrta-* 'moment, instance' : *muhur-* 'suddenly', Uhlenbeck 228), cf. Macdonell-Keith 1.49 f.; Zimmer, Altind. Leben 363 f.; Thibaut, Grd. d. indo-ar. Phil. 3.926 f.

14.52. Words for 'minute' and 'second'. These are so largely common Eur. words with slight variation that the lists are omitted.

There was no definite division of time within the hour among the Greeks and Romans. The Eur. terms for 'minute' and 'second' arise from the (medieval) application of the sexagesimal system (ὁ τῆς ἑξηκοντάδος τρόπος Ptolemy, 2d cent. A.D.) to time division.

1. MLat. *pars minūta prīma* is the smallest part of the first order of a whole, according to the sexagesimal system, the next division being the *pars minūta secunda*. Hence, either fr. the abbreviated *minūta, secunda*, or fr. the neut. forms *minūtum, secundum* (so It., Sp., Port.), or by semantic borrowing, nearly all the Eur. terms. NED s.v. *minute, second*. Kluge-G. 392.

2. NG λεπτό, 'minute', fr. λεπτός 'fine, thin, minute', a modern translation of Fr. *minute;* hence δευτερόλεπτο 'second'.

3. NIr. *nōimeat, neomat* 'minute', also *noimeint*, prob. by dissim. fr. *mōimeint, mōimēid*, etc., loanword fr. Lat. *mōmentum* 'brief space of time, moment'. Vendryes, De hib. voc. 157. Pedersen 1.234 Anm. 3.

W. *eiliad*, 'second', fr. *ail* (ordinal) 'second' (as pref. *eil-*). Semantic borrowing fr. English (or Romance).

4. Boh. *vteřina* 'second' : Pol. *wtory* 'other, second', ChSl. *vŭtorŭ* 'second'. Semantic borrowing fr. the general Eur. term.

5. For Sanskrit division of time, see under 'hour' (14.51).

In early Greece there was no general term to designate the different devices for timekeeping. The earliest was, of course, the sundial, the πόλος and γνώμων, the concave dial and the pointer, also called later σκιοθήρας, σκιόθηρον 'shadow-catcher'. The usual name among the Romans was *sōlārium* (: *sōl* 'sun'). The next common device among the ancients for measuring time (but not for telling the time of day) was the water-clock, the Grk. κλεψύδρα (lit. 'water-stealer', orig. applied to a sort of 'pipette'), or ὑδροσκοπεῖον (σκοπέω 'look

at'). The first term was borrowed by the Romans (Lat. *clepsydra*), but the name of the sundial, *sōlārium*, was extended to cover this instrument as well (cf. *cum solarium aut descriptum aut ex aqua contemplere*, Cic. Nat. deor. 2.34, 87). Cf. Pauly-Wissowa s.v. *horologium*. Kubitschek, Grd. d. antik. Zeitrechnung 188 ff., 203 ff.

Most of the words listed cover alike the different types of clocks and the watch. But some are, and others were once, restricted to certain types, as the clock in a tower, the clock with a pendulum, and esp. the pocket 'watch'. Those that are only or mostly 'watch' are separated in the list by a semicolon, but no notice is taken of cases like NHG *taschenuhr*, little used except for purposes of definition.

The commonest relation is to words for 'hour' (14.51), but there are other diverse sources.

1. Grk. ὡρολόγιον (late; used both of the sundial ὡρολόγιον σκιοθηρικόν and of the water-clock ὡρολόγιον ὑδραυλικόν), NG pop. ρολόϊ, fr. ὥρα 'hour, time' and -λόγιον : -λόγος 'telling', λέγω 'tell'. Hence Lat. *hōrologium* (> It. *orologio*, Fr. *horloge;* Prov., Cat. *rel(l)otge* > Sp. *reloj;* Rum. *orologiu* modern lit. word). REW 4183.

2. It. *oriolo* fr. VLat. *hōrāriolum, deriv. of the late *hōrārium* 'dial, clock' (: *hōra* 'hour'). REW 4177a.

It. *pendolo*, Fr. *pendule* (> Du. *pendule*), properly 'pendulum', but by extension esp. a clock of which the movement is regulated by means of the pendulum.

Fr. *montre*, back-formation fr. *montrer* 'show', used for 'a showing', hence also 'face of a clock' (obs.) and later 'watch'.

Rum. *ceas, ceasornic*, formerly the general word for 'timepiece', but now (since the introduction of *orologiu* for 'clock') 'watch', fr. Slavic, cf. ORuss. *časovĭnikŭ*, deriv. of *casŭ* 'time'. Tiktin 329. Dicț. enc. s.v.

3. Ir. *uairle* ('clock'? NIr. *uairleān* 'sun-dial', Dinneen), prob. fr. Lat. *horologium*, Loth, RC 32.305.

NIr. *clog*, fr. Ir. *cloc(c)* 'bell' = W. *cloch* 'bell' : Grk. κλαγγή 'noise, clamor', Lat. *clangere* 'sound, cry', etc. From the Celtic, through MLat. *cloc(c)a* 'bell', come MLG *klocke* 'bell, striking clock' (> Dan. *klokke* 'bell', dial. 'clock', Sw. *klocka* 'clock, bell'), Du. *klok* (> ME *clocke*, NE *clock* > W. *cloc*), but OE *clucge*, OHG *glocka*, NHG *glocke* 'bell'. Walde-P. 1.496. Falk-Torp 535. Walde-H. 1.227. NED s.v. *clock*, sb.[1].

NIr. *uaireadōir* 'watch', deriv. of *uair* 'hour'. Vendryes, De hib. voc. 184.

W. *awrlais*, older *orlais* and *orlayds*, fr. ME *orloge* (with pop. transformation as cpd. of *awr* 'hour' and *llais* 'voice, sound'?). Parry-Williams 212 f.

Br. *horolaj*, fr. Fr. *horloge*.

4. OE *dægmǣl* (reg. gl. to *horologium*), cpd. of *dæg* 'day' and *mǣl* 'measure, mark'.

ME *clocke*, etc., above, 3.

ME *orloge*, MDu. *orloghe, orloy*, Du. *horloge* (now mostly 'watch'), MHG *ōr(o)lei* fr. OFr. *orloge* (Du. *horloge* with *h* fr. Fr. *horloge*, cf. Franck–v. W. 263).

ME *wecche* 'alarm' of a clock, NE *watch*, used since 16th cent. for pocket timepiece, same word as *watch* 'vigil', etc., fr. OE *wæcce* : vb. *wæccan* 'watch'. NED s.v. *watch*, sb. 21.

MLG *ūr(e)* 'hour' and also 'clock', whence MHG *ūr(e)* in both senses, NHG *uhr*, Dan., Sw. *ur* 'clock'. Weigand-H. 2.1105. Falk-Torp 1335.

MHG *seigære* 'clock', esp. 'tower-clock' (NHG *seiger* 'hourglass', but still 'clock' in some regions), also 'weight', esp. the weight controlling the move-

ment of a tower-clock, fr. MHG *sīgen*, OHG *sīgan* 'sink, drip down'. Weigand-H. 2.837 f. Grimm s.v.

5. Lith. *laikrodis*, cpd. of *laikas* 'time' (14.11) and *rodyti* 'show'. A new formation to replace older *ziegorius* fr. Pol. *zegar*, fr. MHG *seigære* (above, 4). Fraenkel, Z. sl. Ph. 6.88.

Lett. *pulksten(i)s*, also 'bell' and 'pulse', fr. LG *puls* 'stroke of bell, pulse' (+ a form of *sist* 'strike'?). Mühl-Endz. 3.408.

6. SCr. *sāt* (also 'hour'), fr. Turk. *sāāt* 'hour, clock' (14.51).

SCr. *ura* (also 'hour'), prob. fr. NHG *uhr*.

Boh. *hodiny*, pl. of *hodina* 'hour'.

Pol. *zegar*, fr. MHG *seigære* (above, 4). Brückner 651.

Russ. *časy*, pl. of *čas* 'hour'.

7. Skt. *chāyā-yantra-* 'sun-dial' and *ambu-yantra* 'water-clock', cpds. of *chāyā-* 'shadow' and *ambu-* 'water' with *yantra-* 'instrument, machine'.

On the much-discussed origin of the week and the names of the week days, cf. esp. the articles in Z. deutsch. Wortf. 1.150 ff.; F. H. Colson, The Week; Schrader, Reallex. 2.662 ff.; J. Melich, Die Namen der Wochentage im Slavischen, Jagić Festschrift 212 ff.

If any division of time intermediate between the month and the day was recognized in the IE period, it was no doubt the most obvious one according to the phases of the moon. The Hindus divided the month into two halves (*pakṣa-* 'wing'), that of the crescent moon (*pūrva-* 'earlier' or *çukla-* 'light') and the waning moon (*apara-* 'later' or *kṛṣṇa-* 'black'). Cf. Thibaut, Grd. d. indo-ar. Phil. 3.9.12. For the Celts the Calendar of Coligny attests an old division of the month into halves (Thurneysen, Z. deutsch. Wortf. 1.191). The times of new moon and full moon were the occasion of folk-assemblies among the Germans (Tacitus, Germ. ch. 1) and of religious festivals among the Greeks.

The regular Greek division of the month was into three decades. The Romans had their market-day, *nūndinae* (cpd. of *novem* 'nine' and old word for 'day'), held every ninth day, the intervening period (really eight days if reckoned from a given point of the first to the ninth) being *nūndinum*.

The seven-day week was unknown in Europe until its importation from the East. Whatever its ultimate source and explanation, the seven-day week is definitely known as an ancient Jewish institution. Hence first the Jewish week and, somewhat later, with an admixture of oriental astrology, the planetary week became known to the Greeks and Ro-

mans. It spread to the rest of Europe, probably to some extent before but mostly with the spread of Christianity.

The adopted 'week' was expressed by coll. derivs. of the numeral for seven, by words for 'Saturday' (or later 'Sunday') extended to cover 'week' like the Hebrew Sabbath; as 'eight nights' or 'eight days'; in Gmc. by a native word denoting 'change, alternation' and perhaps previously employed for some other division of time.

1. Grk. *ἑβδομάς, -άδος* (NG *ἑβδομάδα*), coll. numeral used for a period of seven days, seven years, etc., hence also for the Jewish 'week' (LXX+; not in NT, where *σάββατον*).

Grk. *σάββατον*, like its Hebrew original, was used not only for the Sabbath but also for the week. So in NT *δὶς τοῦ σαββάτου* 'twice in the week' (Lk. 18.12), *πρώτη σαββάτου* or *μία σαββάτων* 'first day of the week', etc. Hence the partial coincidence of 'Sunday' and 'week' in Slavic (below, 7).

2. Lat. *hebdomas*, fr. Grk. *ἑβδομάς* and first used in the earlier sense of the latter, then for the fixed 'week'.

Lat. *septimāna*, fem. of adj. *septimānus* 'belonging to the number seven', translating the Grk. *ἑβδομάς* and much more common than *hebdomas* in eccl. writings (e.g. in the Peregrinatio about 27:3). Hence the Romance words (REW 7834), also (but influenced by the native word for 'seven'; Pedersen 1.236, Thurneysen, Z. deutsch. Wortf. 1.191) Ir. *sechtman*, NIr. *seachtmhain*, OCorn. *seithum*, Br. *sizun*.

3. W. *wythnos*, lit. 'eight nights', like *pymthegnos, pythefnos* lit. 'fifteen nights' = 'fortnight'. Cf. Fr. *d'aujourd'hui en huit*, NHG *über acht tagen* 'a week hence' (similar phrases for 'a week ago'), Fr. *quinze jours* 'a fortnight', etc. The week, of course, generally (e.g. from Sunday noon to Sunday noon) covers parts of eight different days.

4. ON *vika*, OE *wice*, etc., general Gmc. (but Goth. *wikō* only in Lk. 1.8 *in wikōn* 'in the course of'; cf. also ON *vika* 'sea-mile' orig. 'change of oar', MLG *weke ses* 'sea-mile') : ON *vīkja, vīkva* 'move, turn, veer, give way', OE *wīcan*, OHG *wīhhan* 'yield, give way', etc. Walde-P. 1.235. Falk-Torp 1326. Meaning primarily 'change, alternation', the word may once have denoted some earlier time division, such as the 'change of moon, half-month' (cf. Schrader, Reallex. 2.665), but there is no positive evidence of this. Walde-P. 1.235. Falk-Torp 1326. NED s.v. *week*.

Goth. *sabbatō* fr. Grk. *σάββατον* and likewise 'Sabbath' and 'week'.

5. Lith. *savaitė* (neolog. to replace the loanword *nedėlia*) based on OPruss. *sawayte* (cf. also *possi-sawaite* 'Wednesday' : *possi-* 'half'), this through Pol. *sobota*, fr. Grk. *σάββατον* 'Sabbath' and 'week' (above, 1). Trautmann, Altpreuss. 420. Fraenkel, Z. sl. Ph. 6.86.

Lith. *nedėlia, nedėlė*, Lett. *nedēl'a*, fr. Slavic (below). Mühl.-Endz. 2.710.

6. ChSl. *sobota, sąbota*, fr. Grk. *σάββατον* and likewise used in Gospels for 'Sabbath' and 'week' (latter e.g. Lk. 18.12).

ChSl. *nedělja*, SCr. *nedjelja*, Boh. *neděle*, Russ. *nedelja*, cpd. of neg. *ne-* and *dělo* 'work', orig. 'day of rest', 'Sabbath' then 'Sunday', but like Grk. *σάββατον* (above, 1) also 'week'. Russ. *nedelja* now only 'week', as likewise the Baltic loanwords (above). Berneker 194.

ChSl., SCr. *sedmica*, fr. ChSl. *sedmĭ* 'seven', lit. translation of Grk. *ἑβδομάς*.

SCr. *tjedan*, Boh. *týden*, Pol. *tydzień*, cpds. of pron. stem *to-* and word for 'day', lit. 'this day', with reference to the same day (cf. NE *this day week*). Berneker 253.

14.52–14.58. Two systems are represented in the Eur. names of the days of the week: (1) the ecclesiastical or, as it is also called, the Jewish-Christian, being based on the Jewish and adopted by the Christian church, and (2) the planetary, based on astrology, though its more precise origin and the explanation of the peculiar order of the planet names is uncertain. In general, the ecclesiastical system prevailed in eastern Europe, the planetary, in part with some substitutions, in western Europe, except in Portuguese (wholly ecclesiastical) and Irish (only three planetary names).

Thus the complete set of Roman planetary names, reduced to five in the Romance languages, is preserved in Breton and Welsh and in its Germanic form in English. The greatest mixture is in Irish, where there are three planetary names and four ecclesiastical, one of these old, the others special Irish terms. Cf. the references in 14.51.

1. Ecclesiastical system. The Jews named only one day of the week, namely, the last, the Sabbath, Grk. *σάββατον*. The other days were merely numbered. Since the Sabbath was the distinctive sign of the week, it came to be used also in the sense 'week' (cf. 14.51). Hence in the New Testament *μία σαββάτων* (Mt. 28.1, etc.), *ἡ μία τῶν σαββάτων* (Mk. 16.2, etc.), also *πρώτη σαββάτου* (Mk. 16.9),

'first of the week' = 'Sunday'; likewise in later Christian writings *δευτέρα σαββάτου* 'Monday', *τρίτη σαββάτου* 'Tuesday', *τετάρτη σαββάτου* 'Wednesday', *πέμπτη τοῦ σαββάτου* 'Thursday'. The day before the Sabbath was called *παρασκευή* 'preparation' (Mt. 27.62, etc.). For *πρώτη σαββάτου*, was early substituted *κυριακή* (*ἡμέρα*) 'Lord's day' (Rev. 1.10). The others remained without change (except for dropping of *σαββάτου*) until the present time in Greek.

These served as a model for the Christian Lat. terms, *diēs dominica*, or *diēs dominicus* (earlier *ūna sabbatī* after *μία σαββάτου*, also *diēs prīma*), *secunda sabbatī, tertia sabbatī*, etc. Thereafter comes the Lat. *fēria* (late sg. to *fēriae* 'festival, holidays') in place of the Jewish word *sabbatum*, which was retained only for 'Saturday'. So in the Peregrinatio regularly *sabbatum* 'Saturday', *diēs dominica* 'Sunday', *secunda fēria* 'Monday', etc., the full series being represented. Cf. also Isidor, Etym. 5.30, 9 : *Secunda sabbati secunda feria quem saeculares diem Lunae vocant. Tertia sabbati*, etc.

Of the Romance languages, Port. preserves all the eccl. terms (*domingo, segunda feira*, etc., see list), while It., Fr., Sp., and Rum. retain only (*diēs*) *dominica* and *sabbatum*.

In Ir. (and Gaelic) four of the weekday names are eccl., only one of these, however, reflecting the Lat. name. Ir. *domnach*, NIr. *domhnach* (adv. *dia domhnaigh*) 'Sunday', fr. Lat. *dominicus;* Ir. *cēt-āin*, NIr. *cēadaoin* (adv. *dia cēadaoin*) 'first fast, Wednesday'; Ir. *dardāin* (for *etar da āin*), NIr. *dardaoin* (adv. *diardaoin*) 'between the two fasts, Thursday'; Ir. *ōin dīdin* 'last fast' (NIr. simply *aoine* 'fast', adv. *dia h-aoine*) 'Friday'. Cf. Thurneysen, Z. deutsch. Wortf. 1.190.

In Germanic the eccl. names prevailed in Goth., and there are a few in West and North Gmc. amid the usual planetary names. Goth. *sabbatō* (mostly uninflected but also with *u-* and *i*-stem forms) with and without *dags* = Grk. *σάββατον* or *ἡμέρα σαββάτων* (but independently of the Grk. variation), *þis dagis afarsabbatē* = *τῆς μιᾶς σαββάτων* (Mk. 16.2), *frumin sabbatō* = *πρώτῃ σαββάτου* (Mk. 16.9), *fruma sabbatō* = *προσάββατον* (Mk. 15.42), beside the borrowed *paraskaiwē* = *παρασκευή* (Mt. 27.62, Mk. 15.42).

ON *drōttinsdagr* 'Sunday' (beside *sunnudagr*) translates Lat. *diēs dominica.* OHG *sambaz-tag* comes from a variant form of Grk. *σάββατον* (cf. below). OHG *mittwocha* (*mittawecha*, etc.), NHG *mittwoch* may reflect a MLat. *media hebdomas*, cf. It. dial. *mezzedima*. MHG *pfinztac*, through a Goth. **paintēdags*, fr. Grk. *πέμπτη ἡμέρα* (Kluge-G. 110).

In Slavic the few names that occur in the ChSl. Gospels are directly after the Greek. Thus *sobota* (so reg. cod. Mar.), *sąbota* (Zogr., Supr., etc.) = *σάββατον*, *prŭva sobota* or *jedina sobota* = *πρώτη σαββάτου, μία* (*τῶν*) *σαββάτων, paraskevĭg'i, kŭ sobatě* = *παρασκευή, προσάββατον* (Mk. 15.42). The usual Slavic names apart from *sobota*, which in one form or another is general Slavic, are represented by later ChSl. *nedělja* 'Sunday' (neg. cpd. of *dělo* 'work', hence as 'rest-day', translating the Hebrew-Grk. word for Saturday, with Christian shift to Sunday), *ponedělŭkŭ, ponedělĭnikŭ* 'Monday' (cpd. of *nedělja* with *po-* 'after'; cf. Goth. *afar-sabbatē*, but also Grk. *προσάββατον* as possible models), *vŭtornikŭ* (Supr.) 'Tuesday' (lit. 'second'), and the others in numeral series (see list), but *srěda* 'Wednesday' (lit. 'middle', 12.37; cf. OHG *mittwocha*, above). There is some probability that this system is based upon a Gothic medium. Cf. Stender-Petersen 435 ff.

The older Lith. names, *nedėlia, panedėlis*, etc. (entered in list in parentheses), which are still generally used among the immigrants in U.S. (Senn), are direct loanwords from Slavic. The new names were formed from native words according to the numeral system, as *pirmadienis* 'first day, Monday', etc. (see list) and were introduced in the standard language in imitation of the Lett. terms, which already followed the numeral system except for *svētdiena* 'holy day, Sunday'. Fraenkel, Z. sl. Ph. 6.86. Senn, The Lithuanian Language 43.

Beside Grk. *σάββατον* there must have been a colloq. form *σάμβατον*, with an intrusive nasal which is paralleled in some other words and in this case attested in deriv. forms like *σαμβαθικός* and *Σαμβάτιος* beside *σαββατικός* and *Σαββάτιος*. Cf. G. Meyer, IF 4.326 ff., W. Schulze, KZ 33.366 ff. Such a form is reflected in ChSl. *sąbota* (beside *sobota*), SCr. *subota*, Russ. *subbota*, and, through Slavic, Rum. *sîmbătă*, Hung. *szombat;* OHG *sambaztag*, MHG *sameztac*, NHG *samstag;* Fr. *samedi*.

2. Planetary system. Greek planetary names, *ἡμέρα Ἡλίου*, etc. (see list), are attested for the early centuries of our era, but their use was apparently restricted to certain circles; at any rate they never became popular. In Rome, on the other hand, the planetary names became the established popular terms, too strongly intrenched to be displaced by the eccl. names, and spreading through most of western Europe. They remain in the Romance languages, except Port., with the substitution of the church name for Sunday and Saturday They are preserved intact by the British Celts, that is in W., Br., and Corn. (Corn. *de sil, de lun*, etc., Williams 88), but furnish only three of the Ir. names, namely *luan* 'Monday', *māirt* 'Tuesday', *satharn* 'Saturday'.

The Latin planetary names were also adopted by the Gmc. peoples (except the Goths in the East), only put into Gmc. form—a simple procedure in the case of *diēs Sōlis* and *diēs Lūnae*, but for the next four involving a somewhat less obvious identification of Roman and Germanic gods. For Saturday the Lat. *Saturnus* was retained, at least in Anglo-Frisian and Low German (OE *sæter(n)dæg*, OFris. *saterdei*, Du. *zaterdag*). Scandinavian shows a native substitution, ON *laugardagr*, Dan. *lørdag*, Sw. *lördag*, lit. 'bathday' (: ON *laug* 'bath'), also ON *þvāttdagr* 'washday' (: ON *þvāttr* 'washing'), both referring to the same custom (Falk-Torp 682). High German has the eccl. name, OHG *sambaztag*, NHG *samstag* (cf. above), beside the new term OHG *sunnūnāband*, NHG *sonnabend*, which orig. applied only to the eve preceding Sunday. The planetary name for Wednesday is lacking in High German, where OHG *mittwocha*, NHG *mittwoch* is prob. of eccl. origin (cf. above). MHG *erintac, ertac* (Bavar. *ertag*) may represent a Goth. **areinsdags*, fr. Grk. *Ἄρεως ἡμέρα* (Kluge-G. 105).

NIcel. is peculiar among the Gmc. languages in retaining only two of the planetary names, *sunnudagur* and *mānudagur*, and in having two numeral names, *þriðjudagur* for Tuesday and *fimtudagur* for Thursday. Wednesday is *miðvikudagur* like NHG *mittwoch*, Saturday is *laugardagur* 'washday' as in the other Scandinavian languages, and Friday is *föstudagur* 'fastday'.

IE **mēnes-*, **mē(n)s-* 'moon' and 'month', prob. fr. **mē-* 'measure'. Walde-P. 2.271 f. Ernout-M. 607 f. Walde-H. 2.71.

While the words of this group have in many languages been replaced by others in the sense of 'moon', they have persisted nearly everywhere as the words for 'month'. In Gmc. a separate set of related forms distinguishes 'month' fr. 'moon', as Goth. *mēnōþs* vs. *mēna* 'moon', OE *mōnað* vs. *mōna* 'moon', etc. There is a similar but incomplete differentiation in Lith., where *mėnulis* is only 'moon' and *mėnesis* mostly 'month', but *mėnuo* in both senses. See also 1.53.

The only word in the list which does not belong to the group above is Rum. *lună*, fr. Lat. *lūna* 'moon', in which the identification of 'moon' and 'month' is repeated, doubtless owing to the identity in Slavic (ChSl. *měsęcĭ*, etc.).

14.72. Names of the months. Previous to the widespread, though still incomplete, Eur. adoption of the Lat. names, there was the utmost diversity. In ancient Greece alone there were dozens of different local calendars (cf. Pauly-Wissowa 10.1575 ff.). There was no agreement between the old Gmc. names (even the OHG lists vary somewhat), nor between Indic and Iranian, not even between the Av. and OPers. names. Neither the modern Lith. literary names, a recent coinage (Senn, Sprachl. 168), nor the diverse older and dialectic forms (Hermann, Gött. Nachr. 1929.97) agree with the older, now obs., Lett. names. Among the native Slavic names, which are still current except in Russ., there are a few cases of agreement between Boh. and Pol., and a few others of common words applied to different months (e.g. *listopad*, lit. 'leaf-falling', in SCr. 'October', Boh., Pol. 'November'; Boh. *květen* 'May' = Pol. *kwiecień* 'April', orig. 'flower-month'), but, on the whole, great diversity.

In general, the month-names are based upon religious festivals (so most of the Grk. and some of the Celtic and Gmc.) or upon some characteristic feature of the weather, vegetation, harvest, etc.

The enumeration and discussion of these so diverse month-names (even if one chose for the Greek only the Attic or for OHG only those prescribed by Charlemagne) would require so much space that it seems best here to consider only the Lat. names and their spread.

The Lat. names were adj. forms with *mēnsis* 'month' understood. Since the Roman year orig. began with March, the numeral derivs. which served for July–December, were *Quinctīlis* 'fifth' for July, *Sextīlis* 'sixth' for August (these later replaced by *Iūlius* and *Augustus* in honor of Julius Caesar and Augustus),

September, Octōber, November, December (fr. **septemri-s, novem-ri-s, *decem-ri-s*, with reg. change of medial *mr* to *mbr*, hence by analogy also **octō-bri-s*).

Of the names of the first six months (in the new order beginning with January), four are obviously derived from the names of gods or goddesses, namely *Ianus, Mars, Maia*, and *Iūnō*. *Februārius*, the last month of the old calendar, was the 'month of purification', fr. *februāre* 'cleanse, purify' (Ernout-M. 341. Walde-H. 1.472). *Aprīlis*, prob. fr. an Etruscan name based on a short form of Grk. *Ἀφροδίτη*. Benveniste BSL 32.70 ff. Cortsen, Glotta 27.270 ff.

The Roman names have persisted in all the Romance languages. But most of the Rum. forms go back, partly through Slavic, to the later Grk. borrowed forms. And elsewhere there are various formal peculiarities, e.g. for *iānuārius* VLat. *ienuārius* (> It. *gennaio*, Sp. *enero*); for *augustus* VLat. *agustus* (> It., Sp. *agosto*, Fr. *août*); OFr. *juignet* 'June' fr. dim. form, and, by analogy to this, Fr. *juillet* 'July' for OFr. *juil*, etc.

The Romance names appear in Greece in authors and papyri of the early Roman period and eventually prevailed. Hence the NG lit. *ἰανουάριος, φεβρουάριος*, etc., beside pop. *γενάρης, φλεβάρης*, etc.

In Celtic, all the Old Irish names were of Lat. origin. In modern Irish those for January, February, March, April, July, and in part June, persist, while the others have been replaced, in part already in Middle Irish, by native terms. In Welsh and Breton the Lat. names are retained for January, February, March, April, May, and August, the others having native names.

The whole Lat. series is used in all the living Gmc. languages, likewise in Lett. (the older native names being obs.; cf. Mühl.-Endz. 2.616) and Russ.

There are three groups of cognates, each of which is represented by words for 'year' in at least two widely separated branches of the IE family. It is the first of these (in the order below) that has the best claim to reflect a distinctive IE word for 'year'. The second is more widespread as a formal group, but with various uses suggesting that in the IE period it was more generic, 'passing time, period of time', whence later specialization to 'year', 'season', 'spring', or 'hour'.

Most of the other words for 'year' are also cognate with words for 'time' or 'fixed period of time', including terms for various seasons of the year and for 'day' or 'hour'.

1. IE **wet-*, **wetes-*. Walde-P. 1.251. Grk. *ἔτος*, fr. widely attested *ϝέτος*;

2. IE **yē-ro-*, **yō-ro-*, prob. fr. **yē-*, **yō-* beside **yā-* in Skt. *yā-* 'go', Lith. *joti* 'ride', extension of **ei-* 'go'. Walde-P. 1.105. Falk-Torp 6 f.

Goth. *jēr*, ON *ār*, OE *gēar*, etc., general Gmc.; Av. *yār-* (nom. sg. *yārə*); Grk. ὥρα 'period of time' (14.11), 'hour'; Boh. *jaro*, etc. 'spring' (14.75).

3. IE **at-no-*, perh. fr. **at-* in Skt. *atati* 'goes, wanders' (cf. above, 2). Walde-P. 1.41 f. Ernout-M. 55. Walde-H. 1.51.

Lat. *annus* (> Romance words); Goth. *aþn* (? only dat. pl. *aþnam*) and *at-aþni* (only gen. sg. *ataþnjis*) both for ἐνιαυτός. Here also (with *tn* > *kn*) Osc. *akenei* 'in anno', Umbr. *acnu* 'annos'.

14.74–14.77. Of the now recognized four seasons of the year, the 'winter' is the one for which there is the most impressive agreement in the words denoting it, which in all the main branches of the IE family except Gmc. belong to an inherited group, pointing unmistakably to an IE word for 'winter'. For 'spring' and 'summer' there are less widespread cognate groups pointing to IE words which were probably used without precise separation of the two. The earliest division was presumably one of two seasons, 'winter' and 'non-winter' (or in some regions 'dry' and 'wet'; but this has no bearing on IE relations). Cf. Schrader, Reallex. 1.529 f., and, for the seasons in India (3 in the Vedic period, later 5, 6, or even 7), BR s.v. *ṛtu-*, Zimmer, Altind. Leben 371 f., Macdonell-Keith 1.110 f.

14.77. Autumn. For 'autumn', unlike the names of the other seasons, there is no certain agreement between any of the branches of the IE family, but only within some of them, e.g. a common Gmc. and a common Slavic word. Besides the connection with 'harvest', words for 'autumn' may mean lit. 'before winter' or 'end of summer', or may refer to the fall or the redness of the leaves in autumn.

1. Grk. φθινόπωρον (rarely also μετόπωρον), cpd. of φθίνω 'wane' (or μετά 'after') and ὀπώρα 'late summer, fruit-season' (also sometimes used for 'summer' or 'autumn') and 'fruit' (see 5.71).

2. Lat. *autumnus* (> Romance words), etym. dub. Later spelling *auctumnus* by popular (false) connection with *augēre* 'increase'. Walde-P. 1.16. Ernout-M. 96. Walde-H. 1.87 f.

14.78. The generic 'season' of the year (this sense most unambiguously in the pl. forms) is commonly expressed by words for 'time' (14.11) with, or sometimes without, those for 'year' (14.73). Thus Grk. ὥρα, Lat. *tempus* (*anni*), NHG *jahreszeit* (hence by semantic borrowing Rum. *anotimp*, neolog.), Dan. *aarstid*, Sw. *årstid*, Du. *jaargetijde*, Lith. *metų laikas*, Lett. *gada laiks*, SCr. *godišnje doba*, Boh. *roční počasí*, Pol. *pora roku* (*pora* 'fitting time', like Russ. *pora*, etc. = late ChSl. *pora* 'force' : ChSl. *perją, pĭrati* 'h t, pound'; Brückner 431), Russ. *vremja goda.*

Skt. *ṛtu-* 'definite or fitting time' and the reg. word for 'season' of the year (BR s.v.; Zimmer, Altind. Leben 373), beside *ṛta-* 'right, proper, etc., fr. the root seen in Grk. ἀραρίσκω 'fit', etc. Walde-P. 1.70.

CHAPTER 15

SENSE PERCEPTION

For the purposes of our discussion it is sufficient to follow the time-honored classification of the senses as smell, taste, hearing, sight, and touch, ignoring the modern technical elaboration of the old 'touch'.

Within the spheres of the several senses there are certain logical distinctions which find linguistic expression in some languages and not in others and which, moreover, work out differently for the several senses as regards linguistic consciousness of the relations.

First, the difference between the subjective and the objective notions. These terms (hereafter subj., obj.) apply to both the noun and the verb, and so are preferable to transitive and intransitive, which are applicable only to the verb. NE *smell* and *taste*, as verbs or nouns, are used both subjectively, with reference to the person perceiving, and objectively, with reference to the object which stimulates the sense. *I smell the rose, taste the apple* and *it smells sweet, tastes good*, and similarly a person's sense of

smell, taste, or the *smell of a rose*, the *taste of an apple*. The situation is the same in many other languages, but in some the two aspects are distinguished by different forms of the same root or even unrelated forms, or again the obj. verbal notion is expressed only by a phrase 'have a smell (taste)' or the like. In general, for the senses of smell and taste the obj. notion is the earlier and the most important in the history of the words.

For hearing and sight the parallel relations between the subj. and obj. aspects are less obvious and less conspicuous in linguistic consciousness, though also of considerable importance in the history of the words. *I hear the bell*, and *it is heard, it sounds* (one cannot say *it hears*, but cf. the recent slang *it listens well*), and the *sound of a bell* is like the *smell of a rose*. *I see* something, and the object *is seen, appears, seems, looks* (cf. Lat. *vidētur*); the parallel to the *smell of a rose* is the *appearance* or *look* of the object, though *sight* was also once used in such phrases and is still used objectively in *pleasant sight*, etc.

For the sense of touch, NE *feel* may be used both subjectively and objectively, like *smell* and *taste*. *I feel* something and *it feels smooth*. But, while there are some parallels for this, in most languages the latter notion is expressed by a phrase meaning 'it is smooth, it seems smooth, is smooth to the touch' or the like. Hence the obj. use of the verb, and also of a noun, as in NE the *feel(ing) of an orange*, will be left out of account.

Besides the distinction between subj. and obj., there is a further distinction, within the subj. It is that between the actual perception and the antecedent action provoking it, the application of the appropriate sense organs. It is a safe assumption on general psychological grounds that for all the senses the notion of the provoking action is ultimately earlier than that of perception. But linguistically the distinction is of varying importance for the different senses, and for some of them the two notions are so blended that it is unprofitable to keep them apart in the discussion.

For smell there is such a distinction between *I smell the rose* and *smell it!*—that is, 'take a smell of it'. The latter notion is sometimes expressed by special words, as ON *daunsna*, NHG *wittern* (Fr. *flairer* is used most commonly in this way), or by the usual vb. for 'smell' with a prefix or preposition, as NHG *an-riechen, be-riechen*, or NE *smell of* (so in U.S., like *taste of, feel of*) or *smell at* (older and still British). But it is generally covered also by the simple vbs. for 'smell', without consciousness of the distinction and will be ignored in the lists and discussion.

For taste there is the same distinction between *I taste the apple* and *taste it!* or *taste of it*, that is 'take a taste of it'. The two notions may be expressed by different words, as NHG *schmecken* and *kosten*, though the former was once used in both senses. In the inherited group of verbs for 'taste' and several of the others the second notion, 'taste of', is the earlier and dominant one. Sometimes the only distinctive vb. for 'taste' is used only in this way (so NG δοκιμάζω), and 'perceive by taste' is expressed only by the generic vb. for 'perceive by the senses' or by some periphrasis.

The vb. *touch* does not denote the sense perception, but we speak of the *sense of touch*, and, in general, the vbs. for 'touch' are the most important in this group. Or still closer to *smell of, taste of* is the notion in *feel it!* or the more colloquial *feel of it*, that is 'examine by touch'. In most languages there are

distinctive verbs for this notion or for the closely allied 'feel about, feel one's way, grope', and sometimes these, rather than those for 'touch', underlie the sbs. for 'sense of touch'. This was also the primary sense in NE *feel* and its Gmc. cognates, which only secondarily came to be used for 'perceive by touch'. Elsewhere, generally, there is no distinctive vb. for 'feel' as 'perceive by touch', which is expressed by the generic word for 'perceive by the senses'.

Although the NE phrases *smell of, taste of, feel of* are regarded as colloquial or even inelegant, they will be used ('smell of', etc.) in translating, when it is desired to avoid confusion with 'smell', 'taste', 'feel', as denoting the perceptions.

For hearing and sight the corresponding distinction is of much greater linguistic importance. 'Hear' and 'listen', and likewise 'see' and 'look', are usually expressed by different words, though these are often cognate forms and there may be overlapping or shift of use not only within cognate groups but even in the history of the same word.

From the foregoing it is apparent that, while from the logical point of view a certain parallelism may be set up between the different notions pertaining to the senses, this is unequally reflected in language, and it would be unprofitable to adhere to it rigidly in the arrangement of the material.

This chapter furnishes numerous illustrations of linguistic synesthesia, the extension or shift of meaning from one sense sphere to another. Conspicuous is the interchange between 'smell' and 'taste', and to some extent 'feel'. Conversely, in several cases, the old generic words for 'perceive by the senses' have been partly specialized and furnish the common words for one particular sense-perception. Thus Lat. *sentīre* 'perceive', but It. *sentire* also esp. 'hear' (more popular than *udire*) and 'smell' (more usual than *odorare* for actual perception by smell), Fr. *sentir* also the usual word for 'smell'; Slavic *čuti* 'perceive', but 'hear' in SCr., Bulg., etc., often 'smell' in Pol., Boh., etc.

The words for the sense perceptions have been the subject of some of the earliest studies of semantic groups, namely, for Gmc., J. Grimm, Die fünf Sinne (1848 = Kl. Schriften 7.193 ff.), and, for IE, F. Bechtel, Ueber die Bezeichnungen der sinnlichen Wahrnehmungen in den indogermanischen Sprachen (1879).

Most of the verbs listed are not restricted to the sense-perceptions but may be used also in a still wider sense for 'perceive' mentally or 'feel' emotionally. Many other words for 'perceive' that are not included in the list are also freely used with reference to sense-perception, as Fr. *percevoir*, NHG *wahrnehmen* (cf. *die sinnlichen wahrnehmungen*), etc., and it is sometimes difficult to select the best terms belonging here, for one uses commonly the vb. for a particular sense, 'I see, smell', etc., rather than a generic term. A few of those listed are used of most, not all, of the senses. For the sb. the words chosen are those used in the phrase 'the five senses'.

1. Grk. αἰσθάνομαι (so in NG more commonly in this form, even among writers in the δημοτική, than αἰστάνομαι), αἴσθησις, fr. *ἀ-ϝισ-θ- : Skt. *āvis*, Av. *āviš* 'openly, manifestly', Skt. *āvir-bhū-* 'become manifest, appear', *āviṣ-kṛ-* 'make manifest, reveal', beside *aw- in Grk. ἀΐω 'perceive, hear', ChSl. *(j)avě* 'openly', *(j)aviti* 'show', *umŭ* 'reason, understanding'; here also the IE word for 'ear', Grk. οὖς, Lat. *auris*, etc. (4.22). Walde-P. 1.17 f. Walde-H. 1.80.

NG νοιώθω 'understand, perceive' (17.16), also 'feel' (pain, etc.).

2. Lat. *sentīre* (> It. *sentire*, Fr., Sp. *sentir*, Rum. *simţi*), *sensus* (> It. *senso*, Fr. *sens;* Sp. *sentido*, Rum. *simţ*, fr. vb.), prob. as fig. use of 'find one's way' : Ir. *sēt*, W. *hynt* 'way', Goth. *ga-sinþa* 'traveling companion', OHG *sind* 'way, journey', *sinnan* 'travel' (also 'strive for'), OE *sīþ* 'journey', also OHG *sin*, NHG *sinn* 'sense, mind', etc. (below, 4), MHG, NHG *sinnen* 'think'. Walde-P. 2.496 f. Ernout-M. 923 f.

3. Ir. *cetabīu* (3sg. *cetabī*), with sb. *cētbuid*, NIr. *cēadfadh*, cpd. of vb. for 'be' and *cita-*, *cēt-* : OW *cant* 'with', Grk. κατά, etc. Cf. also W. *canfod* 'perceive, see'. Pedersen 2.292, 442. Thurneysen, Gram. 501.

Ir. *airigim*, NIr. *airighim*, orig. 'watch, give attention to', fr. *aire* 'heed, attention, notice', etym. dub. (Walde-P. 2.29).

Ir. *mothaigim*, vbl. n. *mothugud* (see RIA Contrib. s.vv.), NIr. *mothuighim*, vbl. n. *mothughadh*, etym. dub. Macbain 254 (: Lith. *matyti* 'see', Lett. *matīt* 'feel, perceive, notice').

W. *clywed*, Br. *klevout*, 'hear' (15.41), but used in Welsh of all sense-perceptions except sight (cf. Evans, s.v., Loth, RC 40.359), in Br. also 'learn, understand' and 'smell' (Ernault s.v.).

Br. *merzout*, : dial. *armerhein* 'manage', W. *armerthu*, 'provide, prepare', *darmerth* 'provision', Ir. *arbert* 'prepare', prob. fr. *smer-t- (cf. Gall. *Rosmerta*) : Lat. *merēre* 'earn, gain, deserve', Grk. μέρος 'share', etc. Ernault, Glossaire 409. Vendryes, Études celt. 2.133 f.

W. *synnwyr*, sb. (*y pump synnwyr* 'the five senses') : *synio* 'feel, think, consider', fr. Lat. *sentīre* (above, 2). Pedersen 1.198. Loth, Mots lat. 209.

Br. *skiant*, sb., fr. Lat. *scientia* 'knowledge'. Loth, Mots lat. 205 f.

4. ON *kenna* (of sense-perception, esp. of smell, taste, and feeling), lit. 'know, recognize' : Goth. *kannjan* 'make known', OE *cennan* 'declare, relate', etc. Falk-Torp 516.

Dan. *fornemme*, Sw. *förnimma*, fr. MLG *vornemen* 'notice, learn, understand' (= NHG *vernehmen*), cpd. of *nemen* (Dan. *nemme*, Sw. *nimma* 'take', etc.), in orig. prob. a translation of Lat. *percipere*. Falk-Torp 260.

OE *ongitan*, rarely *andgitan*, with sb. *andgit* (*þā fīf andgitu* 'the five senses', cf. Bosworth-Toller s.v. III), cpds. of OE *-gi(e)tan* in *begi(e)tan* 'get' (11.16).

ME *fele* 'feel' by sense of touch (15.72)

was used also of taste and smell, and so NE *feel* in dial. (NED s.v. 7), and Du. *(ge)voelen* sometimes of other senses. But for the most part the expansion of application in this Gmc. group has been not to the other senses but to the emotions, as in NE *feel happy, sad, angry*, or trans. *feel anger, hate*, etc.

ME, NE *perceive* 'apprehend' with the mind or the 'senses', esp. those of sight or hearing, but now technical for all the senses, cf. *sense-perception*, fr. OFr. (North) **perceivre* = *perçoivre*, Lat. *percipere* 'seize, get, perceive (by mind or senses of sight and hearing), feel (pain, joy, etc.)', cpd. of *capere* 'seize, take'. NED s.v.

OHG *intfindan*, MHG *entvinden*, *emphinden*, NHG *empfinden* : OE *onfindan* 'find out, discover, experience, be aware of', etc., cpd. of OHG, OE *findan* 'find'.

Du. *gewaar worden* 'become aware of', like NHG *wahrnehmen*.

ON *vit*, ME *wit* used in the expression 'five senses' = OE *witt*, OHG *wizzi* 'understanding, knowledge, wit, etc.' (NE *wit*), fr. the vb. ON *vita*, OE *witan*, etc. 'know' (17.17). NED s.v. *wit*, sb. 3b.

Dan. *sans* (older *sens;* replacing *sind* in this sense), NE *sense*, fr. Fr. *sens* (above). Falk-Torp 951, 967.

OHG, MHG *sin*, NHG *sinn*, Du. *zin*, MLG *sins* (> Dan. *sind*, Sw. *sinne*), all also 'mind, understanding, meaning, etc.' : Lat. *sentīre*, *sensus*, etc. (above, 2). Falk-Torp 967 f. Hellquist 911 f.

5. Lith. *jausti*, Lett. *jaust* (beside *justi*, *just* 'feel, notice'), with sbs. Lith. *jausmas*, Lett. *jūteklis*, prob. : Skt. *api-vat-*, Av. *aipi-vat-* 'understand'. Walde-P. 1.216. Meillet, BSL 23.77.

6. ChSl. *počuti*, perfect. of *čuti* 'recognize, notice', SCr. *čuti* 'hear', Boh. *čiti* 'perceive, notice, smell', Pol. *czuć* 'perceive, smell', with sbs. ChSl. *čuvĭstvo*, Russ. *čuvstvo* (SCr. *čuvstvo*, old in this sense), whence Russ. *čuvstvovat'* 'feel, perceive' : Grk. κοέω 'notice', Lat. *cavēre* 'be on one's guard, heed', Grk. ἀκούω, Goth. *hausjan* 'hear', etc. (15.41). Berneker 162 f. Walde-P. 1.369.

SCr. *osjetiti*, with sb. *osjet*, cf. *dosjecati* 'take notice of', cpds. of *sjetiti se*, late ChSl. *sětiti sę* 'remember' (17.31).

SCr. *ćutjeti* (as 'perceive' dial.), Russ. *o-ščutit'*, with sb. SCr. *ćut*, *ćutilo* : ChSl. *štutiti* 'feel', etym.? Walde-P. 1.369. Osten-Sacken, IF 33.197. Miklosich 357.

Boh. *smysl*, Pol. *zmysł* (*smysł*), also 'meaning, mind' = SCr. *smisao*, Russ. *smysl* 'meaning', cpd. of ChSl. *myslĭ* 'thought', etc. Miklosich 208. Brückner 350.

7. 'Perceive' in Skt. rendered usually by *grah-* 'seize' (with instr. of sense-organ, *cakṣuṣā*, etc.), or by *jñā-* 'know, be acquainted with' or *budh-* 'awake, become aware of'; also sometimes by *dṛç-* 'see', used for 'see with the (other) senses' (Kena Up. 1.6, Praçna Up. 4.8; with *indriya-* Tattvas. 48.3.74).

Skt. *indriya-* 'sense' or 'sense-organ', lit. 'vigor, energy', sb. fr. adj. *indriya-* 'belonging to Indra'.

Av. *bud-* (= Skt. *budh-*, above) 'become aware of', 'feel' (hunger and thirst), 'smell'. Barth. 918.

The distinction between the subj. and the obj. aspects (cf. above, pp. 1017 f.) is shown in the list and will generally not be noted again in the following. In the majority of cases the obj. use is the earlier. This most frequently rests on the notion of 'exhalation', the connections being with words for 'breath, steam, smoke', etc.; but in several cases apparently on the notion of something that 'hits one, strikes one forcibly'. Verbs in which the subj. use is earlier are in several cases specialized from 'perceive by the senses'.

Words for 'smell' are apt to carry a strong emotional value, which is felt to a less degree in words for 'taste' and hardly at all in those for the other senses. According to circumstances and often with a difference of tone and facial expression, they are used with reference to smells that are pleasant or unpleasant. Some become definitely specialized in one direction or the other, as NE *fragrance* and *stench* (cf. 15.25–26). A converse generalization of 'good smell' to 'smell' is seen in NG μυρίζω, μυρωδιά.

Some interchange between 'smell' and 'taste' is observed in cognate groups.

1. IE **od-*. Walde-P. 1.174, 697. Ernout-M. 698 f., 700 f.

Grk. ὄζω, perf. ὄδωδα, sb. ὀδμή, ὀσμή

(regularly obj., but Democritus used ὀδμή and vb. ὀδμάομαι for sense-perception; cf. Diel, Fragmenta der Vorsokratiker 1. p. 387), ὀσφραίνομαι, fut. ὀσφρήσομαι, aor. ὠσφρόμην, sb. ὄσφρησις, fr. *ὀδσ-φρη-; second part : Skt. *ghrā-* 'smell'; Lat. *olēre* (> OIt. *olere*, OFr. *oloir*, Sp. *oler*), with cpd. *odefacere* (Festus), *ol(e)facere*, sbs. *olfactus* (> Sp. *olfato*), *odor* (> It. *odore*, Fr. *odeur;* Sp. *olor* with *l* fr. vb.), whence *odorārī* (> It. *odorare*), *odorātus* (> It. *odorato*, Fr. *odorat*); Lith. *uosti* (1sg. *uodžiu*), Lett. *uost;* Arm. *hot* (sb., obj.), *hotim* (vb., subj.).

2. Grk. μυρίζω 'rub with ointment' (deriv. of μύρον 'ointment, perfume'), late μυρίζομαι 'be fragrant with', whence NG μυρίζω (pop. 'smell' both subj. and obj.), μυρίζομαι (lit. 'smell' subj.). Hence also, fr. aor. form, Bulg. *miriš*, SCr. *mirisati*, and, fr. a parallel aor. ἐμύρωσα (: μυρόω), late ChSl. *mirosati*, Rum. *mirosi*, sb. *miros*. NG μυρωδιά formed to late Grk. μυρώδης, cpd. of μύρον and the root of ὄζω (above, 1), parallel to εὐώδης 'fragrant', etc.

3. Lat. *fragrāre*, VLat. *flagrāre* (> OFr. *flairier* obj., but Fr. *flairer* subj. 'take a smell of, try to recognize by the smell'), prob. : OHG *bracko* 'hunting dog', MHG *bræhen* 'smell'. Walde-P. 2.192. Ernout-M. 385. Walde-H. 1.540. REW 3476. Wartburg 3.746 f.

Fr. *sentir*, also and orig. 'perceive, feel' (15.11), with early specialized use for 'smell', whence ME *sent*, NE *scent*.

4. Ir. *bolad*, NIr. *boladh*, whence vbs. Ir. *boltigur*, *boltanaigim* (with vbl. n. *boltanud*, *boltanugud;* for latter as 'sense of smell', cf. Anc. Laws 3.348.11 ff., an important passage for words denoting the sense-perceptions), NIr. *boltnuighim*, etym. dub., perh. : Lett. *buls* 'heavy, steamy air'. Walde-P. 2.189. For 'smell' vb. obj. Ir. *bolad* or *boltunud* with *tic-cim* 'come', NIr. *boladh* with vb. 'be', as *tā boladh uaidh*, lit. 'there is a smell from it'.

W. *arogl*, new sg. to older *aroglau* taken as pl. (Morris Jones, 199), this fr. **are-wo-clou-* : *clywed* 'perceive by the senses' (15.11). Hence vb. *arogli*. Loth, RC 40.359.

Br. *c'houez*, whence *c'houesa* vb. and sb., and phrase *kaout c'houez*, lit. 'have a smell', same word as *c'houez* 'breath' : W. *chwyth* 'breath, blast', Ir. *sētim* 'blow', etc. Pedersen 2.627 f.

5. Goth. *dauns* (mostly = ὀσμή, but = ὄσφρησις 2 Cor. 12.17) : ON *daunn* mostly 'bad smell', *daunsna* 'smell of, sniff at', deriv. of IE **dheu-* in Skt. *dhū-* 'shake', Grk. θύω 'rush, storm', ChSl. *dunąti* 'blow', Skt. *dhūma-*, Lat. *fūmus* 'smoke, vapor', etc. Walde-P. 1.835 ff. Feist 116 f.

ON *þefr* 'smell' (also 'taste'), with vbs. *þefa*, *þefja* (cf. also Norw. *tev*, vb. *teva* 'smell') : OE *þefian* 'pant, be heated', Lat. *tepor* 'warmth', Skt. *tapas-* 'heat', etc. Development of 'smell' (and 'taste') through the steaming of cooking food. Walde-P. 1.719. Falk-Torp 1251.

ON *ilmr*, mostly 'good smell' (vs. *daunn* 'bad smell'), but also 'smell', *ilming* or *ilmingar vit* 'sense of smell', with vb. *ilma*, etym.?

Dan. *lugt*, Sw. *lukt*, whence vbs. *lugte*, *lukta*, fr. MHG *lucht* 'air, breath, smell' (as Du. *lucht* also sometimes 'smell') = NHG *luft* 'air', etc. (1.71). Falk-Torp 661. Hellquist 593.

OE *stincan* (obj.), *gestincan* (subj.), with sb. *stenc*, OHG *stincan*, sb. *stank*, all used for 'smell' in general (the restricted application to bad smells as in NE *stink*, *stench*, NHG *stinken*, *gestank*, being later), prob. : Goth. *stiggan* 'hit, collide with', ON *støkkua* 'spring, leap', through the notion of something that hits one, strikes one forcibly (cf. Icel. *hniss* 'un-

pleasant smell or taste' : ON *hnīta* 'to strike'). Some prefer to assume a more complicated development through 'break up into small particles, vaporize, exhale'. Walde-P. 2.617. Falk-Torp 1168. Franck-v. W. 667.

OE *swæcc*, *swec* (also 'taste'), vb. *gesweccan*, OS *swec*, OHG *sweche*, vb. *swehhan* 'smell, stink' : W. *chweg* 'sweet, pleasant', *cwaeth* 'taste', etc. Walde-P. 2.521.

ME *smelle*, NE *smell*, sb. and vb. : LG *smelan*, Du. *smeulen* 'smolder', Flem. *smoll* 'hot', NE *smoulder*, outside connections dub., but English development through 'steam, vapor', as in NHG *riechen*. Walde-P. 2.691. Franck-v. W. 626.

OHG *riohhan* 'give forth smoke, steam or smell', sb. *rouh*, then for 'smell' also subj. MHG, NHG *riechen*, sb. MHG *rouch*, *geruch*, NHG (*rauch* 'smoke') *geruch*, Du. *ruiken*, sb. *reuk* : OE *rēc* 'smoke', *rēocan* 'give forth smoke or steam', NE *reek*, outside connections dub. Weigand-H. 2.585. Franck-v. W. 562.

MHG *smecken*, *smacken*, sb. *smac* 'taste' (15.31–34) are also used for 'smell' (both subj. and obj.), and so formerly and still dial. NHG *schmecken*, *schmack*. Cf. Paul, Deutsches Wtb. s.v.

6. Lith. *uosti*, *uostyti*, Lett. *uost*, *uostīt*, see above, 1. Hence sbs. Lith. *uoslė* (also 'nostril'), Lett. *uoža*, *uožl'a*.

Lith. *kvapas*, vb. *kvapėti* : Grk. καπνός 'smoke', Lat. *vapor* 'steam, vapor', etc. Walde-P. 1.379 f.

Lett. *smaka*, vb. *smakuot*, fr. MLG *smak(e)* 'smell' and 'taste' (cf. 15.31). Mühl.-Endz. 3.950.

7. ChSl. *ąchati*, sb. *ąchanĭje* (both rare), *vonjati*, *obonjati*, sb. *vonja*, *obonjanĭje*, SCr. *vonjati*, *vonj*, *njuh*, Boh. *voněti*, *vůně*, Pol. *wąchać*, *węch*, *woń*, Russ. *njuchat'*, *obonjanie* (*vonjat'* 'stink', *von'* 'stench'), all fr. **on-*, **on-s*, with or without the development of initial *v* (cf. Vondrák 1.214) : Skt. *an-* 'breathe', Grk. ἄνεμος 'wind', Lat. *animus* 'mind', *halāre* 'breathe', etc. Walde-P. 1.56 ff. Miklosich 222. Otherwise, separating into three groups, Brückner 364, 604, 630 f.

Boh. *páchnouti*, Pol. *pachnąć*, Russ. *pachnút'*, Boh., Pol., Russ. *zapach* : ChSl. *pachati* 'toss, fan', Russ. *páchnut'* 'blow', prob. fr. a root **pĕr-* 'blow', perh. seen in some Gmc. words, as OE *fæs* 'fringe'. Walde-P. 2.67. Brückner 389.

Boh. *čichati*, sb. *čich* : *čiti* 'perceive, feel' (15.11), also with specialization to 'smell' (so freq. also Pol. *czuć*), as in Fr. *sentir*. Berneker 162.

8. Skt. *ghrā-*, with sb. *ghrāṇa-* (mostly obj., but also subj.; cf. Böhtlingk, Wtb. s.v.), see Grk. ὀσφραίνομαι, above, 1.

Skt. *gandha-* : Av. *ganti-* 'bad smell', OPers. *gasta-* 'offensive' (NPers. *gast* 'bad'), fr. a root seen in *gandh-* 'hit, injure', Lith. *gesti*, *gendu* 'spoil', etc. Walde-P. 1.672 f.

Av. *bud-* 'become aware of', 'feel' (hunger, etc.), and 'smell', sbs. *baoδa-* *baoδi-* 'good smell, fragrance' (cf. NPers. sb. *bū*, vb. *būīdan* 'smell') : Skt. *budh-* 'be awake', 'become aware of'. Walde-P. 2.147. Barth. 917 f.

15.25, 26. Aristotle (De anim. 2.9) remarked on the lack of any independent classification of smells analogous to that of tastes (as 'sweet, bitter', etc.), and the situation is the same today. There is still neither an accepted scientific classification nor a popular classification reflected in common speech, that is truly distinctive of the sense of smell. The only widespread popular distinction is that of pleasant and unpleasant smells—good and bad smells, to use the briefest

terms—and this is linguistically more important than any similar distinction, that is, of good and bad, in the case of the other senses. Otherwise, we have recourse to terms belonging primarily to other senses, especially taste (the actual confusion of smell and taste, the fact that certain 'tastes' really depend upon smell, is hardly a factor in this, it is too little known), as *sweet, acrid, pungent* (orig. of touch, 'pricking'), etc. Or else we describe the smell by naming the object which emits it, as the *smell of a rose*. Similar expressions are, of course, used of other senses, the *taste of an apple*, the *sound of a bell*, etc., but we are less dependent upon them, since there are at least some generic terms.

The Hindus enumerated nine kinds of smell, the Skt. terms (quoted in BR, s.v. *gandha-*) meaning 'desirable, undesirable, sweet, sharp, diffusive, compressed, smooth, rough, soft', none of them primarily distinctive of smell.

It has been argued by some that the lack of classification is due to the lack of distinctive linguistic terms. Quite the opposite is true. Such terms would have arisen had there been any obvious basis of grouping. The lack of them reflects the inherent difficulty of classification, which even modern science has not overcome. Cf. also Kretschmer, Glotta 19.209 f., in review of Weisgerber, Der Geruchsinn in unseren Sprachen, IF 46.121 ff.

To illustrate the words referring to good or bad smells the adjs. are chosen. The corresponding sbs. and vbs. are in most cases cognate with them.

The majority of the words for 'fragrant' are derived from words for 'smell' (15.21–24), either with an adv. prefix 'well', 'sweet', or more often resting on a specialization of 'smell' to 'good smell'.

1. Grk. εὐώδης, cpd. of εὐ- 'well' and the root of ὄζω 'smell'.

NG μυρωδᾶτος, deriv. of μυρωδιά 'smell' and 'good smell'.

2. Lat. *fragrāns* (> It. *fragrante*, OFr., NE *fragrant*, Sp. *fragante*); pple. of *fragrāre* 'emit a (good) smell'.

Lat. *odōrifer* (> It. *odorifero*, Sp. *odorífero*, Fr. *odoriférant*), cpd. of *odor* 'smell' (15.21) and *ferre* 'bear', lit. 'smell-bearing', but mostly of good smells.

Sp. *oloroso*, fr. VLat. **odorōsus* (It. *odoroso*, OFr. *odoreux*, NE *odorous*), reformed fr. *olor* (15.21).

It. *olezzante*, fr. *olezzare* 'be fragrant' (whence also *olezzo* 'fragrance'), as if VLat. **olidiāre* formed to *olēre* after the analogy of forms like *baptidiāre* for Grk. βαπτίζω. REW 6055.

Rum. *mirositor*, deriv. of *mirosi* 'smell'.

3. Ir. *boladmar*, fr. *bolad* 'a smell', with *mōr* 'great' used to form adjs. (cf. *nert-mor* 'strong', Gall. *Nertomarus*).

Ir. *cumra*, NIr. *cumhra*, cf. Ir. *cumrad* 'sweet herbs', *cumraide* 'sweet' (K. Meyer, Contrib. 565), etym.? (Macbain 113 *com-rae*, but?).

W. *peraroglus*, fr. *perarogl* 'fragrance', cpd. of *per* 'sweet' and *arogl* 'smell'.

Br. *c'houez-vat*, cpd. of *c'houez* 'smell' and *mat* 'good'.

Some of the words for 'bad smelling, stinking' are derived from words for 'smell' (15.21–24) with an adv. prefix 'ill', or from such as have been specialized to 'bad smell'. But there are more words of independent origin.

1. Grk. δυσώδης, cpd. of δυσ- 'ill', parallel to εὐώδης (15.25).

NG βρωμερός, βρώμικος, derivs. of βρῶμα 'stench' : late Grk. βρῶμος 'stench', βρωμώδης 'stinking', βρῶμα in medical writers 'decay' in the tooth, fr. the root of βιβρώσκω 'devour, eat' (5.11), but in the special (attested) sense of 'eat away, cause decay'.

2. Lat. *foetidus* (> It. *fetido*, Fr. *fétide*, NE *fetid*), vb. *foetere* 'stink' (> Sp. *heder*, whence, as if VLat. **foetibundus*, Sp. *hediondo;* REW 3408), prob. fr. same root as *fimus* 'dung', *suf-fīre* 'fumigate, scent'. Walde-P. 1.837. Walde-H. 1.499.

Lat. *pūtidus* : *pūtēre* 'be rotten, stink' (> It. *putire*, Fr. *puer*, Rum. *puţi*, whence adj. Fr. *puant*, Rum. *puturos;* VLat. *pūtum* > It. *puzzo* 'stench', whence *puzzare* 'stink', *puzzolente* 'stinking') : Lat. *pūs*, Grk. πύος 'pus', Grk. πύθομαι, Lith. *pūti* 'rot', Skt. *pū-* 'stink', Goth. *fūls* 'stinking', OE *fūl* 'stinking, foul', etc. Walde-P. 2.82. Ernout-M. 826. REW 6876, 6880.

3. Ir. *brēn*, NIr. *brēan* : W. *braen* 'rotten', prob. fr. the root in Lat. *marcēre* 'wither, shrink, be weak', Lith. *mirkti* 'be soaked', etc. Walde-P. 2.282. Pedersen 1.125. Stokes 220.

W. *drewllyd*, fr. *drew* (old) 'stench', *drewi* 'stink, rot', etym.?

Br. *flaerius*, fr. *flaeria* 'stink', *flaer* 'stench', with dissim. (as in Fr. *flairer*, etc.) fr. Lat. *fragrāre* 'emit a smell' (cf. *fragrāns* 'fragrant', 15.25). Loth, Mots lat. 168.

4. Goth. *fūls* (only *fūls ist* = ὄζει 'stinks', Jn. 11.39), ON *fūll*, OE, OHG *fūl*, orig. (and later mostly) 'rotten, foul', but often with reference to the odor rather than to the state of decay : Lat. *pūtidus*, etc. (above, 2).

ON *īlla þefaðr*, *īlla ilmaðr*, OE *fūlstincende*, OHG *ubilo stinkenti* (quotable?, cf. sb. *ubile stank*, Notker), phrases and cpds. with 'bad', or 'foul' and pples. of the vbs. for 'smell'; but in line with the tendency which ultimately prevailed in the West Gmc. words ('smell' to 'stink') the pples. are early found alone with pejorative sense, so OE *stincende*, ME *stinkinge* (early *stinkende*), NE *stinking*, Du. *stinkend* (Dan. *stinkende*, Sw. *stinkande*, with vbs. *stinke*, *stinka* fr. LG), OHG *stinkenti*.

5. Lith. *smirdąs* (pple. of *smirdėti* 'stink'), Lett. *smirdīgs* (*smirdēt* 'stink'); ChSl. *smrŭděti* 'stink', with corresponding vbs. in modern Slavic, whence adj. forms, SCr. *smrdljiv*, Boh. *smrdutý*, Pol. *śmierdzący;* sb. ChSl. *smradŭ*, etc., with adjs. SCr. *smradan*, Boh. *smradlavý*, Pol. *smrodliwy*, Russ. *smradnyj*, perh. : Lat. *merda* 'excrement, dung'. Walde-P. 2.691. Walde-H. 2.74 f. Brückner 532.

Lith. *dvokus*, and vb. *dvokti* 'stink' : *dvėkti* 'breathe', *dukti* 'rage', Lett. *dukt* 'roar, rage', etc., fr. an extension of the root seen in Goth. *dauns* 'smell' (15.23). Walde-P. 1.838.

6. ChSl. *smrŭděti*, etc., above, 5.

Russ. *vonjučij*, fr. *von'* 'stench' : ChSl. *vonja*, etc. 'smell' (15.24).

7. Skt. *durgandhi-*, Av. *dužganti-*, cpds. of *dus-* 'ill, bad' and Skt. *gandha-* 'smell', Av. *ganti-* 'stench' (parallel to Skt. *su-gandhi-* 'fragrant', 15.25).

Skt. *pūti-*, Av. *paošišta-* (superl. of an adj. **paoša-*) : Skt. *pū-* 'rot, stink', Av. *pu-* 'rot', etc., cf. Lat. *pūtidus* (above, 2). Barth. 818.

15.31–34. The distinction between the subj. and the obj. aspects (cf. above, pp. 1017 f.) of taste is shown in the table. But some further explanations are required. Of the vbs. listed under 15.31 the majority may be used for both notions 'perceive by the sense of taste' and 'take a taste of', but several only in the latter sense, as NHG *kosten*, NG δοκιμάζω, etc. In some languages there is no distinctive vb. for 'taste' in the former sense, which must be expressed by a phrase with a vb. for 'perceive, notice' or the like. The words that mean 'take a taste of' are from, and most of them (but not NHG *kosten*, which is now definitely specialized) still used also for, the notion of 'try, make trial of' (9.98). Besides those listed, other vbs. for 'try' may, of course, be used with reference to taste, as NE *try* (*this wine*), NHG *probieren*, etc.

Of all the five senses, 'taste' is the one most closely associated with fine discrimination, hence the familiar secondary uses of words for 'taste, good taste' with reference to aesthetic appreciation.

The obj. notion is the earlier and more important for the sb. use and also underlies many of the vbs. But in several languages there is no vb. for the obj. notion (NE *it tastes of, tastes good*), which is expressed by 'have a taste', or other

phrases like 'be sweet', 'seem sweet' = 'taste sweet', etc.

The secondary use of sbs. for 'taste' in the sense of fine appreciation, as in NE *has good taste* is widespread, as in NE *taste* (NED s.v. 8 with antecedents 6, 7), Fr. *goût*, and by semantic borrowing from Fr. *goût*, also NHG *geschmack*, Russ. *vkus*, etc.

1. IE **ĝeus-*, in words for 'taste' in Grk. and Lat., mostly 'try' or 'choose' in Gmc. and Celtic, 'enjoy' in Indo-Iranian. Semantic development fr. 'taste' to 'try, choose' and 'enjoy' or the converse fr. 'try' to 'taste' and 'enjoy' is equally possible. Walde-P. 1.568 f. Ernout-M. 439. Walde-H. 1.628 f.

Grk. γεύομαι, sb. γεῦσις; Lat. (fr. pple. **gusto-*) *gustāre* (> It. *gustare*, Fr. *goûter*, Sp. *gustar*, Rum. *gusta*) sb. *gustus* (> It., Sp. *gusto*, Fr. *goût*, Rum. *gust*) and *gustātus;* Goth. *kiusan* 'make trial of, prove' (renders δοκιμάζω), OE *cēosan* 'choose', Goth. *kausjan* 'taste of' (renders γεύομαι, in lit. sense Lk. 14.24, elsewhere as in 'taste of death'; sb. *kustus* quotable only as 'trial, proof'), OE *costian* 'try, prove, tempt', OHG *kostōn* 'try', MHG, NHG *kosten* 'taste of'; Skt. *juṣ-* 'enjoy, be pleased', Av. *zaoša-* 'pleasure'.

2. Grk. χυμός, orig. 'juice' (: χέω 'pour'), hence 'taste' obj. in contrast to γεῦσις 'taste' subj. (cf. esp. Aristot., De anim. 2.10), which in NG has both values.

Grk. δοκιμάζω 'make trial of, approve' (9.98), in NG 'make trial of' and 'taste', but only in sense of NHG *kosten*. For 'taste' = 'perceive by taste' NG γεύομαι lit., with no pop. substitute.

3. Lat. *sapere*, 'taste' obj. and 'be wise, know' (VLat. **sapēre* > It. *sapere*, Sp. *saber* still 'taste' obj. beside 'know', Fr. *savoir* 'know'), sb. *sapor* (> It. *sapore*, Fr. *saveur*, Sp. *sabor;* NE *savor* fr. OFr. *savur*) : OE *sefa* 'understanding, mind, sense', OHG *inseffan* 'perceive', MHG *entseben* 'perceive' and esp. 'taste'. Walde-P. 2.450 f. Ernout-M. 894.

4. Ir. *mlas*, *blas* (whence *blaisim*), W. *blas* (whence *blasu*), Br. *blaz* (whence *blaza*) : Russ. *molsat'* 'suck, gnaw', Boh. *mlsati* 'nibble, eat dainties'. Walde-P. 2.300. Pedersen 1.163. Stokes 221. In general, the vbs. are subj. and the sbs. mostly obj., but occasionally quotable in the subj. sense (e.g. NIr. *blas* in Keating, Three Shafts 1556; ref. given by M. Dillon).

The obj. 'it tastes' is usually expressed by a phrase with *blas*, e.g. NIr. *tā blas* 'there is a taste', W. *y mae blas arno* 'there is a taste on it'; but Br. with pass. pple. of *blaza*, as *blazet* (*mat, fall*) *eo* 'it tastes (good, bad)', lit. 'it is (good, bad) tasted'.

Derivs. of Ir. *blaisim*, used for the 'act of tasting' and in part at least for the sense, Ir. *mlassacht* (RIA Contrib. s.v.), *blaisecht*, NIr. *blaiseacht* (used for the sense?), also Ir. *mlaissiud* (Thes. 2.255.17), NIr. *blaiseadh*.

Skt. word for 'sense of taste', *rasendriya-*(?), cpd. of *rasa-* and *indriya-* 'sense' (15.11). So Monier-Williams, Eng.-Skt. Dict., but not in BR and perh. fictitious.

No Av. words for 'taste' quotable.

15.35–39. The Hindus recognized six principal varieties of taste with sixty-three possible mixtures (cf. BR s.v. *rasa*), the Greeks eight (Aristot., De anima 422ᵇ11 f., Plut. 913 B, etc.). These included the four that are now regarded as fundamental, namely 'sweet', 'bitter', 'acid', 'salt', the words for which are discussed in the following. The others were 'pungent' (Grk. δριμύς, Skt. *kaṭuka-*), 'astringent' (Grk. στρυφνός, Skt. *kaṣāya-*), and, for the Greeks, 'rough, harsh' (αὐστηρός), 'oily, greasy' (λιπαρός), with the occasional addition of 'winy' (οἰνώδης).

There is considerable interchange of 'bitter' and 'acid' in cognate groups. More remarkable is a shift from 'salt' to 'sweet', evidently through 'seasoned'.

Words for 'sweet' are freely used with reference to other senses than taste (as NE *sweet smell*, *sweet voice*), and for 'pleasing' in general. In some the more generic use has become dominant (or is it the earlier?), and different words are more commonly used with especial reference to taste, as Grk. γλυκύς, Lat. *dulcis* vs. the old ἡδύς, *suāvis*.

1. IE **svādu-*. Walde-P. 2.516 f. Ernout-M. 991 f.

Grk. ἡδύς, Dor. ἁδύς, in Hom. often of taste, but later mostly 'sweet' as 'pleasant', cf. ἥδομαι 'be pleased', ἁνδάνω 'be pleasing'; Lat. *suāvis* (**swādwi-s*) 'sweet, pleasant', not esp. distinctive of taste, cf. *suādēre* 'advise, persuade' (fr. 'make please'); ON *sœtr*, OE *swēte*, *swōt*, OHG *suozi*, etc., general Gmc.; Skt. *svādu-* (mostly 'pleasant tasting'), with vb. forms of *svad-* 'make taste well, taste well', *svād-* 'be pleased', etc.

2. Grk. γλυκύς (cf. also γλεῦκος 'sweet new wine'), NG γλυκός, prob. by assim. for **δλυκύς* : Lat. *dulcis* (> Romance forms), but further relations of both obscure. Walde-P. 1.816. Ernout-M. 288. Walde-H. 1.330.

Most of the adjs. for 'salt' are derivs. of the inherited sbs. for 'salt' (5.81). But in some cases words for 'bitter' are also used for 'salt'.

1. Derivs. of IE **sal-*, **sal-d-* 'salt', in Grk. ἅλς, Lat. *sāl*, Goth. *salt*, etc. (5.81). Walde-P. 2.452 f. Ernout-M. 888. REW 7521.

Grk. ἁλμυρός (cf. ἅλμη 'brine'), NG pop. ἁρμυρός; Lat. *salsus*, replaced in Romance by pples. of VLat. vb. **salāre* in It. *salare*, Fr. *saler*, etc., namely It. *salato*, Fr. *salé*, Sp. *salado*, Rum. *sărat;* NIr. *saillte* (pple.), W. *hallt* (fr. sb. *halen*), Br. *sall* (fr. vb. Several of the words for 'acid, sour' are like those for 'bitter', with which they are often cognate, from roots meaning 'point, sharp, cut' and the like. Some are 'acid' as 'soured, fermented'.

1. Grk. ὀξύς, lit. 'sharp, keen', hence of tastes 'sharp, acid, sour' (hence ὄξος 'vinegar', whence ὀξίνης, NG ὄξινος, pop. ξινός, cf. Hatzidakis, Μεσ. 2.116), Lat. *ācer* 'sharp', of tastes 'piquant', VLat. *acrus* (> It. *agro*, Fr. *aigre*, Rum. *acru;* deriv. Sp. *agrio*), Lat. *acidus* 'sour' (> It. *acido*, Fr. *acide*, NE *acid*, Sp. *ácido*), and *acerbus* 'sour', esp. in speaking of unripe fruits, etc. : Grk. ἄκρος 'topmost', ἄκρον 'point', ὄκρις 'point, edge', OLat. *ocris*, Umbr. *ocar* 'mountain', Skt. *açri-* 'point, edge', etc. Walde-P. 1.28 ff. Ernout-M. 7 ff. REW 92. Wartburg 1.18 f.

2. Fr. *sur*, fr. the Gmc., OHG *sūr*, etc. (below, 4).

3. NIr. *searbh* 'bitter' (15.37), also 'sour'. Ir. *serb* likewise?

NIr. *gēar* 'sharp' (15.78), also 'sour'.

W. *sur*, fr. OE *sūr*. Parry-Williams 30.

W. *egr*, prob. fr. ME *egre* (below, 4). Parry-Williams 116.

Br. *sur*, fr. Fr. *sur* (above).

4. ON *sūrr*, OE *sūr*, etc., general Gmc. (NE *sour* partly replaced by *acid* as generic term, but used esp. for what is very acid or fermented as in *sour milk*) : Lith. *sūrus* 'salt' (adj.), ChSl. *syrŭ* 'damp, raw', the latter perh. nearer the orig. meaning, cf. ON *sūreygr*, OE *sūrīege*, etc. 'blear-eyed', and with ablaut ON *saurr* 'damp earth, dung'. Walde-P. 2.513. Falk-Torp 1206.

ME *egre* ('acid, pungent', hence also 'eager'), fr. OFr. *aigre* (above, 1). NED s.v. *eager*.

5. Lith. *rugštas* (Lett. *rugts* 'bitter') : *rugti*, *rukstu*, 'sour, ferment', *rugti*, *rugiu* 'belch', Lat. *ē-rūgere*, *rūctāre* 'belch', Grk. ἐρεύγομαι 'belch', etc. 'Sour, bitter' fr. 'fermented'. Walde-P. 2.357. Ernout-M. 874 f.

Lett. *skābs* (Lith. dial. *skobas* id.) : Lett. *skabrs*, Lith. *skabus* 'sharp', *skabėti* 'cut, hew, shoot forth (branches)', Lat. *scabere* 'scrape, scratch', etc. Walde-P. 2.563. Mühl.-Endz. 3.878 f.

Lett. *skān'š* : Lith. *skanus* 'good tasting', *skonis* 'taste' (15.34)? Mühl.-Endz. 3.879. Leskien, Ablaut 373.

6. ChSl. *kyslŭ*, etc., general Slavic, fr. the root of ChSl. *-kysnąti*, Russ. *kisnut'*, etc. 'become sour', ChSl. *kvasŭ* 'leaven', *kvasiti* 'to sour' (hence Pol. *kwaśny* 'sour' = Boh. *kvasný* 'fermented'), etc., prob. : Skt. *kvath-* 'boil', Goth. *hwaþō* 'foam'. Walde-P. 1.468. Berneker 678 f., 655 f.

7. Skt. *amla-* : Lat. *amārus* 'bitter' (15.37).

Skt. *çukta-*, fr. *çuc-* 'shine, glow, burn, suffer violent heat or pain, etc.', as 'burning (of taste)'. Walde-P. 1.378. Uhlenbeck 313.

15.41–15.44. The verbs for 'hear', denoting the actual perception, may also be used for 'listen', especially in the imperative. But generally there are also distinctive words for 'listen'. Most of these are cognate with the words for 'hear', either those so used in the same language (NHG *horchen* : *hören*, NE *harken* : *hear*, Russ. *slušat'* : *slyšat'*) or in other languages (NE *listen*, etc. : Grk. κλύω, etc.). In a Celtic group 'listen' rests on the notion of 'be silent, be still', which elsewhere is a secondary association of 'listen' (cf. below, 4). Other secondary developments of 'listen' are 'listen for' > 'watch for, wait for' (OE *hlosnian*) and 'be attentive to', esp. 'obey' (Lat. *auscultāre*, NHG *gehorchen*, Dan. *lyde*, Sw. *lyda*, Lith. *klausyti*, ChSl. *poslušati*, etc.).

The nouns for 'hearing' are all cognate with the verbs for 'hear' or 'listen'.

The logical relation of 'sound' to 'hearing', parallel to that of obj. 'taste, smell' to subj. 'taste, smell', is partially reflected in speech, and some of the words for 'sound' are cognate with vbs. for 'hear'. But more often the sbs. derived from the latter reflect the use of 'hear' with reference to the hearing of speech and are restricted to articulate sound 'what is heard from speech', hence esp. 'report, news, fame' (Grk. κλέος, Skt. *çravas-*, ChSl. *slava*) or 'word' (ChSl. *slovo*, Av. *sravah-*). The majority of the words for 'sound' are independent of the 'hear' groups, many of them of imitative origin. Out of the great wealth of words for 'sound' or some special kind of sound (ringing, rattling, vocal, etc.), it is intended to list those that are generic, covering both inarticulate and articulate sounds, or those that are the most nearly generic (in a few cases the selection is doubtful). Words like NE *noise* (though its use has extended to cover most of the ground of *sound*, at least for inarticulate sound), Fr. *bruit*, NHG *geräusch*, *lärm*, etc., are not included.

Verbs for 'sound', parallel to those for the obj. 'smell' or 'taste', are not listed. Where they exist, they are obvious derivatives of the words for 'sound', as Grk. ψοφέω, Lat. *sonāre*, Fr. *sonner*, NE *sound*, NHG *lauten*, etc.

1. IE **k̑leu-*, **k̑leu-s-*. Widespread in vbs. for 'hear' or 'listen' (hence also 'obey', etc.), also 'be heard, be called, be famous', sbs. for 'hearing' and for what is heard, 'fame', 'word', etc. Walde-P. 1.494 f. Ernout-M. 192. Walde-H. 1.237 ff. Pedersen 2.494 f.

Grk. κλύω 'hear' (poet.), κλυτός 'heard, famous', κλέος 'report, fame, glory' (fr. κλέϝος = Skt. *çravas-* id., ChSl. *slovo* 'word'), κλέω 'make famous, celebrate', mid. 'be famous'.

Lat. *cluēre* (later also *cluere*) 'be called, be famous', *inclutus* 'famous'.

Ir. *ro-cluiniur*, *cluinim*, NIr. also *cloisim* (re-formed fr. vbl. n. *clos*, Ir. dat. *cluas*, etc.), W. *clywed*, Br. *klevout* 'hear', with sbs. W. *clyw*, *clybod*, Br. *kleo* 'hearing'.

Goth. *hliuma* 'hearing' (= ἀκοή 2 Cor. 12.17; pl. = ἀκοαί 'ears'), ON *hljōð* 'a hearing' (but not for sense of hearing) and 'sound', *hlȳða* 'listen', Dan. *lytte* 'listen' (for ODan. *lyde* now 'obey', as Sw. *lyda;* Falk-Torp 669, 672); for 'sound' Dan. *lyd*, Sw. *ljud*, OE *hlēoþor* (*gehlȳd* 'tumult'), OHG *(h)lūta*, *(h)liodar*, MHG *lūt*, NHG *laut*, Du. *geluid* (also OE *hlūd*, OHG *(h)lūt*, etc. 'loud', 15.45); OE *hlyst* 'hearing', and for 'listen' OE *hlystan* (*hlosnian* 'listen for, wait for'), ME *lystne*, NE *listen*, MLG *lūsteren* (> Dan. *lystre* 'obey', Sw. *lystra* 'attend to'), Du. *luisteren*, Sw. *lyssna* (cf. Hellquist 601), OHG *(h)losēn*, MHG *losen*, OHG *lustrēn* (NHG dial. *laustern;* NHG

lauschen 'listen furtively' with sense influenced by another word; cf. Weigand-H. and Kluge-G. s.v.).

Lith. *klausyti(s)*, Lett. *klausīt* 'listen'.

ChSl. *slyšati* 'hear', *sluchŭ* 'hearing', whence *slušati* 'hear, listen', etc., general Slavic.

Skt. *çru-* (also *çruṣ-*), Av. *sru-* 'hear', with derivs. Skt. *çruti-*, *çrotra-*, 'hearing'.

Cf. also Toch. A *klots*, B *klotso* 'ear' (SSS 128 f.).

2. Grk. ἀκούω 'hear', sb. ἀκοή, Hom. ἀκουή 'hearing' and 'thing heard, report' (but not 'sound' in general), etym. much disputed. Prob. not ἀκ-ουσ- fr. ἀκ- 'sharp' and οὖς 'ear' (Kretschmer, KZ. 33.565, Falk-Torp 454, etc.), but *ἀ-κουσ- : Goth. *hausjan* 'hear', and both : Grk. κοέω 'perceive, notice', also 'hear', Lat. *cavēre* 'beware', ChSl. *čuti* 'recognize, notice', *po-čuti* 'perceive' (15.11), Skt. *kavi-* 'wise, a seer', etc. Walde-P. 1.369. Grk. ἀκροάομαι 'listen', fr. *ἀκρ-ουσ-, cpd. of ἄκρος orig. 'sharp' and οὖς 'ear'. Kretschmer, KZ 33.566. Hence also ἐπακροάομαι, whence (as if fr. ἀπο- and with φ by some analogy) NG ἀφακράζομαι with numerous local variants (cf. also Byz. ἀφκράζομαι in Chron. Mor.). 'Ιστ. Λεξ. 3.311 f.

Byz., NG γροικῶ in earliest use 'perceive, understand, recognize' (so ἐγροικῶ, γροικῶ in Chron. Mor.), now esp. 'hear', but also 'feel' (cold, etc.), fr. an adj. *ἀγροικός 'knowing, understanding' (so ἔγροικος Chron. Mor. 1341), this fr. class. Grk. ἄγροικος (fr. ἀγρός 'field') 'rustic, boorish', hence also 'ignorant', in this latter sense felt as a neg. cpd., whence *(ἀ)γροικός in the opposite sense. Hatzidakis, 'Επετηρίς 9(1912–13). 47 ff. 'Ιστ. Λεξ. 1.230 f.

Grk. ψόφος, the most generic class. word for 'sound' (ἀκοὴ ψόφου parallel to γεῦσις χυμοῦ, Aristot., De anim. 2.6), prob. of imitative origin.

Grk. ἠχή 'sound' (usual word in Hom.), later ἦχος as NG (lit.) : Lat. *vāgīre* 'cry, squall', with different extensions of an imitative **wā-*. Walde-P. 1.215. Ernout-M. 1070.

Grk. κρότος 'a rattling or clashing sound', in NG the usual word for any inarticulate sound, perh. : OE *hrindan* 'strike, hit', ChSl. *krotiti* 'tame', etc. Walde-P. 1.484.

3. Lat. *audīre* 'hear' (> It. *udire*, Sp. *oír*, Rum. *auzi;* Fr. *ouïr* now nearly obs.), sb. *audītus* 'hearing' (> It. *udito*, Fr. *ouïe*, Sp. *oído;* Rum. *auz*, back-formation fr. vb.), by itself most simply taken as fr. **aus-dh-* (cf. *auscultāre*) : Lat. *auris*, Grk. οὖς, Lith. *ausis*, etc. 'ear' (4.22), but perh. better (to help explain the difficult cpd. *oboedīre*) fr. **awis-dh-* : Grk. αἰσθάνομαι 'perceive', Skt. *āvis* 'openly', etc. (15.11), belonging ultimately to the same group. Walde-P. 1.17 f. Walde-H. 1.80. Ernout-M. 86.

Lat. *auscultāre* 'listen', VLat. *ascultāre* (> the Romance forms listed), cpd. of **aus-* : Lat. *auris* 'ear', etc., second part prob. fr. **cultos* by metath. fr. **clutos* : IE **k̑leu-* (above, 1). Walde-H. 1.86 f. REW 802.

Lat. *sonus* 'sound' (> It. *suono*, Fr. *son*, OSp. *sueno*, Rum. *sun;* Sp. *sonido* new deriv.; Rum. *sunet* fr. Lat. *sonitus*), with vb. *sonere*, *sonāre* (> It. *suonare*, Fr. *sonner*, Sp. *sonar*, Rum. *suna*) : Skt. *svan-* 'to sound, make a noise', sb. *svana-*, *svāna-* 'sound', etc. Walde-P. 2.524 f. Ernout-M. 956 f.

Fr. *entendre* 'hear', fr. Lat. *intendere* 'stretch out, direct one's attention to', whence 'understand' (as It. *intendere*, Sp. *entender*, and still in part Fr. *entendre*), then 'hear', replacing the old *ouïr*. REW 4483.

It. *sentire* 'perceive by the senses' (15.11) is used also esp. for 'hear', tending to replace *udire* in pop. speech.

4. Celtic words for 'hear' and W., Br. words for 'hearing', above, 1.

Nearly all the adjs. that are used to describe sound are words which primarily apply to other senses or other notions in general and only secondarily to sound or voice. Thus NE *sharp*, *harsh*, *soft*, *piercing*, *sweet*, *high*, *low*, *deep*, *faint*, etc., and similarly in other languages.

An important exception is NE *loud*, with its Gmc. cognates, and some of the other words for 'loud', though many of these too are from notions applied only secondarily to sound, as 'great', 'strong', 'high'.

There are no strictly distinctive words for the opposite of 'loud', which is generally covered by words for 'low', 'faint', 'gentle' or the like. But NHG *leise* (OHG *līso* 'gently') has come to be used mainly in relation to sound, as the opposite of *laut*. Paul, Deutsches Wtb. s.v.

15.51–15.54. The majority of the words for 'see' belong to certain inherited groups, pointing to a variety of IE roots used for 'see', but doubtless with some differentiation of application which is now beyond our ken.

The words for 'see', denoting the actual perception, may also be used for 'look, look at', especially in the imperative. But nearly always there are distinctive expressions for the latter notion, or at least such as are mainly so used. These are mostly different words, but in some cases only cpds. or phrases containing the words for 'see' (as NHG *ansehen*, Dan. *se paa*). However, the differentiation is not always so marked as in NE *see* and *look*. A gradual shift from 'look' to 'see' is observed in the history of Grk. βλέπω.

Several of the words for 'look' rest on the notion of 'watch, guard', and this has led further to 'see' in Grk. ὁράω. Some have come, through weakening of an intermediate 'stare at, gaze at', from 'wonder at' or 'forget oneself'.

The dependence of sight upon light is reflected in several words for 'see' or 'look' that are cognate with others for 'light, shine', etc.

Words for the subj. 'sight' are nearly all derivs. of the verbs for 'see', or in some cases 'look'. Many of these are also used for the obj. 'look, appearance' of something. But this latter may also be expressed by different derivs., including some (as NHG *aussehen*, Dan. *udseende*) that rest on the vbs. for the obj. 'look, have the appearance', or even by words that have no orig. connection with the notion of sight, as NE *appearance*. Some words that orig. denoted precisely this notion of 'look, appearance' have been widened to 'form, kind', as Grk. εἶδος, Lat. *speciēs*. Some of the words listed here appear also under 'form' (12.51), and conversely several of the words listed there may be used for 'appearance'. In fact, there is such a variety of expressions for 'look, appearance' that the selection is for some languages difficult, and a few of those listed under this head (15.54) are most commonly used with some more special application, as It. *vista*, etc., esp. to the 'view' of a landscape, It. *aspetto*, Fr. *aspect*, esp. to the 'looks, aspect' of a person. NE *sight* is used objectively (*a strange sight*, etc.) but is now obsolete for the characteristic 'look, appearance' of something (cf. NED s.v. I. 3).

The verbs for the obj. 'look, have the appearance, appear, seem' are not listed. This notion is logically related to the subj. 'see' or 'look' in the same way as the obj. to the subj. 'smell' or 'taste', and in part is expressed by forms of, or related to, the vbs. for 'see' or 'look'. Thus Lat. pass. *vidērī*, ON *sȳnask* (refl. of *sȳna* 'show', deriv. of *sȳnn* 'visible'), NHG *aussehen*, Lett. *izskatīt*, SCr. *izgledati*, etc. But the same notion may be arrived at from quite other points of view. Thus Grk. φαίνομαι, pass. of φαίνω 'make appear, show' : Skt. *bhā-* 'shine', etc.; NHG *scheinen*, also and orig. 'shine' (OHG *scīnan*, OE *scīnan* 'shine', etc.); It. *parere*, Fr. *paraître*, Sp. *parecer*, Rum. 3sg. *pare*, NE *appear*, fr. Lat. *(ad-)parēre* 'be present, appear, be manifest', etc.; It. *sembrare*, Fr. *sembler*, fr. Lat. *simulāre* 'make like, pretend'; ME *seme*, NE *seem*, fr. OE *sēman* 'be suitable' (cf. NE *beseem*), orig. 'be like' : NE *same*, Grk. ὁμός 'same', Lat. *similis* 'like', etc.

1. IE **weid-* in words for 'see' (Grk., Lat., Balto-Slavic) and 'know' (Grk., Celtic, Gmc., Balto-Slavic, Indo-Iranian). It is probable that the meaning 'know' is a secondary development starting in the perf. (Grk. οἶδα, Goth. *wait*, Skt. *veda*) as 'have seen' > 'know', but the view that 'see' is only a specialization of 'know', or that both notions are based on a common 'recognize', is also held. Walde-P. 1.236 ff. Ernout-M. 1104 ff. Here only the words for 'see, look, sight'.

Grk. aor. εἶδον, NG εἶδα, with derivs. εἶδος 'appearance, form, kind', etc.; Lat. *vidēre* (> It. *vedere*, Fr. *voir*, Sp. *ver*, Rum. *vedea*), deriv. *vīsus* 'sight' (subj.; in this sense replaced in Romance by new derivs., It., Sp. *vista*, Fr. *vue*, fr. pples., Rum. *vedere* old infin.); Lith. *veizdėti* 'look' (obs.), Lett. *viedēt* 'see' (but in rather special uses, cf. Mühl.-Endz. 4.652), *veids* 'appearance' (Lith. *veidas* 'face'); ChSl. *videti*, etc., general Slavic for 'see', with sbs. for 'sight' or 'appearance', ChSl. *vidŭ*, SCr., Boh.,

Russ. *vid* (Pol. *wid* obs. except in a phrase).

2. IE **derk̑-*. Walde-P. 1.806 f.

Grk. δέρκομαι, δέδορκα, ἔδρακον 'see, look, gaze', poet. only; Ir. *ad-con-darc*, used as perf. of *ad-cīu* 'see', NIr. *dearcaim*, W. *edrych* 'look, behold', Ir. *rodarc* 'sight' (subj.), NIr. *radharc* 'sight' (subj., obj.), W. *drych* 'sight (obj.), appearance', here also Ir. *derc* 'eye'; Skt. *dṛç-* reg. word for 'see' except in pres. (*paç-*), deriv. *dṛṣṭi-* 'sight' (subj.), *dṛç-* 'sight (obj.), look, appearance' (cf. *tādṛç-* 'such, like'), Av. *darəs-* 'see, gaze on' (much less common for 'see' than *vaēn-*).

3. IE **spek̑-*. Walde-P. 2.659 f. Ernout-M. 960 ff.

Lat. *specere*, *spicere*, mostly in cpds., of which for simple 'look' esp. *aspicere*, whence *aspectus* sometimes for subj. 'sight', usually obj. 'look, appearance', as also *speciēs;* Grk. σκέπτομαι (for *σπέκτομαι) 'look carefully', later 'consider'; OHG *spehōn* 'look at carefully', NHG *spähen*, etc. (NE *spy* through OFr. *espier*); Skt. *paç-* (*spaç-* in some forms), usual word for 'see' in present, Av. *spas-* 'look upon, observe, regard'.

4. IE **ok^{w}-*, much more widespread in words for 'eye' (Grk. ὄσσε, ὄμμα, etc., Lat. *oculus*, Skt. *akṣi*, etc., 4.21) than in vb. forms. Walde-P. 1.169 ff. Ernout-M. 697 f.

Grk. ὄψομαι, serving as reg. fut. to ὁράω, also perf. ὄπωπα (poet.), with deriv. ὄψις 'sight' (subj. and obj.); Skt. *īkṣ-* 'see, look, observe' (desid. form), Av. *aiwi-ākš-* 'watch over' (Barth. 311).

5. IE **leuk-*, ultimately the same as in words for 'light, bright', Lat. *lūx*, Grk. λευκός, etc. Walde-P. 2.411.

Grk. λεύσσω 'look at, behold'; W. *golwg* 'sight' (**upo-luc-*, cf. Pedersen 1.122); Lett. *lūkuot* 'look at, observe' (Lith. *laukti* 'wait for, expect', OPruss. *laukīt* 'seek'); Skt. *lok-* (esp. cpds.) 'look'.

6. Grk. ὁράω, 'see' and 'look', as orig. 'watch' : Hom. οὖρος 'watcher, guard', Att. φρουρός 'guard' (*προ-hopos), ἔφορος 'overseer, guardian, ruler', ὤρα 'care', θυρωρός 'doorkeeper', etc., these (either with secondary unexplained ', or fr. **swer-* beside **wer-*) : OE *waru* 'guarding, care', *wær* 'on guard, careful' (NE *ware*, *aware*, *beware*, etc. large Gmc. group), Lat. *verērī* 'feel awe of, revere', etc. Walde-P. 1.284. Boisacq 709 f. Ernout-M. 1089.

Grk. εἶδον, above, 1; ὄψομαι, ὄψις, above, 4; δέρκομαι, above, 2.

Grk. βλέπω (derivs. βλέμμα 'look, glance', βλέφαρον 'eyelid', etc., and dial. forms γλέπω, γλέφαρον), mostly 'look', sometimes intr. 'see, have power of sight', later also trans. 'look at' and 'see' (all these uses in NT), now the reg. pres. for 'see' in NG, etym.? Boisacq 122 f. For detailed discussion of the preceding Grk. words (also those for 'eye'), cf. A. Prévot, Rev. de phil. 61.133 ff., 233 ff.

NG κοιτάζω 'look, look at' (also spelled κυττάζω, based on a false etym.), in form = late κοιτάζω 'put to bed', 'fold' (cattle), etc., deriv. of κοίτη 'bed, lair', but in the meaning 'observe' (attested from 10th. cent. A.D.) reflecting Hellenistic κοιτῶ 'keep, guard', attested in Hellenistic cpds. used as military terms (ἐπικοιτῶ, παρακοιτῶ Polyb., προκοιτῶ Dio Cass., etc.), and the use of κοίτη as a military term for the quarters of the 'guard, watch' (κοίτη τῶν φυλακιτῶν in pap. of 3d. cent. B.C.; κοίτη alone in Aen. Tact., etc.). Semantic development as in Grk. ὁράω (above), It. *guardare*, Fr. *regarder* (below, 7), and Grk. τηρέω 'watch over, guard' and 'watch, observe', NG παρατηρῶ 'look at, observe,' pop. τήρα 'look!'. For history of the long discussion of κοιτάζω, cf. Χατζῆς, 'Αθηνᾶ

'Show' is virtually 'cause to be seen', and, in fact, the most common relationship of the terms is with words for 'see, look, eye, appear, shine'. A few are connected with words for 'wise' or 'know', hence orig. 'cause one to know'. In one case the development is 'stretch' > 'spread out' > 'display, show'. In the one inherited group (below, 1), if one takes into account all the derivs. (e.g. Skt. *diç-* 'direction, cardinal point, region', Lat. *digitus* 'finger', etc.), it seems likely that the primary notion was 'point (as with the finger), point out'.

The majority of the words listed under 'shine' are used primarily of luminous bodies (*the sun shines*, etc.), and then also of things with surfaces which 'shine, gleam, glisten' with reflected light. But some are used only or mainly with either the former or the latter application. The number of words that may be used for 'shine, gleam, glisten', etc. is appallingly large, and only those that seem the most important are considered.

Many of the adjs. for 'bright', like the vbs. for 'shine', are used both of luminous bodies or of anything that is 'light, full of light' (as the *bright sun, sky*, etc.) and of things with surfaces reflecting light (as *bright silver*, etc.), not to speak of the varied secondary applications to intelligence or disposition. But some of those listed are used only with reference to actual light and some only with reference to 'bright' surfaces and with still further idiomatic preferences according to the object described.

The majority of the words are related to those for 'light' (1.61) or those for 'shine' (15.56). Some are simply pples. of the latter, and many other such words for 'shining' might have been included as virtually equivalent to 'bright'.

1. Grk. *λαμπρός* (NG pop. only in fig. sense 'splendid'; in lit. sense *λαμπερός*) : *λάμπω* 'shine' (15.56).

Grk., Ion. *φαεινός*, Lesb. *φάεννος*, Att. *φᾱνός*, also *φωτεινός*, derivs. of *φάος*, *φῶς* 'light' (1.61), like *φαείνω* 'shine' (15.56).

Grk. *φαιδρός* (also 'gay, cheerful' as in NG) : Lith. *giedras* 'fair, clear, serene', *gaisas*, *gaisa*, Lett. *gaiss* 'reflected light in the sky', Lett. *dzīdrums* 'clearness',

gaišs 'bright, clear', etc. Walde-P. 1.665. Boisacq 1010.

NG, beside *φωτεινός*, *λαμπερός*, also *φωτερός* new deriv. of *φῶς* 'light'. For 'bright' surfaces *γυαλιστερός* : *γυαλίζω* 'shine, polish', fr. *ὕαλος* 'glass'.

2. Lat. *clārus* (> It. *chiaro*, etc.), also and orig. of sound 'clear, loud' (15.45).

Lat. *lūcidus* (> It. *lucido*, etc.), deriv. of *lūx* 'light'.

'Color' is treated by Aristot., De anim. 418ᵃ 27 ff. as the obj. parallel to the subj. 'sight', like 'sound' to 'hearing', etc.; and while 'color' is only one aspect (beside 'form, shape') of an object's 'look, appearance' (the true obj. notion parallel to 'sight'), it is the most conspicuous and one depending wholly on sight. Hence it is appropriate to discuss color words here, while those for the countless other objects of sight are distributed elsewhere, e.g. 'form, shape' under spatial relations.

Most of the words for 'color' reflect such notions as 'covering', 'surface, skin', 'countenance, look', or the 'hair' of animals, indicating that they were used primarily with reference to the color, the complexion of human beings, or the color of animals, which is that of their hair. But there is also a use of 'flower' for 'color', and some are connected with words used elsewhere of some special color.

1. Grk. *χρῶμα* (also *χρόα*, *χροιά*) : *χρώς* 'skin, surface', rarely also 'complexion, color', *χρώζω* 'touch the surface', whence 'tinge, stain', *χραύω* 'scrape, graze, wound slightly', Lith. *grusti* 'bruise, crush', etc. Walde-P. 1.648 ff. Boisacq 1071.

2. Lat. *color* (> Romance words), as orig. 'covering' : *occulere*, *cēlāre* 'hide' (cf. Skt. *varṇa-*, below, 7). Walde-P. 1.432. Ernout-M. 206. Walde-H. 1.247.

Rum. *față* 'face, surface', also 'color', fr. VLat. *facia* = *faciēs* 'face'. REW 3130.

3. Ir. *dath*, perh. : Ir. *date* 'agreeable' (cf. NIr. *dathamhail* 'pleasant, comely, graceful'). Pedersen 1.418.

NIr.	*ēadtrom*	NHG	*hell(licht)*		
W.	*golen*				
Br.	*sklaer*				

Most of the words for 'light' in color are the same as those for the broader 'light' = 'bright' (15.57), and this special use is mostly modern. So NE *light* in this sense from 15th cent., MHG *lieht* rarely in cpds. as *liehtblā* 'light blue', NHG *licht* usual in Austria vs. *hell* with reference to color (Kretschmer, Wortgeogr. 234).

Other terms are:

1. Grk. λευκός, orig. 'bright', but mostly 'light in color', esp. 'white' : Lat. *lūx*, OE *leoht* 'light', etc. (1.61).

2. NG ἀνοιχτός, lit. 'open', fr. ἀνοίγω 'open'. Similarly, and prob. by semantic borrowing, Rum. *deschis*, fr. *deschide* 'open' (12.24).

3. NIr. *ēadtrom*, 'light' in weight (15.82), also 'light' in color (Dinneen, McKenna), doubtless after the double use of NE *light* in which two different words are merged.

ME *pale* (NE also sometimes in this sense, as *pale blue*, etc., cf. NED s.v.), fr. OFr. *pâle*, Lat. *pallidus* 'pallid, pale' : Grk. πελιός 'livid', πολιός 'gray', Skt. *palita-* 'gray, hoary', *paṇḍu-* 'whitish yellow, white', OE *fealo*, OHG *falo*, Lith. *palvas* 'fallow' ('light brownish or reddish yellow'), ChSl. *plavŭ* (renders λευκός Jn. 4.35, but with reference to fields of grain, hence here also 'yellowish'). Many of the words for 'dark' in color are the same as those for 'dark' = 'lacking light', these again mostly connected with the sbs. for 'darkness' already discussed in 1.62. Some are the same as, or derived from, those for 'black'; some rest on the notion of 'deep'; others are of various sources.

Av. *axšaēna-*, neg. cpd. : *xšaēta-* 'bright' (15.57). Barth. 51.

15.64–15.69. Abstract color names are late in linguistic history. They are generally lacking in languages of primitive peoples, whose notion of color is closely bound up with that of a specific object, as, for example, 'white' with snow or milk, 'blue' with the sky, 'green' with plant life, etc. Many of the words discussed below, and others, like NE *orange, violet*, have just such an origin.

In the IE period the development had probably not advanced much beyond this stage, and even in historical times there is still much fluctuation and overlapping in the application of color words. There is only one group of cognates that is so widespread and consistent in meaning as to point clearly to an IE color name with definite application, namely the group for 'red'. There are some cases of agreement between two branches in words applied to the same color, and there are some extensive groups from a common root but applied to a variety of colors, so that the primary application is obscure. The most conspicuous interchange is in words for 'green' and 'yellow', perhaps because they were applied to vegetation like grass, cereals, etc., which changed from green to yellow.

For the Skt. terms, of Macdonell-Keith 2.246 f.

Wood's Color-Names (Halle, 1902) covers a vast range of material and deals with the remoter root connections.

The majority of the words for 'red' belong to an inherited group pointing to an IE word for 'red'. Several of the others are derived from names of vegetable or animal sources of red dye; some from 'rosy' or 'glowing'.

1. IE **reudh-*. Walde-P. 2.358 f. Ernout-M.872. REW 7408, 7465, 7466. Falk-Torp 932.

Grk. ἐρυθρός; Lat. *ruber*, and (dial.) *rūfus* mostly 'light red' (esp. of hair), Umbr. *rufru* 'rubros', also Lat. *rubeus* 'reddish' (> Fr. *rouge*, etc.), and (**rudhtos*) *russus* (> It. *rosso;* Fr. *roux* of hair), whence *russeus* 'reddish' (> Sp. *rojo*, Port. *roxo*); Ir. *rūad*, NIr. *ruadh*, W. *rhudd*, Br. *ruz;* Goth. *rauþs*, ON *rauðr*, OE *rēad*, etc., general Gmc., also with different grade ON *rjōðr*, OE *rēod;* Lith. *raudas*, now usually *raudonas*, also *rudas* 'red-brown', Lett. *ruds* 'reddish'; late ChSl. *rŭdrŭ* (*rĭdrŭ, rodrŭ*), *ryždĭ, rumĕnŭ* (SCr. *rumen*, Boh. *ruměný*, Pol. *rumiany*, Russ. *rumjanyj* 'flushed, red' of complexion), etc. (cf. Trautmann, 238 f.); Skt. (Vedic) *rohita-*, later *lohita-*, Av. *raoiδita-* (Skt. *rudhira-* 'bloody', exp. sb. 'blood').

2. NG κόκκινος, in class. Grk. 'scarlet', but now the pop. word for 'red', deriv. of Grk. κόκκος 'grain, seed', and esp. 'gall of the kermes oak' yielding scarlet dye. Hence Lat. *coccinus* and *coccum* (late *coccus*) used also for 'scarlet (color)' and 'scarlet garments'.

3. Rum. *roş(u), roşiu*, fr. Lat. *roseus* 'rose-colored', deriv. of *rosa* 'rose'. REW 7379. Puşcariu 1475.

4. Ir. *derg*, NIr. *dearg* : OE *deorc* 'dark', etc. (15.63). Walde-P. 1.855.

W. *coch*, fr. Lat. *coccus* (above, 2). Loth, Mots lat. 150.

Many of the words for 'blue' are from roots that appear in the names of other colors, as 'gray', 'black', 'yellow', 'green', the primary application of which is uncertain. Some are derived from names of the sky, lapis lazuli, etc.

1. Grk. κυάνεος, κυανοῦς, fr. κύανος 'dark-blue enamel' used in adorning armor, 'lapis lazuli' (Theophr.), 'blue copper carbonate', etc. Prob. non-IE word. Boisacq 527.

NG γαλανός, etym. disputed. The old deriv. fr. a Doric form of γαληνός 'calm' (esp. of the sea) is unconvincing. Perh. as orig. 'bluish-white' (on some of the islands γαλανός = ἄσπρος 'white') fr. γάλα 'milk', with suffix often the analogy of μελανός (really μελαν-ός) 'blue-black, livid'. From the same source (γάλα or otherwise) Byz., NG γαλάζιος with different suffix.

NG μαβύς, fr. Turk. *mavi* 'blue'.

2. Lat. *caeruleus*, and earlier *caerulus*, by dissim. for **caelo-los*, deriv. of *caelum* 'sky'. Walde-P. 1.420. Ernout-M. 131. Walde-H. 1.133.

Fr. *bleu* (> It. *blu*, NG μπλέ), fr. a Frank. form corresponding to OHG *blāo*, etc. (below, 3). REW 1153.

It. *azzurro*, Fr. *azur*, Sp. *azul*, through Arab. *lāzwardī*, fr. Pers. *lāžward* 'lapis lazuli, azure-colored'. REW 4959. Lokotsch 1311.

Rum. *albastru*, orig. and still dial. 'whitish', deriv. of Lat. *albus* 'white', as if VLat. **albaster*, with suffix as in It. *biancastro* 'whitish', etc. REW 319. Tiktin s.v.

3. Ir. *gorm* (W. arch. *gwrm* 'dusky, dim, dark blue'), etym. dub. (: Lat. *formus* 'warm', Skt. *gharma-* 'glow, heat', etc.?). Walde-P. 1.688.

Ir. *glass* 'blue-gray, green-gray' (e.g. 'blue' of the eye, Windisch, Tāin 1.5550; 'gray' of mist, id. 1.5042, 5058; 'green' of garlic, Anc. The exact color to which the Gmc. term applies varies in the older dialects; MHG *blā* is also 'yellow', whereas the Scandinavian words may refer esp. to a deep, swarthy black, e.g. ON *blāmaðr*, NIcel. *blāmaður* 'Negro'. Walde-P. 2.212. Walde-H. 1.513 f. Falk-Torp 78. NED s.v. *blue*.

15.71–15.73. The arrangement here is different from that followed in the lists for the other senses. First place is given to the vbs. for touch, which, though the source of many of the sbs. for the 'sense of touch', are not themselves used for 'feel' = 'perceive by touch', but only for the antecedent action—and so are not co-ordinate with 'smell', 'taste', 'hear', 'see'. The vbs. listed in 15.72 are used for 'feel of' (as defined above, pp. 1018 f.) or 'feel about, feel one's way, grope', some mostly in the one or the other sense, some in both—but not for 'feel' = 'perceive by touch', except W. *teimlo*, and NE *feel* with its Gmc. cognates, which primarily belong to this group but came to be used also for 'perceive by touch'. Generally there is no distinctive verb for 'perceive by touch', which is expressed by the generic words for 'perceive by the senses', so that a list of words for this notion would be virtually a repetition of that in 15.11 and is therefore omitted here.

The nouns for 'sense of touch', listed in 15.73, are all connected with the verbs listed in 15.71 or 15.72. Although some of the verbs and nouns are also used objectively (cf. NE *it feels soft, the feel of it*), the obj. notion is more often expressed by periphrasis and is ignored here.

In contrast to the words for the other senses, there is no important inherited group of cognates for 'touch' or 'feel'. The words reflect a great variety of no-

tions, such as 'grasp, seize, catch', 'strike', 'stroke', 'tear', 'adhere', 'approach', 'reach', involving contact or sudden motion, several of these of imitative orig., based on syllables symbolic of sudden motion.

1. Grk. *ἅπτομαι* 'fasten, grasp, touch' (act. *ἅπτω* less common), sb. *ἁφή* 'touch', perh. : Skt. *yabh-*, SCr. *jebati* 'have sexual intercourse', as orig. 'lay hands on, touch' (cf. the similar special use of *ἅπτομαι*, Lat. *tangere*, and NE *touch*). Walde-P. 1.198. Brugmann, IF 32.319 ff.

Grk. *ψαύω* 'touch', whence *ψαῦσις* 'sense of touch' (Democr., Diel, Fragm. 1.389), perh. fr. another extension of a root **bhes-*, parallel to that in *ψῆν* 'rub'. Boisacq 1076. Persson, Beiträge 655, 826.

Hence NG pop. *ψάχνω* 'feel around for, search' (re-formed fr. aor. *ἔψαξα*, this by dissim. fr. *ἔψαψα*, i.e. old *ἔψαυσα*). Hatzidakis, Einl. 403, 409.

Grk. *ψηλαφάω* 'feel', esp. 'feel around for, grope', NG *ψηλαφῶ* id., fr. a cpd. of *ἁφή*, and a form of *ψάλλω*, aor. *ἔψηλα* 'touch sharply, pluck' (the hair, a bowstring, etc., then esp. the strings of a harp, etc.), this perh. : Lat. *palpāre* 'stroke', OE *fēlan* 'feel', etc. Walde-P. 2.6 f. Ernout-M. 726.

NG *ἀγγίζω* 'touch', fr. class. Grk. *ἐγγίζω* 'approach', deriv. of *ἐγγύς* 'near'.

NG pop. *πασπατεύω* 'feel around, grope', perh. re-formed (after some vb. in *-τεύω*) fr. a locally attested *πασπαλεύω* of similar meaning (: *πασπάλη* 'fine meal'). Hatzidakis, Ἀθηνᾶ 29, *παράρτ*. 8.

2. Lat. *tangere* 'touch' (*attingere* > Rum. *atinge* 'touch'), sb. *tāctus* (> It. *tatto*, Fr. *tact*, Sp. *tacto;* Rum. *atingere* old inf. of *atinge*) : Grk. *τεταγών* 'having seized', OE *þaccian* 'stroke', further connections dub. Walde-P. 1.703. Ernout-M. 1017.

Lat. *temptāre* (*tentāre*) 'feel of', also 'make trial of, try' (> It. *tentare*, Sp. *tentar* 'feel of', but mainly 'try' or 'tempt', as Fr. *tenter*), see 9.97.

It. *toccare*, Fr. *toucher* (> ME *touche*, NE *touch*), Sp. *tocar* 'touch', fr. VLat. *toccāre* 'strike, hit, give a knock' (cf.Sp. *tocar* also 'knock' on a door, 'ring' a bell, Rum. *toca* 'hack' and 'ring' a bell, It. *tocco* 'stroke' of a bell or knocker, etc.), deriv. of an imitative *toc* as in Fr. *toc toc*, NE *tick-tock*, etc. REW 8767.

Fr. *touche* 'act of touching' (> ME *touche*, NE *touch* used also for the sense of touch), back-formation fr. *toucher*.

Fr. *toucher* sb. use of infin., now usual expression for sense of touch, rather than *tact*, which is now mostly 'sense of propriety'.

It. *tastare*, Fr. *tâter* 'feel of, feel about' (OFr. *taster* > MHG, NHG *tasten* id., ME *taste* 'feel of' and 'taste'), fr. VLat. *tastāre*, this prob. fr. **taxitāre*, new frequent. to *taxāre* 'feel, handle', frequent. of *tangere*. But some assume a blend of Lat. *tangere* and *gustāre*. REW 8595. Gamillscheg 836.

Lat. *palpāre* 'stroke, touch lightly', late 'feel one's way' and 'feel of' (e.g. Vulgate, Lk. 24.39; in this sense > It. *palpare*, Fr. *palper*, Sp. *palpar*) prob. : OE *fēlan*, etc. (see below, 4).

Rum. *pipăi* 'feel of, feel about', fr. Slavic SCr. *pipati*, etc. (below, 6). Tiktin s.v.

3. OIr. *do-aidlea* (3sg.), lit. 'visit, approach', but usual also (cf. NG *ἀγγίζω*, above, 1) for 'touch' (e.g. *d-an-aidlea Cū Chulainn iarum co fogaid in chlaideb* 'Cūchulainn touches him then with the edge of the sword', cf. LU 5678), vbl. n. *tadall* ('visit'), NIr. *tadhall* ('sense of touch'), whence MIr. *taidlim*, NIr. *taidhlim* 'go up to, approach, visit, reach, touch, handle', etc. (Dinneen), fr. **to-ad-ell-*, cf. *ad-ell-* (3sg. *ad-ella*) 'visit', cpd.

of *el-* in forms of vb. for 'go' (10.47). Pedersen 2.509.

NIr. *glacaim* 'grasp, take hold of', also 'feel of' (e.g. NT, Lk. 24.39), fr. *glac* 'the half-open fist, grasp'.

W. *cyffwrdd* 'touch', cpd. of *cyf* 'con-' and *hwrdd* 'push, thrust'.

W. *teimlo* 'feel' (hence *teimlad* 'feeling, touch'), etym. dub. (Morris Jones 160 : Lat. *tangere*, but??).

MW *tafaw, tavaw*, Corn. *dava* 'feel of', see under Br. *tañva* 'taste' (15.31).

Br. *touch* 'touch', sb. *touch*, fr. Fr. *toucher, touche* (above, 2).

Br. *steki*, sb. *stok*, 'shock, hit' and 'touch', fr. Fr. *toquer* 'touch, hit'. Henry 254. Ernault, Glossaire 659.

Br. *merat, mera* 'feel of' through 'handle = *mera* 'direct, administer', fr. *maer, mer* 'mayor'. Ernault, Glossaire 383 f. Loth, Mots lat. 183.

Br. *dournata* 'handle, feel of', fr. *dourn* 'hand' (4.33).

4. Goth. *tēkan, attēkan* 'touch' : ON *tāka* 'seize, take', etc. (11.13).

ON *snerta* 'touch' : Dan. *snerte*, Sw. *snärta* 'lash, jibe', Norw. *snerta* 'set in rapid motion, lash', all prob. fr. an imitative syllable seen in ME *snar*, NE *snarl*, etc. Falk-Torp 1094. Hellquist 1021.

ON *koma við* 'touch', lit. 'come against', hence *viðkvāma* 'contact, touch', also *viðkoma* (so NIcel.).

ON *þreifa* 'grasp', also 'feel of', Sw. *treva* 'feel, grope', *treva på* 'feel of', prob. : Lith. *trypti* 'trample'. Falk-Torp. 1284. Hellquist 1219.

OE *fēlan, gefēlan*, ME *fele*, NE *feel*, Du. *voelen*, OHG *fuolen*, MHG *vüelen*, MLG *volen* (> Dan. *føle*), NHG *fühlen* (lost in South German; Kretschmer, Wortgeogr. 210 f.), the general WGmc. word for 'feel of' and for 'feel' as 'perceive by touch', and hence also with wider application to perceptions and emotions, even in the earliest periods (ME *fele*, Du. *gevoelen* the most general words for 'perceive by the senses', cf. 15.11), prob. : Lat. *palpāre* 'stroke', late 'feel' (above, 2), and perh. Grk. *ψάλλω* 'pluck', *ψηλαφάω* 'feel, grope' (above, 1). Walde-P. 1.7. Ernout-M. 726. Falk-Torp 290. Franck-v. W. 753. Otherwise (: Lat. *palma*, OE *folm*, etc., 'palm of the hand', which are fr. the root of Lat. *plānus* 'flat', etc.) Weigand-H. 1.595, Kluge-G. 178, NED s.v. *feel* vb. Hence the derivs. for 'touch, sense of touch', Dan. *følelse*, more specifically *føle-sans*, ME *fele, feling*, NE *feeling* (still in part specific, of NED s.v. 2), NHG *gefühl*, Du. *gevoel*.

Sw. *känna*, both 'feel of' (esp. with *på*) and, more generally, 'perceive, feel' : ON *kenna* 'perceive (by taste, smell, touch), know, recognize, etc.' (15.11). Hence Sw. *känsel* '(sense of) touch'. Hellquist 546.

OE, OHG *hrīnan*, ME *rine*, MHG *(be)rīnen* 'touch' : ON *hrīna* 'adhere, take effect on', perh. fr. a root **krei-* in Lett. *kriet* 'skim' (cream from milk), *kriens*, Lith. *kriena* (*krena*, NSB) 'thin skin on boiled food or milk', and OE *hrīm*, etc. 'hoar-frost'(??). Walde-P. 1.478. Falk-Torp 899 f. Mühl.-Endz. 2.284.

OE *hreppan, hrepian*, ME *repe, repie* (rare) 'touch' : ON *hreppa* 'catch, obtain', OE *ā-ræpsan* 'carry off', OHG *raspōn* 'scrape together', and MHG, NHG *raffen* 'snatch up', etc. Walde-P. 2.589. Falk-Torp 880.

OE *grāpian* (e.g. Gospels, Lk. 24.39 for *ψηλαφάω*, Vulgate *palpāre*), ME *grope* 'feel of' and 'feel about' (NE *grope*), OHG *greifōn*, MHG *greifen* 'feel of', iter. to OE *grīpan*, ON *grīpa*, Goth. *greipan* 'seize, grasp', OHG *grīfan*, MHG *grīfen* 'seize', sometimes (esp. MHG) also

'touch', NHG *greifen* 'seize' (11.14). NED s.v. *grope*.

OE *gefrēdan* 'feel, perceive, be sensible of' (hence *gefrēdnes* 'sense of feeling', mentioned along with 'sight' and 'hearing', in quot. in Bosworth-Toller s.v.), ME *ivrede, frede* = OHG *fruoten* 'teach, make wise', fr. OE *frōd*, OHG *fruot* 'wise, sagacious'. NED s.v. *frede*.

ME *touche*, NE *touch*, fr. Fr. *toucher* (above, 2).

ME *taste* (also 'taste' as NE), Du., MHG, NHG *tasten*, fr. OFr. *taster* (above, 2).

Du. *aanraken* 'touch', in this sense less usually simple *raken* but this mostly 'hit' = MLG *rāken* 'hit, reach, fall upon', prob. : Du. *rekken*, OHG *recken* 'stretch out', OE *reccan* 'stretch, reach, direct', Goth. *ufrakjan* 'stretch up', etc. 'Touch' prob. fr. 'stretch out' (the arm) or 'reach'. Falk-Torp 870 f., 929. French-v. W. 532, 543.

OHG *(h)ruoren*, MHG *(be)rüeren* 'touch, move, stir', NHG *berühren* 'touch' (simple *rühren* now reserved for 'move, stir'), Dan. *røre*, Sw. *röra* (properly 'move'; 'touch' prob. in imitation of German, and in this sense more usually Dan. *berøre, røre ved*, Sw. *beröra, vidröra*), with derivs. for 'touch, sense of touch', OHG *gihrōrida* (also 'motion'), MHG *gerüerde, berüerde* : ON *hrœra* 'move, stir', OE *hrēran* 'move, stir, shake', prob. fr. the root in Grk. *κεράννυμι* 'mix', Skt. *çrā-* 'cook, bake' (fr. 'mix'). Walde-P. 1.419 f. Falk-Torp 937.

5. Lith. *liesti*, intens. *lytėti* 'touch' (NSB; Kurschat has *pakrutinti* 'touch' in Wtb. and NT) : Lett. *laitīt* 'stroke', fr. **lei-t-* (perh. in Grk. *λίτομαι, λίσσομαι* 'beseech', as orig. 'seek by caresses'), an extension of **lei-* in Lat. *linere* 'smear', etc. Walde-P. 2.391.

Lith. *čiupinėti* 'feel of', frequent. of *čiupti* 'grasp', here also *čiuopti* 'feel about' (and 'grasp'), whence *čiuopimas* 'sense of touch' (all in NSB; only *čiopti* 'grasp' in Kurschat), deriv. of an imitative syllable like Lith. *čiupt* symbolic of quick motion and used esp. in phrases with 'seize, grasp' (cf. Kurschat s.v.).

Lett. *aiztikt*, 'arrive, attain', and 'touch', cpd. of *tikt* 'arrive, attain, reach'. Mühl.-Endz. 1.156, 3.184 f.

Lett. *aizskart* 'touch' (this word used in NT), fr. *aiz-si-kart*, cpd. of *kart*, replaced by *k'ert* 'grasp'. Mühl.-Endz. 1.50, 2.369 f.

Lett. *taustīt* 'feel of', with sb. *tauste* 'sense of touch', prob. through notion of being careful : Lith. *tausoti* 'be sparing', fr. same root as Lith. *taupyti*, Lett. *taupīt* id. Mühl.-Endz. 4.140.

6. ChSl. *kosnąti, pri-kasati* 'touch' (the reg. words in the Gospels) : *česati* 'comb, stroke', Lith. *kasyti* 'scratch', etc. Walde-P. 1.449. Berneker 151 f., 581 f.

ChSl. *prisęgnąti, prisęšti* 'touch' (Supr.), *osęgnąti, osęzati* 'feel of' (Supr.), with sb. *osęzanĭje* (late), Russ. *osjazat'* 'feel of', *osjazanie* 'sense of touch', cpds. of ChSl. *sęgnąti* 'stretch out' (the hand), this prob. : Lith. *segti* 'fasten', Skt. *saj-* 'hang', etc. Miklosich 291. Brückner 490. Trautmann 252. Otherwise Walde-P. 2.480 f., 482 f.

ChSl. (late), SCr. *pipati*, Bulg. *pipam*, etc. 'feel of' (> Rum. *pipăi*), with SCr. *opip* 'sense of touch', prob. fr. an imitative syllable. Cf. Lith. *čiupinėti*, etc., above, 5.

SCr. *doticati*, Boh. *dotknouti se*, Pol. *dotknąć* 'touch', with Pol. *dotykanie* or *zmysł dotykania* 'sense of touch', cpds. of root seen in ChSl. *tŭknąti, tykati* 'fix, stick, prick, strike' : Grk. *τύκος* 'mason's hammer', Skt. *tuj-* 'thrust', etc. Walde-P. 2.615 f. Brückner 571.

SCr. *dirati* 'touch, handle' : ChSl.

dĭrati, etc., general Slavic for 'tear', Goth. *tairan* 'tear', etc. (9.28). Berneker 201.

Boh. *hmatati* 'feel of', *hmat* 'sense of touch', prob. of imitative orig. Berneker 391.

Boh. *makati*, Pol. *macać* 'feel of', perh. : Boh. *mačkati* 'squeeze', both of imitative orig.? Berneker 2.1, 2. Brückner 316.

Russ. *trogat'* 'touch', given without any connections in Miklosich 362, but prob. fr. ChSl. *trŭgati* 'tear, snatch', with semantic development through 'grasp' (as often), and phonetic treatment after analogy of cases in which ChSl. *rŭ* = Slavic *rŭ*, Russ. *ro*.

Russ. *(o)ščupat'* 'feel of, feel about', doubtless of imitative orig., like Lith. *čiupinėti* (above, 5).

7. Skt. *spṛç-* 'touch', also 'feel' as 'perceive by touch' (equated with vbs. for 'smell', 'taste', etc.; cf. BR s.v., 3), *sparça-* 'sense of touch', etym.?

Several of the words for 'soft', as appears from their probable root connections, are based on what is 'crushed, rubbed, bent' or 'moistened'. Or 'soft' and 'weak' may rest on the common notion of 'yielding'. In a few, 'soft' is secondary to 'pleasant'.

1. Grk. *μαλακός* : *βλάξ* 'stolid, stupid', *βληχρός* 'faint, gentle', fr. a guttural extension of the root **mel-* in Lat. *molere*, etc. 'grind'. Cf. Lat. *mollis*, etc. (below). Walde-P. 2.290. Boisacq 604.

2. Lat. *mollis* (> It. *molle*, Fr. *mou*, Sp. *muelle*, Rum. *moale*), fr. **moldwis* : Skt. *mṛdu-* 'soft, tender', Grk. *ἀμαλδύνω* 'weaken, destroy', W. *blydd* 'sappy, soft, tender', ChSl. *mladŭ* 'young, tender', etc., fr. an extension of the root **mel-* in Lat. *molere*, etc. 'grind' (orig. Words for 'rough' were doubtless all orig. used with some more specific application, as to the sea, the hair, the skin, etc. In some cases this is apparent from the etymology.

'Rough' may always be expressed as 'uneven' or 'not smooth', and for some languages or periods such terms are more common than any others.

1. Grk. *τρᾱχύς* : *θρᾱ́σσω, ταράσσω* 'stir, disturb, trouble', this prob. : ON *dreggjar* 'dregs', OLith. *dragis* 'dregs', etc. Walde-P. 1.854 f. Boisacq 981. 'Rough' prob. first of the sea that is 'stirred up, made rough'. Cf. *ἐτάραξε δὲ πόντον* (Hom.), *κύμασιν ταράσσεται πόντος* (Archil.), etc.

2. Lat. *asper* (> It. *aspro*, Fr. *âpre*, Sp. *áspero*, Rum. *aspru*), prob. fr. **ap(o)-spero-* : Skt. *apa-sphur-* 'bursting forth,

splashing out', fr. the root of Lat. *spernere* 'reject, despise', Skt. *sphur-* 'spurn, dart, spring', etc. Walde-P. 2.669. Walde-H. 1.73.

It. *ruvido*, fr. Lat. *rūgidus* (gl.) = *rūgōsus* 'wrinkled' (> Fr. *rugueux*), deriv. of Lat. *rūga* 'wrinkle'. REW 7427. Gamillscheg 776. Ernout-M. 874.

Br.	kompez	NHG	glatt, eben		

Words for 'smooth' reflect such notions as 'slippery', 'even, level' (and so ultimately 'like, equal'), or 'bright, shining', all of which are naturally associated with smooth surfaces.

1. IE *lei-, *slei- (with various formations) in words for 'slimy, slippery' substances, and in vbs. for 'slip, smear, stick, etc.', cf. Lat. līmus 'mud, mire', OE lām, OHG leim 'clay', ON, OE slīm 'slime', etc.; Grk. ἀλίνω 'smear, anoint', Lat. linere 'smear', etc. Walde-P. 2.389 ff. Ernout-M. 542. Walde-H. 1.782. Falk-Torp 1061 f.

Here as 'smooth', Grk. λεῖος, Lat. lēvis, W. llyfn (: Ir. slemun 'slick, slippery'); Goth. slaihts, ON slēttr, Sw. slät, ME sleghte, slighte (NE slight now 'slender, small in quantity', etc.), OHG, MHG sleht (NHG schlecht now 'plain, bad'); ON slīkr (rare).

2. It. liscio, Fr. lisse, Sp. liso, prob. fr. Gmc., cf. MHG līse, NHG leise 'low, soft, gentle'. REW 5081. Bloch 2.19.

Fr. uni, lit. 'joined', hence (as 'joined closely') also 'smooth' (so also sometimes It. unito of road, land, etc.), pple. of unir, It. unire, etc. 'join, unite'.

Rum. neted, fr. Lat. nitidus 'bright, shining' (15.57). REW 5929.

3. Ir. rēid, NIr. rēidh, also 'open, clear, level, flat', prob. orig. of a way 'passable' : Ir. rīadaim, OE rīdan 'ride', etc. (cf. with similar development W. rhwydd 'free, easy, fluent, ready'). Walde-P. 2.349. Pedersen 1.58.

Ir. mīn, also 'gentle, tender, fine' : W. mwyn 'kind, gentle, dear', fr. an extension of the root *mei- in Lat. mītis 'mild', Ir. mōith 'soft, tender' (15.75). Walde-P. 2.244. Pedersen 1.51.

W. llyfn, above, 1.

Br. kompez, fr. MBr. compoes 'equal' : W. cymmwys 'of the same weight, proper, meet', prob. fr. VLat. *com-pēnsum, fr. com-pēnsāre 'weigh together, equalize', or else an independent Britannic cpd. of the same elements (Br. poez, W. pwys 'weight', fr. Lat. pēnsum). Loth, Mots lat. 156. Henry 75, 226.

4. Goth. slaihts, ON slēttr, etc., above, 1.

Dan. jævn, Sw. jämn, ME (NE) even, Du. effen, OHG eban, MHG, NHG eben, all also and orig. 'even, level, flat' (12.71).

OE smēþe, ME smethe (NE dial. smeeth), beside OE smōþ (rare), ME smothe, NE smooth, etym.? Walde-P. 2.491. NED s.vv. smeeth, smooth, adj.

Du. glad, MHG glat, NHG glatt (> Dan. glat, Sw. glatt), but OHG glat mostly 'shining' = ON glaðr, OE glæd 'shining, bright, joyous' (NE glad) : Lat. glaber 'hairless, bald', Lith. glodus, glodnas 'lying smoothly, rubbed smooth, etc.', ChSl. gladŭkŭ 'smooth', etc., fr. IE *ghlədh-, *ghlādh-, prob. extension of *ghel- 'shine'. Walde-P. 1.625 f. Walde-H. 1.603. Falk-Torp 324.

5. Lith. lygus, Lett. līdzens, older līdzs, orig. 'like, equal', whence 'flat, level' and 'smooth' : Goth. galeiks 'like,' ON (g)līkr, OE gelīc 'like', etc., Goth. leik, etc. 'body, corpse'. Walde-P. 2.398 f. Mühl.-Endz. 2.479.

Lith. gludus, Lett. gluds, gludens : Lith. gludoti, gludėti 'lie close, snug', Lith. glausti 'press close', Lett. glaust 'stroke, caress', cf. Russ. dial. gludkij 'slippery, smooth', further connections dub. Mühl.-Endz. 1.623. Walde-P. 1.618 f. Berneker 308.

6. ChSl. gladŭkŭ, etc., general Slavic : Du. glad, etc. (above, 4).

7. Skt. sama- 'even, smooth, level' : Av. hama- 'like, same', Grk. ὁμός 'the same, common', ὁμαλός 'even, level', etc. Walde-P. 2.489.

Skt. çlakṣṇa- 'slippery, smooth, polished', etym.? Uhlenbeck 321.

15.78 SHARP

(In part differentiated; a, of a Point; b, of an Edge)

Grk.	ὀξύς	Goth.	*hwass (sb. hwassei)	Lith.	aštrus
NG	μυτερός (a); κοφτερός (b)	ON	hvass, skarpr	Lett.	ass
Lat.	acūtus	Dan.	skarp	ChSl.	ostrŭ

Br.	lemm	NHG	scharf		

Most of the words listed are used both of a 'sharp' point and a 'sharp' edge, but some only in the former (a) or the latter (b) sense. Apart from the large inherited group, the usual connection is with words for 'cut' (so all those used only in sense b, and some of the others) or 'prick'.

1. IE *aḱ-, *oḱ- in words for 'sharp, pointed', 'edge, point', etc., cf. Skt. açri- 'edge', Grk. ἄκρος 'topmost', ἄκρον 'peak, highest point', Lat. ācer 'sharp' in secondary senses, etc. Walde-P. 1.28 ff. Ernout-M. 7 ff. Walde-H. 1.7.

Here as 'sharp' : Grk. ὀξύς (NG mostly in secondary senses); Lat. acūtus (> It. acuto, Fr. aigu, Sp. agudo); Lith. aštrus, Lett. ass, ChSl. ostrŭ, etc., general Balto-Slavic.

2. NG μυτερός, fr. μύτη 'snout, nose' (4.23) also 'point, tip'.

NG κοφτερός, lit. 'cutting' : κόφτω 'cut'.

3. It. tagliente, Fr. tranchant, Sp. cortante, Rum. tăios, all lit. 'cutting', fr. the verbs for 'cut' It. tagliare, Fr. trancher, Sp. cortar, Rum. tăia (9.22).

Rum. ascuțit, fr. ascuți 'sharpen, whet', Lat. *ex-cōtīre, fr. cōs 'whetstone'. Pușcariu 140. Tiktin 106 f.

Br.	souc'h, dall, tougn	NHG	stumpf		

The words listed are used both of a point and of an edge, but in several it is clear that the former application is the earlier. The most frequent connection is with words for 'cut', 'strike', 'beat', 'stamp', etc., here as 'cut off', etc. Sometimes the development is through 'shortened, mutilated', or from 'weak, inefficient'. In a few cases the application to mentality, usually secondary, is the earlier.

1. Grk. ἀμβλύς, fr. *ἀμλυς : ἀμαλός 'weak, tender', prob. fr. the root in Lat. mollis, Grk. μαλακός 'soft', etc. (15.75). Walde-P. 2.285, 292).

2. Lat. hebes, beside hebēre 'be blunt', etym. dub. Walde 1.349. Ernout-M. 447 (suggesting borrowing). Walde-H. 1.637 f.

Lat. obtūsus (> It. ottuso), fr. obtundere 'beat', of a weapon 'beat back the point, dull', cpd. of tundere 'beat, pound'. Ernout-M. 1064.

Apart from the inherited group, words for 'heavy' are mostly connected with others for 'lift', 'weigh', 'pull', etc. In a few cases the application to mentality, usually secondary, appears to be the earlier.

1. IE *gʷr̥u-, *gʷru-, etc. Walde-P. 1.684 ff. Ernout-M. 434. Walde-H. 1.620 f.

Grk. βαρύς; Lat. gravis (> It., Sp. grave, but mostly 'grave', etc.), VLat. (after levis 'light') *grevis (> Rum. greu); perh. the rare Ir. bair (Stokes, RC 27.85); Goth. kaurus; Skt. guru-, Av. gouru- (in gouru-zaoθra- 'having heavy libations'); here also Lett. grūts 'difficult, wretched, pregnant' and locally 'heavy' (cf. Mühl.-Endz. 1.669 f.); Lat. brūtus 'cumbersome, dull, stupid', arch. 'heavy' (Paul. Fest.), loanword fr. Osc.-Umbr. (Ernout-M. 119. Walde-H. 1.117).

2. It. pesante, Sp. pesado, Fr. pesant fr. It. pesare, Sp. pesar, Fr. peser 'weigh' (Lat. pēnsāre). REW 6391.

Fr. lourd, Prov. lord, fr. OFr., OProv. lort 'foolish, heavy of mind' (physical sense in Fr. from 17th. cent.), cf. Lyon. lord 'dizzy', prob. fr. Lat. lūridus 'pale yellow, ghastly'. Semantic development from 'pale' to 'dizzy', whence 'heavy' of mind, later in physical sense. REW 5176. Bloch 2.24. Otherwise Gamillscheg 571.

3. Ir. tromm, NIr. trom, W. trwm, MBr. troum, prob. (*trud-smo-) fr. the root of Lat. trūdere 'push, shove', Goth. us-þriutan 'trouble, vex', ChSl. trudŭ 'toil', etc. Walde-P. 1.755. Pedersen 1.362. Stokes 139.

Br. ponner, prob. fr. an oblique case of Lat. pondus, gen. ponderis 'weight'. Loth, Mots lat. 197.

4. Goth kaurus, above, 1.

ON þungr, Dan., Sw. tung : ChSl. tęžĭkŭ 'heavy', tęgostĭ 'burden', Lith. tingus 'lazy', fr. the root in ChSl. tęgnąti 'pull'. Walde-P. 1.726 f. Falk-Torp 1299. Brückner 64.

ON svārr (poet. and here in fig. sense; cf. Sw. svår 'difficult'), OE swǣr (ME swere, but never in physical sense), Du. zwaar, OHG suāri, MHG swære, NHG schwer (> Dan. svær) = Goth. swērs only 'honored' : Lith. sverti 'weigh', svarus 'weighty, ponderous', svaras 'pound', etc., prob. fr. *swer-, beside *wer- in Grk. ἀείρω 'lift'. Words for 'light' in weight are commonly used also for 'light, nimble' in movement, and in one case the latter sense is clearly the earlier. But the great majority belong to an inherited group used in both senses.

1. IE *legʷh- and *lengʷh- in words for 'light in weight' and 'light, quick in movement'. Walde-P. 2.426. Ernout-M. 542 (assuming two orig. different groups, but this not called for). Walde-H. 1.788 f. Falk-Torp 637.

Grk. ἐλαφρός, NG pop. also ἀλαφρός, ἀλαφρύς; Lat. levis (> It. lieve, Sp. leve; Rum. ușor, old ĭușor with suffix -șor, cf. Pușcariu 1844; VLat. *leviārius > Fr. léger > It. leggiero, Sp. legero. It is impossible to draw a sharp line between 'wet' and 'damp'. The distinction according to the degree of wetness, as in the current use of NE wet and damp, holds also in the main for the Gmc. and Balto-Slavic words. But elsewhere this is ignored, and where several words are in use, as in Latin and the Romance languages, the choice depends on the kind of object described, the ground, a rag, etc., whether naturally wet or made wet, etc., all too diverse and complicated to be noted here.

Apart from the inherited group, the words are connected with others for 'water', 'bathe', 'leak', 'melt', 'vapor', 'soften', 'mire, filth'(?).

In the principal inherited groups and in most of the other words one cannot go behind the sense of 'dry'. A few are from the notion of 'extract the juice', and in a Gmc. group 'dry' is probably associated with 'firm', as sometimes 'wet' with 'soft'.

1. IE **saus-*, **sus-*. Walde-P. 2.447.

The distinction according to the degree of heat, as in NE *hot, warm,* holds for the Gmc. and Balto-Slavic words. Most of the other words listed are used without such distinction, though there may be special words for 'lukewarm, tepid', which are not included.

Apart from inherited groups, the words are connected with verbs for 'boil' (5.22, 10.31) or 'burn' (1.84).

It is well known that extreme heat and cold, as in touching a red-hot iron or a piece of ice, produce the same sensation, and there is every probability that a certain group of words for 'hot' (Lat. *calidus,* etc.) and another for 'cold' are, in fact, cognate. Cf. also Lat. *pruīna* 'hoar-frost' beside *prūna* 'live coal', *prurīre* 'itch', and OE *frēosan,* etc. 'freeze'.

A distinction similar to that of 'hot' and 'warm' is partially observed, but here ignored in the list. That is, beside the generic words for 'cold', there are others for 'moderately cold', 'cool', usually with the feeling of pleasant contrast to excessive heat. These may be cognate with those for 'cold', as NE *cool,* NHG *kühl,* etc., or they may be words which mean literally 'fresh', as It. *fresco,* Fr. *frais,* etc., similarly NG δροσερός in class. Grk. 'dewy, fresh' : δρόσος, NG δροσιά 'dew'. Again, NE *chilly,* also cognate with *cold,* is 'moderately but disagreeably cold', and NG ψυχρός (in class. Grk. 'cold') is now used in just this sense, or else figuratively.

Apart from inherited groups, there are other words connected with those for 'ice, frost', 'stiffness' (?), 'blow'.

Words for 'clean' and 'dirty', though these notions are by no means exclusively distinguished by the sense of touch (more often by smell or sight), are conveniently introduced here. Many of the words for 'clean' are the same that are used for 'pure, unmixed', and in several of these this is clearly the earlier notion. Others are of too diverse or doubtful origin for summary.

1. Grk. καθαρός, etym.? Walde-P. 1.368. Boisacq 389.

NG pop. παστρικός, with πάστρα 'cleanliness', παστρεύω 'cleanse', Byz. σπαστρικός, σπάστρα, σπαστρεύω, etym. dub., perh. first σπάστρα fr. σπάω 'draw, carry off'. Otherwise (fr. σπάρτον 'Spanish broom', the plant) Koraes, Ἄτακτα 1.288 f., Hatzidakis, Μεσ. 1.327.

2. Lat. *mundus* (> It. *mondo* 'peeled, cleaned', Sp. *mondo* 'neat, pure'), perh. as orig. 'washed' fr. **mudnos* : ChSl. *myti* 'wash', MLG *mūten* 'wash the face', OHG *muzzan* 'clean, adorn', Grk. μύδος 'dampness', etc. Walde-P. 2.250 f.

Lat. *pūrus* : Skt. *pu-* 'cleanse, purify', OHG *fowen* 'sift, clean grain', etc., root **peu-.* Walde-P. 2.13. Ernout-M. 826.

It. *pulito,* pple. of *pulire* 'cleanse', fr. Lat. *polīre* 'smooth, polish'.

It. *netto,* Fr. *net* (OFr. *neit, net* > ME *neate, nete* 'clean, pure, bright', NE *neat*), fr. Lat. *nitidus* 'bright, shining, polished' (15.57). REW 5929.

Fr. *propre,* in sense 'clean' from perh. 16th cent., earlier 'correctly arranged' fr. 'having necessary qualities, proper', fr. Lat. *proprius* 'own, special, proper'. Bloch 2.188.

Sp. *limpio,* fr. Lat. *limpidus* 'clear, transparent' also late 'pure, clean' (*l. panis,* Cael. Aur.). REW 5056.

Rum. *curat,* fr. Lat. *cōlātus,* pple. of *cōlāre* 'filter, purify'. REW 2035a. Puşcariu 454.

3. Ir., W. *glan* : Ir. *gel* 'white', etc. (15.64). Walde-P. 1.624.

Words for 'dirty, soiled' are mostly connected with sbs. for 'dirt, filth', 'mud', 'excrement', 'snot', 'stench', etc. Several are from 'dark-colored, black'. Some are neg. cpds. of those for 'clean'. The majority of these last are used mainly with reference to moral or ritualistic uncleanliness. This is the only use occurring in the Gospels, where ἀκάθαρτος is rendered by Lat. *immundus,* Goth. *unhrains,* OE *unclǣne,* OHG *unreini* (Otfr.), *unsūbiri* (Tat.), ChSl. *nečistŭ.* However, these words are entered in the list, and some of them are also used in a less restricted sense, as frequently Lat. *immundus,* sometimes ME *unclene,* NE *unclean* (NED s.v. 4), and esp. the Scand. words, including NIcel. *óhreinn.*

1. Grk. ῥυπαρός, fr. ῥύπος 'filth, dirt' : ChSl. *strupŭ* 'wound' (in modern Slavic 'poison, pus, scab, crust, etc.'), root connection dub. (**sreu-* 'flow'?). Walde-P. 2.703. Boisacq 846.

CHAPTER 16

EMOTION (WITH SOME PHYSICAL EXPRESSIONS OF EMOTION); TEMPERAMENTAL, MORAL, AND AESTHETIC NOTIONS

In this chapter we need not be concerned with such moot questions as the definition and precise character of emotions; the differentiation of emotions, passions, moods, etc.; the selection of certain emotions as primary; the division into pleasant and unpleasant or other types of classification. The relations are so complex that no rigid classification has proved acceptable to psychologists generally; and there is certainly none which it would be profitable to impose upon our study, in which we are dealing with unsophisticated and often overlapping notions.

While attempting to bring into con-

junction certain obviously related emotions, we lay no emphasis on the arrangement adopted. Some of the items, if taken by themselves, would seem to have no proper place in a chapter on emotions but are most conveniently brought into a series with others of distinctly emotional value. So especially are certain situations or objective notions which inspire emotional reactions. Thus 'danger' may lead to 'fear'; 'what is wonderful, a wonder' to the feeling of 'wonder, astonishment'; 'fame, renown' to the highly emotional 'glory'; a 'shameful act, disgrace' to the feeling of 'shame'; 'care' as 'attention' to 'anxiety, grief, sorrow', sometimes 'danger' or 'hate' and 'fondness, love'; 'distress, trouble' may lead to 'anger'; objects of repulsion provoke 'disgust' and then 'hate' and similarly in other cases, while the opposite shift from subjective to objective ('fear' to 'danger', etc.) is, of course, also attested.

Words for certain actions that are expressive of emotion, whether or not they lead to actual names of emotions, are included, as 'laugh, smile', 'weep', 'kiss'. In a few cases the emotion is antecedent to its expression ('love' > 'kiss' in Grk. φιλέω, 16.29). Or there may be a shift of meaning from one physical act to another, when both are expressive of the same emotion ('beat the breast' > 'weep').

Some moral and aesthetic notions are also included for convenience, as 'good', 'bad', 'sin' (with the overlapping 'fault', 'error', 'blame'); and 'beautiful', 'ugly'.

It must be assumed, of course, that all expressions of emotion, as well as those for sense-perceptions and thought processes, rest ultimately on physical actions or situations. In large measure this is shown in the history of the words, either in a shift of application observable within the historical period of a given language or by the cognates in other languages. But in some groups of cognates an emotional value is so widespread that no certain trace is left of the underlying physical value, so that its determination is highly speculative or hopeless.

Many parts of the body or bodily actions are associated with emotions. Notably the heart, the words for which are universally used to denote the seat of emotion or 'temperament, disposition', and in part (alone or in derivs. or cpds.) for special emotions such as 'courage', 'fondness, love', 'sympathy, pity', and (in Balto-Slavic) 'anger'. Bristling of the hair may indicate 'horror' (Lat. *horror;* cf. NE adj. *hair-raising*) or pleasurable excitement, 'joy' (Skt. *harṣa-*, 16.22). To lower or wrinkle the eyebrows, 'frown, scowl', usually shows displeasure, but also arrogance (cf. numerous Grk. phrases with ὀφρύς, LS s.v.; NE *supercilious*). Not only tears but also downcast eyes indicate 'grief, sadness' (NG κατηφής 'sad', 16.36). Laughter may show pleasure or ridicule. Puffing out the chest suggests 'pride' (cf. NG καμαρώνω etc., 16.48), as does also strutting or a stiff bearing. Words for 'breath' are the most common source of those for 'soul, spirit', and heavy breathing may indicate 'hate' (OE *anda*, 16.41) or 'anger' (Lett. *dusmas*, 16.42). The bile or gall is associated with bitter anger (Grk. χόλος, 16.42; NE *gall* in U.S. slang 'excessive assurance, impudence'; cf. also Grk. μελαγχολία 'black gall, melancholy'; the spleen with a variety of quite disparate emotions (NED s.v. *spleen*). A Greek word for the principal internal organs (σπλάγχνα) was felt as the seat of various emotions (cf. LS s.v.), and later, through its use in the LXX and NT to translate a certain Hebrew word and rendered in our

version by *bowels* (lit. 'intestines', fr. OFr. *boll*, Lat. *botellus*, dim. of *botulus* 'sausage'), connoted esp. 'pity, compassion' (NED s.v. *bowel*, sb.[1] 3).

Yet relatively few of the usual words for a given emotion, as included in our lists, are of such origin.

Words for a great variety of physical actions or conditions came to be used for emotions, sometimes with an obvious logical relation, as between 'trembling' and 'fear' or between 'bright' and 'joyful', but more often without any compelling ground for the specialization. Especially words that denote some form of physical agitation are used of mental agitation and then may be specialized in different directions, e.g. to 'fear', 'anger', or 'joy'.

Many of the words are connected with others for sense-perceptions or thought processes, so that members of the same group of cognates appear in all three chapters (15, 16, 17).

Among the IE roots that are conspicuous in words of emotion are, for example, the following:

IE **men-*, covering mental processes in the widest sense, both thought and emotion, the former dominant ('mind, think, remember', etc.) but the latter also in words for 'soul, spirit', 'desire', 'love', 'anger, wrath'. IE **dheu-*, primarily of physical agitation in words for 'shake', 'rage', 'smoke, vapor', etc., secondarily (esp. Grk. θυμός) 'soul, spirit', 'courage' and 'anger'. IE **wel-* in words for 'wish, will', 'pleasure', and 'hope'. IE **ĝher-* in words for 'wish, will', 'desire', 'joy', and 'thanks'. IE **wen-* in words for ('strive for, gain, win', and here) 'wish', 'love', 'hope', 'passion', 'suffering'.

But, despite such cognate groups with variously developed emotional sense, it is rare that the usual words for a particular emotion are common to two or more of the main branches of IE. For notions included in this chapter but only on the border line of emotion, we have widespread agreement in words for a 'tear' (but not for 'weep'), 'smile' (Grk., Gmc., Balto-Slavic, Skt.), 'dare' (Grk., Gmc., Baltic, Indo-Iranian), more limited groups for 'true' (one in Lat., Celt., Gmc., also 'faith, faithful' in Slavic; another in Gmc., Skt.), 'lie' (Gmc., Slavic, traces in Celtic), 'trust, faithful' (Grk., Lat.).

For more strictly emotional notions, the most notable cases of agreement are between two branches, as for 'will, wish' (Lat., Gmc.), 'love' (Gmc., Slavic; elsewhere in related senses but not the common word for 'love'), 'fear' (Balto-Slavic, Indo-Iranian), 'anger' (Grk., Ir.), 'hate' (Celtic, Gmc.).

All this, of course, does not prove that the primitive IE lacked expressions of emotional reaction or some terms for particular emotions like 'love', 'hate', or 'anger'. But it is probable that the IE vocabulary in this field was of an ill-defined character.

Under 'soul, spirit' it is intended to group the main words that are used for the seat of emotion, as contrasted with 'mind' for the seat of intelligence (17.11). But there is no hard-and-fast line between the two groups. Several of the words listed here carry over into the field of intelligence (so Lat. *animus* also 'mind', Fr. *esprit* in which the intellectual element is now dominant, and imitated in NHG *geist*), as, conversely, several of those listed under 'mind' are also used with reference to feelings.

The distinction between 'soul' and 'spirit' (or NE *ghost* in *Holy Ghost*), which became current in Christian terminology (Grk. ψυχή vs. πνεῦμα, Lat. *anima* vs. *spīritus*), is without significance for earlier periods, but the Eur. words are listed in accordance with this order.

The most usual semantic source is 'breath', hence first 'breath of life, vital principle'. But some are from (physical > mental) 'agitation' or other sources.

Besides the words listed, those for 'heart' are often used fig. in a similar sense. Likewise not included are certain words that are more nearly 'mood, temperament', as NHM *gemüt*.

1. Grk. ψυχή, also and orig. 'breath of life' (Hom., etc.) : ψύχω 'breath, blow' (Hom.), whence commonly 'make cool' (cf. ψῦχος 'cold'), further connection dub. (ψυ- with early transposition fr. φυσ- in φυσάω 'blow'?). Boisacq 1079.

Grk. θυμός, with a wide range of meanings ('soul, spirit, mood, anger, courage, breath of life'), through 'agitation' fr. the root of θύω 'rage', Skt. *dhu-* 'shake, agitate', etc., and in form esp. : Lat. *fūmus*, Lith. *dūmai* 'smoke', Skt. *dhūma-* 'smoke, vapor'. For the shift of physical to mental, cf. Lat. *animus, anima* (below, 2), Lett. *gars* (below, 5) and NE *fume* (fr. Lat. *fūmus*) in *in a fume* or as vb. in *fret and fume*. Walde-P. 1.835 f. Boisacq 356 f.

Grk. πνεῦμα, orig. 'breath' (: πνέω 'breathe', 4.51), hence 'breath of life', and in NT and other Christian writings the usual term for 'spirit' contrasted with ψυχή 'soul'.

For Grk. φρήν, poet. word for both the seat of emotion and 'mind', with numerous derivs., partly of emotional but more commonly of intellectual character, see under 'mind' (17.11).

2. Lat. *anima* (> It. *anima*, Fr. *âme*, Sp. *alma*), orig. 'air, breath' (4.51), and the semantic equivalent of Grk. ψυχή; *animus* (> It., Sp. *animo*), also etymologically 'air, breath' (in form = Grk. ἄνεμος 'wind'), but never used in this sense, corresponds semantically to Grk. θυμός, but eventually yields place to *spīritus* (cf. below). Ernout-M. 53 f. Walde-H. 1.49 f.

Lat. *spīritus* (> It. *spirito*, Fr. *esprit*, Sp. *espiritu*, Rum. *spirit*), usually in class. Lat. 'breath' (4.51), replaces *animus* in the sense 'spirit' in the imperial period and is used in Christian writings as the usual equivalent of Grk. πνεῦμα. Ernout-M. 966.

Rum. *suflet*, orig. 'breath', but not used in this sense now except in certain locutions : *sufla* 'blow', *răsufla* 'breathe', etc. (4.51). Tiktin 1526 f.

3. Ir. *anim*, NIr. *anam*, Br. *anaon* (only 'souls of the dead') : Lat. *anima* (above); fr. the same root with different suffix (**anə-ti*) W. *enaid;* Br. *ene*, MBr. *eneff*, Corn. *enef* loanwords fr. Lat. *anima?* Walde-P. 1.57. Pedersen 1.170.

Goth. *ahma* (= πνεῦμα) : *aha* 'mind', etc. (17.11). Feist 16 f.

ON *ǫnd, andi*, both lit. 'breath' (4.51), whence 'breath of life, soul, spirit', as 'soul' more frequently in early eccl. writings *ǫnd* (replaced by *sāla* in this sense, and *sāl*, not *önd* is the usual NIcel. word), *andi* esp. 'spirit, spiritual being', and so in NIcel., as also Dan. *aand* (distinguished fr. *aande* 'breath'), Sw. *ande*. Falk-Torp 5. Hellquist 20.

OE *gāst*, ME *gost* (NE *ghost* in *Holy Ghost*), OS *gēst*, Du. *geest*, OHG–NHG *geist*, the usual rendering of Lat. *spīritus*, but also old and general for a 'supernatural being' : OE *gǣstan* 'frighten', Skt. *hēḍa-* 'anger, wrath', Av. *zōizdišta-* 'most frightful', fr. IE **ĝheizd-*, extension of **ĝheis-* in Goth. *us-gaisjan* 'frighten', Av. *zaēša-* 'horrible'. Walde-P. 1.554. Feist 531. NED s.v. *ghost*.

The majority of words for 'emotion, feeling', that is, generic terms covering the emotions of 'love, joy, anger, hate', etc., are derived from verbs for 'feel', which are either 'perceive by the senses' (15.11), or else originally denoted 'feel' by the sense of touch (15.72). Some are based on the notion of 'movement' (of the mind) or 'experience'.

In technical language there are many other terms, not included in the list, either loanwords or semantic borrowings, as NHG *affekt* fr. Lat. *affectus*, or OE *mōdes styrung*, NHG *gemütsbewegung*, Dan. *sindsbevægelse*, Sw. *sinnesrörelse* in imitation of Lat. *mōtus animī*.

1. Grk. πάθος, πάθημα 'what befalls one, experience, suffering, misfortune', but also generic 'emotion' (πάθημα Plato +; πάθος more common in Aristot., e.g. EN 1105[b] 21 ff.; NG πάθος 'disease, misfortune, malice', also 'passion'), beside πένθος 'grief, sorrow', πάσχω 'suffer, experience', prob. : Ir. *cēssaim*, Lith. *kenčiu, kęsti* 'suffer', etc. Walde-P. 1.513. Boisacq 766. Otherwise (ultimately : Lat. *patī* 'suffer') Ernout-M. 741.

Grk. αἴσθημα 'object of sensation' (: αἰσθάνομαι 'perceive by the senses', 15.11), in NG 'feeling, emotion'.

2. Lat. *mōtus animī* (cf. *īra et metus et reliquī mōtūs animī*, Cic.), lit. 'movement of the spirit'.

Lat. *sēnsus*, orig. 'sense, power of feeling', fr. *sentīre* 'feel, perceive by the senses' (15.11), whence also the vbs. It. *sentire*, etc. and their new derivs. It. *sentimento*, Fr. *sentiment*, Sp. *sentimiento*, Rum. *simțire*.

Lat. *adfectus* (*affectus*), like *adfectiō*, orig. translation of διάθεσις '(bodily) state or condition, disposition', later in the sense of πάθος (*adfectiō* in that of στοργή), fr. *adficere* 'exert an influence on (body or mind), put in a certain disposition', cpd. of *facere* 'do, make'. Ernout-M. 323 f.

Fr. *émotion* (> It. *emozione*, Sp. *emoción*, Rum. *emoțiune*), deriv. of *émouvoir* 'stir, agitate, move' (orig. in physical sense); formation after *motion* 'movement'. Gamillscheg 352.

3. Ir. *cētbuid* (MIr. *cētfaid*), the usual word for 'sense' (15.11), but prob. also 'feeling', cf. Passions and Homilies l. 722 (*in genntilecht*) *formuchaid na cētfada* '(paganism) stifles the senses' (but trans. p. 301 'opinions'), l. 6868 *ho dunmait-ne ar cētfaide fria cech n-olc* 'sensibus nostris contra mala obduratis' (trans. p. 469), where the reference is certainly not to physical feelings.

Ir. *mothugud*, NIr. *mothughadh* 'perception, sense' and 'feeling', see 15.11.

W. *teimlad*, also of physical feeling,

and 'sense of touch' : *teimlo* 'feel' (15.72).

Br. *trivliad* (but hardly generic, for which there is apparently no single word), fr. *trivlia* 'tremble, shake'.

4. In the older Gmc. languages there seem to be no good generic terms for 'emotion'. Perhaps the nearest approach would be the group OE *mōd*, OHG *muot* 'mind, mood', etc., covering various emotions, in Goth., ON 'anger' (16.42).

Dan. *følelse*, NE *feeling*, Du. *gevoel*, NHG *gefühl*, all also of physical feeling, derivs. of the respective vbs. for 'feel' (orig. by sense of touch), Dan. *føle*, OE *fēlan*, NE *feel*, etc. (15.72). Similarly Sw. *känsla*, fr. *känsa* 'feel', orig. 'recognize'.

NE *emotion*, in earliest use 'a moving out, migration', then 'agitation' (physical or mental), finally (since early 18th cent.) in current sense, prob. fr. Fr. *émotion* (above, 2). Otherwise (as independently coined) NED s.v.

Du. *aandoening*, deriv. of *aandoen* 'touch upon, cause, affect', semantic borrowing fr. Lat. *adfectus, adficere* (above, 2). Franck-v. W. 3.

5. Lith. *jausmas*, Lett. *jūtas, jūsma* : Lith. *jausti*, Lett. *jaust* 'perceive by the senses, feel' (15.11).

6. ChSl. *čuvĭstvo*, SCr., Russ. *čuvstvo*, Pol. *czucie, uczucie* : ChSl. *po-čuti*, etc. 'feel, perceive by the senses' (15.11). Berneker 162.

Boh. *cit* : SCr. *ćut* 'sense', *ćutjeti* 'perceive by the senses', etc. (15.11). Gebauer 1.273, 384.

7. Skt. *bhāva-*, lit. 'becoming, being', whence 'state' of anything, and 'state of mind or body', 'way of thinking, feeling, sentiment' : *bhū-* 'become, be'.

16.13 PASSION

'Passion' is understood here as a generic word for violent emotion. But the distinction from 'emotion' in general is lacking in some languages (Grk. πάθος) and incomplete in others (e.g. NE *passions*, sometimes = *emotions;* cf. NED s.v., 6). Most of the words meant originally 'suffering', with generalization in imitation of Grk. πάθος : πάσχω 'suffer'.

A few are from other sources, as 'disturbance', 'inflammation', enmity'.

1. Grk. πάθος, πάθημα, see 16.12.

2. Lat. *perturbātiō* 'disturbance', used by Cicero to render Grk. πάθος, deriv. of *perturbāre* 'throw into confusion, disorder', cpd. of *turbāre* 'disturb, agitate'.

Late Lat. *passiō*, deriv. of *patī* 'suffer' (like Grk. πάθος : πάσχω). Used in eccl. Lat. esp. to render the 'passion' of Christ. Borrowed in It. *passione*, Fr. *passion*, Sp. *pasión*. Ernout-M. 741.

Rum. *patimă*, fr. Grk. πάθημα 'emotion' (16.12). Tiktin 1133.

3. Ir. *cēssad* 'suffering' (16.31) used also for 'passion' (NIr. *ceasadh* 'the crucifixion'), semantic borrowing fr. Lat. *passiō*. Pederson 2.486.

NIr. *pāis*, in early Ir. mostly 'passio Christi', fr. Lat. *passiō*. Vendryes, De hib. voc. 163.

W. *nwyd* (beside *nwy* 'spirit, vivacity', Pughe; now 'gas', Spurrell), etym.?

Br. *c'hoantidigez*, deriv. of *c'hoant* 'desire' (16.62).

4. Goth. *gairuni* (*gairunja lustaus* = πάθει ἐπιθυμίας, 1 Thess. 4. 5) : *gairnei* 'desire', vb. *gairnjan*, OE *giernan* 'desire', etc. (16.62).

Goth. *winnō, winna* (Col. 3.5 = πάθος 'passion' in bad sense) : *winnan* 'suffer' = OE *winnan* 'toil, suffer', etc. Semantic borrowing fr. Grk. Feist 566.

OE *þolung*, OHG *dolunga* (render Lat. *passiō*, cf. Bosworth-Toller, Suppl. s.v., Graff 5.135; clearly semantic borrowings), lit. 'suffering', derivs. of OE *þolian*, OHG *dolēn* 'suffer' : Goth. *þulan* 'endure', Lat. *tollere* 'raise, carry', Grk. τλā- (aor. ἔτλη, etc.) 'bear, endure, suffer'. Walde-P. 1.739.

MHG *līdunge*, NHG *leidenschaft* (> Dan. *lidenskab*), Sw. *lidelse* fr. the vbs. MHG *līden*, NHG *leiden*, etc. 'suffer' (see under NHG *leiden*, etc. 'suffering' 16.31). Translations of Lat. *passiō* and Fr. *passion* (above, 2). Falk-Torp 641. Weigand-H. 2.47.

ME, NE *passion*, fr. OFr. *passion*, Lat. *passiō* (above, 2).

Du. *hartstocht*, cpd. of *hart* 'heart' and *trocht* 'pull, tug'. Franck-v. W. 234.

5. Lith. *aistra*, beside *aistrus* 'passionate' : Grk. οἶστρος 'vehement desire, madness, sting, gadfly', Lat. *īra* 'anger', etc. Walde-P. 1.107.

Lett. *kaislība*, lit. 'inflammation', fr. *kaisls* 'heated, hot' : *kaist* 'grow hot, burn, glow'. Mühl.-Endz. 2.135.

6. ChSl. *strastĭ*, SCr. *strast*, Russ. *strast'* : ChSl. *stradati* 'suffer'. Semantic borrowing fr. Grk. πάθος.

Boh. *vášeň* : Pol. *waśń* 'quarrel', ChSl. *vaditi* 'accuse'. Brückner 598, 603.

Pol. *namiętność*, deriv. of *namiętny* 'passionate', prob. fr. the root in ChSl. *mętą, męsti* 'disturb, trouble' (Berneker 2.45 without mention of these Pol. words). Otherwise Brückner 392 f. (: *pamięć*, ChSl. *pa-mętĭ* 'memory', but semantically unlikely).

'Care' is intended here as 'serious mental attention' rather than as 'mental distress, anxiety, worry'. But the latter sense is also common to most of the words listed, and, while partly secondary (so in words meaning orig. 'thought'), is in many cases the earlier, as indicated by the etym.

1. Grk. *μελέτη* : *μέλω* (esp. 3sg. *μέλει*) 'be an object of care', root connection dub. (: *μάλα* 'very', Lat. *melior* 'better'?). Walde-P. 2.292 (top). NG *μελέτη* is 'study', but cf. *τί με μέλει;* 'what do I care?', etc.

Grk. *φροντίς* 'earnest thought' and so 'care' : *φρονέω* 'think' (17.14).

Grk. *μέριμνα* (in class. Grk. mostly poet., but freq. in NT) : Lat. *memor* 'mindful', Skt. *smar-* 'remember', etc. Walde-P. 2.689.

Late Grk. (LXX+), NG *προσοχή* 'attention, care' : *προσέχω* 'hold to, turn to, attend to', cpd. of *ἔχω* 'hold'.

2. Lat. *cūra* (> It. *cura;* Fr. *cure* in OFr. and modern dial. 'care', now 'medical care'; Sp. *cura* 'medical or religious care' or 'curing' = 'seasoning'), fr. **koi-sā-* (cf. Pael. *coisatens* 'curaverunt', OLat. *coiravit*, etc.), but root connection dub. Walde-P. 1.455. Ernout-M. 245 f. Walde-H. 1.314. H. Hendriksen, IF 56.21 (: Skt. *çesa-* 'remainder', but??).

Fr. *souci,* back-formation fr. *soucier* 'be anxious', fr. Lat. *sollicitāre* 'disturb, distress'. REW 8076. Gamillscheg 810.

Sp. *cuidado,* fr. late Lat. *cōgitātus* 'thought' : *cōgitāre* 'ponder, think'. REW 2028.

Rum. *grijă,* fr. Slavic, cf. Bulg. *griža* 'care' = ChSl. *gryža* 'ache' : *gryzą, grysti* 'bite, gnaw'. Tiktin 701. Berneker 359.

3. OIr. *uān menman* (gl. Lat. *animadversio,* Ml. 28d12), lit. 'lending of the mind', *uān* vbl. n. of *od-* 'lend' (Pedersen 2.587, Thurneysen, Gram. 466) with gen. sg. of *menme* 'mind'.

MIr. *ōid* (cf. RIA Contrib. s.v.), imperat. form of *od-* 'lend' (cf. *ōid menmain,* gl. *intuere*) used substantively with ellipsis of *menmain* (cf. Lat. *advertere* = *animadvertere*). Cf. T. O'Maille, Lia Fáil 1.181 f. NIr. *ūidh* 'heed, attention'.

Ir. *dethiden, dethitiu* mostly in the sense of 'care, anxiety', see 16.33.

Ir. *aire* 'watching, heed, attention', in NIr. the usual word for 'care', etym.? Walde-P. 2.29.

W. *gofal,* cpd. of *-mal* as in *dyfal* 'careful, diligent', *diofal* 'careless', vb. *malio* 'care for' (also Corn. *mal* 'desire', Br. *mall* 'haste'), perh. : Grk. *μέλω,* etc. (above, 1). Loth, RC 41.211 f. Henry 194.

W. *pryder,* Br. *preder* : W. *pryd,* Br. *pred* 'time' (14.11), with development through 'what takes time' or 'timeliness'. Pedersen 2.50. Henry 227.

4. Goth. *saurga* (mostly 'care' = 'worry, grief', but 'care' = 'attention' in 2 Cor. 11.28), (ON, Dan., Sw. *sorg* 'sorrow'), Dan., Sw. *omsorg* 'care' (OE *sorh* 'anxiety, grief, sorrow', ME *soru,* etc., NE *sorrow*). Du. *zorg* ('care' in all senses), OHG *sorga* (reg. for Lat. *cūra* in all senses), MHG, NHG *sorge* mostly 'care' as 'anxious thought', etc., for 'care, attention', esp. MHG *vürsorge,* NHG *fürsorge*—a group in which the notion of 'anxiety, grief, sorrow' is dominant, prob. : Skt. *sūrkṣ-* 'trouble oneself about', Lith. *sirgti* 'be ill', Ir. *serg* 'illness', etc. Walde-P. 2.529. Falk-Torp 1109. Feist 413.

Goth. *kara* (*ni kar' ist* = *οὐ μέλει,* etc.), OE *caru, cearu* (also 'grief, sorrow'), ME, NE *care* (OHG *kara* 'lamentation', NHG *kar-freitag*), prob. through 'cry of grief' : Ir. *gāir* 'cry', Grk. *γῆρυς,* Dor. *γᾶρυς* 'voice', etc. Walde-P. 1.537. Falk-Torp 520. Feist 307 f.

ON *umhyggja* (so also NIcel.), cpd. of *hyggja* 'thought' : vb. *hyggja* 'think' (17.14). Here also Dan. *omhu.*

5. Lith. *rūpestis,* Lett. *rūpes* (pl.), with vbs. Lith. *rūpėti,* Lett. *rūpēt* 'be anxious about', prob. : Lat. *rumpere* 'break', etc. Walde-P. 2.355. Mühl.-Endz. 3.571.

6. ChSl. *roditi, raditi* most usual vb. for Grk. *μέλω* (Jagić, Entstehungsgesch. 370) : Skt. *rādh-* 'prepare, succeed', etc. (cf. ChSl. *radi* 'on account of' = OPers. *rādiy* id.). Walde-P. 1.74.

ChSl. *pečalĭ* (but = *μέριμνα* as 'care, anxiety' or *λύπη* 'grief'), Boh. *péče,* Pol. *piecza* (SCr. *pečal,* Russ. *pečal'* 'grief') : ChSl. *peką, pešti* 'bake, roast' used in refl. phrases for 'be troubled, care', e.g. *ne pečeši sę* = *οὐ μέλει σοι, pečaše* = *ἔμελεν* (Jagić, Entstehungsgesch. 370). Brückner 406. Meillet, Études 416.

SCr. *briga,* fr. It. *briga* 'burden, trouble'. Berneker 86.

Boh. *starost* (also 'old age'), Pol. *staranie* : Boh. *starati* 'be anxious, be concerned with', Pol. *starać się* 'try' (9.99), orig. 'be old', fr. word for 'old', ChSl. *starŭ,* etc. (14.15), with the notion of 'care' accompanying 'old age' becoming dominant.

Russ. *zabota,* prob. through 'alarm' : Russ. *botat'* 'shake, beat, stamp with the feet'. Cf. Pol. *kłopot* 'trouble, anxiety, care' : ChSl. *klopotŭ* 'noise'. Berneker 78. Otherwise Walde-P. 1.530.

7. Skt. *yatna-* 'effort, pains' (: *yat-* 'strive for', etc.) is perh. also the best word for 'care' as intended here (*cintā-* is 'thought', and 'care' = 'anxiety').

Many of the words for 'wonder' denoted originally the obj. 'wonder' ('a wonder' = 'something wonderful'), and only secondarily, mostly through the medium of their deriv. vbs. meaning 'to wonder at', the subj. feeling of 'wonder'. These are based on such notions as 'something seen, perceived', (felt as 'a sight' = 'something worth seeing'), or 'something unknown or of unusual form', etc.

On the other hand, the more distinctive words for the feeling of 'wonder, astonishment' are connected with words for '(be) struck, stunned, rigid, displaced', etc., with extension from a physical condition to a mental attitude. In some of these there is interchange between 'astonishment' and 'fear, terror'. 'Wonder' may turn to 'admiration'.

1. Grk. *θάμβος, τάφος,* beside vb. aor. *ἔταφον,* perf. *τέθηπα* 'be astonished', etym. dub. Walde-P. 1.824. Boisacq 333.

Grk. *θαῦμα* (mostly obj. 'wonder', but also subj.) : *θέā* 'sight, aspect', fr. **θāϝā,* fr. a root **dhāu-* beside **dhāi-* (?), **dhī-* in words for 'see, look' (15.51). Walde-P. 1.832. Boisacq 335.

Grk. *ἔκστασις* 'displacement, change' (: *ἐξίστημι* 'displace'), hence mental 'distraction', in NT 'amazement'.

Grk. *ἔκπληξις* 'consternation, terror', in NG the usual word for 'astonishment, surprise', fr. *ἐκπλήσσω* (cpd. of *πλήσσω* 'strike') 'drive out' and ('drive out of one's senses') 'astound, frighten', in pass. 'be astonished'.

2. Lat. *admīrātiō* ('wonder, surprise' and esp. 'admiration'), fr. *(ad-)mīrārī* 'wonder at', beside *mīrus* 'wonderful', etc. : Skt. *smi-* 'smile', etc. (16.25). Cf. esp. Skt. *vi-smi-* 'be astonished', *vismita-* 'astonished', *vismaya-* 'astonishment', *smaya-* 'astonishment' and 'pride, arrogance'. The development of 'smile' to 'wonder at' is not too difficult, and the connection is not to be doubted (as by Ernout-M. 619, without notice of Skt. *vi-smi-,* etc.). Walde-P. 2.686 f.

Lat. *stupor* 'numbness' also 'astonishment' (> It. *stupore* 'astonishment', as sometimes Fr. *stupeur*), fr. *stupēre* 'be struck senseless, stunned, be astonished' : Grk. *τύπτω* 'strike', etc. Walde-P. 2.618 f. Ernout-M. 990.

It. *maraviglia* (orig. obj. 'wonder', like Fr. *merveille,* NE *marvel,* but also subj. 'wonder, astonishment'), fr. Lat. *mīrābīlia* 'wonders' : *mīrus,* etc. (above). REW 5601.

Fr. *étonnement,* fr. vb. *étonner* 'astonish', fr. VLat. **extonāre,* cpd. of *tonāre* 'thunder'. Cf. Lat. *attonitus* (lit. 'thundered at') 'astonished', NE *thunderstruck.* REW 3092.

Fr. *ébahissement,* fr. *ébahir* 'astonish', OFr. *esbahir,* based on the expressive syllable *ba.* REW 851. Gamillscheg 330. Somewhat otherwise Wartburg 1.285 (: forms derived fr. VLat. *batāre* 'open the mouth', itself based on *ba;* REW 988).

Sp. *pasmo,* also and orig. 'spasm', fr. late Lat. *spasmus,* fr. Grk. *σπασμός* 'spasm' : *σπάω* 'tear, wrench', etc. REW 8127.

Rum. *mirare,* old infin. of vb. *mira* 'wonder', fr. VLat. *mīrāre,* Lat. *mīrārī* (above). REW 5603.

3. Ir. *machdad* (usual word, both obj. and subj.) : vb. *ad-machdur* 'wonder, marvel', this perh. fr. the same root as OIr. *do-for-maig* 'increases' (: Grk. *μέγας* 'great', etc. Walde-P. 2.258). Pedersen 1.421 (2.573).

Ir. *ingantas,* NIr. *iongantas* (now the usual word for subj. 'wonder, surprise') : *ingnāth* (pl. *inganta*), NIr. *iongnadh* 'wonderful' and, as sb., obj. 'wonder', orig. 'unknown', neg. cpd. of *gnāth* 'known' : Grk. *γνωτός,* Lat. *nōtus,* etc. 'known'. Pedersen 1.45, 48.

W. *rhyfeddod,* fr. *rhyfedd* 'wonderful', cpd. of *rhy-* 'beyond' and *-medd* 'measure' as in *dyrn-fedd* 'breadth of the hand', etc. : Ir. *med* 'scales', *air-med* 'measure', etc. (IE **med-,* Walde-P. 2.259). Loth, RC 40.348.

W. *syndod* : *syn* 'dazed, astonished, astonishing', *synnu* 'look, stare at', perh. fr. **stunno-,* **studno-,* fr. **stū-* in words for 'fixed, stiff' (cf. NHG *staunen,* below). Loth, RC 44.271 f.

Br. *souez,* prob. fr. some VLat. deriv. of *subitō* 'suddenly', like the source of Fr. *soudain* 'sudden'. Ernault, Dict. étym. 381, Glossaire 632.

4. Goth. *sildaleik* (= *θάμβος* Lk. 5.9), beside adj. *sildaleiks* 'wonderful' = OE *sel(d)līc, syllīc* id. cpds. of *leik, līc* 'body, form', first part : OE *seldan,* OHG *seltan,* etc. 'seldom', hence lit. 'of rare form'. Walde-P. 2.457 f. Feist 421.

Goth. *afslauþnan* (= *θάμβος* Lk. 4.36) = infin. *afslauþnan* 'be astonished' : *afslauþiþs* 'anxious, perplexed', root connection dub. Walde-P. 2.709. Feist 9 f.

ON *undr,* OE *wundor,* OHG *wuntar,* etc., gen. Gmc. except Goth., etym.? Falk-Torp 1332. Weigand-H. 2.1290. These words expressed orig. the obj. 'wonder', and only secondarily emotion. Thus OE *wundor* 'a wonder', ME, NE *wonder* also of the emotion (NED s.v. 7); OHG *wuntar* mostly 'a wonder' (rarely subj., as *sie thē wuntar gifiang,* Otfr. 3.16.5), MHG, NHG *wunder* also of the emotion (NHG still in phrases like *wunder nimmt mich*). But emotional value prevailed in the vbs., as OE *wundrian,* OHG *wuntarōn,* etc. 'wonder at', and so in their derivs., as OE *wundrung,* Dan. *undren, forundring,* NHG *verwunderung,* etc.

Dan. *forbavselse,* fr. vb. *forbavse* 'astonish', fr. MLG *forbasen* 'disturb' = Du. *verbazen* 'astonish', *verbazing* 'astonishment', cpds. of MLG *basen* 'rave, rage'. Falk-Torp 253. Franck-v. W. 37.

Sw. *förvåning,* fr. vb. *förvåna* 'surprise, astonish', through the notion of 'beyond expectation' : *vån,* ON *vān* 'hope, expectation' (16.63), Sw. *vänta* 'expect', etc. Hellquist 264.

NE *astonishment,* fr. vb. *astonish,* earlier *astony,* ME *astone,* fr. OFr. *estoner* (Fr. *étonner,* above, 2). NED s.vv. *astone, astony,* etc.

NE *amazement,* fr. vb. *amaze* beside *maze* 'stupefy, daze'. NED s.v.

NHG *(er)staunen,* sb. use of vb., this fr. a Swiss form *stūnen* 'stare' ('stare at' > 'wonder at'), this prob. fr. **stū-* in words based on the notion of 'fixed, stiff'. Walde-P. 2.608. Falk-Torp 1187 f. Kluge-G. 588.

5. Lith. *nusistebėjimas, nustebimas, fr. stebėtis* 'be astonished', as orig. 'be stiff, rigid' : Lith. *stiebas* 'stake, mast', Skt. *stabh-* 'support, prop', *stabdha-* 'stiff, rigid', etc. Walde-P. 2.625.

Lett. *brīnums,* etym.? Mühl.-Endz. 1.335.

6. ChSl. *užasŭ* (renders *θάμβος* and *ἔκστασις*), Boh. *úžas* 'astonishment' and 'terror' (SCr., Russ. *užas* 'terror') : ChSl. *u-žasnąti sę* 'be frightened', etym.? Walde-P. 1.554.

SCr. *čudenje,* fr. vb. *čuditi se* 'wonder' = ChSl. *čuditi sę* id., fr. ChSl. *čudo,* etc. general Slavic for the obj. 'wonder' (rare or dial. for the feeling), this : *čuti* 'perceive' (17.11). Berneker 161.

SCr. *zaprepašćenje* (or *zaprepašćenost*), fr. *zaprepastiti se* 'be astonished' : *prepasti se* 'be frightened' (Pol. *przepaść* 'be lost'), ChSl. *pasti* 'fall'. Brückner 390.

SCr. *diolenje,* Boh. *údiv,* Pol. *zadziwienie, podziwienie,* Russ. *udivlenie,* all through deriv. vbs. : ChSl. *divŭ, divo,* etc., general Slavic for the obj. 'wonder', this as orig. 'a sight' (cf. *θαῦμα,* above) : Skt. *dī-, dīv-* 'shine', etc. Walde-P. 1.774. Berneker 202.

7. Skt. *vi-smaya-,* above, 2.

16.16. 'Surprise'. The feeling evoked by the unexpected is in large measure included in the scope of words listed in 16.15. So far as there are more distinctive terms, they are modern and originally denoted the physical act of 'surprise, sudden overtaking'.

1. It. *sorpresa,* Fr. *surprise* (> NE *surprise,* Rum. *surpriză*), orig. denoting the physical 'surprise, taking unawares', fr. fem. pple. of It. *sorprendere,* Fr. *surprendre,* MLat. *superprendere,* cpd. of *prēndere* 'seize' (11.14). Gamillscheg 824. NED s.v. *surprise.*

2. NHG *überraschung* (hence by semantic borrowing Dan. *overraskelse,* Sw. *överraskning*), fr. vb. *überraschen,* orig. 'surprise' in a military sense, lit. 'be swift over one' (cf. *überrumpeln, überlaufen,* etc.), fr. *rasch* 'swift'. Kluge-G. 638. Similarly Du. *verrassing.*

3. Boh. *překvapení,* fr. vb. *překvapiti,* cpd. of *kvapiti* 'hasten', fr. *kvap* 'haste, hurry'. Evidently modeled on NHG *überraschen, überraschung,* and likewise used for both act and emotion. There are various other Slavic words for the physical 'surprise', but they seem not to be current for the resulting feeling.

16.17 FORTUNE (Good or Bad)

Grk.	*τύχη, συμφορά*	Goth.	....	Lith.	*laimė*
NG	*τύχη*	ON	*happ, lukka*	Lett.	*laime*
Lat.	*fortūna (fors, cāsus)*	Dan.	*skæbne, lykke*	ChSl.	*(kobĭ)*

Br.	*chans*	NHG	*glück*		

Words for 'fortune' in the neutral sense (good or bad) are based on notions like 'what happens, befalls, becomes, arrives', 'part, share', 'augury', 'declaration'; but several are of doubtful origin.

Most of them are used also and most commonly for 'good fortune'. A few tend to specialization in the other direction, to 'misfortune'.

1. Grk. *τύχη* 'fortune' and esp. 'good fortune', beside *τυγχάνω* 'happen', aor. *ἔτυχον,* prob. : *τεύχω* 'make, prepare', Goth. *daug,* OE *dēag,* OHG *toug* 'is of use', etc. Hence also *εὐτυχία, εὐτύχημα* 'good fortune' and *δυστυχία, δυστύχημα* 'misfortune'. Walde-P. 1.847. LS[9] s.v. *τυγχάνω,* end.

Grk. *συμφορά* 'fortune, circumstance', sometimes 'good fortune', but mostly 'misfortune' (as NG), fr. *συμφέρω* 'bring together', 3.sg. impers. *συμφέρει* 'is of use', pple. *συμφέρων* 'useful', etc.

2. Lat. *fortūna* (> It., Sp. *fortuna,* Fr. *fortune* > ME, NE *fortune*), beside *fors, fortis* 'chance', fr. the root of *ferre* 'bear, carry'. Walde-P. 2.155. Ernout-M. 382 (with doubt). Walde-H. 1.534. REW 3458. The development has been mostly in the direction of 'good fortune', hence also 'wealth, riches' in Fr. and NE, but among sailors of the Mediterranean (through 'risk' of the sea) 'storm', as It. *fortuna* (> NG *φουρτούνα*), etc.

Lat. *cāsus* 'what happens, chance', fr. *cadere* 'fall' (10.23), also 'befall, happen', whence OFr. *cheoir* and the new sb. OFr. *cheance* (> ME *cheance, chaunce, chance,* NE *chance*), Fr. *chance,* now esp. *bonne chance* 'good luck'. Ernout-M. 126. REW 1451.

Lat. *sors, sortis* 'lot, fate' (> Romance words, of which Rum. *soarte* is also the one for 'fortune'), prob. (with reference to drawing lots) fr. the root of *serere* 'bind together, arrange', *seriēs* 'row, series'. Walde-P. 2.500. Ernout-M. 959. REW 8107.

It., Sp. *ventura* 'fortune' and 'good fortune' = OFr. *aventure* 'event' (> ME *aventure,* NE *adventure*), fr. deriv. of Lat. *advenīre* 'come to, arrive', hence 'happen' as Fr. *avenir,* etc. REW 216.

Fr. *heur,* now obs. but source of *bonheur* 'good fortune' and *malheur* 'misfortune', fr. Lat. *augurium* 'augury'. REW 785. Wartburg 1.174 f.

Rum. *noroc* (partly neutral, but mostly 'good fortune'), fr. Slavic, SCr. *narok* 'fortune' (obs.), ChSl. *narokŭ* 'declaration, appellation', etc., fr. cpd. of *reką, rešti* 'say' (18.22). Cf. Lat. *fātum* 'fate', fr. *fārī* 'speak, say'. Tiktin 1061. Brückner 355.

3. Ir. *tocad* ('fortune' and 'good fortune, wealth') = W. *tynget,* Br. *tonket* 'fate' (not : Grk. *τύχη,* as Pedersen 1.151, but) : Lith. *tenku, tekti* 'fall to one's share', Goth. *þeihan* 'prosper', etc. Walde-P. 1.725. Thurneysen, Gram. 126. Pokorny KZ 47.165.

Ir. *ād, āg* (K. Meyer, Contrib. 13, Hessen s.v.), NIr. *ādh,* Gael. *āgh,* mostly 'good luck', etym.?

W. *ffawd* ('fortune, good fortune', also and orig. 'fate'), fr. Lat. *fāta,* pl. of *fātum* 'fate'. Loth, Mots lat. 167.

W. *ffortun,* fr. NE *fortune.*

Br. *chans,* fr. Fr. *chance.*

Br. *eur,* not used alone except in dials., but seen in cpds. *eurvad* 'good fortune' (*mad* 'good') and *droukeur* 'misfortune' (*drouk* 'bad'), fr. Fr. *heur* (above, 2).

4. ON *happ* (> ME *happe, hap;* cf. OE *gehæp* 'fit'; Chaucer has *hap and fortune*) : ChSl. *kobĭ* 'augury', Ir. *cob* 'victory'. Walde-P. 1.457. Falk-Torp 398 f.

OE *wyrd* 'what happens, fortune, fate' (gl. Lat. *eventus, fortūna, fors, cāsus, sors*), OHG *wurt* (rare), fr. the root of OE *weorþan,* OHG *werdan* 'become' (9.92). NED s.v. *weird* sb.

MHG *g(e)lücke,* NHG *glück,* MLG *(ge)lucke* (> late ON *lukka,* Dan. *lykke,* Sw. *lycka*), Du. *geluk,* MDu. also *luk* (> ME, NE *luck*), all used for the neutral 'luck, fortune', but esp. for 'good fortune', etym. dub. Walde-P. 2.414, 426. Falk-Torp 669. NED s.v. *luck.*

Dan. *skæbne* ('fortune' and 'fate') : *skabe* 'create, make'. Falk-Torp 977, 1008.

5. Lith. *laimė,* Lett. *laime* (both mostly 'good fortune', and personified in folklore; OPruss. *laeims* 'rich'), etym. dub., perh. : ChSl. *lětĭ jestŭ* 'licet', etc. Walde-P. 2.394. Berneker 714. Mühl.-Endz. 2.409 (otherwise).

6. ChSl. *kobĭ* mostly 'augury' (: ON *happ,* above, 4), in Supr. renders *τύχη* (but in its sense of 'station in life', LS s.v. *τύχη* IV. 3; not as Berneker 535).

Boh. *štěstí,* Pol. *szczęście,* Russ. *sčastie,* fr. **sŭ-čęstĭje* cpd. of *čęstĭ* 'part' (13.23). Berneker 155. Brückner 544.

SCr. *sreća,* as orig. 'meeting' fr. *sresti,* ChSl. *sŭrěsti* 'meet'. Miklosich 278. Brückner 534.

7. Skt. *bhāgya-* 'lot, fate' and esp. 'good fortune' (cf. adjs. *bhāgyavant-, subhāgya-* 'fortunate', *durbhāgya-* 'unfortunate'), through *bhāga-* 'part, share', also 'good fortune', fr. vb. *bhaj-* 'apportion, share'. Av. *baγa-* 'share' and also 'good fortune'. Barth. 921.

16.18 GOOD FORTUNE

Grk.	*τύχη, εὐτυχία*	Goth.	....	Lith.	*laimė*
NG	*εὐτύχημα, εὐτυχία*	ON	*happ*	Lett.	*laime*
Lat.	*fortūna (secunda)*	Dan.	*lykke*	ChSl.	....
It.	*(buona) fortuna*	Sw.	*lycka*	SCr.	*sreća*
Fr.	*bonheur*	OE	*wyrd gōd(?)*	Boh.	*štěstí*
Sp.	*(buena) fortuna*	ME	*fortune, hap*	Pol.	*szczęście*
Rum.	*noroc*	NE	*(good) fortune, luck*	Russ.	*sčastie*
Ir.	*ād, tocad*	Du.	*geluk*	Skt.	*bhāgya-*
NIr.	*ādh, sonas*	OHG	....		
W.	*ffortun*	MHG	*gelücke*		
Br.	*eurvad*	NHG	*glück*		

'Good fortune' is expressed by words listed or discussed in 16.17, either with words for 'good, well, favorable', or, commonly in most languages, alone. Ir. *sonas,* fr. adj. *sona* 'fortunate, happy' (16.24).

A good part of these words come to express the resulting state of 'happiness' (see 16.24), a few 'wealth, riches'.

16.19 MISFORTUNE

Grk.	*συμφορά, δυστύχημα, ἀτύχημα*	Goth.	....	Lith.	*nelaimė*
NG	*συμφορά, δυστυχία*	ON	*ūlykka*	Lett.	*nelaime*
Lat.	*fortūna adversa, infortūnium*	Dan.	*ulykke, vanskæbne*	ChSl.	....
It.	*sfortuna, disgrazia*	Sw.	*olycka*	SCr.	*nesreća*
Fr.	*malheur, infortune*	OE	*unwyrd*	Boh.	*neštěstí, nehoda*
Sp.	*desgracia, infortunio*	ME	*mishap, mischaunce, infortune*	Pol.	*nieszczęście*
Rum.	*nenorocire*	NE	*misfortune*	Russ.	*nesčastie*
Ir.	*dodcad*	Du.	*ongeluk*	Skt.	*dāurbhāgya-*
NIr.	*mīādh, donas*	OHG	*ungifuari, wēnagheit*		
W.	*anffawd*	MHG	*ungelücke*		
Br.	*reuz, droukeur, droukverz*	NHG	*unglück*		

'Misfortune' is most commonly expressed by words for 'fortune' (16.17) combined with words for 'ill, mis-, adverse', or a negative prefix, rarely alone with specialization in this direction (Grk. *συμφορά*).

Thus with words for 'ill-' (16.72), etc. Grk. *δυστύχημα* (or *-ία*), Lat. *fortūna adversa,* It. *sfortuna,* OFr. *meschaunce* (> ME *mischaunce*), Fr. *malheur,* Ir. *dodcad* (fr. *tocad* with *do-* 'ill'; Thurneysen Gram. 231), NIr. *mīādh* (*mī-,* Pedersen 2.10), Br. *droukeur,* Dan. *vanskæbne* (*van-* 'mis-, un-', Falk-Torp 1347), NE *misfortune,* Skt. *dāurbhāgya-* (fr. adj. *dur-bhaga-* 'unfortunate', with vṛddhi of both syllables); with neg. prefix, Grk. *ἀτύχημα* (or *-ία*), Lat. *infortūnium* (> Fr., ME *infortune,* Sp. *infortunio*), Rum. *nenorocire,* W. *anffawd,* ON *ūlykka* (late), Dan. *ulykke,* Sw. *olycka,* Du. *ongeluk,* NHG *unglück,* OE *unwyrd,* Lith. *nelaimė,* SCr. *nesreća,* Russ. *nesčastie,* etc.

But several other words, of quite different origin, are used in substantially the same sense, of which may be mentioned the following. Still others which cover 'misfortune' but are felt as much stronger, like NE *disaster, catastrophe, calamity, ruin,* etc. are not considered, except the interesting *disaster* group.

Grk. *πάθος, πάθημα* 'what happens, emotion' (16.12), often 'misfortune'.

Lat. *incommodum,* neut. of *incommodus* 'inconvenient', frequent for 'misfortune, disaster'.

It. *disgrazia,* Fr. *disgrâce* (> NE *disgrace*), Sp. *desgracia,* fr. MLat. *disgrātia* 'dis-favor', but all used also for 'misfortune'. NED s.v. *disgrace* sb. ('misfortune' obs.).

It. *disastro,* hence Fr. *désastre* (> NE *disaster*), Sp. *desastre,* somewhat stronger than 'misfortune', cpd. of *dis-* with *astro* 'star' (cf. NE *ill-starred*). Prov. also *malastre* 'misfortune', *benastre* 'good fortune'. NED s.v. *disaster.* Wartburg 1.165.

NIr. *donas,* fr. adj. *dona* 'wretched, unfortunate', deriv. of *do-* 'ill-', see under *sona* 'happy' (16.24).

MW *dyvyd,* cpd. of *dy-* 'ill-' and a form of IE **bhwiy-* (Ir. *bīu,* Lat. *fīō,* etc.), as in Ir. *dube* 'grief'. Pokorny, Z. celt. Ph. 15.290.

Br. *reuz,* etym.? Henry 233.

Br. *droukverz,* cpd. of *drouk* 'bad' and *berz* 'prosperity'.

OHG *ungifuari,* neg. of *gifuari* 'what is advantageous, convenient' (cf. Lat. *incommodum,* above) : OHG *faran* 'go, fare', *fuoren* 'lead', etc. Walde-P. 2.39. Falk-Torp 291.

OHG *wēnagheit* (mostly 'misery'), fr. *wēnag* 'wretched, unfortunate' = Goth. *wainahs* 'wretched', perh. formed fr. the the interjection Goth. *wai,* etc. Walde-P. 1.212 f.

Boh. *nehoda* (beside *náhoda* 'chance'), fr. *hod* 'throw, time' (= ChSl. *godŭ* 'point of time', 14.11) with neg. prefix. Berneker 318.

Verbs for 'please', whence some nouns for 'pleasure', are mostly based on notions like 'suitable, becoming, conforming to, falling to one's lot', less frequently on what is one's 'will', or 'pleasure'. Emotional value is secondary and less strongly developed than in their deriv. nouns.

1. Grk. *ἀρέσκω,* NG *ἀρέσω* (new pres. fr. aor. *ἤρεσα*), as orig. 'be fitting' : *ἀραρίσκω* 'fit' (cf. *ἄρμενα* 'fitting, pleasing'). Walde-P. 1.69. Boisacq 73.

Grk. *ἀνδάνω* 'please' beside *ἥδομαι* 'be pleased, enjoy oneself' and *ἡδονή* 'pleasure' : Skt. *svad-* 'take pleasure in, enjoy' and the more widespread adj. for 'sweet, pleasant' Skt. *svādu-,* Grk. *ἡδύς,* Lat. *suāvis,* etc. (15.35). Walde-P. 1.601. Ernout-M. 991.

2. Lat. *placēre* (> It. *piacere,* OFr. *plaisir,* Fr. *plaire,* Sp. *placer,* Rum. *plăcea*) : *plācāre* 'reconcile, soothe', *placidus* 'gentle, quiet, calm', prob. as orig. 'make smooth, flatten out' : Grk. *πλάξ* 'flat surface', etc. Cf. also Toch. A

plākäm 'agreement', etc. (SSS 454). Walde-P. 2.90. Ernout-M. 773 f.

Sp. *agradar* (Fr. *agréer*, etc. 'agree'), fr. Sp. *grado* 'will, pleasure' (Fr. *gré*, etc.), fr. Lat. *grātum*, neut. of *grātus* 'agreeable, dear'. REW 3848.

Sp. *gustar* 'taste' (15.31), hence, through obj. 'taste' (= 'have a pleasant taste'), 'please' in *me gusta* 'it pleases me, I like'.

3. Ir. *toltanaigur*, MIr. *toltanaigim*, cf. *toltanach* gl. 'beneplacitus', also Ir. *tolnur* (e.g. 3sg. rel. *tolnathar*), both fr. *tol* 'will' (cf. NIr. *toilighim* 'will, wish', 16.61). Pedersen 2.47, 652.

NIr. *taitnim* (*taitnighim*, *taithnighim*), orig. 'shine', as Ir. *taitnim* (15.56).

W. *boddhau*, *boddio*, fr. *bodd* 'will, pleasure' = Corn. *both* 'will' : Ir. *buide* 'thanks', ON *boð*, MHG *bot* 'command', etc., fr. the root of Goth. *ana-biudan* 'command', Grk. πεύθομαι 'learn', Skt. *budh-* 'awake, perceive', etc. Walde-P. 2.147. Pedersen 1.35.

ON *hugna*, fr. *hugr* 'mind, mood, desire' : Goth. *hugs* 'mind, understanding', etc. (17.11).

OE (*ge*)*cwēman*, ME (*i*)*queme*, fr. OE (*ge*)*cwēme* adj. 'pleasing, agreeable' (OHG *bi-quāmi* 'fitting, useful'), fr. the stem of OE *cuman*, Goth. *qiman* 'come', etc. (cf. Goth. *ga-qimiþ* 'it is fitting', NE *become*, Lat. *con-venīre*). NED s.v. *queme* adj. and vb.

ME *plaise*, *pleise*, etc., NE *please*, fr. OFr. *plaisir* (above, 2). NED s.v.

Du. *behagen* (MLG *behagen* > Dan. *behage*, Sw. *behaga*), OS *bihagōn*, MHG, NHG *behagen* (now mostly 'suit'), cf. OE *onhagian* 'suit, be convenient or possible', ON *haga* 'manage, arrange', prob. : Skt. *çak-* 'be powerful, be able', etc. Walde-P. 1.333. Falk-Torp 58, 371. Kluge-G. 46.

NHG *gefallen*, fr. MHG *gevallen*, OHG *gifallan* 'fall to one's lot', in MHG rarely 'please' and always with *wol*, *baz*, etc.; used orig. in military language when dividing the booty by casting lots. Kluge-G. 191. Weigand-H. 1.646 f.

5. Lith. (*pa*)*tikti*, Lett. (*pa*)*tikt* (the simple vb. in Lith. mostly 'suit, fit') : Lith. *teikti* 'join', *tiekti* 'prepare', OPruss. *teickut* 'make', outside connections dub. Walde-P. 1.725. Mühl.-Endz. 4.157, 183 f.

6. ChSl. *ugoditi*, perfect. cpd. of the simple vb. in Russ.-ChSl. *goditi* id., Russ. *godit'sja* 'suit, fit, be of use', SCr. *goditi* 'be desirable, of use', etc. : ChSl. *godŭ* '(proper) time', etc. (14.11). Berneker 317. Walde-P. 1.532.

SCr. *dopasti se*, *dopadati se*, refl. of *dopasti*, *dopadati*, 'fall upon, fall to one's lot', etc., cpd. of *pasti*, *padati* 'fall'. Sense 'please' after NHG *gefallen*. Rjecnik Akad. 2.645.

Boh. *líbiti se*, refl. of *líbiti* 'like' (: ChSl. *ljubiti* 'love', etc., 16.27).

Pol. *podobać się*, cf. *podoba* 'gratification, pleasure, resemblance', ChSl. *podobiti* 'make fitting, like', *podoba* 'adornment' (*podoba jestŭ* 'it is proper'), Russ. *podobit'sja* 'resemble', etc. : Goth. *gadaban* 'happen', OE pple. *gedafen* 'proper', etc. Berneker 203 f.

Russ. *nravit'sja*, fr. *nrav* 'character, temper, humor', fr. ChSl. *nravŭ* (genuine Russ. *norov* 'habit, custom, usage'), this prob. : Lith. *norėti* 'wish, will'. Walde-P. 2.333.

7. Skt. *prī-* : ChSl. *prijati* 'be favorable', Goth. *frijōn* 'love', etc. (16.27). Walde-P. 2.86 f.

Skt. *tarpaya-*, caus. of *tṛp-* 'be satisfied, satiated, partake of' : Grk. τέρπω 'satisfy, delight, cheer', mid. 'enjoy', τέρψις 'joy', Lith. *tarpti* 'thrive', etc. Walde-P. 1.737.

Av. *voī* (inf.) : Skt. *deva-vī-* 'pleasing to the gods', *devavīti-* 'feast of the gods', *vīta-* 'desired, pleasant', fr. root *vī-* (3sg. *veti*) 'seek eagerly, pursue, attack' : Grk. ἵεμαι 'hasten, be eager'. Walde-P. 1.228. Barth. 1427 f.

16.212. Note on polite phrases for 'please'.

In several languages the verbs for 'please' furnish the stereotyped polite 'please' (take a seat, etc.), as NE *please*, shortened from (*may it*) *please you* (NED s.v. *please* 6 c), It. *per piacere*, Fr. *s'il vous plaît*. But more widespread is the use of the first singular of a verb for 'ask, request' (18.35), as NG παρακαλῶ, NHG *bitte*, Lith. *prašau*, SCr. *molim*, Boh. *prosim*, Pol. *proszę*, Rum. *rog*. Among other such phrases are Sp. *hace el favor* 'do the favor' (or simply *favor*), Dan. *vær saa god* 'be so good', Russ. *požaluista* : *požalovat'* 'do a favor', Sp. *sirvase* (more formal than *favor*), refl. of *servir* 'serve'.

It is impossible to draw any sharp lines between the pleasurable emotions expressed by NE *pleasure*, *joy*, *delight*, *gladness*, *happiness*, etc., or by adjectives like *joyful*, *glad*, *merry*, *gay*, *happy*, etc.; and their differentiation in usage corresponds only in small measure to that in similar groups elsewhere.

The words listed here are those that seem to be the best generic terms for 'joy', the choice in some cases being difficult. Omitted are many others, as Grk. τέρψις 'delight, enjoyment' (: τέρπω 'delight, gladden', mid. 'enjoy', Skt. *tṛp-* 'be satisfied, pleased', Lith. *tarpti* 'thrive'. Walde-P. 1.737); NE *delight* (ME *delit* fr. OFr. *delit* = It. *diletto*, etc., through the vb. fr. Lat. *dēlectāre* 'allure, charm, delight', frequent. of *dē-licere* 'entice away', cpd. of *lacere* id. Ernout-M. 532 f. REW 2532. NED s.v.).

The moderate 'pleasure' may be covered in part by some of the words listed here under 'joy', as NHG *freude*. But it is most commonly expressed by words having an underlying notion of 'satisfaction'. Thus derivs., or infins. used substantively, of vbs. for 'please' (16.21), as Grk. ἡδονή (: ἀνδάνω 'please', ἡδύς 'pleasant', etc.), It. *piacere*, Fr. *plaisir* (OFr. infin.; hence ME *plesir*,

NE *pleasure* with spelling after *measure*, etc.), Sp. *placer*, Rum. *plăcere*, NHG *gefallen*, Skt. *prīti-*. Or other words meaning orig. satisfaction, as NHG *vergnügen*, Du. *genoegen* (: NHG *genug* 'enough', etc.), Russ. *udovol'stvie* (cf. *udovol'stovat'* 'satisfy', *dovol'stvie* 'sufficiency, abundance, ease' : *dovol'no*, ChSl. *dovolĭno* 'enough', this : *volja* 'will', etc.). So Goth. *gabaurjōþus* (renders ἡδονή, beside adv. *gabaurjaba* = ἡδέως, ἥδιστα) : OE *gebyrian* 'pertain to, happen', etc. (Feist 175; for formation, cf. F. Metzger, Language 21.971 f.). NHG *lust*, orig. 'strong desire' (: Goth. *lustus*, OE *lust*, etc.) now common for the simple 'pleasure'. Lat. *voluptās* the most distinctive word for 'pleasure', beside neut. adj. *volup* 'pleasant, agreeable' : Lat. *velle* 'wish', Grk. ἐλπίς 'hope', etc.

3. Ir. *fāilte* (also 'welcome', and NIr. in this sense), fr. *fāilid* 'joyful, glad', etym.? Dub. connections in Pedersen 2.17, Stokes 262.

Ir. *sube*, cpd. of *su-* 'good' (cf. *du-be* 'grief') and *-be* fr. some form of the vb. for 'be', as **bhwī-*, *bhwiy-* in Ir. *bīu*, Lat. *fīō*, etc. Pokorny Z. celt. Ph. 15.290.

Ir. *āithes*, NIr. *āthas*, perh. : Ir. *āith* 'sharp, keen' (Dillon).

NIr. *lūthghāir*, MIr. *lūthgūir* (Windisch, p. 673), cf. Gael. *lūthghāir* 'a great shout of joy', apparently the orig. sense, cpd. of *lūth* 'strength, movement' and *gāir* 'shout', whence also NIr. *gāirdighim* 'rejoice'.

W. *llawenydd*, Br. *levenez*, fr. W. *llawen*, Br. *laouen* 'joyful', prob. : Grk. ἀπολαύω 'have the enjoyment, benefit of', Goth. *launs* 'reward', etc. Walde-P. 2.380.

W. *dywenydd*, fr. *dywenu* 'smile, be glad', *dywen* 'a smile, glad mien', intensive cpd. of *gwen* 'smile' (16.25). Evans, W. Dict. s.v.

Br. *joa*, fr. Fr. *joie* (above, 2).

4. Goth. *fahēþs*, ON *fagnaðr*, OE *gefēa* with adj. *fægen*, ME *fayn* (NE *fain*), OHG *gifeho* : Goth. *faginōn*, ON *fagna*, OE *gefēon*, OHG *gifehan* 'rejoice', outside root connections dub. Walde-P. 2.16. Falk-Torp 201. Feist 135.

ON *gleði*, Dan. *glæde*, Sw. *glädje*, OE *glædnes*, etc., fr. adjs. ON *glaðr*, OE *glæd* 'cheerful, joyful', also 'bright, shining' = OHG, MHG *glat* 'bright' and 'smooth', NHG *glatt*, Du. *glad* 'smooth' : ChSl. *gladŭkŭ* 'smooth', Lat. *glaber* 'smooth, bald'. Whether 'smooth' > 'bright' or conversely (cf. 15.77), the

sense 'joyful' comes fr. 'bright'. Walde-P. 1.625 f. Falk-Torp 324. NED s.v. *glad*.

OE *blīþs*, *blis*(*s*), ME *blisse* (but the more restricted sense, as in NE *bliss*, influenced by *bless*; cf. NED s.v.), fr. adj. *blīþe* 'kind' and 'joyful', ME, NE *blithe* = OHG *blīdi*, MHG *blīde*, Du. *blijde*, *blij* 'joyful', Goth. *bleiþs* 'merciful, loving goodness', ON *blīðr* 'gentle, pleasing', root connection dub., perh. through 'bright' : OE *blēo* 'color, appearance', etc. Walde-P. 2.210. Falk-Torp 81.

OE *wynn*, ME *wunne*, *winne* (cf. NE *winsome*), OHG *wunna* 'great joy, bliss' (NHG *wonne*) : Lat. *venus* 'charm' (and *Venus*), Skt. *van-* 'desire, seek, gain', Goth. *wēns* 'hope', OHG *wunscan*, OE *wyscan* 'wish', etc. Walde-P. 1.258.

OHG *frewī*, *frewida*, MHG *vröude*, NHG *freude*, Du. *vreugde* (Dan. *fryd*, Sw. *fröjd*, sense prob. influenced by German; ON *frygð* 'bloom, magnificence'), fr. adj. OHG *frō* (inflected *frawer*, etc.), MHG *vrō*, NHG *froh* 'joyful, glad', in OHG also 'swift' as ON *frār*, this prob. the earlier meaning, hence perh. : Skt. *pru-* 'spring up', *prava-* 'hovering', Russ. *pryt'* 'swift pace', etc. Walde-P. 2.88. Weigand-H. 1.588. Somewhat otherwise formally but much the same semantically (as orig. 'forward moving' Gmc. **frawa-* = IE **pro-wo-*) Falk-Torp 278.

OE *ioie*, NE *joy*, fr. Fr. *joie* (above, 2).

OHG *mendī*, MHG *mende*, with vb. *menden* 'rejoice' : OHG *muntar* 'eager, zealous' (NHG *munter*), Goth. *mundōn sis* 'take notice of', Lith. *mandras* 'lively, impudent', Grk. μανθάνω 'learn', etc. Walde-P. 2.271. Feist 367.

Words of the group OE *lust*, etc. 'desire' (16.62) are also used for 'pleasure, joy', e.g. sometimes in OE (cf. NED s.v.), and esp. in MHG, NHG (Dan. *lyst*, Sw. *lust* prob. fr. LG).

5. Lith. *džiaugsmas*, fr. *džiaugti-s* 'be glad, rejoice', prob. with cons. transposition fr. *gaudž-* : Lat. *gaudium* (above, 2). Walde-P. 1.529. Walde-H. 1.584.

Lith. *linksmybė*, Lett. *līksma* (also *līksme*, *līksmiba*), fr. Lith. *linksmas*, Lett. *līksms* 'joyful', prob. : Lith. *lenkti* 'bend, bow', *linkėti* 'incline to, wish', with semantic development through 'inclined to, agreeable, pleasant'. Mühl.-Endz. 2.486. Leskien, Ablaut 334.

Lett. *prieks*, with adj. *priecīgs* 'joyful', perh. fr. the root of ChSl. *prijati*, Goth. *frijōn* 'love', Skt. *priya-* 'dear', etc. (Walde-P. 2.86 f., without the Lett. forms). Mühl.-Endz. 3.393.

6. ChSl. *radostĭ* (reg. for χαρά in Gospels), etc., general Slavic, fr. adj. ChSl. *radŭ*, etc. general Slavic for 'joyful, glad' or in part 'willing, ready' (so mostly SCr., Pol. *rad*) : Lith. *rōds* 'willing', OE *rōt* 'cheerful' more often 'noble, excellent', vb. *ā-rētan* 'comfort, delight', etc. Walde-P. 2.369. Trautmann 235. Otherwise (*rad-* fr. *ard-* on account of *Ardogastes* = *Rodogost*) Brückner 452, Liewehr, Einführung in die hist. Gram. d. tschechischen Sprache 190 f.

ChSl. *veselĭje* = ἀγαλλίασις 'great joy, exultation' (cf. Lk. 1.24 *radostĭ i veselĭje* = χαρὰ καὶ ἀγαλλίασις), and in modern Slavic esp. 'boisterous joy, merrymaking' (Pol. *wesele* 'wedding feast, wedding'), deriv., through the vb., fr. adj. ChSl. *veselŭ*, etc., general Slavic (> Rum. *vesel*), mostly 'merry' but not always sharply distinguished from the previous group (ChSl. *radŭ*, etc.); prob. as orig. 'feasting' : Goth. *wisan* (esp. *waila wisan*) 'be merry', *wailawizns* 'food', OE *wist* 'food', Ir. *feis* 'meal, feast', etc. Walde-P. 1.308. Feist 569. Or/and (?) : Skt. *vasu-* 'good'. Fraenkel, Mélanges Pedersen 453.

7. Skt. *ānanda-*, *nanda-*, fr. *ā-nand-*, *nand-* 'rejoice', etym. dub., but perh. :

nad- 'sound, cry' (so Whitney, Roots). Cf. Ir. *lūthghāir* (above, 3).

Skt. *harṣa-* : *hṛṣ-* 'bristle, be excited, rejoice', Lat. *horrēre* 'bristle, shudder', Ir. *gerb* 'rough'. Walde-P. 1.610.

Skt. *prīti* : *prī-* 'please', *priya-* 'dear', etc. (16.21).

Skt. *mayas-*, Av. *mayā-*, *māyā-*, prob. : Lat. *mītis* 'mild, gentle', Lith. *mielas* 'dear', etc. Walde-P. 2.244. Barth. 1141.

Av. *šāiti-* (OPers. *šiyāti-* 'well being, happiness'), fr. *šyā-* 'rejoice' : Lat. *quiēs* 'rest', ON *hvīld* 'rest', Goth. *hweila* 'time', ChSl. *po-kojĭ* 'rest'. Walde-P. 1.510. Barth. 1716.

Av. *urvāza-* : *urvāz-* and *urvād-* 'rejoice', root connection? Barth. 1545.

Nearly all the words for 'joyful' (or 'glad'; but NE *glad* now weaker than formerly, and of persons only predicative, cf. NED), as listed here are connected, either as derivs. or conversely, with some of those for 'joy', though without complete correspondence between the commonest sbs. and adjs. in the same language. Whether or not these have been mentioned in the discussion of 'joy' (16.22), their relations are obvious.

We comment here only on the few others of those listed, and on some of those used in related senses, especially 'merry'.

1. It., Sp. *contento*, Fr. *content* 'satisfied, contented' (fr. Lat. *contentus* id., pple. of *continēre* 'hold together, contain') are also commonly used in the sense of 'pleased, glad'.

2. Rum. *voios* (beside *vesel* fr. Slavic, cf. 16.22), orig. 'willing' (fr. *voie* 'will', this fr. Slavic *volja* id.), hence 'well-disposed' and 'glad, joyful'.

3. Goth. *hlas* (renders ἱλαρός 'cheerful', in eccl. writers a common word for 'joyful'), etym. dub. Feist 262. Walde-H. 1.228 (s.v. *clārus*).

4. Words for 'merry, gay' (including some of the words listed, in which this notion is more or less dominant) are of various sources, e.g. It. *allegro*, Sp. *alegre*, orig. 'lively' (16.22); NHG *munter* fr. OHG *muntar* 'eager' : OHG *mendī* 'joy' (16.22); NHG *lustig* fr. *lust* 'desire' and 'joy' (16.22); ChSl. *veselŭ*, etc. prob. orig. 'feasting' (16.22); OE *myrge*, ME *meri*, NE *merry* (with sb. OE *myrgþ*, NE *mirth*), as orig. 'time-shortening', hence 'amusing' (cf. NHG *kurzweilen* 'amuse') : OHG *murg* 'short', Goth. *gamaurgjan* 'shorten', etc. (Walde-P. 2.314, NED s.v.); ME, NE *gay*. fr.OFr. *gai* 'lively, gay', orig. disputed (REW 9477a; Gamillscheg 451).

Br.	*eurus; eurvad*				

The great majority of the words for 'happy' and 'happiness' are based on the obj. 'good fortune', which leads to the feeling of happiness, as illustrated by ME *happy*, fr. *happe*, *hap* 'fortune, good fortune', hence 'fortunate' (as still in *happy choice*, etc.), but in NE commonly 'happy' in feeling, whence NE *happiness*. For words of early periods it is sometimes doubtful how far they refer to the actual emotion or merely to the external circumstances.

1. Words which are the same as (so often for the sb.), or connected with, those for 'good fortune', discussed in 16.17.

Grk. εὐτυχής, εὐτυχία 'fortunate, good fortune' (Aristot. EN 1153b21 ff. distinguishes εὐτυχία from εὐδαιμονία), but in NG also the usual words for 'happy, happiness'; Fr. *heureux* (> Br. *eurus*), *bonheur* (rendered lit. by Br. *eurvad*), Skt. *bhagavant-*, *sāubhāgya-*, and all the modern Gmc. (NHG *glücklig*, *glück*, etc.) and Balto-Slavic words.

2. Grk. εὐδαίμων, cpd. of εὐ- 'good' and δαίμων 'spirit, one's personal fortune', hence 'happy' with sb. εὐδαιμονία (the regular technical words in Aristot. etc.).

Grk. μακάριος (poet. μάκαρ; sb. μακαρία not common) 'blessed, happy' (with subtle distinction fr. εὐδαίμων in Aristot. EN 1101a7, 19), etym.? Boisacq 602. NG μακάριος 'blessed', esp. 'the deceased'.

3. Lat. *fēlīx*, in earliest use 'fruitful' (of trees), then 'fortunate' and 'happy', with sb. *fēlīcitās*, fr. IE **dhē*(*i*)- in Skt. *dhayati* 'sucks', Grk. θῆσθαι 'suck', θηλή 'teat', etc. Hence It. *felice*, *felicita*, Sp. *feliz*, *felicidad*, and Rum. (through the vb. *ferici*) *fericit*, *fericire*. Ernout-M. 341, 342 f. Walde-H. 1.474 f. Walde-H. 1.474 f.

Lat. *beātus*, sb. *beātum*, pass. pple. of *beāre* 'make happy, bless' : OLat. *duenos*, Lat. *bonus* 'good'. Walde-P. 1.778. Ernout-M. 107. Walde-H. 1.101.

4. Ir. *son*, *sona*, sb. *sonas*, parallel to *dona* 'wretched', NIr. *donas* 'misfortune', derivs. of *so-* 'well' (16.71) and *do-* 'ill-' (16.72), prob. formed directly with *n*-suffix (cf. Lat. *prōnus*, fr. *prō*, Umbr. *kumne* 'in comitio' fr. *com-*, etc., Brugmann, Grd. 2.1.270), not cpds. (as Macbain s.vv.).

W. *dedwydd* (hence sb. *dedwyddwch*), primary sense 'wise', cpd. of *det-* (*doate-*) with a form of IE **weid-* 'know', as W. *gwydd* 'knowledge'. Loth, RC 36.174 f.

5. Goth. *audags* (renders μακάριος; sb. *audagei*) : OE *ēadig* 'fortunate, happy, rich', deriv. of *ēad* 'wealth, riches' (11.42), also 'happiness'. Walde-P. 1.16. Feist 63.

Both 'laugh' and 'smile' are expressions, the one vocal, the other facial, of pleasure, amusement, and also derision, ridicule. They are so closely associated that they may be expressed by the same word in the same language (Lat. *rīdēre*) or in different languages (Dan. *le* 'laugh', Sw. *le* 'smile'), or more frequently by different forms of the same root. 'Smile' is often expressed as a little (or low, or veiled) 'laugh'. In the one inherited group the meaning is 'smile' in Grk., Gmc., and Skt., while in Lett. and Slavic the simple vb. is 'laugh' with secondary derivs. for 'smile'. The same root expresses astonishment in Lat. and in part in Skt.

Several of the words for 'laugh' are cognate with others for 'noise, sound, cry', and are partly of imitative orig.

The use of 'laugh' as 'laugh at, deride' is frequent and has gone so far in the case of NG γελῶ that this is a common expression for 'cheat'.

In a few cases 'smile' comes through 'grin' from 'bare the teeth'.

1. IE **smei-*. Walde-P. 2.686 f. Falk-Torp 1082. Hellquist 1002.

Grk. μειδιάω 'smile'; Dan., Norw., ME, NE *smile* 'smile' (Sw. *smila* obs. or dial., but sb. *smil*); Lett. *smiet* 'laugh at', refl. *smieties* 'laugh', *smaidīt* 'smile'; ChSl. *smějati sę* 'laugh' (sb. *směchŭ* 'a laugh, laughter'), SCr. *smijati se*, etc. general Slavic, with refl. of deriv. vbs. SCr. *smiješiti se*, Boh. *usmívati se*, Pol. *usmiechać się* for 'smile'; Skt. *smi-* 'smile'; cf. Skt. *smaya-*, esp. *vi-smaya* 'astonishment', and Lat. *mīrus* 'wonderful', *mīrārī* 'wonder at' (16.15); Toch. *smi-* 'smile' (SSS 481). A parallel **smeu-* in NHG *smielen*, *smieren*, old Du. *smuylen* 'smile', Russ. *u-chmyljat'sja* 'smirk, smile', etc.

2. Grk. γελάω 'laugh', γέλως 'laughter', perh., through a notion of 'bright, gay', fr. **ĝel-* in words for 'shine', 'bright', and names of bright objects, as Grk. γελεῖν· λάμπειν, ἀνθεῖν (Hesych.), γαληνός 'serene, calm', γλήνη 'pupil of the eye', OHG *kleini* 'shining, fine', OE *clǣne* 'clean'. Walde-P. 1.622 f. Boisacq 143. Cf.

Lat. *renīdēre* 'shine, gleam, be radiant with joy', whence also 'smile'. But another connection, in line with the more usual semantic source of 'laugh', would be with the orig. imitative root in words like W. *galw* 'call', ChSl. *glagolati* 'speak', OE *callian*, NE *call*, etc. (Walde-P. 1.538).

NG likewise γελῶ 'laugh', and hence χαμογελῶ 'smile', with sb. χαμόγελο 'a smile', lit. 'a low laugh', cpd. with χαμο- = χάμω in form after κάτω 'down', ἐπάνω 'up' (Hatzidakis, Μεσ. 2.119) : χαμαί 'on the ground'.

A peculiarity of Boeotian speech, noted by a comic poet (Strattis 47) was the use of κρίδδω (= κρίζω 'creak, screech', plainly imitative) for γελάω.

3. Lat. *rīdēre*, both 'laugh' and 'smile' (VLat. **rīdere* > the Romance words for 'laugh'), but for 'smile' esp. *sub-rīdēre* (VLat. **surridere* > the Romance words for 'smile'), etym. dub. Walde-P. 1.277 (**wriz-d-* : Skt. *vrīḍ-* 'be embarrassed, ashamed', etc.). Ernout-M. 865 (: Skt. *krīḍ-* 'play, jest').

Rum. *zîmbi* 'smile', fr. a Slavic form corresponding to Bulg. *ząbja se* 'show the teeth', Boh. *zubiti se* 'show the teeth, smirk', deriv. of Slavic *ząbŭ* 'tooth'. Tiktin 1820 f.

4. Ir. *tibiu* 'laugh', also 'strike, hit', with development of 'laugh' through 'make a noise' (cf. Grk. κροτέω 'strike, hit' and 'make a noise', sb. κρότος 'noise'), but root connection dub. Vendryes, Étud. celt. 3.43 f.

Ir. *gen*, NIr. *gean*, W. *gwen* 'a smile', whence W. vb. *gwenu* 'smile', etym. dub. Vendryes, Étud. celt. 3.41, 42 f. Pedersen 1.96.

NIr. *gāirim* 'laugh' fr. *gāire* 'laughter' (cf. MIr. *gen gāire* 'loud laughter') : Ir. *gāir*, W. *gawr* 'cry', etc. (18.13). NIr. *mionghāire*, lit. 'a little laugh' (cpd. with *mion* 'small'), hence a 'smile', with vb. *mionghāirim*.

W. *chwerthin*, Br. *c'hoarzin* 'laugh' (OCorn. *hwerthim* 'laughter'), etym. dub., perh. fr. the root seen in Skt. *svar-* 'make a sound'. Vendryes, Étud. celt. 3.49, 43 (vs. Walde-P. 2.517, etc.).

Hence Br. *mousc'hoarzin* 'smile', lit. 'dissimulate a laugh', cpd. with *mous-* fr. *moucha* 'mask, veil', cf. *mous-kana* 'hum a tune', *mous-komz* 'mutter', etc. Henry 207.

5. Goth. *hlahjan*, ON *hlæja*, Dan. *le* (Sw. *le* now 'smile'), OE *hliehhan*, *hlæhhan*, ME *laughe*, NE *laugh*, OHG (*h*)*lahhan*, also weak vb. OHG *lachēn*, MHG, NHG, Du. *lachen* : Grk. κλώσσω 'cluck', κλαγγή 'noise', Lat. *clangere* 'sound, resound', etc., all of imitative orig. Walde-P. 1.496. Feist 259. Falk-Torp 627. Hellquist 564.

ON (rare), NIcel. *brosa* 'smile', etym.?

Du. *glimlachen* 'smile', for earlier *grimlachen* (influence of *glimmen* 'twinkle, glimmer'), fr. *grimlach* '(scornful) smile', cpd. of *grim-* : *grimmig* 'fierce, grim' and *lach* 'laughter'. Frank-v. W. 203.

NHG *lächeln* 'smile', MHG (rare) *lecheln* also 'feign friendliness', dim. of *lachen* 'laugh'.

ME, NE *smile*, etc., above, 1.

Sw. *skratta* 'laugh' (Dan. *skratte* 'give a cracked sound', Norw. 'laugh loudly') : Sw. dial. *skrata* 'resound', older Dan. *skrade* 'rattle', Ir. *scret*, NIr. *scread* 'cry', fr. an extension of an imitative *(*s*)*ker-*, cf. Skt. *kārava-* 'crow', Grk. κόραξ Lat. *corvus* 'raven', etc. Walde-P. 1.415. Falk-Torp 1025. Hellquist 946.

6. Lith. *juoktis* 'laugh', beside *juokauti* 'laugh, joke', fr. *juokas* 'laughter, joke' = Lett. *iuoks* 'joke', these (not cognate with, but) loanwords fr. Lat. *jocus* through NHG students' slang (*jo-*

kus, iux, etc.). Mühl.-Endz. 2.126. Walde-H. 1.715.

Lith. *šypsotis* 'smile', beside *šieptis, šaipytis* 'grin', etym.? Walde-P. 1.364 (but Skt. *çiprā-* rarely 'nose', mostly dual, 'cheeks' or 'lips').

Lett. *smieties* 'laugh', *smaidīt* 'smile', above, 1.

7. ChSl. *směјati sę* 'laugh', etc., general Slavic, and SCr. *smiješiti se,* etc. 'smile', above, 1.

Russ. *u-lybat'sja* 'smile', precise source dub., but prob. fr. a form parallel to Ukr. *lupiti* 'peel, bare the teeth, grin' (cf. Rum. *zîmbi,* above, 3). Berneker 751.

Of the verbs for 'play', one is derived from the word for 'child', one group from a noun for 'jest', some from nouns for 'play, game' of obscure origin. But the most frequent relation is with words denoting quick action, as 'jump, dance', etc.

1. Grk. *παίζω,* fr. *παῖς, παιδός* 'child'.

Grk. *ἀθύρω* (poet., Hom.+), beside *ἄθυρμα* 'plaything, amusement', perh. cpd. *ἀ-* fr. **ņ-* 'in' and **θυριω* orig. 'jump about' or the like : *θοῦρος* 'rushing, impetuous', Russ. *durit'* 'play the fool', Av. *dvar-* 'walk (of daevic beings), hurry', etc. Walde-P. 1.842.

2. Lat. *lūdere,* beside *lūdus* 'game, play', old *loidos, loedos* : Grk. *λίζει· παίζει* (Hesych.), *λοίδορος* 'abusive'. Walde-P. 2.402. Ernout-M. 565 f. Walde-H. 1.829.

It. *giocare,* Fr. *jouer,* Sp. *jugar,* Rum. *juca* (Rum. 'play a game or instrument', 'dance'; refl. 'play' as a child), fr. VLat. **iocāre,* Lat. *iocārī* 'to jest, joke', fr. sb. *iocus* 'a jest', this through 'play on words' fr. 'saying', with different development in Umbr. *iuka* 'prayers', fr. a root **yek-,* seen in OHG *jehan* 'say, confess', etc. Walde-P. 1.204 f. Ernout-M. 495. Walde-H. 1.715. REW 4585.

3. Ir. *imberim,* NIr. *imrim* ('be busy with, practise', etc. hence also 'play'), cpd. of *berim* 'carry'. Pedersen 2.468. Laws, Gloss. 474.

Ir. *cluchigur* (K. Meyer, Contrib. 395), fr. *cluche* 'game, sport, play', prob. : *cless* 'feat, trick', *clechtaim* 'practise', this : Skt. *krīḍ-* 'play' (?). Pedersen 1.362, 2.493. Walde-P. 2.572.

NIr. *sūgruighim,* beside sb. *sūgradh* 'play, sport, fun', cf. also *sūgach,* MIr. *sucach* 'merry, cheerful', etym.?

W. *chware,* Br. *c'hoari,* with *chw-* fr. *gw-* (Corn. *gware* 'a play', MW *gware* beside *chware*), perh. as 'loiter, delay' : Ir. *fo-d-rig* 'delays', cpd. of the root in Ir. *con-rigim* 'bind', Lat. *corrigia* 'thong', etc. Pedersen 1.433 f., 2.593.

4. ON *leika* (> ME *leyke, layke*), Dan. *lege,* Sw. *leka* = Goth. *laikan* 'spring, hop', OE *lācan* 'move quickly, jump, play (a musical instrument),

fight', MHG *leichen* 'hop, deceive', etc. : Grk. *ἐλελίζω* 'cause to tremble', Skt. *rej-* 'make tremble, quiver', etc. Walde-P. 2.399. Falk-Torp 630 f.

OE *plegian, plegan,* ME *pleie,* NE *play,* in the older language also, and doubtless more orig., 'move about swiftly, spring, dance', etc., now generally separated from OHG *pflegan* 'care for, attend to, be wont', but in any case outside connections dub. Falk-Torp 836 f. NED s.v. *play,* vb.

OE *spilian,* ME *spile,* OHG *spilōn,* MHG *spil(e)n,* NHG *spielen,* Du. *spelen,* in the older languages esp. 'be in quick motion, move about', etym.? Hence the loanwords (fr. MLG) Dan. *spille,* Sw. *spela,* which have mostly replaced the native ones with reference to games, cards, music, etc. Falk-Torp 1120 f. Weigand-H. 2.915.

5. Lith. *žaisti,* perh. as orig. 'jump' : Lat. *haedus* 'young goat', Goth. *gaits,* etc. 'goat', ChSl. *zajęčĭ* 'hare', and Skt. *jihīte* 'bounds up, leaps up, runs off'. Walde-P. 1.527, 544.

Lith. *lošti* (esp. 'play' cards; cf. NSB and Hermann, Lit.-Deutsches Gesprächsb. pp. 76 ff.), orig. 'turn up' (the cards). Cf. *-lošti* in *at-si-lošti* 'lean, incline', etym.? Skardžius, Lietuvių kalbos žodžių daryba 483 f.

Lett. *spēlēt,* fr. MLG *spelen.*

Lett. *ruotalāt* : *ruotāt* 'be dexterous, turn, hop', also 'loaf about', refl. 'tumble about, play' : *rats* 'wheel', etc. Mühl.-Endz. 583, 584.

6. ChSl. *igrati* 'spring, dance', later also play and so general modern Slavic (in part refl. in sense 'play' as a child), cf. ChSl. *igrĭ* sb. 'play' (Supr.) : Skt. *ej-* 'stir, move, quake, tremble', *ing-* 'stir, move', ON *eikenn* 'wild, raging'. Walde-P. 1.11. Berneker 422. Brückner 154.

7. Skt. *krīḍ-,* prob. as **kriz-d-* : Goth. *-hrisjan,* OE *hrissan* 'shake', Ir. *cressaim* 'shake, swing', fr. an extension of the root **(s)ker-* in Grk. *σκαίρω* 'dance, hop, spring', etc. Or as **kliz-d* : Ir. *cless* 'feat, trick' ?. Walde-P. 2.572.

The sbs. and vbs. for 'love' are generally parallel forms of the same root, but in some languages there is disparity; hence both are listed. Many of the adjs. for 'dear' are also cognate with the words for 'love' and so are included in the discussion here, though listed separately (16.28).

Although there are sometimes distinctive words for various aspects of love, especially sexual love vs. that of parents, children, friends, etc. (so most clearly in ancient Greek), it is more generally true that the same word is used, any distinction depending upon the context.

1. IE **leubh-* in words for 'love, yearn for', 'dear' (also 'approve, praise, believe'), etc.). Walde-P. 2.419. Walde-H. 1.793.

Here as the usual words for 'love' or 'dear'. Gmc. sbs. OE *lufu,* ME, NE *love,* OHG *liubī,* MHG, NHG *liebe,* Du. *liefde;* vbs. OE *lufian,* ME *lovie,* NE *love,* OHG *liubōn,* MHG, NHG *lieben;* adjs. 'dear' Goth. *liufs,* ON *ljūfr,* OE *leof,* ME *leve* (NE *lief*), OHG *liob, liub,* MHG *liep,* NHG *lieb,* Du. *lief;* ChSl. *ljuby* sb., *ljubiti* vb., *ljubŭ* adj. 'dear', etc. (below, 7); cf. Skt. *lubh-* 'long for' (mostly of violent desire), Lat. *lubet, libet* 'is pleasing' (Osc. *loufir* 'vel'), *lubīdō, libīdō* 'strong desire', Grk. *λυπτά· ἑταίρα, πόρνη* (Hesych.), etc. (Ir. *cobla* 'love' is a ghost-word; cf. Z. celt. Ph. 20.299).

2. Grk. *ἔρως,* Hom. *ἔρος,* with vb. Hom. *ἔραμαι,* Att. *ἐράω,* all usually of sexual love, as likewise NG *ἔρωτας,* with vb. *ἐρωτεύομαι* 'fall in love', *ἐρωμένη* 'sweetheart, mistress', outside root connections dub. Walde-P. 1.144. Boisacq 270 f.

Grk. *φιλέω* 'love' (have affection for), *φιλία* 'friendly love, friendship', fr. *φίλος* 'dear', sb. 'friend', in Hom. also 'one's own', this perh. the earliest sense and so fr. an Anatolian word represented by Lyd. *bilis* 'one's own'. Kretschmer, IF 45.267 ff.

Grk. *ἀγαπάω,* 'love' as 'have regard or affection for', 'be fond or contented with', etc., rarely of sexual love. Hence the late back-formation *ἀγάπη* (first in LXX), in NG the common word for 'love' as also the vb. *ἀγαπῶ,* adj. *ἀγαπητός* 'beloved, dear' (Hom.+). Etym. dub. Walde-P. 2.257. Boisacq 6.

Grk. *στέργω,* esp. of the love of parents and children, of a ruler and his subjects, etc., rarely of sexual love (another sense 'be contented with', hence NG 'consent, agree with') with sb. *στοργή,* 'affection', perh. : ChSl. *strěgą, strěšti* 'guard, keep', *stražĭ,* Russ. *storož'* 'watchman, guard', etc., general Slavic. Walde-P. 2.642. Boisacq 910.

3. Lat. *amor* (> It. *amore,* Fr. *amour,* Sp., Rum. *amor,* mostly of learned orig.), vb. *amāre* (> It. *amare,* Fr. *aimer,* Sp. *amar*), prob. fr. an infantile syllable seen in pet names like Grk. *ἀμμά,* OHG *amma* 'mother, nurse', Lat. *amita* 'aunt', etc. (above, p. 94). Walde-P. 1.53. Ernout-M. 45 f. Walde-H. 1.40 f. REW 399. Wartburg 1.46, 82.

Instead of the vbs. of this group the Romance languages or dials. show other more popular expressions for 'love', as Fr. *avoir cher* lit. 'hold dear' (cf. Swiss *gern haben*), It. *bene voler,* lit. 'wish well', (Lat. *bene velle alicui* Plaut., etc. already colloq. 'be fond of', but hardly yet quite = *amare;* Bonfante Riv.IGI 19.), Sp. *quedar* 'wish' (16.61), Cat. *estimar* orig. 'value, esteem' (Lat. *aestimāre*). See refs. above (REW, Wartburg) and Spitzer, Liebessprache 5.

Lat. *dīligere* (weaker than *amāre,* according to Cicero, and rarely of sexual love), fr. **dis-legere,* cpd. of *legere* 'pick up, choose'. Ernout-M. 536. Walde-H. 1.351 f.

Lat. *venus* 'love, charm' (but common only in the personified *Venus*) : Skt. *van-* 'seek, desire, gain', Goth. *wēns* 'hope', OE *wyn,* OHG *wunna* 'great joy, bliss', OHG *wunscan,* OE *wyscan,* etc. 'wish' (16.61). Walde-P. 1.258 ff. Ernout-M. 1037.

Lat. *cāritās* 'love, affection', fr. *cārus* 'dear' (> It., Sp. *caro,* Fr. *cher*) : Ir. *caraim,* W. *caru,* Br. *karout* 'love', OE *hōre,* OHG *huora,* etc. 'whore', Lett. *kārs* 'lewd, greedy'; prob. also Skt. *kāma-* sb. 'love' with vb. root *kam-,* etc. (below, 8). Walde-P. 1.325. Walde-H. 1.175. Ernout-M. 158 (rejecting the Indo-Iranian connection).

Rum. *iubire,* old infin. as sb., fr. the vb. *iubi,* fr. the Slavic, cf. ChSl. *ljubiti,* etc. (above, 1).

Rum. *dragoste* 'love' with *drag* 'dear', fr. the Slavic, cf. late ChSl. *dragostĭ* 'preciousness', ChSl. *dragŭ* 'precious', modern Slavic also 'dear' (16.28). Tiktin 569 f., 571.

4. Ir. *grād,* NIr. *grādh,* whence the vb. *grādhaim,* orig. dub., perh. loanword fr. Lat. *grātum* 'favor' (*grātus* 'acceptable, agreeable') in phrases like *grātum facere alicui.* Walde-P. 1.601. Walde-H. 1.620. Otherwise (as cognate) Pedersen 1.133.

Kissing, as an expression of affection or love, is unknown among many races, and in the history of mankind seems to be a later substitute for the more primitive rubbing of noses, sniffing, and licking. The partial agreement among words for 'kiss' in some of the IE languages rests only on some common expressive syllables, and is no conclusive evidence that kissing was known in IE times. It was late in India, and a Slavic group probably reflects the 'lick' kiss. Schrader, Reallex. s.v. Kuss. Hopkins, The Sniff-Kiss in Ancient India, JAOS 28.120 ff. Meissner, Der Kuss im alten Orient, Ber. Preuss. Akad. 1934. 914 ff.

A distinction between the kiss of affection and that of erotic love is sometimes made as in Latin (cf. *Sciendum osculum religionis, savium voluptatis; quamvis quidam osculum filiis dari, uxori basium, scorto savium dicant,* Serv. ad Verg.), but even here is not maintained and in general is ignored.

Several of the words for 'kiss', as already stated, are of imitative origin. One is from a 'little mouth'. Some come, through church influence, from the kiss of 'peace' or 'greeting'. In some the feeling of 'love' is the antecedent of its expression as 'kiss'.

1. Derivs. of an expressive syllable *ku*

or *kus* (cf. the more obviously imitative *bu, bus,* below, 2). Gmc. forms resisting the consonant shift by reason of the expressive character, or influenced by the group Goth. *kiusan,* Grk. *γεύω* etc. 'try, taste', or fr. a parallel *gu, gus?* Walde-P. 1.465. Feist 315.

Grk. *κυνέω* (aor. Hom. *ἔκυσσα,* mostly poet., in prose replaced early by *φιλέω*); Goth. *kukjan,* OFris. *kükken;* ON *kyssa,* OE *cyssan* (> W. sb. *cusan,* vb. *cusanu*), OHG *kussen,* etc. with sbs. ON *koss,* OE *coss,* OHG *kus,* etc.; Skt. *cumb-* (late, cf. below, 9); Hitt. *kuwass-* (Benveniste, MSL 33.139).

2. Derivs. of an imitative *bu, bus,* in words for 'kiss' and 'lip' or 'mouth'. Widespread group not confined to IE languages, but mostly dial. or colloq. words not included in the list. Walde-P. 2.113 f. Berneker 104. Mühl.-Endz. 1.344 f.

NE *buss* (sb. and vb.), NHG sb. *buss,* vb. *bussen,* Sp. *buz* ('kiss of respect', fr. Arab.), Pol. *buzia, buziak;* cf. Ir. *bus,* Alb. *buzë,* Rum. *buză* 'lip'. Here as regular verbs for 'kiss' Lith. *bučiuoti,* Lett. *bučuot,* beside Lith. *buč* an imitative exclamation inviting a kiss (NSB s.v.), perh. fr. NHG dial. forms like *butschen* and (Swiss) *butsch* 'a kiss'.

Other colloq. words of imitative orig., e.g. NE *smack* (with its Gmc. parallels); Rum. *pupa* (childish or derogatory) : It. *poppa* 'breast', *poppare* 'suck', etc. (Pusçariu 1403); Lett. *skūpstīt,* beside *čūpstīt* 'suck' (Mühl.-Endz. 3.908).

3. Grk. *φιλέω* 'love' (16.27), hence also 'show signs of love, kiss' (Hdt.+), with sb. *φίλημα* 'a kiss' (Aesch.+), NG pop. *φιλῶ* only 'kiss', sbs. *φιλί* (fr. infin. *φιλεῖν*), *φίλημα.* Cf. Corn. *a(m)me,* MBr. *affet* 'kiss', prob. fr. Lat. *amāre* 'love' (Henry 5; not in Loth, Mots lat.).

4. Lat. *ōsculārī,* fr. *ōsculum* 'a kiss', lit. 'little mouth', fr. *ōs* 'mouth'. Ernout-M. 715.

Lat. *sāviārī,* chiefly anteclass., fr. *sāvium* 'a kiss' (esp. in the erotic sense as contrasted with *ōsculum*), prob. by dissim. fr. **suāvium* : *suāvis* 'sweet'. Ernout-M. 898. Kretschmer, Glotta 9.208.

Lat. *bāsiāre* (> It. *baciare,* Fr. *baiser,* Sp. *besar*), fr. *bāsium* (Catull.+) orig. used like *sāvium,* but eventually displacing it and *ōsculum,* source dub. (loanword fr. Celtic?). Ernout-M. 105. Walde-H. 1.97 f. REW 971. Wartburg 2.268 ff.

Fr. *embrasser,* fr. *bras* 'arm', orig. 'take in the arms, embrace', but also 'kiss' since 17th cent., and now replacing *baiser* in this sense (except with added *lèvres* or the like, or as a noun; *donner un baiser,* etc.) owing to the obscene connotation which *baiser* has taken. REW 1256. Wartburg 2.268 ff. Bloch 1.61, 99.

Rum. *săruta,* fr. Lat. *salūtāre* 'greet'. Perh. semantic borrowing fr. Slavic (cf. ChSl. *cělovati,* etc., below, 8), but not necessarily. Cf. OSp. *saludar* also 'kiss', and so formerly sometimes NE *salute* (NED s.v. 2, e). REW 7556. Tiktin 1369.

5. Ir. *pōcaim,* NIr. *pōgaim,* Br. *pokat,* fr. Ir. *pōc,* Br. *pok* 'a kiss', fr. Lat. *pāx* 'peace' in church uses like *pācis ōsculum dāre,* etc. Vendryes, De hib. voc. 167. Loth, Mots lat. 197. Pedersen 1.24, 202.

W. *cusanu,* above, 1.

6. Gmc. words, above, 1.

7. Lith. *bučiuoti,* Lett. *bučuot,* above, 2.

8. ChSl. *lobŭzati* (reg. for 'kiss' in Gospels), Russ. *lobzat'* (obs. or archaic), SCr. dial. *lobzat, lozbat,* prob. : Lat. *lambere,* OHG *laffan* 'lick', OE *lapian* 'lap up' etc. Walde-P. 2.384. Berneker 726 f.

ChSl. *cělovati* 'greet' (cf. *cělŭ* 'sound, well', like Lat. *salūtāre* fr. *salūs* 'health'), hence also 'kiss' (Supr. once, and later) as SCr. *cjelivati,* Boh. *celovati,* Pol. *całować,* Russ. *celovat'.* Berneker 123 f.

SCr. *ljubiti* 'love' and 'kiss' (like Grk. *φιλέω*), Boh. *líbati* 'kiss' (*polibek* 'a kiss') : ChSl. *ljubiti* 'love' (16.27). Berneker 756 ff.

9. Skt. *cumb-* (above, 1) is of relatively late occurrence.

In Vedic, affection is expressed by *ghrā-* 'smell, sniff' (15.21), *lih-* 'lick' (4.59), and *niṅs-* 'approach, touch, embrace, greet' (*ni-ns-,* redupl. form of *nas-* 'approach, join', esp. in love : Grk. *νέομαι* 'come back, return', Goth. *ganisan* 'be saved', etc.; Walde-P. 2.334 f.). These are often translated 'kiss', but only loosely. The true 'kiss' is sometimes expressed, earlier than by *cumb-,* as 'set mouth to mouth'. Cf. Hopkins, l.c.

'Pain, suffering' is understood here as primarily physical, though most of the words may be used also for mental suffering, for which see also 'grief, sorrow' (16.32). NE *pain* is mostly, though not exclusively, physical, while conversely Fr. *peine* is mostly mental.

Some of the words for 'emotion' or 'passion' are also used more specifically for 'suffering' as Grk. *πάθος, πάθημα* (not repeated here), or had the latter sense more originally (cf. 16.12, 16.13).

Several of the words belong with the verbs for 'suffer' but may show more specialization than the latter. Thus NE *suffer* 'suffer pain' and also 'endure, allow' (though now archaic), but *suffering* only in the specialized sense. The verbs for 'suffer' are included in the discussion, either here or in 16.12, 16.13. Several of these (but not all, by any means) cover also 'bear, endure', which in some is the primary sense. Some are connected with words for 'hard work, toil'.

1. Grk. *ἄλγος,* etym. dub. Walde-P. 2.423 (rejected in Walde-H. 1.352).

Grk. *ὀδύνη,* most frequently in pl. 'pains', etym. dub. Walde-P. 1.768. Boisacq 685.

Several of the words for 'grief, sorrow' are the same as those for physical 'pain, suffering' (16.31), and some belong to groups discussed under 'care' (16.14). The others are from a great variety of notions, mostly physical.

1. Grk. λύπη (rarely also of 'physical pain'), with λυπέω 'grieve, vex' (trans.), mid. 'grieve' (intr.; NG λυποῦμαι also 'be 'sorry, regret') : Skt. *lup-* 'break, injure, spoil', Lith. *lupti* 'flay, peel', Russ. *lupit'* 'peel, shell', etc. Walde-P. 2.417 f. Boisacq 591 f.

Grk. πένθος ('grief', but esp. 'mourning') : πάθος 'emotion', πάσχω 'suffer', etc. (16.12).

Grk. ἄλγος and ὀδύνη, see 16.31.

2. Lat. *dolor*, It. *dolore*, etc., see 16.31.

Lat. *aegritūdō*, also of physical 'illness', and *aegrimōnia* less frequent but only of mental 'sorrow, grief', fr. *aeger* 'sick, ill', etym. dub. (4.84).

It., Sp. *pena*, Fr. *peine*, fr. Lat. *poena* 'penalty', see 16.31.

It. *affanno*, also 'heavy breathing, severe exertion, exhaustion', with the vb. *affannarsi* 'grieve, tire oneself, overwork', fr. Prov. *afanar* = OFr. *ahaner* 'work in the field' (Fr. dial. 'work hard, suffer', etc.), etym. dub. REW 252. Gamillscheg 19. Wartburg 1.48.

Fr. *chagrin*, back-formation to Fr. dial. *chagraigner* 'sadden', deriv. of OFr. *graignier* 'sadden', fr. OFr. *graim* 'sad', this prob. fr. OHG *gram* 'angry, fierce' (16.42). Gamillscheg 201. REW 7513.

Sp. *pesar*, fr. *pesar* 'weigh, weigh upon, cause sorrow', fr. Lat. *pēnsāre* 'weigh, pay'. REW 6391.

Rum. *mîhnire*, fr. *mîhni* 'grieve' (trans.), perh. fr. the Slavic, cf. ChSl. *mŭknąti*, SCr. *maknuti* 'move' (10.11). Semantic development through 'move' emotionally. Tiktin 977 f.

Rum. *supărare*, fr. *supăra* 'oppress, afflict', fr. Lat. *superāre* 'overcome, conquer'. REW 8458. Tiktin 1534.

3. Ir. *brōn*, W. (arch.) *brwyn*, perh. (*n* fr. *gn*) : Grk. βρύχω 'grind the teeth, bite', Lith. *graužti*, ChSl. *grysti* 'gnaw'. Walde-P. 1.698. Pedersen 1.103.

Ir. *cuma*, NIr. *cumha*, Corn. *cavow*, MBr. *caffou* (NBr. *kañv* 'mourning') : Grk. κάμνω 'tire', Skt. *çam-* 'toil, labor', etc. Walde-P. 1.387. Pedersen 1.47. Henry 53.

Ir. *dube*, opp. to *sube* 'joy', see 16.22.

NIr. *doilgheas*, also *doilghe*, fr. Ir. *doilge* 'difficulty', deriv. of *dolig* 'difficult' (9.92).

W. *gofid*, MW *govut*, Corn. *govid*, apparently based on an interjectional phrase like Corn. *govy*, W. *gwae vy* 'woe is me'. Stokes 259 (but without *gofid*).

W. *galar*, Br. *glac'har*, cf. Ir. *galar* 'sickness', perh. : Grk. χολέρα 'cholera', χόλος 'gall', etc. Pedersen 2.25. Walde-P. 1.540.

Br. *doan*, perh. as 'what one has to bear' : MBr. *doen* 'carry, bear'. Ernault, Dict. étym. 275.

Br. *rec'h*, etym. dub. Henry 232.

Br. *anken* : W. *angen*, Ir. *ēcen* 'necessity' (9.93). Henry 11.

4. Goth. *sair*, OE *sār*, OHG *sēr*, etc., see 16.31.

Goth. *saurga* (renders μέριμνα 'care' and λύπη 'grief'), ON *sorg*, OE *sorh*, NE *sorrow*, etc., see under 'care' (16.14).

Goth. *gauriþa, gaurei* (each once for λύπη), OE *gyrn*, beside Goth. *gaurs* 'sad', *gaurjan* 'grieve' (act. = λυπεῖν, pass. = λυπεῖσθαι), OHG *gōrag* 'pitiful, miserable', etc., etym. dub., perh. : Skt. *ghora-* 'awful, dreadful'. Walde-P. 1.636. Feist 208.

Goth. *trigō* (once for λύπη, but rather 'reluctance', in phrase ἐκ λύπης 'grudgingly'), ON *tregi* 'reluctance' and 'grief', OE *trega*, ME *treie* 'pain, grief, trouble' : OHG *trāgi* 'slow, lazy' (14.22).

ON *harmr* 'grief', rarely 'hurt, harm', OE *hearm* 'hurt, injury', rarely and ME 'grief', OHG *harm* 'disgrace, calumny', rarely and MHG 'grief' (NHG *harm* taken up again in poet. language, cf. Paul, Deutsches Wtb. s.v.) : ChSl. *sramŭ* 'shame'. Walde-P. 1.463. Falk-Torp 381.

ON *hrygð*, fr. *hryggr* 'grieved, sad' (16.36).

Sw. *grämelse*, fr. *gräma* 'grieve' : Dan. *græmme sig* 'become angry', ON *gremja* 'make angry', *gremi* 'anger' (16.42). Falk-Torp 340.

ME *gref, grief*, NE *grief*, in ME also 'hardship, hurt, harm', fr. OFr. *grief, gref*, back-formation to *grever* (> ME *greve*, NE *grieve*), VLat. **grevāre*, for *gravāre* 'weigh down, burden, oppress', fr. *gravis* 'heavy' (VLat. **grevis* after opp. *levis* 'light'). NED s.v.

ME *destresse*, NE *distress*, fr. OFr. *destresse*, VLat. *districtia*, deriv. of Lat. *districtus*, pple. of *di-stringere* 'detain, hinder'. NED s.v. *distress*, sb.

Du. *kommer*, NHG (> Dan.) *kummer*, fr. MLG *kummer*, MHG *kumber* 'rubbish, heap of ruins', also 'hindrance', whence 'harm, injury, distress' and finally 'grief'. Cf. also MLat. (Merov.) *cumbrus* 'barrier of felled trees', OFr. *combre* id. Etym. disputed, but prob. a Gmc. word fr. the root seen in Grk. γέμω 'be full', etc. Falk-Torp 593 f. Franck-v. W. 334. Otherwise (as a Gallo-Lat. **com-boros* 'brought together') Kluge-G. 336, REW 2075.

NHG *betrübnis*, late MHG *betrüebnisse*, fr. *betrüben*, MHG *betrüeben* 'grieve, afflict', orig. 'make turbid', fr. *trüb(e)* 'turbid, troubled, muddy'. Weigand-H. 1.223.

5. Lith. *tužba*, with vb. *tužytis* (refl.) 'be afflicted, grieved', fr. the Slavic, cf.

WhRuss. *tužba, tužić*, Russ. *tužit'* 'be afflicted' : ChSl. *tąga* 'distress, anxiety', SCr. *tuga* 'sorrow, affliction', etc. (below, 6). Walde-P. 2.616. Brückner, Sl. Fremdwörter 148.

Many of the words for 'care' = 'mental attention' (16.14) are also used for 'anxiety, worry', as still in part NE *care* (*my cares are many*), and in some, in fact, this is the earlier sense.

Of the more distinctive words, several are connected with adjs. for 'narrow' (12.62), whence also others for the stronger 'anguish', and some are simply 'disquietude'.

In general, there is much overlapping in use between words for 'care', 'sorrow', and 'anxiety'.

1. Grk. φροντίς and μέριμνα, see under 'care' (16.14).

NG ἀνησυχία, lit. 'uneasiness', fr. ἀνήσυχος 'uneasy, not quiet', neg. of ἥσυχος 'quiet, still' (12.19).

2. Lat. *anxietās* (> It. *ansietà*, Fr. *anxiété*, Sp. *ansiedad*), fr. *anxius* 'anxious' and 'causing anxiety' (late sb. *anxia* > Sp. *ansia*) : *angere* 'press tight, throttle' and of the mind 'distress, torment, vex', *angustus*, etc. 'narrow' (12.62). Ernout-M. 51. Walde-H. 1.47, 55.

It. *inquietudine*, Fr. *inquiétude*, Sp. *inquietud*, fr. Lat. *inquiētūdo* (*-inis*) 'restlessness, disquietude', fr. *inquiētus* 'restless, not quiet', neg. of *quiētus* 'quiet' (12.19).

Rum. *îngrijorare, îngrijare*, fr. *îngriji* 'care for, attend', refl. 'be grieved, anxious', fr. *grija* 'care' (16.14).

Rum. *nelinişte*, lit. 'unrest', neg. of *linişte* 'quiet, rest', fr. *lin* 'still, quiet', this fr. Lat. *lēnis* 'smooth, mild'. Tiktin 912, 915.

3. Ir. *dethiden* 'care, anxiety', neg. to *dīdnad* 'comfort', vbl. n. of *dodonaim* 'comfort' : W. *diddanu* 'amuse', *diddan* 'pleasant, a joke', outside root connection? Pedersen 2.56 f., 508.

Ir. *snīm*, and cpd. *immsnīm* (also 'sorrow'), NIr. *imshnīomh* = *snīm* 'spinning', NIr. *sniomh* 'act of twisting, winding, spinning', etc., also 'wrench, struggle, anxiety, affliction' (cf. Dinneen s.v.) : W. *nyddu*, Br. *neza*, Grk. νήθω, Lat. *nēre* 'spin', etc. Pedersen 2.633. Walde-P. 2.694.

NIr. *imnidhe, imneadh*, fr. Ir. *imned* 'pain, suffering' (16.31).

W. *pryder*, see under 'care' (16.14).

Br. *nec'h* = W. *nych* 'languishing, pining, consumption', cf. W. *nychtod* 'phthisis', etym. dub. Stokes 190. Walde-P. 2.85.

4. ON *kvīða* (Dan. *kvide* 'agony') : ON *kvīða* 'feel apprehension', OE *cwīþan* 'mourn, lament', OS *quīthian* 'lament', and, with different suffix, Goth. *qainōn* 'weep, mourn', ON *kveina* 'wail, lament', outside connections dub. Walde-P. 1.665 f. Falk-Torp 606. Feist 385 f.

OE *angnes, angsumnes*, ME *anxumness*, Du. *angst* (MLG *angest* > Dan. *angest* 'fear, dread', Sw. *ångest* 'agony,

anguish', whence Dan. *ængstelse*, Sw. *ängslan*), OHG *angust*, MHG *angest*, NHG *angst* : OE *ange*, OHG *angi, engi*, NHG *eng* 'narrow'. Cf. Lat. *anxietās*, etc. (above, 2). Falk-Torp 29. Weigand-H. 1.61.

Goth. *sorga*, OE *sorh, sorg* (usual gl. for *anxietas*), ME *sorwe* also 'sorrow, grief', OHG *sorga*, etc., see under 'care' (16.14).

NE *anxiety*, fr. Lat. *anxietās* (above, 2).

NE *worry*, fr. vb. *worry*, fr. OE *wyrgan* 'strangle'. NED s.v.

5. Lith. *rūpestis*, Lett. *rūpe*, also 'sorrow', see under 'care' (16.14).

Lith. *bailė, baimė*, Lett. *baile*, also and orig. 'fear' (16.53).

6. ChSl. *pečalĭ*, see under 'care' (16.14).

SCr. *tjeskoba*, lit. 'tightness, narrowness' : *tijesan* 'narrow, tight', etc. Miklosich 357.

Boh. *úzkost*, lit. 'narrowness', fr. *úzký* 'narrow, tight'.

Pol. *obawa* (also 'fear') : *bać się, bojać się* 'be afraid' (= ChSl. *bojati sę*, 16.53). Brückner 369.

Pol. *troska* : *trzaskać* 'crack, crash', ChSl. *trěskati*, Lith. *treškėti* id., late ChSl. *trěskŭ, troska* 'stroke of lightning', Boh. *trosky* (pl.) 'ruins'. Brückner 577, 579.

Russ. *zabota*, see under 'care' (16.14).

7. Skt. *cintā-*, properly 'thought, reflection', fr. *cint-* 'think, reflect' (17.13).

'Regret' (with 'repentance' and the still deeper 'remorse') is a special kind of 'sorrow', mainly for something done or left undone. Some of the words are also, or were once, used for 'sorrow' in general, and many more are related to others for 'grief, sorrow', 'pity', etc. The notion of 'regret' is dominant in NE adj. 'sorry' (in contrast to the sb. *sorrow*), especially in *be sorry*, which is the popular equivalent of the vb. *regret* (*I am sorry that I came*). Cf. also NHG *es tut mir leid*, lit. 'it gives me pain' = 'I am sorry, I regret'.

On the other hand, a few (the Grk. words) denoted simply a 'change of mind', whence the resulting feeling of 'regret'.

Since the sbs. are mostly derived from vbs., the latter have been chosen for the list and the discussion.

NE *repent* is used especially with reference to regret for sins, crimes, faults, etc., and so most of the modern words

entered in second place in the list; and since Grk. μετανοέω has this application in the NT, so the Goth. and ChSl. words which render it. But, in general, such differentiation between 'regret' and 'repent' is secondary and does not hold for the older periods.

1. Grk. μεταμέλει (impers. with dat. of person; also pers. μεταμέλομαι), cpd. of μετά, in cpds. denoting esp. change, and μέλει 'is a care' (cf. 16.14).

Grk. μετανοέω 'perceive afterward', 'change one's mind', and esp. 'repent' (in LXX and NT), NG μετανοῶ (also μετανοιώνω, fr. μετάνοια 'repentance'), cpd. of μετά (cf. above) and νοέω 'perceive'.

NG pop. λυποῦμαι 'grieve' (16.32), also 'be sorry, regret'.

2. Lat. *paenitet*, impers., later spelled *poenitet* under influence of *poena* 'punishment' and used also personally (VLat. **poenitēre* > OFr. *peneir, pentir*, It. *pentirsi*; cpds. Fr. *se repentir*, Sp. *arrepentirse*), orig. (Plautus) 'is not enough, is unsatisfactory', prob. : *paene* 'nearly, almost'. Ernout-M. 722. REW 6630, 7224.

It. *rincrescere* (impers. *mi rincresce* 'I regret'), fr. *increscere* 'be wearisome, pity', VLat. **in-crēscere* lit. 'grow in', whence 'vex, grieve, etc.'. REW 4363.

Some of the words for 'pity' are specializations of 'affection, kindness, kindheartedness, love' or the like, and some, like the closely allied 'sympathy' and 'compassion', are from the notion of 'suffer with'.

Others are connected with words for 'wretched, poor' or 'harsh, cruel', which through 'miserable', etc. became 'pitiable', 'exciting pity', whence secondarily the subj. 'pity'.

Many of the words listed cover also 'mercy'.

1. Grk. ἔλεος, etym. dub. Boisacq 241.

Grk. οἶκτος, beside οἰκτρός 'pitiable', οἰκτῑρω 'pity' (whence new sb. οἰκτιρμός) : Goth. *aihtrōn* 'beg', and prob. Ir. *ar-ēgi* 'cries, out, complains'. Walde-P. 1.105. Boisacq 690.

In NG both the preceding words are lit. but familiar through use in the church. In common speech 'pity' would be most nearly expressed by the vb. λυποῦμαι 'be sorry' (cf. 16.32, 16.34), in phrases like τὸν λυποῦμαι 'I am sorry for him'. NG κρίμα (class. Grk. 'decision') is used for the obj. 'pity', as κρίμα εἶναι 'it's a pity', but not for the emotion.

2. Lat. *misericordia*, fr. *misericors, -dis* 'compassionate, pitiful', cpd. of *miser* 'wretched, miserable' and *cor* 'heart'. Hence the learned words in Romance, It., Sp. *misericordia*, Fr. *miséricorde* 'mercy, compassion'.

It. *pietà*, Fr. *pitié*, Sp. *piedad*, fr. Lat. *pietās, -tātis* 'piety, affection, duty', late 'gentleness, kindness, pity', fr. *pīus* 'pious, affectionate, loyal, etc.', outside connections dub. Walde-P. 2.69 f. Ernout-M. 773.

Rum. *milă*, fr. the Slavic, cf. ChSl. *milŭ* 'pitiable' (below, 6). Tiktin 980.

3. Ir. *airchissecht*, fr. *ar-cessi* 'pities' : W. *arbed(u)* 'spare, save', Br. *erbed(i)* 'spare, manage', etym. dub. Walde-P. 1.513. Pedersen 2.486.

4. Goth. *armaiō*, fr. *arms* 'pitiable' = OHG *arm*, OE *earm* 'miserable, poor, etc.' (cf. 11.52). Hence adj. cpds. Goth. *armahairts*, OHG *armherzi, barmherzi (bi-arm-)*, MHG *barmherze(c)*, NHG *barmherzig* 'compassionate', whence sbs. Goth. *armahairtei*, MHG *barmherze, barmherze(c)heit*, NHG *barmherzigkeit* 'pity, compassion' (Christian imitations of the Lat. *misericors, misericordia*, above, 2), and vbs. Goth. *arman sik*, OHG *irbarmēn (ir-bi-armēn)*, MHG *(er)barmen*, NHG *(sich) erbarmen* 'have pity', whence OHG *irbarmida*, MHG *erbermede, (er)barmung*, etc., NHG *erbarmen* (infin. as sb.). Weigand-H. 1.158 f., 455 f. Kluge-G., 40, 135.

ON *miskunn* (Dan., Sw. *miskund*, biblical), cpd. of the Gmc. neg. and pejorative prefix *mis(s)-* and **kunþi* : ON *kenna* 'know, feel', but also 'lay to one's charge, impute', hence lit. 'non-accusation'. Falk-Torp 724.

Dan. *medynk*, Sw. *medömkan*, cpd. of *med* 'with' and Dan. *ynk* 'distress', Sw. *ömkan* 'compassion' : Dan. *ynke* 'regret', refl. 'complain', Sw. *ömka* 'commiserate, pity', ON *aumka* 'bewail, complain', refl. 'pity', fr. ON *aumr* 'miser-

In many languages the words for 'sad' are simply derivs. of those for 'grief, sorrow' (16.32) and so mean lit. 'grieving' or 'sorrowful'. But in others the common words for 'sad' are of quite different origin, based on such diverse notions as 'downcast', 'sated', 'troubled', 'dark', 'heavy', 'faded', 'sitting apart'.

1. Grk. λῡπούμενος, pple. of λῡπέομαι 'grieve', act. λῡπέω 'cause grief' : λύπη 'grief' (16.32). NG λυπημένος, fr. perf. mid. pple. λελῡπημένος, also περί-λυπος 'very sad'.

Grk. δύσ-θῡμος, cpd. of δυσ- 'ill' and θῡμός 'soul, spirit' (16.11).

Grk. δύσ-φρων, cpd. of δυσ- 'ill' and -φρων as in σώ-φρων 'wise', etc. (: φρήν as seat of thought and feeling, 17.11), hence 'ill-disposed' and also 'sad'.

Grk. κατηφής 'with downcast eyes', also fig. 'downcast, dejected, sad' and so in NG, cpd. of κατά 'down' and the root of ἅπτω 'fasten, touch', sb. ἁφή 'touch', etc. Walde-P. 1.198. Boisacq 421 f.

2. Lat. *trīstis* (> It. Fr., Sp. *triste*; late *trīstus* > Rum. *trist*; REW 8918), etym. dub. Walde-P. 1.754 (as orig. 'grim' or the like : OE *þrīste*, OHG *drīsti* 'bold' in both good and bad sense). Ernout-M. 1058 ("sans étymologie").

Rum. *mîhnit*, fr. *mîhni* 'grieve', cf. *mîhnire* 'grief' (16.32).

3. Ir. *bronach*, fr. *bron* 'grief'.

Ir. *dubach*, fr. *dube* 'grief'.

NIr. *doilgheasach*, fr. *doilgheas* 'grief'.

W., Br. *trist* (W. also *athrist* with intensive *a-*), fr. Lat. *trīstis*. Loth, Mots lat. 213.

Br. *teñval*, orig. 'dark' (: Ir. *temel* 'darkness', 1.62), hence 'somber, sad'. Cf. the use of Fr., NE *sombre*, orig. 'under a shadow'.

4. Goth. *gaurs* : *gauriþa, gaurei* 'grief', etc.

ON *hryggr* : OE *hrēow* 'regret, sorrow', etc. (16.34).

ON *dapr* ('heavy, slow', and 'sad') : OHG *tapfer* 'firm, weighty, durable' (NHG *tapfer* 'brave'), and prob. ChSl. *debelŭ* 'stout', Russ. dial. *dobolyj* 'strong', OPruss. *debīkan* 'big', etc. Walde-P. 1.850. Falk-Torp 1248. Berneker 182.

Dan. *sørgmodig*, cpd. of *sørge* 'grieve' (fr. *sorg* 'grief') and *modig*, fr. *mod* 'heart, courage'.

Sw. *sorgsen*, fr *sorg* 'grief'.

OE *unrōt*, neg. of *rōt* 'cheerful, glad', more often 'noble, excellent' : ChSl. *radŭ* 'glad, willing', *radostĭ* 'joy', etc. (16.22).

OE *drēorig* (also 'gory, bloody', and 'cruel'), ME *drery* (NE *dreary* 'dismal, gloomy'), OHG *trūrag*, MHG *trūrec*, NHG *traurig*, Du. *treurig* (Du. *t* fr. HG, or WGmc. init. variants?), with vbs. OHG *trūrēn, drūrēn*, MHG *trūren*, NHG *trauern* 'grieve, mourn' : OE *drēosan*,

Goth. *driusan* 'fall', OHG *trōren* 'drip', OE *drēor* 'blood, gore', MHG *trōr* 'dew, rain, blood', outside connections dub., but semantic development clear—'sad' fr. 'downcast, drooping', and 'gore, gory', fr. 'drip'. Walde-P. 1.873. Weigand-H. 2.1064. Franck-v. W. 708.

ME, NE *sad*, fr. OE *sæd* 'sated' : Goth. *saþs*, OHG *sat* 'full, sated', Lat. *satis* 'enough', etc. Semantic development through ME 'steadfast, firm, serious, grave'. NED s.v.

MHG *trüebe*, NHG *trübe*, Du. *droef, droevig*, orig. 'troubled, turbid', as OHG *truobi*, OE *drōf*, etc., beside vbs. Goth. *drōbjan*, OE *drēfan*, OHG *truoban* 'trouble' : ME *draf* 'dregs, refuse' (NE *draff*, cf. NED), MHG, NHG *treber* 'grains, husks', all prob. fr. a parallel extension of the root in ON *dreggjar* 'dregs', Grk. ταράσσω 'trouble', etc.; hence the vbs. Du. *bedroeven*, MLG *bedroven* (> Dan. *bedrøve*, Sw. *bedröva*, with pples. *bedrøvet, bedrövad* 'sad'), OHG *gitruoben*, MHG *be-, ge-trüeben*, NHG *betrüben* 'trouble, sadden', with pples. Most of the words for 'cry, weep', as expressive of pain or grief, are like NE *cry* (the usual spoken word) from words meaning 'cry' in wider sense, 'cry out, shout, scream, wail, groan'. Some show a shift from a different expression of the same emotion, namely 'beat' (the breast, etc.), as in Romance and Slavic, prob.

Lat. *plōrare*. Cf. also Grk. κόπτομαι sometimes 'bewail', mid. of κόπτω 'strike' (cf. LS s.v. II. 2).

Some derivatives of words for 'tear' (16.38) are used for 'shed tears, weep', as Grk. δακρύω, Lat. *lacrimāre* (> It. *lacrimare*, etc.), Lith. *ašaroti*; but these are not the common words.

1. IE **reud-*, an extension of a simpler **reu-* in verbs meaning 'make a loud noise', like 'roar, bellow, howl', etc., prob. of imitative origin. Walde-P. 2.349 ff.

OHG *riozan*, MHG *riezen* (OE *rēotan* rarely 'weep', mostly 'lament'), Lett. *raudāt* (Lith. *raudoti* 'wail, lament'); Skt., Av. *rud-* : Lat. *rūdere* 'roar, bellow, bray', ON *rauta* 'roar'.

2. Grk. κλαίω (*κλάϝ-ιω, cf. aor. ἔκλαυσα), etym. dub., possibly *κλαυ- fr. **klə-u-*, as extension of the root in καλέω 'call', κέλαδος 'noise', etc. Alb. *kl'an', k'an'* 'weep' (in current spelling *qaj*), taken by G. Meyer as cognate (cf. Walde-P. 1.490, Boisacq 465) is more prob. a loanword (cf. NG 3sg. κλαίει, 3pl. κλαίνε).

3. Lat. *flēre*, prob. fr. **bhlē-* beside **bhel-* in OE *bellan* 'bellow, bark, roar', OHG *bellan* 'bark, bay', ON *belja* 'bellow', etc. Ernout-M. 368. Walde-H. 1.516.

Lat. *plōrāre* (> Fr. *pleurer*, Sp. *llorar*), more common than *flēre* in late Lat. (e.g. Peregrinatio), in earliest use 'cry aloud' (cf. *implōrare* 'implore'), perh. : *plōdere* (*plaudere*) 'beat, clap the hands' (**plō-ro-, *plō-d-*) : Lith. *plōti* 'clap the hands'. Cf. the development in Lat. *plangere*, etc. (below). Specht, KZ 66.241 ff.

It. *piangere*, Rum. *plînge* (= Fr. *plaindre* 'lament, pity'), fr. Lat. *plangere*, orig. 'beat', whence esp. 'beat the breast', etc. as sign of grief, and then 'lament, bewail', fr. a root **plāg-, *plāk-* in Grk. πλήσσω 'beat, strike', πληγή 'blow', Lith. *plakti* 'beat, punish', OE *flōcan* 'clap in applause' (OHG *fluohhōn* 'curse'), and, with the same semantic development as in Italic, Goth. *flōkan* 'bewail' (Lk. 8.52 *faiflōkun þō* = ἐκόπτοντο αὐτήν), ChSl. *plakati (sę)* 'lament, weep', etc. (below, 7). Walde-P. 2.91 f. Ernout-M. 775.

4. Ir. *cīim*, etym. dub., perh. as orig. 'wrinkle the nose' : Lith. *šieptis* 'grin', *šypsotis* 'smile' (12.25). Walde-P. 1.364. Stokes 75.

NIr. *goilim*, cf. MIr. *gol* 'weeping', prob. as orig. 'cry out' : OE *galan* 'sing', *giellan* 'cry out' (NE *yell*), etc. (Walde-P. 1.628, without these Ir. forms). Not : Lith. *gėla*, OHG *qual* 'pain', etc. (Walde-P. 1.690) with init. g^w, which would give Ir. *b*.

W. *wylo (gwylo)*, Br. *gouela*, prob. with unetym. *g-* (cf. Pedersen 1.321, 435), fr. Lat. *ēiulāre* 'wail, lament'. Lloyd-Jones, BBCS 2.298.

5. Goth. *grētan*, ON *grāta*, Dan. *græde*, Sw. *gråta*, OE *grētan* (Angl. = **grǣtan*), ME *grete* (NE dial. *greet*) : (caus.) ON *grœta* 'make weep', OE *grētan* 'speak to, call upon, hail, approach', OHG *gruozzen* 'address, approach', perh. fr. the root in Skt. *hrād-* 'sound' (or the latter : Ir. *ad-glādur* 'address', etc. with IE *l̥?*). Walde-P. 1.659. Falk-Torp 339. Feist 221.

OE *grēotan* (and in part ME *grete*, etc., entered above), OS *griotan*, etym. dub., possibly : W. *griddfan, gruddfan* 'groan', but root connection? Walde-P. 1.650. Zupitza, Gutt. 176. NED s.v. *greet*, vb.[2].

OE *wēpan*, ME *wepe*, NE *weep*, OHG *wuofan*, MHG *wüefen* = Goth. *wōpjan* 'cry out, call', ON *œpa* 'cry out, scream' (NIcel. sometimes also 'cry' of children) : ChSl. *vabiti* 'call, summon'. Walde-P. 1.217. Falk-Torp 1408.

ME *crie*, NE *cry* 'cry out, shout', fr.

Fr. *crier* (18.13), also 'cry' = 'weep'. NED s.v. *cry*, vb. 9, 10.

OHG *weinōn*, MHG, NHG *weinen*, Du. *weenen* : OE *wānian* 'lament', ON *veina* 'wail', derivs. of the interj. OHG, MHG *wē*, OE *wā*, ON *vei*, Goth. *wai* 'woe', as expressive of pain, sorrow, etc. A parallel deriv. is ON *vœla, veila* 'wail' (> ME *weile*, NE *wail*). Walde-P. 1.213.

6. Lith. *verkti* : *urkti* 'growl, snarl', Boh. *vrčeti* id., *vrkati* 'purr, coo', Russ. *vorčat'* 'growl, snarl', etc., prob. of imitative origin. Walde-P. 1.284 (top). Trautmann 353.

Lett. *raudāt*, above, 1.

7. ChSl. *plakati* (refl. in Gospels), etc., general Slavic, see under It. *piangere*, etc. (above, 3).

8. Skt., Av. *rud-* (but Av. *rud-* 'moan' of cattle and daevic beings, Barth. 1492), above, 1.

Av. *garəz-* ('moan, bemoan', Osset. *γärzun* 'groan'; Barth. 516) : Skt. *garh-* 'blame, reproach', OHG *klagōn*, NHG *klagen* 'complain', etc., fr. a guttural extension of the root in W. *galw* 'cry out, call', etc. Walde-P. 1.539.

16.39 GROAN (vb.)

Grk.	στένω, στενάζω	Goth.	*swōgatjan*	Lith.	*stenėti*
NG	στενάζω	ON	*stynja*	Lett.	*stenēt*
Lat.	*gemere*	Dan.	*stønne*	ChSl.	*stenati*

The majority of the vbs. for 'groan', as expressive of pain or grief, are related to others used for various loud sounds, as 'roar, yell, thunder', etc., from which they have become specialized. A few are derived from characteristic interjections. But in the case of Lat. *gemere* the feeling of distress must have been antecedent to its vocal expression.

Some of the words for 'groan' cover also the milder 'sigh', as Grk. στένω, στενάζω (so still in NG), Lat. *gemere*; and in a few 'sigh' is the earlier sense. In such cases the similarity of the emotion has overcome the difference in its expression, with resulting extension of 'groan' to 'sigh' or conversely.

For to 'sigh', expressive of grief (in part also longing) is actually to 'breathe heavily', and most of the specific words for this notion are in fact derived from those for 'breathe' (4.51). Thus Lat. *su-spīrāre* (> Fr. *soupirer*, etc.); NIr. *osnuighim*, W. *ocheneidio*, etc. (below, 3); Lith. *dūsauti*; ChSl. *vŭz-dychati*, Russ. *vzdychat'*, etc., general Slavic; Skt. *çvas-* and cpds. Cf. also NHG *seufzen*, Du. *zuchten*, Dan. *sukke*, etc. (below, 4). OE *sīcan* (ME *sighen*, NE *sigh* re-formed fr. pple.; NED s.v.), is of unknown root connection.

Words for 'hate', expressing intense dislike, and the strongest opposite of 'love', show a variety of connections, as with words for 'shudder', 'smell'(?), 'loathe, revile, blame', etc., in large measure through the obj. notion 'object of repulsion'. Some are from verbs for 'hate' which mean literally 'not endure' (cf. NE colloq. *I can't bear him* or *I can't stand him = I dislike him intensely*), or 'not look upon' (with favor).

While only the nouns are given in the list, they all have corresponding verbs.

1. Grk. μῖσος (not in Hom.), with vb. μισέω (once in Hom. as 'hate the thought of' with infin. clause), etym.? Boisacq 640.

Grk. ἔχθος, with vb. ἐχθαίρω (usual words for 'hate' in Hom.), prose sb. ἔχθρα 'hatred, enmity', beside ἐχθρός 'hated, hateful, enemy' (19.52), derivs. of ἐξ

'out' through notion of 'alien' or 'exile'. Walde-P. 1.116 (with references).

2. Lat. *odium* (> It., Sp. *odio*), beside vb. *ōdī* : Arm. *ateam* 'hate', *ateli* 'hated, hostile', OE *atol* 'terrible, horrible', ON *atall* 'fierce', fr. a root **od-*, perh. ultimately the same as **od-* 'smell' in Grk. ὄζω, Lat. *odor*, etc. (15.21) through notion of 'disgust' (Lat. *odium* is also and in Plautus most frequently obj., an object of disgust, repulsion; cf. esp. Skutsch, Glotta 2.230 ff.; cf. also SCr. *mržnja*, below, 6). Walde-P. 1.174. Ernout-M. 698 (not accepting connection with *odor*, etc.).

Fr. *haine*, for *haïne*, fr. vb. *haïr*, loanword, fr. Gmc., cf. Goth. *hatjan* 'hate', etc. (below, 4). REW 4075.

Rum. *ură*, back-formation fr. vb. *urî* 'hate', this fr. Lat. *horrēre*, *horrēscere* 'shudder'. Cf. Alb. *urretje* 'hate' fr. the same source. REW 4185. Tiktin 1688, 1692. G. Meyer, Alb. Etym. Wtb. 459.

3. Ir. *cais* and *miscais* (cpd. with pejorative *mis-*), W. *cas*, Br. *kas*, derivs. W. *casineb*, Br. *kasoni* : Goth. *hatis*, etc. (the Gmc. group, below, 4), Grk. κῆδος 'care, anxiety, grief, mourning', Av. *sādra-* 'hurt, harm'. The orig. meaning was perh. 'care', whence both 'hate' and 'love' in Ir. *cais* (cf. 16. 27). Walde-P. 1.340. Pedersen 1.121, 2.10. Falk-Torp 370 f.

NIr. *fuath*, same word as *fuath* 'form, figure' and 'specter', with development of 'hate' through 'horror' (cf. Rum. *ură*, above, 2).

4. Goth. *hatis* (only for θυμός, ὀργή 'anger', but vbs. *hatan*, *hatjan* for μισέω), ON *hatr*, OE *hete*, OHG *haz*, etc., general Gmc., with corresponding vbs. Words for 'anger' show the most diverse connections, as with words for 'bile, gall', 'heart', 'vapor, smoke' ('ebulliation'), 'swell', 'twist', 'tear', 'crosswise', 'astray', 'rot', 'hasty', 'bad, evil', etc., the primary sense in some of the groups being doubtful. In several cases the emotion is clearly secondary to some outward expression of it, as 'make a thundering noise', 'breathe heavily, pant'.

Some of the words listed have the force of NE *wrath*, which, though once simply 'anger' (so OE, ON, etc.), is now used more specifically of 'lasting anger'.

Most of the adjectives for 'angry' are related to the nouns, but sometimes different forms are popular, as NE *mad* (orig. 'insane' 17.23; colloq. 'angry'; cf. NED s.v. 5), NHG *böse* 'bad, wicked' (16.72) and 'angry'.

1. Grk. θῡμός 'soul, spirit', etc. (16.11), also 'anger' (Hom.+) and in NG reg. 'anger' with vb. θυμώνω 'make angry' and 'be angry', θυμωμένος 'angry'.

Grk. ὀργή 'mood, temperament', but esp. 'anger' (not in Hom.) : Ir. *ferg*, NIr. *fearg* 'anger', Skt. *ūrj-*, *ūrjā-* 'sap, juice, rich food or drink', also 'strength, vigor' (of men), primary sense of the root 'swell, ripen' as in Grk. ὀργάω 'swell, ripen' (of fruit, trees, etc.), hence also 'swell with lust', 'be excited', etc., ὀργάς 'fertile land'. Walde-P. 1.289. Boisacq 710. Cf. OHG *gibuluht* (below, 4), and Lat. *turgēre* 'swell' and colloq. 'be angry', as (*uxor*) *turget mihi* 'is angry with me', Plaut.

Grk. χόλος and χολή, orig. 'bile, gall', but also 'bitter anger' (mostly poet.) : Lat. *fel*, ON *gall*, OE *gealla*, etc. 'gall'. Walde-P. 1.624. Boisacq 1065.

Grk. μῆνις (poet.), Dor. μᾶνις 'wrath' (cf. Cret. ἔμμᾱνις 'wroth') : μαίνομαι 'rage, be mad', μανία 'madness, rage', which, though starting fr. μαν- weak grade of IE **men-*, follows in this semantic group (cf. perh. μέμηνα vs. μέμονα 'be eager') the α/ᾱ series of forms like φαίνω, perf. πέφηνα, Dor. πέφᾱνα. Cf. Skt. *manyu-* 'spirit, anger, rage', Av. *mainyu-* 'spirit' (of good or evil). Otherwise Walde-P. 2.233, with separation from μαίνομαι and attachment to Lat. *Mānēs*, *immānis*, and Schwyzer, Rh. Some of the words for 'anger' cover also the more violent 'rage, fury', especially Greek θῡμός (with its Goth. and ChSl. translations; λύσσα, μανία do not occur in NT), Skt. *kopa-*, Av. *aēšma-*. But there are usually distinctive words for 'rage, fury'. Several of these mean also or even principally 'madness', and the still more specific 'hydrophobia' is the orig. sense of the W. and Br. words, which are derived from the word for 'dog'.

In general, they are specialized from 'mental excitement' based in part upon notions of violent physical action.

Words for 'envy' and 'jealousy' are taken together, since often the same word covers both notions and the distinction is a subtle one. Most of the words for 'envy' (or 'envy' and 'jealousy') had from the outset a hostile force, based on 'look at' (with malice), 'not love', etc. Conversely, most of

those which became distinctive terms for 'jealousy' were originally used also in a good sense, 'zeal, emulation'.

1. Grk. φθόνος, orig. 'diminution' (cf. ἄφθονος 'abundant', ἀφθονία 'abundance', φθονέω often 'begrudge, be reluctant') : Av. *a-γžōnvamna-* 'not diminishing'. Cf. NE *belittling*, NHG *verkleinerung* in the sense of 'disparagement'. Walde-P. 1.699. Boisacq 1026 f. Barth. 50 f.

Grk. ζηλοτυπία, with ζηλοτυπέω 'be jealous', fr. ζῆλος (Dor. ζᾶλος) sometimes 'jealousy', but more often in a good sense, 'emulation, rivalry, zeal' (-τυπία : τύπος 'form'), whence NG ζήλεια; etym. dub. Walde-P. 1.775. Boisacq 309.

2. Lat. *invidia* (> It. *invidia*, Fr. *envie*, Sp. *envidia*, Rum. *învidie*), with *invidus* 'envious', fr. *invidēre* 'envy', earlier 'look at with malice, cast an evil eye upon', cpd. of *vidēre* 'see'. Ernout-M. 493 f. Walde-H. 1.713.

Lat. *līvor*, properly 'lead-color, blue-black spot' like the vb. *līvēre* 'be lead-colored, blue-black' and 'be envious' : Ir. *lī*, W. *lliw* 'color', etc. (15.61). Cf. NE *be green with envy*. Ernout-M. 558. Walde-H. 1.816.

Lat. *aemulātiō*, also in good sense 'emulation', beside vb. *aemulāri* 'emulate, rival, be envious of', fr. *aemulus* 'striving after, emulating, envious', perh. : *imitārī* 'represent, copy, imitate', *imāgō* 'copy, image, likeness', etc., but root connection dub. Walde-P. 1.102. Ernout-M. 16, 476. Walde-H. 1.17.

It. *gelosia*, Fr. *jalousie*, Rum. *gelozie*, fr. the adjs. It. *geloso*, Fr. *jaloux*, Rum. *gelos*, fr. VLat. **zēlōsus* deriv. of late Lat. *zēlus* 'zeal' (fr. Grk. ζῆλος, above, 1), whence Sp. *celo* 'zeal', pl. 'jealousy, suspicion'. Important in the history was the biblical 'jealous god' in the Vulgate *zēlōtēs*, fr. Grk. ζηλωτής. REW 9613, 9614. M. Grzywacz, "Eifersucht" in den rom. Sprachen.

3. Ir. *format*, NIr. *formad*, Br. *gourvenn*, arch. W. *gorfyn*, fr. a cpd. of Ir. *for-*, W. *gor-*, etc. 'over' and *mento-* (with influence of W. *mynnu*, etc. 'wish') fr. the root **men-* 'think'. Cf. Hom. ὑπερ-μενέων 'arrogant'. Pedersen 1.168.

Ir. *tnūth* (NIr. also 'longing for, desiring'), perh. (as 'tension' with complete transfer fr. physical to mental) : Skt. *tan-*, Lat. *tendere* 'stretch', IE **ten-*. Pedersen 1.132.

Ir. *ēt*, NIr. *ēad*, W. *-iant* in arch. *addiant* 'longing', Gall. *Iantu-mārus* (= Ir. *ētmar*) : Skt. *yat-* 'seek, strive', Av. *yat-* 'move (oneself), be active, zealous'. Walde-P. 1.197. Pedersen 1.64 f.

Most of the words listed are used not only for the subj. sense of 'shame', but also or even more commonly for the obj. 'shame, dishonor, disgrace' (note the secondary differentiation in NHG *scham* vs. *schande*).

In some an earlier sense of 'respect, reverence or modesty' led to 'shame' in a good sense. In others, as shown by usage or etymology or both, 'shame' in a bad sense was the primary notion. Thus, for example, Grk. αἰδώς and αἰσχύνη are contrasted in origin and in their prevailing usage. Several are connected with words for 'red' through 'blushing' as a sign of shame.

1. Grk. αἰδώς, mostly 'shame' in good sense, 'respect, reverence, modesty', with αἴδομαι, αἰδέομαι 'be ashamed, stand in awe, respect', prob. : Goth. *aistan* 'revere', Skt. *īḍ-* 'praise, supplicate', fr. **ais-d-*, extension of **ais-* in OHG *ēra*, NHG *ehre* 'honor', etc. Walde-P. 1.13. Boisacq 22. Feist 27 f.

Grk. αἰσχύνη, beside αἰσχύνω 'dishonor', pass. 'be dishonored, feel shame', αἶσχος 'a shame, disgrace', prob. fr. **aigʷh-s-* : Goth. *aiwiski* 'a shame, disgrace', OE *ǣwisc* 'dishonor, offense', MHG *eisch* 'ugly, repulsive', etc. Walde-P. 1.7. Boisacq 30. Feist 30.

Grk. ἐντροπή, in class. Grk. 'respect, modesty', in LXX 'humiliation', NT and NG reg. 'shame' : ἐντρέπω 'turn about', also 'put to shame' (NT, etc.), used mostly in mid. 'hesitate' and 'give heed to, respect, reverence' (Hom.+), later 'feel shame' (Polyb., NT), as reg. in NG.

2. Lat. *pudor* (also 'modesty' as mostly the borrowed Romance words, It. *pudore*, Fr. *pudeur*, etc.), with vb. impers. *pudet* 'feels ashamed', prob. as orig. 'feel repulsed or cast down' : *repudium* 'divorce, repudiation', *tri-pudium* 'a certain dance', etc., those fr. the root of *pavīre* 'beat, stamp' (or : *pēs*, *pedis* 'foot'?). Walde-P. 2.12. Lat. *verēcundia*, also 'bashfulness, modesty' (> It. *vergogna*, Sp. *verguenza*; Fr. *vergogne* obs.), beside *verēcundus* 'ashamed, bashful, modest', fr. *verēri* 'feel awe of, be afraid (religious sense)' : OE *wær* 'careful', *warian* 'preserve, protect', etc. Walde-P. 1.284. Ernout-M. 1089.

'Glory' is for the most part, in feeling and in origin, a highly emotionalized 'fame, renown' or 'honor'. But Grk. δόξα in biblical writings (LXX, NT) was used also, translating a Hebrew word, in the sense of 'brightness, splendor, magnificence, majesty'. This was followed in the translations (Lat. *glōria*, ChSl. *slava*, etc.; but Luther differentiated, *ehre* vs. *klarheit* or *herrlichkeit*) and so has affected the use of most of the Eur. words (e.g. NE *glory*, cf. NED s.v. 5–9). In fact the notion of 'splendor' or the like, rather than 'fame', is dominant, in use and etymology, in some of the Gmc. words, and, quite apart from biblical influence, probably in Skt. *yaças-* and certainly in Av. *xᵛarənah-*. The inclusion of such words in the list is justified by their similar emotional value, rather than under any strict definition of 'glory'.

1. Derivs. of IE **k̂leu-* in Grk. κλύω, Skt. *çru-* 'hear', Lat. *cluēre* 'be heard of, be famed', Grk. κλυτός, Lat. *inclutus*, Skt. *çruta-* 'renowned, famous', etc. Walde-P. 1.494 f. Ernout-M. 199 f. Walde-H. 1.237 ff.

Grk. κλέ(ϝ)ος; Lat. *cluor* (only in a gloss); Lith. *šlovė*, Lett. *slava*; ChSl. *slava*, etc. general Slavic (*slovo* 'word' in form = Grk. κλέος); Skt. *çravas-* (Av. *sravah-* 'word').

2. Grk. δόξα 'expectation' (Hom.), 'opinion', and 'fame, glory' and eventually the most usual word for 'glory' : δοκέω 'expect, think, seem', δέκομαι (Att. δέχομαι) 'receive, expect', ChSl. *desiti* 'find', etc. Walde-P. 1.783. Boisacq 172 f.

Grk. κῦδος (poet.), prob. : ChSl. *čudo* 'wonder' (obj.), both fr. the root of Grk. κοέω 'perceive', ChSl. *čuti* 'perceive, feel'. Walde-P. 1.369. Boisacq 529.

3. Lat. *glōria* (> It., Sp. *gloria*, OFr. *glorie*, Fr. *gloire*; Rum. *glorie* recent borrowing), etym.? Walde-P. 1.538. Ernout-M. 426. Walde-H. 1.609 f.

Br. *hano kaer*, lit. 'good name, reputation' (*hano* 'name, reputation' : Lat. *nōmen* 'name', etc., and *kaer* 'good').

5. Goth. *wulþus*, OE *wuldor* (ON *Ullr* name of a god), prob., as first 'glory' in the sense of 'splendor' (as Lk. 2.9, 9.31, 32, etc.) : Lat. *vultus* 'facial expression, face', Goth. *wlits* 'face, form', OE *wlite* 'aspect, form, splendor, glory' (often used in connection with *wuldor*, as *þines wuldres wlite* 'gloria tua', *tō wlite and wuldre*, etc.), etc. Walde-P. 1.293. Feist 577.

ON *dȳrð*, OHG *tiurida*, *diurida* (reg. for Lat. *glōria* in Tat., Otfr., etc.), through 'value', fr. 'costliness, dearness' (so MHG *tiurde*, cf. ME *derth*, NE *dearth* now 'scarcity') : ON *dȳrr*, OHG *tiuri*, etc. 'dear, expensive' (11.88).

ON *tīrr*, OE *tīr* : OHG *ziarī* 'adornment' (NHG *zier*, *zierde*), fr. an extension of IE **dei-* in words for 'shine' (Skt. *dī-*, etc. 15.56). Walde-P. 1.774. Falk-Torp 970.

Dan. *ære*, Sw. *āra* 'honor' (16.46) are used also with the stronger feeling of 'glory' (as NHG *ehre* by Luther for δόξα, *glōria*).

OE *mægenþrym* (mostly the 'glory, majesty' of god), cpd. of *mægen* 'might' and *þrymm* 'host, multitude, force, power, glory, majesty' (: ON *þrymr* 'alarm, noise', etc. Walde-P. 1.749. Falk-Torp 1174).

The nouns for 'pride' are derived from the adjs. for 'proud', or conversely. The adjs. are chosen here for discussion. Most of them are used for 'proud' in both the good and the bad sense. But a few of the words listed are used only in the latter sense, that is 'proud' = 'haughty, arrogant', and in many of the others this is the earlier, either in actual use or as indicated by the etymology.

Several are compounds of 'over' or 'high' with words for 'heart, mood, thought, appearance', thus connoting superiority of spirit or mind. Mental superiority is also basic in some that are cognate with words for 'wise' or 'judgment'. Other sources are 'high, great, fierce, pampered, stubborn'. Some reflect a physical expression of pride, being 'puffed up' or 'swollen'.

1. Grk. ὑπερήφανος, cpd. of ὑπέρ 'over' and -φανος 'appearing' : φαίνομαι 'appear', with η (Dor. ᾱ) after the analogy of words with composition lengthening, esp. ὑπερ-ήνωρ 'arrogant'. Brugmann, Ber. Sächs. Ges. 1901.104 derives the second member fr. -φϝανος, comparing ὑπερφίαλος 'arrogant, proud' fr. -φϝιαλος and Lat. *superbus* 'proud'. But there is no good reason to separate ὑπερήφανος from the large group of cpds. in -φανος.

NG (beside adj. (ὑ)περήφανος, sb. lit. (ὑ)περηφάνεια) pop. sb. καμάρι 'pride', back-formation to καμαρώνω 'be proud', this fr. Grk. καμαρόω 'furnish with a vault', pass. 'be vaulted' (fr. καμάρα 'anything with an arched cover, vaulted chamber'), with development through 'make an arch, puff out the chest, be puffed up'. For semantic parallels, cf. ON *dramblātr* (below, 4), Boh. *pyšný*, etc. (below, 6), and NE *puffed up*, U.S. slang *chesty*. Koukoules, Ἀφιέρωμα Hatzidakis 39 ff., derives the use more specifically from Byzantine marriage customs, in which the bride makes a bow (and is proud of the event). But this seems hardly necessary.

2. Lat. *superbus*, fr. *super* 'over' with suffix as in *probus* 'upright', either **-bhwo-* (: **bheu-* 'become', cf. Grk.

ὑπερφυής 'marvelous', etc.) or **-bho-*. Ernout-M. 813, 1004 f.

It. *orgoglioso*, Fr. *orgueilleux*, Sp. *orgulloso*, fr. sbs. It. *orgoglio* (fr. Prov. *orgolh*), Fr. *orgueil*, Sp. *orgullo* (fr. Cat. *orgull*), loanwords fr. Gmc., Frank. **urgōli* : OHG *urguol* 'distinguished' (see under *guollichī*, 16.47). REW 9084.

Fr. *fier*, fr. Lat. *ferus* 'wild, fierce', with development through 'high-tempered'. REW 3264.

Rum. *mîndru*, orig. 'wise', fr. Slav. *mądrŭ* 'wise' (17.21). Tiktin 986. For semantic relation, cf. Ir. *dīummusach* (below, 3) and Pol. *dumny* (below, 6).

3. Ir. *ūallach*, fr. sb. *ūall* (**oup-slā-*) : *uasal*, W. *uchel* 'high', Grk. ὑψηλός 'high', etc. Walde-P. 1.193.

Ir. *dīummusach*, fr. sb. *diummus* (**dī-ud-mess*) cpd. of *midiur* 'judge'. Pedersen 2.579. K. Meyer, Contrib. 665.

NIr. *mōrdhach*, cf. *mōrdha* id. also 'great, grand, stately', Ir. *mōrda* 'haughty', fr. *mōr* 'great, large'.

NIr. *uaibhreach*, fr. sb. *uabhar*, Ir. *obar* 'arrogance, boasting' : W. *ofer* 'vain', Br. *euver* 'vapid, spiritless', perh. also Goth. *abrs* 'strong, violent', *abraba* 'very'. Walde-P. 1.177. Pedersen 1.49.

W. *balch*, Br. *balc'h* : Ir. *balc(c)* 'strong, stout, mighty', prob. fr. the root **bhel-* 'swell', in Grk. φαλλός 'penis', Lat. *follis* 'leather bag', Ir. *ball* 'limb', etc., in which case the W., Br. meaning 'proud' may be directly fr. 'swollen'. Walde-P. 2.178.

4. Goth. *hauhhairts*, OE *hēahheort*, cpds. of words for 'high' and 'heart'.

Goth. *hauhþūhts* (renders τετύφωται, I Tim. 6.4, Vulgate *superbus est*, King James *is proud*), and *mikilþūhts* (ὑπερήφανος, Lk. 1.51), cpds. of *hauhs* 'high' or *mikils* 'great' and *-þūhts* : *þugkjan* 'think, believe, intend', *þūhtus* 'conscience', etc. Feist 249, 359.

ON *dramblātr*, fr. *dramba* 'be haughty, pompous', *dramb* 'arrogance', also 'roll of fat on back of neck' (*hnappa-dramb*), NIcel. *drambr* 'knot (in wood, etc.)'; development of 'arrogance' fr. 'swelling'.

ON *stōrlātr*, fr. *stōrr* 'great, large'.

OE *ofermōd*, *ofermōdig* (also simple *mōdig* but mostly 'high-spirited, brave'), *ofer-mēde*, ME *overmod*, *ofermodi*, OHG *ubarmuoti*, MHG *übermüete*, *übermüetec* (NHG *übermütig* mostly 'wanton, insolent', etc.), cpds. of OE *ofer*, OHG *ubar*, etc. 'over, above' and derivs. of OE *mōd*, OHG *muot* 'mind, spirit, disposition' = Goth. *mōþs*, ON *mōðr* 'anger', etc. (16.42).

OE *oferhygdig*, OHG *ubarhuhtīg* (Tat.), cpds. of OE *ofer*, OHG *ubar*, as above, and derivs. of OE *hyge*, OHG *hugi* 'mind, heart'.

ME *prud*, NE *proud*, fr. late OE *prūt*, *prud* = ON *prūðr* 'brave, gallant, magnificent', etc., fr. OFr. *prūd*, *prōd* 'valiant, doughty', fr. VLat. *prōde* 'advantage, use', formed fr. Lat. *prōd-esse* 'be of use'. NED s.v. REW 6766.

OHG *hōhmuotig*, MHG *hōchmüetec*, NHG *hochmütig* (now 'proud' in bad sense, 'haughty, arrogant'), fr. sb. OHG *hōhmuotī* (cf. OE *hēahmōd* 'proud'), cpd. of words for 'high' and 'spirit, mood'.

Du. *trotsch*, fr. *trots* 'pride, arrogance' : NHG *trotz* 'defiance, stubbornness', MHG *truz*, *traz*, adj. *traz* 'stubborn', vb. *tratzen* 'defy', root connection dub. Walde-P. 1.798. Franck-v. W. 689.

MHG, NHG *stolz* (MLG *stolt* > late ON *stoltr*, Dan., Sw. *stolt*), late OHG *stolz* 'arrogant, presumptuous' (MHG also 'foolish', prob. infl. of Lat. *stultus*), through 'strutting, walking with a stiff bearing' : MHG, NHG *stelze* 'stilt', NE *stilt*, etc., fr. **stel-d-*, beside **stel-g-* in Norw. *stjelk*, etc. 'stalk', NE *stalk*, etc., all fr. the root in OHG *stellen* 'place, put,

set up', etc. Walde-P. 2.646. Falk-Torp 1173. Kluge-G. 596.

5. Lith. *puikus* (also 'splendid, magnificent'), fr. OLith. *puyka* 'pride', this fr. Pol. *pycha* (below, 6). Senn, Language 14.149 f. Otherwise (: *piktas* 'bad') Fränkel, Rev. ét. indo-eur. 1.426 f.

Lith. *išdidus*, cpd. of *didus* 'lofty, majestic', also 'proud' : *didis* 'great, large' (12.55).

Lett. *lepns* (Lith. *lepnas* 'pampered, spoiled, sensual, dainty') : *lept* 'be proud, become proud', Lith. *lepti* 'be pampered, etc.', Lat. *lepidus* 'pleasant, fine, neat', Grk. λεπτός 'fine, thin, weak', etc. Walde-P. 2.430. Mühl.-Endz. 2.452 f.

6. ChSl. *grŭdŭ*, with sb. *grŭdyni* 'pride' (both in Gospels), Boh. *hrdý*, Russ. *gordyj*, prob. same word as in ChSl. *grŭdŭ* 'frightful' (Supr.), SCr. *grd* 'ugly', SCr. *grditi*, Pol. *gardzić* 'scorn, despise', etc. Outside connections dub., but uses best combined under some such notion as 'repelling', whence 'proud', first in bad sense (as always in NT) and 'repulsive'. Walde-P. 1.641 (and 649, 650, making two separate groups). Berneker 370. Brückner 135.

SCr. *ponosit*, *ponosan* : *ponijeti se* 'carry oneself, have a certain bearing, be proud', ChSl. *nesti* 'carry', etc. Rječnik Akad. 10.741, 755.

SCr. (also Slov., Bulg.) *ohol* : Bulg. *o-holen* 'satisfied', *o-halen* 'living in ease', Russ. *na-chal'nyj* 'impudent' (through 'pampered, spoiled', cf. Apart from an inherited group, verbs for 'dare' are based on such varied notions as 'endure, undertake, be firm, be strong, be eager, have spirit, believe (have confidence), have need'. A few come through 'risk' from words for 'play with dice' or 'wager'.

1. IE *dhers-. Walde-P. 1.864. Feist 177.

Grk. θαρσέω, Att. θαρρέω ('be of good courage, have confidence', not the common vb. for 'dare', but cf. θάρσος 'courage', θρασύς 'bold, daring'); Goth. *gadaursan*, OE *durran*, ME *durre*, *dore*, NE *dare*, OS *gidurran*, OHG *giturran*, MHG *turren;* nasalized Lith. *drįsti*, Lett. *drīkstēt*, *drīstēt* (on *k*, cf. Endz., Gramm. 172 ff.); Skt. *dhṛṣ-*, OPers. *darš-*.

2. Grk. τολμάω 'endure, submit, undertake' and esp. 'dare', beside τόλμα 'courage, boldness' : ταλάσσαι, τλῆναι, etc. 'bear, suffer, undergo', Lat. *tollere* 'lift', Goth. *þulan* 'bear, suffer', etc. Walde-P. 1.738 f. Ernout-M. 1044.

3. Lat. *audēre* (pple. *ausus*, whence VLat. **ausāre* > It. *osare*, Fr. *oser*, Sp. *osar*), deriv. of *avidus* 'eager' : *avēre* 'desire eagerly'. Earliest sense 'desire', preserved in *sī audēs*, *sōdēs* 'if you like, if you please'. Development of 'dare' prob. first in neg. phrases like *haud ausim dare*, *nōn ausit crēdere* (Plaut.) 'wouldn't like to' = 'wouldn't risk, dare'. Walde-P. 1.19. Ernout-M. 86, 87 f. Walde-H. 1.880, 1. REW 801.

Some of the words listed are used only in the good sense, as terms of approval, like NE *brave*, while others are used also, or some of them more usually, in the bad sense, with feeling of reproof, 'bold, rash'

Several are in origin 'daring', cognate with verbs for 'dare'. Others are derived from words for 'spirit, soul', 'mood', or 'heart' through the notion of 'courage'; or as originally 'manly' from words for 'man'; or as 'fearless' from 'fear'. Still others are words for 'strong, mighty', 'firm, steadfast', 'skilful', 'good' etc., either used also as common expressions for 'brave' or definitely specialized in this sense. A few are connected with words for 'war', 'anger', or 'blood' (through 'cruel').

1. Grk. θρασύς (most often in bad sense 'bold, rash', but also in good sense 'brave, bold' as of Hector and others in Hom.) : θαρσέω 'dare', θάρσος 'courage', etc. (16.51).

Grk. τολμηρός (poet. also τολμήεις), deriv. of τόλμα 'courage, daring' : τολμάω 'dare' (16.51).

Grk. ἀγαθός 'good' (16.71) used also for 'brave' (Hom.+), as conversely κακός 'bad' for 'cowardly' (16.55).

Grk. ἀνδρεῖος 'manly' (fr. ἀνήρ, ἀνδρός 'man') in NG reg. 'brave', with ἀνδρεία 'bravery, courage'.

Grk. γενναῖος 'high-born, noble, excellent' (fr. γέννα 'birth, descent'), in NG 'noble' but esp. 'brave'.

2. Lat. *fortis* 'strong' (4.81), and esp., as mentally strong, 'brave'.

Lat. *animōsus*, fr. *animus* 'soul, spirit, mind, etc.' (16.11), and hence 'spirit, courage'.

Lat. *audāx* (more often 'bold' in bad sense) : *audēre* 'dare' (16.51).

Sp. *bravo*, 'wild' in OSp., later 'brave'

(and in this sense > It. *bravo* > Fr. *brave* > Rum. *brav*), fr. Lat. *barbarus* 'wild, savage', orig. 'foreign, a foreigner', fr. Grk. βάρβαρος id. REW 945. Gamillscheg 142. Wartburg 2.248 ff.

It. *coraggioso*, Fr. *courageux* (> Rum. *curagios*), fr. It. *coraggio* (fr. Prov. *coratge*), Fr. *courage* 'courage', derivs. of Fr. *cœur*, Prov. *cor*, etc. 'heart'. REW 2217.

Sp. *valiente* (and in this sense also It. *valente*, Fr. *vaillant* > ME *vailant*, NE *valiant*), pple. of *valer* (It. *valere*, Fr. *valoir*) 'be worth', fr. Lat. *valēre* 'be strong, be good for'. REW 9130.

Rum. *viteaz*, as sb. 'hero', fr. the Slavic, cf. late ChSl. *vitęzĭ* 'hero', Boh. *vítěz* 'victor', Russ. *vitjaz'* 'knight', etc., these prob. fr. ON *vikingr* 'viking'. Tiktin 1760. Stender-Petersen 67 (with refs. in ftn.). Otherwise on the Slavic words Brückner 658 f.

3. Ir. *dāna* (gl. *audax*, NIr. 'bold, impudent'), prob. through 'gifted' or 'cunning' (cf. OE *cēne*, etc., below, 4) fr. *dān* 'gift, art, skill'. Stokes 143 (but *dān* 'art', orig. 'gift' : Lat. *dōnum*, etc. 'gift'. Walde-P. 1.815. Pedersen 1.48, 177).

Ir. *essamin*, cf. MW *eh-ofyn* 'fearless', Gall. *Ex-obnus*, *Ex-omnus*, cpd. of *eks- (neg. force) and last member : Ir. *ōmun* 'fear' (16.53). Pedersen 2.12.

Ir., NIr. *calma* : OBr. *celmed* 'efficax', W. *celfydd* 'skilled', etym. dub. Pedersen 1.168.

Ir. sb. *gal* 'bravery' (more common than any adj.) : W. *gallu*, Lith. *galėti* 'be able'. Walde-P. 1.539. Stokes 107 f. Pedersen 1.157 (another suggestion 2.25, but ?).

NIr. *crōdha*, fr. Ir. *crōda* 'bloody, cruel' (K. Meyer, Contrib. 525), fr. *crō* 'blood, gore'.

W. *dewr*, as sb. 'hero', cpd. of *de-* 'good' (prefix beside *da* id., 16.71) and *gwr* 'man'. Pedersen 1.39.

W. *gwrol*, lit. 'manly, virile', whence 'brave' (cf. Grk. ἀνδρεῖος, above, 1), fr. *gwr* 'man'.

Br. *kalonek*, fr. *kalon* 'heart' (imitation of Fr. *courageux*?).

Br. *kadarn* = W. *cadarn* 'strong' (4.81).

Words for 'fear' and the stronger (and in part more sudden) 'fright, terror' are mostly based upon those for physical actions expressive of fear, especially 'tremble, shake', also 'flee', 'be struck', etc. In some cases there has been a shift from the objective 'danger' to the subjective 'fear', as, conversely, words for 'fear' are often used objectively for what inspires fear, 'a horror, a terror, danger'. An important cognate group is common to Balto-Slavic and Indo-Iranian.

1. Derivs. of IE *bhəi-(?), *bhī- in Balto-Slavic and Indo-Iranian words for 'fear', prob. (though disputed) the same root as in OE *beofian*, OHG *bibēn*, etc. 'shake, tremble' (redupl. formation). Walde-P. 2.124 f. Falk-Torp 125. Weigand-H. 1.173. Berneker 68.

Lith. *baimė*, *bailė* (also *baisa* 'fright', *baisus* 'frightful', fr. *bai-d-s-), Lett. *baile* (usually pl. *bailes*); ChSl. *bojaznĭ*, etc., general Slavic; Skt. *bhaya-*, *bhīti-*, *bhī-*, Av. *byah-* (*s*-extension); vb. forms Skt. *bhī-* 'fear', Av. 3pl. *bayente*, *byentē* 'frighten', OPruss. *biatwei*, Lith. *bijoti(s)*, Lett. *bītiēs*, *bijāt(iēs)*, ChSl. *bajati sę*, etc. 'fear, be afraid'.

2. Grk. δέος, δεῖμα (latter often obj. 'a terror'), with vb. δείδω (fr. *δε-δϝοια; δϝ attested also in Hom. ἔδδεισε and Corinth. Δϝεινίας) : Av. *dvaēθā-* 'threat' and Skt. *dviṣ-* 'hate' (cf. 16.41).

Grk. φόβος, orig. 'flight' (still the only sense in Hom.), hence 'panic, fright' and eventually the most common word for 'fear' : φέβομαι 'flee', Lith. *bėgti* 'run, flee', etc. Walde-P. 2.148 f.

Grk. τρόμος 'a trembling', esp. with fear, whence NG 'terror, fright' : τρέμω, Lat. *tremere* 'tremble', Lith. *trimti* 'shake', IE *trem- beside *tres- in Skt. *tras-* 'tremble, be afraid', Grk. τρέω 'tremble, flee', Lat. *terrēre* 'terrify', *terror* 'terror'. Walde-P. 1.785. Ernout-M. 1054.

3. Lat. *timor* (> It. *timore*, Sp. *temor*, ORum. *temoare*), with vb. *timēre* (> It. *temere*, Sp. *temer*, Rum. *teme*, whence Rum. sb. *teamă*), etym. dub. Walde-P. 2.611. Ernout-M. 1040.

Lat. *metus* (> Sp. *miedo*), hence *metuere* 'fear', etym. dub., possibly : ChSl. *motati sę* 'be disturbed, moved', Grk. μόθος 'battle-din', etc. Walde-P. 2.269. Wood, Cl. Pl. 5.306.

Lat. *pavor*, orig. 'a shaking, quaking' with emotion, esp. with fear, hence 'alarm, dread, fear' (> OFr. *paor*, Fr. *peur*; with change of suffix It. *paura*, Sp. *pavura*), with vb. *pavēre* 'be struck with fear, tremble, quake with fear', prob.

orig. 'be struck' : *pavīre* 'beat, strike'. Ernout-M. 743. REW 6314.

Lat. *terror* (> It. *terrore*, Fr. *terreur*, etc., NE *terror*), see above under Grk. τρόμος.

It. *spavento*, Fr. *épouvante* ('terror'), fr. It. *spoventare* 'frighten', Fr. *épouvanter* 'terrify, horrify', fr. VLat. **expaventāre*, deriv. of *pavor*, etc. (above). REW 3035.

Fr. *crainte*, fr. vb. *craindre* 'fear', orig. *criembre*, representing a Gallo-Lat. **cremere*, fr. Lat. *tremere* 'tremble' blended with a Gallic **crit-* : Ir. *crith* 'a trembling, shaking'. Cf. OProv. *cremer* 'fear'. REW 8877. Bloch 1.187. Gamillscheg 271.

Fr. *effroi*, fr. *effrayer* 'frighten', orig. *esfreer*, fr. VLat. **exfridāre*, deriv. of a Frank. form corresponding to OHG *fridu*, NHG *friede* 'peace'; orig. 'rouse from a state of peace', whence 'frighten'. REW 3008. Wartburg 3.293. Gamillscheg 344.

Sp. *susto*, deriv. of Lat. *suscitāre* 'lift, raise, rouse, set in motion', also 'scare' (*suscitat vulturium a cano capiti*, Cat. 68.126), cpd. of *citāre* 'put in motion'. REW 8482.

Rum. *frică*, fr. Grk. φρίκη 'shivering, shuddering', esp. with 'fear' : φρίσσω 'be rough, bristle up, ripple, shiver'. Tiktin 646 f.

Rum. *spaimă*, fr. VLat. **expavīmen* : *pavor*, etc. (above). Tiktin 1463.

4. Ir. *ōmun*, *ōman*, NIr. *uamhan*, W. *ofn*, Br. *aon*, Gall. *obnus*, *omnus* (in proper names, *Ex-obnus*, *-omnus* 'fearless'), etym. dub. Walde-P. 1.177 f. (Pedersen 1.49, Stokes 50 : Ir. *ōbar* 'arrogance', W. *ofer* 'vain', Goth. *abrs* 'strong, violent').

Ir. *ecla*, NIr. *eagla*, deriv. of Ir. *ecal* 'afraid', fr. **ek-gal*, neg. cpd. of *gal* 'bravery'. Pedersen 1.477.

NIr. *faitcheas*, fr. Ir. *faitches* 'caution', deriv. of *faitech* 'cautious' (NIr. 'fearful, timid'), cpd., prob. : *techim* 'flee'. Pedersen 2.639.

In several words 'danger' is a specialization of 'experience' (good or bad), 'critical moment, crisis', 'care', etc. Some are connected with words for 'fear' with shift from subjective to objective or conversely. Others are based on miscellaneous notions, 'insecurity', 'doubt', 'power', 'punishment', 'pitfall', etc.

1. Grk. κίνδῡνος, plausibly explained as fr. *κύν-δῡνος : κύων, κυνός 'dog', with *dū-* : Skt. *dīv-* 'play with the dice' (form *du-* in aor. imperat. Ved. *daviṣāṇi*), with orig. reference to the risk in dice-playing, in which the 'dog' was the worst throw (attested for Grk. κύων, Lat. *canis*, and for Skt. *çva-ghnin-* 'the lucky player', lit. the 'dog-killer'). W. Schulze ap. Sittig, KZ 52.207. Kretschmer, KZ 55.90 f. Specht, KZ 66.5. Earlier views Walde-P. 1.361, Boisacq 461, 1115.

2. Lat. *perīculum* (> It. *pericolo*, Fr. *péril*, Sp. *peligro*, Rum. *pericol*), orig.

'trial, attempt' (cf. *perīculum facere*), whence 'risk' and (the usual class. sense) 'danger, peril' : *ex-perīrī* 'try, test, prove', *op-perīrī* 'wait, expect', *perītus* 'experienced', etc., Grk. πεῖρα 'trial, attempt', and the Gmc. groups OE *fǣr* and OHG *freisa*, etc. (below, 4), ultimately as 'experience' fr. the same root as Grk. περάω 'go through', OE *faran* 'go, fare', etc. Walde-P. 2.28 ff. Ernout-M. 756 f.

Lat. *discrīmen*, orig. 'that which separates' (with various applications, 'parting of the hair', 'diaphragm', etc.), whence 'act of deciding, decisive moment, crisis' and esp. 'moment of peril, danger' (often used in connection with *perīculum*) : *discernere* 'separate, distinguish', cpd. of *cernere* 'separate, sift, distinguish, perceive', etc. Walde-P. 2.584. Ernout-M. 178.

Fr. *danger*, OFr. *dongier*, *dangier* (*a* by influence of *dam*, Lat. *damnum*), orig. 'power, jurisdiction, domination', whence 'peril, danger' in phrases like *estre en dangier* 'be in the power, at the mercy' (of someone), fr. VLat. **dominiārium* 'power', deriv. of *dominus* 'lord, master'. REW 2736. Gamillscheg 290. Wartburg 3.128.

Rum. *primejdie*, fr. Slavic, cf. Bulg. *prě-měždije* 'danger', lit. 'that which is beyond the boundary', fr. *mežda* 'border, boundary' (= ChSl. *mežda* 'street' : Skt. *madhya-*, Grk. μέσος 'middle', etc.). Tiktin 1255. Berneker 2.32.

3. Ir. *gūas*, *gūasacht*, perh. (**ĝhaud-to-*) : Lith. *žudyti* 'kill', OE (*ā*)*gētan* 'injure, kill'. Walde-P. 1.564.

Ir. *gāba*, *gābud* (NIr. *gābadh* mostly 'want, need', but also 'danger'; cf. Dinneen), etym.? G. S. Lane, Language 13.24.

Ir. *bāigul* (also 'chance, opportunity'), NIr. *baoghal*, perh. : ChSl. *bojati sę* 'be afraid', *bojaznĭ*, Lith. *baimė*, *bailė*, etc. 'fear' (16.53). Pedersen 1.56.

NIr. *contabhairt*, fr. Ir. *cundubart* 'dubium', fr. **con-di-fo-ber-*, cpd. of root of *berim* 'bear, carry'. Pedersen 2.467.

W. *perigl*, fr. Lat. *perīculum* (above, 2). Loth, Mots lat. 195.

W. *enbydrwydd*, fr. *enbyd* 'dangerous', cpd. of *pyd* (arch.) 'pit, pitfall, snare, danger' (this fr. OE *pytt*, ME *pyt*, *pit*, fr. Lat. *puteus* in spite of Morris Jones 269). For the suffix *-rwydd* '-ness' (orig. 'course' : Ir. *riadaim* 'ride') cf. Pedersen 2.14 f.

Br. *riskl*, also 'risk', cf. *riskla*, *riska* 'slip', *risklus* 'slippery, dangerous', and *ri(n)kl* 'slippery', *rikla* 'slip'. Evidently a blend of Fr. *risque* 'risk' with a native word for 'slip'. Henry 234.

Br. *gwall*, also 'evil, fault', as adj. 'bad' (16.72).

4. Goth. *bireikei*, etym. dub. Feist 9.94.

Goth. *sleiþei*, fr. *sleiþs* 'bad, dangerous' : ON *slīðr* 'fearful', OE *slīþe* 'dire, dangerous', OHG *slīdīc* 'angry, cruel', further connections dub. Walde-P. 2.401. Feist 437. Walde-H. 1.813.

ON *hætta* (fr. vb. *hætta* 'risk', fr. **han-hatjan*), *hāski* (**hankaskan-*) : Skt. *çaṅk-* 'be anxious, apprehensive, or distrustful', *çaṅkā-* 'apprehension, alarm, fear, suspicion', Lat. *cunctārī* 'delay, hesitate, doubt', these perh. further : Goth. *hāhan*, ON *hanga*, etc. 'hang'. Walde-P. 1.461. Falk-Torp 448, 1480. Walde-H. 1.307.

OE *pleoh* : *plēon* 'dare, risk', prob. fr. the same root as the following, but exact relation obscure (Gmc. *h* beside *g*).

OE *pliht* (also 'damage'), ME *plyȝt* (NE *plight*), OHG *pfligida* : OHG *pflicht* 'care, service, duty', NHG *pflicht* 'duty', OHG *pflegon* 'care for, be accustomed', etc., outside connections dub. Walde-P.

1.869. Weigand-H. 2.412 f. Kluge-G. 442.

OE *frēcen*, also *frēcen(n)es*, *frēcednes* : *frēcne* 'horrible, savage, daring, dangerous', OS *frōkan* 'wild, bold, impudent', ON *frækn*, *frækinn* 'unafraid, courageous', OE *frec* 'greedy, bold', ON *frekr* 'greedy, severe', OHG *freh* 'greedy', etc., outside connections dub. Falk-Torp 279. Walde-P. 2.88.

ON *fǣr* (ME *fere*, NE *fear*, 16.53), OHG *fāra*, MHG *vāre* (also 'ambush', as OS *fār*; > Dan. *fare*, Sw. *fara*), NHG *gefahr*, Du. *gevaar* : Lat. *perīculum*, etc. (above, 2). Falk-Torp 205. Hellquist 200. Franck-v. W. 192.

NE *danger*, fr. ME *daunger*, mostly 'power of a lord or master, jurisdiction' (first quoted in modern sense 1489 in NED), fr. OFr. *dongier*, *dangier* id. (above, 2).

ME, NE *peril*, fr. Fr. *péril* (above, 2).

OHG *freisa*, MHG *vreise* (also 'trial, hurt', etc., Du. *vrees* 'fear') : Goth. *fraisan* 'try', etc. fr. an extension of the root in OE *fǣr* and Lat. *perīculum* (above, 2). Falk-Torp 275 f. Franck-v. W. 761 f.

5. Lith. *pavojus*, whence *pavojingas* 'dangerous' : *veju*, *vyti* 'hunt, pursue' (10.53).

Lett. *briesma*, usually pl. *briesmas*, etym. dub. Muhl.-Endz. 1.337 (Slavic *bridŭ* 'sharp, sour'?).

6. ChSl. *běda* (in Gospels once = ἀνάγκη 'distress'; in Supr. 'necessity, distress, force', and 'danger', also *bezběďnŭ* = ἀκίνδυνος), in modern Slavic 'distress, wretchedness' : *běditi* 'compel' (19.48).

SCr. *opasnost*, Russ. *opasnost'* ('danger' fr. 'care'), fr. Slavic *opasti sę* 'be on one's guard' (cf. Russ. *opasat'sja* 'guard against, take heed', ChSl. *opasŭmŭ*, *opasenĭje* 'exactness, care'), cpd. of Slavic *pasti* 'pasture, graze, watch cattle' : Lat. *pāscere* 'pasture, feed', etc. Walde-P. 2.72. Miklosich 232 f.

Boh. *nebezpečí*, Pol. *niebezpieczeństwo*, neg. cpds. of *bezpečí*, *bezpieczeństwo* 'security, safety', these cpds. of *bez* 'without' and derivs. of *peče*, *piecza* 'care' (16.14). Brückner 406 f.

7. Skt. *bhaya-* 'fear' (16.53), also freq. 'danger'.

Skt. *saṁçaya-* 'hesitation, doubt' (fr. *saṁ-çi-* 'be in doubt', lit. 'lie together'), also 'danger'.

Most of the words for 'timid' are cognate with those for 'fear'. Some of these are 'fearful' in both the subj. ('feeling fear') and the obj. ('causing fear') senses, as ME *ferfull*, NE *fearful* (now mostly obj.; as subj. largely replaced by *timid*). Or these two senses may be differentiated by the endings, as NHG *furchtsam* (subj., but MHG also obj.) vs. *furchtbar* (obj.).

Several of these words cover in feeling both the mild 'timid' and the more opprobrious 'cowardly', e.g. Grk. δειλός, Lith. *bailus*, Skt. *bhīru-*. But there are also more distinctive terms for 'coward' and 'cowardly', most of them derived from a variety of abusive epithets (to which might be added others, not included in the list).

Most of the words for 'timid', since their relationship to those for 'fear' is obvious by comparison of the list of the latter (16.53), are omitted in the following discussion, which deals mainly with words for 'cowardly'.

1. Grk. δειλός (: δέος 'fear') covers also, in fact is most commonly, 'cowardly', for which also the following:

Grk. ἄτολμος, neg. cpd. of τόλμα 'daring' : τολμάω 'dare' (16.82).

Grk. ἄνανδρος, neg. cpd. of ἀνήρ, ἀνδρός 'man' (cf. ἀνδρεῖος, 16.52).

Grk. κακός 'bad' (16.72), sometimes (e.g. Hom.) of a warrior 'cowardly' (cf. ἀγαθός 'good' and 'brave').

2. Lat. *ignāvus*, also and more orig. 'lazy', neg. of (*g*)*nāvus* 'industrious, active' : W. *go-gnau* 'activity, active', prob. belonging with IE **gnō-* 'know', in Lat. (*g*)*nōscere*, etc. Walde-P. 1.580. Ernout-M. 657.

It. *codardo*, Sp. *cobarde*, fr. Fr. *couard* (no longer the usual world), deriv. of OFr. *coe*, Lat. *cauda* 'tail'. Semantic development perh. through 'having the tail between the legs' (like dogs, etc. when frightened), but there are other possibilities. REW 1774. Wartburg 3.523, 533. NED s.v. *coward*.

It. *vigliacco*, fr. Sp. *bellaco* 'sly, cunning, deceitful', deriv. of Lat. *villus* 'shaggy hair'. REW 9328, 9335.

It. *vile*, also 'vile, base, common', fr. Lat. *vilis* 'cheap, poor, worthless, mean'. REW 9328.

Fr. *lâche*, lit. 'slack, loose', fr. VLat. **lascus* for *laxus* 'open, wide, loose', etc. REW 4918. Gamillscheg 546.

It. *poltrone* 'coward' (> Fr. *poltron* > NE *poltroon*), deriv. of OIt. *poltro*, not in the sense 'bed' (as NED s.v. *poltroon*), but in its orig. sense of 'foal, colt' (3.45), with reference to the timidity of the young animal. Bloch 2.168 ("qui s'ef-

fraie comme un poulain"). Sperber, Wört. u. Sach. 2.193 (but through 'lazy' from 'ass').

Rum. *mişel*, properly 'miserable, poor', fr. Lat. *misellus* 'poor, wretched, unfortunate'. REW 5607.

3. Ir. *midlachda*, fr. *midlach* 'coward', prob. deriv. of *mid-* 'middle, half', orig. sense something like 'half-ling'. I. Williams, BBCS 1.37.

NIr. *cladhardha*, fr. *cladhaire* 'coward', orig. 'digger' (: *cladhaim* 'dig'), apparently used as an abusive epithet.

W. *llwfr* : MBr. *llofr* 'leprous', Ir. *lobur* 'weak, infirm', Lat. *labāre* 'totter, be ready to fall', etc. Walde-P. 2.432.

Br. *laosk*, orig. 'loose, slack', of the same origin (but *k* fr. vb.) and in the sense 'cowardly' prob. influenced by Fr. *lâche* (above, 2). Loth, Mots lat. 180 f.

4. ON *ragr*, *argr*, OE *earg* (also 'lazy, base, vile'), ME *argh*, *arwe* (still dial., cf. NED s.v.), OHG *arg* (mostly 'avaricious, base'), NHG *arg*, Du. *erg* 'bad, evil', a generally opprobrious term, outside connections dub.; perh. : Lith. *ragana* 'witch', Skt. *r̥ghāya-* 'quiver, rage', Av. *ərəγant-* 'frightful, horrible', ultimate root meaning? Walde-P. 1.147. Kluge-G. 22. Franck-v. W. 158. Weisweiler, IF 41.16 ff.

Dan. *fejg*, Sw. *feg*, see under NHG *feig*, below.

ON *hræddr*, Dan. *ræd*, Sw. *rädd* 'afraid, timid' : ON *hræda* 'frighten', *hræzla* 'fright' (16.53).

Dan. *krysteragtig*, fr. *kryster* 'coward', prob. : *kryste* 'squeeze, press, hug', hence orig. 'squeezer, hugger' as an abusive epithet. Falk-Torp 587. Dahlerup s.v.

ME *coward*, NE *cowardly* (*coward* only sb.), fr. OFr. *coart*, Fr. *couard* (above, 2).

Du. *laf* 'cowardly, insipid' (MDu. 'slack, weak, faint') : ON *lafa* 'hang down', etc. Hence also *lafhartig*, cpd. of *hart* 'heart'. Franck-v. W. 367.

OHG *zagi*, MHG *zage*, *zag(e)haft*, NHG (*zag*), *zaghaft* (in older periods 'cowardly', now much milder 'faint-hearted, timid, hesitant'; replaced in older sense by *feig*) with vb. OHG *zagēn* 'lose courage, be undecided', NHG *verzagen* 'despair', perh. : Goth. *tahjan* 'tear', Norw. dial. *tæja*, *taa* 'shred', cf. also Norw. dial. *taag* 'slow, lasting', and for semantic development NHG *zögern* 'delay' : OHG *zogōn* 'pull, tear'. In any case semantic development prob. through 'hesitant, irresolute'. Walde-P. 1.785. Falk-Torp 261.

NHG *feig* (hence the sense 'cowardly' in Dan. *fejg*, Sw. *feg*), through 'fearful of death' fr. MHG *veige*, OHG *feigi* 'fated to die' = ON *feigr*, OE *fǣge* id. (NE, esp. Sc. *fey*), beside OE *fāh*, *fāg* 'hostile, foe', etc., prob. : Lith. *piktas* 'angry', etc. (16.42). Walde-P. 2.10. Falk-Torp 211. Kluge-G. 151. Weigand-H. 1.513.

5. SCr. *kukavički*, fr. *kukavica* 'coward', lit. 'cuckoo' used as a popular abusive epithet.

Boh. *zbabělý*, cf. *zbabělec* 'coward', fr. *baběti* 'grow cowardly', fr. *baba* 'old woman'.

Pol. *tchórzliwy*, fr. *tchórz* 'a coward', lit. 'polecat', as an abusive epithet 'stinker', like NE (U.S.) *skunk*.

Russ. *robkij*, through 'servile', fr. *rab*, ChSl. *rabŭ*, *robŭ* 'slave'. Brückner 459.

Russ. *truslivyj*, fr. *trus* 'coward' : *trusit'* 'fear, be afraid' also 'scatter, strew', ChSl. *trąsŭ* 'quake', *tręsti*, Russ. *trjasti* 'shake', refl. 'shiver', etc. (Walde-P. 1.758). Trautmann 330. Brückner 579.

6. Skt. *kātara-*, perh. as 'disgraceful' : *kātkr̥ta-* 'despised, derided', and ON *hāð* 'ridicule', Grk. κωτίλος 'chattering'. Walde-P. 1.384. Uhlenbeck 51.

The words listed are the most common verbs for 'will, wish'. The majority of them cover 'will' and 'wish' without distinction between the notions of 'volition' in the modern technical sense and the simple 'wish'. But for 'wish', besides the Gmc. group which is included here, cf. also the verbs listed under 'desire' (16.62), many of which are often scarcely stronger than 'wish'.

1. IE **wel-*. Walde-P. 1.294 f. Ernout-M. 1129 f. REW 9180. Falk-Torp 1379.

Lat. *velle*, 1sg. *volō*, perf. *voluī*, whence VLat. **volēre* (> It. *volere*, Fr. *vouloir*, Rum. *vrea*); Goth. *wiljan*, OE *willan*, etc., general Gmc.; elsewhere not the common verb for 'will, wish' but in more emphatic sense 'choose, command', etc., e.g. Umbr. *veltu* 'diligito', *ehueltu* 'iubeto', OLith. (*pa*)*velti* 'will, grant', Lett. *vēlēt* 'grant, wish' (in phrases like 'wish one joy'), ChSl. *velěti* 'will, command, permit' (but sb. *volja* 'will', vb. *voliti* 'will, choose'), Skt., Av. *var-* 'choose'. The 'wish' notion may be reinforced by the use of opt. instead of indic. forms, e.g. 1sg. Goth. *wiljau* reg., Lat. *velim* frequently.

2. Grk. ἐθέλω and θέλω (the most generic word) : ChSl. *želěti* 'desire' (16.62), further connections dub. Walde-P. 1.692.

Grk. βούλομαι (Att.-Ion.; dial. βόλομαι, δείλομαι, δήλομαι, βέλλομαι, etc., all pointing to IE **gʷel-*), usually implying a decisive choice, with sb. βουλή 'counsel, Council', etc., prob. : βάλλω 'throw, put' (Arc. δέλλω, cf. Skt. *gal-* 'drip', hence likewise fr. a root **gʷel-*), with development in mid. through 'cast about in the mind, ponder, resolve' (cf. βάλλομαι in phrases with ἐνὶ θυμῷ, ἐνὶ φρεσί, εἰς νοῦν, etc.). But details of the formal evolution (through aor. subj. *βόλσομαι?) still uncertain. Kretschmer, Glotta 3.160 ff. Schwyzer, Gr. Gram. 284.

Grk. dial. λείω, λῶ (in several Dor. dialects and Elean) : λῆμα 'will', prob. λελίημαι 'desire eagerly', outside root connections dub. Walde-P. 2.392.

3. Lat. *velle*, etc. above, 1.

Osc.-Umbr. has rather *her-* (e.g. fut. Osc. *herest*, Umbr. *heriest* 'volet'; *vel-* in Umbr. *veltu* 'diligito', etc., above, 1) : Lat. *horī*, *hortārī* 'urge, encourage', Grk. χαίρω 'rejoice', Goth. *gairnjan* 'desire', etc. (16.22, 16.62).

Sp. *querer*, fr. Lat. *quaerere* 'seek'. REW 6923.

Rum. *voi* (beside *vrea*, above, 1), fr. *voe*, fr. Slavic, ChSl. *volja* 'will' (above, 1). Tiktin 1779.

4. Ir. *dūthraccar*, fr. **di-fo-tracc-*, etym. dub., perh. as 'be pressed' : OE *þringan* 'press, crowd', OHG *dringan* 'press, push, squeeze', etc. (cf. NHG *es drängt mich*

'I am eager'). Walde-P. 1.758 f. Pedersen 2.653 f. Thurneysen, Gram. 504.

Ir. *tol*, NIr. *toil* 'will' (sb.), perh. : Goth. *þulan*, ON *þola*, OE *þolian* 'bear, endure', Lat. *tollere* 'lift', etc., but semantic relation not clear. Walde-P. 1.739. Hence the NIr. usual expression by *toil* in phrases e.g. *is toil liom* 'it is my will' = 'I will, wish'.

W. *ewyllysio*, Br. *youli*, fr. sbs. W. *ewyllys* 'will, volition', Br. *youl* 'desire' : Lat. *avēre* 'desire eagerly', Skt. *av-* 'favor', etc. Walde-P. 1.19. Pedersen 1.314.

W. *mynnu*, Br. *mennout* (beside *menna* 'propose, think, intend'), also W. *dymuno* 'desire' : Ir. *do-muinur* 'believe', Lat. *meminī* 'remember', *monēre* 'warn', Skt. *man-* 'think'. IE **men-*. Walde-P. 2.264 f. Pedersen 2.451, 581 f.

5. Goth. *wiljan*, etc., general Gmc., above, 1.

ON *æskja*, Dan. *ønske*, Sw. *önska*, OE *wȳscan*, ME *wisshe*, NE *wish*, Du. *wenschen*, OHG *wunscen*, MHG, NHG *wünschen*, fr. the sbs. ON *ōsk*, OE *wȳsc*, OHG *wunsc*, etc. : Skt. *vāñch-* 'desire, wish', sb. *vāñchā-*, all fr. an extension of IE **wen-* in Skt. *van-* 'seek, desire, gain', Lat. *venus* 'charm' (and *Venus*), OHG *wunna* 'joy, bliss', Goth. *wēns* 'hope', etc. Walde-P. 1.260. Falk-Torp 1420.

NE *want*, orig. 'be lacking, lack', hence 'need' and now a common colloq. equivalent of *wish*. NED s.v. *want*, vb. 5.

6. Lith. *norėti* : ChSl. *nravŭ* 'virtue, custom', Russ. *norov* 'habit', Grk. νωρεῖ· ἐνεργεῖ (Hesych.). Walde-P. 2.333.

Lith. *linkėti* (mostly in phrases like 'wish you joy', cf. NSB s.v.) : *linkti* 'bow', *lenkti* 'bend', ChSl. *sŭ-lęką*, *-lęšti* 'bend together', etc. Walde-P. 2.435. 'Wish' fr. 'incline toward'.

Lett. *gribēt*, beside sb. *gribe* 'will, wish', orig. 'grasp after' : *greibt*, Lith. *griebti* 'grasp after, seize', Goth. *greipan*, OE *gripan*, etc. 'seize, grasp'. Walde-P. 1.647. Mühl.-Endz. 1.653 f.

7. ChSl. *chotěti*, Russ. *chotet'*, beside ChSl. *chŭtěti*, Russ. dial. *chtět'*, SCr. *htjeti*, Boh. *chtíti*, Pol. *chcieć*, etym. much disputed and still dub. Berneker 398 f. Brückner 177.

8. Skt. *vaç-*, Av. *vas-* : Grk. ἑκών 'willing', etc. Walde-P. 1.224 f. Barth. 1381 f.

Skt. *iṣ-* (3sg. *icchati*), Av. *iš-* 'seek, strive for, desire, wish' : OE *āscian*, *āxian* 'ask, ask for, demand', OHG *eiscōn* 'seek out, ask, demand', etc. (18.31, 18.35). Walde-P. 1.12.

Words expressing some degree of 'desire' are so numerous that in the case of some languages the choice of the most important is difficult. Even among those listed (the vbs.; most of the sbs. for 'desire, longing', etc. are derived from them, or conversely) there is considerable difference in feeling. Some are stronger than others, 'desire eagerly, long for'. Most of them are used in both the good and the bad sense, but the latter may become dominant (as definitely in NE *covet*, *lust*). In some, 'desire' is used also for a polite 'request, demand' (the latter now dominant in NHG *verlangen*). Several are more or less literary, and nearly everywhere in common speech one would substitute for a mild 'desire' the words for 'wish' (NE *want*) or locutions like NE *I should like*, Fr. *je voudrais*, NHG *ich möchte*, etc.

The words for 'desire' are related to others denoting mental and physical agitation, also 'rejoice', 'seek', 'expect', and such physical notions as 'thirst', 'hunger' (as, in general, words for 'thirst' and 'hunger' may be used figuratively), 'cry for', etc. In several cases 'lack, need' is the source, or an intermediate stage in the development, of 'desire' (like NE colloq. *want* 'desire, wish').

1. Grk. ἐπιθῡμέω, lit. 'set one's heart on', fr. θῡμός 'spirit, etc.' (16.11).

Grk. ποθέω, ἐπιποθέω, fr. πόθος 'longing, yearning', also 'regret' (for something lost or absent) : θέσσασθαι 'beseech, pray for', Ir. *guidim* 'pray, ask', Lith. *gedauti* 'long for, desire', ChSl. *žędati* 'thirst, desire', etc. (below, 6), Av., OPers. *ǰad-* 'beseech, pray for or to'. Walde-P. 1.673.

2. Lat. *cupere* and *cupīre*, 1sg. *cupiō*, prob. through 'be agitated' : Skt. *kup-* 'become agitated, grow angry', ChSl. *kypěti* 'boil', Lett. *kūpēt* 'smoke, steam', etc. Walde-P. 1.379 f. Ernout-M. 244. Walde-H. 1.312.

Lat. *dē-sīderāre* (> It. *desiderare*, Fr. *désirer*) 'lack, miss, desire', beside *cōnsīderāre* 'observe closely, consider', both fr. *sīdus*, mostly pl. *sīdera* 'stars (in a constellation), heavenly bodies (including the sun and moon)'. The semantic development is obvious in *consīderāre* ('consult the stars'; cf. *contemplārī* 'observe, consider' fr. *templum* 'place of augury'), while for *dēsīderāre* the precise stages are uncertain, but certainly through 'lack, miss' (> 'desire', not conversely). Ernout-M. 938. Walde-H. 1.263.

It. *bramare* (= Sp. *bramar*, Fr. *bramer* 'bellow', OFr. also 'cry', Prov. also 'desire'), fr. a Gmc. **brammōn* 'bellow' (: MLG *brammen*), semantic development through 'cry for' (food, etc.). REW 1270. Wartburg 1.494 ff.

Fr. *souhaiter*, cpd. of OFr. *haitier* 'make well disposed', fr. sb. *hait* 'good disposition, joy', this fr. a Gmc. form belonging with OHG *heit* 'manner' *heitar* 'bright, clear', etc. Bloch 2.287. Gamillscheg 811 (somewhat otherwise).

Sp. *desear*, fr. sb. *deseo* = It. *desío*, *disío*, fr. Lat. *dēsidia*, deriv. of *dēsīdēre* 'sit idle', hence 'indolence' but also applied to other faults such as 'license, lust' (so prob. Plautus, Bacch. 1083, Trin. 650; cf. gl. *libido amor desidens*; see also Thes. s.v. p. 711, ll. 39 ff.); sense development 'indolence' > 'lust' > 'desire'. REW 2590. J. Corominas, Anales del instituto de Linguistica 2.128 ff.

Rum. *dori*, deriv. of *dor* '(mental) pain, suffering, longing', fr. VLat. **dolus*, for *dolor* (16.31). Tiktin 565.

3. Ir. 3sg. *adcobra* (with sb. *accobor* 'desire'), perh. (fr. **ad-com-bher-*) : *topur* (**to-od-bher-*) 'spring', Skt. *bhur-* 'move convulsively, quiver', Grk. πορφύρω 'swell, surge' (cf. Lat. *cupere*, above 2). Pedersen 2.478, 675.

NIr. *mianaim* or *mianuighim*, fr. *mian* 'desire' : W. *mwyn* 'enjoyment, use', prob. fr. the root in OHG *meinen*, OE *mǣnan* 'have in mind, intend', Ir. *domoiniur* 'believe', etc. Walde-P. 2.302. Loth, RC 41.398.

Ir. *dūilighim*, fr. sb. *dūil* 'desire' (used also in phrases like 'it is my desire' = 'I desire'), through the notion of 'agitation' fr. the same root as Skt. *dhūli-* 'dust', Grk. θῡμός 'spirit', etc. (16.11). Walde-P. 1.836. Stokes 153. Pedersen 1.111.

W. *dymuno* : *mynnu* 'will, wish', etc. (16.61).

W. *chwantu*, Br. *c'hoantaat*, fr. sbs. W. *chwant* 'desire, appetite, lust', Br. *c'hoant* 'desire', perh. : Arm. *xand* 'desire', Grk. χάτις 'need', etc. Walde-P. 2.517. Pedersen 1.24, 139. But cf. also Loth, RC 45.182.

'Hope' is 'wishful expectation', and in the majority of the words 'hope' comes from, or at least through the medium of, either 'expectation' or 'wish'. A few of these are also used for simple 'expectation' (even of evil), as, conversely, words for 'expectation' may in certain contexts have the feeling of 'hope', e.g. NHG *erwartung*, especially in *erwartungsvoll* 'full of hope'.

1. Grk. ἐλπίς (NG pop. ἐλπίδα), with vb. ἐλπίζω 'hope', Hom. ἔλπω 'make hope', ἔλπομαι 'hope' : Lat. *volup* 'gladly', *voluptās* 'pleasure', fr. an extension of the root *wel- in Lat. *velle* 'wish, will', etc. (16.61). Walde-P. 1.295. Boisacq 246.

2. Lat. *spēs* (OLat. pl. *spērēs*) with vb. *spērāre* (> It. *sperare*, Fr. *espérer*, Sp. *esperar*, whence derivs. It. *speranza* > Rum. *speranţa*, Fr. *espoir*, *espérance*, Sp. *esperanza*), prob. through 'success, confidence' : ChSl. *spěti* 'prosper, succeed', Lith. *spėti* 'have leisure, be fast enough', OE *spōwan* 'prosper, succeed', Skt. *sphāy-* 'grow fat, grow'. W.	*diolch*	MHG	*danc*		
Br.	*trugarez*	NHG	*dank*		

Words that express the feeling of 'thankfulness, gratitude' are either the same as, or more often derived from, those for 'thanks' (e.g. through the adjs., NE *thank-ful-ness*, NHG *dank-bar-keit*, etc.), which are therefore preferred in the list and discussion. This heading is intended as = NE *thanks* in *give thanks*, etc. (sg. *thank* obs., and in several of the other languages the pl. obligatory or usual in this sense); not as = *thanks!* and similar polite expressions, which, though of the same group, with some exceptions (e.g. Lith. *ačiū*, fr. the sound of a sneeze = 'good luck, God bless you'; Russ. *spasibo* : *spasat'* 'save, spare'), are not always identical with the forms listed (e.g. Fr. *merci*).

The words are cognate with others for 'joy, pleasure, praise, favor, recognition',

with good-will greetings (Rum.); and the Gmc. group was orig. 'thought' (> 'thoughtfulness' > 'thanks'). Or a verb for 'say' or the like may be specialized to 'say thanks, give thanks' (cf. under Ir. and Lett., below).

1. Grk. χάρις 'favor, grace' and esp. 'thanks' (Hom.+) : χαρά 'joy', χαίρω 'rejoice', etc. (16.22). Hence εὐχαριστέω usual vb. for 'thank' in LXX, NT, etc. (earlier χάρις with vbs.), as reg. in NG (where the sb. is used mostly in other senses or in phrases 'thanks to, for the sake of'); also εὐχαριστία 'giving of thanks, thankfulness' (so NG, but εὐχαρίστησις is 'satisfaction, pleasure').

2. Lat. *grātia* 'favor, kindness' and (mostly pl.) *grātiae* 'thanks' (> It. *grazie*, Fr. *grâces*, Sp. *gracias*), beside adj. *grātus* 'pleasing' and 'thankful', prob. (cf. Osc. *brateis* 'gratiae') : Skt. *gūrta-* 'welcome, agreeable', *gṛ-* 'praise' (3sg. *gṛṇāti*), Lith. *girti* 'praise', etc. Walde-P. 1.686. Ernout-M. 432 f. Walde-H. 1.619 f.

Fr. *remercîments*, fr. vb. *remercier*, OFr. *mercier* 'thank', fr. *merci* 'favor, kindness' (> ME, NE *mercy*), now 'thanks!', fr. Lat. *mercēs* 'wages, price', whence in eccl. language 'reward, favor'. REW 5517. Gamillscheg 607, 753.

Rum. *mulţumire*, fr. vb. *mulţumi* 'thank', this fr. the greeting *mulţĭ anĭ* 'many years' (like NG ἔτη πολλά). Tiktin 1019.

3. Ir. *buide*, NIr. *buidhe* or *buidheachas* (fr. adj. *buidheach* 'thankful') : W. *bodd* 'will, good will, pleasure', *boddhau* 'please' (16.21), etc.

For vb. 'thank' Ir. *atluchur* (with or without *buide*), cpd. *ad-tluch-* : *do-tluchur* 'ask for', perh. ChSl. *tlŭkŭ*, Russ. *tolk* 'meaning, sense'. Walde-P. 1.744. Pedersen 1.43, 2.650.

W. *diolch*, older *diolwch*, cpd. of *golwch* 'worship, prayer', cf. also *adolwch* 'entreaty', root connection? Pedersen 2.650.

Br. *trugarez* 'pity' (16.35), used also for 'thanks' under influence of Fr. *merci*.

4. Goth. *þank* (once, acc. sg.), OE *þanc*, OHG *danc*, etc., general Gmc., orig. 'thought' (as, beside 'thanks', in OE, OHG) : Goth. *þagkjan*, OE *þencan*, OHG *denken*, etc. 'think' (17.14). Walde-P. 1.744. Falk-Torp 1242.

Goth. *awiliuþ* (for χάρις and εὐχαριστία), with vb. *awiliudōn* (reg. for 'thank', once also 'praise'), cpd. *awi-liud-*, first part : Skt. *av-* 'favor', Lat. *avēre* 'desire eagerly', etc., second part : OE *lēoþ*, OHG *liod* 'song'. Walde-P. 1.19, 2.406. Feist 51.

5. Lith. *padėka*, less commonly *dėka*, through Slavic fr. Gmc., cf. Boh. *dík*, below, 6.

Lett. *pateikšana*, fr. *pateikti* 'say, relate' and esp. 'thank', cpd. of *teikt* 'say' (18.22). Mühl.-Endz. 3.120, 4.156 f.

6. ChSl. *blagodětĭ*, *blagodatĭ* (reg. for χάρις in Gospels), SCr. *blagodjet*, *blagodat* (mostly biblical), cpd. of *blagŭ* 'good' (influence of Grk. εὐ- in εὐχαριστέω) and *dětĭ : ChSl. *děti* 'place, put', Grk. τίθημι, etc. Berneker 178. Similarly Russ. *blagodarnost'* ('thankfulness' and 'thanks'; SCr. *blagodarnost* 'thankfulness'), *blagodarenie*, fr. vb. *blagodarit'*, late ChSl. *blagodariti*, cpd. of *dariti* 'give'.

ChSl. *chvala* (in Gospels freq. for χάρις, but also for αἶνος 'praise'), SCr. *hvala*, both also and general Slavic 'praise' (16.79), use as 'thanks' prob. secondary. K. Meyer, Donum nat. Schrijnen 408 ff.

Boh. *dík* (mostly in pl. *díky*), earlier *děk*, *diek* (> Pol. *dzieka* > Ukr. *djaka*, Lith. *dėka*; Pol. now usually *dzięki* pl.), fr. OHG, MHG *danc* (above, 4). Berneker 193 f. Brückner 112.

Words for 'faithful' are most commonly connected with vbs. for 'trust' or 'believe', or with adjs. for 'true' (in the current sense of NE *true*, 16.66). The Gmc. group rests ultimately on the notion of 'sound, steadfast', or the like. Certain words for 'loyal', orig. 'conforming to the law', have come to be equivalent to 'faithful' in many phrases (cf. NE *loyal friend* = *faithful friend*).

1. Grk. πιστός, beside πίστις 'faith, belief' : πείθω 'persuade', mid. 'trust, obey, believe', Lat. *fīdere* 'trust', *fīdus*, *fidēlis* 'faithful', *fidēs* 'faith, belief', further connections dub. Walde-P. 2.139. Ernout-M. 356 ff. Walde-H. 1.493 ff.

'True' is intended here, not as 'faithful, trustworthy' or 'real, genuine', but as 'consistent with fact', that is, in that sense of NE *true* which prevails in the sb. *truth* as the opposite of *lie*. The sbs. for 'truth' are most commonly derived from the adjs. for 'true', hence the latter are generally preferred in the list. But in some cases the opposite relation holds. Furthermore, in several languages the substantival is preferred to the adj. expression, that is, 'it is true' is expressed as 'it is the truth', while the adj. derivs. are used more in the sense of 'truthful', or 'real, genuine'. So NG ἀλήθεια, Sp. *verdad*, Russ. *pravda*, and frequently elsewhere. Hence the sb. forms instead of adjs. are in part entered in the list.

It is worthy of note that there are no primary vbs. for 'speak the truth' (usually a phrase, sometimes a denom.) in contrast to those for 'lie'.

Apart from an inherited group, the words are based on such notions as 'not escaping notice', 'existing, actual', 'straight, upright, just', and 'faithful'.

For this and the following group, cf. H. Frisk, "Wahrheit" und "Lüge" in den indogermanischen Sprachen (Göteborgs Högskolas Årsskrift 1935.3).

Fr. *vrai*, prob. fr. *veratius* (Merov.), i.e. *vērācius* comp. of *vērāx* 'truthful'. REW 9216a. Otherwize (*vēraius fr. *vērārius*, like *primārius* for *primus*) Gamillscheg 898.

Sp. *verdad* (sb., usual expression), fr. Lat. *vēritas* (above, 1).

Rum. *adevăr* (sb., formerly also adj., orig. adv.), fr. adv. phrase *ad-ad-vērum* (cf. It. *davvero* 'truly'). Hence, through vb., *adevărat* 'true'. REW 9262. Pușçariu 24.

4. Celtic words, above, 1.

5. Goth. *sunja* sb. (for ἀλήθεια, and prob. also sb. not fem. adj. when used for ἀληθής Jn. 8.14, 17, Jn. 10.41; also adj. *sunjeins*), adj. (in part also sb.) ON *sannr*, Dan. *sand*, Sw. *sann*, OE *sōð*, deriv. *sōðlic*, ME (NE arch.) *sooth* : Skt. *satya-*, Grk. ἐτεός 'true', all orig. 'existing, actual', fr. pple. forms of IE *es- 'be, exist'. Walde-P. 1.160 f. Feist 459. Falk-Torp 950.

ME *trewe*, NE *true*, fr. OE *trēowe* 'faithful' (16.65).

OHG *wār*, etc., above, 1.

6. Lith. *teisingas* (also 'right, just'; with sbs. *teisa*, *teisybė* 'truth'), Lett. *patiess* : Lith. *teisus* 'right, just', *tiesus* 'straight', Lett. *taisns* 'straight, just' (12.73, 16.73).

Lith. *tikras* is 'true' rather in the sense of 'real, sure, certain' (17.37).

7. ChSl., SCr. sb. *istina* (Russ. less common than *pravda*; Boh. *jistina* through 'reality' to 'capital'), whence adjs. ChSl. *istinĭnŭ* (usual form in Gospels), *istovŭ*, SCr. *istinit* (Russ. *istinnyj* in NT, but in current use 'true' = 'real, genuine'), fr. ChSl. *istŭ*, Russ. *istyj*, etc. 'real, actual', prob. fr. *iz-sto-, cpd. of *iz* (ChSl. *izŭ*) 'out' and *-sto-* : IE *stā- 'stand', like *pro-stŭ* 'straight, simple', etc. (Walde-P. 2.604). Berneker 435 f. Otherwise (fr. *es- 'be', Slav. *jes-*) Miklosich 185, Brückner 436.

ChSl. *rěsnota* sb. (later than *istina*; cf. Jagić, Entstehungsgesch. 352), with adj. *rěsnotivŭ* : Lith. *reikšti*, pres. *reiškiu* 'reveal, mean', *raiškus* 'evident'. Trautmann 242.

Boh., Russ. *pravda*, Pol. *prawda*, sbs. = ChSl. *pravĭda* 'right, justice', fr. *pravŭ* 'straight' (12.73). Hence adjs. Boh. *pravidívý*, Pol. *prawdziwy*, Russ. *pravdivyj*, but these esp. 'truthful' or 'real, genuine', while 'true' in sense here intended is expressed by a phrase with the sb.

8. Skt. *satya-* (adj. and neut. sb.), Av. *haiθya-*, OPers. *hašiya-* : Goth. *sunja* 'truth', etc. (above, 5).

The opposite of 'true' may be expressed by negative compounds, e.g. OE *un-sōþ*, NE *un-true*, NHG *un-wahr*, Ir. *neb-fīr*, Lith. *ne-teisingas*, Skt. *a-satya-*; by Lat. *falsus* (pple. of *fallere* 'deceive') and its Romance and Gmc. derivs. (also opp. to 'faithful'); by OE *lēas*, also and more orig. 'destitute of, void' (: Goth. *laus* 'empty, vain', *fraliusan* 'lose', etc., 11.33). Similarly, the opposite of 'truth' may be expressed as 'untruth' or 'falsehood'. But in nearly all the IE languages there are distinctive downright terms for a 'lie', with corresponding verbs.

There is a notable agreement between Gmc. and Slavic in the words for 'lie', an inherited group for which it is impossible to determine any remoter underlying notion. 'Lie' and 'deceit' are sometimes expressed by the same or cognate terms. 'Lie' may evolve from milder notions, such as 'defect, error', or 'harm'. Several of the words are of obscure origin.

1. Grk. ψεῦδος, also ψεῦσμα (rare), Byz., ψεῦμα, NG pop. ψέμα, beside ψεύδω 'deceive', mid. 'lie', ψεύστης 'liar', ψευδής 'false', etc., etym. dub. Walde-P. 1.502. Boisacq 1075 f.

2. Lat. *mendācium*, with *mendāx* 'lying, false, liar', fr. *mendum*, *menda* '(physical) defect, error (in writing)', perh. : Ir. *mennar* 'spot', *mind* 'sign, mark', W. *man* 'place, spot, mark'. Walde-P. 2.270, Ernout-M. 605. Walde-H. 2.68 f.

Lat. vb. *mentīrī* 'lie' : *mēns*, *mentis* 'mind, intelligence, thought' (17.11), with semantic development perh. through 'say something thought up, invented' (cf. also the cognate OPruss. *mēntimai* 'we lie'). Walde-P. 2.270. Ernout-M. 606. Hence the sbs., Sp. *mentira* (fr. vb. *mentir*) and, through VLat. derivs. (*mentionia, *mentio), It. *menzogna*, OFr. *mensogne*, Fr. *mensonge* (influence of *songe* 'dream'), Rum. *minciună*. Walde-P. 2.270. Ernout-M. 606. Walde-H. 2.68. REW 5508–10.

It. *bugia*, fr. Prov. *bauzia* 'knavery, deceit', fr. *bauza* 'deceit', beside OFr. *boise* id., fr. the Gmc., cf. OHG *bosi*, etc. 'bad, evil' (16.72). REW 1006.

3. Ir. *brēc*, NIr. *brēag*, etym. dub.; perh. : Skt. *brança-* 'fall, destruction'. Walde-P. 2.204. Stokes 183.

Ir. *gāu* (also prefix *gu-* 'false-', cf. Laws, Gloss. 456), Br. *gaou*, Corn. *gow* (both also adj. 'false', as W. *gau*), etym. dub. Walde-P. 1.530. Thurneysen IF 21.179. Stokes 108.

The principal words for 'deceit' (many others not mentioned here include this notion), with the corresponding vbs. for 'deceive', are from the most diverse sources. 'Wisdom' may degenerate through 'cunning' to 'deceit'. In several cases 'deceive' comes from 'laugh at, mock, make fun of' or the like. Other connections are with vbs. for 'injure, harm, hinder', 'catch', 'anticipate' ('get the better of'), 'bend' ('deviate'), etc.

1. Grk. ἀπάτη, etym.? Walde-P. 2.27. Boisacq 67.

Grk. δόλος (in Hom. 'bait, lure, wile'), Lat. *dolus* (> Sp. *dolo*), also Osc. *dolom*, *dolud*, 'dolum, dolo', perh. (and generally so taken) : ON *tāl* 'deceit, device', etc. But there is some probability that the Italic word is borrowed from the Greek; and in the Gmc. group the sense of 'deceit' or 'slander, blame' seems to be secondary and explainable on an internal Gmc. basis (see below, 4). Ernout-M. 280 f. Walde-H. 1.366 f.

NG (beside ἀπάτη, δόλος, mostly lit.) γέλασμα, fr. γελῶ 'laugh' and 'deceive, cheat' (τὸν ἐγέλασε, etc.; cf. 16.25).

2. Lat. *fraus*, *fraudis* 'injury, harm, crime', then esp. 'deceit, fraud' (> It. *frode*, Fr., Sp. *fraude* 'fraud' mostly in legal sense; OFr. > ME *fraude*, NE *fraud* in less restricted use but also omitted in the list) : Skt. *dhvṛ-* 'injure', *dhruti-* 'deception', and ultimately (*dhreu-gh-) Skt. *druh-* 'injure', Av. *druj-* 'lie, deceit', OHG *triogan* 'deceive', etc. (below, 4). Walde-P. 1.869 f., 874. Walde-H. 1.543.

It. *inganno*, Sp. *engaño*, fr. It. *ingannare*, Sp. *engañar* 'deceive' = Rum. *îngîna* 'imitate, mock', fr. VLat. *ingannāre, *gannāre* attested in glosses in sense of 'laugh at, mock', fr. Lat. *gannīre* 'bark, growl' (of animals and persons), late 'chatter', etc. 'Deceive' fr. 'laugh at, mock' as in NG (above, 1). REW 4406. Densusianu 191 f.

Fr. *déception*, fr. late Lat. *dēceptiō*, deriv. of *dēcipere* 'catch, ensnare, beguile, deceive' (> Fr. *décevoir*), cpd. of *capere* 'take, seize'.

Fr. *tromperie*, fr. *tromper* 'deceive', OFr. and dial. 'blow in a horn', then refl. 'make merry over', deriv. of *trompe* 'trumpet, horn'. REW 8952. Gamillscheg 869.

Rum. înşelăciune, înşelătorie, fr. înşela 'deceive' = înşela 'saddle'. This use influenced by SCr. nasamariti 'play a joke on', deriv. of samar 'pack-saddle'. Skok, Arch. sl. Ph. 37.84.

Rum. amăgire, fr. amăgi 'deceive, delude', prob. (with prefix a- fr. ad-) fr. Grk. μαγεύω 'bewitch'. Tiktin 55.

3. Ir. togāis, vbl. n. of do-gāithim 'deceive' : gāith 'wise', gāes 'wisdom'. Cf. development in Lat. mentīre 'lie' (16.67). Pedersen 2.19, 412. Thurneysen, Gram. 446.

Ir. celg, NIr. cealg : Arm. kełck' 'hypocrisy', OE hylc 'bend, turn', Pol. czołgać 'creep, crawl'. Walde-P. 1.447. Pedersen 1.106.

Ir. fell, NIr. feall, prob. : Lith. ap-, pri-vilti 'deceive', Lett. vilt id., etc. (cf. Lett. vilšana, below, 5). Walde-P. 1.298.

Ir. meng 'guile, deceit' (RIA Contrib. s.v.), prob. : Grk. μαγγανεία 'trickery', etc., Osset. mäng 'deceit', Toch. A mank 'fault'. Walde-P. 2.223. K. Schneider, KZ 66.253.

W. twyll, Br. touellerez, toellerez, beside vbs. W. twyllo, Br. touella, Corn. tulle 'deceive', etym.? Henry 267. Loth, RC 36.393 (vs. Morris Jones 182).

4. Goth. afmarzeins (ἀπάτη), fr. afmarzjan, marzjan 'σκανδαλίζω, offend' : OE mierran 'hinder', OHG merren 'hinder, vex', MHG marren 'delay', outside connections dub. Feist 347. Walde-P. 2.279.

Goth. liutei (δόλος, also ὑπόκρισις 'hypocrisy'), OE lot : Goth. liuts 'hypocritical', OE lytig 'deceitful', ON ljōtr 'ugly', perh. fr. the root in OE lūtan, ON lūta 'bow, stoop, fall', etc.; cf. also ChSl. ludŭ 'foolish', Russ. ludit' 'deceive', Lith. liusti 'be sad', liudnas 'sad'. Feist 335. Walde-P. 2.416.

Goth. lists (μεθοδεία 'wile') = ON, OE OS, OHG list 'wisdom, art, artifice, cunning', whence with development of a bad connotation Du., NHG list 'cunning, craft, guile' and for 'deceit', esp. NHG hinterlist (cf. Paul, Deutsches Wtb. s.v.), fr. the root of Goth. lais (pret. pres.) 'know', laisjan, OHG lēren, OE lǣran 'teach', etc. Feist 331 f. Walde-P. 2.404 f.

'Forgive' has an emotional value and in a few cases an emotional background of sympathy or the like. But the majority of the words are based on prosaic notions, many being derivatives of words for 'give' (hence 'remit' a debt, etc.) or words for 'let go, release'.

Words for 'free from blame, excuse', like It. scusare, Fr. excuser, NE excuse, NHG entschuldigen, are often virtually 'forgive'.

1. Grk. συγγιγνώσκω, cpd. of συν- 'with' and γιγνώσκω 'know', so orig. 'agree with', hence 'have sympathy with, excuse, forgive' (the usual class. word; not in NT; NG sb. συγγνώμη as polite term for 'pardon!').

Grk. ἀφίημι 'let go, release' (11.34), sometimes 'remit' a charge or debt, in NT also the usual word for 'forgive'.

Grk. χαρίζομαι 'do a favor, grant' (fr. χάρις 16.64), in NT also sometimes 'forgive'.

Grk. συγχωρέω (: χῶρος 'place' 12.11), sometimes 'come together, meet' but mostly 'give way, yield, assent to, agree', hence NG 'forgive'.

NG συμπαθῶ 'sympathize with', in polite phrases 'excuse, forgive'.

2. Lat. ignōscere, cpd. of in- prob. = prep. in and (g)nōscere 'know', with development through 'recognize one's attitude', hence 'have sympathy with, excuse, forgive', the last stage as in Grk. συγγιγνώσκω. Ernout-M. 474. Walde-H. 1.677. The old view neg. in-, with development through 'ignore, overlook', is still not impossible. Specht, KZ 69.124 ff.

Lat. dīmittere 'let go, release, renounce' and remittere 'return, release', both in late Lat. also 'forgive' (e.g. dī- in Itala, re- in Vulgate).

Late Lat. perdōnāre (> It. perdonare, Fr. pardonner, Sp. perdonar), cpd. of dōnāre 'give'. REW 6405. Gamillscheg 670.

Rum. ierta, fr. late Lat. lībertāre (cf. Arch. lat. Lex. 8.450) 'set free'. REW 5014.

3. Ir. maithim, fr. W. maddeu 'let go' and 'forgive', this prob. (through 'make or consider worthless, abolish'?) : Ir. in made 'in vain', maidim 'break in pieces', etc. Walde-P. 2.231 f. Pedersen 1.110.

Br. pardoni, fr. Fr. pardonner.

Br. trugarezi, deriv. of trugarez 'pity' (16.35).

4. Goth. aflētan (reg. for ἀφίημι in all senses, including 'forgive'; also fralētan), OHG furlāzen (Tat., etc.), bilāzen (Otfr., etc.), cpds. of Goth. lētan, etc. 'leave, let' (12.18).

Goth. fragiban (mostly 'give, grant', but also for χαρίζομαι as 'forgive'), ON fyrirgefa, OE forgiefan, ME, NE forgive, Du. vergeven, OHG fargeben, MHG, NHG vergeben, but Dan. tilgive, Sw. tillgiva (after MLG togeven = NHG zugeben; Falk-Torp 1260), cpds. of Goth. giban, etc. 'give'.

ON miskunna, cpd. of mis- and kunna 'know', with development through 'ignore, overlook'. Specht, KZ 69.124 f.

'Good' is understood as the most generic adjective of approval, by no means restricted to moral qualities. All the words were doubtless more specific originally, and among those the etymology of which is clear we note as sources such as 'fitting', 'straight, right', 'beautiful', 'orderly', etc.

Certain important prefixes for 'good-, well-' are listed. A more comprehensive treatment would include also the advs., which may belong with the common adjs. (e.g. Lat. bene : bonus) or be quite unrelated (e.g. NE well, NHG wohl, etc., general Gmc.), and the comps. and superls. For the adjs. for 'good' and 'bad' are among those in which irregular (supplementary) comparison is most widespread (e.g. Lat. bonus, melior, optimus, NE good, better, best, etc. general Gmc.).

1. Prefix IE *su-, Walde-P. 2.512. Pedersen 2.9.

Skt. su-, Av. hu-; Grk. ὑ- in ὑγιής 'in

good health'; Gall. Su- in proper names, Ir. so-, W. hy-. For traces in Balto-Slavic, cf. Fraenkel, Mélanges Pedersen 443 ff.

Grk. εὐ-, the semantic equivalent (εὐ- related to δυσ- precisely as Skt. su- to dus-), beside Hom. ἐύς, ἠύς 'good, brave', prob. : Hitt. assus 'good' fr. IE *es- 'be'. Friedrich, IF 41.370 f.

2. Grk. ἀγαθός, etym. disputed, perh. : ἀγα- 'very', ἄγαμαι 'admire', etc. Boisacq 4 f.

Grk. καλός, mostly 'beautiful' (16.81), but often also 'good', and so reg. in NG, where ἀγαθός is less common.

3. Lat. bonus (> Romance words), OLat. duenos, duonus, etym. dub. Walde-P. 1.778. Ernout-M. 114. Walde-H. 1.111.

4. Ir. maith, W. mad, Br. mat, Corn. mas (cf. Gall. Teutomatos), prob. : Lat. Mātūta 'Goddess of morning', mātūrus 'seasonable, early', māne 'morning', OLat. mānus 'good'. Walde-P. 2.220 f. Ernout-M. 588. Walde-H. 2.54.

Ir. dag-, deg-, NIr. deagh-, W. da (Br. da in phrases da eo d'in 'je veux bien'), Gall. Dago-vassus, etym. dub. Walde-P. 1.784. Pedersen 1.39.

5. Goth. gōds, ON gōðr, OE gōd, etc., general Gmc. : OHG gigat 'fitting', MLG gaden 'fit, please', OE geador 'together', etc., ChSl. godŭ '(proper) time', u-goditi 'please', etc. Walde-P. 1.532. Feist 218. Falk-Torp 336.

Goth. þiuþ neut. (renders τὸ ἀγαθόν), whence also þiuþeigs (freq. for ἀγαθός) : ON þȳðr 'kind', OE geþīede 'good, virtuous', perh. fr. the root in Lat. tuērī 'regard, protect', tūtus 'safe', etc. Walde-P. 1.705 f. Feist 498. Falk-Torp 1306.

Goth. sēls 'good, kind' (ἀγαθός, χρηστός), with sb. sēlei : OE gesǣlig 'blessed, happy', etc., outside connections disputed (16.24).

6. Lith. geras : girti 'praise', Skt. gṛ- 'sing, praise', etc. (16.79). Walde-P. 1.686. Buga, Kalba ir Senovė 168.

Lith. labas (usual only in greetings, as labas rytas, laba diena 'good morning, good day'), Lett. labs, OPruss. labs : Lith. lobis 'possessions, riches', lobti 'get rich', Skt. labh- 'seize, grasp'. Walde-P. 2.385.

7. ChSl. dobrŭ, etc., general Slavic (Russ. dobryj now in phrases like 'good day', but mostly 'kind') : po-doba jestŭ 'it is becoming', po-dobiti 'make fitting', Goth. ga-daban 'happen', OE ge-dafen 'becoming', etc. Berneker 203–5. Walde-P. 1.824 f.

ChSl. blagŭ (reg. for ἀγαθός and χρηστός 'good' in moral sense, cf. Jagić, Entstehungsgesch. 326), in modern Slavic mostly 'gentle, blessed, noble', etc., never general for 'good', etym. dub. Walde-P. 2.182. Berneker 69.

Russ. chorošij (has displaced dobryj as the common word for 'good'), orig. 'orderly, neat', hypocoristic formation fr. ORuss. choronenŭ, pple. of choroniti 'put in order' : ChSl. chraniti 'guard, keep'. Berneker 397. Jagić, Arch. sl. Ph. 6.282 ff.

8. Skt. sādhu-, orig. 'straight, right, ready', fr. sādh- 'reach one's goal, accomplish, guide aright, etc.'. Walde-P. 2.450.

Skt. bhadra-, also 'blessed, auspicious, fair', prob. : Goth. batiza 'better', batists 'best'. Walde-P. 2.151 f. Falk-Torp 67.

Skt. vasu- (Vedic in this sense; later mostly as neut. sb. 'goods, wealth'), Av. vaṅhu-, vohu- (OPers. only in proper names, as Dāraya-vauš, Vau-misa) : Gall. -vesus (in Bello-, Sigo-vesus, etc.), Gmc. Wisu-rīh, -mār, Wisi-Gothae, etc., Ir. feib 'excellence' (dat. sg.), W. gwych 'fine, splendid, gay', etc. Walde-P. 1.310.

OPers. naiba (clearly 'good' in the

Daiva inscr. 43, and so, rather than 'beautiful', elsewhere) : Ir. nōib 'holy', prob. (*noi-bho-) fr. the root seen in Ir. niam 'brilliance', Lat. nitēre 'shine, glitter'. Walde-P. 2.321.

For the numerous other Indo-Iranian words that may be used for 'good' (and 'bad'), cf. Schwyzer, Die altindischen und altiranischen Wörter für gut und böse, Festgabe Kaegi 12 ff.

For 'bad' as the opposite of 'good' there are equally generic words in some of the IE languages, but in others a variety of terms partly differentiated in feeling and according to the object qualified, so that it may be difficult to say which is the more nearly generic. Some are mainly 'evil, wicked' in the moral sense.

An adj. denoting any undesirable quality, physical or mental, any opprobrious epithet, may easily be generalized to 'bad'. Thus, either in earlier attested meanings or in cognates, 'disgusting, ugly, defective, faulty, weak, timid, worthless', etc. In some languages neg. cpds. of words for 'good' are in fairly common use.

The only agreement between different branches of IE is in a prefix for 'ill-, mis-', most common in Greek and Indo-Iranian. Even in the same branch there is vastly greater diversity than in the words for 'good'.

1. IE prefix *dus- 'ill-, mis-'. Walde-P. 1.816. Pedersen 2.9.

Grk. δυσ-, reg. opp. of εὐ-; Skt. dus- (duṣ-, duḥ-, dur-), Av. duš- (duž-), reg. opp. of su-, hu-; Gmc. tuz- in Goth. tuzwērjan, ON tor-tryggja 'mistrust, doubt', etc.; Ir. do- in do-cruth 'ugly' (vs. socruth), W dy- in dybryd 'sad'.

2. Grk. κακός, prob. a nursery word expressing disgust and to be connected with the terms for 'void excrement', Grk. κακκάω, Lat. cacāre, etc. Walde-P. 1.336. Boisacq 395 f.

3. Lat. malus (> It. malo, Sp. mal, malo; Fr. mal mostly sb. or adv.), etym. dub., perh. fr. the root in Ir. mellaim 'deceive', mell 'sin, fault', Lith. melas 'lie', Av. mairya- 'deceitful', etc.; or : OE smæl, OHG smal, etc. 'small'? Ernout-M. 583. Walde-H. 2.19 f.

It. cattivo, fr. Lat. captīvus 'prisoner, captive' through its moral application (cf. irae captivus, Seneca) in eccl. language to one 'captive of evil'; similarly Prov. caitiu 'captive' and 'bad', Fr. chétif 'wretched', etc. REW 1663. Gamillscheg 216. Wartburg 2.330 ff.

Fr. mauvais, fr. VLat. malefātius 'ill fated', cpd. of malus 'bad' and deriv. of ātum 'fate'. REW 5265a. Gamillscheg 601.

'Right' is understood here in its moral sense and in the adj. form.

Many of the words are used alike of things and persons, but in the latter context different forms (mostly not included in the list) may be preferred, e.g. NE *upright* or *just* (NE *right* formerly of persons in moral sense, but now obs.), NHG *gerecht* vs. *recht*, and so generally in Slavic. Many mean also, some primarily, 'right' in the legal sense. Several are also the usual terms for 'right' = 'correct'; but this notion is often expressed by differentiated forms (e.g. NHG *richtig*) or quite unrelated words (e.g. Grk. ἀληθής 'true' or ὀρθός 'straight', NG σωστός 'certain, correct', orig. 'safe'). Again, several have come to be used for the directional 'right' ('right hand', etc.), but the older terms for this were quite different (12.41).

The most common semantic source is 'straight'. Some meant originally 'in accordance with custom or law', or 'certain, true'.

1. Grk. δίκαιος (Hom. 'observant of custom', later 'right, just' in both moral and legal sense), fr. δίκη 'custom, right', later esp. 'lawsuit' (21.13).

2. Lat. *iūstus* (> It. *giusto*, Fr. *juste*, Sp. *justo;* Rum. *just* recent borrowing) 'right, just' in moral as well as legal sense : *iūs* 'right', esp. 'legal right, law' (21.11).

Lat. *rēctus* (> It. *retto*) 'straight' (12.73) also 'right', esp. sb. *rēctum.*

Rum. *drept* ('right' in all senses including moral, cf. *drept om* 'just man', etc.) fr. Lat. *dērēctus* for *dīrēctus* 'straight' (12.73). Other Romance derivs. of this form (or the neut. sb.), as It. *d(i)ritto*, Fr. *droit*, Sp. *derecho*, are mostly 'straight', or 'right' in other senses, or sbs. for 'right' esp. legal.

3. Ir. *cert*, NIr. *ceart*, fr. Lat. *certus* 'fixed, true, faithful' (cf. *amīcus certus* 'true friend', etc.). Pedersen 1.227. Vendryes, De hib. voc. 125 (with?).

Ir. *cōir*, W. *cywir* (these also 'correct, true'), cpd. of Ir. *co-*, W. *cy-* 'com-' and Ir. *fīr*, W., Br. *gwir* 'true' (16.66); whence also Ir. *fīriān*, Br. *gwirion* 'just' (both mostly of persons; W. *gwirion* 'innocent, foolish'), second part to following(?). Pedersen 1.64, 92. Thurneysen, Gram. 123, 569.

W. *iawn* and *cyf-iawn*, Br. *eeun*, etym. dub. (: Goth. *ibus* 'level'?). Pedersen 1.92. Henry 110. Thurneysen, Idg. Anz. 26.26.

4. Goth. *garaihts* (reg. for δίκαιος; *raihts* only for εὐθύς 'straight'), ON *rēttr*, OE *riht*, OHG *reht*, etc. general Gmc. (with numerous derivs. partly differentiated in use, but not added in list) : Lat. *rēctus* 'straight', etc. (12.73).

ME *iust*, NE *just*, fr. Fr. *juste* (above, 2), but mostly of narrower scope.

5. Lith. *teisus*, *teisingas* (also 'true'), Lett. *taisns* (also 'straight') : Lith. *tiesus* 'straight', etc. (12.73).

6. ChSl. *pravŭ* 'straight' (12.73), but

general Slavic 'right'. Hence sb. ChSl. *pravĭda* 'right' (SCr. id.; Boh., Pol., Russ. 'truth'), and fr. this ChSl. *pravĭdĭnŭ* (reg. for δίκαιος), SCr. *pravedan*, Boh. *spravedlivy*, Pol. *sprawiedliwy*, Russ. *spravedlivyj* (forms used esp. of 'just' persons).

7. Skt. *ṛta-* 'suitable, right', beside sb. *ṛta-m* = OPers. *arta-*, Av. *aša-* 'truth, right' in religious sense, whence Skt. *ṛtāvan-*, Av. *ašāvan-* 'just, righteous, holy', all fr. root in Grk. ἀραρίσκω 'fit', etc. Walde-P. 1.70.

Skt. *ṛju-* 'straight' (: Lat. *rēctus*, etc., 12.73), also 'right, just' = Av. *ərəzu-* 'straight, right', whence adv. *ərəš* 'rightly' (cf. also *arš-uxda-* 'rightly spoken'), and fr. this (at least in sense) *ərəšva-* 'just' and 'true' (perh. in form = Skt. *ṛṣva-* 'high'). Barth. 352, 355, 356.

Av. *rašnu-* 'just, righteous' but mostly sb. 'lord of justice', fr. *raz-* 'direct' : Lat. *regere* 'direct, rule' (same root as in preceding group). Barth. 1516 f.

OPers. *rāsta-* neut. sb. (NR a 59, b 7, 11), fr. the same root as the preceding and in form = Lat. *rēctum.*

16.74. Words for 'wrong' in moral sense as opposite of 'right' are not given in a formal list, since they are in large measure simply neg. cpds. of those for 'right' (or allied forms), e.g. Grk. ἄ-δικος, Lat. *in-iūstus*, OE *un-riht*, OHG *un-reht*, etc. Or else 'wrong' is expressed more colloquially by words for 'bad'.

But there are a few distinctive words in most of which 'wrong' comes from 'crooked' (12.74), just as 'right' often from 'straight'.

1. Lat. *prāvus* 'crooked', most commonly 'wrong, bad'.

2. It. *torto* (sb.; adj. *torto* only 'crooked'), Fr. *tort* (sb.), Sp. *tuerto* (sb., but now obs. in this sense), fr. Lat. *tortus* 'crooked'.

3. Late OE *wrang* (rare), ME *wrang*, *wrong* 'crooked' and 'wrong', NE *wrong*, fr. ON **wrangr*, *rangr* 'crooked, wrong' : OE *wringan* 'twist, press' (NE *wring*). NED s.v.

4. From Slavic *krivŭ* 'crooked' come as sbs. for 'wrong' SCr. *krivica* (also 'fault'), Boh. *křivda*, Pol. *krzywda*. Berneker 618.

5. OPers. *miθa-* (sb., NRb 7, 9) : Av. *miθō* 'falsely', *miθaoxta* 'falsely spoken', *maēθā-* change, vacillation', Skt. *mithu* 'falsely', *mith-* 'meet' (as friend or foe), Lat. *mūtāre* 'change', Goth. *maidjan* 'change, corrupt', all with basic notion of 'change', whence secondary moral notion. Cf. NHG *täuschen* 'deceive' beside *tauschen* 'exchange' Walde-P. 2.247 f.

Words for 'sin', although they are felt now as belonging chiefly to the terminology of religion (and so to Chap. 22), cover also an offense against morals, and in earlier periods denoted also (some even primarily) the milder 'fault' or 'mistake, error'.

1. Grk. ἁμαρτία, ἁμάρτημα 'failure, fault, error', then esp. ἁμαρτία 'sin' (Plat., Arist., esp. LXX, NT+), fr. ἁμαρτάνω 'miss the mark, fail, err, do wrong' (all these uses in Hom.), etym. dub. Boisacq 50.

In earlier times 'sin' would be expressed as a 'wrong' (ἀδικία, ἀδίκημα : ἄ-δικος 'wrong') or in religious sense as 'pollution' (μίασμα : μιαίνω 'stain, pollute'), 'impiety' (ἀσέβεια, ἀσέβημα : σέβομαι 'revere, worship'), etc.

2. Lat. *peccātum* 'fault, error', then 'sin' (> Romance and Celtic words), fr. *peccāre* 'make a mistake, err', perh. fr. **ped(i)cāre* 'stumble' : *pēs, pedis* 'foot', cf. *pedica* 'fetter, snare'. Walde-P. 2.24. Ernout-M. 745.

3. Ir. *peccad*, NIr. *peacadh*, W. *pechod*, Br. *pec'hed*, fr. Lat. *peccātum* (above). Pedersen 1.105.

Ir. *immarmus* (also *im(m)ormus*, etc.; cf. also MW *amryvys* 'erroneous, wrong'), vbl. n. of *imb-ro-mid-*, 3sg. *-imruimdethar* 'sins', cpd. of root in *midiur* 'judge'. Pedersen 2.579. Loth, RC 40.348, 350. Thurneysen, Gram. 70, 528.

Ir. *col*, W. *cwl*, see under 'fault' (16.76).

4. Goth. *frawaurhts*, OE (rare) *forwyrht*, OS *farwurht*, with adjs. Goth. *frawaurhts*, OS *farwarht*, OHG *farworaht* 'sinful', fr. Goth. *frawaurkjan*, etc. 'sin', cpd. of *waurkjan* 'work, do', with pejorative prefix *fra*, etc. Feist 166 f.

ON *synð*, *synd*, OE *syn(n)*, OHG *sunta*, etc., general Gmc. (except Goth.), etym. disputed, but prob. : Goth. *sunjis*, ON *sannr* 'true', Skt. *satya-* 'real, true', with semantic development fr. 'true, real' to '(the really) guilty'. Cf. ON *verða sannr at* 'be found guilty of' or *bera sannan at* 'find guilty of', and Lat. *sons, sontis* 'guilty'. So (since Grimm) Falk-Torp 1226, Weigand-H. 2.110, Ernout-M. 957. Otherwise and variously Walde-P. 2.514, Kluge-G. 606 (after E. Schroeder, KZ 56.106 ff.).

5. Lith. *griekas* (formerly the reg. word and so in biblical texts), Lett. *grēks*, OPruss. *grīka*, fr. the Slavic, cf. below.

Lith. *nuodėmė* (now favored as a native word vs. the loanword *griekas*), fr. *nusidėti* 'commit a sin', lit. 'lower oneself', refl. of *nudėti* 'put down', cpd. of *dėti* 'put'.

6. ChSl. *grěchŭ*, etc., general Slavic, with vb. ChSl. *grěšiti* 'sin', etc., etym. dub. Berneker 350 f. Brückner 161.

7. Skt. *pāpa-*, also general 'evil, harm', fr. adj. *pāpa-* 'bad, evil (16.72).

Skt. *pātaka-* (with cpds. *ati-*, *mahā-*, etc. for different gradations of sin), fr. caus. of *pat-* 'fly, descend, fall', hence 'what causes one to fall' (either from right conduct, or perh. orig. from one's caste).

Skt. *enas-*, Av. *aēnah-* 'evil deed, sin', orig. 'deed of violence', fr. Skt., Av. *in-*, in Skt. 'send forth, force, overcome', in Av. 'overcome, give pain to'. Barth. 21.

For numerous other Skt. words, cf. Jolly, Recht und Sitte 115.

Av. *šyaoθna-* 'deed', also esp. 'evil deed, sin'. Barth. 1712.

Av. *stara-*, *astara-*, fr. *star-*, esp. *ā-star-* 'commit a sin', etym. dub. Walde-P. 2.636, 641. Barth. 1597 f. (but OPers. *mā starava* is a false reading).

16.76 FAULT, GUILT

Grk.	*σφάλμα, αἰτία*	Goth.	*fairina*	Lith.	*kaltė*
NG	*σφάλμα, φταίσιμο, ἐνοχή*	ON	(*sǫk*)	Lett.	*vaina*
Lat.	*culpa, noxa*	Dan.	*skyld*	ChSl.	*vina*
It.	*colpa*	Sw.	*skuld*	SCr.	*krivica, krivnja*
Fr.	*faute*	OE	*scyld, gylt*	Boh.	*vina*

W.	*bai*	MHG	*schult*		
Br.	*fazi*	NHG	*schuld*		

Several of the words listed, as Lat. *culpa*, Fr. *faute*, NE *fault*, cover 'fault' in two senses, namely: (*a*) a moral defect milder than 'sin' or 'vice' but more serious than a casual 'error', e.g. NE *he has many faults;* (*b*) moral responsibility for wrong doing, 'culpability, guilt', e.g. Lat. *mea culpa*, NE *my fault.* Others are used only or mainly in the one sense or the other, e.g. Grk. σφάλμα (*a*), αἰτία (*b*). The Gmc., Balto-Slavic, and Indo-Iranian words are properly 'fault' in sense *b*, though some of them are or were once used for the wrongdoing itself (e.g. OE *scyld* for Lat. *scelus*, *dēlictum* as well as *culpa;* NHG *eine schuld tun*, now obs.). In these languages 'fault' in sense *a* is covered by words listed under 'error' (e.g. NHG *fehler*) or others; and a few of those listed here belong equally under 'error'. In sense *b* there is generally no distinction between 'fault' and 'guilt', but NE *guilt* has a much stronger implication of wrongdoing than *fault.*

Furthermore, 'fault' (*a*) may be expressed by various other words meaning properly 'lack, defect', e.g. Grk. ἔλλειμμα (fr. ἐλ-λείπω 'leave undone'), Lat. *dēlictum* (fr. *dē-linquere* 'fail, transgress'), or 'spot, blemish', e.g. Lat. *macula* often 'fault', esp. in church Latin.

1. Grk. σφάλμα, lit. 'a fall, misstep' : σφάλλω 'cause to fall, overthrow', etym. dub. Walde-P. 2.599, 678. Boisacq 927.

Grk. αἰτία 'responsibility, guilt, cause', covering 'fault' in sense *b*, beside adj. αἴτιος 'responsible, culpable', etym. dub., perh. : αἶσα (*αἴτ̯α) 'lot, destiny', Osc. *aeteis* 'partis'. Walde-P. 1.2. Boisacq 30 f.

Words for 'error, mistake' are most commonly derived from vbs. meaning 'wander about' or the like. But there are various other connections. Several of the words are the same that have been listed under 'sin' or 'fault'.

1. Grk. ἁμαρτία, see under 'sin' (16.75).

Grk. σφάλμα, see under 'fault' (16.76).

Grk. πλάνη 'wandering about, going astray' is in the NT a fig. 'straying from the truth', namely 'false doctrine, deceit, delusion' (and so the early Gmc. and ChSl. forms which render it; partly *error* in the Vulgate), in NG 'error', esp. 'delusion'.

NG λάθος, fr. late Grk. λάθος 'escape from detection', fr. λανθάνω, aor. ἔλαθον 'escape notice' (see ἀχηθής, 19.66).

2. Lat. *error* (> It. *errore*, Fr. *erreur*, Sp. *error*), *errātum*, fr. *errāre* 'wander, go astray, err, mistake' : Goth. *airzeis* 'astray, erring', *airzei*, *airziþa* 'error', etc. (below, 4). Walde-P. 1.150. Ernout-M. 309.

It. *sbaglio*, with vb. *sbagliare* 'make a mistake, blunder, miss', doubtless *s-bagliare* : *abbagliare* 'dazzle, blind', but orig. unknown. Diez 355. REW 9157.

Fr. *faute*, see under 'fault' (16.76).

Rum. *greşală*, fr. *greşi* 'fail, miss, err', fr. Slavic, cf. SCr. *pogrješka* (below, 6).

3. Ir. *comrorcon*, vbl. n. of **com-air-org-* 'err', cpd. of *orgim* 'slay, lay waste' (1.76). Pedersen 2.588.

NIr. *dearmad*, *dearmhad*, fr. Ir. *dermat* 'a forgetting', vbl. n. of **di-ro-moin-* (*doroimnethar*, 3sg.) 'forget' (17.32).

W. *camgymeriad*, cpd. of *cam-* 'mis-' and *cymeriad* 'taking', fr. *cym(e)ryd* 'take', prob. semantic borrowing fr. NE *mistake.*

Br. *fazi*, see under 'fault' (16.76).

4. Goth. *airziþa*, *airzei*, OHG *irrido*, MHG *irre*, derivs. OHG *irrituom*, MHG *irretuom*, NHG *irrtum* : Goth. *airzjan* 'lead astray', OHG *irran* 'cause to err', *irrōn* 'err', Lat. *errāre*, etc. (above, 2). Feist 27. Weigand-H. 1.936 f.

ON *villa*, properly 'a straying', fr. *villr* 'bewildered, erring, astray' : Goth. *wilþeis* 'wild', OE *wilde*, OHG *wildi* 'wild, desert', etc. Falk-Torp 1377 f.

OE *gedwyld*, *gedwola*, Du. *dwaling* : OE *gedwellan*, *gedwelian* 'deceive, lead astray, err', *dwellan*, *dwelian* 'lead into error', OHG *twallen* 'delay, hinder', ON *dvelja* 'delay, tarry' (14.24), Du. *dwalen* 'err, wander'. Walde-P. 1.843.

ME *errour*, NE *error*, fr. Fr. *erreur* (above, 2).

ME, NE *mistake*, fr. vb. *mistake*, in ME and early NE mostly 'take wrongly, have a misconception, err', fr. ON *mistaka* 'take by mistake, take the wrong thing'. NED s.v.

Du. *fout*, fr. Fr. *faute* (above, 2). Franck-v. W. 169.

NHG *fehler*, orig. 'a shot which misses the mark', deriv. of *fehlen* 'miss' and re-

placing older *fehl* 'lack, defect, mistake, oversight, etc.', early also *feil*, fr. MHG *væl*, *væle* 'lack, missing', MLG *feil*, *fēl* (> Dan. *fejl*, Sw. *fel*), fr. OFr. *faille*, OIt. *faglia* 'lack' (fr. Lat. *fallere* 'deceive, etc.', cf. Fr. *faute* 'fault, mistake, lack' 16.76). Falk-Torp 211. Weigand-H. 1.511 f.

5. Lith., Lett. *klaida* : Lett. *klaidīt* 'wander about' (prob. = *klaidīt* 'scatter, waste'), *klīst* 'wander about, go to pieces', Lith. *klysti* 'err, be mistaken', etc. Walde-P. 2.596. Mühl.-Endz. 2.208, 231.

Lith. *apsirikimas*, fr. *apsirikti* 'err, mistake', refl. cpd. of *rikti* id. ('sich versprechen', Kurschat), same word as *rikti* 'cry out, shout', with development through 'misspeak' (cf. NHG *versehen* 'oversight, mistake').

Lett. *kl'ūda* (Lith. *kliuda* 'defect, lack, flaw') : *kl'ūt* 'come upon, reach', *kl'ūdīt* 'cause to come upon, wander, stray, etc.', Lith. *kliuti* 'remain hanging, catch on, run against, hinder, hold back'. Walde-P. 1.493. Mühl.-Endz. 2.240 f.

Lett. *malds*, *maldība*, fr. *maldīt* 'err, lead into error, deceive', perh. : *meli*, Lith. *melas* 'lie' (16.67), etc. Walde-P. 2.291. Mühl.-Endz. 2.557, 595.

6. ChSl. *lĭstĭ*, 'deceit' (16.68), once also for πλάνη (Mt. 27.64).

SCr. *zabluda*, Boh. *blud*, Pol. *błąd* (Russ. *blud* 'fornication', but *zablydit'sja* 'go astray, err', *zabluždenie* 'error, mistake') : ChSl. *blądŭ* 'fornication', *blędą*, *blęsti* 'err, talk nonsense' (cf. *blędŭ* 'idle talk, nonsense') and 'fornicate' (latter sense in this group widespread but secondary), prob. : Goth. *blinds* 'blind', NE *blunder*, etc. Walde-P. 2.216. Berneker 60, 62.

SCr. *pogrješka* : *pogriješiti* 'err', perfect. cpd. of *griješiti* 'sin, err', fr. *grijeh* 'sin' (16.75).

Boh. *chyba* (Pol. *chyba* 'failure, miscarriage, lack') : Boh. *chybati* 'doubt', Pol. *chybać* 'move to and fro, swing', etc., Skt. *kṣubh-* 'sway, tremble'. Walde-P. 1.502 f. Berneker 412 f.

Boh. *omyl*, Pol. *omyłka* : Boh. *omýliti* 'deceive', *mýliti* 'mislead, puzzle', Pol. *(o)myloć*, *mylić* 'cause to err', etc., outside connections? Brückner 350. Miklosich 207.

Russ. *ošibka*, fr. *ošibat'sja* 'mistake, err', prob. : *o-šibat'* 'beat down', *šibat'* 'throw', *šibkij* 'quick', Skt. *kṣip-* 'throw'. Walde-P. 1.501.

7. Skt. *bhrama-*, *bhrānti-* : *bhram-* 'wander about', also 'be confused, mistaken', *bhṛmi-* 'quick, active', further connections dub. Walde-P. 2.202.

'Blame' is properly 'censure of a fault, reproof of wrongdoing', the opposite of 'praise'. The use of NE *blame* in the sense of 'responsibility for a wrong' (*lay the blame on, the blame is mine*, etc.), although old, is secondary (cf. NED s.v.), this sense being expressed in other languages by words listed under 'fault', as Lat. *culpa*, NHG *schuld*, Russ. *vina*, etc. (16.76).

The majority of the words are connected with others meaning 'speak ill of, revile, abuse, shame, accuse', etc., that is, they are in origin abusive terms.

But conversely to the development in English, some words for 'fault' or 'defect' may come to be used for the resulting 'blame', mainly through the medium of verbal derivs. meaning 'lay the fault on, find fault with, blame' (cf. esp. the shift in NHG *tadel*).

1. Grk. μομφή, μέμφις, beside vb. μέμφομαι, perh. : Ir. *mebul* 'shame', W. *mefl* 'disgrace, reproach' (but see 16.45).

Grk. ὄνειδος : Goth. *ga-naitjan* 'dishonor', Skt. *nind-* 'deride, abuse, blame' (sb. *nindā-*), Av. *naēd-* 'deride, abuse', etc. Walde-P. 2.322 f.

Grk. ψόγος, beside vb. ψέγω, adj. ψεκτός 'blamable', etym. dub. Boisacq 1075.

Grk. μῶμος 'blame, disgrace', with vb. μωμάομαι 'blame' (both Hom.+, but less common than preceding), etym. dub. Walde-P. 2.249. Boisacq 655.

Grk. κατηγορία 'charge, accusation' (cf. κατηγορέω 'accuse', orig. 'speak against'), in NG used also for 'blame'. Cf. Fr. *accuser* 'accuse, blame'.

2. Lat. *reprehēnsiō*, fr. *reprehendere* 'hold back, restrain', in moral sense 'reprehend, rebuke, blame, censure', fr. *prehendere* 'take, seize'.

Lat. *vituperātiō* (a stronger term than *reprehēnsiō*, but not so abusive as NE *vituperation*), fr. *vituperāre* 'find fault with, disparage, blame', first part prob. : *vitium* 'defect, blemish, fault, vice', and last part : *parāre* 'prepare, provide, procure'. Ernout-M. 1118.

Fr. *blâme* (> Rum. *blam*), fr. *blâmer*, OFr. *blasmer* (> It. *biasimare*, whence sb. *biasimo*), fr. VLat. **blastēmāre* for Lat. *blasphēmāre* 'blaspheme, revile', fr. Grk. βλασφημέω 'speak ill of, blaspheme' (cons. dissim. already in colloq. Grk., cf. NG pop. βλαστημῶ). REW 1155. Wartburg 1.403.

Fr. *reproche* (> NE *reproach*), Sp. *reproche*, all covering verbal 'blame' (but in part mild), fr. VLat. **repropriāre*, deriv. of Lat. *prope* 'near' (cf. *approach* 10.56). REW 7229. NED s.v. *reproach*, sb. and vb.

Sp. *censura* 'criticism' and esp. 'blame', as commonly NE *censure* (NED s.v., 4), fr. Lat. *cēnsūra* 'judgment', deriv. of *cēnsēre* 'think'[2] (17.14).

Sp. *culpa* 'fault' (16.76) and so 'blame' in secondary sense of NE *blame* (cf. above), hence for verbal 'blame' *culpar*, or *echar la culpa*, lit. 'lay the fault (blame) on'.

3. Ir. *caire* = MBr. *carez* 'blame', OW *cared*, arch. W. *caredd* 'sin, crime, fault' : Lat. *carināre* 'abuse, revile', OE *hierwan* 'speak ill, blaspheme, despise', OHG *harawēn* 'mock', Lett. *karināt* 'tease', ChSl. *ukoriti* 'insult', etc. Walde-P. 1.353. Walde-H. 1.169.

NIr. *milleān*, prob., like *milleadh* 'spoiling, injury', fr. *millim* 'spoil, injure'.

W. *bai* 'fault' (16.76), also 'blame'.

Br. *tamall* : Ir. *tāmailt* 'infamy, shame', etym.? Walde-P. 2.624. Stokes 122. Henry 259.

4. Goth. *fairina*, mostly 'αἰτία' (see 16.76), but once for μομφή, with vb. *fairinōn* 'μωμᾶσθαι, blame', adj. *unfairina* 'ἄμεμπτος, blameless'.

Goth. *faian*, vb. 'blame' : Goth. *fijan*, etc. 'hate' (16.41), Skt. *pīy-* 'abuse, revile'. Walde-P. 2.9. Feist 135.

ON *last*, also cpds. *lastorð*, *lastmæli* (*orð* 'word', *mæli* 'speech'), OHG, OS *lastar*, MHG *laster* also 'reproach, insult, fault', etc., beside ON *lǫstr* 'defect, fault, vice', OE *leahter* 'moral defect, crime, fault', etc. : vbs. OHG *lahan*, OE *lēan* 'blame, reproach, scorn', etc., and perh. Ir. *locht* 'fault, defect' (16.76). Walde-P. 2.436 f. Falk-Torp 626. Torp, Nynorsk 365.

OE *tǣl*, *tāl* (mostly 'slander' but also best word for 'blame', cf. e.g. Aelfric, Gram. p. 12, *tāl* as opp. of *herunge* 'praise'), ME (rare) *tele, tole* = ON *tāl* 'deceit', etc. (16.68).

ME, NE *blame*, Du. *blaam*, fr. Fr. *blâme* (above, 2).

NHG *tadel* (> Dan. *dadel*, Sw. *tadel*), fr. MHG *tadel* 'defect' (moral, or physical as 'spot on the skin'; cf. NHG *tadellos* 'faultless'; shift to 'blame' first in vb. *tadeln* 'find a defect in, find fault with', hence 'blame'), prob. orig. a LG form corresponding to MHG *zadel*, OHG *zadal* 'lack, suffering from hunger', etym. dub. Falk-Torp 133. Weigand-H. 2.1018.

NHG *vorwurf*, fr. *vorwerfen* 'throw before', hence, like NE *throw in one's teeth*, 'reproach, blame'.

5. Lith. *(pa)peikimas*, fr. *(pa)peikti* 'blame' : *piktas* 'angry' (16.42).

Lett. *pal'a* (also 'defect, fault') : *pelt* 'abuse, calumniate', this perh. : Grk. ἀπειλή 'threat' and (with *s-*) Goth. *spill* 'story, tale', etc. Walde-P. 2.677. Mühl.-Endz. 3.64, 198.

6. ChSl. vb. *zazĭrěti* (renders μέμφεσθαι, Mk. 7.2), cpd. of *za-* 'after' and *zĭrěti* 'look' (15.52).

SCr. *prijekor* (*ukor, pokor*) : ChSl. *u-korŭ* 'ὕβρις, insult', *u-koriti* 'insult, scold', SCr. *koriti* 'reproach', etc., Ir. *caire* 'blame', etc. (above, 3). Berneker 578. Walde-P. 1.353.

Boh. *hana*, Pol. *nagana*, with vbs. Boh. *haniti*, Pol. *ganić*, etym. dub. Brückner 134 (: ChSl. *goněti* 'suffice', Lith. *gana* 'enough', as orig. 'have enough of' in deprecatory sense?). Miklosich 60.

Russ. *chula* = ChSl. *chula* 'blasphemy', with vbs. Russ. *chulit'* 'blame', ChSl. *chuliti* 'blaspheme', etc., perh. as 'lower, debase' (cf. Slov. *huliti* 'bend', Boh. *chouleti se* 'bend, stoop') : ChSl. *po-chylŭ* 'bent, crooked', Boh. *chyliti* 'incline, bend', Russ. dial. *chilut'sja* 'bow', etc. Berneker 406, 413.

Russ. *poricanie*, fr. *poricat'* 'blame, reprove', cf. *otrekat'*, *otricat'* 'deny' : ChSl. *reką*, *rešti*, ORuss. *rku*, *reči* 'say' (18.22), ChSl. *rěčĭ* 'accusation', etc. Miklosich 274 f.

7. Skt. *nindā-* (*nid-*, *nidā-*) also 'defamation, abuse, etc.', with vb. *nind-* 'deride, abuse, blame', see above, 1, under Grk. ὄνειδος.

Skt. *garhā-*, with vb. *garh-* 'blame, reproach' : Av. *garəz-* 'moan, bemoan', etc. (16.37).

Skt. *parivāda-*, fr. *parivad-* 'talk about' and 'blame', cpd. of *vad-* 'speak' (18.21).

Some of the important words for 'praise' are of doubtful etymology. But the commonest source, mostly through the verbs, is the notion of 'recite formally, sing, shout' (in honor of the gods), the terms belonging primarily to religious terminology. Some of the verbs mean also, or are cognate with others meaning, 'boast', owing to similar origin from 'cry, shout', etc. Some are derivs. of words for 'fame' or 'glory' (16.47), meaning first 'attribute fame, give glory to', then simply 'praise', this sense reacting sometimes on the sbs. Besides those included in the list there are many other such derivs. meaning 'glorify, praise highly, laud', e.g. Grk. δοξάζω in NT rendered by Goth. *hauhjan* (fr. *hauhs* 'high'), ChSl. *slaviti* (fr. *slava* 'glory'). Development from 'put a value on, appraise' is seen in NE *praise*, etc.

The sb. forms are given in the list, but the verbs are parallel and often the source, especially in the semantic development (e.g. in NE *praise*). There is sometimes, however, a difference in relative frequency, e.g. OE *lof* the usual sb., but *herian* the usual vb. (more common than *lofian*), or NHG vb. *preisen* more common than sb. *preis* in sense of 'praise'.

1. Grk. αἶνος (also 'tale, story' and dial. 'decree'), more commonly ἔπαινος, with vb. ἐπαινέω, cf. also αἴνιγμα 'riddle', all based on the notion of 'a saying', but root connection dub. Walde-P. 1.2. Boisacq 26.

2. Lat. *laus, laudis* (> It. *lode*), with vb. *laudāre* (> It. *lodare*, Fr. *louer*, etc., whence also sbs. Fr. *louange*, Rum. *laudă;* Sp. *loar*, sb. *loa* now arch.), earliest sense perh. 'mention', the use of *laudāre* as 'name, cite' being quoted as early; etym. dub., but perh. as **lau-d-* beside **leu-t-* (based on an imitative syllable) : Goth. *liuþōn* 'sing praises', OE *lēoþian* 'sing', etc. Walde-P. 2.406. Walde-H. 1.776.

Sp. *alabanza*, fr. vb. *alabar* 'praise', fr. VLat. *alapārī* 'boast' (cf. Lindsay, Cl. Q. 23.112), this in form as if fr. Lat. *alapa* 'blow, slap', but semantic relation difficult, and so perh. fr. or influenced by Grk. λαπίζω 'swagger' (used by Cicero). REW 311. Rönsch, Z. rom. Ph. 3.103 f. Walde-H. 1.26.

3. Ir. *molad*, NIr. *moladh*, W. *mawl*, Br. *meuleudi*, with vbs. Ir. *molur*, etc., general Celtic group, etym. dub., but perh. : Grk. μέλπω 'sing', μολπή 'song'. Walde-P. 2.292 (adversely). Stokes, IF 12.191.

4. Goth. *hazeins*, OE *herung, hering*, ME *heriynge*, fr. vbs. Goth. *hazjan*, OE *herian*, ME *herie* 'praise' : OHG *harēn*, OS *harōn* 'cry, shout', outside connections dub. Walde-P. 1.338. Feist 252 f. NED s.v. *hery*.

ON, OE, Du. *lof*, OHG *lob*, etc. (Dan., Sw. *lov* mostly biblical) with vbs. ON *lofa*, OE *lofian*, etc. : Goth. *liufs*, OE *lēof*, etc. 'dear' (16.28) and OE *lufu*, etc. 'love' (16.27), with development of 'praise' (vb.) fr. 'find pleasing'. Walde-P. 2.419. Falk-Torp 657.

Dan., Sw. *ros* (usual word in Dan., not in Sw.) with vbs. Dan. *rose*, Sw. *rosa*, fr. ON vb. *hrōsa* 'praise, boast' (> ME *rose*, NE dial. *roose*) : ON *hrōðr* 'praise, fame', OE *hrēþ* 'fame', Goth. *hrōþeigs* 'famous', OHG *hruom* 'fame' (NHG *ruhm*), whence vbs. OHG *hruomen*, NHG *rühmen* 'praise' (MLG *berōmen* > Dan. *berømme*, Sw. *berömma*, whence Sw. sb. *beröm*, now the common word), all fr. the same root as Goth. *hrōþs* 'cry', Grk. κῆρυξ 'herald', etc. Walde-P. 1.353. Falk-Torp 61, 911.

ME *preyse, prayse*, NE *praise*, fr. vb. ME *preise* 'appraise' and 'praise', fr. OFr. *preisier*, fr. late Lat. *preciāre, pretiāre*, deriv. of Lat. *pretium* 'price'. From the same source likewise MHG *prīsen*, NHG *preisen*, Du. *prijzen* (MLG *prīsen* > Dan. *prise*, Sw. *prise*), all now vbs. for 'praise' (in part more formal, 'praise highly, laud'), whence sbs. NHG *preis*, Dan., Sw. *pris* 'praise', but more commonly 'price'. Only in English is the word in this sense differentiated in form. NED s.v. Falk-Torp 850. Weigand-H. 2.468.

ME *laude*, with vb. *laude* (NE *laud*) fr. Lat. *laudāre* (above, 2).

5. Lith. *garbė* (also 'honor, glory') : *girti*, OPruss. *girtwei* 'praise' (Lett. *dzirties* 'boast'), Skt. *gr-*, Av. *gar-* 'praise' (below, 7), Lat. *grātus* 'pleasing, thankful', etc. Walde-P. 1.686. Walde-H. 1.619 f.

Lett. *slava* (also 'fame, glory'), with vb. *slavēt* 'praise', orig. 'glorify' like ChSl. *slaviti*, etc. : Lith. *šlovė*, ChSl. *slava*, Grk. κλέος, etc. 'fame, glory' (16.47).

Lett. *teikšana*, fr. *teikt* 'say' (18.22) and 'praise'. Mühl.-Endz. 4.156 f.

6. ChSl. *chvala*, etc. with vb. *chvaliti*, etc., general Slavic, etym. dub. Berneker 406. Brückner 186 f. K. Meyer, Donum nat. Schrijnen 413 (fr. **svala* by metathesis fr. *slava* 'fame, glory').

7. Skt. *stuti-*, fr. *stu-* 'praise' (also Av.), beside *stubh-* 'shout, praise in exclamations', prob. : Grk. στεῦμαι 'promise, threaten, boast' (what one will do). Walde-P. 2.620.

Skt. *gir-*, *gūrti-*, Av. *gar-*, *garah-* 'praise', esp. 'song of praise', fr. Skt. *gr-*, Av. *gar-* 'praise' (Av. only in cpds.) : Lith. *girti* 'praise', etc. (above, 5).

Skt. *çaṅsa-*, *pra-çaṅsā-*, fr. *çaṅs-* 'recite (hymns or invocations), praise', also 'declare, tell' : Av. *sąh-*, OPers. *θah-* 'announce, declare, say', Lat. *censēre* 'declare solemnly, resolve, judge', etc. Walde-P. 1.403. Walde-H. 1.199.

Besides the main words for 'beautiful', several are listed which answer more nearly to the inferior NE *pretty*. But it would be futile to include the vast number of expressions of admiration which may be used with specific reference to beauty (e.g. NE *lovely* in *lovely face*, etc.). Nor is it feasible here to state for the words of each language the differences both in feeling and in application (e.g. NE *beautiful, handsome, pretty*). Some are used of both persons and things, some mostly of persons, some only of women and children (or of men in derogatory sense); some with reference to both form, figure, and face, some (e.g. NE lit. *fair*) mainly with reference to the face.

Some of the words have such a logical semantic source as 'of good form, shape, appearance'. But in the majority of cases 'beautiful' is specialized from expressions of approval or admiration of the most diverse character, e.g. 'good, seasonable, pleasant, gay, courteous, fit, suitable, skilful, bright, neat'. Many of the words are again extended to apply to anything that gives pleasure (not merely to the visual sense), as NE *beautiful* in colloquial use (cf. NED s.v.) or NHG *schön* (cf. Paul, Deutsches Wtb. s.v.). Weinacht, Zur Geschichte des Begriffs "schön" im Altdeutschen, emphasizes the ethical rather than aesthetic value of Goth. *skauns*, OHG *scōni* in Otfr., etc. But this results from the character of the writings and has no necessary bearing on the primary sense and etymology.

1. Grk. καλός (also 'good', which became the prevailing sense), Hom. κᾱλός, fr. καλϝός, beside κάλλος (*καλιος) 'beauty', etc. : Skt. *kalya-* 'healthy, vigorous', *kalyāṇa-* 'beautiful'. Walde-P. 1.356. Boisacq 399.

Grk. εὐειδής, lit. 'well-formed', and used esp. with reference to female beauty, cpd. of εὐ- 'well-' and εἶδος 'form, shape, figure' (12.51). Boisacq 220.

Grk. ὡραῖος, fr. ὥρα 'proper time, season' and orig. 'seasonable' (esp. of crops, etc.), then of persons 'youthful, blooming' (not necessarily implying beauty according to Plato and Aristot., but evidently tending to), 'beautiful' (LXX, NT+).

Grk. εὔμορφος 'fair of form, beautiful', cpd. of εὐ- 'well-' and μορφή 'form, shape' (12.51). Hence NG pop. ὄμορφος, the most usual word with reference to personal beauty (ὄμορφη γυναῖκα, etc.; ὡραῖος mostly used of more general approval, 'fine').

2. Lat. *pulcher*, properly *pulcer* (*h* favored by fanciful connection with Grk. πολύχρους), old *polcer*, etym. dub., perh. fr. **pelcros* by dissim. fr. **perk̂-ros*, orig. 'gay colored, variegated' (cf. interchange

of 'beautiful' and 'red' in group of ChSl. *krasĭnŭ*, etc., below, 6) : Skt. *pr̥çni-* 'speckled, Grk. περκνός 'dark, bluish-black', MIr. *erc* 'gay colored, red', OHG *forhana* 'trout,' etc. Walde-P. 2.46. Ernout-M. 822.

Lat. *fōrmōsus* (> Rum. *frumos*, Sp. *hermoso*), orig. 'finely formed', whence 'shapely, beautiful', fr. *fōrma* 'form, shape' (12.51). Ernout-M. 379. REW 3450.

Lat. *bellus* (> It. > Sp. *bello;* Fr. *beau*), used esp. of women and children, or ironically of men in class. period, fr. **dwenelos* : *bonus* (*dwenos*) 'good' (16.71). Ernout-M. 114. Walde-H. 1.100. REW 1027.

Fr. *joli*, OFr. *jolif*, orig. 'gay, agreeable, pleasant', prob. deriv. of a loanword = ON *jōl* 'Yule-festival'. REW 4590. Bloch 1.389. Gamillscheg. 540.

Sp. *bonito* 'very good, fine' and esp. fem. *bonita* 'pretty', deriv. of *bueno* 'good'.

3. Ir. *sochrud*, lit. 'well formed', cpd. of *so-* 'well-' and *crud* 'shape, form' (12.51).

Ir. *ālind*, NIr. *āluinn*, prob. fr. *āil* 'pleasant' (: ON *fagr* 'beautiful', etc., below, 4; Walde-P. 2.3, Strachan, BB 20.24, both without *ālind*). Stokes ap. Macbain 13 (Macbain **ad-lainn* : *lainn* 'bright').

NIr. *deas* ('right', etc., also 'pretty'), fr. Ir. *dess* 'right, dexter' (12.41) and 'well arranged, suitable, neat, fair, becoming'.

W. *glan* 'clean' (15.87), also 'beautiful'.

W. *teg* (cf. Ir. *ē-tig* 'ugly') : ON *þægr* 'acceptable, agreeable, pleasant', fr. the root in ON *þiggja* 'receive, accept', Ir. *techtaim* 'possess'. Walde-P. 1.715. Stokes 126.

W. *tlws* (fem. *tlos*), prob. fr. *tlws* 'jewel' (: Ir. *tlus* 'cattle', with common notion of 'valuable possession, treasure'; cf. Loth, RC 34.150), felt as 'pretty thing'.

Br. *kaer*, OBr. *cadr* = W. *cadr* (arch.) 'handsome, mighty' : W. *cadarn* 'strong' (4.81), Ir. *cath*, W. *cad*, etc. 'battle'. Walde-P. 1.339, 340. Pedersen 1.323, 2.50, 53.

Br. *brao*, fr. Fr. *brave* 'brave' (16.52, formerly and dial. also 'beau' (cf. Wartburg 1.249). Henry 42.

4. Goth. *skauns* (or *skauneis;* only nom. pl. *skaunjai*), OE *scīene*, ME *shene* (NE *sheen*), Du. *schoon* (MLG *schōne* > Dan. *skøn*, Sw. *skön*), OHG *scōni*, MHG *schœn(e)*, NHG *schön*, in older WGmc. also 'bright, shining', prob. through 'visible, apparent' (cf. Goth. *ibnaskauns* 'of like form', *guda-skaunei* 'likeness of God') : OE *scēawan*, OHG *scouwōn* 'look at', etc. (15.52). Walde-P. 1.370. Falk-Torp 1014. Feist 431.

ON *fagr* (Dan. *fager* rhet. and poet.), Sw. *fager*, OE *fæger*, ME *faire* (NE *fair* in this sense now mostly lit., esp. poet.), OHG *fagar*, MHG *fager* = Goth. *fagrs* 'εὔθετος, fit' (the orig. sense) : OE *gafēgan*, OHG *fuogan* 'fit, join', etc. Walde-P. 2.3. Falk-Torp 201. NED s.v. *fair*.

Dan. *køn*, older sense 'capable, courageous' : ON *kœnn* 'wise, clever', OE *cēne*, OHG *kuoni* 'brave', etc. (16.52). Falk-Torp 523.

Dan. *smuk*, fr. LG *smuk* 'supple, tidy, trim, elegant' (hence also NHG *schmuck*) : MHG *smiegen*, NHG *schmiegen* 'press close, cringe, crawl', ON *smjūga* 'slip, step through', etc. Falk-Torp 1085. Walde-P. 2.254.

Sw. *vacker* (Norw. *vakker*), fr. MLG *wacker* 'watchful, gay, quick, good, honest', NHG *wacker* 'good, honest', OHG *wacker*, OE *wacar* 'watchful' : OHG *wachēn*, OE *wacian* 'watch, wake', etc. Falk-Torp 1343. Hellquist 1292 f.

OE *wlitig*, early ME *wliti*, OS *wlitig*,

fr. OE *wlite* 'beauty, appearance, shape, form', OS *wliti* 'splendor, appearance, form', etc. : OE *wlītan* 'look' (15.52). Walde-P. 1.293.

NE *beautiful*, fr. sb. *beauty*, ME *bealte, beaute*, etc. fr. OFr. *belte, beltet*, Lat. *bellitās* fr. *bellus* (above, 2).

NE *pretty* (since 1440 of personal appearance, but inferior to *beautiful*, cf. NED), OE *prættig* 'cunning, wily, etc.', ME 'clever, skilful', late ME and NE general epithet of admiration 'fine, etc.', fr. OE *prætt* 'trick, wile, craft' : Icel. *prettr* 'trick', Du. *pret* 'fun', etc. Falk-Torp 848 f. NED s.v.

NE *handsome* (implying dignified, stately beauty), deriv. of *hand* and orig. 'easy to handle, handy' with development through 'suitable, generous, admirable', etc. NED s.v.

Du. *mooi*, MDu. *mŏy*, MLG *mōi(e)*, prob. through 'neat' fr. 'washed' (Gmc. **mauja-*) : ChSl. *myti* 'wash', MLG *muten* 'wash the face', Lith. *maudyti*, Lett. *maudāt* 'bathe'. Franck-v. W., KZ 48.156.

Du. *fraai* (also 'nice'), MDu. *fray*, *vray* 'true, upright, clever, strong', fr. Fr. *vrai* 'true' (16.66). Frank-v. W. 169.

NHG *hübsch*, fr. MHG *hübesch*, 'courteous, well-bred', also late 'beautiful', fr. MFrank. *höfesch*, *hüfesch* id. fr. *hof* 'court' (imitating and later replacing MHG *kurteis* fr. Fr. *courtois*). Kluge-G. 257. Paul, Deutsches Wtb. s.v.

Lett. *jauks*, also 'tame, gay' = Lith. *jaukus* 'tame, gentle' : Lett. *jūkt*, Lith. *junkti* 'habituate, accustom', Goth. *biūhts* 'accustomed', Skt. *uc-* 'like, be accustomed to'. Walde-P. 1.111. Mühl.-Endz. 2.98.

6. ChSl. *krasĭnŭ*, SCr. *krasan*, Boh. *krásný*, Russ. *pre-krasnyj* (*krasnyj* now 'red'), *krasivyj*, deriv. of *krasa* 'beauty' in ChSl., Russ., etc., in Pol. 'color', esp. 'red', Boh. *krása* also old 'light, splendor', prob. orig. 'glow, splendor' : Lith. *karštas* 'hot', *kurti* 'to heat', etc. Walde-P. 1.418 f. Berneker 607 f.

SCr. *lijep* (Boh. *lepý* 'fine, beautiful', Russ. *lepyj* 'beautiful, splendid', not in ordinary use) : ChSl. *lěpŭ* 'proper, fitting' ('beautiful' only late), ChSl. *prilěpiti* 'stick, cleave to', Russ. *lepit'* 'stick, stick together', etc., general Slavic, Skt. *lip-* 'anoint, besmear', Grk. λίπος 'fat', etc. Walde-P. 2.404. Berneker 711 f.

Boh. *hezký* ('pretty'), according to Gebauer 1.240, 454, Miklosich 61, with *e* fr. *o* : Russ. *gožij*, *pri-gožij* 'good, fitting, dainty', etc., Boh. *hodný* 'worthy', etc., derivs. of Slavic *godŭ* 'fitting time' (Berneker 316 ff. without mention of Boh. *hezký*).

Boh. *pěkný* ('pretty'), Pol. *piękny* (main word for 'beautiful'), prob. (despite Boh. *ě*, Pol. *ię*) through 'careful, neat' : Boh. *peče*, Pol. *piecza* 'care' (16.14). Brückner 412.

Pol. *śliczny* (Boh. *sličný* not common), cpd. of Pol. *-liczny* (in *roz-liczny* 'different', etc.), Boh. *ličný* 'clear, apparent', deriv. of Slavic *likŭ* in Russ.-

ChSl. *zŭlo-likŭ* 'evil-looking' (ChSl. *lice* 'face', etc.). Berneker 719 ff.

Pol. *ładny* ('pretty, nice'), Boh. *ladný* (not common; cf. *ladnost* 'neatness') = ChSl. *ladĭnŭ* 'equal', Russ. *ladnyj* 'on good terms, in accord', derivs. of Pol. *lad*, Boh. *lad* 'order', Russ. *lad* 'accord, tune', root connection dub. Berneker 682.

7. Skt. *çrīra-* only in neg. cpd. *a-çrīra-* 'ugly' (RV; *çrīla-* rare or in different sense), Av. *srīra-*, comp. Skt. *çreyas-*, Av. *srayas-*, superl. Skt. *çreṣṭha-*, Av. *sraēšta-*, with sb. Skt. *çrī-*, Av. *srī-* 'beauty' (for Vedic *çrī-* cf. esp. Oldenberg, Gött. Nachr. 1918. 35 ff.), prob. : Grk. κρείων 'lord, ruler', but ultimate root connection? Walde-P. 1.478. This is clearly the one important Indo-Iranian word-group, though not furnishing the common positive adj. for 'beautiful' in Skt.

Skt. *sundara-*, perh. dial. for *sūnara-* 'glad, joyous, delightful', cpd. of *sū-* = *su-* (cf. *vī-* = *vi-*, *anū-* = *anu-*, etc. Wackernagel, Altind. Gram. 2.130) 'well, good' and *nar-*, *nara-* 'man'. Walde-P. 2.332. Uhlenbeck 337, 339.

Some of the words for 'ugly' are formally as well as semantically the opposites of those for 'beautiful'. That is, they are formed with prefixes for 'ill-' vs. 'well-' from words for 'form, shape', etc., or with neg. prefixes, e.g. Grk. δυσ-ειδής vs. εὐ-ειδής or Lith. *ne-gražus* vs. *gražus*. Words of the latter kind, lit. 'not beautiful', may in part be felt as merely mild, euphemistic terms (as perh. NHG *unschön* where it is in use), but need not be so felt and may be the usual words with all the feeling of 'ugly' (cf. e.g. Lith. *Onytė buvo negrazi, pikta ir tingi mergaitė* 'Anna war ein hässliches, böses und faules Mädchen', NSB s.v.).

The others, analogous to many of those for 'beautiful', are based upon more general expressive terms, in this case opprobrious, denoting various disagreeable qualities, e.g. 'shameful, base, foul, repulsive, dreadful'. Many of

them are used also in such earlier senses, being by no means restricted to 'ugly' in appearance.

Besides the words listed there are, of course, other still stronger terms (e.g. NE *hideous* when applied to looks, as a *hideous face*) and many euphemistic terms besides those mentioned.

1. Grk. δυσ-ειδής, δύσ-μορφος, cpds. of δυσ- 'ill-' and so opp. of εὐ-ειδής, εὔ-μορφος (16.81).

Grk. αἰσχρός, mostly 'shameful' but also (Hom.+) 'ugly' in appearance : αἶσχος 'a shame, disgrace' also 'ugliness', αἰσχύνη 'shame', etc. (16.45).

NG ἄσκημος, fr. ἄσχημος, late form for class. Grk. ἀσχήμων 'misshapen, ugly, unseemly, shameful', cpd. of ἀ- privative and σχῆμα 'form, shape, figure'.

2. Lat. *dēfōrmis* (> It. *deforme*), cpd. of *dē-* with privative force and *fōrma* 'form, mold' (cf. *fōrmōsus* 'beautiful', 16.81).

Lat. *turpis* 'ugly, base, shameful', used in both a moral and a physical sense, perh. as orig. describing what one turns away from: Grk. τρέπω 'turn'; cf. Skt. *trap-* 'be embarrassed, ashamed', *trapā-* 'embarrassment, shame', also (but with different historical development) NG ἐντροπή 'shame' (16.45). Walde-P. 1.757.

It. *brutto*, fr. Lat. *brūtus* 'dumb, stupid, irrational', orig. 'heavy' (*brutum antiqui gravem dicebant*, Festus), Osc.-Umbr. loanword : Lat. *gravis* 'heavy', etc. (15.81). Ernout-M. 119. Walde-H. 1.117. REW 1348.

Fr. *laid*, fr. a Frank. form = OHG *leid* 'hateful, sorrowful', OE *lāð* 'hateful, repulsive', etc. (cf. Du. *leelijk*, below, 4). REW 4858a.

Sp. *feo*, fr. Lat. *foedus* 'foul, filthy, loathsome' (in part, of appearance), etym. dub. Walde-P. 1.837 f., 186. Ernout-M. 373. Walde-H. 1.522 f. REW 3406.

Rum. *urît*, orig. 'hateful', pple. of *uri* 'hate' (16.41).

3. Ir. *dochrud*, cpd. of *do-* 'ill-' (16.72) and *crud* 'shape, form, manner' (cf. *sochrud* 'beautiful', 16.81).

Ir. *ētig*, neg. of *-tig*, not found as simplex, but = W. *teg* 'beautiful' (16.81).

Ir. *grānna*, *grande*, NIr. *grānna*, deriv. of *grāin* 'disgusting, loathsome' : W. (obs.) *graen* 'sorrow, grief', perh. fr. **gragnis* : Ir. *garg* 'rough, wild', Grk. γοργός 'grim, fierce, terrible'. Walde-P. 1.537. Pedersen 1.103, 538.

W. *hagr* : Corn. *hager*, Br. *hakr* 'horrible, hideous', etym. dub. Pedersen 1.125. Loth, RC 36.142.

W. *hyll*, etym.?

Br. *divalo*, cpd. of *di-* neg. and **malavo-* 'soft' : Grk. μαλακός 'soft', etc. Henry 102. Ernault, Glossaire 188 f.

4. ON *ljōtr* : Goth. *liuts* 'hypocrite', *liutei* 'deceit', etc. (16.68). Walde-P. 2.416. Falk-Torp 659.

ON *ūfagr*, OE *unfæger*, ME *unfaire*, neg. of ON *fagr*, OE *fægr* 'beautiful' (16.81).

Dan. *styg*, Sw. *stygg* : ON *styggr* 'repellent, unfriendly', Du. *stug* 'surly, sullen', perh. orig. 'repellent', fr. **steuk-*, beside **steug-* in Norw. *stauka* 'pound, stamp', Grk. στύγος 'hatred'(?), etc., extensions of **steu-*. Walde-P. 2.616. Falk-Torp 1193 (assuming development through 'stiff'). Hellquist 1099. Franck-v. W. 680.

Dan. *grim*, ODan., Norw. dial. *grem* also 'nasty' : ON *grimmr* 'fierce, savage, grim', OE *grimm* 'sharp, severe, fierce', OE, OS *grimman* 'to rage', ON *gramr* 'angry', etc. (cf. *gremi* 'anger', 16.42). Falk-Torp 347. Walde-P. 1.655.

Sw. *ful*, OE *fūl*, ME *foul*, all properly 'foul, stinking' (so mostly OE *fūl* = ON *fūll*, etc., cf. 15.26), in Sw. the usual

word for 'ugly', frequent in this sense in ME (cf. NED s.v. 11, where first quotation is from Chaucer), and incipiently even in OE (cf. the contrast with *fæger* 'beautiful' in *byrgen ūtan fæger and innan fūl* quoted in Bosworth-Toller s.v.; and also gl. *fedus, deformis, turpis uel ful, uel pudor,* Wright-Wülcker 1.238.13).

OE *unwlitig,* neg. of *wlitig* 'beautiful' (16.81).

ME *ugli,* NE *ugly,* early ME *uglike, iglic* 'horrible', fr. ON *uggligr* 'fearful', deriv. of *uggr* 'apprehension, dread', vb. *ugga* 'fear, suspect, apprehend' : Sw. *agg* 'grudge, spite', etc. Walde-P. 1.32. Falk-Torp 16. NED s.v.

NE *plain,* orig. 'flat, level' (12.71), then 'simple, ordinary', now a freq. euphemistic term for 'ugly'. NED s.v.

NE *homely,* orig. 'belonging to the home', then 'simple' (in good or bad sense), 'commonplace' and esp. as mild term for 'ugly'. NED s.v. In U.S. (at least in New England) *homely* is or was the usual word, *ugly* being mostly 'ill-tempered' (*an ugly horse* had no reference to appearance).

Du. *leelijk,* MDu. *lelijc, leedlijk,* fr. *leed* = OHG *leid* 'hateful, sorrowful' (NHG *leid*), OE *lāð* 'hateful, repulsive' (also *lāðlīk* id., like the Du.), ON *leiðr* 'disliked, loathed' (: Grk. ἀλείτης 'sinner'?). Walde-P. 2.401. Franck-v. W. 374.

OHG *unscōni,* MHG *unschœne,* NHG *unschön,* also OHG *missescōni* (cf. *informis missesconer* Ahd. Gloss. 3.425), all neg. of OHG *scōni,* etc. 'beautiful' (16.81).

OHG *unsāni* (*deformis unsconer unsani,* Ahd. Gloss. 3.425), neg. cpd. of the last member in OHG *selt-sāni* 'wonderful, strange, valuable' (NHG *seltsam*) : OHG *sehan,* Goth. *saihwan,* etc. 'see'. Walde-P. 2.479. Weigand-H. 2.846.

MHG *ungestalt* (OHG *ungistalt* 'lacerus', Graff 6.667), neg. of *gestalt* (pple. of *stellen* 'place, put'), as sb. 'form, appearance'. Weigand-H. 2.1116.

MHG *ungeschaffen,* neg. of *schaffen,* pple. of *schaffen* 'make, create, shape'.

NHG *hässlich* (> Dan. *hæslig*), first late MHG in this sense, MHG *hazzelīch, hezlīch,* OHG *hazlīh* 'full of hate, hostile', MHG also 'hated', fr. OHG *haz,* etc. 'hate' (16.41). Weigand-H. 2.818.

5. Lith. *negražus,* Lett. *nejauks, neskaists,* all neg. cpds. of words for 'beautiful' (16.81).

6. ChSl. *rąžĭnŭ,* orig. 'ridiculous' (καταγέλαστος Supr.; ἀσχήμων SCr.-ChSl.), SCr. *ružan,* deriv. of ChSl. *rągŭ* 'mockery', SCr. *rug* 'scorn, ridicule' : *ręgnąti* 'gape', Lat. *ringī* 'show the teeth, snarl'. Walde-P. 1.272. Meillet, Études 221.

Boh. *ošklivý,* orig.? cf. *šklivě* 'dwarf'.

Boh. *nehezký,* neg. of *hezký* 'pretty' (16.81).

Pol. *szpetny,* old *szpatny* = Boh. *špatný* 'bad' (16.72). Brückner 553.

Pol. *brzydki* = Ukr. *brydkyj* id., Russ. dial. *bridkoj* 'sharp, cold', ChSl. *bridŭkŭ* 'piercing, sharp, pungent' : Russ.-ChSl. *briti* 'sheer', ChSl. *britva* 'razor', etc. 'Ugly' through 'unpleasant' fr. 'sharp'. Berneker 86.

Russ. *nekrasivyj,* neg. of *krasivyj* 'beautiful' (16.81).

Russ. *durnoj* 'bad' (16.72), also used for 'ugly'.

7. Skt. *ku-rūpa-, vi-rūpa, apa-rūpa-,* all cpds. of pejorative or neg. prefixes with *rūpa-* 'form, shape, figure' (12.51).

Skt. *a-çrīra-* (RV), cf. 16.81.

'Mind' is intended here as the seat of intelligence, parallel to 'soul, spirit' (16.11) as the seat of emotions. But, as already remarked in 16.11, the two groups overlap. Several of the words there listed may cover also the 'mind', and conversely many of those in this list cover mental states in the widest sense, that is, may be used with reference to feelings as well as thoughts, as Lat. *mēns,* Skt. *manas-,* Grk. νοῦς (rarely), OE *mōd, hyge,* NE *mind,* etc.

Apart from those discussed under 'soul, spirit', most of the words for 'mind' are connected with verbs for 'think, understand, know', or the like, and many of them are used also for the mind's activity, 'intelligence, reason, thought', etc.

The actual physical seat of the mind in the brain, though recognized by some of the Greek philosophers (Plato, but not Aristotle, who favored the heart), was not generally enough known to have any effect on linguistic usage, except in modern phrases like NE *has brains, has a good head = has a good mind,* NG ἔχει μυαλό 'has good sense', ἔχασε τὰ μυαλά του 'lost his head'. It was rather the vague φρένες (cf. below) that affected the terminology.

1. Derivs. of IE **men-* in Skt. *man-* 'think', Lat. *meminī* 'remember', etc. Walde-P. 2.264 ff. Ernout-M. 606. Walde-H. 2.69 f.

Lat. *mēns, mentis* (> It., Sp. *mente,* Rum. *minte*); Ir. *menme* (NIr. *meanma,* but not the usual word for 'mind'); ON *munr* (also 'longing, love', OE *myne* 'desire, love', rarely 'mind', Goth. *muns* 'thought, intention', etc.), ME *mynde,* NE *mind* (OE *gemynd* 'memory'); Skt. *manas-,* Av. *manah-.*

2. Grk. νόος, Att. νοῦς, whence νοέω 'perceive, notice, think', etc., νόημα 'thought, purpose, understanding', etym. dub. Walde-P. 2.324. Boisacq 672. Schwyzer, Festschrift Kretschmer 247 ff. For the technical uses, Schottlaender, Hermes 64.228 ff.

Grk. φρήν, esp. pl. φρένες, in Homer when used in lit. sense (with reference to wounds) hardly 'diaphragm' in the strict sense, but rather as if membranes inclosing the vital organs (heart, liver, etc.); hence a vague general term for the vital organs and most frequently in fig. sense 'heart, mind' as the seat of both emotion and thought—in this sense mostly poetic, but important for the large group of derivs., in some of which the thought element is dominant, as φρονέω 'think', φροντίς 'thought, care', σώ-φρων 'of sound mind, wise, prudent' (but also 'of restrained senses'), in others the emotional, as εὔ-φρων 'cheerful, merry', εὐφραίνω 'cheer, gladden'. Etym. dub. Walde-P. 1.699. Boisacq 1037 f.

3. Lat. *animus* 'spirit' (16.11) also 'mind'. Fr. *esprit* 'spirit' (16.11) also 'mind'.

NIr. *aigne* (also 'spirit, desire, intention', etc.) fr. *aigneadh,* Ir. *aicned* 'nature', fr. a cpd. of *ad-* and the root in *gnīu* 'do, make', Lat. *gignere* 'beget', Grk. γίγνομαι 'be born, become'. Walde-P. 1.576. Pedersen 2.34, 534.

Ir. *intinn* 'intention, purpose', but also in certain phrases 'mind', fr. Lat. *intentiō.* Pedersen 1.234. Vendryes, De hib. voc. 147.

W. *meddwl,* orig. 'thought', vbl. n. to *meddwl* 'think' (17.13).

Br. *spered* 'spirit' (16.11), also 'mind'.

5. Goth. *aha* (reg. for νοῦς), beside *ahjan* 'think' : *ahma* 'spirit', OHG *ahta* 'intention, consideration, notice', OE *eaht* 'deliberation, council', OHG, OS *ahtōn* 'consider, take notice of, estimate', ON *ætla* 'think, intend', outside connections dub. Walde-P. 1.169. Feist 15.

Goth. *fraþi* (sometimes for νοῦς, but mostly 'thought, understanding') : *fraþjan* 'understand, think' (17.16).

Goth. *hugs* (νοῦς Eph. 4.17), ON *hugr* (Dan. *hu,* Sw. *håg* more nearly 'mood', except in certain phrases), OE *hyge,* OHG *hugu,* beside Goth. *hugjan,* etc. 'think' (17.13), deriv. Goth. *gahugds* (reg. for διάνοια, also νοῦς Rom. 7.25, and συνείδησις 1 Cor. 8.12, etc. : OE *gehygd* 'thought', OHG *gihugt* 'memory, joy', etc.), etym. dub. Walde-P. 1.378. Falk-Torp 424 f. Feist 272 f.

OE *mōd,* ME *mode,* OHG, MHG *muot,* partly 'mind' in intellectual sense, but more often with emotional value (cf. NE *mood* 'state of feeling', NHG *mut* 'courage') : Goth. *mōþs,* ON *mōðr* 'anger' (16.42).

OE *gewit(t),* ME *(i)wit,* also 'intelligence' (NE *wit*), and in the latter sense ON *vit,* OHG *wizzi,* MHG *witze* (NHG *witz*) : OE *witan,* OHG *wizzan,* Goth. *witan* 'know' (17.17).

OHG, MHG *sin,* NHG *sinn,* Du. *zin,* MLG *sin* (> Dan. *sind,* Sw. *sinne*), also and more orig. 'sense' (15.11).

Dan. *aand* 'spirit' (16.11), also 'mind'.

Du. *geest,* NHG *geist,* orig. 'spirit' (16.11).

Many of the words listed under 'mind' (17.11) are used also of the mind's activity, 'intelligence, reason', and some of them are repeated here as the best words for the latter notion. But this is also expressed by a variety of words, which are mostly derived from verbs for 'understand, think, perceive, distinguish, know', etc., but in actual usage are broader than 'understanding, thought, knowledge', etc. in the literal sense. Thus NHG *verstand* is more comprehensive than *verständnis* or *das verstehen.* Their varying sources may have some effect on their usage and feeling, but in general not permanently. Artificial technical distinctions like Kant's *verstand* vs. *vernunft* are ignored here.

For an exhaustive treatment of the usages, as regards words of this kind, of the OHG and MHG writers, cf. Jost Trier, Der deutsche Wortschatz im Sinnbezirk des Verstandes.

1. Grk. νοῦς 'mind' (17.11) also the main word for 'intelligence' and so in NG. But πνεῦμα 'spirit' (16.11) is used in NG for 'keen intelligence', much like Fr. *esprit* and NHG *geist.*

Grk. διάνοια, also 'thought, intention, purpose', fr. διανοέω 'have in mind, intend, propose', cpd. of νοέω 'think' : νοῦς 'mind' (17.11).

Grk. σύνεσις : συνίημι 'understand' (17.16).

2. Lat. *ratiō* (> It. *ragione,* Fr. *raison,* Sp. *razón*), orig. 'account', whence 'faculty or method of computation' > 'judgment, reason', etc. : *rērī* (*ratus sum*) 'count, calculate', then 'think, estimate, judge', Goth. **garaþjan* (in pple. *garaþana*) 'count', *raþjō* 'number, account', OHG *reda* 'account, speech, answer', OS *rediа* 'account', etc. Walde-P. 1.73 f. Ernout-M. 860 f. (but taking the Gmc. group as borrowed fr. Lat.). Feist 394.

Lat. *intellegentia* (> It. *intelligenza,* Fr. *intelligence,* Sp. *intelligencia,* Rum. *inteligenţa,* all lit. words), Lat. *intellēctus* (> It. *intelletto*), both orig. 'perception, discernment', fr. *intellegere* 'perceive, comprehend, understand' (17.16). Ernout-M. 537.

Rum. *deşteptăciune,* lit. 'wakefulness', fr. *deştepta* 'waken' (4.63).

3. Ir. *cīall,* NIr. *ciall* : W. *pwyll* 'wisdom, prudence, sense', Br. *poell* 'discretion, prudence, wisdom', prob. fr. the root in Ir. *ad-cīu* 'see'. Walde-P. 1.509. Pedersen 2.490. Thurneysen, Gram. 132.

Ir. *intliucht,* fr. Lat. *intellēctus* (above). Vendryes, De hib. voc. 147.

Ir. *cond* : Goth. *handugs* 'wise' (17.21), Lat. *condere* 'put together, establish'. Walde-P. 1.458. Pedersen 2.502.

NIr. *tuigsint,* fr. *tuigim* 'understand' (17.16).

W. *deall* : vb. *dealt* 'understand' (17.16). Also W. *deallgarwch,* deriv. of *deallgar* 'intelligent', cpd. of *deall* and *-car* 'loving, disposed to' (suffix form of *car* 'friend').

W. *rheswm,* fr. ME *resun* (below, 4). Parry-Williams 124.

Br. *skiant,* fr. Lat. *scientia* 'knowledge' (17.17). Henry 241.

4. Goth. *gahugds* (reg. for διάνοια) : *hugs* 'mind', *hugjan* 'think', etc. (17.11, 17.13).

Goth. *frōdei* (reg. for σύνεσις; also σοφία Lk. 2.52, and φρόνησις, Lk. 1.17, etc.), fr. *frōþs* 'wise' (17.21).

ON *vit,* ME *(i)wit,* OHG *wizzī* (Otfrid's favorite word, 'knowledge, recognition', hence the intelligence gained thereby; Trier, op. cit. 38 f.), MHG *witze* (but OE *gewit* chiefly 'mind', cf. 17.11) : ON *vita,* OHG *wizzan,* OE, Goth. *witan* 'know' (17.17).

ON *skilning* : *skilja* 'understand' (17.16).

OE *andgit,* also 'sense' : *ongietan* 'perceive, understand' (see 17.16, and 15.11).

OE *gescēad* (cf. *ratio gescead,* Aelfric Gram., Zupitza p. 35), lit. 'distinction, difference' : *gescēadan* 'separate, distinguish, decide', Goth. *ga-skaidan* 'separate', etc. (12.17).

ME, NE *intellect,* fr. Lat. *intellēctus* (above, 2).

NE *intelligence,* fr. Fr. *intelligence* (above, 2).

ME *reisun, resun,* NE *reason,* fr. OFr. *reison,* Fr. *raison* (above, 2).

OHG *furstantnessi* ('intellectus', Tat., Trier, op. cit. 32, 66), MHG *verstantnisse* (NHG *verständniss* now only 'understanding'), NHG, Du. *verstand* (MLG *vorstant* > Dan. *forstand,* Sw. *förstånd*) : OHG *farstantan* (*fir-, fur-*), Du. *verstaan,* etc. 'understand' (17.16). Falk-Torp 263. Weigand-H. 2.1165. Kluge-G. 654.

OHG *fernumest* (esp. Notker for *intellectus,* partly as 'perception, sense'; Trier, op. cit. 51), MHG *vernu(n)st, vernu(n)ft,* NHG *vernunft* (MLG *vornuft* > Dan. *fornuft,* Sw. *förnuft*) : OHG *farneman,* MHG *vernemen* 'take, grasp, comprehend, perceive, hear', NHG *vernehmen* (semantic development prob. influenced by Lat. *percipere, perceptio*). Falk-Torp 260. Weigand-H. 2.1157 f.

Du. *rede,* also 'speech', MDu. *rede, reden(e)* also 'propriety, account', etc. : OHG *reda* 'account, speech' (sometimes also 'intelligence', esp. Notker; Trier, op. cit. 48 f.), Goth. *raþjō* 'account, number' (cf. Lat. *ratio,* above, 2). Franck-v. W. 538 f.

5. Lith. *protas,* Lett. *prāts,* also 'mind' (17.11).

Lett. *jēga,* orig. physical 'power, strength', now mostly mental 'intelligence' = Lith. *jėga* 'power, strength' : Grk. ἥβη 'youthful strength, youth'. Walde-P. 1.206 f. Mühl.-Endz. 2.111.

6. ChSl. *umŭ, razumŭ,* etc., general Slavic, see 'mind' (17.11).

Russ. *razsudok,* orig. 'judgment' : *razsudit'* 'judge', cpd. of *sudit'* 'judge, try', deriv. of *sud* 'court'. Cf. Pol. *rozsądek* 'judgment, understanding', etc.

7. Skt. *mati-,* also 'thought, worship, intention, desire', etc. : *manas-* 'mind', *man-* 'think', etc. (17.11).

Skt. *buddhi-* (cf. Av. *baodah-* 'consciousness, perception') : *budh-* 'be awake, perceive, understand', Grk. πυνθάνομαι 'learn', etc. Walde-P. 2.147.

Av. *xratu-* = Skt. *kratu-* 'plan, will, intelligence' but in RV also 'power, might' (of body or mind) : Grk. κράτος 'strength, might, power', Goth. *hardus* 'hard', with shift from physical to mental power in Indo-Iranian. Cf. Lett. *jēga.* above, 5. Walde-P. 1.354 f. (rejecting the connection on semantic grounds!). Barth. 533 f.

'Think' is intended here to cover the most generic verbs expressing mental activity, whence are derived the common nouns for 'thought'. But most of them are used also in one or another narrower sense, as 'understand', 'intend', or esp. (cf. 17.14) 'be of the opinion'.

1. Grk. ἐννοέω (also 'understand' and so NG), cpd. of νοέω (less common for 'think', mostly 'perceive, intend') : νοῦς 'mind' (17.11).

Grk. φρονέω (but esp. 'be so and so minded' or 'be prudent') : φρήν used as seat of thought or emotion (17.11).

Grk. σκέπτομαι, orig. 'look' (15.52), then of the mind 'examine, consider' (Soph.+), in NG (also σκέφτομαι) the usual verb for 'think'.

Grk. στοχάζομαι 'shoot at, aim at' (in lit. sense), 'seek for' and esp. 'try to understand, guess at', NG pop. 'think about' with στοχασμός 'thought, reflection'.

2. Lat. *cōgitāre* (> Rum. *cugeta,* OIt. *coitare,* OFr. *coidier,* etc.), fr. **co-agitāre,* cpd. of *agitāre* 'put in motion, drive, impel, shake', etc., also of mental activity 'turn, revolve in the mind, ponder', frequent. of *agere* 'drive'. Ernout-M. 25 f. Walde-H. 1.242. REW 2027.

It. *pensare,* Fr. *penser,* Sp. *pensar,* fr. Lat. *pēnsāre* 'weigh, pay, requite', and of mental activity 'ponder, examine, consider', frequent. of *pendere* (pple. *pēnsus*) 'weigh, pay, ponder, consider' : *pendēre* 'hang', etc. Ernout-M. 750 ff. REW 6391.

Fr. *songer,* orig. 'dream', fr. Lat. *somniāre* 'dream' also 'think or talk idly', deriv. of *somnium* 'dream' : *somnus* 'sleep', etc. (4.61). REW 8086.

Rum. *gîndi,* deriv. of *gînd* 'thought, intention, wish', fr. Hung. *gond* 'care, worry'. Tiktin 680. Densusianu 1.378.

3. Ir. *imrādim,* also 'consider, deliberate', cpd. of *im(m)-* 'about' and *rādim* 'speak' : Goth. *rōdjan* 'speak', Lat. *ratio* 'reason', etc. (17.12). Walde-P. 1.74. Pedersen 2.591 f.

Ir. *smuainim,* NIr. *smaoinim,* etym.? Connection with ChSl. *myslĭ* 'thought', etc. (Pedersen 1.113) dub. Walde-P. 2.256.

W. *meddwl* : Ir. *midiur* 'judge', Lat. *meditāre* 'study, reflect, meditate', Grk. μέδομαι 'be mindful of', Goth. *mitan,* etc. 'measure'. Walde-P. 2.259 f.

Br. *soñjal,* fr. Fr. *songer* (above, 2).

4. Goth. *hugjan* (renders both φρονέω and νομίζω), ON *hyggja,* OE *hycgan,* OHG *huggen,* MHG *hügen,* with different suffix ON *hugsa* : Goth. *hugs,* ON *hugr,* etc. 'mind' (17.11).

Goth. *fraþjan* mostly 'perceive, understand' (17.16), but also for φρονέω 'think' and 'be minded', e.g. Rom. 12.3, 16.

(Goth. *þagkjan* 'ponder, reason, take counsel, be perplexed', rendering βουλεύομαι, λογίζομαι, etc.), Dan. *tænke,* Sw. *tänka* (meaning fr. LG, cf. ON *þekkja* 'perceive, know, be acquainted with'), OE *(ge)þencan,* OHG *denken,* etc., usual WGmc. words for 'think' : Lat. *tongēre* 'know' (old, rare), Osc. *tanginud* 'sententiā', Praenest. *tongitio* 'notio'. Walde-P. 1.744. Falk-Torp 1312.

5. Lith. *galvoti* (now the accepted term, vs. the following loanwords; cf. NSB), fr. *galva* 'head'.

Lith. *mislyti,* fr. the Slavic, cf. ChSl. *mysliti* (below). Brückner, Sl. Fremdwörter 109.

Lith. *dūmoti,* Lett. *duomāt,* fr. the Slavic, cf. Russ. *dumat'* (below). Mühl.-Endz. 1.533.

6. ChSl. *mysliti,* etc., general Slavic (but mostly replaced by *dumat'* in Russ.), fr. sb. ChSl. *myslĭ,* etc. 'thought', prob. (**mūdsljo-*) : Lith. *maudžiu, mausti* 'long for', Goth. *(ga-)maudjan* 'remind'. Walde-P. 2.255 f.

Russ. *dumat',* usual for 'think' in both senses but orig. only 'think' as 'be of the opinion', fr. the Gmc., cf. Goth. *dōmjan* 'judge', OE *dēman* 'judge, deem, think' (cf. 17.15). Berneker 237.

7. Skt. *cint-* (3sg. *cintayati,* denom. of *cintā-* 'thought, reflection, apprehension'), beside *cit-* (3sg. *cetati,* perf. *ciketa,* etc.) in act. 'perceive, observe, intend', etc., mid. 'reflect, meditate', Av. *čit-* (Barth. 427 f.), prob. fr. **kʷeit-* extension of **kʷei-* in Skt. *ci-* 'notice, perceive', ChSl. *čajati* 'expect, hope', Grk. τίω 'honor, esteem', τίνω 'atone, pay', etc. Walde-P. 1.509.

Skt., Av., OPers. *man-* (Skt. mostly 'think' = 'be of the opinion', OPers. only so) : Lat. *meminisse* 'remember', *mēns* 'mind', Grk. μιμνήσκω 'remember', Lith. *minėti* 'think about, remember, mention', *at-si-minti* 'remember', Goth. *munan* 'think' ('be of the opinion'), *gamunan* 'remember', *muns* 'thought, opinion', etc. Walde-P. 2.264 ff.

Skt. *dhī-, dhyā-* 'think', fr. 'observe' : Av. *dī-* 'look at, observe' (15.51).

'Think' in the sense of 'be of the opinion' is most widely expressed by verbs for 'think' = 'reflect' discussed in 17.13 or by cognates of these, or by verbs for 'believe' (17.15). But this is not true of all the IE languages, in some of which the usual terms are of quite different and diverse sources. Besides the words listed there are, of course, many other expressions, e.g. verbs for 'judge' used also for simple 'think' as here understood, as NE *judge*, NIr. *measaim*, etc.; or for 'suppose, guess', as NHG *vermuten;* ChSl. *gadati*, Russ. *gadat'*, Boh. *hádati* (: Lat. *pre-hendere* 'seize', etc.; Berneker 289 f.), NE *guess*, etc.

1. Words for 'think' = 'reflect' discussed in 17.13. It. *pensare*, Fr. *penser*, Sp. *pensar;* Goth. *hugjan*, ON *hyggja;* OE *þencan*, OHG *denken*, etc. (in earlier periods this sense rare, but quotable in OE; cf. NED s.v. *think* 9); Lett. *duomāt;* SCr. *misliti*, etc., Russ. *dumat';* Skt., Av. *man-*.

2. Derivs. of IE **men-* in Skt. *man-* 'think', etc. (17.13), but in sense belonging here. Ir. *do-moiniur;* Goth., OE *munan* (Goth. *ga-munan*, OE *ge-munan* 'remember'); Lith. *manyti* (also 'have in mind, intend'; cf. NSB s.v.); ChSl. *mĭněti*, SCr. *mniti*, Boh. *míniti*.

3. Words for 'believe' (17.15), in this sense most commonly in Romance and Gmc. So Lat. *crēdere* with its Romance derivs.; Br. *kredi* (this sense prob. fr. Fr. *croire*, since not common to the other Celtic forms); Dan., *tro* (cf. NE *trow* arch.), NE *believe*, NHG *glauben*.

4. Grk. *νομίζω*, orig. 'use, practice', whence 'take for, consider, think', deriv. of *νόμος* 'usage, custom, law' (21.11).

Grk. *ἡγέομαι*, orig. and in Hom. only 'lead, conduct' (10.64), hence also 'hold, consider, think' (cf. Lat. *dūcere* 'lead' and 'reckon, consider').

Grk. *θαρρέω* 'be of courage, have confidence' (16.51), NG *θαρρῶ* freq. pop. term for 'think'. Cf. NE *dare say* expressing a mild opinion.

5. Lat. *arbitrārī* (partly legal term, but also common, esp. in Cic., for 'think, be of the opinion'), deriv. of *arbiter* 'witness, judge', etym. dub. Walde-P. 1.678. Ernout-M. 66. Walde-H. 1.62.

Lat. *opīnārī*, etym. dub. Walde-P. 1.177 (fr. *op-* in *optāre* 'choose, wish', Umbr. *upetu* 'eligito, optato'). Ernout-M. 704.

Lat. *putāre*, history difficult. Disputed whether of a single source or several. As 'cut' whence esp. 'trim, prune'

(trees) : Lith. *piauti* 'cut, mow'. As 'purify, cleanse' (wool) perh. : Skt. *pu-* 'purify', Lat. *pūrus* 'clean'. As 'reckon, count', whence 'suppose, think', it could come from either source (cf. *ratiōnem putāre* 'clear the account'); or, with ChSl. *pytati* 'examine, study', belong to what might possibly be still a third group. But on the whole the development 'cut, prune' > 'count, reckon' > 'suppose, think' is the most probable. Walde-P. 2.12, 13. Ernout-M. 828 f. Kretchmer, Glotta 10.164 f.

Lat. *cēnsēre*, orig. used with reference to a formally expressed opinion, resolve : Skt. *çaṅs-* 'recite, announce, praise', Av. *sąh-* 'recite, announce', OPers. *θah-* 'announce, say', etc. Walde-P. 1.403. Ernout-M. 173 f. Walde-H. 1.199 (with other views).

Rum. *socoti*, orig. only 'regard, esteem', prob. fr. Slavic, cf. Bulg. dial. *sokoti*, Ukr. *sokotyty* 'watch, take care of'. Tiktin 1452 f.

6. NIr. *sīlim* (*saoilim*), also 'expect,' Ir. *sāilim* 'expect, wait for', perh. : ON *seilask* (refl.) 'stretch out the hand, seek for', OPruss. *seilins* (pl.) 'mind', ChSl. *sila* 'strength', etc. (Walde-P. 2.460 f.) G. S. Lane, Language 7.282 f.

NIr. *ceapaim* 'think', fr. 'stop, catch, seize', prob. denom. of *ceap* 'block' (Ir. *cepp* fr. Lat. *cippus*). Pedersen 1.200.

W. *tybio*, fr. *tyb* 'opinion', etym.?

7. Goth. (beside *hugjan, munan*) once *ahjan* (for *νομίζω*) : *aha* 'mind' (17.11).

ON *halda*, lit. 'hold', but frequent in this sense (cf. Fritzner s.v. 25), as similarly NE *hold*, NHG *halten*.

Sw. *tycka*, also refl. *tyckas* 'seem' : ON *þykkja*, OE *þyncan*, etc. 'seem' (17.18), beside OE *þencan*, etc. 'think' (17.13). Falk-Torp 1308. Hellquist 1255.

OE *wēnan*, ME *wene* (NE *ween*), OHG *wānen*, MHG *wænen* (NHG *wähnen*), also 'hope' = ON *væna*, Goth. *wēnjan* 'hope' : Goth. *wēns*, ON *vān*, OE *wēn*, OHG *wān* 'hope' (16.63), NED s.v.

OE *dēman*, ME *deme* (NE *deem*), orig. 'judge' = Goth. *dōmjan*, OHG *tuomen* 'judge', fr. OE *dōm*, Goth. *dōms* 'judgment', etc. NED s.v. *deem*.

NE *guess* 'estimate', also familiar U.S. colloq. for 'think' (*I guess so*), ME *gessen*, of Norse orig. and deriv. of the root in NE *get*. NED s.v. Falk-Torp 311.

OHG–NHG *meinen*, Du. *meenen* (MLG *meinen*, *mēnen* > Dan. *mene*, Sw. *mena*) = OE *mǣnan* 'have in mind, purpose, intend, mean', NE *mean* : ChSl. *měniti* 'call to mind, mention, mean, think', perh. Ir. *mian* 'wish, desire', W. *mwyn* 'enjoyment'. Walde-P. 2.302 f. Berneker 2.49.

8. Lett. *šk'ist* : *skaitīt* 'count, reckon', Lith. *skaityti* 'count, read', prob. from **skʷeit-*, beside **kʷeit-* in Skt. *cit-*, *cint-* 'think' (17.13). Walde-P. 1.509. Mühl.-Endz. 4.47.

9. ChSl. *měniti* : OHG *meinen*, etc. (above, 7). Berneker 2.49.

Pol. *mniemać*, old *mnimać*, prob. fr. old *wnimać* in same sense = Russ. *vnimat'* 'hear, heed' (cpd. of ChSl. *imati* 'take'), crossed with *-mnieć* (in *po-mnieć* 'keep in the mind', etc.) : ChSl. *mĭněti*, etc. (cf. above, 2). Brückner 342. Berneker 264.

Words for 'believe' (a person as speaking the truth or a statement as true) had first the sense now surviving in NE *believe in*, NHG *glauben an*, etc., based on 'have confidence, faith in, trust'.

There is an inherited group common to Latin, Celtic, and Indo-Iranian, probably an old cult word.

1. IE **k̂red-dhē-*, cpd. of **dhē-* 'put, place' and *k̂red-* seen in Skt. *çrad-* (isolated in Ved. *çrad asmāi dhatta* 'believe in him!', etc.), this prob. not, as formerly assumed, the same words as IE **k̂red-*, **k̂r̥d-* in words for 'heart' (Lat. *cor, cordis*, Grk. *καρδία*, Ir. *cride*, etc., 4.44), but perh. : Ir. *cretair*, W. *crair* 'relic, reliquary'. Ernout-M. 229. Walde-H. 1.287. Vendryes, RC. 44.90 ff.

Lat. *crēdere* (> Romance words); Ir. *cretim*, etc., general Celtic; Skt. *çraddhā-*, Av. *zrazdā-* (init. *z* by assimilation).

2. Grk. *πείθομαι*, mid. of *πείθω* 'persuade', hence 'be persuaded, obey, trust' and finally (already in Hom.) simply 'believe' : Lat. *fīdere* 'trust' (this not used for 'believe', but *fidēs* 'faith, belief' serves as sb. also for *crēdere*). Walde-P. 1.139. Ernout-M. 358. Walde-H. 1.493 ff.

From the same root *πιστός* 'faithful' and *πίστις* 'faith, belief', whence *πιστεύω* 'trust' and 'believe', eventually displacing *πείθομαι*.

3. Goth. *galaubjan*, OE *gelīefan* (Anglian *gelēfan*, ME *ileve*, shortened *leve*, whence *beleve*, NE *believe*), Du. *gelooven*, OHG *gilouban*, MHG *gelouben*, NHG *glauben*, early also *gleuben* : Goth. *liufs*, OE *lēof*, etc. 'dear' (16.27), OE *lufu*, etc. 'love' (16.26), and OE *lof*, etc. 'praise' (16.79), with development of 'trust, believe' through 'be pleased, satisfied with'? Walde-P. 2.419. Feist 188. NED s.v. *believe*.

ON *trūa*, Dan., Sw. *tro*, ME *trowen*, NE *trow* (arch.), all orig. 'trust' (as Goth. *trauan*, OE *trūwian*, OHG *trūan*, etc.) : ON *trūr*, OE *trēowe*, etc., 'faithful' (16.65).

4. Lith. *tikėti*, Lett. *ticēt* : Lith. *tikti* 'fit, suit', *tiekti* 'prepare', *teiktis* 'be pleased', *tikras* 'real, correct, certain', outside connections dub. Leskien, Ablaut 287. Buga, Kalba ir Senovė 100 f. Mühl.-Endz. 3.179, 157. Otherwise Walde-P. 1.286 (: OHG *dingan* 'hope', for which see 16.63).

5. ChSl. *věrą jęti* (lit. 'take faith', reg. for *πιστεύω*), *věrovati*, SCr. *vjerovati*, Boh. *věřiti*, Pol. *wierzyć*, Russ. *verit'*, fr. *věra* 'faith' : Lat. *vērus* 'true', etc. (16.66).

Some of the words for 'understand' are connected with others of intellectual content discussed under 'mind', 'intelligence', or 'think'. Others represent fig. uses of 'put together', 'pick out', 'separate', 'stand' (WGmc.), and esp. 'take, seize, grasp'. This last named fig. use repeats itself in many other words besides those listed, e.g. NHG *fassen*, NE *grasp*, and the recent U.S. slang *I get you*.

1. Grk. *συνίημι*, lit. 'bring together' (as sometimes in Hom.) but mostly fig. 'perceive' and esp. 'understand', cpd. of *ἵημι* 'let go, throw, send' (10.25).

Grk. *συννοέω, ἐννοέω*, NG *ἐννοῶ*, cpds. of *νοέω* 'perceive, think' : *νοῦς* 'mind' (17.11).

Grk. *καταλαμβάνω* (as 'understand' Plato+), cpd. of *λαμβάνω* 'seize, take'. Hence NG pop. *καταλαβαίνω* (new present, as simple *λαβαίνω* formed to aor. *ἔλαβα*), often aor. *κατάλαβα* 'I understood' = 'I understand'.

NG *νοιώθω* (also 'perceive, feel'), new present for **ἐννοιόω*, fr. *ἔννοια* in its older sense 'thought, notion' (: *ἐννοέω*, above). Hatzidakis, Byz. Z.30.219 f.

2. Lat. *intellegere* (> Rum. *înțelege*), cpd. of *inter* 'between', and *legere* 'collect, choose'. Ernout-M. 537. Walde-H. 1.352. REW 4482.

Lat. *comprehendere* (> It. *comprendere*, Fr. *comprendre*, Sp. *comprender*), cpd. of *prehendere* 'take, seize' (11.14), also mentally 'grasp'. Ernout-M. 803. Meyer-Lübke 2106.

It. *intendere*, Sp. *entender* (Fr. *entendre* now esp. 'hear'), fr. Lat. *intendere* 'stretch (toward)', whence 'direct' and mentally 'direct the mind toward, intend', etc. Ernout-M. 1027. REW 2106.

It. *capire* (the usual spoken word), fr. Lat. *capere* 'seize, grasp, take'. REW 1625.

3. Ir. *tucu*, NIr. *tuigim* fr. **to-ucc-*, orig. same as in perfect. forms of *do-biur* 'bring' (see 10.62). Pedersen 2.471.

W. *deall*, etym.? Morris Jones 101 (: Skt. *dhī-* 'think').

Br. *klevout*, also and orig. 'hear' (15.41).

Br. *meiza*, fr. *meiz* 'comprehension, intelligence', MBr. *meis* : W. *meddwl* 'think', etc. Ernault, Glossaire 400.

4. Goth. *fraþjan* : Lith. *su-prasti* 'understand', etc. (below, 5).

ON *skilja*, properly 'separate, divide' (12.23), but reg. (as also NIcel.) for 'understand'. Hence ME *skille*, NE dial. *skill* 'understand' (NED s.v.).

OE *understandan*, ME *understande*, NE *understand;* OE *forstandan* (mostly

'oppose, withstand', but also 'understand', cf. NED s.v. *forstand*), Du. *verstaan* (MLG *vorstān* > Dan. *forstaa*, Sw. *förstå*), OHG *farstantan* (*fir-*, *fur-*), MHG *verstān*, NHG *verstehen*, cpds. of the verbs for 'stand', with development of 'stand under' and 'stand before' through the notion of 'be close to' (?). Cf. Grk. *ἐπίσταμαι* 'know how, know' (17.17).

OE *ongietan*, ME *angete*, also general 'perceive' ('see, hear, feel', etc.), cpd. of *-gietan*, in *begietan*, etc. 'get, obtain' (11.16).

NHG *begreifen*, also in other senses but now most commonly 'understand', cpd. of *greifen* 'seize, take hold of' (11.14) with same development as in Lat. *comprehendere*. Paul, Deutsches Wtb. 66.

5. Lith. *suprasti*, Lett. *saprast*, cpds. of Lith. *-prasti* (only in cpds. *at-prasti* 'break a habit', *įprasti* 'get used to', etc.), Lett. *prāst* 'understand, notice', with sbs. Lith. *protas* 'mind, reason', Lett. *prāts* 'reason' : Goth. *fraþjan* 'understand, think', *frōþs* 'wise', etc. Walde-P. 2.86. Mühl.-Endz. 3.378. Feist 165.

Lett. *jēgt* and cpds. (*nuo-*, *sa-*) fr. *jēga* 'understanding, good sense', orig. 'power, might', like Lith. *jėga* (4.81). Mühl.-Endz. 2.112.

6. ChSl. *razuměti*, also 'know' (cf. 17.17) but usual word for 'understand' (*συνίημι*, etc.) and so in modern Slavic, SCr. *razumijeti*, Boh. *rozuměti*, Pol. *rozumieć*, deriv. of ChSl. *razumŭ*, etc. 'intelligence, reason' (17.12).

Russ. *ponjat'*, cpd. of *-jat'* (only in cpds. *uzjat'* 'take', etc.), ChSl. *jęti* 'take', etc. Berneker 427.

7. Skt. several cpds. of *jñā-* 'know' (17.17), as *ā-*, *pra-*, *vi-*, are used, among other senses, for 'understand'.

Skt. *api-vat-*, Av. *aipi-vat-*, *aipi-aot-* prob. : Lith. *justi*, *jausti* 'feel, perceive' (also Lat. *vātēs*, Ir. *fāith* 'seer, poet'?). Walde-P. 1.216. Meillet, BSL 23.77. Barth. 41, 1343.

Skt. *ava-gam-*, lit. 'come down to' (cpd. of *gam-* 'go, come', 10.47) is used also for 'understand' (cf. BR. s.v.).

Br.	*gouzout, anaout*	NHG	*wissen, kennen*		

The two main notions which are covered by NE *know*, namely a) 'know as a fact' (*I know it is so* vs. *believe*) and b) 'be acquainted with' (a person or thing), were originally expressed by different words and still are in many of the IE languages. But even where there are two words, the distinction is not always

rigorously observed. Thus in NT *οὐκ οἶδα τὸν ἄνθρωπον* 'I know not the man' (Mt. 26.72, 74, Mk. 14.71, etc.), which in ChSl. is rendered once by *věmi* and three times by *znają* in the parallel passages. Grk. *γιγνώσκω* is rendered in Gothic by both *kunnan* and *witan*. OHG *wizzan* is sometimes used where NHG would require *kennen*, e.g. Tat. 186.4 *ni weiz ih inan noh ih ni weis was thu quidis* 'non novi illum neque scio quid dicas'. Fr. *savoir* is used for 'know of', sometimes in phrases where the sense is hardly distinguishable, if at all, from that of *connaître*. Hence the words are given here together, instead of in separate lists, but in the order of senses a and b according to their prevailing usage.

Most of the words belong to one or the other of two inherited groups, which had originally senses a or b respectively. Those of the second group are the most widespread, and in several languages have absorbed the uses belonging orig. to the first. But for sense a there are several others, based on notions like 'find out, distinguish, be wise', etc.

Differences of aspect (e.g. Grk. *γιγνώσκω*, Lat. *nōscere* in present 'come to know, recognize') are ignored.

Words for 'know' may cover 'know how' (to do something), and this sense became dominant in those which finally resulted in NE *can*, NHG *können*. The opposite development is seen in Grk. *ἐπίσταμαι*. Lith. *mokėti* (not included in the list) is 'know how, can' (write, read, etc.), also used of knowing a lesson, a language, etc.

Virtually all the nouns for 'knowledge' are derived from the prevailing verbs, so that a separate list and discussion are superfluous.

1. IE **weid-* 'see' (15.51), perf. **woida* 'have seen' > 'know', whence the latter sense may be transferred to the other tenses or a distinct conjugation may be established for this sense. Walde-P. 1.236 ff. Ernout-M. 1105. Pedersen 2.522 ff.

Grk. *οἶδα*, pl. *ἴδμεν;* Ir. *fetar* (after neg.), *ro-fetar*, with sb. *fiuss* 'knowledge', fr. **wid-tu-;* hence the usual NIr. expressions like *tā a fhios agam*, lit. 'its knowledge is with me'; W. *gwn* 'I know', MBr. *gounn*, etc. (partly cpds. with vb. 'to be', as W. *gybyddaf* 'I shall see', W. *gwy-bod*, Br. *gou-zout* 'know'; cf. Pedersen 2.446 f.); Goth. *witan*, OE *witan*, OHG *wizzan*, etc., general Gmc. (NE *wit* arch. or legal), with pret.-presents, 1sg. Goth. *wait*, 1pl. *witum*, OE *wāt*, *witon*, etc. (NE *wot*); ChSl., Boh. *věděti*, Pol. *wiedzieć*, Russ. *vedat'* (now distinctly arch.); Skt., Av. *vid-* (esp. perfect).

Verbs for 'seem' are now used most commonly with reference to something which we rather think, but do not know positively, is so. Such relation to thought, opinion is original in a few (Grk. *δοκέω*, Goth. *þugkjan*, etc.), but most of them are based in origin on the notion of visual appearance. These are mostly cognate with verbs for 'see', 'show', or 'shine', or with adjectives for 'similar'. Some are refl. forms of verbs for 'put', 'do, make', or 'give', with development through an intermediate 'represent'.

In these verbs the impersonal use, 'it seems' (to me, etc.) is the most widespread, but with some exceptions the personal use is also not uncommon, e.g. Lat. *videor*, *vidēmur*, like NE *I seem, we seem.*

1. Grk. *φαίνομαι*, 'appear' in lit. sense and 'seem', mid. of *φαίνω* 'give light, cause to appear' : Skt. *bhā-* 'shine', etc. (15.56).

Grk. *δοκέω* 'think' and 'seem' : *δέκομαι* 'receive', Lat. *decet* 'is seemly', *docēre* 'teach', etc. Walde-H. 1.330 f. Ernout-M. 278 f.

Grk. *δοκέω* by orig. and use refers to thought, opinion, while *φαίνομαι* referred primarily to visual appearance, but was not so restricted, and eventually prevailed. Cf. *ἐμοὶ φαίνεται*, NG *μοῦ φαίνεται* 'it seems to me'.

Grk. *δέαμαι* (rare; *δέατο* Hom., *δέαται* Hesych., *δέατοι* Arc. inscr.) : *δέελος, δῆλος* 'visible, plain', Skt. *dī-* 'shine'. Walde-P. 1.82. Boisacq 855.

2. Lat. *vidērī*, pass. of *vidēre* 'see' (15.51).

It. *parere*, OFr. *paroir*, Fr. *paraître*, Sp. *parecer*, Rum. *parea*, fr. Lat. *pārēre* 'appear' (commonly 'obey', but this sense secondary), with 3sg. impers. *pāret* 'it is evident', etym. dub., perh. : Grk. *πεπαρεῖν* 'show'. Also cpd. Lat. *appārēre* > OFr. *apareir* > ME *apere*, NE *appear*. Walde-P. 2.6. Ernout-M. 733. REW 6235, 6237.

It. *sembrare*, Fr. *sembler*, fr. Lat. *simulāre* 'make like' with shift to 'be like, seem', deriv. of *similis* 'like' (12.92). Ernout-M. 942. REW 7925.

3. Ir. 3sg. *da, dar, indar*, as *da lim* (Thes. 2.291.5), *dar limm, indar limm*, NIr. *dar liom* 'it seems to me', prob. based on the *tā-* in supplementary forms of the verb 'be'. Pedersen 2.432 f.

Ir. *an-adchiter* 'videtur' (Wb. 12c), NIr. *dochitear* (*dochitear dam* 'it seems to me', Dinneen) pass. of *adcīu*, NIr. *dochim* 'see' (15.51).

NIr. *samhluighim* 'appear, be like', sometimes 'seem', as *samhluigheadh dam* 'it seemed to me' (Dinneen), fr. *samhail* 'likeness' (12.92).

W. *ymddangos*, cpd. of *dangos* 'show' (15.55).

Br. *he(ñ)velout*, fr. *he(ñ)vel* 'like' (12.92).

Br. *kaout doare* 'have the appearance', *doare* 'appearance' : W. *dwyre* 'rise', *dwyrain* 'the east', root connection? Pedersen 1.526. Henry 103.

Many other Br. phrases in Vallée s.vv. *paraître, sembler*.

4. Goth. *þugkjan* (reg. for *φαίνομαι* and *δοκέω*), ON *þykkja*, Dan. *tyckes*, Sw. *tyckas* (refl. : Sw. *tycka* 'think'), OE *þyncan*, ME *thinke* (NE *methinks*), OHG, MHG *dunken*, NHG *dünken*, all fr. another grade of the root in the vb. for 'think', OE *þencan*, etc. (17.13). In this group the impersonal use is the orig., and in large measure the dominant or even the only one. Falk-Torp 1308. NED s.v. *think*, vb.[1].

ON *sȳnast* (esp. impers., as *sȳnist mer* 'it seems to me'), Dan. *synes*, Sw. *synas*, refl. of ON *sȳna*, etc. 'show' (15.55). Falk-Torp 1227.

OE, OHG pass. of *sēon*, *sehan* 'see' (15.51), e.g. OE *byþ gesewen* beside *ys geþuht* = Lat. *vidētur* in Aelfric's Colloquy, *gesene woeron* Lk. 24.11 Lindisf. = *wæron geþukte* in WSax. versions, OHG *gisehan warun* in Tat. 223.5.

ME *sēme*, NE *seem*, in ME mostly 'beseem', fr. ON *sœma* 'conform to, honor', but with the sense of the parallel ON *sōma* 'beseem' : Goth., ON, OHG *sama-* 'same'. Falk-Torp 1234. NED s.v. *seem*, vb.[2].

NHG *scheinen*, Du. *schijnen*, also and orig. 'shine' (15.56), with development through 'be clear, appear' to 'seem', as in the sb. *schein* 'brightness', now 'appearance, pretense'. Paul, Deutsches Wtb. s.v.

5. Lith. *rodytis* (esp. *rodos* 'it seems'), refl. of *rodyti* 'show' (15.55). In older Lith. also *regėtis* (so Trowitsch NT vs. *rodytis* Kurschat), refl. of *regėti* 'see' (15.51).

Lett. *likties* (esp. *liekas* 'it seems', etc.), refl. of *likt*, *lieku* 'put' (12.12),

with development through 'put oneself, represent'. Mühl.-Endz. 2.469.

Lett. *šk'ist, šk'ietu* 'think' (17.14) is also used impers. for 'seem', as *šk'iet*, or refl. *šk'ietas* 'seems'. Mühl.-Endz. 4.47.

6. ChSl. *(j)aviti sę* (reg. in Gospels for φαίνομαι), refl. of *(j)aviti* 'show' (15.55).

SCr. *činiti se*, refl. of *činiti* 'do, make' (9.11), with development through 'make oneself, give oneself the appearance, represent'.

Boh. *zdati se*, Pol. *zdać się*, cpd. refl. of *dati, dać* 'give' (11.21), with development prob. through 'give oneself out as, represent' (this sense formerly in Pol. cf. Linde s.v.).

Russ. *kazat'sja*, refl. of *kazat'* 'show' (15.55).

7. Skt. *dṛçya-* or cpds., pass. of *dṛç-* 'see' (15.51).

17.19. 'Idea, notion', understood here as the 'mental image', is a kind of thought, only less complex than 'thought' or 'a thought' in general may be, and evoked by an actual object or act or commonly by a word. As is natural, it is generally expressed by words derived from verbs for 'think', 'know' or 'understand'—occasionally as 'representation'. A full list is not attempted, owing to the numerous gaps in our knowledge of the technical word, if any. Only the accepted classical and modern European words are noted.

1. Grk. ἔννοια, orig. 'act of thinking' (: ἐννοέω 'have in mind, think, understand', νοῦς 'mind'; 17.11, etc.), is the reg. term (Plato, Aristot., etc.) for 'idea, notion'.

Grk. ἰδέα, mostly 'appearance, form, kind' (: ἰδεῖν 'see'), then in Plato a sort of 'ideal type, pattern', but almost never 'idea' in the sense here intended. Hence the widespread Eur. words, It. *idea*, Fr. *idée*, NE *idea*, etc., at first in some of the Grk. senses, later also in the one here intended. NED s.v. *idea*.

2. Lat. *nōtiō* (> Romance words and NE *notion*), reg. term in Cic. = Grk. ἔννοια, fr. the root of *nōscere* 'know'.

Lat. *conceptum*, fr. pple. of *concipere* 'take hold of, conceive, perceive', not used for 'idea, notion', but source of modern learned words so used, as It. *concetto*, Fr. NE *concept*, etc.

3. NHG *begriff* (Du. *begrip*, MLG *begrep* > Dan. *begreb*, Sw. *begrepp;* Hellquist 60), fr. *begreifen* 'understand' (17.16). Paul, Deutsches Wtb. 66.

Cf. also as 'mental image' NHG *denkbild*, Du. *denkbeeld*, and NHG *vorstellung*, Dan. *forestillung*, Sw. *forestallning*, fr. vbs. NHG *vorstellen*, etc. 'represent'.

4. Lith. *supratimas*, fr. *suprasti* 'understand' (17.16).

Lett. *sajēga, sajēgums*, fr. *sajēgt* 'understand' (17.16).

5. SCr. *pojam*, Boh. *pojem*, Pol. *pojęcie*, Russ. *ponjatie*, fr. cpds. of vb. for 'take' (ChSl. *jęti*, etc. 11.13), through sense of 'understand' as in Russ. *ponjat'* (17.16).

The adjs. for 'wise', whence are derived the sbs. for 'wisdom', are in the majority of cases connected with words of intellectual force, as 'know, think, understand, mind', yet have come to mean something more than mere 'knowing', etc., that is, they usually imply also good sense, sound judgment, etc. Some are based on physical notions like 'quick, sharp, clear-sighted', etc., with special application to the mind. Several are used also for 'skilful' (in handicraft, etc.), and in some this sense is probably the earlier. Some include the notion of 'cunning, crafty' even in the derogatory sense, and in one case (Br. *fur* fr. Lat *fūr* 'thief') this is clearly the earlier stage.

As already implied by the preceding remarks, the words listed differ widely in their range of uses and many of them correspond only in part to NE *wise*. The sense of 'knowing, learned' beside 'having good judgment', etc. is stronger in some than in others.

1. Grk. σοφός (also 'skilful' in art or craft), etym. dub. Boisacq 888. Brugmann, IF 16.499 ff.

Grk. φρόνιμος : φρήν as 'seat of intelligence' (17.11), φρονέω 'think, be wise' (17.13). In NT and later this is more common than σοφός, which tends to be mainly 'wise' = 'learned'.

Grk. σώφρων, cpd. of σάος, σῶς 'safe, sound' (11.26) and φρήν (17.11).

2. Lat. *sapiēns*, pres. pple. of *sapere* 'taste' (15.32) and 'have sense, be wise' (whence in Romance 'know', 17.17). Hence also late Lat. *sapidus* 'savory' and 'wise', and **sapius* (*ne-sapius* 'foolish' Petr., modeled on *ne-scius*), the latter prob. the source of the Romance forms, It. *sapio* (old), *savio*, Fr. *sage* (> It. *saggio*), Sp. *sabio*. Ernout-M. 894. REW 7587.2 (preferring *sapidus*). Gamillscheg 780.

Lat. *prūdēns*, lit. 'foreseeing' (fr. *prōvidēns*), hence 'knowing, wise, prudent', etc.

Rum. *înțelept*, fr. Lat. *intellēctus*, pple. of *intellegere* 'understand' (17.16). Pușcariu 880.

3. Ir. *gāith*, beside *gāes* 'wisdom', etym. dub., perh. as orig. a poet-sage (like Lat. *vātēs*, Skt. *ṛṣi-*, etc.) : Skt. *gāi-* 'sing, chant, celebrate', *gīta-* 'sung', etc. (Walde-P. 1.526 f.). Pedersen 2.19.

Ir. *ecne* (also sb. 'wisdom', NIr. *eagna*), also *ecnaid*, NIr. *eagnuidhe*,

eagnaidhe : Ir. *asa-gninaim* 'know' (17.17). Pedersen 1.350, 2.546.

Ir. *glicc*, perh. : NHG *klug* (below).

W. *doeth*, fr. Lat. *doctus* 'learned', pple. of *docēre* 'teach, instruct'. Pedersen 1.228. Loth, Mots lat. 162.

Br. *fur* (W. *ffur* 'wise, learned, wary', arch.), fr. Lat. *fūr* 'thief', with semantic development through 'sly, cunning'. Loth, Mots lat. 171.

4. Goth. *snutrs*, ON *snotr*, OE *snotor*, OHG *snottar*, prob. as orig. 'scenting well' (of animals) : Norw. *snotra* 'scent, snort', OE *snȳtan*, OHG *snūzen*, ON *snȳta* 'blow the nose', etc. (cf. semantic development in Lat. *sapiēns*, above, 2). Walde-P. 1.397. Falk-Torp 1102. Feist 441 f.

Goth. *frōþs*, ON *frōðr* (mostly 'learned'), OE *frōd*, OHG *frōt, fruot*, MHG *vruot* : Goth. *fraþjan* 'understand', etc. (17.16).

Goth. *handugs* (with *handugei* most common word for σοφία) = ON *hǫndugr* 'capable, dexterous', OE *-hendig*, ME *hendy* (NE *handy* re-formed), MHG *handec, hendec* 'skilful, dexterous', etc., all prob. (but much disputed) derivs. of Goth. *handus*, etc. 'hand', with semantic development 'handy, skilful, etc.', whence Goth. 'wise'. Walde-P. 1.458 f. Falk-Torp 447 f. Feist 244.

ON *horskr* = OE, OHG *horsc* 'quick, lively' (OE esp. of mental action, 'quick-witted', so in part OHG), prob. : Lat. *currere* 'run', *cursus* 'running, course, way', etc. Walde-P. 1.428. Falk-Torp 421.

ON *vīss* (but this usually 'certain'), Dan., Sw. *vis*, OE *wīs*, ME, NE *wise*, Du. *wijs*, OHG *wīs(i)*, MHG *wīs(e)*, NHG *weise* (Goth. *-weis* in *un-weis* 'unlearned', etc.), fr. **weid-to-* : Goth., OE *witan*, etc. 'know' (17.17); ON *vitr* (more common than *vīss* in this sense), fr. weak grade of same root and *r*-suffix (cf. Grk. ἴδρις 'knowing, skilful'). Walde-P. 1.239. Falk-Torp 1387.

OE *glēaw* = OHG *glau* 'perspicacious, shrewd, ingenious', etc. ON *glǫggr* 'clear-sighted, sharp, stingy', Goth. *glaggwō* 'exactly', etc., fr. the root in OE *glōwan* 'glow', ON *glōa* 'shine, glitter', etc. Walde-P. 1.627. Feist 216.

OHG *spāhi*, MHG *spæhe* : ON *spār* 'prophetic', *spā* 'prophesy', OHG *spehōn* 'look at, spy', Lat. *specere* 'look at, behold'. Walde-P. 2.660.

NHG *klug* (often more nearly 'shrewd, clever'), fr. MHG *kluoc* 'fine, tender, neat, courteous', also 'cunning, clever, wise' (MLG *klok* > Dan. *klog*, Sw. *klok*), perh. : Ir. *glicc* 'wise', but root connection dub. Walde-P. 1.613. Falk-Torp 535. Weigand-H. 1.1065.

5. Lith. *išmintingas*, beside *išmintis* 'wisdom' : *mintis* 'thought, idea, meaning', *minėti* 'think about, remember', Lat. *mēns* 'mind', Skt. *man-* 'think', etc. (17.14).

Lett. *gudrs* (Lith. *gudras, gudrus* 'clever, crafty, cunning'), prob. as orig. 'experienced, practiced' : Lith. *gundu, gusti* 'become habituated, get practice in', this fr. an extension of the root in Lith. *gauti* 'get, obtain'. Mühl.-Endz. 1.675. Osten-Sacken, IF 33.264.

6. ChSl. *mądrŭ, prěmądrŭ*, SCr. *mudar*, etc., general Slavic : Lith. *mundrus, mandrus* 'lively, reckless', OHG *muntar* 'zealous, dexterous, lively', fr. the root in Grk. μανθάνω 'learn', Skt. *medhā-* 'mental power, wisdom, thought', Av. *mązdā-* 'memory, remembrance', etc. Walde-P. 2.271.

7. Skt. *vidvāṅs-, viduṣ-*, perf. act. pple. of *vid-* 'know' (17.17).

Skt. *jñānin-, prajña-*, etc., fr. *jñā-* 'know' (17.17).

Av. *mązdra-*, deriv. of *mązdā-* 'fix in the memory, have in mind', cf. Skt. *mandhātar-* 'thoughtful or pious man', prob. fr. IE **men-* 'think' and **dhē-* 'put, place'. Walde-P. 2.271. Uhlenbeck 215. Barth. 1181.

Av. *dāθa-*, as orig. 'having insight' : Av. *dī-, dā-* 'see', Skt. *dhī-, dhyā-* 'contemplate, meditate, think', etc. Walde-P. 1.831 f. Barth. 731.

Br.	*diod, sot*	NHG	*töricht, närrisch, dumm, albern*		

The difference that is felt between NE *foolish* (milder than the sb. *fool*) and the more opprobrious *stupid* is approximately matched in some of the other words listed, e.g. NHG *töricht* vs. *dumm*. But in general such a distinction will not hold.

Some of the words are merely etymological opposites (neg. cpds., etc.) of words for 'wise', without necessarily being so mild as NE *unwise*. The majority are based upon diverse notions, e.g. 'soft, weak, stricken, stunned, dumb, wandering, confused', with specialized application to the mind. A few are from (having the mind of a) 'beast, animal' (Fr. *bête*, etc.) or 'chicken'(?). Several come from or through the notion of 'simple', which tends to develop a pejorative sense in many words besides those included in the list, e.g. NE *simple* now dial. in this sense, but preserved in *simpleton;* Fr. *simple*, NHG *einfältig*, etc.; NE *daft* beside *deft* (NED s.v. *daft*), etc.

Some words for 'foolish' have come to be used also or mainly for 'mad, crazy', as Grk. τρελλός, Fr. *fou*, NHG *toll* (17.23).

1. Grk. ἄφρων, neg. cpd. with -φρων and so opposite of σώ-φρων 'wise' (17.21).

Grk. μωρός (> Lat. *mōrus* Plaut.), prob. : Skt. (Ved.) *mūra-* 'dull, stupid, foolish', IE **mō(u)ro-*, root connection? Walde-P. 2.303. Boisacq 655. NG lit. in this sense, but pop. μωρό 'baby', and voc. μωρέ > βρέ in familiar address.

Grk. βλάξ, NG pop. βλάκας, prob. as orig. 'weak, soft' fr. *μλᾱκ- : μαλακός 'soft', etc. (15.75). Walde-P. 2.290. Boisacq 121.

Grk. ἀνόητος (also 'not thought of, unthinkable'), neg. cpd. of νοητός 'mental', fr. νοέω 'perceive, think' : νοῦς 'mind' (17.11).

Grk. ἠλίθιος : ἠλεός 'distraught, crazed', ἄλη 'wandering', ἀλάομαι 'wander, roam', etc. Walde-P. 1.87 f. Boisacq 319.

NG τρελλός (esp. 'mad, insane', but

also 'foolish') prob., despite some difficulties, fr. τραυλός 'lisping' with shift from oral to mental defect. Cf. Byz. τραλίζομαι 'be stunned, dizzy', perh. influenced in form and sense by the synonymous ζαλίζομαι. For the NG ε cf. dial. βελάνι, for βαλάνι, τρευλός for τραυλός, etc. (Hatzidakis, Μεσ. 1.238). Koraes, Ἄτακτα 1.186. Pernot, Recueil 96, note 59.

NG κουτός, orig. dub., perh. as orig. 'having the brain of a chicken' : κόττος 'cock' (Hesych.), NG κόττα 'hen' (3.54). Kukules quoted in Glotta 5.285.

2. Lat. *stultus* (> It. *stolto*), *stolidus*, prob. as orig. 'stiff, standing stock-still' : *stolō* 'shoot, branch, twig', Grk. στελεά 'shaft', OE *steall* 'standing place, stall', etc. Walde-P. 2.644. Ernout-M. 985.

Lat. *fatuus*, etym. dub., perh. as orig. 'stricken' (in the head) fr. **bhăt-* in Gallo-Lat. *battuere* 'beat, strike'. Walde-P. 2.126. Walde-H. 1.464.

Lat. *stupidus* 'confounded, amazed', also 'senseless, stupid' (> It. *stupido*, Fr. *stupide*, etc.), fr. *stupēre* 'be struck senseless, be stunned, amazed, etc.' : Grk. τύπτω 'strike', Skt. *tup-* 'harm, hurt'. Walde-P. 2.619. Ernout-M. 990.

It. *sciocco*, etym. dub. Since the word has also the sense of 'tasteless, insipid', the deriv. fr. Lat. *ex-sūcus* (Diez 388) is the most attractive semantically, but the vowel development is unexplained. Spitzer, Arch. rom. 7.393, suggests connection with the cry to chickens (characteristically stupid animals), as *scio* used like NE *shoo.* REW 3075.

Lat. *follis* 'bag, bellows', in VLat. through 'windbag' > 'fool', glossing Lat. *fatuus, stultus*, and *morio* (CGL 5.568.58; 621.24). Hence (It. *folle* not in common use, Sp. *fol* fr. Prov.) OFr. *fol* 'fool, foolish' (or more general abusive term; Fr. *fou* 'mad') > ME *fol* 'fool, foolish'. REW 3422.

Fr. *sot*, orig. obscure. REW 2454. Bloch 2.286. Gamillscheg 809.

Fr. *bête*, adj. use of *bête* 'beast, animal' (3.11) and, of persons, 'stupid person, idiot'.

Fr. *niais*, orig. 'nestling', fr. VLat. **nīdax*, deriv. of Lat. *nīdus* 'nest', hence through 'helpless, simple' to 'foolish, silly' (cf. NE *silly*, below, 4).

Sp. *tonto* (also It. *tonto*, Rum. *tînt, tont*), orig. nursery word, imitative of sound. Cf. also NHG *tunte* 'an affected or prudish person'. REW 8988.

Sp. *necio*, fr. Lat. *nescius* 'ignorant, not knowing how, unable' (: *scīre* 'know', 17.17). REW 5900.

Rum. *prost*, orig. 'plain, simple', fr. Slav. *prostŭ* 'simple'. Tiktin 1270 f.

Rum. *neghiob*, apparently cpd. of neg. *ne-* (cf. *nebun* 'crazy', 17.23), but last member? Densusianu 1.38. Tiktin 1047.

Rum. *dobitoc*, adj. use of *dobitoc* 'animal, beast' (Slavic *dobytŭkŭ*) and of persons 'stupid person, idiot' (imitation of Fr. *bête?*). Tiktin 556.

3. Ir. *bāith, baeth* (beside *bāes* 'folly'), NIr. *baoth*, etym. dub., perh. orig. 'timid' : Skt. *bhī-* 'fear', Lith. *baimė* 'fear', etc. (16.53). Pedersen 1.56.

Ir. *drūth* sb. 'fool', also 'unchaste' : (or fr.) W. *drud* 'senseless, brave, expensive', etym.? Loth, RC 38.174 ff. Thurneysen, Keltorom. 56 ff.

NIr. *dallaigeanta*, deriv. of *dall-aigne* 'dull-mind', cpd. of *dall* 'blind, dull', and *aigne* 'mind' (17.11).

W. *ffol*, fr. ME *fol* (below). Parry-Williams 185 (Loth, Mots lat. 169 takes it fr. Fr.).

W. *ynfyd*, also 'furious, mad' (cf. *ynfydu* 'rave'), like MIr. *ōnmit* 'fool', fr. OE *unwita* 'fool, stupid person' (: *witan* 'know'). Pedersen 1.21.

W. *hurt*, orig. 'hurt', whence 'stunned' > 'stupid', fr. the English. Parry-Williams 172.

Br. *diod*, fr. pop. Fr. *diot* for *idiot* 'idiot, fool'. Henry 99.

Br. *sot*, fr. Fr. *sot*.

4. Goth. *unfrōþs* (reg. for ἄφρων, also ἀνόητος), neg. cpd. of *frōþs* 'wise' (17.21).

Cf. other similar Gmc. cpds. for 'unwise', or in part 'foolish', not included in the list: Goth. *unweis*, ON *ūvitr*, OE *unwīs*, OHG *unwīs;* ON *ūfrōðr*, OHG *unfruot* (OE *unfrōdness* 'ignorance', but *unfrōd* 'not old'); ON *ūsnotr*, OE *unsnotor;* OE *unglēaw;* MHG *unspæhe*, etc.

Goth. *dwals* (for μωρός), OE *dol*, ME *dull*, NE *dull*, OHG, MHG *tol* (NHG *toll* 'mad'), OHG *tulisc* : Goth. *dwalmōn* 'rage', OE *ge-dwolen* 'perverse, wrong', *dwelian* 'lead astray', OHG *twallen* 'halt, stop', etc. fr. the same root as Grk. θολός 'dirt', θολερός 'muddy, turbid', etc. Walde-P. 1.843. Feist 130.

ON *heimskr*, through 'inexperienced' fr. 'home-bred' (cf. *heimskt er heimalit barn*), fr. *heimr* 'abode, land', in the older sense 'home' (cf. *heima* adv. 'home, at home'). Torp, Nynorsk 206. Vigfusson 251.

Dan. *taabelig*, fr. *taabe* 'fool', Sw. dial. *tåp, tåpa*, etc., prob. as 'fumbler' : Sw. dial. *tåpa* 'touch lightly', MLG *tāpen, tappen* 'grope, fumble, pluck', ME *tappe*, NE *tap*, etc. Falk-Torp 1237.

Sw. *tokig*, fr. *tok* 'fool', cf. Dan. dial. *tok(k)et* 'crazy', *tokke* 'act crazy', etc., orig. dub., perh. fr. MLG *token* 'play, joke'. Falk-Torp 1238. Torp, Nynorsk 793. Hellquist 1200.

OE *dysig*, ME *dysi, dusi* (NE *dizzy* now only dial. in this sense, and not in common use since 13th cent.; NED s.v.), OHG *tusīc*, MHG *tōreht, toereht, toerisch*, etc., NHG *töricht;* OE *dwǣs, dwǣslīc*, Du. *dwaas*, MLG *dwās*, (MHG *twās, dwās* 'a fool') : OFris. *dusia* 'be dizzy', MLG *dusen, dosen* 'pass by without thought', etc., fr. a parallel extension of the root in OE *dēaf* 'deaf' and *dumb* 'dumb' (4.95, 4.96). Walde-P. 1.845. Weigand-H. 1.398, 2.1053 f. Franck-v. W. 144.

OE *sot*, ME *sott* (but mostly sb. 'fool', NE *sot*), Du. *zot*, MLG, MHG *sot* (also sb. 'fool'), apparently early loanwords fr. OFr. *sot* (above, 2). NED s.v. Frank-v. W. 827.

ME *fol* (adj. and sb.), whence *folish*, NE *foolish*, fr. OFr. *fol* (cf. above, 2).

NE *silly*, early also 'feeble-minded' and 'pitiful, weak, helpless', ME *sily, seli* 'innocent, harmless, blessed, happy', OE *gesǣlig* 'happy, prosperous, fortunate', etc. = OHG *sālig* id. (NHG *selig*) : Goth. *sēls* 'good', OE *sǣl* 'happiness', etc. Semantic development through 'harmless, helpless, weak, simple'. NED s.v.

OHG *tumb*, MHG *tump*, NHG *dumm* (hence this sense in Dan., Sw. *dum*), Du. *dom*, in OHG also 'deaf, mute' = OE *dumb*, ON *dumbr*, Goth. *dumbs* 'dumb', (see 4.95, 4.96).

The popular use of NE *dumb* in this sense in U.S. is doubtless due to German (and Dutch?) influence (cf. Mencken, American Language 109,112), but cf. also the quotations in NED s.v. 7, fr. 16–17 cent.

NHG *närrisch*, fr. sb. *narr*, OHG *narro* 'fool', etym. dub. Weigand-H. 2.273. Kluge-G. 410. Falk-Torp. 754 f.

NHG *albern*, fr. MHG *alwære* 'simple', OHG *alawāri* 'kind'. Weigand-H. 1.36.

5. Lith. *kvailas*, cf. *kvailti* 'become foolish', *kvailinti* 'make stupid', etc., etym.? Cf. Berneker 657.

Lith. *paikas* : *piktas* 'angry, bad', etc. (16.42).

Lith. *durnas*, fr. the Slavic, cf. Pol. *durny* 'foolish, proud', Russ. *durnoj* 'bad,

ugly' (16.72), *dur'* 'folly', *durak* 'fool', etc. (below, 6).

Lett. *g'ek'īgs*, deriv. of *g'ek'is* 'a fool', fr. MLG *geck*, cf. Du. *gek* 'crazy' (17.23). Mühl.-Endz. 1.695.

Lett. *mul'k'isks, mul'k'īgs*, derivs. of *mul'k'is* = Lith. *mulkis* 'fool, idiot', prob. : Grk. βλάξ, etc. (above, 1), rather than : Skt. *mūrkha-* (below, 7). Walde-P. 2.290. Mühl.-Endz. 2.666.

Lett. *dumjš*, fr. MLG *dum* (above, 4). Mühl.-Endz. 1.514.

6. ChSl. *bezumĭnŭ* (ἄφρων, Lk. 14.40, 12.20), Russ. *bezumnyj* (also 'mad, crazy'), deriv. of *bezŭ* 'without' and *umŭ* 'mind, reason' (17.11).

ChSl. *bujĭ* (μωρός, Mt. 23.17, 19, etc.), also 'wild, fierce' (Russ. *bujnyj* 'turbulent, wild, violent', etc.), prob. : Skt. *bhūyas-* 'more, more numerous, greater, stronger', *bhūri-* 'abundant, much, vast, great', etc., fr. an imitative **bhu-* in words for 'blown up'(?). Walde-P. 2.115. Berneker 98. Trautmann 40.

SCr. *budalast*, fr. *budala* 'fool', fr. Turk. *budala* 'silly, foolish'. Berneker 96.

SCr. *glup*, Boh. *hloupý*, Pol. *głupi*, Russ. *glupyj*, perh. old Gmc. loanword, cf. ON *glōpr* 'idiot, baboon' : *glœpr* 'crime, wickedness', *glœpask* 'transgress, do foolishly' (modern 'be fooled'), etc. (cf. Walde-P. 1.626, Falk-Torp 325). So Berneker 308 f., but not mentioned by Stender-Petersen. Brückner 145 takes as fr. same root as ChSl. *gluchŭ*, etc. 'dumb'.

Boh. *bláznivý, bláznavský*, fr. *blázen* 'fool' (Pol. *błazen*, etc. id.) : ChSl. *blazna* 'error, offense', *blazniti* 'cause to stumble', etc., root connection dub. Berneker 58 f.

Boh. *pošetilý*, deriv. of *(po)šetiti se* 'become foolish', cf. *šetek* 'goblin, sprite', etym.? Miklosich 338.

Pol. *nierozsądny*, neg. of *rozsądny* 'intelligent' : *rozsądek* 'judgment, understanding'; cf. Russ. *razsudok* 'reason, intelligence' (17.12).

Russ. *durackij*, fr. *durak* 'fool' : *dur'* 'folly', *durnoj* 'bad, ugly', etc. Berneker 239.

7. Skt. *mūrkha-* : *mūrch-* 'congeal, become solid, faint'. Walde-P. 2.280.

Skt. *mūḍha-*, lit. 'bewildered, gone astray', fr. *muh-* 'go astray, err, be bewildered', etc. Uhlenbeck 228.

Skt. *jaḍa-*, lit. 'cold, rigid, numb', etym. dub. Uhlenbeck 96.

Skt. *mūra-*, cf. Grk. μωρός (above, 1).

Some of the words for 'insane' meant originally 'unsound', specialized to 'unsound of mind', or 'without mind, without wits'. But popular terms, analogous to NE *mad, crazy*, that are commonly used for 'insane' but are not confined to the strictly medical sense, are of diverse origin, related to words for 'foolish, crippled, twisted, raging, distracted', etc. A few are related to words for 'poet, seer, song', hence orig. 'inspired, enchanted, bewitched'.

Many of the more technical terms of Latin origin are omitted from the list, as It. *insano*, etc., It. *demente*, etc., Fr. *insensé* (lit. 'senseless'), Fr. *aliéné*, etc. (Lat. *aliēnus* 'strange').

1. Grk. μαίνομαι 'be furious, rage, be mad', whence pple. μαινόμενος or adj. μανικός 'mad', sb. μανία 'madness', all used most commonly in wider sense but covering also the notion of 'mad' = 'insane', see under Grk. μῆνις 'wrath', 16.42.

Grk. λύσσα 'rage, fury' (16.43), later also 'madness', whence adjs. λυσσαλέος, λυσσώδης (with νόσος) and, combined with form of preceding group, λυσσομανής.

NG τρελλός, also 'foolish', see 17.22.

2. Lat. *insānus*, lit. 'unsound' but in actual use 'unsound in mind', neg. cpd. of *sānus* 'sound, well' (4.83), this also esp. 'sound in mind, sane'. Similarly poet. *vē-sānus*.

Lat. *āmēns, dēmēns* (less technical than *insānus*), cpds. of *ā-* and *dē-* 'away from' (in cpds. often 'without') with *mēns* 'mind'.

It. *pazzo*, orig. a euphemistic term fr. Lat. *patiēns* 'suffering', in medicine 'the patient'. REW 6292.

Fr. *fou*, see under 'foolish' (17.22, Lat. *follis*).

Sp. *loco* (Port. *louco*), orig. dub. REW 9038a.

Rum. *nebun*, lit. 'not good', neg. of *bun* 'good'.

Rum. *smintit*, pple. of *sminti* 'confuse, put in disorder, displace', fr. Slavic, cf. ChSl. *sŭmęsti, -mętą* 'confuse'. Tiktin 1446 f.

3. Ir. *dāsachtach* (gl. *amens* Ml. 18a13, freq. in older language; also as sb. 'madman'), deriv. of *dāsacht* 'madness, fury' (16.43).

Ir. *mer* (cf. *fear fris-a-r-heterscarad a chiall, in duine mear* 'a man from whom his sense has parted, the insane person', Anc. Laws 5.234 bottom), NIr. *mear* 'swift, sudden, lively, valiant, joyous, giddy, raging, mad, wild' (Dinneen), hence *mire* 'madness', and for 'mad, insane' usually NIr. *ar mire* lit. 'on mad-

ness'; cf. Ir. *meraige* 'idiot', OBr. *mergidhaam* 'je suis fou, stupide', etym.? Loth, Voc. vieux-bret. 184 f. (: Grk. poet. μάργος 'mad').

NIr. (beside *ar mire*) also *ar buile* with *buile* 'frenzy, madness' (also gen. as adj. *fear buile* 'madman', cf. Dinneen, s.v.), etym.?

W. *gorffwyll*, adj. and sb. 'madness', cpd. of *gor-* 'super' and *pwyll* 'wisdom, discretion, prudence, sense' (: Ir. *ciall* 'reason, sense', 17.12).

W. *gwallgof*, old also sb. 'madness', cpd. of *gwall* 'defect, want' and *cof* 'memory, right mind, senses' (17.31).

Br. *foll*, fr. Fr. *fol*. Loth, Mots lat. 169.

Br. *diskiant*, neg. cpd. of *skiant* 'sense' (fr. Lat. *scientia* 'knowledge').

4. Goth. *dwalmōn* 'be mad' (renders μαίνομαι) : *dwals* 'foolish, stupid' (17.22).

Goth. *wōþs* (renders δαιμονιζόμενος, δαιμονισθείς), ON *óðr*, OE *wōd*, ME *wode* (NE *wood*, obs. or dial.), OHG *wuotag*, *wuotīg*, MHG *wüetec* (OHG *wuot*, adj. only in cpds.), orig. prob. 'inspired' (cf. ON *óðr* 'poetry', OE *wōþ* 'song, sound') : Lat. *vātēs*, Ir. *fāith* 'poet, seer'. Walde-P. 1.216. Falk-Torp 793. Feist 572 f.

ON *vitlauss*, OE *gewitlēas*, lit. 'witless', cf. ON *vit* 'intelligence, reason', OE *gewit* 'mind' (17.11).

Dan. *forrykt*, Sw. *förryckt*, see NHG *verrückt* (below).

Dan. *gal*, older *galen*, Sw. *galen* = ON *galinn*, lit. 'enchanted' also 'frantic, mad, sensual', pple. of *gala* 'crow, chant, sing' = OHG *galan* 'sing, bewitch', etc. Falk-Torp 294 f.

Dan. *vanvittig*, Sw. *vansinnig*, see under NHG *wahnsinnig*, below.

OE *gemǣd(e)d*, ME *madde*, NE *mad*, orig. pple. of an OE **gemǣdan* deriv. of *gemād* (*vecors gemaad*, gl.) = OS *gimēd* 'foolish', OHG *gimeit* 'foolish, boastful, vain', Goth. *gamaiþs* 'crippled, hurt', fr. the root of ON *meiða* 'injure, cripple', etc. Walde-P. 2.222. Feist 191. NED s.v. *mad*.

NE *crazy* (this sense since 17th cent.), older 'unsound, impaired', also 'ailing, diseased' (of body), orig. 'full of cracks or flaws' (so still *a crazy house, ship*), fr. *craze* 'a crack, breach, flaw', vb. *craze*, ME *crase* 'break violently, shatter', this, either through OFr. *acraser* 'crush', or directly, fr. an ON form like Sw. *krasa* 'crackle', NE *crash*, etc. of imitative origin. NED s.v. REW, 4762. Gamillscheg 341.

NE *insane*, fr. Lat. *insānus*.

ME *lunatyk*, NE *lunatic* (now mostly as sb.), fr. late Lat. *lūnāticus* 'moonstruck, epileptic', deriv. of *lūna* 'moon'. Cf. Grk. σεληνιάζομαι 'be epileptic' in NT, fr. σελήνη 'moon'. NED s.v.

Du. *gek*, MLG *geck* : NHG *geck* 'idiot', prob. = MLG *geck* 'something which may be turned' (a cover of a vessel, etc.), hence orig. a 'vacillating, changeable person'. Falk-Torp 318. Weigand-H. 1.641. Franck-v. W. 181.

Du. *dol*, NHG *toll* = OHG, MHG *tol* 'foolish' (17.22).

Du. *krankzinnig*, fr. *krank* 'sick' and *zin* 'sense'.

OHG *ursinnig*, *unsinnig*, MHG *unsinnec* (NHG *unsinnig* 'nonsensical, irrational', etc.), fr. OHG *ur-* 'out' or neg. prefix *un-*, and *sin*, NHG *sinn* 'sense'.

NHG *wahnsinnig* (> Sw. *vansinnig*), replaces older *wahnwitzig* by association with *wahn* (sb.) for MHG *wanwitzec* (MLG *wanwittich* > Dan. *vanvittig*, Sw. *vanvettig*), later form for MHG *wanwitze*, OHG *wanwizzi* 'lacking in intelligence', cpd. of *wan* 'lacking, empty', and OHG *wizzi* 'intelligence, wit' (17.12). Falk-Torp 1348. Weigand-H. 2.1200.

NHG *verrückt*, pple. of *verrücken* 'displace', applied to the brain as to a clock

that is 'out of order'. Similarly (prob. semantic borrowing) Dan. *forrykt*, Sw. *förryckt*, fr. the corresponding vbs. Falk-Torp 261.

NHG *irre*, as 'insane' esp. in *irrenhaus* 'hospital for the insane', orig. 'astray', fr. *irren* 'go astray'.

5. Lith. *pasiutęs*, pret. act. pple. of perfect. of *siuntu*, *siusti* 'go mad' : *siaučiu*, *siausti* 'winnow (grain), play, rage', Russ. *šutit'* 'joke', *šut* 'buffoon', Slov. *šutec* 'fool', root connection dub. Walde-P. 2.472. Trautmann 260.

Lith. *beprotiškas*, cpd. of *be* 'without, un-' and *protiškas* 'intellectual, mental' fr. *protas* 'mind, intelligence' (17.11). Cf. *beprotis* 'madman'.

Lett. *traks* (also Lith. *trakas*, KZ 52.285), perh. as orig. 'twisted' : Lat. *torquēre* 'turn, wind', etc. (10.13). Mühl.-Endz. 4.219.

Lett. *ārprātīgs*, cpd. of *ār* 'outside of' and *prātīgs* 'intelligent' fr. *prāts* 'mind, intelligence' (17.11).

6. ChSl. *neistovŭ* (*neistovŭ jestŭ* Mk. 3.21, Jn. 10.20), cpd. of neg. *ne-* and *istovŭ* 'true, genuine' (16.66). Cf. Russ. *neistovyj* 'furious, raging'.

SCr. *lud* = late ChSl. *ludŭ* 'foolish', Boh., Russ. *lud* 'fool' (both obs.), with obs. Russ. *ludit'* 'deceive', etc. : Goth. *liutei* 'deceit', etc. (16.68). Walde-P. 2.416. Berneker 743 f.

SCr. *mahnit* : *mahati* 'swing, brandish', ChSl. *mahati* 'swing', etc., with development through 'making wild gestures'. Berneker 2.4.

Boh. *šílený*, fr. *šíleti* 'be mad', this fr. MHG *schilhen*, NHG *schielen* 'squint', perh. also influenced by the group MHG *schel* 'loud sounding' (fr. *schal* 'sound'), also 'excited, wild', *schellec*, NHG *schellig* also 'mad' (Weigand-H. 2.694).

Pol. *szalony*, beside vbs. *szaleć*, *szalić* 'be mad, drive mad' : late ChSl. *bogomĭ šalenŭ* = θεόπληκτος, Boh. *šal* 'deceit' (16.68), *šaliti* 'deceive, cheat', SCr. *šaliti se*, Russ. *šalit'* 'play jokes', Russ. *šalet'* 'go mad', etc., without outside connections. Brückner 539 f. Miklosich 336 f.

Russ. *bezumnyj*, also 'foolish', as ChSl. *bezumĭnŭ*. See 17.22.

Russ. *sumasšedšij*, lit. 'gone out of reason', fr. *soiti* (pple. *sošedšij*) *s uma* 'go mad', lit. 'go off one's mind'.

7. Skt. *vātula-*, *vātūla-*, lit. 'windy, inflated with wind' (: *vāta-* 'wind', *vā-* 'blow', etc. 1.72). Cf. the derivation of Fr. *fou*. (17.22).

Skt. *unmatta-*, pple. of *unmad-* (*ud-mad-*) 'become disordered (in intellect), be distracted, frantic, mad', cpd. of *mad-* 'rejoice, be glad, be drunk', etc.

Br.	*deski*	NHG	*lernen*		

The complementary 'learn' and 'teach' are often expressed by related words. Thus 'learn' by refl. forms of words for 'teach' (Goth., ON, Balto-Slavic); or conversely 'teach' by caus. forms of words for 'learn' (Lat., Skt.). The two Gmc. groups represented by Goth. *laisjan*, OE *lǣran*, etc. 'teach' and OE *leornian*, OHG *lernēn*, etc. 'learn' are formally connected and in actual use much confused (see below). Other words also are used in both senses (mostly 'learn' extended to 'teach'), as NG pop. μαθαίνω, Fr. *apprendre*, W. *dysgu*, Br. *deski*. Such words or groups which belong in part under both headings are discussed here.

In general, words for 'learn' are based upon notions like 'take, receive, get' specialized to mental acquisition, 'come upon', 'become accustomed to', or in part are connected with other words of mental application.

1. Grk. μανθάνω, NG μαθαίνω (new pres. to aor. ἔμαθον; pop. also 'teach') : Goth. *mundōn sis* 'observe', ON *munda* 'aim', Av. *mazdāh-* 'memory', Skt. *medhā-* 'wisdom', fr. IE **mendh-*, ultimately IE **men-* 'think' with weak grade of **dhē-* 'put'. Walde-P. 2.270 f. Boisacq 607.

Grk. aor. ἐδάην, δαῆναι, etc. (poet.) 'learn' (also Hom. δέδαε 'taught'), fr. *δασ- : δήνεα 'counsels, plans', Skt. *daṅsas-* 'wonderful deed or power', Av. *dahišta-* 'most wise', etc. Walde-P. 1.793. Boisacq 168. Here also (rather than : Lat. *discere*, as commonly taken) Grk. διδάσκω 'teach'. Debrunner, Mélanges Boisacq 1.251 ff.

2. Lat. *discere* 'learn' (**di-dc-scere*) with *docēre* 'teach', prob. fr. the same root **deḱ-* as in Grk. δέκομαι 'receive' (Att. δέχομαι), ChSl. *desiti* 'find', also Grk. δοκέω 'seem' and Lat. *decet* 'is fitting', but semantic relations open to various interpretations. Most simply 'receive' > 'learn' (as in Fr. *apprendre*, ON *nema*, etc., below); Grk. δοκέω, Lat. *decet* based on notion of 'be acceptable'. Walde-P. 1.782 ff. Ernout-M. 272, 278 f. Walde-H. 1.331.

It. *imparare*, fr. VLat. **imparāre*, cpd. of *parāre* 'acquire, get' (11.16). REW 4293.

It. *apprendere*, Fr. *apprendre* (also 'teach'), Sp. *aprender*, fr. Lat. *appre(he)ndere* 'seize, lay hold of', cpd. of *pre(he)ndere* id. (11.14). REW 554.

Rum. *învăța* 'learn' and 'teach', also 'accustom', fr. VLat. **invitiāre*, deriv. of Lat. *vitium* 'fault, defect, vice', prob. with a local shift fr. 'bad habit' > 'habit, custom', hence 'habituate, accustom' > 'teach' > 'learn' (cf. Slavic group, below, 6).

3. Ir. *fo-gliunn*, vbl. n. *foglaim*, hence NIr. *foghlumaim* (*foghlumuighim*, etc.), cpd. of *fo-* 'under' and the root *glenn-* found only in cpds., e.g. *do-glinn* 'collects', *as-glinn* 'investigates', etc. : Russ. *gljadět'*, ChSl. *ględati* 'look at', OHG, MHG *glanz* 'shining', etc. Walde-P. 1.625. Pedersen 2.540.

W. *dysgu*, Br. *deski*, *diski* (both also 'teach'), fr. Lat. *discere* (above). Pedersen 1.200.

4. Goth. *laisjan* 'teach', *laisjan sik* 'learn', OE *lǣran* 'teach' (> ON *læra* 'teach'), ME *lere* 'teach' and 'learn' (cf. NED s.v.), NE *lere* obs. (but cf. sb. *lore*), MLG *lēren* (> Dan. *lære*, Sw. *lära* 'teach' and 'learn'; Sw. also refl. for 'learn' in phrases like 'learn English'), Du. *leeren* in both senses, OHG, MHG *lēren*, NHG *lehren* 'teach' but widespread dial. also 'learn', all orig. caus. of the root in Goth. pret.-pres. *lais* 'have learned, know how', Goth., OE, OHG *list* 'cunning, craft, wile', prob. the same as in Goth. *laists*, OE *lāst* 'footstep, track', Lat. *līra* 'furrow'. Walde-P. 2.404 f. Feist 320. Falk-Torp 676.

OE *leornian*, ME *lerne*, NE *learn*

(ME and NE locally also 'teach'), OHG *lernēn*, *lirnēn*, MHG, NHG *lernen* (dial. and formerly even lit. also 'teach', cf. Paul, Deutsches Wtb. s.v., Kretschmer, Wortgeogr. 36), Gmc. **liznan* 'become knowing', fr. the pple. of the same root as the preceding group.

ON *nema*, also and orig. 'take, seize' (: Goth., OE *niman*, etc., 11.13) but the usual word for 'learn' (largely replaced by *læra* in NIcel.).

5. Lith. *mokyti*, *mokinti*, Lett. *mācīt*, OPruss. *mukint* 'teach', refl. Lith. *mokytis*, *mokintis*, Lett. *mācīties* 'learn' : Lith. *mokėti*, Lett. *mācēt* 'know how, be able' (Lith. also 'pay, cost'), outside connections? Walde-P. 2.223.

6. ChSl. *učiti* 'teach', refl. *učiti sę* 'learn' (both often with *na-*), general Slavic (but SCr. *učiti* in both senses; Russ. *učit' urok* 'learn a lesson', but otherwise refl. for 'learn') : ChSl. *vyknąti* 'get accustomed to', Lith. *junkti* id. (hence of animals 'become tame'), Goth. *bi-ūhts* 'accustomed', Skt. *uc-* 'be accustomed, delight in'. Walde-P. 1.111.

7. Skt. *çikṣ-* 'learn', caus. *çikṣaya-* 'teach', Av. *sikš-* 'learn', desid. of Skt. *çak-* 'be strong, be able', Av. *sak-* 'understand thoroughly, have in mind', caus. *sāčaya-* 'teach'. Walde-P. 1.333. Barth. 1552 f.

Skt. *adhi-i* 'notice, understand' and esp. mid. 'learn', caus. *adhyāpaya-* 'teach', lit. 'come upon', cpd. of *i-* 'go, come'.

17.242. 'Study' (in school, in books, etc.) is sometimes covered by words for 'learn', as generally in Slavic (SCr. *učiti*, Boh. *učiti se*, etc.; otherwise Lat. loanwords). The special terms have arisen by specialization of 'pay attention to, be eager, zealous'. Thus Grk. μελετάω (: μελέτη 'care, attention' 16.14) 'care for, attend to, practice', whence also 'study', as reg. NG μελετῶ. Grk. σπουδάζω 'be eager' (: σπεύδω 'hasten'), late 'study', as reg. in NG. Lat. *studēre* (prob. fr. the root in Lat. *tundere*, Goth. *stautan* 'strike'. Walde-P. 2.618. Ernout-M. 990) 'be eager, strive for, apply oneself to', hence (first with *litteris*, etc., later alone) 'study', beside sb. *studium* 'zeal, study', whence, partly through VLat. **studiāre*, the widespread Eur. words, Fr. *étudier*, NE *study*, etc. (Romance, Gmc., Lett., Boh., Pol.).

The majority of the words for 'teach' are connected with others meaning 'learn' and have been discussed with the latter (17.24).

The others are mostly from 'point out, make known', but also from 'command, direct' and in one case from 'sing over'.

1. It. *insegnare*, Fr. *enseigner*, Sp. *enseñar*, fr. VLat. **insignāre*, for *insignīre* 'distinguish, mark', deriv. of *insignis* 're-

markable, notable, distinguished' : *signum* 'mark, sign' (12.94). REW 4462.

2. Ir. *for-canim*, cpd. of *for-* 'on, over' and *canim* 'sing', referring orig. to instruction by song (simply?) or magical incantations(?). Pedersen 2.480.

Ir. *mūn-* (in pret. *ro-m-mūnus* with infixed refl. pron. 'I have learned', vbl. n. *munud*), NIr. *mūinim*, etym.? Pedersen 2.582.

Br. *kelenn*, orig. only sb. *kelenn* 'lesson', cpd. of prefix *ke-* 'com-' and *lenn* 'reading' (fr. Lat. *legendum*). Henry 59, 183.

3. ON *kenna* 'know' and in caus. sense 'teach' = Goth. *kannjan*, OE *cennan* 'make known', etc. (17.17).

OE *tǣcan*, *getǣcan*, mostly 'show, point out', ME *teche*, NE *teach* : OE *tācn*, OHG *zeihhan*, Goth. *taikns* 'sign', Goth. *taiknjan* 'show', etc. Walde-P. 1.777. NED s.v. *teach*.

NHG *unterrichten* 'inform' and 'teach' (hence back-formation *unterricht* 'teaching'), in MHG 'arrange, inform, dispute', cpd. of *richten* 'arrange, direct'. Weigand-H. 2.1124.

MLG *underwīsen* (> Dan. *undervise*, Sw. *undervisa*), Du. *onderwijzen* (NHG *unterweisen* less common than *unterrichten*), cpd. of *wīsen* 'make known' : OE *wīs* 'wise', etc. Falk-Torp 1334.

4. Skt. *çās-* 'reprove, punish, give orders, rule', also 'instruct, teach' (whence *çāstra-* 'rule, teaching, doctrine'), Av. *sāh-*, *fra-sāh-* 'teach' (*sāsnā-* 'teaching, doctrine') : Arm. *sastem* 'scold, threaten, command', further connections dub. Walde-P. 1.358. Barth. 1574 f.

Skt. *upa-diç-* 'point out' and 'teach' (hence *upadeça-* 'instruction, teaching'), cpd. of *diç-* 'point out, show' : Grk. δείκνῡμι id., etc. Walde-P. 1.776.

Skt. *çikṣ-*, desid. of *çak-* 'be able' (9.95).

Skt. *adhyāpaya-*, caus. of *adhi-i-* 'understand, learn', lit. 'come upon', cpd. of *i-* 'go'.

Av. *daxš-*, esp. cpd. *fra-daxš-*, etym. dub. Walde-P. 1.784. Barth. 676.

Av. *xsā-* and *čaš-* (3sg. *čašte*), *ā-* and *s*-extensions of *kas-* 'notice, catch sight of' : Skt. *kāç-* 'be visible, appear, shine'. Walde-P. 1.510 f. Barth. 461, 541.

Br.	*skoliad*	NHG	*schüler*		

Many of the words for 'pupil' are, as one might expect, derivs. of those for 'learn' (17.24), that is, lit. 'learner'. Some are specialized from 'one who is brought up', a 'young person' or 'attendant', or in one case generalized from 'theological student'. Derivs. of words for 'school' (17.28) more often denote a member of a school or a learned person (like NE *scholar* in its current use), but also in some cases 'pupil' (as reg. NHG *schüler*).

From the nature of the records, the Goth., OE, OHG, and ChSl. words are mainly renderings of Grk. μαθητής, Lat. *discipulus* in its eccl. sense 'disciple' (of Christ), but cf. e.g. Mt. 10.24 ('the disciple is not above his teacher'), where the same words are used. But the modern words which are mainly 'disciple' and not common words for 'pupil' are omitted. Likewise omitted are those for 'student' in a college or university.

1. Grk. μαθητής : μανθάνω 'learn' (17.24).

Grk. φοιτητής (NG 'university student') : φοιτάω 'go to and fro, wander, frequent, resort to (a teacher or school)', etym. dub. Walde-P. 1.103. Boisacq 1033, 1122.

2. Lat. *discipulus*, doubtless felt as deriv. of *discere* 'learn', but as such the formation is unexplained, so perh. rather fr. an unattested **dis-cipere*, lit. 'take apart' (cf. *disceptāre* 'decide, judge, debate'). Walde-H. 1.355. Adversely Ernout-M. 272.

From its use in the church language as 'disciple' (of Christ) the word passed into the western Eur. languages, mainly in this restricted sense, though again extended somewhat ('disciple of Socrates', etc.; cf. NED s.v. *disciple*). Only Sp. *discípulo* and W. *disgybl* are in common use for 'pupil'. For the Celtic forms, cf. Loth, Mots lat. 161, Vendryes, De hib. voc. 135.

Lat. *alumnus* (> It. *alunno*, Sp. *alumno*) 'nursling, foster-child', whence (Cic.) 'pupil', fr. *alere* 'nourish, rear'. Ernout-M. 36. Walde-H. 1.34.

It. *allievo* (> Fr. *élève* > Rum. *elev*), deriv. of *allevare* 'rear' fr. Lat. *allevāre* 'lift, raise up, alleviate'. REW 359.

3. Ir. *dalte*, orig. 'foster-child', but usual also for 'pupil', perh. a cpd. *d-alte*, with *d-* zero grade of *ad-* 'to' and root of *alim* 'nourish'. Pedersen 2.292 (top).

Ir. *felmac*, cpd. of *mac* 'boy' with *fel* 'instruction'(?), prob. : *fili* 'poet', W. *gweled* 'see'. Stokes, Gloss. O'Dav. 880. Laws, Gloss. 346. The *felmac* according to Joyce's compilation (Social Hist. of Ireland 1.430 ff.) was actually the lowest grade in the monastic or eccl. system. For the various other grades of students in this and in the Bardic system cf. op. cit., and also on the value of various terms, cf. Anc. Laws 4.355 ff.

NIr. *scolāire*, also a 'scholar, student', fr. Lat. *scholāris* or more probably new deriv. of *scoil* 'school'. Vendryes, De hib. voc. 175.

W. *disgybl*, fr. Lat. *discipulus*, cf. above, 2.

Br. *skoliad* (Ernault 'écolier, élève, disciple'), deriv. of *skol* 'school'.

4. Goth. *sipōneis* (with vb. *sipōnjan* 'be a disciple'), prob. a loanword, but source uncertain. Feist 424.

ON *lærisveinn*, also *lærisunr*, Sw. *lärjunge*, cpds. of ON *læra*, Sw. *lära* 'teach, learn' and words for 'boy, son' or 'youth'.

Dan. *elev*, fr. Fr. *élève*.

OE *leornungcniht*, also *leornungcild*, cpd. of *leornung* 'learning' and *cniht* 'boy' or *cild* 'child'.

OE *þegn*, OHG *degan* 'servant, attendant' (19.43), also freq. 'disciple'. NED s.v. *thane*. Graff 5.119 ff.

ME *scoler(e)*, NE *scholar*, arch. or locally 'pupil' (NED s.v. *scholar*, 1 *b*), fr. OE *scolere* 'a scholar, learner', fr. late Lat. *scholāris* 'pertaining to school' (*schola*).

NE *pupil*, orig. 'young person in charge of a guardian', hence 'one receiving instruction', fr. Fr. *pupille*, Lat. *pūpillus* 'orphan, ward'. NED s.v.

Du. *leerling* (NHG *lehrling* 'apprentice'), deriv. of *leeren* 'learn'.

OHG *jungiro*, MHG *junger* (NHG *jünger* 'disciple' of Christ, but recently revived to designate a pupil in relation to

his master, cf. Paul, Deutsches Wtb. s.v.), comp. of *jung* 'young' in sb. use, orig. reflection of Lat. *iunior* 'younger', in MLat. esp. 'subject, apprentice, pupil'. Cf. OE *geongra* 'vassal, attendant, subject' also rendered 'discipulus' (Bosworth-Toller s.v.). Kluge-G. 271. Weigand-H. 1.955.

NHG *schüler* (rarely now for 'student, scholar'), fr. MHG *schuolære*, OHG *scuolāri* 'student, scholar', fr. late Lat. *scholāris* (cf. ME *scolere*, above). Weigand-H. 2.799.

5. Lith. *mokinys* and *mokintinis* (cf. NSB), Lett. *māceklis* ('Lehrling, Jünger', Mühl.-Endz. s.v.), derivs. of Lith. *mokyti*, *mokinti*, Lett. *mācīt* 'teach', refl. 'learn' (17.24).

6. ChSl. *učenikŭ*, SCr., Russ. *učenik*, Pol. *uczeń* (Boh. *učenik* esp. 'apprentice'), deriv. through pass. pple. *učenŭ* 'taught' of *učiti* 'teach'. Cf. ChSl. *učitelĭ*, etc. 'teacher' formed with suffix of agency.

Boh. *žák* (SCr. *đak* 'student', *đace* 'school-boy', Pol. *żak* 'school-boy') = ChSl. *dijakŭ* (Supr.), fr. Byz. διάκος, pop. form of Grk. διάκονος, orig. 'servant, attendant', but here 'deacon' in its early eccl. sense. Referring to a subordinate rank in the church, it was extended to include those studying for service in the church and then to students in general. Berneker 198 f. Brückner 661.

7. Skt. *çiṣya-*, lit. 'to be taught' : *çās-* 'teach' (17.25).

Skt. *chāttra-*, fr. *chattra-* 'parasol'. Orig. 'one who carries the parasol for the teacher'. Uhlenbeck 94.

Av. *aēθrya-*, fr. *aēθra-*, in *aēθrapati* 'teacher' (17.27). Barth. 20 f.

The majority of the words for 'teacher' are derivs. of the verbs for 'teach' (17.25), a few from words for 'school' (17.28). The others are words for 'master' used in specialized sense. Only the most generic terms are listed, with omission of others used mainly for 'tutor', 'instructor', 'professor', etc.

1. Grk. διδάσκαλος, NG pop. δάσκαλος, fr. διδάσκω 'teach'.

2. Lat. *doctor*, fr. *docēre* 'teach'.

Lat. *magister* (> It., Sp. *maestro*, Fr. *maître*) 'master, chief, head, director, leader' (19.41), as 'teacher' abbr. for *magister lūdī* (*lūdus* as 'school', cf. 17.28). Ernout-M. 580.

Rum. *învățător* (but now esp. 'teacher of a rural school', with other terms for teachers in city schools, *institutor*, *profesor*), fr. *învăța* 'teach'. Tiktin 845 f. Formerly and still dial. *dascal*, fr. NG δάσκαλος. Tiktin 506.

3. Ir. *forcitlaid*, fr. *forcital* 'teaching' : *for-canim* 'teach' (17.25).

NIr. *māighistir*, Br. *mestr*, fr. Lat. *magister* (above, 2). Pedersen 1.222.

W. *athro* = Br. *aotrou* 'master, lord', Ir. *altru* 'fosterer', fr. the root of Ir. *alim*, Lat. *alere* 'nourish', etc. Pedersen 1.137. Walde-P. 1.87.

Br. *skolaer*, fr. *skol* 'school'.

4. Goth. *laisareis*, Dan. *lærer*, Sw. *lärare*, Du. *leeraar*, OHG *lērāri*, MHG *lērære*, NHG *lehrer*, fr. Goth. *laisjan*, etc. 'teach'.

OE *lārēow*, ME *larew*, more usually *larthew*, *lorthew* implying an orig. OE **lār-þēow*, cpd. of *lār* 'teaching, learning doctrine' (: *lǣran* 'teach') and *þēow* 'slave' (19.42). NED s.v. *lorthew*.

OE *mægister*, ME *maister*, *meister* (in part fr. OFr. *maistre;* NE *master* still in this sense in 'schoolmaster', also in British usage as *head-master*, etc.), OHG *meistar*, MHG *meister* (NHG *meister* in this sense in Luther's Bible translation, but usual only in cpds., as *schulmeister*, etc.), fr. Lat. *magister* (above, 2). NED s.v. *master*. Weigand-H. 2.163. Kluge-G. 385 f.

ME *techer(e)*, NE *teacher*, fr. ME *teche*, NE *teach*.

5. Lith. *mokytojas*, *mokintojas*, fr. Lith. *mokyti*, *mokinti* 'teach'. Cf. Lett. *mācītājs* 'one who teaches', but chiefly 'preacher, pastor'. Mühl.-Endz. 2.576.

Lett. *skuoluotājs*, fr. *skuoluot* 'teach school', fr. *skuola* 'school'. Mühl.-Endz. 3.910.

6. ChSl. *učitelĭ*, etc., general Slavic, fr. ChSl. *učiti*, etc. 'teach' (Pol. *nauczyciel*, fr. the perfect. *nauczyć*).

7. Skt. *adhyāpaka-*, fr. *adhy-āpaya-* 'teach'.

Skt. *upadeçaka-*, fr. *upa-diç-* 'teach'.

Skt. *çikṣaka-*, fr. *çikṣ-* 'learn', caus. 'teach'.

Av. *aēθra-pati-*, cpd. of *aēθra-* (etym.?, cf. *aēθrya-* 'pupil') and *pati-* 'lord, master'. Barth. 20.

1. The majority of the Eur. words for 'school' are borrowed directly or indirectly fr. the Lat. *schola*, fr. Grk. σχολή 'leisure', hence also 'employment of leisure, learned discussion, lecture' and eventually 'school' (first as group, then as place), with late Grk. (Epict.), NG σχολεῖον (pop. σχολειό, σκολειό). Here belong all the Romance, Celtic, Germanic, the usual modern Slavic words, and Lett. *skuola* (fr. MLG *scole*).

2. Grk. διδασκαλεῖον, deriv. of διδάσκαλος 'teacher' (17.27).

3. Lat. *lūdus* 'play' (16.25) is also

used for 'school' (cf. Grk. σχολή). Ernout-M. 565.

4. Lith. *mokykla* : *mokyti* 'teach' (17.25).

5. Russ. *učilišče* : *učit'* 'teach' (17.25).

6. Skt. *vidyālaya-* (rare), lit. 'abode of knowledge' (*vidyā-* 'knowledge' : *vid-* 'know', 17.17).

Many of the words for 'remember' belong to an inherited group, from an IE root that is also widespread in words for 'mind' and for 'think', and several outside this group are connected with other words for 'mind' or 'think'. In another inherited group 'remember' or 'memory' (Indo-Iranian, Lat.) alternates with 'be anxious, care' (Grk., Gmc.). Some are connected with words for 'heart' (as = 'mind'), and some are from phrases 'come to', 'bring to', 'call to' with 'mind' expressed or understood. In several of the words the notion 'remind, call to mind in words, mention' is prominent.

The nouns for 'memory' are generally parallel to the verbs for 'remember', but note Lat. *memoria* vs. *meminisse*, representing two different inherited groups. Most of them cover both the abstract (faculty of) 'memory' and the concrete 'memory, remembrance', but some are used only in the latter sense, e.g. Fr. *souvenir* vs. *mémoire*, NHG *erinnerung* vs. *gedächtnis*.

1. IE **men-*, the same root as in words for 'mind', as Lat. *mēns*, etc. (17.11) and for 'think' as in Skt. *man-*, etc. (17.13). Walde-P. 2.264 ff. Ernout-M. 604. Boisacq 625 f., 638. Pedersen 1.171, 2.581. Berneker 2.45.

'Forget' as the opposite of 'remember' is not infrequently so expressed, that is, by words for 'remember' (or in some cases related words for 'mind' or 'think') with prefixes of negative force, just as in the now only dial. or illiterate NE *disremember*.

Other sources are 'lose' (with specialization to 'lose from the mind'), 'rub out', or transfer from impersonal 'escape notice, lie hidden, be left behind' to personal use—in one group 'make merry with' (> 'be careless, neglect, forget').

1. IE **mers-*, perh. the same as in Goth. *marzjan* 'vex', OE *mierran*, OHG *merren* 'vex, bother, hinder', etc., and fr. an extension of **mer-* 'rub' (Skt. *mṛ-* 'crush', etc.). Walde-P. 2.279.

Lith. *už-miršti*, Lett. *mirst*, mostly cpds. *aiz-mirst*, *pie-mirst;* Skt. *mṛṣ-*, NPers. *farā-mūšīdan* (Horn 812), Arm. *moṙanam*.

2. Grk. *λανθάνομαι* (also *λήθομαι*), esp. cpd. *ἐπι-*, mid. of *λανθάνω*(*λήθω*) 'escape one's notice', also caus. 'make forget', Byz., NG *λησμονῶ* (deriv. of Grk. *λήσμων* 'unmindful') : Lat. *latēre* 'be hidden', etc. Walde-P. 2.377 f. Ernout-M. 526. Walde-H. 1.768 f.

NG pop. *ξεχάνω*, also *ξεχνῶ*, new pres. to aor. *ἐξ-έχασα*, cpd. of *χάνω* 'lose', aor. *ἔχασα* (11.33). Hatzidakis, Einl. 410. Buck, Cl. Ph. 15.39.

3. Lat. *oblīvīscī* (pple. *oblītus*, whence VLat. **oblītāre* > Fr. *oublier*, Sp. *olvidar*, Rum. *uita*) : *ob-linere* 'rub out, smear over', hence 'rub out, efface' (writing) > 'efface from memory'. Ernout-M. 693. Walde-H. 1.807 f. REW 6015.

It. *dimenticare*, neg. deriv. of *mente* 'mind'. REW 5496.

4. Ir. *doroimnethar* (3sg.), vbl. n. *dermat*, whence MIr. *dermatim*, NIr. *dearm*(*h*)*adaim*, fr. a cpd. **di-ro-moin-* (with neg. prefix *di-*) : *for-aithminedar* 'remembers' (17.31), etc. Pedersen 2.581. Thurneysen, Gram. 528.

W. *anghofio*, neg. of *cofio* 'remember' (17.31).

W. *ebargofi*, cpd. of *eb* for *heb* 'without' and *argofio* (arch.) 'call to mind, remember', cpd. of *cofio* 'remember'.

Br. *ankounac'haat*, deriv. of *ankounac'h* 'forgetfulness', neg. deriv. of *kouna* 'remember' (17.31).

5. Goth. *ufarmunnōn*, cpd. of *ufar* 'over' (neg. force as in *ufar-swaran*

'swear falsely', NE *overlook*, etc.) and cognate of *munan* 'think', *ga-munan* 'remember'. Feist 512.

ON *gleyma*, orig. 'be gay, make merry', with dat. 'forget' (still in this construction in NIcel.), Dan. *glemme*, Sw. *glömma*, deriv. of ON *glaumr* 'merriment, cheer, noisy joy', with development fr. 'make merry with' > 'be careless with, neglect' > 'forget'. Falk-Torp 326. Hellquist 291.

OE *forgietan*, ME *forgete*, NE *forget*, Du. *vergeten*, OHG *fargezan*, MHG *vergezzen*, NHG *vergessen*, OHG *argezan* (more usual than *far-*), MHG *ergezzen*, cpds. of prefixes having neg. force and the root seen in OE *begietan*, OHG *bigezzan*, 'get' (11.16), hence 'lose' > 'forget'.

6. ChSl. *zabyti*, Russ. *zabyt'*, cpd. of *za-* 'behind' and *byti* 'be', semantic development prob. 'be left behind' > 'be forgotten' (cf. ChSl. pple. *zabĭvenŭ* 'forgotten') > 'forget' (cf. Grk. *λανθάνομαι*, above, 2). Berneker 114.

SCr. *zaboraviti* (similar form in Bulg. for 'forget'), cpd. of *za-* 'behind' and *boraviti* 'stay, tarry', semantic development as in preceding. Berneker 72.

Boh. *zapomenouti*, Pol. *zapomnieć*, cpds. of *za-* (cf. above, but here mere neg. force) and Boh. *pomenouti*, Pol. *pomnieć* 'remember' (neither now the usual word) : ChSl. *pomĭnĕti* 'remember' (17.31).

The 'meaning' (of a word, sentence, etc., in part also of an action) is expressed by derivs. of words for 'sign, point out, explain', and by words meaning primarily 'reason, thought, sense, understanding, intention, power, force, value, inwardness', etc., all of obvious application.

1. Grk. *σημασία*, the word finally adopted in grammar, fr. *σημαίνω* 'point out, signify', also 'mean' (hence mid. pple. *τὸ σημαινόμενον* 'meaning', Aristot. etc.), deriv. of *σῆμα* 'sign, mark' (12.94). Hence also the modern Eur. terms for the science of meaning, like NE *semasiology* and (fr. adj. *σημαντικός*) adj. *semantic*, sb. *semantics*.

Grk. *νοῦς* 'mind, reason' (17.11), also 'meaning' (Hdt.+).

Grk. *ἔννοια* 'notion, idea' (cf. *ἐννοέω* 17.13), also late and frequently in NG 'meaning'.

Grk. *δύναμις* 'power' (4.81), also sometimes 'meaning', like NE *force* (of a word).

For the verbal 'mean' NG has (be-

side *σημαίνω*) a pop. phrase *τί θὰ πῇ;* lit. 'what will it say?', like Fr. *que veut dire?*

2. Lat. *significātiō* (> Fr., NE *signification*, Sp. *-ación*), fr. *significāre* 'point out, signify' and 'mean' (whence It. *significato*, Sp. *significado*), cpd. of Lat. *signum* 'sign' (12.94).

Lat. *sententia* 'way of thinking, opinion', also 'meaning' (Lucr., Cic., etc.), also *sēnsus* (> It. *senso*, Fr. *sens*) 'sense, feeling', as 'meaning' mostly poet. and post-Aug. (freq. in Quint.) : *sentīre* 'feel' (15.11), whence also Sp. *sentido* 'sense, feeling' and 'meaning'. Rum. *sens* 'meaning' (vs. native *simţ*), fr. Fr. *sens*.

Lat. *vīs* 'strength, force', also sometimes 'meaning', like Grk. *δύναμις*, NE *force*.

Rum. *înţeles* 'understanding', also 'meaning', fr. *înţelege* 'understand' (17.16).

Rum. *însemnare*, old infin. of *însemna* 'note, denote, signify, mean', deriv. of *semn* 'sign' (Lat. *signum*, above).

3. Ir. *cīall* 'intelligence, reason' (17.12), also 'meaning' (cf. Sg. 140b.3,4, also K. Meyer, Contrib. 364).

Ir. *inne* (cf. Sg. 4b.4, gl. *significatio*) = *inne* 'intestine', orig. 'inner part', as **end-yo-* : Lat. *endo, indu, ind-* 'in', etc. Vendryes, MSL 15.358 f., but without mention of *inne* as 'meaning'.

NIr. *brīgh* 'power, force', also 'meaning'.

W. *ystyr*, Br. *ster*, fr. Lat. *historia* 'narrative, history', prob. as 'explanation', fr. the sense of 'subject of a discourse' and esp. the eccl. usage for biblical passages read and the responses to the readings (cf. Du Cange s.v. *historia*). Loth, Mots lat. 218 (without comment on semantic development).

W. *meddwl* 'mind, thought' (17.11), also 'meaning'.

Br. *talvoudegez* 'value' and 'meaning', fr. *talvout* 'be worth, cost, deserve'.

4. ON *þȳðing*, Dan. *betydning*, Sw. *betydelse*, NHG *bedeutung*, all orig. 'explanation, interpretation', fr. the vbs. ON *þȳða* 'interpret, mean', Dan. *betyde*, Sw. *betyda* (for *tyde, tyda* by influence of MLG form), NHG *bedeuten* 'mean, signify', MHG (*be*)*diuten* id., orig. 'put into the language of the people' (cf. OE *geþēode* 'language'), derivs. of ON *þjōð*, OHG *diot*(*a*), Goth. *þiuda*, etc., 'people, folk'. Walde-P. 1.712. Weigand-H. 1.349. Falk-Torp 65, 1306 f.

Dan., Sw., ME *mening*, NE *meaning*, orig. 'opinion, intention', etc. (so still in Scand.), fr. Dan. *mene*, Sw. *mena* 'have an opinion, mean, think', OE *mænan* 'intend, have an opinion', etc. : OHG, NHG *meinen*, etc. 'think' (17.14).

OE *tācnung*, ME *tokening* (also 'token, emblem, mark, portent, etc.'), Du. *beteeknis*, OHG *zeichnunga* (also 'descriptio', Graff), MHG (*be*)*zeichenunge*, *bezeichenheit*, *bezeichenisse* (NHG *bezeichnung* 'mark, description', etc.), fr. OE *tācnian* 'be a sign of, signify, mean', OHG *zeihhenen*, *zeihhonōn* 'show, signify', etc., these fr. OE *tācn*, etc. 'sign' (12.94). NED s.v. *tokening*. Weigand-H. 2.1309.

OE *andgit* 'understanding, sense' (15.11), also 'meaning'. Cf. Bosworth-Toller Suppl. s.v. *andgit*, IV.

NE *sense* (in this meaning since 1530, NED), fr. Fr. *sens* (above).

Du. *zin*, MHG *sin*, NHG *sinn*, orig. 'sense' (15.11, also 'mind' 17.11), as 'meaning' perh. by semantic borrowing fr. Lat. *sēnsus*, or Fr. *sens* (cf. above).

5. Lith. *reikšmė*, fr. *reiškiu*, *reikšti* 'reveal, mean' : *raiškus* 'apparent', Russ.-ChSl. *rĕsnyj* 'true', ChSl. *rĕsnota* 'truth'. Trautmann 242.

Lett. *nuozīme*, lit. 'mark', cpd. of *zīme* 'sign' (12.94).

6. SCr. *značenje*, Pol. *znaczenie*, Russ. *značenie* (cf. SCr., Pol., Russ. *znak* 'mark, sign'), Boh. *význam* : ChSl. *znati*, etc. 'know' (17.17).

SCr. *smisao*, Boh., Russ. *smysl* (Pol. *zmysł* also in this sense, cf. Linde s.v., but apparently not usual) = ChSl. *sŭmyslŭ* 'thought' (Supr.) : ChSl. *myslĭ* 'thought', *mysliti* 'think', etc. (17.13).

7. Skt. *artha-* 'aim, purpose' (17.41), 'object, thing', etc., also 'meaning'. Walde-P. 1.136. Uhlenbeck 13.

'Clear, plain' (to the mind, opposite of 'obscure'; as in NE *a clear statement, the meaning is plain*) is generally expressed by words for visually 'clear, bright' (15.57), most of them still used in the latter sense. Less common relations are with words for 'level, plain', 'open', and 'point out, explain'.

Several of the words listed cover also 'evident, manifest, obvious', but others in which this related but somewhat different sense is dominant, like NE *evident*, NHG *offenbar*, are not included.

1. Grk. *δῆλος*, Hom. *δέελος*, orig. 'visible, conspicuous', as once in Hom. and reg. in *ἀρί-δηλος*, *ἀρί-ζηλος* : *δέαμαι* 'seem', Skt. *dī-* 'shine'. Walde-P. 1.772. Boisacq 168.

Grk. *σαφής* (in Hom. only adv. *σάφα* 'clearly'), etym. dub. Boisacq 855.

Grk. *ἐναργής*, in Hom. 'visible, palpable', later also 'clear', with sb. *ἐνάργεια* 'clearness' : *ἀργής*, *ἀργός* 'shining, bright', Skt. *arjuna-* 'light, white', etc. Walde-P. 1.82. Boisacq 74.

Grk. *φανερός* 'visible, manifest', in NG the usual word for 'evident, clear' (to the mind) : *φαίνω* 'bring to light, show', etc., *φαίνομαι* 'appear, seem', Skt. *bhā-* 'shine', etc. (15.56, 17.18).

2. Lat. *clārus* (> It. *chiaro*, Fr. *clair*, Sp. *claro*, Rum. *clar*), also 'bright' (15.57), orig. 'loud' (15.45).

Lat. *plānus* 'level, flat' (12.71), freq. 'plain, clear' (Plaut.+), with adv. *plānē* 'plainly, clearly'.

Lat. *apertus*, lit. 'open', pple. of *aperīre* 'open' (12.24), cf. NHG *offenbar* 'evident, obvious'.

Lat. *ēvidēns* (> It., Sp. *evidente*, Fr. *évident*, ME, NE *evident*, but these mostly 'obvious, not requiring proof'), orig. of things 'visible, apparent', used from Cic. on for Grk. *ἐναργής*, cpd. of *ē* 'from' and *vidēns*, pple. of *vidēre* 'see' (cf. NHG *aus-sehen* 'appear'). Ernout-M. 312.

Lat. *perspicuus*, orig. 'transparent', fr. *perspicere* 'see through'.

3. Ir. *follus* (fr. **upo-luksu-*) : *so-lus* 'bright' (15.57).

Ir. *rēil*, prob. back-formation to vb.

rēlaim 'reveal', this fr. Lat. *re-vēlāre* 'uncover, reveal'. Walde-P. 2.366. Pokorny, KZ 46.152 f.

NIr. *lēir*, more usually, cpd. *soilēir* (with ameliorative prefix *so-*), fr. Ir. *lēir* 'visible', etym. dub. Walde-P. 2.381.

W. *goleu*, orig. 'bright' (15.57).

W. *eglur*, etym.?

Br. *sklaer*, orig. 'bright' (15.57).

4. Goth. *skeirs* = ON *skīrr* 'clear, bright, pure', OE *scīr* 'bright, glittering, clear' : ON *skǣrr* 'bright' (15.57).

ON *skȳrr*, beside *skȳra* 'explain', *skȳring* 'explanation', fr. a root **skeu-*, **skū-* beside **skəi-*, **skī-* in preceding group, but otherwise appearing mostly in words for 'cover', 'grow dusk', etc. For similar peculiar semantic relations in the other formal group, cf. Grk. *σκιά* 'shade'. Falk-Torp 1008, 1040.

Goth. *bairhts* 'bright' (15.57), also 'clear, manifest' (*bairht þatei* = *δῆλον ὅτι* 1 Cor. 15.27).

Goth. *swikunþs*, cpd. of *swi-* : *swes* 'own' (cf. OE *swutol*, below) and *-kunþs* 'known' (: *kunnan* 'know'), lit. 'self-known'. Feist 468.

Most of the words for 'secret' mean lit. 'hidden' and so are connected with the verbs for 'hide' discussed in 12.22.

1. Grk. κρυπτός, NG κρυφός : κρύπτω 'hide' (12.22).

Grk. λαθραῖος (in NG 'smuggled') : λανθάνω 'escape notice, lie hidden', mid. 'forget' (17.32). Boisacq 554 f.

2. Lat. occultus, pple. of occulere 'hide' : cēlāre id., etc. (12.22). Here also Lat. clandestīnus, deriv. through *clam-de of clam 'secretly, in private'. Ernout-M. 171 f. Walde-H. 1.196 f., 226 f.

Lat. secrētus, pple. of sēcernere 'put apart, separate, set aside', cpd. of disjunctive particle sĕ- and cernere 'separate, distinguish, decide'. Ernout-M. 178.

Hence It. segreto, Fr. secret, Sp. secreto; Rum. secret in the senses 'deserted, lonesome, cursed', but as 'secret' prob. fr. French. REW 7765. Tiktin 1405.

Rum. tainic, fr. the Slavic (tajĭnikŭ), cf. ChSl. tajĭnŭ, etc. (below, 6).

Rum. ascuns, lit. 'hidden' : ascunde 'hide' (12.22).

3. Ir. inchlide, pple. of ind-cel- (but no finite forms found) : celim 'hide'. Pedersen 2.485.

Ir. diam(a)ir (K. Meyer, Contrib. 630), etym.?

NIr. rūnach, rūnda, derivs. of Ir. rūn 'a secret' : OE, ON rūn 'secret, rune', Goth. rūna 'secret, mystery' (Walde-P. 2.350).

W. dirgel, cpd. of dir 'sure, certain' (often mere intensive prefix) and cel 'hidden' : celu 'hide'.

Br. kuzet, lit. 'hidden', pple. of kuzat 'hide'.

4. Goth. fulgins, beside sb. fulhsni : filhan 'hide'.

ON leyndr, leyniligr (Dan. lønlig, Sw. lönnlig, esp. poet. and arch., in Dan. freq. used by purists for hemmelig), derivs. of leyna 'hide'.

OE dīegel, ME diȝel (*daugilo-), beside OE dēagol, OHG tougal (*daugolo-), and OHG tougan, MHG tougen, prob. : OE dēag 'dye, color', dēagian 'to dye, color', but outside connections dub., possibly fr. the root in Lith. dvėkti 'breathe, pant', Lett. dukt 'roar, rage, storm', cf. dukans 'dark-colored', with semantic development from 'dusty, hazy, misty' or the like to 'dark', whence 'secret'? Walde-P. 1.838.

OE dierne, ME derne : OS derni, OHG tarni 'hidden', OHG tarnen 'cover, hide', OE darian 'lurk, lie hidden', perh. fr. the root in Skt. dhṛ- 'hold, support', etc. But semantic development ('hold' > 'lie quietly' > 'hide')? Walde-P. 1.858.

ME secre, secret, NE secret, fr. OFr. secré, Fr. secret (above, 2).

Du., NHG geheim, Du. heimelijk (MLG heimelīk > Dan. hemmelig, Sw. hemlig), NHG heimlich, in MLG, MHG chiefly 'intimate, familiar' whence 'private, secret', orig. 'domestic', fr. heim 'home, house'. Fali-Torp 397. Weigand-H. 1.653, 837.

5. Lith. slaptas, paslėptas, Lett. sleps, slepens : Lith. slėpti, Lett. slēpt 'hide'.

6. ChSl. tajĭnŭ, etc., general Slavic, beside taj adv. : tatĭ 'thief', Skt. (s)tāyu-, Av. tāyu- 'thief', Av. taya- 'secret, furtive', sb. 'thief', etc. Walde-P. 2.610.

7. Skt. gupta-, lit. 'guarded, hidden', pple. of gup- 'guard, hide', cf. Av. gufra- 'deep, mysterious, wonderful', root connection dub. Walde-P. 1.562.

Skt. gūḍha-, Av. gūzra- : Skt. guh-, Av. guz- 'hide'.

Words for 'sure, certain' are based upon such notions as 'firm, steady', 'decided', 'actual', 'trustworthy', and especially 'safe' ('free from danger' > 'free from doubt').

1. Grk. βέβαιος, orig. 'firm, steady' (: βαίνω 'walk, step, go'), hence also 'sure, certain', as reg. in NG.

Grk. ἀσφαλής 'safe' (11.26), sometimes also 'sure, certain', esp. in adv. ἀσφαλῶς.

NG σίγουρος, fr. a Ven. form of It. sicuro (below, 2). G. Meyer, Neugr. Stud. 4.81.

2. Lat. certus (> It. certo, OFr., Rum. cert, Sp. cierto; Fr. certain, fr. deriv. in -ānus), orig. 'determined, decided', pple. of cernere 'separate, distinguish, decide'. Ernout-M. 178. Walde-H. 1.205.

It. sicuro, Fr. sûr, Sp. seguro, Rum. sigur, fr. Lat. sēcūrus, orig. 'free from care' (cūra), hence 'free from harm or danger, safe' (11.26), hence also 'free from doubt, sure'.

3. Ir. derb, NIr. dearbh, as orig. 'firm' : Ir. dair 'oak', dron 'firm', OE trēowe 'faithful' (NE true), etc. Walde-P. 1.805. Pedersen 1.175.

Ir. demin, NIr. deimhin, etym. dub. Pedersen 1.174 (de-min as orig. 'without change' : Lith. mainas 'exchange', etc.). Walde-P. 2.241.

NIr. cinnte, lit. 'fixed', pple. of cinnim 'fix, determine'.

W. sicr, fr. ME siker (below, 4).

W. siwr, fr. ME, NE sure.

Br. sur, fr. Fr. sûr. 'Sure' also expressed by gwir 'true' (16.66) or anat 'known, clear, evident', fr. MBr. haznat, fr. *ati-gnatos (cf. Gall. Ategnatos) : Grk. γνωτός 'known', etc. Henry 11. Ernault, Dict. étym. 309.

4. Goth. astaþ 'certainty', perh. as 'firmness', deriv. of IE *stā- 'stand'. Feist 60.

Goth. þwastiþa 'certainty' : ga-þwastjan 'make firm, establish', ON þvest 'firm parts of the flesh'. Walde-P. 1.708. Feist 507.

Goth. -wiss (un-wiss 'uncertain'), ON vīss (in form = OE wīs 'wise', but in sense of 'certain' for viss), Dan. vis, Sw. viss, OE gewis (ME ywis adv.), Du. gewis, OHG giwis, MHG gewis, NHG gewiss, fr. *wid-to-, pple. of Goth. witan, etc. 'know' (17.17). Walde-P. 1.238. Falk-Torp 1388.

ME siker (OE sicor 'safe', as 'sure' 1200+, NE dial. sicker, cf. NED s.v.), MHG, NHG sicher (OHG sihhur 'safe'), MLG seker (> Dan. sikker, Sw. säker), Du. zeker, all orig. 'safe' and, like the Romance words, fr. Lat. sēcūrus 'safe'. Falk-Torp 965. Weigand-H. 2.857.

ME certeyn, NE certain, fr. OFr. certain (above, 2).

5. Lith. tikras (also 'real, correct', etc.) : tikėti 'believe' (17.15), etc.

Lett. druošs 'safe' (11.26), also 'sure, certain'.

6. SCr. siguran 'safe' (11.26) also 'sure, certain'.

Boh. jistý : ChSl. istŭ, istovŭ 'real, actual', istina 'truth', etc., general Slavic group mostly 'actual, true', etc. Berneker 435 f. Brückner 193 f.

Pol. pewny (Boh. pevný 'firm'), as orig. 'trustworthy' : ufać (f fr. pw), ChSl. upŭvati, Russ. upovat' 'trust'. Brückner 403.

Russ. vernyj 'faithful, trustworthy' (16.65), also the usual word for 'sure, certain'.

7. Skt. asaṅçaya-, sb. 'absence of doubt, certainty', adv. asaṅçayam 'without doubt, certainly', neg. of saṅçaya- 'doubt' (17.43).

Skt. sthira- and dhruva- 'firm', both sometimes 'sure, certain'.

Many of the words for 'explain' are derivs. of those for 'clear, plain' (17.34). Others represent figurative uses of 'show the way, point out, set forth, unfold, spread out, make smooth', etc.

Words that are used mainly with reference to the interpretation of foreign languages or learned exposition, like Grk. ἑρμηνεύω, NE interpret, expound, Russ. istolkovat', etc., are not included. But the Goth. and ChSl. renderings of ἑρμηνεύω are given as the only available words and probably used for 'explain' in general. For the group ON þȳða partly 'explain, interpret', MHG (be)diuten 'explain, point out', see under 'meaning' (17.33).

1. Grk. ἐξηγέομαι 'lead, show the way', hence also 'narrate, explain', this sense becoming dominant (cf. ἐξήγησις 'narration, explanation'), cpd. of ἡγέομαι 'lead' (10.64). Hence NG ἐξηγῶ (cf. ἡγέω Hdn. = ἡγέομαι).

Grk. σαφηνίζω, deriv. of σαφής 'clear, plain'.

2. Lat. explānāre, deriv. of plānus 'level, flat' and 'plain, clear' and, unlike the latter, used almost entirely in the fig. sense.

Lat. explicāre (> It. spiegare and as lit. borrowings Fr. expliquer, Sp. explicar, Rum. explica), lit. 'unfold, spread out', cpd. of plicāre 'fold'.

Lat. expōnere (> OFr. espondre, ME expoune, expounde, NE expound), lit. 'put out, set forth', but more freq. in fig. sense 'expose, expound, explain', etc., cpd. of pōnere 'put, place'. Cf. the similar fig. use (prob. semantic borrowing) of NHG aus-legen, Boh. vy-ložiti, vy-kladati, Pol. wy-kładać, etc.

3. Ir. etar-certaim, cpd. of etar 'between' and deriv. of cert 'right' (fr. Lat. certus). Cf. con-certaim 'correct, adjust'. Pedersen 2.485 f.

NIr. mīnighim, lit. 'make smooth, polish', deriv. of mīn 'smooth, fine, gentle'.

W. egluro, deriv. of eglur 'clear, plain' (17.34).

Br. diskleria, also 'declare', fr. OFr. desclairier 'make clear, declare', deriv. of clair, fr. Lat. clārus 'clear' (17.34).

4. Goth. gaskeirjan (renders ἑρμηνεύω 'interpret', but prob. reg. word for 'explain'), and ON skȳra, derivs. of Goth. skeirs, and ON skȳrr 'clear, plain' respectively.

OE reccan, āreccan, ME reche, recche, OHG recchen, arrecchen, MHG recken, errecken, lit. 'stretch out, extend', but also the usual old WGmc. word for 'explain' = ON rekja 'spread out, unwind', Goth. uf-rakjan 'stretch out, up' : Ir. rigim 'stretch out (the hand)', Skt. ṛj- 'make straight, arrange', Lat. regere 'direct, rule', etc. Walde-P. 2.364.

NE explain, also early 'make even, smooth', fr. Lat. explānāre (above, 2). NED s.v.

Du. verklaren (MLG vorklaren > Dan. forklare, Sw. förklara), NHG erklären (MHG erklæren only lit. 'make clear'), derivs. of Du. klaar, NHG klar, etc. 'clear'.

5. Lith. aiškinti, more usually išaiškinti, deriv. of aiškus 'clear, plain'.

Lett. skaidruot, more usually izskaidruot, deriv. of skaidrs 'clear, plain'.

6. ChSl. sŭkazati (mostly 'point out, show' but also for ἑρμηνεύω 'interpret'), cpd. of kazati 'point out, show' (15.55).

SCr., Boh. objasniti, Pol. objaśnić, Russ. objasnit', pojasnit', derivs. of SCr. jasan, etc. 'clear'.

Boh. vysvětliti, cpd. of světliti 'lighten', deriv. of světlý 'light, bright' (15.56).

7. Skt. vy-ā-khyā-, cpd. of khyā- 'make known', ā-khyā- 'tell, narrate', etym.? Uhlenbeck 75.

Skt. vy-ā-kṛ-, lit. 'separate, undo', cpd. of kṛ- 'do, make'.

Av. ā-zan-? (cf. maṯ-āzanti- 'along with the interpretation'), cpd. of zan- 'know' (17.17).

'Solve' (problems, riddles, etc.) is generally expressed by words which mean literally 'loose' or the like, most of these either negative compounds of those for 'bind' (9.16) or related to words discussed under 'lose' (11.33) or 'release' (11.34). But there are some other sources.

1. Words meaning literally 'loose' or the like.

Grk. λύω, διαλύω; Lat. solvere (> NE solve; resolvere > It. risolvere, Fr. résoudre, Sp. resolver, Rum. rezolva), Rum. deslega (neg. of lega 'bind'); Ir. dofuasailcim (cf. dofuasailcet animmchomarc 'they solve the question' Sg. 27a2, lit. sense in dofuasalcat greic oe in -u- 'the Greeks resolve oe into u' Sg. 19a1), cpd. (*to-od-ess-) of lēicim 'let, let go' (Pedersen 2.564); W. datod, cpd. of neg. dad- and dodi 'put, place, lay'; W. dadrys, lit. 2. Ir. iccaim (cf. īcaid som didiu anisin anasmbeir, etc. 'he solves that when he says . . .', Ml. 55d11), lit. 'heal' (4.86).

NIr. rēidhtighim, lit. 'adjust, arrange, clear, make smooth' : rēidh 'smooth, level' (15.77).

3. ON rāða, OE rǣdan, ME rede (still NE read a riddle), fr. more general sense 'advise, counsel, plan', etc. NED s.v. read. Similarly NHG erraten.

4. Boh. rozluštiti, lit. 'crack open', cpd. of luštiti 'shell' (nuts, etc.).

'Intention, purpose' is frequently expressed by words for 'mind' or 'thought'. Besides those listed, cf. also phrases like Lat. mihi in animō est, NE I have in mind to, it is my thought to, etc. Other semantic sources are 'resolution, counsel, plan', 'effort', 'what is set before one', 'what is aimed at'. Besides the words listed, many others for 'end' or 'aim, goal, object' are freely used to express 'purpose', as Fr. fin, but NE end, aim, object (cf. also the vb. aim, pop. in rural U.S. for 'intend', as I aim to), NHG ziel, with the loanwords SCr. cilj, Pol. cel, Russ. cel'.

'Purpose' is, of course, often expressed simply by prepositional phrases, like Grk. ἐπὶ τοῦτο, Lat. in hoc 'for this purpose', etc. Here the frequent NIr. chuige, lit. 'toward it' = 'for the purpose', fr. chum 'toward' with 3d pers. pron. Dinneen s.vv. chum and chuige.

1. Grk. διάνοια, ἔννοια, ἐπίνοια 'thought, notion' and πρόνοια 'forethought', cpds. fr. νοέω 'think' (17.13), are also used for 'intention, purpose'.

Grk. γνώμη 'thought, judgment' and 'intention, purpose', deriv. of γνω- in γιγνώσκω 'know' (17.17).

Grk. πρόθεσις 'a setting forth, statement', also 'purpose' (the usual Hellenistic word, Polyb., NT, etc.) : προτίθημι 'set forth, display', also 'purpose'.

Grk. βούλευμα 'resolution' and 'purpose' : βουλεύω 'deliberate, resolve', βούλομαι 'will, wish' (16.61).

Grk. σκοπός 'watchman' and 'mark', hence 'objective, aim' and in NG reg. word for 'intention, purpose' : σκέπτομαι 'look, look at' (15.52).

2. Lat. cōnsilium 'counsel, plan' and 'intention, purpose' : cōnsulere 'deliberate, take counsel'. Ernout-M. 214 f. Walde-H. 1.264 f.

Lat. prōpositum (> Sp. propósito), lit. 'what is set forth' : prōpōnere 'put forth, display, propose'. Cf. Grk. πρόθεσις.

Lat. intentiō, lit. 'a stretching out, tension', whence 'exertion, effort, attention', also (Pliny) 'design, intention' (> It. intenzione, Fr. intention, Sp. intención, Rum. intenţiune) : intendere 'stretch out', also mental 'exert the attention, intend' (intendere animō), cpd. of tendere 'stretch' (9.32).

Fr. dessein, beside dessin 'design, drawing', fr. It. disegno (both senses), deriv. of disignare (> Fr. dessiner), fr. Lat. dēsignāre 'mark, design, designate' (: signum 'sign'). REW 2596. Gamillscheg 310.

Rum. gînd 'thought' and 'plan, purpose' : gîndi 'think' (17.13).

It. scopo, Rum. scop, fr. Grk. σκοπός 'aim' (above, 1).

3. Ir. airbert, airmert (K. Meyer, Contrib. 45), vbl. n. of ar-bertaim (-mertaim) 'prepare, determine', cf. W. (d)armerthu 'prepare', MBr. armerhein 'manage', etym.? Pedersen 2.475 f.

NIr. aigne 'mind' (17.11), esp. 'intention'.

NIr. intinn, fr. Lat. intentiō (above, 2). Pedersen 1.234.

W. bwriad, orig. 'aim' : bwrw 'throw, cast, hit'.

W. amcan, orig.? Morris-Jones 264 (but??).

Br. rat, ratoz, also 'thought', prob. = OBr. rad 'stipulation', fr. Lat. ratum 'what is agreed upon'. Ernault, Dict. étym. 367. Otherwise Henry 230.

4. Goth. muns (πρόθεσις 'purpose', also νόημα 'thought', βουλή 'decision', etc.) : munan 'think' (17.14).

ON ætlan, fr. ætla 'intend' = Norw. æsle, Sw. dial. ättla : OHG ahtōn, NHG achten 'heed, observe', etc., Goth. aha 'mind', etc. (17.11). Walde-P. 1.169. Falk-Torp 17, 1415.

Dan. forsæt, fr. MLG vorsat, and Sw. föresats, fr. NHG vorsatz, cpds. of vbs. for 'set', and translations of Lat. prōpositum. Falk-Torp 264. Hellquist 1285.

Sw. uppsåt, fr. MLG upsat : upsetten 'set up, have as a purpose'. Hellquist 1285.

Sw. syfte 'aim, purpose', fr. sikte, this fr. MLG sigte 'sight' (cf. NHG absicht, etc.). Falk-Torp 964. Hellquist 1135, 907.

OE ingehygd, also 'thought, understanding', etc., cpd. of gehygd 'thought, meditation' : hycgan 'think' (17.13).

ME entencion, NE intention, fr. OFr. entencion, intencion, Fr. intention, (above, 2).

ME porpos, NE purpose, fr. OFr. po(u)rpos, deriv. of porposer 'propose, purpose', cpd. of por-, pour- 'for' and poser 'put, place', so virtually a repetition of Lat. prōpositum (above, 2). NED s.v.

ME mening, OHG meinunga, MHG meinunge : OE mǣnan 'have in mind, purpose, intend', OHG meinen 'think, mean, intend' (17.14).

Du. voornemen, orig. 'undertaking' (cf. NHG vornehmen 'undertake', vb.), cpd. of nemen 'take'.

Du. doel (hence, through cpd. vb., also bedoeling), lit. 'aim, goal', orig. 'a sand heap' used as a target in shooting, 'mound of earth' : MLG doel 'ditch' as boundary mark, OHG tuolla, MHG tüele 'small valley, depression'. Franck-v. W. 120 f.

NHG absicht (> Sw. afsigt; Dan. hensigt by confusion with NHG hinsicht), deriv. of absehen 'reach by the eye, foresee, aim at', etc., cpd. of sehen 'see'. Falk-Torp 398. Weigand-H. 1.15.

NHG zweck, also and orig. 'peg', fr. OHG zwek gl. clavus. Used esp. for the peg in the center of the target, hence the 'object of one's aim' and 'purpose' in general. Weigand-H. 2.1350. Kluge-G. 720.

5. Lith. ketinimas, fr. ketinti 'intend' beside ketėti id., this perh. fr. Slavic, ChSl. chotěti, etc. 'wish' (16.61). Brückner, Sl. Fremdwörter 92 (with ? Not in Skardžius).

Lith. tikslas, fr. the root of tikti 'fit, suit', hence the desired 'object, aim, purpose'. Leskien, Bildung d. Nom. 453.

Lett. nuoduoms : nuoduomāt 'intend, have in mind', cpd. of duomāt 'think' (17.13). Mühl.-Endz. 2.778.

6. ChSl. pomyšlenĭje (renders διάνοια, διαλογισμός, etc., but no examples where the meaning is 'purpose'), fr. pomyšljati 'reflect, ponder' : mysliti 'think' (17.13).

SCr. namjera, Boh. záměr, Pol. zamiar, Russ. namerenie : ChSl. měriti, etc. 'measure', general Slavic (12.54), with development in cpds. 'take the measure' > 'aim' > 'intend'. Berneker 2.50.

SCr. svrha 'end, goal, purpose', cpd. : vrh 'top' (12.33).

Boh. úmysl, Pol. zamysł : Boh. mysl, etc. 'mind' (17.11).

Boh. účel 'aim, purpose' : čelo 'forehead' (4.205), čeliti 'aim at, strive for'. Berneker 140.

7. Skt. artha- (also 'object, thing, affair') = Av. arθa- 'affair, concern', fr. Skt., Av. ar- 'move, reach, attain'. Walde-P. 1.136.

Skt. abhiprāya-, fr. abhipre- 'approach', also 'approach mentally, think of, intend', cpd. (abhi-pra-i-) of i- 'go'.

Av. xratu- 'intelligence, reason' (17.12), also 'will, intention'. Barth. 535.

Av. zaoša-, lit. 'inclination, pleasure' : zuš- 'be pleased with, like', Skt. juṣ- 'taste, enjoy, love', etc. Barth. 1656 f.

17.42 CAUSE

Grk.	αἰτία	Goth.	fairina	Lith.	priežastis

Br.	abeg	NHG	ursache		

The Grk. and Lat. words for 'cause', both of doubtful etymology, have affected directly or indirectly much of the Eur. vocabulary for this notion. Grk. αἰτία denoted also esp. 'guilt, fault, charge', and the Goth. and ChSl. words are translations of it primarily in this sense. Lat. causa is the source of the Romance words (with ME, NE cause) and most of the Celtic; and some of the older Gmc. words were primarily translations of it in some of its other senses, as 'legal strife, charge', or later 'matter, subject'.

Besides the words listed, cf. the similar (though not quite identical) use of NE reason (cf. 17.12), NE ground, NHG grund (orig. 'foundation') or words meaning properly 'motive'.

1. Grk. αἰτία, see under 'fault' (16.76).

2. Lat. causa (> It., Sp. causa, Fr. cause, Rum. cauză, learned words in contrast to pop. development in It. cosa, Fr. chose, etc. 'thing'), etym. unknown. Ernout-M. 166 f. Walde-H. 1.190.

It. cagione, fr. Lat. occāsiō, -ōnis 'occasion, opportunity', sometimes also 'reason, cause'. REW 6029.

3. Ir. accuiss, W. achos, fr. Lat. occāsiō (above, 2). Pedersen 1.195. Vendryes, De hib. voc. 110.

Ir. cōis, NIr. cuis, fr. Lat. causa (above, 2). Vendryes, De hib. voc. 128.

Ir. adbar ('material' and 'cause'), NIr. adhbhar, Gael. aobhar, prob. cpd. fr. the root of Ir. berim 'carry, bring' (10.61). Macbain 18. Otherwise Pedersen 2.518.

Br. abeg, MBr. abec, orig. the 'A B C'. Cf. the OFr. and ME spelling abece and the uses quoted in NED s.v. (ABC 3). Henry 2.

4. Goth. fairina, the reg. word for αἰτία in the sense of 'guilt, fault' (16.76), is sometimes used also for αἰτία as simple 'cause', as 2 Tim. 1.12 in þizōzei fairinōs = δι' ἣν αἰτίαν 'for which cause', but this is more commonly rendered by a phrase, as Lk. 8.47 in þizei 'on account of what', 2 Tim. 1.6 in þizōzei waihtais 'on account of which thing'.

ON efni 'stuff, material, subject', also 'cause' : ON efna, OE æfnan 'perform', ON afl, OE afol 'power', Lat. opus 'work', etc. Walde-P. 1.176. Falk-Torp 38, 198.

ON vǫld, pl. of vald 'power'. Fritzner, s.v. vald, 6.

OE intinga (also 'matter, affair, business') : tengan 'hasten', ge-tengan 'hasten, devote oneself to', ge-tenge 'close to'. Walde-P. 1.790.

ME, NE cause, fr. Fr. cause (above, 2).

OHG sacha (reg. word for Lat. causa, orig. in its sense of 'legal strife, fault', etc.), hence cpd. with ur- 'original', MHG, NHG ursache, MLG orsake (hence the similar use of Dan. aarsag, Sw. orsak), Du. oorzaak : Goth. sakjō 'strife', OE sacu 'strife, lawsuit, guilt, fault', etc. Weigand-H. 2.633, 1130 f. Falk-Torp 8, 942.

5. Lith. priežastis, cpd. of prie 'near' and second part fr. *žad-ti-s : žadėti 'promise', žadas 'voice', prie-žada 'vow', žodis 'word'. Leskien, Ablaut 374.

Lett. vaina, mostly 'guilt, fault' (16.76), but also simple 'cause'.

6. ChSl. vina (reg. word for αἰτία, but mostly as 'guilt, fault'), see under 'fault' (16.76).

SCr. uzrok, orig. 'declaration' or the like, cpd. of uz- 'up' and deriv. of reći = ChSl. rešti 'say' (cf. ChSl. pro-rokŭ 'prophet', etc.).

Boh. příčina, Pol. przyczyna, Russ. pričina, cpds. of Slavic pri- 'near, at' and deriv. of Boh. činiti, etc. 'do', with development of 'cause' perh. first in verb 'do, effect, cause'. Berneker 156 f.

7. Skt. kāraṇa-, fr. caus. stem of kṛ- 'do'.

The most common relation of words for 'doubt' is with words for 'two' or 'both', through the notion 'of two minds'. A few mean strictly 'disbelief, distrust'. Others come from various sources through the medium of notions like 'difficulty, perplexity, confusion', and especially 'hesitation'.

1. Grk. *ἀπιστία*, lit. 'disbelief, distrust' : *ἀπιστέω* 'distrust, doubt', fr. *ἄπιστος* 'untrustworthy, incredible', neg. of *πιστός* 'faithful, trustworthy' (16.65) beside *πιστεύω* 'believe' (17.15), etc.

Grk. *δισταγμός, δίσταγμα* (neither common), fr. *διστάζω* 'doubt, hesitate', prob. fr. a **διστος* = Skt. *dviṣṭha-* 'ambiguous', etc., fr. **dwi-* or **dwis-* in words for 'in two, apart', related to the numeral for 'two'. Cf. Goth. *tweifl*, etc. (below, 4). Walde-P. 1.820. Boisacq 191.

Grk. *ἀμφιβολία* 'state of being attacked on both sides' (Hdt.), 'ambiguity', late also 'doubt' as reg. in NG : *ἀμφίβολος* 'attacked on both sides', 'ambiguous, doubtful', *ἀμφιβάλλω* 'put about, beset (on all sides), doubt', cpd. of *ἀμφί* 'about, on both sides' and *βάλλω* 'throw'.

Grk. *ἀπορία* 'difficulty, perplexity', NG 'perplexity', fr. *ἄπορος* orig. 'impassable' (: *περάω* 'pass across', etc.), hence 'difficult'.

2. Words for 'suspicion' are most commonly derived, through the verbs, from words for 'look' or 'think' with prefixes meaning 'under' or 'behind' or with pejorative force. A few are the same words that are used for 'doubt' (17.42).

1. Grk. *ὑποψία*, deriv. of *ὑπόψομαι*, fut. of *ὑφοράω* 'suspect', cpd. of *ὑπό* 'under' and *ὁράω*, fut. *ὄψομαι* 'see'.

Grk. *ὑπόνοια* (also 'inner sense, conjecture', etc.), deriv. of *ὑπονοέω* 'suspect' (and 'conjecture'), cpd. of *ὑπό* 'under' and *νοέω* 'think' (17.13).

2. Lat. *suspīcio* : *suspicārī* 'suspect', *suspicere* 'look up toward, admire, suspect' (hence, through pple. *suspectus*, It. *sospetto*, Sp. *sospecha;* VLat. **suspectiō* or **suspiciō* > Fr. *soupçon*),

cpd. of *su(b)s-* 'under' and *specere* 'see, look at'. Ernout-M. 961, 1008. REW 8484, 8488. Gamillscheg 812. Bloch 2.288.

Rum. *bănueală*, deriv. of *banui* 'suspect, imagine, presume', fr. Hung. *bánni, bán* 'regret, be sorry, care, be concerned' (cf. Rum. *îmĭ bănuesc* 'I am sorry'). Tiktin 156.

3. Ir. *amaires*, NIr. *amhras*, lit. 'disbelief', also 'doubt' (17.43), hence NIr. *drochamhras*, cpd. with pejorative prefix *droch-* 'ill-' (16.72).

W. *drwgdybiaeth*, cpd. of *drwg* = Ir. *droch* (above) and *tybiaeth* 'supposition, conjecture', deriv. of *tybio* 'think, suppose' (17.14).

Br. *diskred*, lit. 'disbelief' : *diskredi* 'doubt, not believe', neg. of *kredi* 'believe' (17.15).

4. Goth. *anaminds*, cpd. of *ana-* 'to, on' and **minds* : Lat. *mēns* 'mind' (17.11), Goth. *munan* 'think' (17.13), etc., evidently a close translation of Grk. *ὑπόνοια*.

ON *grunr*, beside *gruna* 'suspect' (impers. *grunar mik*), etym. (e.g. relation to Grk. *φρήν*) dub. Walde-P. 1.699. Falk-Torp 353, 1474.

Du. *verdenking*, NHG *verdacht*, derivs. of Du. *verdenken* 'suspect', NHG *verdenken* 'find fault, take amiss', older also 'suspect', MHG *verdenken* 'think, remember, ponder', cpd. of *denken* 'think' (17.13). Weigand-H. 2.1142.

Du. *achterdocht*, lit. and in ODu. often 'afterthought', cpd. of *achter* 'behind, after' and *-docht* dial. for *-dacht* : *denken* 'think'. Franck-v. W. 8 f.

Du. *argwaan*, OHG *argwān*, MHG *arcwān* (Luther still *argwahn*), NHG *argwohn*, cpds. of *arg*, OHG *ar(a)g* 'worthless, bad', etc. (: ON *argr*, OE *earh* 'fearful, cowardly', etc.) and OHG *wān*, etc. 'hope, expectation' (16.56). Weigand-H. 1.83.

OHG *zurwān*, cpd. of pejorative prefix *zur-* (= ON, OE *tor-*, Goth. *tuz-*, Grk. *δυσ-*, etc.) and *wān* (cf. above).

5. Lith. *nužiurėjimas*, fr. *nužiurėti* 'suspect' (also 'observe, notice'), cpd. of *nu-* 'down' and *žiurėti* 'look, gaze'.

Lett. *aizduomas*, fr. *aizduomāt* 'suspect', cpd. of *aiz* 'behind' and *duomāt* 'think' (17.13).

6. SCr. *sumnja* 'doubt' (17.43), also 'suspicion'.

Boh. *podezření*, Pol. *podejrzenie*, Russ. *podozrenie*, derivs. of Boh. *podezříti*, Pol. *podejrzeć*, Russ. *podozrevat'* 'suspect', lit. 'look under, look from beneath', etc., cpd. of Slavic *podŭ* 'under', and forms related to ChSl. *zĭrją, zĭrěti* 'see, look'.

7. Skt. *çaṅkā-*, also 'anxiety, fear', etc. : *çaṅk-* 'hesitate, be anxious, fear, distrust', etc., prob. : Lat. *cunctārī* 'delay', Goth. *hāhan*, OE *hōn, hangian*, etc. 'hang'. Walde-P. 1.383. Uhlenbeck 301. Ernout-M. 242. Walde-H. 1.307.

Br.	*kana*	NHG	*singen*		

Several of the words for 'sing' belong to inherited groups. In others 'sing' is specialized from 'sound, cry, utter', etc.

1. IE **kan-*. Walde-P. 1.351. Ernout-M. 144 f. Walde-H. 1.154 f.

Lat. *canere*, frequent. *cantāre* (> Romance words), Umbr. *kanetu* 'canito'; Ir. *canim*, NIr. *canaim*, W. *canu*, Br. *kana* : Goth. *hana*, ON *hani*, etc. 'cock' (orig. 'singer'), Grk. *καναχή* 'noise', etc.

2. IE **gā(y)-*, **gī-*. Walde-P. 1.526 f.

Lith. *giedoti* (now esp. 'sing religious hymns' or 'sing' of birds), Lett. *dziedāt;* Skt. *gā-* (3sg. *gāyati, gāti*), cf. *gāthā-* 'song' = Av. *gāθā-* 'hymn'; ORuss. *gajati* 'crow', etc.

3. Grk. *ἀείδω*, Att. *ᾄδω*, with *ἀοιδός* 'singer, bard', *ἀοιδή*, Att. *ᾠδή* 'song', fr. *ἀϝειδ-* (*ϝ* attested in derivs.), this prob. *ἀ-ϝειδ-* with prothetic *α-* and *ϝειδ-* by dissim. fr. **ϝε-υδ-* redupl. stem with weak grade of IE **wed-* (in Skt. *vad-* 'speak', etc.) as in *ὑδέω* 'praise, sing of', *αὐδή* 'sound, voice'. Walde-P. 1.252. Boisacq 15.

NG *τραγουδῶ*, fr. class. Grk. *τραγῳδέω* 'act, chant a tragedy', late 'chant, recite', fr. *τραγῳδία* 'tragedy', cpd. belonging to preceding group.

4. Ir. *gaibim* 'take, seize' (11.13), also 'sing' (so still NIr. *gabhaim amhrān* 'sing a song'). Semantic development through 'take up' the song = 'begin to sing'. Cf. the parallel development of 'bring forth' to 'say' in Ir. *asbiur* (18.22), NE *utter*, and Skt. cpds. of *hṛ-* 'bring' (*ud-ā-, vy-ā-*).

5. Goth. *siggwan*, OE, OHG *singan*, etc., general Gmc., beside sbs. Goth. *saggws* 'song, music, recitation', OE *sang, song*, etc. 'song' prob. : Grk. *ὀμφή* 'voice' (esp. of a god, oracle), W. *dehongli* 'explain, interpret'. Walde-P. 2.496. Falk-Torp 1227 f. Feist 419.

ON *gala* (also 'crow'), OE *galan*, ME *gale*, OHG *galan* (esp. 'enchant, sing incantations') : ON *gjalla* 'scream, shriek, shout', OE *giellan* 'yell, cry out', OHG *gellan* 'sound, cry', Goth. *gōljan* 'greet', Russ. *galit'sja* 'mock', etc. Walde-P. 1.628. Falk-Torp 296.

Most of the words for 'shout, cry out' are of imitative origin, as are numerous others covering 'scream, screech, shriek, yell', etc. (cf. also 18.14). Several of those listed here are also used for 'call' = 'summon' (18.41).

1. Grk. *βοάω*, with sb. *βοή* 'shout, cry', prob. of imitative origin. Walde-P. 2.112. Other views in Boisacq 125.

Grk. *κράζω*, also and perh. orig. 'croak' (of frogs), 'caw' (of ravens), cf. *κρώζω* 'caw', prob. : ON *hrōkr*, OE *hrōc*, etc. 'rook, raven', Skt. *kharj-* 'creak', *khargala-* 'a certain night-bird', all of imitative origin. Walde-P. 1.415. Boisacq 505.

Grk. *κραυγάζω*, with sb. *κραυγή* 'cry, shout', perh. : ON *hraukr* 'cormorant' (but cf. Falk-Torp 866), Goth. *hruk* 'crowing', *hrukjan* 'crow', fr. **krau-g-* beside **krau-k-* in ChSl. *krukŭ* 'raven', etc., **krau-k̂-* in Skt. *kruç-*, Av. *xraos-* 'cry, shout', etc. (below, 7), all from parallel extensions of the root in *κράζω* (above). Walde-P. 1.417. Boisacq 511 f.

NG *φωνάζω*, fr. *φωνή* 'voice' (18.11).

2. Lat. *clāmāre* : *calāre* 'call, out, proclaim, summon', Grk. *καλέω* 'call, name', *κέλαδος* 'noise', Lett. *kal'uot* 'chatter', Lith. *kalba* 'language', etc. Walde-P. 1.443 f. Ernout-M. 136, 192. Walde-H. 1.141 f.

It. *gridare*, Fr. *crier*, Sp. *gritar*, fr. Lat. *quirītāre* 'cry plaintively, wail, scream', this prob. of imitative orig. like *quirrītāre* 'grunt'. Ernout-M. 844. REW 6967. Gamillscheg 278.

Rum. *striga*, deriv. of Lat. *strix, -gis* 'screech-owl'. Puşcariu 1656. Tiktin 1514 f.

Rum. *ţipa*, doubtless based on some imitative syllable.

3. Ir. *gairim*, NIr. *gāirim* (*ā* fr. *gāir;* *gairim, goirim* 'call' = 'summon, name'), beside sbs. *gairm* and *gāir* 'a cry' : W. *gawr* 'a cry', *gair* 'word', Lat. *garrīre* 'chatter, prate', Grk. *γῆρυς*, Dor. *γᾶρυς* 'voice, speech', etc. Walde-P. 1.537. Walde-P. 1.537. Walde-H. 1.533. Pedersen 1.144, 2.533 f.

NIr. *glaodhaim*, with *glaodh*, MIr. *gloed* 'a shout, cry', OIr. *glaidim, gloidim* 'bellow, roar', root connection? Pedersen 2.538 Anm.

NIr. *screadaim*, fr. sb. *scread*, Ir. *scret* : Dan. *scratte* 'give a cracked sound', etc. Walde-P. 1.415. Falk-Torp 1025. Loth, RC 43.151 f.

W. *bloeddio*, fr. *bloedd* 'cry, shout' = Ir. *blaed* 'cry, clamor', etym. dub. Walde-P. 2.211, 218.

Br. *krial*, fr. Fr. *crier*. Henry 81.

4. Goth. *hrōpjan*, ON *hrōpa* (but older sense 'slander, defame'; that of 'cry out' fr. LG *rōpen* > Dan. *raabe*, Sw. *ropa*), OE *hrōpan*, ME *rope*, Du. *roepen*, OHG *(h)ruofan*, MHG *ruofen*, NHG *rufen* (now esp. 'call', 18.41) with sbs. Goth. *hrōps*, OHG *ruof* 'cry', etc., root connection dub., perh. of imitative origin. Walde-P. 1.353. Falk-Torp 865. Feist 270.

Goth. *wōpjan*, ON *œpa* : OHG *wuofan*, OE *wēpen* 'weep' (16.37). Walde-P. 1.217. Feist 572.

ON *kalla*, also 'call, summon' = OE *callian* (once; ME *calle*, NE *call*, prob. fr. ON), OHG *callōn* 'talk much or loud, chatter' : ChSl. *glasŭ* 'voice', etc. (18.11). Walde-P. 1.538. Falk-Torp 485 f. NED s.v. *call*.

OE *hrȳman*, ME *reme*, deriv. of OE *hrēam*, ME *ream* 'cry, outcry, tumult', cf. ON *hraumi* 'noisy fellow', perh. : Skt. *kārava-*, Lat. *corvus* 'raven', from an extension of the root seen in Grk. *κράζω, κραυγάζω*, etc. (above, 1). Walde-P. 1.417. Walde-H. 1.275.

OE *clipian*, ME *clepe*, cf. OFris. *klippe* 'ring', LG *klippen* 'sound, resound', NHG dial. *kliffen* 'yelp, yap', all prob. fr. an imitative syllable parallel to that in *clappan* 'clap', OHG *claphōn* 'clap, resound', etc. Cf. NHG *klipp* beside *klapp!* NED s.v. *clepe*, vb. Weigand-H. 1.1046.

ME *shoute*, NE *shout* : ON *skūta, skūti* 'taunt, jibe', prob. fr. **skeud-* beside **keud-* in Grk. *κυδάζω*, Skt. *kuts-* 'revile, abuse'. Walde-P. 1.378.

OHG *scrīan*, MHG *schrīen*, NHG *schreien*, Du. *schreeuwen* : Dan. *skrige*, Sw. *skrika*, ME *shriken* 'shriek, scream', etc., Grk. *κρίζω* 'creak, screech', ChSl. *krikŭ* 'a cry', vb. *kričati*, etc. (below, 6), all prob. fr. *(*s*)*krei-*, extension of the root seen in Grk. *κράζω*, etc. (above, 1). Walde-P. 1.416. Falk-Torp 1027 f. Franck-v. W. 598.

OHG *harēn* : Goth. *hazjan*, OE *herian* 'praise' (16.79). Walde-P. 1.358. Feist 252.

5. Lith. *rėkti*, also 'howl' = Lett. *rēkt* 'bellow, howl, bawl' : MHG *ruoben* 'bellow, grunt', Lat. *raccāre* 'roar' (of the tiger), all of imitative origin. Walde-P. 2.343. Mühl.-Endz. 3.519.

Lith. *šaukti*, Lett. *saukt*, prob. : ChSl. *sova* 'owl', Skt. *çuka-* 'parrot', fr. an imitative **k̂au-*, beside **kau-* in Lith. *kaukti*, Lett. *kaukt* 'howl, yell', Skt. *kāuti* 'makes a noise, cries, moans', etc. Walde-P. 1.331 f.

Lett. *kliegt*, cf. Lith. *sukligo* pret. 'cried out' (Leskien, Ablaut 275), prob. fr. **kleig-* beside **kleik-* in Lith. *klikti* 'make a sudden outcry', ChSl. *kliknąti* 'cry out', *klicati* 'cry, call', OE *hlīgan* 'give a reputation (of wisdom) to, attribute to', OFris. *hlīa* 'announce, acknowledge', etc. Walde-P. 1.496 f. Mühl.-Endz. 2.231 f. Berneker 519.

6. ChSl. *vŭpiti, vŭzŭpiti*, prob. of imitative origin. Iljinskij, KZ 43.177 ff. Walde-P. 1.187.

ChSl. *kričati*, etc. (in Gospels *ἀλαλάζω* 'wail', Mk. 5.38, but general modern Slavic for 'shout') : NHG *schreien*, etc. (above, 4). Berneker 616.

SCr. *vikati* : late ChSl. *vyti*, Boh. *výti*, Pol. *wyć*, Russ. *vyt'* 'howl'. Miklosich 397. Brückner 637.

7. Skt. *kruç-*, Av. *xraos-* : Grk. *κραυγάζω*, etc. (above, 1).

18.14. Words denoting various cries, especially of animals. These are very numerous and are nearly all of imitative origin. In general there is a high degree of differentiation between expressions for the cries of different animals. On the other hand, a single word may be used for a great variety of cries. Thus Grk. *φθέγγομαι* 'make a sound' is applied to the human voice and the cries of the

eagle ('scream'), raven ('croak'), and birds in general, also the horse ('neigh'), fawn, and even sounds made by worms and fish. The verbs for 'sing' frequently cover the cock's 'crow' and several different bird cries.

To trace the many words of this type through many of the IE languages would require an altogether disproportionate space. But it is feasible here to quote the verbs for some of the distinctive cries in a few languages, omitting discussion (which is superfluous in view of the obvious imitative origin) and references. To illustrate still further the great variety, many other NE words are added.

1. 'Bark' (esp. dog). Grk. ὑλακτέω, NG γαβγίζω, Lat. *latrāre* (> Sp. *ladrar*, Rum. *latra*), It. *abbaiare*, Fr. *aboyer* (OFr. *bayer*, ME *baye*, NE *bay*, used of large dogs), NE *bark* (OE *beorcan*), NHG *bellen*, Lith. *loti*, Russ. *lajat'*.

2. 'Bellow' (cattle). Grk. μῡκάομαι, Lat. *mugīre* (> It. *muggire*, Fr. *mugir*, etc.; Fr. also *beugler*), Ir. *burim* (cf. Loth, RC 41.372 f.), NE *bellow* (NE *low* and *moo*, now of cows), NHG *brüllen*, Russ. *myčat'*, *revet'*.

3. 'Bleat' (sheep, goat, calf). Grk. βληχάομαι, Lat. *balāre*, late *bēlāre* (> Fr. *bêler*, etc.), NE *bleat*, NHG *blöcken*, Russ. *blejat'*.

4. 'Croak' (a of frog, b of raven or crow, the latter NE *caw*). Grk. κράζω (a, b), κρώζω (b), late Lat. *coaxāre* (a; > Fr. *coasser*), *crōcire* (b; > Fr. *croasser* b, rarely a; form influenced by *coasser*), NE *croak* (a, b), NHG *quaken* (a; also 'quack' of ducks), *krächsen* (b), Russ. *kvakat'* (a), *karkat'* (b).

5. 'Crow' (cock). Commonly covered by the words for 'sing' (18.12), as Grk. ἀείδω, Lat. *canere*, Fr. *chanter*, Russ. *pet'*, but also special words as NE *crow*, NHG *krähen*.

6. 'Growl'. Lat. *fremere*, Fr. *grogner*, NE *growl*, NHG *knurren*, Russ. *vorcat'*.

7. 'Grunt' (swine). Grk. γρῡλίζω, Lat. *grunnīre* (> Fr. *grogner*, also 'growl'), NE *grunt*, NHG *grunzen*, Russ. *chrjokat'*.

8. 'Hiss' (serpent). Grk. σῡρίζω, Lat. *sībilāre*, *sīfilāre* (> Fr. *siffler*), NE *hiss*, NHG *zischen*, Russ. *šipet'*.

9. 'Howl' (dog, wolf, etc.). (Grk. ὀλολύζω not used of animals), Lat. *ululāre* (> Fr. *hurler*), NE *howl*, NHG *heulen*, Russ. *vyt'*.

10. 'Mew' (cat). NG νιαουρίζω, Fr. *miauler*, NE *mew*, NHG *miauen*, Russ. *mjaukat'*.

11. 'Neigh' (horse). Grk. χρεμετίζω, Lat. *hinnīre* (> Fr. *hennir*), NE *neigh* (dial. *nicher*, *nicker*), *whinny*, NHG *wiehern*, Russ. *ržat'*.

12. 'Roar' (lion, etc.). Grk. βρῡχάομαι, Lat. *fremere*, *rugīre* (> Fr. *rugir*), NHG *brüllen*, Russ. *revet'*.

Cf. also NE *baa* (sheep), *buzz*, *hum*, *drone* (insects), *bray* (donkey), *bugle* (moose), *cackle* (hen), *caw* (crow), *cheep* (young birds, mice, etc.), *chirp* (small birds), *cluck* (hen), *gobble* (turkey), *hoot* (owl), *low* (cattle), *moo* (cattle), *peep* (young birds, etc.), *purr* (cat, etc.), *quack* (duck), *scream*, *screech*, *snarl*, *snort*, *squeak*, *squeal*, *squawk*, *trumpet* (elephant), *twitter*, *warble*, *whine*, *whistle*, *yap*, *yelp*, *yowl*.

In the majority of the IE languages there are distinctive verbs for 'speak', denoting the actual speech activity, and for 'say' with emphasis on the result rather than the action. But the commonest classical Greek and Indo-Iranian words cover both uses, and some words belonging to the same cognate group may mean 'speak' in one language and 'say' in another. In several cases a transition from 'speak' to 'say' is attested or indicated by the etymology. Even where the distinction holds in the main, there is some overlapping (e.g. NHG *sprechen* in Luther's time often used with direct and indirect quotations).

Verbs for 'speak' are often cognate with words denoting various sounds, partly of imitative origin. Some were used first in a depreciatory sense, 'babble, chatter, prattle', etc., then as colloquial and finally standard words for 'speak'. Cf. the loss of depreciatory sense in NE *chat* vs. *chatter*, the increasing encroachment of NE *talk* upon *speak*, and the history of Grk. λαλῶ and others (below). Some are derived from nouns for 'assembly', used first for 'speak in the assembly, harangue' and then more generally; others from nouns for 'speech, saying, word'. Some are cognate with words for 'reason, plan, reckon, count' or 'pick out, select', or 'consort with' (cf. the specialization in NE *converse*, *conversation*), with secondary specialization to vocal expression.

Words for 'say' (apart from those which mean also, or are from, 'speak') are based on notions like 'point out, make clear, make known', 'bring forth', 'arrange, order, make', etc.

Cf. Buck, Words of Speaking and Saying, AJP 36.1 ff., 125 ff., where many words not included here (obsolete, colloquial, dialectal, etc.) are discussed. For exhaustive details of the usage of the Grk. words, cf. H. Fournier, Les verbes "dire" en grec ancien.

Groups that belong in part under both headings are discussed here.

1. IE **wekʷ*- in words for 'speak' or 'say', also 'word', 'voice', etc.—primary sense 'give vocal utterance', hence properly 'speak', secondary 'say'. Walde-P. 1.245. Ernout-M. 1135 f.

Skt. *vac*-, Av. *vač*- 'speak, say'; Grk. aor. εἶπον, εἶπα 'spoke, said' (NG εἶπα mostly 'said') by dissim. fr. *ἐ-ϝε-ϝπον = Skt. aor. *avocam*. Cf. Skt. *vacas*-, Av. *vačah*-, Grk. ἔπος (ϝέπος) 'word', Skt. *vāc*-, Lat. *vōx*, etc., 'voice' (18.11), Lat. *vocāre* 'call', OPruss. *wackis* 'cry', etc.

2. Grk. λέγω, in Hom. 'pick out, select', also 'collect, enumerate, recount', later the usual word for both 'speak' and 'say' (NG 'say') : Lat. *legere* 'pick out,

select' (whence 'read'), etc. Walde-P. 1.422. Walde-H. 1.780.

Grk. aor. εἶπον, above, 1.

Grk. fut. ἐρῶ, perf. εἴρηκα, aor. pass. ἐρρήθην (pres. εἴρω Hom., but not common), common in Hom. and later supplementing λέγω in both senses, beside derivs. ῥήτωρ 'public speaker', ῥῆμα 'word, saying', ῥήτρα 'agreement, covenant', fr. ϝερ-, ϝρη- (cf. Arg. ϝεϝρημένος, El. ϝράτρα, etc.), IE **wer*- seen elsewhere in derivs. as Lat. *verbum*, OE *word*, etc. 'word', Av. *urvāta*- 'command', Skt. *vrata*- 'command, vow', etc. Walde-P. 1.283 f. Ernout-M. 1088 f. Here also Hitt. *weriya*- 'call, summon' (Pedersen-Goetze, Muršilis Sprachlähmung 74).

Grk. ἀγορεύω, orig. 'speak in the assembly, harangue' (fr. ἀγορά 'assembly') but already in Hom. one of the most general terms for 'speak', though in Attic largely replaced by λέγω.

Grk. λαλέω, in the class. period 'babble, chatter', but the usual Hellenistic vb. for 'speak', reg. in NT and down through the medieval period. Of imitative orig., cf. Lat. *lallāre* 'lull to sleep', NHG *lallen* 'stutter, mumble', etc. Walde-P. 2.376.

NG pop. μιλῶ (lit. ὁμιλῶ), fr. Grk. ὁμιλέω 'consort with, join battle with, be familiar with, etc.', also (Xen.+) 'converse with', and common in this sense in Hellenistic Grk., now the usual word for 'speak' (replacing λαλῶ).

3. Lat. *loquī*, etym. dub., perh. of imitative orig. fr. a syllable similar to, though not identical with, that in Grk. λάσκω, ἔλακον 'ring, crash, shriek, howl' and (esp. Att. poet.) 'utter, tell'. Walde-P. 2.377. Ernout-M. 561 f. Walde-H. 1.821.

Lat. *fārī* (poet. and arch.) : Grk. φημί, Dor. φᾱμί 'say', OE *bōian* 'boast', Russ.-ChSl. *bajati* 'tell, heal', Russ. dial. *bajat'* 'speak', etc. (Berneker 39), OE *bannan* 'summon', etc., prob. ultimately the same root as in Skt. *bhā*- 'shine', Grk. φαίνω 'make clear, show'. Walde-P. 2.123 f. Ernout-M. 375 f. Walde-H. 1.437 f. Buck, op. cit. 127. Hence *fābula* 'conversation, dialogue, story', with derivs. *fābulāri* and *fābulāre*, colloq. word for 'speak, talk' since Plautus, whence the Romance derivs. of which Sp. *hablar* is the standard word. REW 3125.

It. *parlare*, Fr. *parler*, derivs. of VLat. *parabola* 'word' (> Fr. *parole*, etc. 18.26).

Rum. *vorbi*, with sb. *vorbă* 'saying, talk', prob. a loanword but of uncertain source. Densusianu 1.74 (not fr. Lat. *verbum*). Tiktin 1771 (fr. Slavic). Diculescu, Z. rom. Ph. 41.427 (fr. Gmc.).

Rum. *grăi* (with *graiu* 'speech, language'), fr. Slavic, cf. SCr. *grȁjati* 'crow', *grájati* 'talk loud, talk'. Tiktin 695. Berneker 344.

Rum. *cuvînta*, deriv. of *cuvînt* 'word, talk' (18.26).

4. Ir. *labrur*, NIr. *labhraim*, W. *llefaru* 'speak' (MW also 'say'), Corn. *leverel*, 1sg. *lavaraf*, Br. *lavarout* 'say', beside Ir. *labar* 'loquacious', *amlobar* 'dumb', W. *llafar* 'speech, sound', Br. *lavar* 'word, idiom, language', W. *aflafar* 'speechless', etc., perh. : LG *flappen* 'strike, clap, chatter', NE *flap*, etc., all of imitative origin. Walde-P. 2.93. Stokes 239.

Ir. *rādim* 'speak' and 'say', cf. MW *ad-rawdd* 'relate', etc. : Goth. *rōdjan* 'speak' (below, 5).

W. *siarad*, also and orig. sb. 'talk', a loanword certainly to be connected with NE, Fr. *charade*, but in meaning much closer to the orig. Prov. *charrada* 'conversation' (fr. the vb. *charra* 'chat, talk', of imitative origin, REW 2451). Parry-Williams 79.

Br. *komz*, MBr. *comps*, Corn. *cows*,

also and orig. sb. 'talk', prob. a cpd. of **kom*- and **med-tu*-, fr. the root of Ir. *midiur* 'judge', W. *meddwl* 'think', etc. (17.13). Cf., fr. the same root, Br. *eme*, W. *medd*, Corn. *meth* 'inquit'; also the semantically parallel NG dial. κρένω 'speak' = κρίνω 'judge' and Pol. *gadać* 'speak, talk' = ChSl. *gadati* 'think, suppose' (Berneker 288). Pedersen 1.170, 2.580. Ernault, Dict. étym. s.v. *comps*.

5. Goth. *rōdjan*, ON *ræða* : Goth. *garēdan* 'be mindful of', ON *rāða*, OE *rǣdan* 'advise, plan, rule, explain, read', OHG *rātan* 'advise, consider, interpret', ChSl. *raditi* 'care, be anxious', Skt. *rādh*- 'perform, achieve, carry out, prepare', Ir. *rādim* 'speak', *imm-rādim* 'think about, consider', all fr. **rē-dh*-, beside **rē-t*- in OHG *red(i)ōn*, *redinōn*, MHG, NHG *reden* 'speak', Goth. *garaþjan* 'count', Lat. *ratio* 'account, consideration, reason', etc., extensions of the root in Lat. *rēri* 'believe, think, reckon, calculate', etc. Walde-P. 1.73 ff. Feist 400.

Goth. *maþljan*, ON *mæla*, OE *maþelian*, *mæþlan*, *mǣlan*, ME *mele*, OHG *mahelen* (but the last mostly 'promise', MHG *maheln*, *mālen* 'summon before court, promise, give in marriage', NHG *ver-mählen*), derivs. of Goth. *maþl* 'assembly, market', ON *māl* 'speech, suit, action, cause', OE *mæþel* 'assembly, council, speech', OHG *mahal* 'court, compact', etc., all orig. 'meeting (place), assembly', fr. the root of Goth. *gamōtjan*, ON *mœta*, OE *mētan* 'meet'. Semantic development as in Grk. ἀγορεύω (above, 2). Walde-P. 2.304. Falk-Torp 285 f. Feist 349 f.

ON *tala*, Dan. *tale*, Sw. *tala*, ME *talie*, *tale* (cf. NED s.v. *tale*, vb. 5, 6, but OE *talian* only 'account, reckon', etc.), and deriv. forms ME *talkie*, *talke*, NE *talk* (cf. NED s.v.), also OE *tellan*, ME *telle*, NE *tell* 'count, tell' (rarely 'speak'; NED s.v. 13, 15), OHG *zalōn* 'count' (NHG *zahlen*), and *zellan* 'count, reckon, relate, tell' (NHG *zählen*, *erzählen*), with sbs. ON *tal* 'talk, series, number', OE *talu* 'tale, talk, charge, case' (NE *tale*), Du. *taal* 'language', OHG *zala* 'inheritance, order, series, account', etc. (NHG *zahl*), outside root connections (as with Grk. δόλος, Lat. *dolus* 'deceit'; see 16.68) dub. Walde-P. 1.808. Falk-Torp 1243.

Dan. *snakke*, lit. 'chatter, chat', but also pop. 'talk, speak' (*snakke dansk*, *engelsk*, etc.), with sb. *snak*, like Sw. *snacka*, *snak* 'chatter', fr. MLG *snacken*, *snack* 'talk, chatter, prattle' (NHG *schnacken* 'prattle'), belonging with NE *snack* 'snap, bite, seize', Dan. *snage* 'snuff about', etc., prob. of imitative origin. Falk-Torp 1089. Walde-P. 1.397.

OE *sprecan* and (later) *specan*, ME *speke*, NE *speak*, Du. *spreken*, OHG *sprehhan* (rarely also *spehhan*), MHG, NHG *sprechen*, with sbs. OE *sprǣc*, NE *speech*, OS *sprāka*, MLG *sprāke* (> Dan. *sprog*, Sw. *språk*, whence vb. *språka* 'talk'), OHG *sprācha*, NHG *sprache*, etc. (the history of the *r*-less forms is obscure, but they are undoubtedly of secondary origin) : ON *spraka*, Dan. *sprage* 'crackle', Grk. σφαραγέω 'crackle, sputter, hiss', Lith. *spragėti* 'crackle', Skt. *sphūrj*- 'crackle, rustle, rumble'. Cf. NE *crack*, dial. 'chat, talk' (NED s.v. 7). Walde-P. 2.673. Falk-Torp 1134.

Du. *praten*, cf. MLG *praten*, *proten*, Icel., Sw. *prata* 'chatter, prate', NE *prate*, etc., prob. of imitative origin. Falk-Torp 847. NED s.v. *prate*. Franck-v. W. 520 (: Pol. *bredzić* 'chatter, prattle', but cf. Berneker 83).

6. Lith. *kalbėti*, with *kalba* 'speech, language' : Lett. *kaluot* 'chatter', OPruss. *kelsāi* 'they sound', Grk. κέλαδος 'noise, din', καλέω 'call, name', Lat.

calāre 'call together', *clāmāre* 'call', etc. Walde-P. 1.445.

OPruss. *billit* (renders NHG *sprechen* and *sagen*, but *waitiatun* for *reden*), OLith. *bilti*, *byloti*, common word for 'speak, say' (*byloti* now 'litigate'), Lett. *bilst* 'speak, say' (not common) : Lith. *balsas* 'voice', OE *bellan* 'roar', Skt. *bhāṣ*- (**bhel-s*-) 'speak', etc. Walde-P. 2.182.

Lett. *runāt*, with sb. *runa*, prob. loanword fr. some form of the Gmc. group seen in OE *rūnian*, OHG *rūnēn* 'whisper', ON *rȳna* 'speak confidentially' (with Goth. *rūna* 'secret', ON, OE *rūn* 'secret, rune', Ir. *rūn*, W. *rhin* 'secret', etc.; Walde-P. 2.350). Mühl.-Endz. 3.560 (but regarding Lett. form as cognate, not loanword).

7. ChSl. *glagolati* (cf. Russ. dial *gologolit'* 'babble, joke'), beside *glagolŭ* 'word', etc., fr. redupl. form of root in *glasŭ* 'voice', etc. (18.11). Walde-P. 1.538. Berneker 321.

ChSl. *věštati*, with *otŭ-věštati* 'answer', *vŭz-věštiti*, *-věštati* 'announce', *vě* = εἶπε : OPruss. *waitiatun* 'speak', further connections dub. Walde-P. 1.246. Trautmann, Altpreuss. 455 f.

SCr. *govoriti*, Russ. *govorit'* (but Boh. *hovořiti* 'chat, converse') = ChSl. *govoriti* 'make a noise', fr. the sb. *govorŭ* 'noise' (in modern Slavic freq. 'speech, language, dialect') : Lith. *gausti* 'howl', OE *cīegan* 'call', OHG *gikewen* 'call, name', Grk. γοάω 'lament', Skt. *gu*- 'sound', etc. Walde-P. 1.635. Berneker 339.

Boh. *mluviti*, Pol. *mówić* = Russ. *molvit'* 'utter', ChSl. *mlŭviti* 'make a disturbance', beside sbs. Boh. *mluva* 'speech', etc., ChSl. *mlŭva* 'tumult', prob. : Skt. *brū*-, Av. *mrū*- 'speak, say', but disputed (see below, 8).

8. Skt. *vac*-, Av. *vač*-, above, 1.

Skt. *brū*-, Av. *mrū*-, disputed whether fr. IE **mreu*- with dub. connections or fr. **mleu*- and connected with ChSl. *mlŭva* 'tumult', Boh. *mluviti* 'speak', etc. (above, 7). Walde-P. 2.313.

Skt. *bhāṣ*- (**bhel-s*-) and *bhaṇ*- (**bhel-n*-) : Lith. *balsas* 'voice', OPruss. *billit*, OLith. *byloti* 'speak, say', etc. (above, 7).

Skt. *vad*- : ChSl. *vaditi* 'accuse', Lith. *vadinti* 'call, name', Grk. αὐδάω 'speak, say' (Hom. and poet.), etc. Walde-P. 1.251 f.

Av. *aoǰ*-, esp. 3sg. pret. mid. *aoxta* (Gath. *aogədā*) 'spoke, said' (esp. in a formal, solemn sense) : Skt. *ūh*- 'observe, regard, consider', Grk. εὔχομαι 'pray, vow, boast', Lat. *vovēre* 'vow', etc. Walde-P. 1.110. Barth. 37 f. Ernout-M. 1135.

For verbs for 'speak' and 'say' in general, and those that cover both senses, see 18.21.

Besides the usual verbs for 'say', there are often more isolated forms which are common in the parenthetical use, before or after direct quotations, like Lat. *inquit*. These are not included in the list, but several are noticed in the discussion, where this use is conveniently shown by the rendering 'inquit' (some are restricted to the third person, others not). Cf. also such use of verbs for 'do, make' or 'put' (through 'make a response', etc.) as forms of It. *fare*, Fr. *faire*, NG κάνω, Boh. *diti*, etc. Buck, op. cit. 134. Spitzer, "Romanisch *facit* 'er sagt' ", Stilstudien 1.223. Berneker 192. Here also Hitt. *tezzi* 'says', fr. *dāi*-, *te*- 'put' (IE **dhē*-, 12.12). Goetze-Pedersen, Muršilis Sprachlähmung 68. Cf. Toch. A *plāc wāwim* 'might speak (lit. lead) a word'.

1. IE **sekʷ*- in words for 'say, tell', prob. orig. 'point out' (as in ChSl. *sočiti*) and ultimately the same as **sekʷ*- in words for 'follow' (10.52) and 'see' (15.51), though the semantic relations may be variously interpreted. Walde-P. 2.477 ff. 'Language' is most commonly expressed by words for the tongue as the most important organ of speech. So regularly in Grk., Lat., Romance, NIr., Slavic; and, beside other words, in Gmc. and Baltic, though here the use, as in NE *tongue*, is now mostly poetical or archaic. Others are from verbs for 'speak' (18.21), a few from words for 'lip' or 'voice'.

The majority of these words are used both for a specific 'language' (*English language*, etc.) and for the more generic 'language, speech' as a faculty and institution (whence phrases or derivs. for history of language, etc.). But for the wider notion there may be other expressions, alternative like NE *speech*, or now preferred like Fr. *langage*. The more important of these are entered in the list (after;), but many other derivatives of verbs for 'speak' or 'say' which may sometimes be so used but are mostly 'act or manner of speaking, a speech, talk' or the like, e.g. Grk. λόγος, Fr. *parler*, NHG *rede*, SCr. *govor*, Boh. *řeč*, *mluva*, etc., are not entered.

1. Words for 'tongue' (4.26). Grk. γλῶσσα; Lat. *lingua* (> Romance words); NIr. *teanga*, ON *tunga*, Dan. *tunge*, Sw. *tunga* (but more commonly cpds. with old words for 'speech,' Dan. *tungemaal*, Sw. *tungomål*), OE, ME *tunge*, NE *tongue*, OHG *zunga*, MHG, NHG *zunge;* Lith. *liežuvis*, Lett. *mēle;* ChSl. *językŭ*, etc., general Slavic; Toch. A *käntu*.

2. Grk. φωνή 'voice' (18.11) is used for a language or dialect and for the generic 'language'.

3. Lat. *ōrātiō*, generic 'language, speech', deriv. of *ōrāre* 'plead, beseech' but in a more original sense of 'speak formally', prob. : Grk. ἀρά 'prayer, curse', etc. Walde-P. 1.183. Ernout-M. 714.

Lat. *sermō*, mostly 'speaking, discourse, talk' but also sometimes 'language' even in the specific sense, either deriv. of *serere* 'bind together, join, compose' (so the Romans and still Ernout-M. 929), or fr. *swer- in Osc. dat. sg. *sverrunei* 'spokesman', OE *swerian* 'swear', *andswerian* 'answer', etc. (so Walde-P. 2.527).

Fr. *langage* (Prov. *lenguatge* > It. *linguaggio*, Sp. *lenguaje*), deriv. of *langue* 'language', from which it is now (but not orig.) distinguished as the generic 'language'. REW 5067.

Rum. *graiu*, generic 'language', fr. *grăi* 'speak' (18.21).

4. Ir. *bēlre*, NIr. *bēarla*, now esp. 'the English language' (i.e. 'the language' par excellence as contrasted with the native), deriv. of *bēl* 'lip' (4.25). Pedersen 1.489, 2.51.

Ir. *urlabra*, NIr *urlabhra*, generic 'language, speech' : *labrar* 'speak'.

W. *iaith*, Br. *yez* : OHG *jehan*, MHG *jehen* 'assert, say, admit, confess', OS *gehan* 'confess', OHG *jiht*, *bijiht* 'assertion, confession' (NHG *beichte*), Lat. *iocus* 'joke' (orig. 5. Goth. *razda*, OE *reord*, the latter also 'voice' : ON *rǫdd* 'voice' (18.11).

ON *māl*, Dan. *maal*, Sw. *mål* : ON *mæla* 'speak', etc.

OE *spræc*, ME *speche* (NE *speech*), Du. *spraak* (mostly 'speech'; MLG *sprāhe* > Dan. *sprog*, Sw. *språk*), OHG *sprāhha*, MHG *sprāche*, NHG *sprache* : OE *sprecan*, etc. 'speak'.

ME *langage*, NE *language*, fr. Fr. *langage* (above, 3).

Du. *taal* : ON *tala*, etc. 'speak'.

6. Lith. *kalba* : *kalbėti* 'speak'.

Lett. *valuoda*, perh. like *vāluodze* 'oriole', fr. the root seen in Pol. *wołać* 'call'. Mühl.-Endz. 4.462, 498. Endzelin, KZ 52.123.

7. Skt. *bhāṣā-* : *bhāṣ-* 'speak'.

18.25. Dialect. The distinction between a 'language' and a subordinate 'dialect' was not observed in early times, when the words for 'language' (18.24) covered also what we now call a 'dialect'. Thus Grk. Ἀττικὴ γλῶσσα, Ἀττικὴ φωνή, Lat. *lingua* with reference to Greek dialects (*Crassus quinque Graeci sermonis differentias sic tenuit ut, qua quisque apud eum lingua postulasset*, etc. Quint.), and Skt. *bhāṣā-* used esp. of the Prakrit dialects.

1. But Grk. διάλεκτος 'discourse, conversation' (: διαλέγομαι 'converse, discuss', etc.), also sometimes 'language', finally became the technical word for 'dialect', and through Lat. *dialectus* furnished the most widespread Eur. terms.

Of native words, some of popular origin and some prob. artificial substitutes for the loanword, the following may be mentioned.

2. Fr. *patois*, orig. 'coarse, vulgar speech' : *pataud* 'clumsy fellow', *patauger* 'flounder', etc. REW 6301. Gamillscheg 677.

3. NIr. *canamhain*, also 'pronunciation, accent', fr. *canaim* 'sing' (18.12), also 'recite, pronounce'.

W. *tafodiaith*, *cangheniaith*, cpds. of *tafod* 'tongue' and *cangen* 'branch' with *iaith* 'language'.

Br. *rannyez*, cpd. of *rann* 'part' and *yez* 'language' (but *yez* alone commonly used).

4. NHG *mundart* (whence by semantic borrowing Dan. *mundart*, Sw. *munart*), cpd. of *mund* 'mouth' and *art* 'manner'.

Du. *tongval*, cpd. of *tong* 'tongue' and *val* 'fall' (here with notion of error, 'slip of the tongue').

5. Lith. *tarmė* : *tarti* 'say' (18.22).

Lett. *izluoksne*, as lit. 'divergence' : *izluocīt* 'bend away, turn aside'.

6. SCr. *narječje*, Boh. *nářečí*, Pol. *narzecze*, Russ. *narečie*, fr. cpd. of verb for 'say', ChSl. *reką*, *rešti*, SCr. *reći*, etc. (18.22). Cf. ChSl. *narešti* 'define', *narokŭ* 'determination, vote', Boh. *narok* 'claim', etc.

Words for 'word' originally denoted something said, 'saying, utterance' (and several of the words listed are quotable mostly in this general sense), and only secondarily the individual 'word'. Many are connected with verbs for 'speak, say', though in some cases not the one current in the same language.

1. Derivs. of IE *wekʷ- 'speak, say' (18.21). Walde-P. 1.245 f.

Grk. ἔπος; Lat. *vōx* (also 'voice'), Skt. *vacas-*, Av. *vačah-*, Av. *vāč-* (also

'voice, speech'), *uxδa-* (also 'saying', pl. 'speech').

Here also Lat. *vocābulum* (more directly fr. *vocāre* 'call') 'appellation, name', later also 'substantive' and in MLat. 'word'.

2. Derivs. of IE *wer- in Grk. fut. ἐρῶ, etc. 'speak, say' (18.21), esp. IE *wer-dh- (*wr̥-dh-, *wor-dh-) 'word'. Walde-P. 1.2833. Ernout-M. 1088 f.

Grk. ῥῆμα (orig. 'word, saying', later gram. term. for 'verb'); Lat. *verbum*, Goth. *waurd*, OE *word*, etc., general Gmc.; OPruss. *wirds*, Lett. *vārds* (latter also 'name', as Lith. *vardas*).

3. Grk. λέξις, orig. 'speech, diction, style', whence 'single word or phrase' (Aristot., etc.), then usual gram. term for 'word' and so in NG : λέγω 'speak, say' (18.21). Hence also Grk. λόγος, used of a verbal expression or utterance, but rarely of a single word and never a gram. term in this sense.

4. It. *parola*, Fr. *parole* (now mostly 'saying, utterance'; for the individual 'word' replaced by *mot*), Sp. *palabra*, fr. VLat. *parabola*, fr. Grk. παραβολή (orig. 'juxtaposition, comparison' : παραβάλλω 'set beside') in its biblical sense of 'parable, saying'. Wackernagel, IF 31.262 f. REW 6221. Ernout-M. 731.

Fr. (Prov., Cat.) *mot*, fr. VLat. *muttum* 'a grunt', back-formation to *muttīre*, *mutīre* 'mutter, grunt'. REW 5795. Gamillscheg 625.

Rum. *cuvînt*, also '(one's) word, promise, agreement', fr. Lat. *conventum* 'agreement, compact, accord'. Cf. NG κουβέντα 'conversation', κουβεντιάζω 'converse'. REW 2194.

5. Ir. *briathar*, formally = W. *brwydr* 'battle' (orig. 'word-battle'?), but root connection and orig. meaning uncertain. Walde-P. 1.687, 2.194. Pedersen 2.45.

Ir. *focal*, fr. Lat. *vocābulum* (above, 1). Pedersen 1.206, 228. Vendryes, De hib. voc. 143.

W. *gair*, Br. *ger* : Ir. *gairim* 'shout' (18.13).

Br. *komz*, also vb. 'speak' (18.21).

6. Goth. *waurd*, etc., above, 2.

7. Lith. *žodis* : *žodas* 'speech-sound', *žadėti* 'promise', *žadinti* 'cause to speak, talk to', Lett. *zadināt* 'speak to, make laugh, ridicule, blame', etc., Lett. *pražastis* 'epithet', etc., root connection dub. Mühl.-Endz. 4.679.

8. ChSl. *glagolŭ* (reg. for ῥῆμα) : *glagolati* 'speak' (18.21).

ChSl. *slovo* (reg. for λόγος), Boh., Russ. *slovo*, Pol. *słowo* : *slava* 'fame', Av. *sravah-* 'word, teaching, saying', Skt. *çravas-* 'praise, fame', Grk. κλέος, Ir. *clū* 'fame', etc., fr. the root of ChSl. *slyšati*, Skt. *çru-*, etc. 'hear' (15.41). Walde-P. 1.494 f. Trautmann 308.

SCr. *riječ* = Boh. *řeč*, Russ. *reč* 'speech, language' : ChSl. *reką*, *rešti* 'say', etc. (18.22).

9. Skt. *çabda-*, lit. 'sound, noise' (15.44), but also the common term for 'word' (so reg. Pāṇini).

Skt. *pada-*, lit. 'pace, step' and 'foot' (as measure), whence 'part, portion', esp. as 'portion of a verse', whence 'word' (: *pad-* 'foot', etc.).

Skt. *vacas-*, Av. *vāč-*, *vačah-*, *uxδa-*, above, 1.

Av. *sravah-* : Slavic *slovo* (above, 8).

Av. *mąθra-*, also 'saying, promise', esp. 'holy word' : Skt. *mantra-* 'sacred text, hymn', fr. Av., Skt. *man-* 'think' (17.13). Barth. 1177 ff.

The antecedents of the modern comprehensive dictionaries of a language were the glossaries or vocabularies, as we should now call them, of rare words or dialect words or words of a given author or group of writings. The early Greek terms for such were λέξεις or γλῶσσαι (whence Lat. *glossārium* > NE *glossary*, etc.), later λεξικόν (sc. βιβλίον), whence MLat. *lexicon* and the similar forms familiar in the modern Eur. languages, though less common than those listed.

Grk. ὀνομαστικόν, the title of the well-known work of Pollux (more properly pl. τὰ ὀνομαστικά for the whole work, -κόν for each book), with its classification by subjects, neut. (sc. βιβλίον) of adj. ὀνομαστικός, deriv., through vb. ὀνομάζω, of ὄνομα 'name'. Hence also ὀνομασία or pl. ὀνομασίαι applied to similar classified lists.

MLat. *dictiōnārium* (or *dictiōnārius* sc. *liber*), deriv. of Lat. *dictiō* 'saying', in MLat. also 'word'. Hence the Romance and English words.

Skt. *koça-* 'container, box, chest, treasury', etc., prob. fr. *(s)keu- in words for 'cover' (Walde-P. 2.548), was also the usual word for 'treasury of words' (cf. the *Amara-koça-*, etc.).

Skt. *nighaṇṭu-*, a term applied to the old Vedic glossaries, a Mid. Ind. form of *nir-grantha- : Skt. *grantha-* 'text', *granth-* 'tie'. Uhlenbeck 148. Wackernagel, Altind. Gram. 1.167. For the two Skt. words, see also Zachariae, Grd. indo-ar. Phil. 1.3B.1 f.

The other words are obvious derivatives or compounds ('wordbook' in Gmc. and W. *geirlyfr*) of the usual words for a 'word' as listed in 18.26, e.g. NIr. *foclōir* (W. *geiriadur*), Lith. *žodynas*, SCr. *rječnik*, Russ. *slovar'*.

18.28 NAME

Nearly all the common words for 'name' belong to an inherited group of unknown root connection.

1. IE *enmen-, *n̥men-, *nŏmen-, etc. with manifold gradation. Walde-P. 1.132. Ernout-M. 675 f. Falk-Torp 758. Berneker 426.

Here belong all the words listed except the Lith. and Lett.; also OPruss. *emmens* (cf. Grk. dial. ἔνυμα in Lac. Ἐνυμακρατίδας, etc.), Arm. *anun*, Alb. *émën*, Hitt. *lāman* (with dissim.), and Toch. A *ñom*, B *ñem* (SSS 50).

2. Lith. *vardas*, Lett. *vārds* (the latter also 'word') : Lat. *verbum* 'word' (18.26).

18.31 ASK[1] (Question, Inquire)

Grk.	ἐρωτάω	Goth.	fraihnan	Lith.	klausti

Br.	goulenn	NHG	fragen		

There is considerable interchange, in the same word or among cognates, between the two notions covered by NE *ask*, namely 1) *ask* 'question, inquire' and 2) *ask* 'request' (*ask a person to do something*, and with the thing requested as object, *ask aid*, but for the latter now most commonly *ask for*, like NHG *bitte um*). In such groups the development may be in either direction or from a common 'seek' (an answer or a thing). In the following, for the sake of brevity, the two senses are distinguished as 'ask'[1] and 'ask'[2]. But except in words or groups in which both senses are involved 'ask'[1] is understood here, and expressions for 'ask'[2] are combined in 18.35.

1. IE *preḱ- and *pr̥(ḱ)-sḱ-, etc. in words for 'ask' in one or both senses. Walde-P. 2.44. Ernout-M. 794. f.

Lat. *poscere* 'ask'[2]; Ir. *arcu* 'beg, beseech', cpds. *com-aircim* 'inquire', *imm-comairc* (3sg.) 'ask'[1], W. *arch* 'request', MBr. *archas* 'il commanda'; Goth. *fraihnan*, ON *fregna* (sb. *frētt* 'question, investigation', whence vb. *frētta*), OE *fregnan*, *frignan*, ME *frayne*, MLG *vrāgen* (> Sw. *fråga*), Du. *vragen*, OHG *frāgēn*, MHG *vrāgen*, NHG *fragen* all 'ask'[1]; Lith. *prašyti* 'ask'[2], Lett. *prasīt* id. and rarely also 'ask'[1] (cf. Mühl.-Endz. s.v.); ChSl. *prositi*, etc. 'ask'[2], for 'ask'[1] ChSl. *vŭ-prositi*, Russ. *sprosit';* Skt. *pracch-*, *praç-*, Av. *fras-* 'ask'[1], Arm. *harçanem* id., Toch. A *pärk-*, *prak-*, B *prek-* act. 'ask'[2], mid. 'ask'[1] (SSS 449).

2. Grk. Hom. εἰρωτάω, Att. ἐρωτάω, NG ρωτῶ, orig. deriv. of an *ἐρϝως : Grk. (epic) ἐρέω, ἐρέομαι 'ask, inquire about, search, explore', ON *reyna* 'try', *raun* 'trial, attempt'. Walde-P. 2.356. Boisacq 278.

3. Lat. *rogāre* ('ask' in both senses), prob. orig. 'direct (oneself) to, address' : *regere* 'direct, guide, rule', Ir. *rigim* 'stretch out (the hand)', etc. Walde-P. 2.363. Ernout-M. 868 f.

Lat. *quaerere* 'seek' (11.31) also common for 'ask'[1]. Hence sb. *quaestiō* 'questioning, investigation' (rarely for

the concrete 'question'), whence Fr., ME, NE *question*, etc. Cf. also cpd. *inquīrere* 'inquire into', NE *inquire*, etc.

It. *domandare*, Fr. *demander* ('ask' in both senses; Sp. *demandar* mostly 'ask'[2]), fr. Lat. *dēmandāre* 'give in charge, intrust, commit', cpd. of *mandāre* 'intrust, command, charge with', orig. 'put in the hand' : *manus* 'hand', etc. Ernout-M. 586. Walde-H. 2.25. REW 2547.

Sp. *preguntar*, Port. *perguntar*, fr. Lat. *percontārī* 'investigate, inquire', fig. use of 'sound' (the depth), deriv. of *contus* 'pole, pike' (fr. Grk. κοντός id.). Ernout-M. 217. REW 6400.

'Answer' (vb.) is generally expressed by compounds, especially of prefixes having the force (among others) of 'back, against, in return', with verbs for 'say' (also 'shout, call, pledge', etc.) or (through sb. 'answer') from nouns for 'word'.

1. Grk. ἀποκρῖνομαι, mid. of ἀποκρῖνω 'separate, set apart, choose, reject', cpd. of ἀπό 'from, away, apart' and κρῖνω 'separate, decide'.

NG ἀπαντῶ, also 'meet' fr. class. Grk. ἀπαντάω 'meet' (19.65).

2. Lat. *respondēre* (VLat. *respondere* > Romance words), orig. 'pledge in return', cpd. of *spondēre* 'engage, pledge, promise' (: Grk. σπένδω 'pour a libation'). Ernout-M. 967 f. REW 7247.

3. Ir. *fris-gairim*, lit. 'shout or call against', cpd. of *gairim* 'shout, call' (18.13). Hence (fr. vbl. n. *frecre*) NIr. *freagraim*. Pedersen 2.535.

W. *ateb*, cpd. of *at-* 're-' (= prep. *at* 'to, toward') and *heb* 'inquit' (18.22).

Br. *respont* (vb. and sb.), fr. OFr. *respont*, beside *respon(d)s* (Fr. *réponse* : *répondre*, above, 2).

4. Goth. *andhafjan*, cpd. of *and(a)-* 'along, against, toward' and *hafjan* 'lift' (10.22).

Goth. *usbairan*, lit. 'carry out, bring forth' (renders ἐκ-, προ-φέρω), whence 'bring forth' (an answer) = ἀποκρίνομαι (Mk. 11.14), cpd. of *bairan* 'carry'.

ON *svara*, Dan. *svare*, Sw. *svara*, and in cpds. with ON, OE *and-* (= Goth. *and-*, above), ON *andsvara* (rare and usually 'be responsible for'), OE *andswarian*, ME *answere*, NE *answer* : ON *sverja*, OE *swerian*, Goth. *swaran*, etc. 'swear' (21.24). Falk-Torp 1211, 1215.

OE *andwyrdan*, ME (early) *andwurde*, *andwerde*, Du. *antwoorden*, OHG, MHG *antwurten*, NHG *antworten* (Goth. *andwaurdjan* = ἀνταποκρίνομαι 'answer back, argue against', Rom. 9.20), derivs. of sbs. OE *andwyrde*, OHG *antwurti*, Goth. *andawaurdi* 'answer' (ON *andyrði* 'objection'), cpds. of OE, ON *and-*, etc. (above) and coll. deriv. of OE *word*, etc. 'word' (18.26). Weigand-H. 1.74.

OHG *antlingen*, *antlingōn*, deriv. of an adj. *antlang = OS *andlang* 'directed against', etc. (Walde-P. 2.435). Cf. Braune, Ahd. Lesebuch[9] 215.

ME *replye*, NE *reply*, fr. OFr. *replier* 'fold again, turn back, reply', cpd. of *plier* 'fold' (9.15). NED s.v. *reply*, vb.

ME *respond*, *respoundre*, NE *respond* (now often in fig. sense), fr. OFr. *respoundre*, *respundre*, Lat. *respondēre* (above, 2). NED s.vv. *respond*, *repoun(d)*.

5. Lith. *atsakyti*, cpd. of *at-* 'off, away, back' and *sakyti* 'say' (18.22).

Lett. *atbildēt*, cpd. of *at-* (= Lith. *at-*, above) and *bildēt* 'speak, say' (not used except in cpds.) : OPruss. *billīt* 'say, speak', etc. (18.21).

6. ChSl. *otŭvěštati* (sb. *otŭvětŭ*), Russ. *otvetit'*, *otvečat'*, cpds. of *otŭ* 'from, away' and *věštati* 'speak', etc. (18.21).

SCr. *odgovoriti*, cpd. of *od-* (= ChSl. *otŭ*, above) and *govoriti* 'speak' (18.21).

Boh. *odpověděti*, Pol. *odpowiedzieć*, cpds. of *od-* (= ChSl. *otŭ*, above) and Boh. *pověděti*, Pol. *powiedzieć* 'tell, say' (18.22).

7. Skt. *prati-vac-*, *prati-bhāṣ-*, cpds. of *prati* 'back, toward' and roots for 'speak, say', *vac-*, *bhāṣ-*, etc. (other roots listed 18.21, 18.22 may be likewise used).

Av. *paiti-mrū-*, cpd. of *paiti-* 'again, against' and *mrū-* 'speak, say' (18.21).

18.33 ADMIT, CONFESS

Grk.	ὁμολογέω	Goth.	andhaitan	Lith.	pripažinti
NG	παραδέχομαι, ὁμολογῶ	ON	jāta	Lett.	atzīt
Lat.	fatērī, confitērī	Dan.	tilstaa, bekende	ChSl.	ispovědati

'Admit' (as true, 'acknowledge, confess') is expressed by words meaning literally 'agree with, accept, let into (permit), say, (say) yes', etc., and especially by compounds of words for 'know, recognize'.

Some words for 'confess' that are mainly restricted to eccl. use are omitted.

1. Grk. ὁμολογέω 'agree with, admit, confess' (NG chiefly in eccl. usage), deriv. of ὁμόλογος 'agreeing, corresponding', cpd. of ὁμός 'same' and λόγος 'reckoning, reason, etc.'

NG παραδέχομαι, in class. Grk. usually in the lit. sense 'receive, receive into' (cpd. of δέχομαι 'receive'), but freq. in papyri 'recognize as correct, agree to' (cf. LS s.v.).

2. Lat. *fatērī*, and esp. cpd. *confitērī* (pple. *confessus*, whence VLat. *confessāre > It. *confessare*, Fr. *confesser*, Sp. *confesar*, all esp. in eccl. usage), cf. Osc. *fatíum* 'speak' : *fārī* 'speak' (18.21). Ernout-M. 335. Walde-H. 1.462 f.

It. *ammettere*, Fr. *admettre*, Sp. *admitir*, all also 'admit' in the lit. sense 'let into', fr. Lat. *admittere* id., and also 'permit, perpetrate (a crime)', cpd. of *mittere* 'let go, send' (10.63).

Fr. *avouer* (> NE *avow*), in OFr. 'recognize', prob. as orig. 'take oath to', cpd. of *vouer* 'vow' (fr. VLat. *vōtāre, deriv. of *vōtum* 'promise, vow'), but perh. merged with deriv. of Lat. *advocāre* 'call to'. Gamillscheg 63. Wartburg 1.42.

Rum. *mărturisi*, orig. 'bear witness', through Slavic (cf. Serb.-ChSl. *marturisati* 'testari'), fr. aor. of Grk. μαρτυρέω 'bear witness'. Tiktin 956 f.

3. Ir. *atmu*, 3 pl., *ataimet*, NIr. *admhuighim*, W. *addef*, Br. *anzao*, cpds. of *ad-* 'to' and Ir. *daimim* 'permit, grant', etc. : Lat. *domāre*, Grk. δαμάζω 'tame, subdue', etc. Walde-P. 1.789. Pedersen 1.388, 2.503–4.

4. Goth. *andhaitan*, OE *andettan*, cpd. of *and-* 'along, against' (cf. Goth. *and-hafjan* 'answer', etc.) and *haitan* 'call, name', pass. 'be called', etc. (18.42).

ON *jāta*, orig. 'say yes' = OHG *gi-jāzen*, MHG *jāzen* 'say yes, agree', deriv. of ON *jā*, OHG *jā*, etc. 'yes'. Falk-Torp 472.

OE *oncnāwan*, ME *aknawe*, Du., NHG *bekennen* (> Dan. *bekende*, Sw. *bekänna*), all orig. 'recognize, admit knowledge of', whence 'recognize as true', cpds. of OE *cnāwan*, NHG *kennen*, etc. 'know, recognize' (17.17). Hence early NE *acknowledge* sb., whence NE *acknowledge* vb. NED s.vv.

ME *confesse*, NE *confess*, fr. OFr. *confesser* (above, 2).

NE *admit*, fr. Lat. *admittere* (cf. It. *amittere*, etc., above, 2).

Du. *toegeven*, NHG *zugeben* (hence the use in this sense of Sw. *medgiva*, and less commonly Dan. *medgive;* cf. Falk-Torp 707), cpd. of *toe-*, NHG *zu* 'to' and *geven*, *geben* 'give'.

OHG *jehan*, also *bi-*, *gi-jehen*, MHG *jehen*, *bijehen* : W. *iaith*, Br. *yez* 'language' (18.24). Deriv. OHG *bijiht*, MHG *begiht* > *bīht*, NHG *beichte* 'confession', whence NHG *beichten* in eccl. usage. Weigand-H. 1.188.

MHG *gestān*, NHG *gestehen*, *zugestehen*, MLG *tōstān* (Dan. *tilstaa*, Sw. *tillstå* by semantic borrowing), orig. (and so mostly in MHG) 'stand, remain standing', whence 'stand beside, stand by, assist', and finally 'admit'. Falk-Torp 1261. Weigand-H. 1.708.

5. Lith. *pripažinti*, Lett. *atzīt*, orig. 'recognize' : Lith. *žinoti*, Lett. *zināt* 'know' (17.17).

6. ChSl. *ispovědati* (quotable only as 'confess' in eccl. sense, and so in modern Slavic), cpd. of *izŭ* 'out' and *povědati* 'tell, relate, say' (18.22).

SCr. *priznati*, Boh. *uznati*, Pol. *przyznać*, Russ. *priznat'*, *soznat'*, all orig. 'recognize', cpds. of SCr. *znati* 'know', etc. (17.17).

Boh. *připustiti*, cpd. of *pustiti* 'let go, release' (11.34).

7. Skt. *svī-kṛ-*, lit. 'make one's own', cpd. of *svī-* in cpds. for *sva-* 'own' and *kṛ-* 'make, do'. Cf. English *own, own up* in same sense.

Skt. *anu-bhāṣ-*, also 'speak to, address', cpd. of *anu-* 'along, to, toward', and *bhāṣ-* 'speak' (18.21).

Several of the words for 'ask, request', briefly 'ask'[2], are the same as, or related to, those for 'ask, inquire', briefly 'ask'[1]. See 18.31. Others are cognate with words for 'seek, desire', etc. Besides the words listed, those for 'wish, will' are often used with the implication of a mild, or even firm, request.

Cf. also words for 'pray' (22.17), of which several are the same as those listed here, and some of the others are also used in a nonreligious sense as NE *pray.*

1. IE **preḱ-* in words for 'ask' in both senses. See 18.31.

Here as 'ask'[2] Lat. *poscere*, Lith. *prašyti*, Lett. *prasīt*, ChSl. *prositi*, etc., general Slavic (but SCr. *prositi* now 'beg, woo').

2. Grk. αἰτέω, prob. as 'demand one's share' : αἶσα (*αἰτ̯α) 'share, fate', αἴσιος 'auspicious', αἴσιμος 'fated, destined', etc., Osc. *aeteis* 'partis', Av. *aeta-* punishment, guilt' (i.e. 'one's lot'). Walde-P. 1.2.

NG ζητῶ, fr. class. Grk. ζητέω 'seek' (11.31). Also rarely 'demand, require'.

Grk. ἐρωτάω 'ask'[1] (18.31) is frequently used for 'ask'[2] in Hellenistic times (LXX, NT, pap.).

NG παρακαλῶ (milder than ζητῶ, used like NE *I beg you, I pray you, please*), fr. class. Grk. παρακαλέω (cpd. of καλέω 'call', 18.41) 'summon, invite, exhort', etc., late also 'beseech' (Polyb., NT, etc.).

3. Lat. *petere* (> Sp., Port. *pedir*), orig. ('fly at') 'assail, attack', hence 'seek' and 'ask, request' : Grk. πέτομαι 'fly', Skt. *pat-* 'fly, fall', etc. Walde-P. 1.20. Ernout-M. 763 f.

Lat. *rogāre* 'ask' in both senses (18.31), as 'ask'[2] > Sp. *rogar;* Rum. *ruga* in polite phrase *te rog, vă rog* 'please', or refl. 'pray'.

Ir. *domandare*, Fr. *demander* 'ask' in both senses (18.31).

It. *(ri)chiedere*, Rum. *cere*, fr. Lat. *quaerere* 'seek' (11.31). REW 6923, 7235.

NE *beg*, primarily 'ask alms', but also a humble or polite expression for 'ask, request', orig. dub. NED s.v.

Du. *verzoeken*, NHG *ersuchen*, cpds. of Du. *zoeken*, NHG *suchen* 'seek'.

Du., NHG *verlangen* (> Dan. *forlange*), orig. 'desire, long for' (16.62).

Du. *vorderen*, MHG *vordern*, NHG *fordern*, fr. MLG *vorderen* (> Dan. *fordre*, Sw. *fordra*), OHG *fordarōn*, lit. 'cause (command) that something go forward', deriv. of OHG *fordar*, etc. 'fore, forward'. Weigand-H. 1.568. Falk-Torp 266.

6. Lith. *reikalauti* (mostly 'demand'), fr. *reikalas* 'necessity' : *reikėti* 'be necessary' (9.93).

7. ChSl. *prositi*, etc., above, 1.

ChSl., SCr. *moliti* 'ask, beg', refl. 'pray', see under 'pray' (22.17).

SCr. *iskati*, also 'seek' (the general Slavic meaning, ChSl. *iskati*, etc., 11.31).

SCr. *tražiti*, also 'seek' (11.31).

Boh. *žádati*, Pol. *żądać*, orig. 'desire' (16.62).

Russ. *trebovat'*, orig. 'need' : ChSl. *trěbě* 'opus ut', *trěbŭ* 'necessary', etc. (9.93, 9.94).

8. Skt. *yāc-*, perh. : OHG *jehan* 'confess, acknowledge, say', W. *iaith* 'language', etc. Walde-P. 1.205.

Skt. *arthaya-*, esp. *prārthaya-* (*pra-arthaya-*), lit. 'strive to obtain, desire' : *artha-* 'aim, purpose' (17.41).

Av., OPers. *jad-* 'beseech, pray for', see under 'pray' (22.17).

Words for 'promise' include some meaning literally 'undertake' or 'put forth', several cpds. of verbs for 'speak, say, call, know, hear', derivs. of nouns for 'vow, pledge', and some cognates of words for 'dear' and 'love' ('find agreeable, acceptable' > 'promise').

1. Grk. ὑπισχνέομαι and (Ion., Delph., etc.) ὑπίσχομαι, late Byz., NG ὑπόσχομαι (cf. Grk. fut. ὑπο-σχήσομαι, 2d aor. ὑπε-σχόμην), orig. 'undertake', cpd. of ὑπό 'under' with forms of ἴσχω 'hold, hold back' (**si-zĝh-*) and ἔχω 'hold, have'.

Grk. ἐπαγγέλλω 'proclaim, announce', but freq. also 'promise', cpd. of Grk. ἀγγέλλω 'announce'.

NG pop. τάζω, fr. class. Grk. τάσσω 'array, assign', etc., in mid. also 'agree upon', whence 'promise' (cf. NE *agree to* = 'promise') in Byz. (Chron. Mor. ἔταξε, etc., also ἐτάχτη κ'ὑπησχήθη) and NG.

2. Lat. *prōmittere* (> Romance words), lit. 'put forth', cpd. of *mittere* 'let go, send' (10.63). Ernout-M. 622.

Rum. *făgădui*, also 'entertain' (a guest), fr. Hung. *fogad* 'receive, welcome, vow, promise'. Tiktin 605.

3. Ir. *duairngir* (3sg.), cpd. of *gairim* 'shout, call' (18.41). Pedersen 2.534.

Ir. *gellaim*, NIr. *geallaim*, in the older language largely 'pledge', deriv. of *gell* 'pledge' : *gīall*, W. *gwystl*, ON *gīsl*, etc. 'hostage'. Walde-P. 1.554. Pedersen 2.537.

W. *addaw*, *addo*, fr. *ad* + *do* 'yes', hence orig. 'say yes to'.

Br. *gouestla*, deriv. of *gouestl* 'vow, promise, pledge, hostage' (= W. *gwystl*, etc.; cf. Ir. *gellaim*, above).

4. 'Forbid' is often expressed by compounds of verbs for 'command' or 'say' with various prefixes which have come to connote exclusion, interference, negation, etc. (Grk. ἀπο-, Lat. *pro-*, *inter-*, NE *for-*, NHG *ver-*, Slavic *za-*). Or words for 'hinder, prevent' (19.59), 'repel', etc. come to be used also as the verbal 'forbid'.

1. Grk. ἀπαγορεύω, cpd. of ἀπό 'away from', in its use indicating exclusion, negation, and ἀγορεύω 'speak'. Outside of present system, supplemented by fut. ἀπ-ερῶ, aor. ἀπ-εῖπον, cpds. of other verbs for 'speak, say' (18.21).

Grk. οὐκ ἐάω 'not permit' (19.47) serves for the positive 'forbid' in Hom. (where ἀπαγορεύω does not occur).

Grk. κωλύω 'hinder, prevent' (19.59), late also sometimes 'forbid'. In NT (ἀπαγορεύω does not occur; 'forbid' in strict sense is expressed as 'command not', e.g. Mk. 6.8, 8.30, etc.) κωλύω is generally rendered by OE *forbēodan*, NE *forbid* (e.g. Mt. 19.14 = Lk. 18.16, etc.), but these words are also used, like Lat. *prohibēre*, for 'hinder, prevent'.

2. Lat. *vetāre* (> It. *vietare*, OFr. *veer*, OSp. *vedar*), OLat. *votāre*, prob. : W. *gwadu* 'deny', OW *guetid* 'says'. Ernout-M. 1099. Loth, RC 42.367 f.

Lat. *interdīcere* (> It., Fr. *interdire*, Sp. *interdecir*, Rum. *interzice*, all with legal or formal nuance), orig. a legal term, cpd. of *dīcere* 'say' and *inter* 'between' in its use indicating interference, destruction, etc. (*inter-īre, -ficere, -imere*, etc.). Ernout-M. 491 f. Walde-H. 1.709.

Lat. *prohibēre* 'hinder, prevent' (19.59) and 'forbid', whence in latter sense It. *proibire*, Sp. *prohibir*, Fr. *prohiber*.

Fr. *défendre*, 'defend' and now the common word for 'forbid', fr. Lat. *dēfendere* 'repel, defend', orig. 'strike down' : Grk. θείνω 'strike', etc. Walde-P. 1.680. Ernout-M. 344. Walde-H. 1.332 f. REW 2517.

Rum. *opri* 'hinder' (19.59) also 'forbid'.

Several of the words for 'call' (summon or attract attention) are the same as, or are derived from, those meaning 'shout, cry out' (18.13). This is especially true in the popular language. Some of them, but by no means all, are used also for 'call' = 'name' (18.42).

1. Grk. *καλέω* (NG *καλῶ* lit. and esp. 'invite') : Lat. *calāre* 'call out, proclaim, convoke', Lat. *clāmāre* 'shout, cry out' (18.13).

Grk. *κράζω* 'shout', freq. 'call' in pop. Byz. (e.g. Chron. Mor.; sometimes also 'call' = 'name') and NG.

NG pop. *φωνάζω* 'shout' and 'call'.

2. Lat. *vocāre* : *vōx* 'voice' (18.11).

It. *chiamare*, Sp. *llamar*, Rum. *chema*, fr. Lat. *clāmāre* 'shout' (18.13). REW 1961.

Fr. *appeler*, fr. Lat. *appellāre* 'address, call upon, invoke', cpd. (*ad-p-*) like *com-pellāre* 'accost, reproach', *interpellāre* 'interrupt', fr. the root of *pellere* 'drive, drive out, strike' (10.65). Walde-P. 2.677. Ernout-M. 749 f. Walde-H. 1.59. REW 542.

3. Ir. *gairim* 'shout' and (esp. in OIr. cpd. *do-gairim*, with prefix *to-*) 'call'; here also NIr. *gairmim*, fr. *gairm* 'a call, summons'.

W. *galw*, MBr. *galu*, Br. *gervel* (pple. *galvet*, cf. *galv* sb. 18.42 CALL (vb. = Name; b) Be Called, Named)

Grk.	*καλέω, ὀνομάζω*	Goth.	*haitan, namnjan*	Lith.	*vadinti*
NG	*λέγω, ὀνομάζω*	ON	*heita* (also b), *kalla*	Lett.	*saukt*

		MHG	*heizen* (also b)		
		NHG	*nennen, heissen* (b)		

The majority of the common words for 'call' = 'name' are the same as those for 'call' = 'summon' (18.41) or belong to groups which once had this sense (as SCr., Boh. *nazvati*, etc. : ChSl. *zŭvati* 18.41). In general, pass. or refl. forms are used for 'be called, bear a certain name', as Grk. *καλοῦμαι*, Lat. *vōcārī*, Fr. *s'appeler*, Dan. *kaldes*, Russ. *nazvat'sja*, etc. But forms of the Gmc. group, Goth. *haitan*, ON *heita*, OE *hātan*, OHG *heizan* were used for both 'call' and 'be named' (but pass. in Goth. *haitada* and OE *hātte;* cf. NED s.v. *hight*, vb.[1]), and the latter use prevails in the modern forms (Dan. *hede*, Sw. *heta*, Du. *heeten*, NHG *heissen*, NE arch. *hight* pple.).

Other terms are derivs. of nouns for 'name' (18.28), as Grk. *ὀνομάζω*, the Gmc. group Goth. *namnjan*, OE *nemnan*, etc., and the Slavic group (not included in the list; some of them mostly 'name' = 'appoint' or the like) ChSl. *imenovati*, Boh. *jmenovati*, etc.

A few are words for 'say'. So Grk. *λέγω* as 'call, name' rarely in class. Grk., freq. in NT, and the usual expression in NG (*πῶς τὸν λένε, πῶς λέγεται*; 'what is his name?'); ChSl. *narešti* (in Gospels reg. for *καλέω*, also *ὀνομάζω*), cpd. of *rešti* 'say' (18.22). Cf. also Lith. *vadinti* : Skt. *vad-* 'speak, say' (18.21).

Skt. *abhi-dhā-*, lit. 'put on', but esp. 'put a name upon, call', with sbs. *abhidhā-*, *abhidhāna-* 'appellation, name'.

'Announce' is expressed by words meaning literally 'bring a message, bring news, make known, make public', etc. But besides the words listed, common verbs for 'say' or 'speak' may be used in a formal way so as to be virtually equivalent to 'announce' or 'declare' (*thus saith the king*, bibl. *I say unto you*, etc.).

1. Grk. *ἀγγέλλω*, cpd. *ἀναγγέλλω*, fr. *ἄγγελος* 'messenger', of dub. orig. (: Pers. *ἄγγαρος* 'messenger' or early loanword fr. the same source?). Walde-H. 1.46.

2. Lat. *nūntiāre* (later and esp. eccl.), *adnūntiāre* (> Romance words), fr. *nūntium* 'message', *nūntius* 'messenger', generally derived fr. *novus* 'new' (e.g. as cpd. **novi-ventio-*, Brugmann, IF 17.366 f.) but perh. as an orig. augural term (cf. Ernout-M. 687) : Ir. *nūall* 'noise, cry', Skt. *nu-* 'sound, exult, praise'. Cf. Chruška, reported by Niedermann, Idg. Anz. 19.33 f.

Rum. *vesti* fr. sb. *vesti* 'announcement, news', fr. ChSl. *věstĭ* id. (below, 6), Tiktin 1733.

3. Ir. *foōcair*, *fouacair* (3sg.), NIr. *fōgraim*, fr. **fo-od-gair-*, cpd. of *gairim* 'shout, call' (18.13). Pedersen 2.535.

W. *cyhoeddi*, also 'publish', fr. *cyhoedd* 'public', cpd. of *cy-* 'with, common', but second part dub. Morris Jones 98 (but?).

W. *datgan*, cpd. of *dad-* with intensive force and *canu* 'sing'. Morris Jones 266.

Br. *kemenn*, also 'command' (and so always the cpd. *gourc'hemenn*), fr. Lat. *commendāre* (cf. 19.45).

Br. *embann*, also 'proclaim, publish', as sb. 'proclamation, bans', fr. French phrase (*proclamer*) *en ban*. Henry 112.

4. Goth. *gateihan*, ON *tjā*, also 'show' (OE *tēon*, OHG *zīhan* 'accuse') : Grk. *δείκνῡμι*, Skt. *diç-* 'show', etc. (15.55). Feist 204.

Goth. *mērjan*, OE *mǣran*, OHG *mār(r)en* (ON *mǣra* 'praise') : ON *mǣrr*, OE *mǣre*, OHG *māri* 'famous', Ir. *mār*, *mōr* 'great', *māraim* 'make great, magnify', etc. Walde-P. 2.238. Feist 355.

Goth. *spillōn* : *spill* 'story', ON *spjall*, OE *spell*, OHG *spell* 'story, account', ON *spjalla*, OE *spellian* 'talk, converse', outside connections dub. Walde-P. 2.676 f. Feist 445.

ON *boða*, OE *bodian*, ME (NE) *bode*, fr. ON *boð* 'offer, message, command', OE *bod* 'command, message' : ON *bjōða* 'offer, command', OE *bēodan* 'offer, command, announce', ME *bede*, etc. (19.45).

ON *kynna* (rare in this sense, usually refl. with dat. or pass. 'learn, study', cf. Fritzner s.v.), OE *cȳþan*, ME *kythe*, MLG *(vor)kunden* (> Dan. *forkynde*, Sw. *förkunna*), OHG *cundan*, MHG *kunden*, *künden*, NHG *(ver)künden*, fr.

ON *kunnr*, OE *cūþ*, OHG *cund*, Goth. *kunþs* 'known' (orig. pple. to Goth. *kunnan*, etc. 'know'); hence adj. OHG, NHG *kundig*, with deriv. vb. MHG *kündigen*, NHG more usually in cpds. *ankündigen*, *verkündigen*, Du. *aankondigen*, *verkondigen*. Weigand-H. 1.1171. Falk-Torp 258.

Dan. *kundgøre*, Sw. *kungöra*, prob. translations of NHG *kundmachen*, *kundtun* 'notify, make known', cpds. of Dan. *kund*, etc. 'known' (= ON *kunnr*, cf. above) and words for 'make, do'. Falk-Torp 594.

NE *announce*, early *anounce*, fr. OFr. *anonc(i)er* (above, 2).

5. Lith. *skelbti* (freq. also with prefixes *ap-*, *pa-*) : *skalyti* 'bark, bay' (of dogs), Pol. *skolić* 'whine (as a dog)', OHG *scellan* 'sound, resound, make a noise, ring', ON *skjalla* 'clash, clatter', etc. Walde-P. 1.445.

Lith. *garsinti* (also *ap-*), fr. *garsas* 'sound, tone' (15.44).

Lett. *pazin'uot*, caus. to *(pa)zīt* 'know' (17.17).

Lett. *sludināt* : *sludēt* 'be rumored about', fr. the root of *slava* 'fame, glory', etc. (16.47). Mühl.-Endz. 3.940 f.

6. ChSl. *vŭz-věstiti* (the usual word in the Gospels for *ἀπαγγέλλω*), SCr. *navijestiti*, Boh. *zvěstiti*, Pol. *obwieścić*, Russ. *vozvestit'* : ChSl. *věstĭ* 'news', *věštati* 'speak', etc. (18.21).

ChSl. *pověděti*, freq. in Gospels for *ἀπαγγέλλω*, but also for *εἶπε*, *λέγω* 'say' (18.21).

SCr. *obznaniti*, Boh. *oznamiti*, Pol. *oznajmić*, cpds. with caus. force to Slavic *znati* 'know' (17.17).

Several of the words for 'threaten' were used also for 'urge, press' (as OE *þrēatian*) or are cognate with others of such meaning, that is, 'threaten' was to 'exert pressure'. Several others meant originally 'frighten'. There are also connections with words for 'keep away, prevent' (through 'warn'), 'project, hang over' (a threat hangs over one), 'disgusting' ('make oneself disagreeable' > 'threaten'), and 'loud noise, cry, call'.

1. Grk. *ἀπειλέω*, beside sb. *ἀπειλή*

mostly in pl. 'threats', etym. much disputed; various outside connections suggested (Boisacq 67 f. Walde-H. 1.59), but prob. the same word as *ἀπειλέω* 'force' (Hdt.), Elean *ἀποϝηλέω* 'keep away, exclude' (from the altar, etc.), cpd. of *εἴλω* (**ϝέλνω*) 'force, press, shut in or out, prevent'. Cf. also Heracl. *ἐγ-* (= *ἐκ-*)*ϝηλέω* 'keep away'. Semantic development 'keep away' through 'warn off, warn' to 'threaten'?

NG *φοβερίζω*, orig. 'frighten' (so LXX, Byz.), fr. *φοβερός* 'terrible, fearful' : *φόβος* 'fear' (16.53).

2. Lat. *minārī*, lit. but only poet. 'jut out, project', whence usually 'threaten', beside *minax* 'projecting, threatening', whence VLat. *minacia* sb. Several of the words for 'boast' are refl. (or med. pass.) forms of verbs derived from nouns for 'praise' or 'glory', hence orig. 'praise oneself, glorify oneself'. Others are mostly cognate with words for 'shout, cry out' or 'make a noise', partly of imitative origin. Occasional connections are with words for 'empty, vain', 'big' ('make oneself big' > 'boast').

1. Grk. *εὔχομαι*, mostly 'pray, vow' but also 'boast' (both senses in Hom.) : Lat. *vovēre* 'vow', Skt. *vāghat-* 'sacrificer', Av. *aoj-* 'say solemnly' (18.43). Walde-P. 1.110. Boisacq 300. Ernout-M. 1135.

Writing as a record of speech had developed in Egypt and western Asia as early as 4000 B.C., but was unknown in the place and time of IE unity. It spread from non-IE sources to the historical IE-speaking peoples. The terminology, however, is native IE, and in western Europe to a considerable extent of Latin origin.

The majority of the words for 'write', including Lat. *scrībere*, which is the source of the western European words except the English, meant originally 'scratch, cut, carve', applicable to writing on stone or wood or the later wax tablet. The Goth. *mēljan* and the verb common to Slavic, Old Persian, and Tocharian (a notable and probably not accidental agreement) belong to groups which include verbs for 'paint' (NHG *malen* and Lat. *pingere*), and one is tempted to assume the development 'color, paint' > 'write' as appropriate to writing on papyrus or parchment. This might apply to the Gothic and Slavic—and even to the Old Persian word if we assume that it was first used, not of the cuneiform (as in actual occurrence) but with reference to the contemporaneous Aramaic script. Yet this is an unsafe inference, since the groups in question cover other senses (as 'mark, adorn') from which 'paint' and 'write' may be derived independently.

1. Grk. *γράφω*, orig. 'scratch, graze' : OE *ceorfan* 'cut, carve', OHG *kerban*, NHG *kerben* 'notch, indent', etc. Walde-P. 1.606 f.

2. Lat. *scrībere* (> Romance words, also Ir. *scrībaim*, NIr. *scrīobhaim*, W. *ysgrifennu*, Br. *skriva*, ON *skrifa*, Dan. *skrive*, Sw. *skriva*, Du. *schrijven*, OHG *scrīban*, MHG *schrīben*, NHG *schreiben*, all 'write'; but OE *scrīfan* 'decree, pass judgment, shrive'), Umbr. *screhto* 'scriptum', Osc. *scriftas* 'scriptae', etc. : Grk. *σκαρῑφάομαι* 'scratch an outline, sketch', ON *hrīfa* 'scratch', Lett. *scrīpāt* 'notch, scratch', fr. extensions of the root **sker-* in OE, OHG *sceran*, Grk. *κείρω*, etc. 'cut off, shear'. Walde-P. 2.586. Ernout-M. 91 f.

3. Goth. *mēljan* (with sb. *mēla* pl. Br.	*lenn*	NHG	*lesen*		

Words for 'read' are based on notions like 'recognize, pick out, gather, observe, interpret, go through', etc., secondarily applied to written characters.

Just as in the case of 'write' Lat. *scrībere* is the source of the western European words except English, so Lat. *legere* is the source of the Romance (except Rum.), the Celtic, and, at least in part by semantic borrowing, of the most widespread Gmc. group.

1. Grk. ἀναγιγνώσκω, lit. (Hom., etc.) 'know, recognize', whence 'recognize written characters', 'read' (Pindar+), cpd. of γιγνώσκω 'know, recognize' (17.17).

NG διαβάζω (the pop. word for 'read'; ἀναγινώσκω lit.), fr. Grk. διαβιβάζω 'carry across', Byz. διαβάζω also 'pass the time, converse' (Chron. Mor.). Cf. NE *run through,* Fr. *parcourir* in sense 'read rapidly'. Koraes, Ἄτακτα 1.268.

2. Lat. *legere* (> It. *leggere,* Fr. *lire,* Sp. *leer*), orig. 'pick up, gather, collect', whence 'read', prob. through 'pick up, put together the individual written characters', or merely 'gather' as 'comprehend the meaning of something written. (cf. NE *gather* in this sense. NED s.v. I, 10) : Grk. λέγω 'gather, collect' and also 'speak, say' (18.21). Walde-P. 2.422. Ernout-M. 535 ff. Walde-H. 1.780.

Rum. *citi,* fr. the Slavic (below, 6).

3. Ir. *lēgaim,* NIr. *lēighim,* fr. Lat. *legere* (above).

W. *dar-llen* (with intensive prefix), Br. *lenn,* orig. only sb. 'reading', fr. Lat. *legendum* 'what is to be read' (: *legere,* above). Pedersen 1.222, 225.

4. Goth. *ussiggwan* or simply *siggwan* reg. render Grk. ἀναγιγνώσκω; *siggwan* also 'sing' (18.12). Prob. orig. applied to reading aloud, reciting (as in Lk. 4.16, etc., the usual sense in NT; but also simply 'read' as in Lk. 6.3).

Goth. *anakunnan,* cpd. of *ana* 'on' and *kunnan* 'know' (renders ἀναγιγνώσκω 'read'" Cor. 1.13, 3.2), lit. translation of the Greek.

ON *rāða,* OE *rǣdan* (also 'advise, plan, rule, explain', etc.), ME *rede,* NE *read* = OHG *rātan* 'advise, consider, interpret', etc. : ON *rœða,* Goth. *rōdjan* 'speak, talk' (18.21). ON *rāða* is the older word and is always used where reference is to reading of runes, whereas *lesa* (below) is used only of reading writing in Latin characters (cf. B. M. Olsen, Runerne i den oldislandske literatur, 35 f.). The earliest citation of OE *rǣdan* in NED refers to reading a book (Aelfred, Boeth., ca. 888).

ON *lesa,* Dan. *læse,* Sw. *läsa,* Du. *lezen,* OHG *lesan,* MHG, NHG *lesen,* all lit. 'gather, pick up' (= Goth. *lisan,* OE *lesan* in the lit. sense only). The use for 'read', which spread fr. OHG, etc. to Norse, may be in part a native development, but was doubtless affected by the double use of Lat. *legere* (above). Falk-Torp 677. Weigand-H. 2.56. Kluge-G. 355.

5. Lith. *skaityti,* Lett. *skaitīt,* both also 'count', and 'read' only dial. in Lettic : Lett. *šk'ist* 'think, intend, suppose, heed', fr. **skʷeit-,* beside **kʷeit-* in ChSl. *čisti,* etc. (below). Mühl.-Endz. 3.866 f., 4.47.

Lett. *lasīt,* 'gather, select', and 'read' : Lith. *lesti,* Lett. *lest* 'pick up with the beak' (Lett. also 'court', etc.), OHG *lesan,* etc. (above, 4). Mühl.-Endz. 2.423, 454.

6. ChSl. *čisti* (*čįtą*) 'read, count, calculate, honor', Boh. *čísti* 'read, count', as 'read' mostly replaced by iter. form *čitati* (ChSl. *po-čitati* 'read') in modern Slavic : Skt. *cit-* 'observe, notice', etc. Walde-P. 1.509. Berneker 174 f.

7. Skt. *paṭh-,* properly 'read or speak aloud' (also 'study, teach'), MInd. for *prath-* 'spread'. Wackernagel, Altind. Gram. 1.167. Walde-P. 2.677.

Skt. *adhi-i-,* lit. 'come upon' (cpd. of *i-* 'go, come'), hence 'remember, understand', and in mid. (*adhīte*) 'learn, study, read'.

Av. *aiwi-ah-,* also 'study, occupy the mind with' (esp. applied to studying the holy writ), cpd. of *aiwi-* 'to, at' and *ah-* 'be'. Barth. 278.

OPers. *pati-pars-* 'read' (an inscription) = Av. *paiti-fras-* 'ask', cpd. of *fras-* 'ask' (18.31). Cf. Pahl. *patpurs-,* Sogd. *ptβs-* 'read'. Barth. 999. Benveniste, BSL 31.2.71.

Words for 'letter' (of the alphabet) are of diverse origin, but here again the Latin word has been widely borrowed.

1. Grk. γράμμα : γράφω 'write' (18.51).

2. Lat. *littera* (> Romance words), early *leitera,* orig. dub. Ernout-M. 557 f. Walde-H. 1.814 f.

3. Ir. *liter,* NIr. *litir,* W. *llythyren,*

Br. *lizerenn* (W., Br. with singulative suffix, the simple form is 'epistle'), fr. Lat. *littera.*

4. Goth. *bōka,* in pl. 'writing, book' : ON *bōk,* OE *bōc,* etc. 'book' (18.61).

ON *stafr,* OE *stæf,* lit. 'staff, stick', prob. orig. applied to the perpendicular line which forms the basis of most runes (cf. ON *rūnastafr,* OE *rūnstæf*), whence transferred to the Latin letter, esp. in cpd. with 'book', ON *bōkstafr,* Dan. *bogstav,* Sw. *bokstaf,* OE *bōcstæf,* early ME *bocstaf,* OHG *buohstab,* etc. Falk-Torp 89 f. Kluge-G. 83.

ME *lettre,* NE, Du. *letter,* fr. Fr. *lettre* (above, 2).

5. Lith. *raidė* (now the preferred word, cf. NSB s.v. *litara*) beside *raida* 'development', both neologisms and apparently based on *riedėti* 'roll' (cf. NSB *išraida* 'development', *išriedėti* 'roll out').

Lith. *litara, litera,* through Pol. *litera,* fr. Lat. *littera.*

Lett. *burts,* orig. 'magic sign' = Lith. *burtas* 'lot', pl. 'sorcery' : Lett. *burt,* Lith. *burti* 'enchant, bewitch', etc. (22.42). Mühl.-Endz. 1.355.

6. ChSl. *kŭniga* in pl. as 'letters' (Lk. 23.38, but could be simply 'writing' as elsewhere), usually 'writing, book' (18.61).

SCr. *slovo* = ChSl., etc. *slovo* 'word' (18.26).

Boh. *písmeno* : *psati* 'write' (18.51).

Pol. *litera,* fr. Lat. *littera* (above, 2).

Russ. *bukva,* new sg. based on Russ.-ChSl. dat. pl. *bukvamŭ* (gen. *bukovŭ*) : ChSl. **buky,* pl. *bukŭvi* 'writing, letter' (18.54).

7. Skt. *akṣara-,* lit. 'imperishable, unalterable' (*kṣr-* 'flow, melt away, wane, perish'), hence, as an unalterable element of speech, 'speech-sound, letter, syllable, vowel, word'.

Skt. *varṇa-,* lit. 'covering, exterior, form' (: *vr-* 'cover'), whence 'sort, category' and gram. 'speech-sound, letter, vowel, word'.

A 'letter' (= epistle) was expressed in Greek and Latin by the plural of the word for 'letter' (of the alphabet) used collectively, and later (e.g. NG, It., Fr., NE, etc.) by the singular. Other terms are words for 'message, writing, short (writing), leaf'.

1. Grk. ἐπιστολή, orig. 'message, commission' : ἐπιστέλλω 'send to, send a message, command'. Hence Lat. *epistula.*

Grk. γράμματα, pl. of γράμμα 'letter' (18.53), but NG sg. γράμμα 'letter' in both senses (γράμματα 'letters' and 'literature').

2. Lat. *litterae,* pl. of *littera* 'letter' (18.53). Hence It. dial. *littere,* OFr. *lettres* in this sense. But sg. It. *lettera,*

Fr. *lettre* now 'letter' in both senses. REW 5087.

Sp. *carta,* Rum. *carte* (Rum. also 'book') = It. *carta* 'paper', etc. (18.56).

Rum. *scrisoare* (modern for the now arch. or pop. *carte*), deriv. of *scris* pple. of *scrie* 'write' (18.51). Tiktin 1394.

3. Ir. *scrībend,* lit. 'writing', fr. Lat. *scrībendum,* gerundive of *scrībere* 'write' (18.51). Pedersen 1.225.

Tablets of stone, metal, wood, or wax were in common use for writing purposes in ancient times (besides parchment or papyrus), in contrast to their restricted role in modern times.

Most of the European terms are words for 'board, plank', or 'slab', or diminutive forms of these, and in large part go back to the Lat. *tabula.*

1. Grk. στήλη, Dor. στάλα, Aeol. στάλλα, the most widespread term for an inscribed monument of stone or bronze, orig. a block or slab of stone (in Hom. as part of a wall or a gravestone), fr. the root of στέλλω 'make ready', orig. 'put in place', OE *stellan* 'set, establish', OHG *stollo* 'support, post', etc., IE **stel-* beside **stā-* 'stand'. Walde-P. 2.644.

Grk. πίναξ, orig. 'board, plank', hence 'platter' (5.32) and 'tablet'. Hence for 'tablet' also πινάκιον, πινακίς, πινακίδιον.

Grk. πλάξ, used of various objects with flat surface (: NHG *flach* 'flat', etc., 12.71), including 'tablet'.

Grk. δέλτος, Cypr. δάλτος : δαιδάλλω 'adorn', Lat. *dolāre* 'hew', Skt. *dal-* 'split, burst'. Walde-P. 1.810. Boisacq 174.

Grk. πέτευρον, πετεύριον, in several regions 'tablet', in literature (also πέταυρον) 'perch for fowls' and 'springboard', prob. fr. *πετήορον, *πετάορον = πεδάορον = μετέωρον 'in mid-air'. Schwyzer, Gr. Gram. 198.

2. Lat. *tabula* 'board, plank' (9.52), 'table, tablet' for writing (e.g. the *XII tabulae*), in latter sense esp. dim. *tabella.* Hence (fr. *tabula*) new dim. forms It. *tavoletta,* Fr. *tablette,* Sp. *tablilla.* Rum. *tablă* fr. *tabula* through Slavic. Ernout-M. 1011. REW 8514. Tiktin 1544.

NIr.	*pāipēar*			Skt.	*pattra-*
W.	*papur*				
Br.	*paper*				

The words for 'paper' (like those for 'pen') furnish a conspicuous example of the transfer in dominant sense from a material to its function. Of the various materials used, as skins (and the later refined parchment), bark, papyrus, rags, and the modern wood pulp, it was the papyrus plant, from the pith of which was produced the writing material of Egypt and that most commonly employed by the Greeks and Romans, which furnished the majority of the Eur. words for 'paper'. Skt. *pattra-* is propperly 'leaf', especially applied to the strips of palm leaves upon which Skt. MSS are most commonly written. Only the Russ. *bumaga,* from an oriental word for 'cotton', reflects a later process.

The words for 'parchment', Grk. διφθέρα 'prepared hide', as writing material Hdt.+; Lat. *membrāna* 'membrane, thin skin'; late Lat. *Pergamēna* (sc. *charta*) from the name of *Pergamum* in Asia Minor, hence the modern Eur. words; and *vellum* (orig. 'calfskin', deriv. of Lat. *vitulus* 'calf'), retained their specific application without any such extension as those for the papyrus.

1. Grk. πάπῡρος, the usual name of the papyrus plant (but not of its product 'paper'), a loanword but source unknown. Hence Lat. *papyrus,* also mostly as plant name, but also 'paper', and as such the source of the main group of Eur. words (see list). Schrader, Reallex. 2.153. REW 6218. Falk-Torp 815.

2. Grk. βύβλος (also βίβλος, dim. βυβλίον, βιβλίον), another and earlier attested name of the papyrus plant (Hdt. 2.92; cf. also βυβλίνα μασχάλα 'papyrus marsh' Tab. Heracl. 1.92), fr. the name of the Phoenician city Βύβλος (its Grk. form; Phoen. *Gᵉbal*), which was an early center of the exportation of papyrus to Greece. Schrader, Reallex 2.153. Sometimes used for the strips of papyri, but mainly for the collective roll, hence the words for 'book' (18.61).

3. Grk. χάρτης, the usual word for the

sheet of papyrus (cf. πάπυρος γνώριμος πᾶσιν, ἀφ' ἧς ὁ χάρτης κατασκευάζεται Diosc. 1.86), prob. a loanword, but source unknown. Hence Lat. *charta* (> It. *carta;* many other derivs. for paper as 'document, chart, card', etc., but not usual words for paper as writing material). Dim. χαρτίον, pl. χαρτία (> ChSl. *chartija,* SCr. *hartija,* Rum. *hîrtie*), NG χαρτί, pl. χαρτιά. Boisacq 1052. Ernout-M. 182. REW 1866. Berneker 385.

4. Russ. *bumaga,* Ukr. *bumaha,* of the same orig. as SCr. *pamuk,* etc. 'cotton' (6.24). Berneker 100 f.

5. Skt. *pattra-* 'leaf' (8.54, 62).

The instrument for writing on tablets in ancient Greece and Rome was the 'style', Grk. γραφίς (: γράφω 'write'), Lat. *stilus* (orig. any pointed instrument). The 'pen', for writing on parchment, papyrus, and the later paper, was a 'reed' (reed-pen) or later a 'feather' (quill-pen). The latter is the source of nearly all the Eur. words, which are either from the Latin or are native words for 'feather', and which have come to be felt as distinct words even when formally the same (as NHG *feder* in contrast to NE *pen* vs. *feather*) and so applied without any sense of incongruity to metal pens.

1. Grk. κάλαμος (> Lat. *calamus*), lit. 'reed'. Hence ChSl. *trŭstĭ* renders κάλαμος as 'reed' (Jagic, Entstehungsgesch. 398), and also as 'pen' (Psalt. p. 96 Geitler = Psalms 45.1).

Late Byz. κονδύλι (NG κοντύλι now esp. 'slate pencil'; cf. μολυβοκόντυλο 'lead pencil'), dim. of κόνδυλος 'knuckle, joint, knob', here with reference to the joints of the reed. Hence Rum. *condeiu* the old word for 'pen' or 'pencil' (in mod. lit. mostly replaced by *pană*). Koraes, Ἄτακτα 4.241. Tiktin 400.

2. Lat. *penna* 'feather', late (Isid.) 'pen'. Hence It. *penna,* OFr. *penne* (> ME *penne,* NE *pen* > W. *pin*), Rum. *pană,* NG πέννα, Ir. *penn,* NIr. *peann,* late ON *penni,* Dan. *pen,* Sw. *penna,* Du. *pen.* REW 6514. Vendryes, De hib. voc. 165. Falk-Torp 821.

Many of the words for the modern 'pencil' are based on those for the material 'lead' (9.68), here to be understood as 'black lead', an old term for 'graphite' before its true composition was known (cf. NED s.v. *black lead*) and still so used of the *lead(s)* of a pencil. When I was a boy in school we spoke of *lead pencils* in distinction from the *slate pencils* still in common use. A few are based on terms for other mineral materials. Some words for a chalk crayon or for a small brush have been extended to cover 'pencil'. Some others are not connected with the material used, but are simply from the notion of 'mark, draw'.

1. Derivs., cpds., or phrases with words for 'lead' (9.68). 2. It. *lapis*, Sp. *lápiz*, orig. the material 'hematite', fr. Lat. *lapis* 'stone'. Cf. It. *matita* 'drawing pencil', fr. Grk. *αἱματίτης* 'hematite' (deriv. of *αἷμα* 'blood').

8. Boh. *tužka*, fr. *tužiti* 'stiffen, fasten', influenced by the *stift* of NHG *bleistift* (?).

9. Russ. *karandaš*, fr. Turk. *karadaş* 'slate' (cpd. of *kara* 'black' and *taş*, *daş* 'stone'), hence doubtless first used of the slate pencil. Lokotsch 1076.

Most of the words for 'book' are based on names of various materials used for writing.

1. Grk. *βύβλος*, *βίβλος*, orig. 'papyrus' (18.56), hence also 'roll of papyrus, book' (in Christian times The Book, the Bible). Hence dim. *βυβλίον*, *βιβλίον* eventually the common word for 'book'.

2. Lat. *liber* (> It., Sp. *libro*, Fr. *livre*), orig. 'thin inner bark of a tree', used for writing material before the introduction of papyrus : Russ. *lub* 'bark, bast', Lith. *luba* 'board', etc. Walde-P. 2.418. Ernout-M. 544. Walde-H. 1.790.

While *liber* was the generic term, others were used for the book form, as *volūmen* for the usual 'roll' (fr. *volvere* 'turn'), and *cōdex*, orig. 'block of wood', then a set of wooden tablets fastened together on the edge, finally the similar arrangement of papyrus or parchment leaves and so the ancestor of the modern book form.

Rum. *carte* (old also 'letter'), fr. Lat. *charta* 'paper' (18.56). REW 1866.

3. Ir. *lebor*, NIr. *leabhar*, W. *llyfr*, Br. *levr*, fr. Lat. *liber*. Pedersen 1.226.

4. Goth. *bōkōs* (pl. 'writing, document, book', sg. 'letter of the alphabet'), ON *bōk*, OE *bōc*, etc., general Gmc., orig. (pl. as in Goth.) 'tablets of beechwood' : ON *bōk*, OE *bōc*, OHG *buocha*, etc. 'beech' (8.62). Walde-P. 2.128. Falk-Thorp 89. Kluge-G. 82.

5. Lith. *knyga*, fr. the Slavic (below, 6).

Lett. *grāmata*, old also 'letter' (Lith. *gromata* id.), fr. ORuss. *gramota* 'writing, document', ChSl. *gramata* 'scriptures', fr. Grk. *γράμματα* 'writing, letter' (18.54). Mühl.-Endz. 1.644. Berneker 345 f.

6. ChSl. *kŭnigy* (pl. tantum) 'writing, letter, book', SCr. *knjiga*, Boh. *kniha*, etc. (but orig. in pl.), general Slavic for 'book', etym. disputed, but prob. as orig. 'wooden tablets' (like Goth. *bōkōs*), deriv. of a **kŭnŭ* in Pol. *kien* 'stump', etc. Brückner 277 f. (and esp. KZ 45.313 ff.). Otherwise (as loanword) Berneker 664.

Skt. *grantha-*, lit. 'tying, binding, knot', whence 'a joining together, composition' and 'treatise, book' : *granth-* 'fasten, arrange, compose'. Walde-P. 1.595.

18.62 PAGE

The Greek and Latin words denoted the column of a papyrus roll, and, this being usually written only on one side, the column was in fact the 'page'. After the advent of the codex, with writing on both sides of the leaf and each side numbered, the same words were kept for this 'page' in the modern sense.

But in many of the Eur. languages 'page' is expressed, logically enough from its relation to the leaf, as 'side of a leaf' or more commonly simply as 'side'.

1. Grk. *σελίς*, *-ίδος*, used as an architectural term for 'cross-piece', also 'block of seats', 'rowing-bench', etc. (beside *σέλμα* 'deck, rowing-bench, scaffold', etc.), was applied to the column of a papyrus roll (not necessarily identical with the sheet of papyrus, the writing in column sometimes crossing the juncture of the sheets; cf. also *κολλήματα ϛε, σελίδες ρλζ* '95 sheets, 137 columns', Riv. fil. 37.361), and later to the 'page' of codices. Hence NG *σελίδα* 'page'.

2. Lat. *pāgina* (> It., Sp., Rum. *pagina* directly adopted; Fr. *page* > NE *page*, Br. *pajenn*), fr. the root of *pangere* 'fix, fasten' (cf. the use of *pāginae* for rows of vines fastened together in Pliny), usually denoted the column (= Grk. *σελίς*), and after the introduction of the codex, the 'page'. Ernout-M. 722.

3. Words meaning literally 'side of the leaf' (cf. 'leaf' 8.56 and 'side' 12.36). W. *tu-dalen*, Du. *bladzijde*, Lith. *puslapis*, Lett. *lapas puse*.

4. Words for 'side' (12.36) or derivs. of these.

NIr. *leathanach* (deriv.); NHG *seite*, Dan. *side*, Sw. *sida;* (NE *side* in this sense obs. or arch.; NED s.v., 9a); Lith. *šalis* (orig. 'side', but now mostly 'region', 19.14); SCr. *strana*, derivs. Boh. *stránka*, Pol. *stronnica*, Russ. *stranica*.

5. OW *let-einepp*, OCorn. *eneb* (both gl. *pagina*) : MW *enep* 'face' (4.204). Pedersen 1.38.

6. Skt. *pattra-* 'leaf' (8.56), also the 'leaf' of a manuscript, would be, as written only on one side, also the 'page'. But in modern printed texts 'page' is expressed by *pṛṣṭha-* 'back' (of an animal), 'upper side', cpd. of *sthā-* 'stand' (Walde-P. 2.604).

NIr.	*līne*	OHG	*zīla*		
W.	*llin*	MHG	*zīle*		
Br.	*linenn*	NHG	*zeile*		

The 'line' of writing or printing is expressed in part by the usual words for 'line', mostly from Lat. *līnea* (12.84), in part by words for 'row, series, order' or 'rule'.

1. Grk. *στίχος* 'row' (: *στείχω* 'march, go', 10.47), hence 'verse' of poetry and 'line' of prose.

2. Lat. *versus*, orig. 'furrow' (fr. *vertere* turn), hence 'row, line' and esp. 'verse, line' of writing (esp. poetry, but not so restricted). Hence the widespread Eur. words, Fr. *vers*, OE *fers*, NE *verse*, NHG *vers*, etc., all most commonly applied to poetry (or 'verses' in the Bible), but Pol. *wiersz* reg. word for 'line' of prose or poetry.

It. *riga*, fr. OHG (Langob.) *rīga* 'line' (MHG *rīhe*, NHG *reihe* 'line, row, order') : OE *rǣw*, *rāw* 'row'.

Sp. *renglón*, deriv. of *ringla* (Cat. *rengla*), colloq. form of *regla* 'rule' (Lat. *rēgula*). Diez 483.

Rum. *rînd* 'row, order' and 'line', fr. Slavic, ChSl. *rędŭ* 'order', etc. (below, 5).

3. Sw. *rad* 'row, series' and 'line' : ON *rǫð* 'row, series', outside connections dub. Walde-P. 1.74. Falk-Torp 869. Hellquist 809.

Du. *regel* 'rule' and 'line', fr. Lat. *rēgula* 'rule'.

NHG *zeile*, fr. OHG *zīla*, MHG *zīle* 'row, line', perh. fr. the same root as *ziel* 'object', *zeit* 'time', etc. Falk-Torp 1259. Kluge-G. 706.

4. Lith. *eilutė*, fr. *eilė* 'row, series', root-connection? Walde-P. 1.104.

Lett. *rinda* 'row' and 'line' = (or fr.) Lith. *rinda* 'row' : ChSl. *rędŭ* 'order'. Mühl.-Endz. 3.527.

5. SCr. *redak*, Boh. *řadek*, *řadka*, fr. SCr. *red*, Boh. *řad*, *řada*, 'order, row, series' = ChSl. *rędŭ* 'order'.

Pol. *wiersz*, fr. Lat. *versus* (above, 2), prob. through HG *vers*.

Russ. *stroka* (or more commonly dim. *stročka*) = ChSl. *stroka* 'center, point' : ChSl. *strŭknąti*, Russ. *streknuti* 'goad, prick'. Brückner 519.

6. Skt. *rekhā-* (12.84), quotable also for line of writing?

Verbs for 'print' are most commonly derived from those for 'press' (9.342). Some are from nouns meaning 'stamp, impression, seal'.

1. NG *τυπώνω*, fr. *τύπος* 'stamp, print' (cf. also *ὁ τύπος* 'the press'), in class. Grk. 'impression', fr. *τύπτω* 'strike, beat'.

2. It. *imprimere*, Fr. *imprimer*, Sp. *impremir*, Rum. *imprima*, fr. Lat. *imprimere* 'impress, stamp', cpd. of *premere* 'press'.

3. NIr. *clōdhaim*, fr. sb. *clō* 'stamp, print, form', etym.?

W. *argraffu* (sb. *argraff* 'impression, print'), fr. *ar-* 'upon' and obs. *grafio* 'engrave', fr. ME *grave* id. Parry-Williams 83.

W. *printiu*, fr. NE *print*.

Br. *moula*, fr. *moul* 'mold, impression', fr. Fr. *moule* id.

4. Dan. *trykke*, Sw. *trycka*, Du. *drukken*, NHG *drucken*, orig. 'press', like OE *þryccan*, etc. On the NHG distinction, *drucken* 'print' vs. *drücken* 'press', cf. Kluge-G. 115, Paul, Deutsches Wtb. 113.

NE *print*, fr. sb. *print*, early *prient*, fr. OFr. *priente*, deriv. of Lat. *premere* 'press'.

5. Lith. *spaudinti*, also and orig. 'press', beside *spausti* 'press', whence also *spausdinti* 'print' with sb. *spaustuvė* 'printing house'.

Lett. *iespiest*, cpd. of *spiest* 'press'.

Lett. *drukāt*, fr. sb. *druka*, fr. LG *druk*.

6. SCr. *štampati*, fr. sb. *štampa* 'print', fr. It. *stampa* 'stamp, press, print'.

Boh. *tisknouti*, also 'press', with sb. *tisk* 'pressure, press'.

Pol. *drukować*, fr. sb. *druk* 'print, press', fr. NHG *druck*.

Russ. *pečatat'*, fr. *pečat'* 'seal, stamp, the press' = ChSl. *pečatĭ*, Boh. *pečet*, etc. 'seal', fr. the root of ChSl. *peką*, *pešti* 'bake', hence something 'baked in'. Cf. SCr. *opeka* 'brick' fr. the same root. Brückner 407.

NIr.	*litridheacht*	OHG	(*giscrip, scrift*)		
W.	*llenyddiaeth*	MHG	(*schrift*)		
Br.	*lennegez*	NHG	*literatur*		

Most words for 'literature' are based on the notion of 'letters', and a Lat. deriv. has furnished what is virtually an international Eur. term.

For the earlier periods of the Eur. languages, before the adoption of Lat. *litterātūra*, the entries in the list (namely, the Ir., Goth., OE, OHG, ChSl.) are words for 'writing(s)' which are mostly quotable only with reference to the holy 'scripture'. But it may be assumed that they might cover also 'writings, literature' in general.

1. Grk. *γράμματα*, pl. of *γράμμα* 'letter' (18.54), covers 'letter' = 'epistle', 'documents', and 'writings' of an author, also the science of literature and grammar. Though apparently not quotable in class. times in a phrase like 'Greek literature', it was eventually so used, e.g. NG *'Ελληνικὰ γράμματα*.

NG *λογοτεχνία*, lit. the 'art of words', a modern creation, now the technical literary term.

2. Lat. *litterae*, pl. of *littera* 'letter' (18.54), used like Grk. *γράμματα* for 'letter' = 'epistle', 'writings', and literature. This last use is preserved in Fr. *lettres* (*cultiver les lettres, un homme de lettres, belles-lettres*, etc.), NE *letters* (*man of letters*, etc.), etc., also in derivs., Ir. *litrid* 'man of letters', whence NIr. *litridheacht* (or *liteardhacht*) 'literature', and Du. *letter-kunde*. Otherwise replaced by the following.

Lat. *litterātūra*, a rendering of Grk. *γραμματική* 'writing', esp. 'science of language, grammar', only later (not class.) 'literature', but source of the most widespread Eur. term.

3. Ir. *scriptur* 'scripture', fr. Lat. *scrīptūra*. Vendryes, De hib. voc. 175.

W. *llenyddiaeth*, Br. *lennegez*, derivs. (W. through vb. *llenydda*) of W. *llen* 'lore, learning', Br. *lenn* 'reading', fr. Lat. *legendum* 'what is to be read' (cf. 18.52).

4. Goth. *mēla*, ON *script, ritning*, OE *writ*, OHG *giscrip*, *scrift* (also *buochscrift* = *literatura*, Notker), all fr. verbs for 'write' (18.51), and the reg. words for holy 'scripture'.

5. In ChSl. the Grk. *γράμματα* is rendered by *kŭnigy* (whence words for 'book', cf. 18.61), *bukŭvi* (orig. 'letters', cf. 18.54), and *pisanĭje* (: *pĭsati* 'write', 18.51). Cf. Jagić, Entstehungsgesch. 357.

SCr. *književnost*, deriv. (through adj. *književni* 'literary') of *knjiga* 'book' (18.61).

Boh. *písemnictví*, deriv. (through adj. *písemný*) of *pisati* 'write' (18.51).

Russ. *slovesnost'* (now rather archaic), deriv. (through adj. *slovesnyj*) of *slovo* 'word' (18.26).

6. Skt. *grantha-* 'composition, literary production, book' (18.61).

Skt. *çāstra-* 'instruction' (: *çās-* 'teach', 17.25), 'instructive work' and applied to various forms of literature.

18.66 AUTHOR, WRITER

Grk.	*συγγραφεύς*	Dan.	*forfatter, skribent*	Lith.	*rašytojas*
NG	*συγγραφεύς, λογοτέχνης*	Sw.	*skriftställare, författare*	Lett.	*rakstnieks*
Lat.	*scrīptor, auctor*	OE	*wrītere*	SCr.	*spisatelj, književnik*
It.	*autore, scriptore*	ME	*autor, writer*	Boh.	*původce, spisovatel*
Fr.	*auteur, écrivain*	NE	*author, writer*	Pol.	*autor, pisarz*
Sp.	*autor, escritor*	Du.	*schrijver*	Russ.	*avtor, pisatel'*
Rum.	*scriitor, autor*	OHG	*scrīptor*	Skt.	*grantha-kāra-, -kṛt-*
Ir.	*augtor, scribnid*	MHG	*tihtære*		
NIr.	*ughdar, scrībhnōir*	NHG	*verfasser, schriftsteller*		
W.	*awdur*				
Br.	*skrivagner*				

The majority of words for the literary 'author, writer' are words for 'writer', derived from the usual verbs for 'write'. But Lat. *auctor* 'author' has a large progeny, and in some languages the 'author'-words have a superior rank to the 'writer'-words, since the latter are so comprehensive, covering the veriest scribbler (so e.g. Fr. *auteur* vs. *écrivain*, Sp. *autor* vs. *escritor;* but NE *writer*, though comprehensive, is used, no less than *author*, of the greatest).

A few of the words listed are used for the author of particular works, but not in phrases like 'the Greek authors'. So NHG *verfasser*, while the corresponding Dan. *forfatter*, Sw. *författare* may be used also in such phrases.

1. Derivs. of verbs for 'write'. Obvious by comparison with the list 18.51, But NHG *schriftsteller* for 'literary writer' vs. *schreiber* 'writer' in general, 'scribe', etc.

2. Lat. *auctor* 'author' as 'originator, founder, proposer', etc., hence also literary 'author', fr. *augēre* 'increase, augment'. Ernout-M. 89. Hence the widespread Eur. words.

3. MHG *tihtære* 'composer, writer' and 'poet', see 18.67.

NHG *verfasser*, fr. *verfassen* 'put together, compose', cpd. of *fassen* 'hold, seize' (11.14). Similarly Dan. *forfatter*, Sw. *författare*, fr. vbs. borrowed fr. MLG *vorvaten*. Falk-Torp 255.

4. SCr. *književnik*, fr. *književni* 'literary', fr. *knjiga* 'book' (18.61). Cf. ChSl. *kŭnižĭnikŭ* 'scribe'.

Boh. *původce*, 'author' in wider and narrower sense, fr. *původ* 'origin'.

5. Skt. *grantha-kāra-*, *grantha-kṛt-*, cpds. of *grantha-* 'literary production, book' (18.61) and forms of *kṛ-* 'make'.

18.67 POET

Grk.	*ποιητής*	ON	*skāld*	Lith.	*poėtas*
NG	*ποιητής*	Dan.	*digter*	Lett.	*dzejnieks*
Lat.	*poēta*	Sw.	*skald, diktare* (*poet*)	SCr.	*pjesnik*
It.	*poeta*	OE	*scop*	Boh.	*básnik*
Fr.	*poète*	ME	*poet*	Pol.	*poeta*
Sp.	*poeta*	NE	*poet*	Russ.	*poet, stichotvorec*
Rum.	*poet*	Du.	*dichter*	Skt.	*kavi-*
Ir.	*fāith, fili*	OHG	*scof*		
NIr.	*file*	MHG	*tihtære, poēte*		
W.	*prydydd, bardd*	NHG	*dichter* (*poet*)		
Br.	*barz*				

The largest group of words for 'poet' goes back to the Grk. word, in which 'maker' was specialized to 'poet'. But such a borrowed word may fall to an inferior rank by virtue of the revival and glorification of an old native word. So notably Sw. *poet* vs. *skald* (Hellquist 774, 923), and NHG *poet* vs. *dichter*, the former of which after being in part an inferior or derogatory term 'poetaster, versifier' (cf. Maas, Z. deutsch. Wortf. 6.234 f.), is now little used.

A few others reflect a similar specialization, being derived from other verbs meaning 'create' or 'compose'.

The predecessor of the literary 'poet' was the 'singer' or 'seer', or 'story-teller' (in verse), and some words which originally had such senses have become the usual words for 'poet'.

1. Grk. *ποιητής*, orig. 'maker, constructor' (: *ποιέω* 'make'), specialized to 'author' and esp. 'poet' (Hdt.+). Hence Lat. *poēta* and the widespread Eur. words.

Before *ποιητής* became the common word for 'poet', this was expressed by *ἀοιδός* 'singer, bard' (: *ἀείδω* 'sing' 18.12).

2. Lat. *vātēs* 'seer' and 'poet' (the old word for 'poet' before the introduction *poēta*, and later revived in this sense) : Ir. *fāith* 'seer, poet', W. *gwawd* 'song, poetry' (now 'satire, ridicule'), OE *wōd* 'possessed, mad', *wōþ* 'sound, song', etc, Walde-P. 1.212. Ernout-M. 1076.

3. Ir. *fāith* 'seer, poet' : Lat. *vātēs*, etc., above, 2.

Ir. *fili*, NIr. *file*, orig. 'seer' : W. *gweled* 'see', etc. (15.51). Walde-P. 1.293. Pedersen 1.249.

Gael. *bard* (also MIr., NIr., but not the usual word), W. *bardd*, Br. *barz* (cf. Gall. *Bardo-magnus*, etc.), Celtic word borrowed in late Grk. *βάρδος*, late Lat. *bardus* and NE *bard* (now not restricted to Celtic bards, cf. NED s.v. 4), etym. dub., perh. (IE *g^w > Celt. *b* reg.) : Skt. *gṛ-* 'invoke, praise', Lith. *girti* 'praise', OPruss. *gerdat* 'say', etc. (Walde-P. 1.686 f., without Celt. *bard*). Stokes 162.

W. *prydydd*, fr. vb. *prydu* 'compose verse' : Ir. *creth* 'poetry', fr. root in W. *peri* 'cause, create', Skt. *kṛ-* 'make', etc. Walde-P. 1.517 f. Pedersen 1.128.

4. ON *skāld*, whence Sw. *skald*, revived at the expense of *poet* and now the usual word (but Dan. *skjald* 'bard, minstrel'), etym. dub. Falk-Torp 980. Hellquist 923 f.

OE *scop*, OHG *scof* (masc. 'poet', neut. 'poetry' and 'mockery') : ON *skop*, *skaup* 'mockery', MLG *schoven* 'deceive', etc. (ME, NE *scoff*), hence apparently first a poet of satire. Walde-P. 2.556. Falk-Torp 1037. NED s.v. *scop*.

MHG *tihtære* ('composer, writer' and 'poet'), NHG, Du. *dichter* (Dan. *digter*, Sw. *diktare*, fr. vbs., with sense influenced by HG), fr. vb. seen in OHG *tihtōn*, *dihtōn* 'write, compose' (cf. OE *dihtan* 'order, compose', etc., NE *dight*), later esp. 'compose poetry' (NHG *dichten*), fr. Lat. *dictāre* 'dictate, order' and 'compose' (e.g. *dictāre carmina* Hor.). Deriv. fr. a Gmc. root (: Lat. *fingere* 'fashion'), preferred by Falk-Torp 141 f., Kluge-G. 104, is superfluous and improbable. Weigand-H. 1.353. NED s.v. *dight*. Hellquist 143.

5. Lett. *dzejnieks*, with vb. *dzejuōt*, fr. *dzeja* 'poetry', prob. an artificial creation abstracted from *dziesma* 'poetry' (given by Ulmann, s.v. Dichtung) = Lith. *giesmė* 'song' : *giedoti* 'sing' (18.12).

6. SCr. *pjesnik*, deriv. of *pjesna*, *pjesma* 'song', or more exactly of a form = ChSl. *pěsnŭ* 'song, hymn, psalm' (freq. in Supr.), fr. the root of ChSl. *pěti* 'sing' (18.12).

Boh. *básnik*, fr. *báseň* 'tale, poem',

this fr. OBoh. *báti* 'speak, relate, tell stories' (Berneker 39). Gebauer 2.366.

Russ. (beside usual *poet*) *stichotvorec*, lit. 'verse-maker', cpd. of *stich*, ChSl. *stichŭ*, fr Grk. *στίχος* 'verse'.

7. Skt. *kavi-* 'wise, wise one, sage, seer', later 'poet', fr. the root seen in *ā-kūti-* 'intention', Grk. *κοέω* 'perceive', Lat. *cavēre* 'beware', ChSl. *čuti* 'feel, perceive', etc. Walde-P. 1.368 ff.

'Country' is intended here as the territory of a whole people or nation ("European countries"), though the words are used also in a more general sense for areas of indeterminate extent.

The majority are the same as words for 'land', but a few are from 'boundaries' or other sources.

1. Words for 'land' already discussed in 1.21.

Grk. *γῆ, χθών* (poet.); Lat. *terra*, Rum. *țară;* Ir. *tīr;* Goth. *land*, etc., general Gmc. (in NE now replaced in common use by *country*); Lith. *žemė* (formerly so used), Lett. *zeme;* ChSl. *zemlja* (reg. for *γῆ* including 'country', but *strana* for *χώρα*), SCr. *zemlja*, Boh. *země*, Pol. *ziemia* (Russ. *zemlja* formerly so used, but mostly *strana*).

2. Grk. *χώρα*, also 'space, place' like *χῶρος*, both orig. 'empty space' : *χῆρος* 'bereft', Skt. *hā-* 'leave', etc. Walde-P. 1.543. NG *χώρα*, lit. 'country', pop. 'town' (19.15).

Grk. *τόπος* 'place' (12.11), 'region', NG pop. also 'country'.

3. Lat. *fīnēs*, lit. 'boundaries, limits', pl. of *fīnis* 'limit, border' and temporal 'end' (14.26).

It. *paese*, Fr. *pays* (> Sp. *país*), fr. VLat. *pāgēnsis*, deriv. of *pāgus* 'country district' (19.14). REW 6145. Gamillscheg 679.

4. Ir. *crīch* (beside more usual *tīr*), see under 'region' (19.14).

W. *gwlad* : Br. *glad* 'wealth, fortune', Ir. *flaith* 'ruler', etc., fr. the root in Ir. *foln-* 'rule', Lat. *valēre* 'be strong', OE *wealdan*, etc. 'rule' (19.31). Walde-P. 1.219. Pedersen 1.157.

Br. *bro*, also 'region' as W. *bro*, see 19.14.

5. ME *contree*, NE *country*, fr. OFr. *cuntrée, contrée* (now mostly 'country' in more general sense), fr. VLat. *contrāta* (*regiō*), lit. '(region) opposite', deriv. of *contra* 'against, opposite'. REW 2187 NED s.v. *country*.

6. Lith. *kraštas* (now more usual than *žemė* for 'country'; cf. Hermann, Lit.-Deutsches Gesprächsb. 22, 36), also 'region' and (more orig.) 'side, edge, shore' = Lett. *krasts* 'shore', etym. dub. Mühl.-Endz. 2.260.

7. ChSl. *strana* (reg. for *χώρα*), Russ. *strana* (ChSl. form) = SCr., Boh. *strana*, Pol. *strona*, Russ. *storona* 'side' (12.36).

8. Skt. *deça-*, also 'region', lit. 'direction' : *diç-* 'show, point out'. Uhlenbeck 130.

Skt. *viṣaya-*, also 'territory, realm, kingdom', as orig. 'sphere of influence' : *viṣ-* 'be active', outside root connections dub. Uhlenbeck 289. Whitney, Roots 161.

Skt. *janapada-*, cpd. of *jana-* 'race' and *pada-* 'station, abode' (lit. 'step' : *pad-* 'foot').

W.	*gwlad*	MHG	*vaterheim, vaterland*		
Br.	*mamvro*	NHG	*vaterland*		

The notion of 'one's native country' may be expressed by the regular words for 'country' with appropriate context, as in NE *my country, die for one's country*, which (rather than *fatherland, native country*, etc.) carry the emotional value of Fr. *patrie*, NHG *vaterland*, etc. Where words for 'country' are repeated in this list, a similar context is, of course, to be understood.

But in most of the IE languages there are special terms. These are most commonly derivs. or cpds. of the words for 'father', possibly, but not necessarily, reflecting semantic borrowing from the Greek *πατρίς*. Much less commonly from words for 'mother'. Terms like NE *mother country* or *motherland*, though quotable in this sense, are used mainly to denote the relation of a country to its colonies or the home of certain products, etc.

Others are derived from words for 'home', 'birth', 'race, family', and (through 'possession') 'power'.

1. Derivs. or cpds. of words for 'father' (2.35).

Grk. *πατρίς* (also *πάτρα*, Hom. *πάτρη*), NG *πατρίδα*; Lat. *patria* (> Romance words); Ir. *atharde, atharthīr* (K. Meyer, Contrib. 144); OE *fæderēþel*, OHG *fateruodil*, NE *fatherland*, NHG *vaterland*, Dan. *fædreland*, etc. (see list); Lith. *tėvynė*, Lett. *tēvija, tēvzeme;* ChSl. *otĭčĭstvĭje* (reg. for *πατρίς*), SCr. *otačastvo, otadžbina*, Boh. *otčina*, Pol. *ojczyzna*, Russ. *otečestvo*.

2. NIr. *tīr dhūthchais*, i.e. *tir* 'country' with gen. sg. of MIr., NIr. *dūthchas* 'inheritance, one's homeland or country' (cf. MIr. *firduchus* 'true native country'), deriv. of MIr. *dūthaig* 'belonging to, fitting', NIr. *duthaigh* 'estate, land, region' (19.14).

W. *gwlad* 'country' (19.11) and 'native country' (cf. *gwladgar* 'patriotic').

Br. *mamvro*, cpd. of *mamm* 'mother' and *bro* 'country'.

3. Goth. *gabaurþs* 'birth', hence as 'birthplace' for *πατρίς* (Mk. 6.4, Lk. 4.23, 24; but *in landa seinamma* = *εἰς τὴν πατρίδα αὐτοῦ* Mk. 6.1).

ON *fōstrjǫrð* and *fōstrland*, Dan. (arch. or poet.), Sw. *fosterland*, cpds. of *fōstr* 'fostering' and words for 'land'.

OE *ǣþel, ēþel* (freq. for *patria* in Gospels), also *ēþelland* and *fæderēþel* (= OHG *fateruodil* so used by Tat.) = ON *ōðal*, OHG *uodal, uodil* inherited 'estate, patrimony' (as OE *ēþel* also), with strong grade of root in ON *aðal* 'nature', OE *æþele* 'noble', OHG *adal* 'noble descent, nobility' (NHG *adel*), etc., prob. : Goth. *atta* 'father', etc. Walde-P. 1.44. Falk-Torp 787, 1430, 1524.

OE *eard* (for *patria* in Mt. 13.54, 57, Aelfric, etc.), but mostly more general 'region' (19.14).

4. SCr. *domovina*, fr. *dom* 'house, home' (7.12).

Boh. *vlast* = ChSl. *vlastĭ* 'power', Pol. *włość* 'landed property', Russ. *volost'* 'district', fr. the root of ChSl. *vladą, vlasti* 'rule' (19.31). Brückner 625 f.

Russ. *rodina*, fr. *rod* 'descent, race, family' (19.23).

5. Skt. *svadeça-*, cpd. of *sva-* 'own' and *deça-* 'country'.

19.13 COUNTRY

NIr.	*tuath*	OHG	*lant*		
W.	*gwlad*	MHG	*lant*		
Br.	*maez, ploue*	NHG	*land*		

Many of the words for 'country' as listed in 19.11 are used also for 'country' vs. 'city, town', as NE *in the country*, NHG *auf dem lande*, etc. Otherwise this is expressed by words for 'field' (often in plural) or derivs. of these, words cognate with others for 'space', some for 'village', and in a few cases by terms reflecting the notion of 'outside'.

1. Grk. *ἀγρός* 'field' (8.12), also 'country' in this sense, esp. pl. *ἀγροί* (but also sg. Hom.).

Grk. *χώρα* 'country' (19.11), sometimes also in this sense.

NG *ἐξοχή*, in class. Grk. 'prominence, protuberance' (so in lit. NG, also *κατ' ἐξοχήν* 'par excellence, especially'), late also 'extremity', whence 'remote place' and so 'country' vs. 'town' (*εἰς τὴν ἐξοχήν* 'in the country'). Koraes, *Ἄτακτα* 4.2.630.

2. Lat. *rūs* : Av. *ravah-* 'space, freedom', Goth., OE *rūm*, etc. 'space, room', ChSl. *ravĭnŭ, rovĭnŭ* 'level'. Walde-P. 2.356 f. Ernout-M. 879.

Lat. *ager* 'field' (8.12), also 'country' in this sense, esp. pl. *agrī*. Cf. Lat. *pāgus* 'country district' and the derivs. for 'country' (19.11), these also often 'country' vs. town, hence words for 'peasant'.

It. *campagna* (> Fr. *campagne*), OFr. *champaigne*, etc., fr. MLat. *campānia* (cf. Lat. *Campānia*), fem. of MLat. *campānius, -eus*, deriv. adj. fr. Lat. *campus* 'plain, field' (1.23), whence Sp. *campo* also 'country' vs. 'town'. REW 1557, Ernout-M. 140.

Rum. *țară* 'country' (19.11), also in this sense.

3. NIr. *tuath* 'territory, region' and 'country' vs. 'town' (Dinneen), fr. Ir. *tūath* 'people, notion' (19.22).

W. *gwlad* 'country' (19.11), also in this sense.

Br. *maez* 'plain, field' (1.23), also 'country' vs. 'town'.

Br. *ploue*, formerly 'parish, community' (= W. *plwyf*), fr. Lat. *plēbēs* 'the common people' (cf. 19.21). Loth, Mots lat. 196.

4. Goth. *weihsa* and once *haimōs* render *ἀγροί* 'country' as contrasted to *baurgs* '*πόλις*' (Lk. 8.34, etc. *weihsa;* Mk. 5.14 *haimōs*), pls. of *weihs, haims* '*κώμη*, village' (19.16).

ON, OE *land*, etc. 'country' (19.11), also in this sense general Gmc., except Goth. and NE.

ME *feeld* 'field' (8.12), also 'country' vs. 'town' (NE *field* obs. or arch. in this sense; NED s.v. 2).

5. Lith. *sōdžius* and *kaimas* 'village' (19.16), both used also for 'country' vs. 'town' (cf. Senn, Lit. Sprachl.).

Lett. *lauki*, pl. of *lauks* 'open country, field' : Lith. *laukas* 'field' (8.12).

6. ChSl. *sela* (renders *ἀγροί* Mk. 5.14, Lk. 8.34), pl. of *selo* 'field' (8.12), SCr. *selo* 'village' (19.16) and 'country'.

Boh. *venkov* (cf. *venek* 'the outside, country place'), fr. *ven* 'out' = Russ. *von*, SCr. *van*, ChSl. *vŭnŭ* id.

Pol. *wieś* 'village' (19.16), also 'country' vs. 'town'.

Russ. *derevnja* 'small village, hamlet' (19.16), also 'country' vs. 'town'.

It is intended to group together here the most important of the words that denote an area of indeterminate extent and may serve for various areas intermediate between the whole 'country' and the 'city, town'. Most of the words for 'country' (19.11) are used also in a more general sense, and some of them are repeated in this list. Many of the words listed may have a more special technical application in certain periods or contexts, but no strict classification according to larger or smaller scope is feasible. A great number of others that are mainly technical terms for administrative divisions, 'province, district, canton, parish', etc., are omitted.

The words are based mainly on various spatial notions, as 'place, side, part, extent, line' and especially 'boundary', but several on the notion of possession or rule ('domain'), as NHG *gebiet*, etc.

1. Grk. *χώρα* 'space, place, country' (19.11), also 'region'.

Grk. *τόπος* 'place' (12.11), also 'region'.

NG *μέρος* 'part' (13.23), pop. 'region'.

2. Lat. *regiō*, lit. 'a direction, a (straight) line', whence 'boundary line', and so 'region, territory' (hence It. *regione*, etc.) : *regere* 'direct, rule', etc. Ernout-M. 857.

Lat. *tractus*, lit. 'a drawing out, extent', whence 'extent or stretch of land, tract, region' : *trahere* 'draw'. Ernout-M. 1051.

Lat. *territōrium* (> It. *territorio*, etc.), deriv. of *terra* 'land, country' (1.21, 19.11). Ernout-M. 1034.

Lat. *pāgus* 'country district, rural canton', orig. 'boundary fixed in the ground' : *pangere* 'fix'. Walde-P. 2.2. Ernout-M. 722 f.

Fr. *endroit* 'place' and 'region', orig. 'right side', fr. *en droit*. Gamillscheg 359.

Rum. *ținut*, orig. 'possession', fr. pple. of *ținea* 'possess'. Tiktin 1601.

3. Ir. *crīch* 'furrow, border, boundary', whence also 'territory, region' (cf. K. Meyer, Contrib. s.v.) : Lat. *cernere* 'separate, distinguish', Grk. *κρίνω* 'separate, decide', etc. Walde-P. 2.584.

Ir. *mruig, bruig*, W., Br., Corn. *bro*

(Gall. *brogae* 'ager', *Allo-brogēs*) : Lat. *margō* 'border', Goth. *marka* 'boundary', etc. (19.17). Walde-P. 2.283 f. Pedersen 1.97.

NIr. *dūthaigh* (also 'estate, land', orig. 'inherited land'), fr. MIr. *dūthaig* 'belonging to, fitting', cf. *dūthaig na fine* 'belonging to the family, inheritance' (Laws, Gloss. 283), perh. cpd. of *toich* 'natural, belonging to by nature'. Pedersen 2.667.

NIr. *ceanntar*, orig. 'pars citerior' (as opposed to *altar* 'pars ulterior'), fr. MIr. *centar* 'this side', deriv. of OIr. *cen-* 'this side of' (as in *cenalpande* 'cisalpinus'). Pedersen 2.44, 197.

W. *ardal*, orig. 'border, marches', cpd. of *ar* 'on' and *tal* 'forehead, front, end' = Ir. *tel, tul* 'forehead' : Ir. *talam* 'earth', Skt. *tala-* 'flat surface', etc. Walde-P. 1.740. Pedersen 1.132.

W. *tiriogaeth*, deriv. of *tir* 'land' (prob. after Lat. *territōrium*).

4. Goth. *gawi*, OHG *gawi, gewi*, MHG *göu, göuwe*, etc. (NHG *gau* 'district, canton'), etym. dub. Walde-P. 1.565. Feist 210 f. Kluge-G. 188. Weigand-H. 1.629.

ON *herað* (also as a more definite political division, cf. Dan. *herred*, Sw. *härad* 'jurisdictional district'), fr. **her-rað* cpd. of *herr* 'host, people, army' and *rāð* 'counsel, plan, management' (: *rāða* 'advise, plan, rule'). Hence orig. the district over which the *hersir* 'chief' ruled. Falk-Torp 400 f. Torp, Nynorsk 210. Hellquist 387.

ON *sveit* (also often a more definite political 'district'), orig. 'body of men' as a military term, cf. OE *swēot* 'troop, band', perh. : Av. *xᵛaētu-* 'belonging to', and other derivs. of the refl. pronoun like ON *sveinn* 'boy, lad' (orig. 'dependent, one of the same family'), Lith. *svainis* 'wife's sister's husband', etc. Walde-P. 2.457. Falk-Torp 1214.

Dan. *egn*, fr. ODan. *egn* 'possession, estate' = ON *eign* 'property', etc. : *eiga* 'own', Dan. *eie* (11.12). The modern meaning is due to the influence of LG *jegen, jegnode* 'region' = MHG *gegen*, etc. (below). Falk-Torp 183.

Sw. *område* (> Dan. *omraade*), deriv. of phrase *råda om* 'be master of, possess'. Falk-Torp 792. Hellquist 730.

Sw. *trakt*, fr. Lat. *tractus* (above, 2). Hellquist 1213.

OE *eard*, ME *erd* : OS *ard* 'dwelling', ON *ǫrð* 'harvest', OHG *art* 'plowing', fr. the root of OE *erian*, Goth. *arjan*, Lat. *arāre*, etc. 'plow'. Walde-P. 1.72, 78. NED s.v. *erd*.

OE *land*, etc., the general Gmc. word for 'land, country' (19.11), may often be used for 'region', or esp. with the deriv. suffixes OE *-scipe*, and OHG *-scaf*, later *-scaft*, MHG, NHG *-schaft*, denoting orig. 'condition, state' (of being so and so) and also (as here) with collective sense. Cf. NED s.v. *-ship*.

ME *contree*, see 'country' (19.11).

ME *regioun* (also 'kingdom, realm'), NE *region*, fr. Anglo-Fr. *regiun* = Fr. *région* (above, 2). NED s.v.

ME, NE *territory* (in ME chiefly rendering Lat. *territōrium* in the sense of 'land about a city', later esp. 'land belonging to the dominion of a certain ruler', etc.), fr. Lat. *territōrium* (above, 2). NED s.v.

Du. *streek* (similarly ODan. *streg*, Dan. *strøg;* cf. NHG *landstrich*), orig. 'line, stroke' (= OHG *strih*, NHG *strich* 'stroke, line', Goth. *striks* 'stroke', etc.). Franck-v. W. 674 f. Falk-Torp 1177 f., 1185.

Du. *gebied* (LG *gebēd* > Dan. *gebed*), NHG *gebiet* (> Sw. *gebit*), but MHG *gebiet(e)*, chiefly 'command' : *gebieten* 'command' (18.36). Orig. 'territory under one's command'. Weigand-H. 1.636. Falk-Torp 303. Hellquist 273.

MHG *gegen, gegende, gegenōte*, NHG *gegend*, deriv. of *gegen* 'against, opposite', in imitation of VLat. *contrāta* (> OFr. *contrée*, etc., 19.11), fr. *contra*. Weigand-H. 1.650 f. Kluge-G. 192.

5. Lith. *šalis*, orig. 'side' (cf. *į šalį, šalin* 'aside, away') : OE *heald*, OHG *hald* 'inclined', OHG *halda* 'slope, bank', etc., fr. **k̂el-* beside **k̂lei-* in Grk. *κλίνω*, Lat. *in-clīnāre*, etc. 'incline'. Walde-P. 1.430.

Lith. *kraštas*, see 'country' (19.11).

Lett. *vidus*, lit. 'middle, interior' = Lith. *vidus* 'middle, inside', etc. (12.37).

Lett. *mala*, lit. 'border, margin, bank', prob. orig. in the latter sense : Alb. *mal* 'mountain', *majë* 'point, peak', Ir. *mell* 'elevation, hill', etc. Walde-P. 2.295. Mühl.-Endz. 2.555 f.

Lett. *puse*, lit. 'half, side' (12.36, 13.24).

6. ChSl., Russ. *strana* (SCr., Boh. *strana*, Pol. *strona* 'side', also sometimes 'region, quarter'), see 'country' (19.11).

SCr. *kraj*, etc., general modern Slavic (or esp. derivs. as Boh. *krajina*, Pol. *kraina*), lit. 'edge, margin' = ChSl. *krajĭ* 'edge, shore' : ChSl. *krajati* 'cut, separate', Grk. *κρίνω* 'separate, decide', etc. Walde-P. 2.585. Berneker 605 f.

SCr. *predjel* (= Russ. *predel* 'boundary, limit'), lit. 'forepart', cpd. of ChSl. *dělŭ*, etc. 'part' (13.23).

SCr., Boh. *oblast*, Russ. *oblast'* = ChSl. *oblastĭ* 'power' (also rarely for *περίχωρος* 'country round about') : *obladati* 'rule over', fr. **ob-vlad-*, cpd. of *vladą, vlasti* 'rule'.

Boh. *obvod*, Pol. *obwód* (= Russ. *obvod* 'surroundings', etc.) : Boh. *voditi*, Pol. *wodzić*, iter. to *vesti, wieść* 'lead'. Brückner 629. Miklosich 376 f.

7. Skt. *deça-, viṣaya-*, and Av. *daiṅhu-*, see 'country' (19.11).

Av. *zantu-* (a political division between the *daiṅhu-* and the *vīs-* 'village'; but in orig. a social rather than geographical division, cf. Sp. *pueblo* 'people' and 'village') = Skt. *jantu-* 'offspring, living being, etc.', derivs. of Skt. *jan-*, Av. *zan-* 'beget, bear'. Walde-P. 1.577. Barth. 1660 f.

In the heading 'city, town' it is intended to ignore the difference between NE *city* and *town*, the latter being partly generic and including city, and partly subordinate to city, the technical distinction showing wide local variation (in U.S., especially New England, according to the form of local government). Cf. NED s.vv. *city* and *town*. The nearest parallel is in Latin, where *oppidum* is occasionally applied, like *urbs*, to cities like Rome or Athens, but mostly to other towns.

In general, terms for 'town' as intermediate between 'city' and 'village' are not included in the list, e.g. Fr. *bourg*,

NHG *kleinstadt*, Grk. κώρη, κωμόπολις, etc. Here belongs NG pop. χώρα (used for the chief town of a district or island; as 'town' in Const. Porph.) with peculiar development of χώρα 'country, place' or perhaps re-formed (or reinterpreted) as augmentative of χωρίον, NG χωριό 'village' (Kretschmer, KZ 39.554 ff.).

Many of the words denoted first an 'inclosed and fortified place'. Several are specializations of 'place' or 'dwelling-place', and one group is narrowed from 'state'.

1. Grk. πόλις (in early use partly = ἀκρόπολις 'citadel') : Skt. *pur-* (nom. *pūr*) 'stronghold, fortified place' ('town'? Cf. Macdonell-Keith 1.539), also *pura-*, sometimes simply 'town', Lith. *pilis*, Lett. *pils* 'castle', root connection dub., but 'citadel' prob. the earliest sense. Walde-P. 2.51. Boisacq 802.

NG πόλις, though now restored to generic use, was for a long time in pop. speech 'the city, Constantinople', its place in generic sense being taken by πολιτεία, orig. 'citizenship, government, state', whence (like *cīvitās* in late Lat.) pop. 'city, town'.

Grk. ἄστυ (partly the town proper vs. the acropolis, the suburbs or other parts of the city-state), Arc., Boeot. ϝάστυ, doubtless (despite the ϝασ- for expected ϝεσ-) : Skt. *vastu* 'place, thing', *vāstu* 'site, dwelling place, house', fr. the root of Skt. *vas-* 'dwell', OE *wesan* 'be, remain', etc.; here prob. also Toch. A *waṣt*, B *ost* 'house'. Walde-P. 1.307. Boisacq 92.

2. Lat. *urbs*, etym. dub., possibly as orig. 'wicker-work (inclosure)' : *verbera* 'rod, whip, scourage', Lith. *virbas* 'stem, stalk, vine', ChSl. *vrŭba* 'willow'. Walde-P. 1.275. (Ernout-M. 1136 say borrowed, without suggestion of any source.)

Lat. *oppidum*, in form doubtless fr. **op-pedom* and belonging to the group of words for 'foot', also Grk. πέδη, Lat. *pedica* 'fetter', Grk. πέδον 'ground', πεδίον 'plain', etc., but line of semantic development uncertain. Perh. best (cf. *oppidum* quoted as once used for the barriers of the circus) as orig. 'place fortified with barriers'. Walde-P. 2.22 f. Ernout-M. 705.

Lat. *cīvitās*, 'citizenship', whence 'the citizenry, state', late 'city' (> It. *città*, Sp. *ciudad;* Fr. *cité* no longer used in general sense; Rum. *cetate* 'castle'), deriv. of *cīvis* 'citizen' (19.37). Ernout-M. 191. REW 1959. Wartburg 2.725 (esp. the history of Fr. *cité* vs. *ville*).

Fr. *ville*, fr. Lat. *villa* 'country house, farm', late 'village' : *vīcus* 'village', etc. (19.16). Walde-P. 1.231. Ernout-M. 1103. REW 9330. Gamillscheg 891.

Rum. *oraş*, fr. Hung. *város* 'town, city'. Tiktin 1092.

3. Ir. *cathir*, NIr. *cathair*, with W. *cader, caer* 'fortress', Br. *kêr, kear* 'city', prob. not fr. Lat. *castra*, as Thurneysen, Hdb. 517 (not repeated in Gram.), Walde-H. 1.180, but etym. dub. Loth, Mots lat. 95, Walde-P. 1.338, Pedersen 1.31, G. S. Lane, Language 8.295 f.

NIr. *baile mōr*, lit. 'large place', see under 'village'.

W. *dinas*, deriv. of MW *din* 'fortress' = Ir. *dūn* id., OE *tūn*, NE *town*, etc. (below, 4).

4. Words for 'village' are based on the notions of 'dwelling place' (whence the modest 'village', only rarely the 'town, city') or 'field, piece of land', 'settlement', etc. A few are connected with words for 'people' or 'multitude', that is, denoted first the group of inhabitants. Only rarely are they derivatives of words for 'city, town' (Fr. *village*, etc.).

1. Grk. κώμη, etym. dub. Walde-P. 1.360, 389. Boisacq 544.

Grk. χωρίον 'place', also 'landed property, estate', Byz. and NG (χωριό) 'village', dim. of χώρα 'place, country' (19.11).

2. Lat. *vīcus* (> Ir. *fīch*, OE *wīc*, OHG *wīch*), Goth. *weihs*, ChSl. *vĭsĭ*, Boh. *ves*, Pol. *wieś* : Grk. οἶκος (ϝοῖκος) 'house', Skt. *viç-* 'dwelling place, house', Av. *vīs-* 'dwelling place, house, family', also 'village' (Barth. 1456). Lat. *vīcus* is also in part 'quarter, street'. Walde-P. 1.213. Ernout-M. 1103.

Lat. *castellum* 'fortress' was often used in the Vulgate to render κώμη, hence OE *castel* in the Gospels and later. Cf. NED s.v. *castle*.

Fr. *village*, Prov. *villatge* (> It. *villaggio*, Sp. *villaje*), derivs. of Fr. *ville*, Prov. *villa* 'city' (19.15). REW 9330.

Sp. *pueblo* 'people' (19.21) and 'village'.

Sp. *aldea*, fr. Arab. *daiᶜa* 'piece of land'. REW 2460.

Rum. *sat*, fr. Alb. *fshat* id., fr. late Lat. *fossātum* 'place surrounded by a moat' (cf. Byz. φοσσᾶτον 'camp, army'), deriv. of *fossa* 'ditch'. REW 3461. Tiktin 1370. Densusianu 353, 355.

3. Ir. *fīch* (gl. *municipium*), fr. Lat. *vīcus* (above, 2).

Ir. *baile* 'place, town, village' (K. Meyer, Contrib. 166), NIr. 'town, village, home', and esp. *baile beag*, lit. 'little town', or *sraidbhaile*, lit. 'street-town' ('village of one street') vs. *baile mōr* 'large town', etym.? Walde-P. 2.141.

W. *tref* (also 'homestead'; in NT reg. for 'village' vs. *dinas* 'city'), now esp. *pentref* (cpd. with *pen* 'head'), fr. OW *treb* 'dwelling' : Ir. *atreba* 'habitat', Umbr. *trebeit* 'versatur', OE *þorp*, OHG *dorf* 'village', etc. Walde-P. 1.757.

Br. *keriadenn*, dim. of *ker* 'city, town' (19.15), prob. in imitation of Fr. *village* vs. *ville*.

4. Goth. *haims* = ON *heimr* 'home, world', OE *hām*, OHG *heim* 'home', etc. (7.122), orig. 'dwelling, resting place', fr. the root in Grk. κεῖμαι, Skt. *çī-* 'lie'. Walde-P. 1.259 f. Feist 233 f. Cf. OE *hamel, hamelet* (> NE *hamlet*), dim. of *ham*, fr. MLG *hamm* of this group.

Goth. *weihs*, OE *wīc*, ME *wike*, OHG *wich*, see Lat. *vīcus* (above, 2).

ON *þorp*, OE *þorp, þrop*, ME *thorp, throp*, Du. *dorp*, OHG-NHG *dorf* = Goth. *þaurp* 'cultivated land, field' : W. *tref*, etc. (above, 3). Falk-Torp 1274. Feist 492.

NIr.	teora, crīch	OHG	marcha		
W.	terfyn, ffin	MHG	marke, grenice		
Br.	harzou (pl.)	NHG	grenze		

Most of the words listed are generic for 'boundary', covering that between countries and that between lands. But some are used only or mainly for the former, as Lat. *fīnis* (hence pl. *fīnēs* 'country') and the group represented by NE *frontier;* some for the latter, as Lat. *līmes*. There are connections with words for 'end, edge, front, wall'. Several denoted originally some particular physical form of boundary, such as a stake, a furrow, a blazed trail, etc. There are some loanwords, introduced through contact with adjacent countries.

1. Grk. ὅρος (Ion. οὖρος, Arg., Cret. ὦρος, Corcyr. ὅρϝος), ὅριον, perh. (Att.ᶜ not orig.) as orig. 'furrow' : Lat. *urvum* 'curved part of a plow', *urvāre* 'mark the boundary with a plow'. Walde-P. 2.352. Boisacq 716. Hence adj. σύνορος 'neighboring', NG sb. σύνορον 'boundary' (σύνορα usual word for the

'frontiers', ὅρια for boundaries between pieces of land).

2. Lat. *fīnis*, prob. as orig. 'fixed mark' : *fīgere* 'fix'. Walde-P. 1.832. Ernout-M. 363. Walde-H. 1.503. Hence adj. *confīnis* 'neighboring', sb. *confīne* (> It. *confine*, Sp. *confin*, etc.).

Lat. *līmes, -itis*, orig. a path between fields, hence 'boundary' (but still mostly between lands, not countries) : *līmen* 'threshold', *līmus* 'sidelong', etc. Walde-P. 1.158. Ernout-M. 551. Hence It., Fr., Sp. *limite* (Rum. *limită* neolog. fr. Fr.), mostly in secondary uses but also in pl. for 'boundaries' of countries; hence also the vb. *līmitāre* 'fix the boundaries' > Sp. *lindar* id. with sb. *lindero* 'boundary' (between lands).

It. *frontiera*, Fr. *frontière* (> ME *frounter*, NE *frontier*, now mostly of the border region; Rum. *frontiera*, neolog., Sp. *frontera*), all used only of the boundary or boundary region between countries (not between farms, etc.), deriv. of It. *fronte*, Fr. *front*, etc., orig. 'forehead' (4.205), but here through the secondary 'front'. REW 3533. NED s.v. *frontier*.

Rum. *hotar*, fr. Hung. *határ* id. Densusianu 1.374 f.

Rum. *margine* 'edge' (12.353), used also for 'boundary'. Tiktin 953.

Rum. *granită*, fr. Slavic, SCr. *granica*, etc. (below, 6).

3. Ir. *crīch* : Lat. *cernere* 'separate, distinguish', *crībrum* 'sieve', Grk. κρῑνω 'separate, distinguish, decide', etc. Walde-P. 2.584. Pedersen 2.33.

NIr. *teora*, W. *terfyn*, fr. Lat. *terminus* 'bound, end'. Pedersen 1.241. Loth, Mots lat. 211.

W. *ffin*, fr. Lat. *fīnis*. Loth. Mots lat. 168.

Br. *harzou*, pl. of *harz* 'obstacle' and 'boundary stone' (cf. Ernault s.v.), etym.? Henry 158.

4. Goth. *marka*, OE *mearc*, ME *mark*, OHG *marcha*, MHG *marke* : Lat. *margō* 'edge', Ir. *mruig, bruig* 'cultivated land, district', Av. *marəza-* 'borderland' (Barth. 1153; NPers. *marz* 'borderland, district').

The sense of the Gmc. words passed into that of the 'borderland' (hence ON *mǫrk* 'forest'), as in the borrowed OFr. *marches* (> ME, NE *marches*), also 'district', etc. Walde-P. 2.283 f. Feist 347. NED s.v. *mark*, sb.[1].

ON *landa-mǣri*, OE *(ge)mǣre*, ME (and NE dial.) *mere*, MDu. *mēre*, orig. the (boundary) 'stake', fr. Gmc. **mairia-* : Lat. *mūrus*, old *moiros* 'wall', *moenia* 'walls', Skt. *mi-* 'fix, build', etc. Walde-P. 2.239 f. Franck, KZ 37.120 ff. NED s.v. *mere*, sb.[2].

ME *bordure*, NE *border*, fr. OFr. *bordure*, deriv., through vb., of *bord* 'edge' (12.353). NED s.v.

ME *bonde*, NE *bound*, whence *boundary* (now the most distinctive word), fr. OFr. *bodne, bonde*, etc. (source also of Fr. *borne* > NE *bourne*), MLat. *butina, bodina*, etc., orig. perh. Celtic(?). NED s.v. *bound*, sb.[1]. REW 1235. Wartburg 1.465 f.

MHG *grenice*, NHG *grenze* (> Du. *grens*, Dan. *grænse*, Sw. *gräns*), fr. Pol., Russ. *granica* (below, 6), and first appearing in the adjacent land of the German Order. Weigand-H. 1.765. Kluge-G. 216.

5. Lith. *siena* 'wall' (7.27) and 'boundary' (now the preferred word, Senn).

Lith. *rubežius* (the usual old word, NT, Kurschat, etc.), Lett. *ruobeža*, fr. Russ. *rubež* 'boundary' (below, 5). Mühl.-Endz. 3.575. Skardžius 192.

Lith. *rība*, prob. orig. a clearing or track in the woods where the light shines through : *rībėti* 'shine', *raibas* 'spotted'. Buga, Kalba ir Senovė 20 f.

6. ChSl. *prědělŭ* (reg. for ὅριον, in Gospels, Supr., etc.) cpd. of *dělŭ* 'part' with *prě-* 'through, out, over', hence lit. 'the outer parts'. Berneker 195.

SCr., Pol., Russ. *granica*, Boh. *hranica*, deriv. of word seen in ChSl. *granĭ* 'chapter', Russ. *gran'* 'facet, side', Boh. *hrana* 'edge' (12.353), etc. Berneker 346. Brückner 155.

Russ. *rubež* (still in use, but much less common than *granica*), orig. a blazed trail in the forest : *rubiti* 'cut, hew' (9.22). Dal' s.v.

7. Skt. *sīmā-, sīman-* (latter also 'parting of the hair'), fr. the root in Skt. *sā-, si-* 'bind', Lith. *sieti* 'bind' (9.16), Grk. ἱμάς, 'strap', Lith. *siena* (above, 5), etc. Walde-P. 2.463.

'People' is understood here as the populace of a country, region, town; in part the 'common people' in contrast to the ruling class, and some of the words, as Latin *plēbs, vulgus*, Lith. *liaudis*, definitely so. Many of the words are used likewise for 'a people' as a national group (19.22), but the two lists are not identical. Some are used also like NE colloq. *people* 'persons' (*people say, poor people*, etc.). But others that correspond to people only or mainly in this sense are not included (e.g. Fr. *gens* or *monde* with Romance cognates, NHG *leute*, Russ. *ljudi*).

Several of the words (some certainly, others probably) are derived from a root for 'fill' and must have meant originally 'multitude', and some of the others are connected with words for 'crowd, fullness, many', etc. Some belong with words for 'birth, race, growth' or 'world' or 'men'.

1. Derivs. of IE **pel(ə)-, *plē-*, etc. 'fill'. Walde-P. 2.64 ff. Ernout-M. 777, 789 f. Falk-Torp 250.

Grk. πλῆθος 'multitude' and 'people, common people'; Lat. *populus* (prob., but disputed) and *plēbs* 'common people'; ON *folk*, OE, OHG *folc*, etc., general Gmc. except Goth.

2. Grk. λᾱός (dial. λᾱϝός, Ion. ληός, Att. λεώς, but λᾱός in the κοινή and so NG λαός), etym.? Boisacq 556.

Grk. δῆμος 'district, land' (Hom.), hence in Att. the local 'deme', but also 'people' (Hom.) : δαίομαι 'divide, share', Skt. *dāti, dyati* 'cuts off, divides', etc. Walde-P. 2.764. Boisacq 182.

NG κόσμος 'world' (1.11), also 'people' (more important in this use than Fr. *monde*, etc.).

3. Lat. *populus* (> Romance words, but Rom. *popor* in earliest use 'parish', now replacing *norod* as 'people'; Tiktin 1213) and *plēbs*, above, 1.

Lat. *vulgus* (*volgus*), esp. 'common people', perh. : Skt. *varga-* 'division,

group', W. *gwala* 'fullness, enough', ChSl. *velijĭ* 'large', Russ. *valom* 'in abundance', etc. Walde-P. 1.296. Ernout-M. 1128 (without etym.).

Rum. *norod* (formerly reg. word for 'people', esp. 'a people, nation', now chiefly 'common people, crowd'), fr. Slavic, cf. ChSl. *narodŭ*, etc. (below, 7).

4. Ir. *tūath*, esp. 'a people, nation' (19.22), but also 'people' vs. king or clergy (Laws, Gloss. s.v.).

Ir. *lucht* 'load, part, division' and 'group of persons, people' : W. *llwyth* 'load, burden, tribe', prob. Lith. *lužti*, Skt. *ruj-* 'break'. Walde-P. 2.412. Pedersen 1.123.

NIr. *daoine* ('people' = 'persons', but also 'the public, people'), pl. of *duine* 'man, person' (2.11).

W., Br. *pobl* (NIr. *pobal* mostly bibl. or 'parish'), fr. Lat. *populus* (above, 1). Loth, Mots lat. 196.

W. *gwerin* (esp. 'common people) in OW gl. *factio* : Ir. *foirenn* 'company, party', NIr. *foireann* 'crowd, body of troops', OE *wearn* 'great number, crowd', Skt. *vṛnda-* 'crowd, herd, swarm', etc. Walde-P. 1.265 f. Pedersen 1.375.

5. Goth. *managei* (the reg. rendering of λαός and πλῆθος, also of ὄχλος 'throng, crowd'), lit. 'multitude, crowd', fr. *managṡ* 'many' (13.15).

ON *folk*, OE *folc*, etc., above, 1.

ON *lȳðr*, and esp. pl. *lȳðir*, OE *lēode*, ME *lede*, Du. *lieden*, OHG *liuti*, MHG *liute*, NHG *leute*, all pl. of OE *lēod*, OHG *liut*, etc. (see list 19.22 'a people, nation'; OE, OHG also 'a man') : Lat. *līber*, Grk. ἐλεύθερος 'free', and all prob. fr. the root of Goth. *liudan*, OE *lēodan*, OHG *liotan* 'grow', Skt. *rudh-* 'grow', etc. Walde-P. 2.416. Weigand-H. 2.58. Kluge-G. 356. NED s.v. *lede*.

ME *poeple*, NE *people*, fr. Anglo-Fr. *poeple* = Fr. *peuple* (above, 3).

6. Lith. *liaudis* (esp. 'common people'), Lett. *l'audis*, see below, 7.

Lith. *žmonės*, pl. of *žmogus* 'man, person' (12.11), is used not only for 'people' = 'persons' but also in the sense intended here, and formerly (by Kurschat) even for 'a people, nation' (19.22).

7. ChSl. *ljudĭje* pl. (in Gospels reg. for λαός; SCr., Russ. *ljudi*, Boh. *lidé*, Pol. *ludzie* 'people' = 'persons'), sg. coll. ORuss. *ljud*, Boh. *lid*, Pol. *lud* 'people' and 'a people', all, with Lith. *liaudis*, Lett. *l'audis*, either cognate with or (more prob., on account of the close agreement in use) early loanwords fr. the Gmc. group OE *lēod*, pl. *lēode*, etc. (above, 5). Berneker 758. Stender-Petersen 190 ff.

ChSl. *narodŭ* (in Gospels reg. for ὄχλος 'multitude, throng, people'; in Supr. also for λαός, δῆμος, etc.), modern Slavic *narod* most widespread word for 'people' in both senses, cpd. of ChSl. *rodŭ*, etc. 'birth, generation, race, family' (19.23).

8. Skt. *jana-* 'person, family' and 'people', and *prajā-* 'offspring' and 'people' : *jan-* 'beget, bear', etc.

Skt. *loka-* 'world' (12.11), also 'people'.

OPers. *kāra-* 'army' and 'people' : Lith. *karias*, Goth. *harjis* 'army' (20.15).

'People' is understood here as 'a people' (*the English people, das deutsche volk*, etc.) = *nation* (but without necessary implication of political unity or independence) or *nationality* (sometimes used as distinguished from nation in political sense), or *race* (in its popular, not anthropological, use). This is most widely expressed by the same words (or sg. vs. pl. in OE *lēod*, etc.) as those for 'people' listed and discussed in 19.21. In some languages where other terms are usual, these may also be so used, e.g. Grk. (beside ἔθνος) λᾱός (Λυδῶν λαός Aesch., freq. in NT esp. λαός Ἰσραήλ vs. other ἔθνη), Lat. (beside *gēns, natiō*) *populus Romānus, Latīnus*, etc. Goth. (beside *þiuda* for ἔθνος) *managei* for λᾱός also in this sense, OE (beside *þēod*) *folc*, etc.

For all these, see 19.21. Only the other words are discussed here. They are based on such notions as 'strength, power'(?), common 'birth', 'customs', or 'language', or are words for 'country' used also for its 'people'.

1. IE **teutā-*, prob. fr. the root in Skt. *tu-* 'be strong' (3sg. pres. *tāuti, tavīti*), Lat. *tumēre* 'swell', *tōtus* 'whole', etc. Walde-P. 1.706 ff., 712. Feist 496. NED s.v. *thede*.

Osc. *touto* 'populus' (*Bansae touto*, τοϝτο Μαμερτινο; cf. *toutico* 'publica', etc.), Umbr. *tota-* 'people' (in this special sense) or 'state' or 'city' (cf. e.g. *seritu poplom totar Iiouinar* 'servato populum civitatis Iguvinae'); Ir. *tūath* (W. *tud* 'country', older 'people', Br. *tud* 'people' = 'persons'); Goth. *þiuda*, ON *þjōð*, OE *þēod*, ME *thede*, OHG *diot*, MHG *diet;* Lith., Lett. *tauta*.

2. Grk. ἔθνος (ϝέθνος attested by Hom. prosody), prob. : ἔθος 'custom, usage', Skt. *svadhā-* 'one's own nature, custom, home', derivs. of refl. stem **swo-*. Cf. also Goth. *sibja*, OE *sib(b)*, OHG *sippa*, etc. 'relationship'. Walde-P. 2.456. Boisacq 218.

3. Lat. *gēns* (in narrow sense 'clan, family', but freq. for 'people, nation'; so also It. *gente*, but mostly as Fr. *gens*, etc. 'people, persons'), fr. the root of *gignere* 'beget, bear', etc. (cf. Grk. γένος 'race, kin, clan', etc.). Walde-P. 1.576 ff. Ernout-M. 416.

Lat. *nātiō*, orig. 'birth' : *nāscī* 'be born', *nātus* 'born', fr. the same root as *gēns*. Hence It. *nazione*, Fr. *nation* (> ME *nacioun*, NE *nation* > NIr. *nāisiūn*), Sp. *nación*, Rum. *naţiune*, Dan., Sw., NHG *nation*, Du. *natie*, all with tendency to be used esp. as 'nation' in political sense.

4. Ir. *tūath*, above, 1.

NIr. *muinntir*, mostly 'household, family, clan' (19.23), now used also for a national group.

W. *cenedl* (reg. word for a 'people, nation') : Ir. *cenēl* 'race, family' : Ir. *cinim* 'spring from', ChSl. *-čĭnq, -čęti* 'begin', etc. Walde-P. 1.398.

Br. *broad* (now reg. = Fr. *nation*, for which *pobl* in NT), deriv. of *bro* 'country' (19.11).

5. Goth. *þiuda*, OE *þēod*, etc., above, 1. For other Gmc. words see 19.21.

6. Lith., Lett. *tauta*, above, 1. Lith *tauta*, now the accepted word, was known to Kurschat only as *Tauta* 'Oberland'; in his NT he used *žmonės* (cf. 19.21), as also Deutsch.-lit. Wtb. s.v. *Volk;* the Trowitz NT had *giminė* 'family, race'.

7. ChSl. *językŭ* 'tongue, language' (18.24), reg. in Gospels for ἔθνος.

8. Skt. *janapada-* 'country' (19.11) and its 'people'.

Av. *daiŋhu-* 'country' (19.11) and its 'people'. Barth. 706 ff.

The 'tribe' and the 'clan' or 'family' in a wide sense, based on varying degrees of kinship, real or fictitious, have their chief importance in primitive society, though in some cases they continued to play a role in a more advanced organization. Thus the Grk. φῡλή, applied for example to the old Doric and the old Ionic tribes, became in the Athenian state a highly important, but artificially constructed, political organization. Lat. *tribus*, besides rendering Grk. φῡλή, in native use denoted in the historical period a local district. The Grk. γένος and Lat. *gēns* 'clan' continued important because of the noble families rather than as definite social and political organizations. Midway between the φῡλή and the γένος was the φρᾱτρία 'brotherhood' (fr. φράτηρ, orig. 'brother' = Lat. *frāter*, etc.), which in the developed Athenian state survived as a large family organization for cult purposes, without political significance. But in Homer φρήτρη, not γένος, is the technical term best rendered 'clan', as in κατὰ φῦλα, κατὰ φρήτρας 'by tribes, by clans', Il. 2.362. Likewise the Roman *cūria* (perh. fr. **co-uiriā* : *vir* 'man') was originally a division of the people more comprehensive than the *gēns*.

Classifications of this kind, so far as they are found among other IE-speaking peoples (as the early Irish), correspond only approximately, and for modern society are without significance. Several of the words listed denote 'kin' without distinction of degree. The modern words are merely those commonly used to render terms applicable to other times or places (e.g. the Hebrew *tribes* of the Bible, *savage tribes*, etc.). For these reasons it is impossible to carry through a separation of 'tribe' and 'clan', though

the words are entered in this order where such a gradation is observed (e.g. NHG *stamm*, reg. used for 'tribe' vs. *geschlecht* for 'clan, family'). In many of the modern languages there is no special term for 'clan' (apart from the widely borrowed *clan*), but only words for 'family' (2.82) used also for 'family' in a wide sense.

1. Derivs. of IE **ĝen-* in Grk. γίγνομαι 'be born', Lat. *gignere*, Skt. *jan-* 'beget, bear', etc. Walde-P. 1.576 ff. Ernout-M. 415 ff. All orig. 'kin, race' in wide sense, but also used in narrower sense.

Grk. γένος; Lat. *gēns;* Goth. *kuni*, ON *kyn, kind*, OE *cyn(n)*, ME *kin*, also deriv. *kinrede* (Wyclif for φῡλή Mt. 21.30; NE *kindred*), OHG *cunni*, MHG *künne;* Skt. *jāti-, jana-*.

2. Grk. φῡλή (Hom. φῦλον) : φύω 'bring forth, produce, grow, be born', etc. (IE **bheu-* 'become, be'). Walde-P. 2.141.

3. Lat. *tribus* (here in its use = Grk. φῡλή, not in its technical Roman sense, which was more local), Umbr. *trifu*, fr. **tribhu-*, prob. deriv. of *tri-* 'three' and denoting orig. a tri-partite division. But substantial historical evidence of this is lacking, and the precise history of the Roman *tribus* is difficult. Ernout-M. 1056 f. Pauly-Wissowa s.v. Hence (but in its biblical use as 'tribe') the Romance words (all lit.), etc.

Rum. *seminţie*, deriv. of *sămînţă* 'seed' (VLat. **sēmentia* = *sēmentis*). Puşcariu 1508.

4. Ir. *tūath* 'a people' (19.22), also applied to a large division, a 'tribe'. Thurneysen, Heldensage 76.

Ir. *fine* (group of kin within the tribe, cf. Thurneysen l.c. and RC 25.1 ff.) : OBr. *co-guenou* 'indigena', ON *vinr*, OE *wine* 'friend', etc. Walde-P. 1.259. Pedersen 1.156.

Ir. *treb*, NIr. *treab*, orig. 'dwelling place' (: Ir. *atreba* 'habitat', OE *þorp* 'village', etc.; Pedersen 1.132), but as 'tribe' (esp. in translations) fr. (or influenced by) Lat. *tribus*.

Ir. *muinter*, NIr. *muinntir* 'people, household', also 'family' in wide sense, disputed whether fr. Lat. *monastērium* (cf. esp. Pokorny, Z. celt. Ph. 10.202 f.), or : Lat. *manus* 'hand', OE *mund*, OHG *munt* 'hand, protection, guardianship'. Vendryes, De hib. voc. 157. D'Arbois de Jubainville, RC 25.2 ff. Vendryes, RC 43.210.

NIr. *clann* 'offspring, children' and 'clan, party, sect', etc. (Gael. *clann* > NE *clan*) = Ir. *cland, clann* 'plant' and 'offspring, children' = W. *plant* 'offspring, children', fr. Lat. *planta* 'shoot, sprout'. Pedersen 1.234, 235.

W. *cenedl*, listed under 'people, nation' (19.22) but in early Welsh history more properly 'tribe' or 'clan'. Cf. Ellis, Welsh Tribal Law and Customs in the Middle Ages 1.46 ff.

W. *gwely* 'bed, couch' (7.42) was in early times the technical term (now obs. in this sense) for a subdivision of the *cenedl*. Cf. Ellis l.c.

W. *llwyth* : Ir. *lucht* 'load, part, division, people', etc. (19.21).

Br. *meuriad* ('tribe, clan' Ernault; Vallée s.v. *tribu*), deriv. of *meur* 'great'.

5. Goth. *kuni* (used for φυλή), ON *kyn, kind*, OE *cyn*, etc., above, 1.

ON *ætt*, Dan. *æt*, Sw. *ätt* ('family' in wide sense), orig. 'what is one's own' : Goth. *aihts*, OE *ǣht* 'property', Goth. *aigan*, OE *āgan* 'own', etc. Walde-P. 1.105. Falk-Torp 1415. Hellquist 1449 f.

OE *mǣgþ* ('kin, family'; for *tribus* in Gospels, Aelfric, etc.), fr. *mǣg* 'relative, kinsman', pl. *māgas* (2.81).

OE *strȳnd* (in Lindisf. Gospels for *tribus*), fr. *gestrȳnan* 'beget' (4.71).

ME *tribu*, NE *tribe*, fr. OFr. *tribu*, or in part later directly fr. Lat. *tribus*. NED s.v.

NE *clan*, fr. Gael. *clann* = Ir. *clann* (above, 4). First used only of the Scottish clans, later as convenient rendering of Lat. *gēns*, etc. NED s.v. Hence (esp. through W. Scott's novels) widely borrowed in the modern Eur. languages, mostly for the Scottish clans, but also (at least by French writers) used to render Lat. *gēns*, etc.

NE *sept*, prob. variant of *sect* influenced by *sept* 'inclosure'. NED s.v.

MHG *stam*, NHG *stamm*, Du. *stam* (MLG *stam, stamme* > Dan. *stamme*, Sw. *stam*), orig. 'stem, stalk, trunk', OHG *stam* only in the lit. sense (but 'tribe, race' in cpd. *liut-stam*) : OS *stamn* 'stem, race', OE *stefn, stemn* 'trunk, prow' (in cpds. *lēodstefn*, etc. 'race'), all fr. IE **stā-* 'stand'. Falk-Torp 1148. Weigand-H. 2.945 f.

OHG *gislahti*, MHG *geslehte*, NHG *geschlecht*, Du. *geslacht*, MLG *geslecht*, orig. coll. forms to MLG *slechte* (> Dan. *slægt*, Sw. *slägt*), OHG *slahta* 'species, sort, kind', fr. OHG *slahan* 'strike' in a specialized sense of 'take a certain direction' (cf. NHG *nach diesem schlag* 'after this manner'). Walde-P. 2.706. Falk-Torp 1059. Weigand-H. 2.698.

NHG *sippe* (revived and now a favorite term in anthropology), fr. MHG *sippe*, OHG *sibba* 'kinship' = Goth. *sibja*, OE *sib(b)* id. (cf. 2.81).

6. Lith. *gentis* 'relative by marriage', now also, influenced by Lat. *gēns, gentis*, 'tribe' (cf. NSB s.v.) : *žentas* 'son-in-law', etc., but with *g-* fr. *gimti* 'be born'. Walde-P. 1.578.

Lith. *kiltis* (cf. NSB s.v.), Lett. *cilts*, orig. 'origin', fr. Lith. *kelti*, Lett. *celt* 'raise, lift' and intr. 'arise' : Lat. *excellere* 'raise up', *collis* 'hill', etc. Walde-P. 1.434. Mühl.-Endz. 1.382.

Lith. *giminė* (in NT 'tribe', but mostly 'family' in wide sense; hence Lett. *g'imene*), Lett. *dzimta*, fr. Lith. *gimti*, Lett. *dzimt* 'be born'. Walde-P. 1.676.

7. ChSl. *kolěno* (reg. for φυλή in the Gospels; SCr. *koljeno*, Russ. *koleno*, Boh. *pokolení*, Pol. *pokolenie* in this sense mostly biblical or archaic) = *kolěno* 'knee' (4.36), with semantic development through 'joint' or 'limb'. Berneker 545 f. Walde-P. 2.599.

ChSl. *plemę* (for φυλή in Supr.), SCr. *pleme*, Pol. *plemię*, Russ. *plemja*, fr. **pled-men-* : *plodŭ* 'harvest, fruit' (8.41). Walde-P. 2.103. Brückner 421.

SCr. *zadruga* (the much studied patriarchal family composing a single household) : ChSl. *drugŭ*, etc. 'companion' (19.53).

Boh. *kmen*, lit. 'stem, stock' (cf. NHG *stamm*) : LSorb. *kmjeń* 'bud, stem', Pol. *kien, kień* 'block, stump, stem', etc. Berneker 663.

ChSl. *rodŭ*, modern Slavic *rod* 'birth, generation, race' and 'family' in wide sense, prob. : Skt. *vṛdh-* 'grow', etc. Walde-P. 1.289 f. Vondrák 1.375.

8. Skt. *jana-, jāti-*, above, 1.

Skt. *vaṅça-* 'bamboo cane', hence also, on the analogy of the series of joints, 'lineage, race, family'.

Skt. *kula-* 'family' in wide and narrow sense (also 'herd, crowd'), see 2.82.

OPers. *taumā-* ('family' in wide sense) : Av. *taoxman-* 'seed', Skt. *tokman-* 'young blade of grain', *toka-* 'offspring', etc. Walde-P. 1.713. Barth. 624. Meillet-Benveniste, Grammaire du vieux-perse 81.

Br.	*sturia, gouarn*	NHG	*herrschen, regieren*		

Verbs for 'rule, govern' in the political sense are based upon such notions as 'be first, have power, be master of, command, put in order, direct, guide, steer'. The development from 'steer' (a ship) is common to Grk. κυβερνάω with its numerous offspring (the group to which NE *govern* belongs) and also (semantic borrowing?) the usual Scandinavian words and some others.

Many derivs. of words for 'master' (19.41), besides those included in the list, are used mostly like NE *dominate* and not commonly for 'rule' in the political sense. So, for example, Grk. κυριεύω, Lat. *dominārī* (VLat. *-āre* > Fr. *dominer*, etc.), Goth. *fraujinōn*, Lith. *ponavoti*, Boh. *panovati*, Pol. *panować*, Russ. *gospodstovat'*.

Most of the usual words for 'ruler', as a generic term covering more special titles like 'king', etc., are derived from some of the verbs listed here. Otherwise It. *sovrano*, Sp. *soberano*, Fr. *souverain* (OFr. *soverain* > ME *soverain*, NE *sovereign* with spelling influenced by popular association with *reign*), fr. VLat. **superānus*, fr. *super* 'above' (REW 8457, NED s.v. *sovereign*).

Likewise most of the usual words for 'government' are derived from some of the verbs listed here. Otherwise Grk. πολῑτεία, orig. 'citizenship', fr. πολῑτης 'citizen', or Fr. *état*, NE *state*, NHG *staat*, etc. 'state' in political sense, fr. Lat. *status* 'situation, condition, state'.

1. Grk. ἄρχω, also 'begin' (14.25), with ἄρχων 'ruler', ἀρχή 'beginning' and 'rule, office', primary sense prob. 'be first', but etym. dub. Walde-P. 2.367. Boisacq 85 f. R. McKenzie, Cl. Q. 15.44 f.

Grk. κρατέω, deriv. of κράτος 'strength, might, power' (4.81).

Grk. ἡγέομαι 'lead' (10.64), also 'rule', with ἡγεμών 'leader, chief, ruler'.

Grk. κυβερνάω, orig. 'steer' (a ship), hence also 'guide, govern', with κυβέρνησις 'steering' and 'government', eventually the usual words as in NG. Possibly deriv. of a word for 'rudder', and : Lith. *kumbras* 'curved handle of the rudder', etc. Walde-P. 1.467. Osthoff, IF 6.14. But more prob. fr. a pre-Greek source. Cuny, Rev. ét. anc. 12.156. Fohalle, Mélanges Vendryes 164 f. Walde-H. 1.625.

2. Lat. *regere* 'direct, guide' and 'rule' (> It. *reggere* with many uses, but partly 'rule' in political sense; Fr. *régir* 'administer, manage') : Grk. ὀρέγω, Ir. *rigim* 'stretch out', Skt. *ṛj-* 'direct, attain', etc., IE **reĝ-*, whence also the

widespread group for 'straight' (12.73). Walde-P. 2.362 ff. Ernout-M. 858.

Lat. *imperāre* 'command' (19.45), also 'rule'.

Lat. *gubernāre* 'steer' and (freq. in Cic.) 'govern' (> It. *gobernare*, Fr. *gouverner*, Sp. *gobernar;* Rum. *guberna* neolog. fr. Fr.), fr. Grk. κυβερνάω (above, 1). Ernout-M. 437. Walde-H. 1.625. REW 3903.

Rum. *cîrmui* 'steer' and 'rule' (the old word), deriv. of *cîrma* 'rudder', fr. Slavic, ChSl. *krŭma*, etc. 'rudder' (10.86). Tiktin 297.

3. Ir. *foln-* in deponent forms, beside sb. *flaith* 'rule' and 'ruler' : Lat. *valēre* 'be strong', Toch. A. nom. *wäl*, obl. *lānt* 'king' (SSS 44), OE *wealdan* 'rule', etc. (below, 4). Walde-P. 1.219. Pedersen 1.157, 2.525.

NIr. *riaghluighim*, W. *rheoli*, fr. sbs. NIr. *riaghail*, Ir. *riagol*, W. *rheol* 'rule', fr. Lat. *rēgula* 'rule'. Pedersen 1.210. Vendryes, De hib. voc. 171. Loth, Mots lat. 202.

W. *llywio*, also and orig. 'steer', fr. *llyw* 'rudder' (10.86) and 'ruler'. Hence also *llywodraeth* 'government', with vb. *llywodraethu* 'govern'.

Br. *sturia*, also 'steer', fr. *stur* 'rudder' (10.86).

Br. *gouarn*, fr. Fr. *gouverner*.

4. Goth. *reikinōn*, fr. sb. *reiki* 'rule', fr. *reiks* 'ruler', early loanword fr. Celtic, cf. Gall. *-rīx* in *Dumno-rīx*, etc., Ir. *rī*, gen. *rīg* 'king'. Similarly OE *rīcsian*, OHG *rīhhisōn*. Walde-P. 2.365. Feist 396.

Goth. *waldan* (but not quotable for 'rule' in political sense), ON *valda* (but mostly in other senses), OE *wealdan*, ME *welde* (NE *wield* in specialized sense), OHG *waltan*, MHG, NHG *walten* (NHG poet. or rhet.) : Lith. *valdyti*, ChSl. *vlasti, vladą*, etc. (below, 5), both groups fr. a dental extension of **wel-* in Lat. *valēre* 'be strong', Ir. *foln-* 'rule', etc. (above, 2). Walde-P. 1.219. Falk-Torp 1391. Feist 548.

ON *stȳra*, Dan. *styre*, Sw. *styra*, Du. *besturen*, all also and orig. 'steer' = OE *stīeran* 'steer' (OE, ME also sometimes 'rule', cf. NED s.v. *steer*, 7), etc., fr. ON *stȳri*, OE *stēor*, etc. 'rudder' (10.86). Falk-Torp 1194.

OE *reccan* mostly 'tell, narrate', but also 'rule' (Bosworth-Toller s.v. vii) : Lat. *regere* 'direct, rule', etc. (above, 2).

ME *reule*, NE *rule*, fr. OFr. *reuler*, fr. Lat. *rēgulāre* 'regulate', fr. *rēgula* 'rule' : *regere* (above, 2).

ME, NE *govern*, fr. Fr. *gouverner* (above, 2).

OHG *hērisōn, hērresōn*, MHG *hersen, herschen*, NHG *herrschen* (MLG *herschen* > Dan. *herske*, Sw. *herska*), fr. OHG *hēro, hērro*, NHG *herr* 'master' (19.41). Falk-Torp 401. Weigand-H. 1.855. Kluge-G. 247.

MHG, NHG *regieren*, Du. *regeeren*, fr. Fr. *régir*, Lat. *regere* (above, 2).

5. Lith. *valdyti*, Lett. *valdit*, ChSl. *vlasti, vladą*, SCr. *vladati*, Boh. *vládnouti*, Pol. *władać* (Russ. *vladet'* mostly 'possess, own') : Goth. *waldan*, etc. (above, 4). As loanwords fr. Gmc. Stender-Petersen 213 ff.

Lith. *viešpatauti*, fr. *viešpatis* 'ruler, Lord' (19.41). For current use, cf. Fraenkel, Z. sl. Ph. 6.90.

Pol. *rządzić*, fr. sb. *rząd* 'order, row' and 'rule' = ChSl. *rędŭ*, Boh. *řad* 'order, arrangement, regulation' : Lith. *rinda* 'row, rank', prob. Lat. *ordō* 'row, order', etc. Brückner 474. Walde-P. 1.75, 2.368.

Russ. *pravit'* = ChSl. *praviti* 'guide', fr. *pravŭ* 'straight' (12.73).

6. Skt. *çās-* 'command' (18.45) and 'rule'.

Skt. *kṣi-* 'possess, rule', Av. *xši-* 'have power, rule' (with sbs. Skt. *kṣatra-*, Av. *xšaθra-*, OPers. *xšaθ^{r}a-* 'rule, realm', Av. *xšaya-* 'ruler, king', OPers. *xšāyaθiya-* 'king') : Grk. κτάομαι 'possess'. Walde-P. 1.405. Barth. 550, 551, 553.

Skt. *īç-* 'own' (11.12), also 'rule'.

The title of 'king' has been, in the course of history, applied not only to the rulers of independent states, even great empires (before the rise of a superior title 'emperor', 19.34), but also to the petty chiefs of tribes or clans. Cf. NED s.v. *king*.

1. IE **rēĝ-*, fr. the root **reĝ-* in Lat. *regere* 'direct, guide, rule', etc. (19.31) Walde-P. 2.362 ff. Ernout-M. 864.

Grk. ἄναξ, dial. ϝάναξ, poet. word often applied to kings but also to gods and heroes, 'lord, master' (for Hom. use of ἄναξ vs. βασιλεύς, cf. Wackernagel, op. cit. 209 ff.), possibly : Skt. *van-* 'win, gain', etc. (Schwyzer, Glotta 6.86), but more prob. of pre-Greek origin. Cuny, Rev. ét. anc. 16.297. Debrunner in Ebert, Reallex. 4.2.527. Śmieszek, Eos 31.547 ff.

In Byzantine times βασιλεύς was 'emperor', the regular title of the Roman emperor and the Persian 'king of kings' (19.34). For 'king' Lat. *rēx* was adopted, e.g. ῥὴξ Γότθων, ῥὴξ φράγκων, etc. Theophanes (1.472 f. De Boor) notes the crowning of Charlemagne, ῥὴξ τῶν φράγκων, as βασιλεὺς 'Ρωμαίων. But generally the German emperors were not according the emperor title by the Byzantine court. NG ῥῆγας 'king' in cards.

Br.	*impalaer*	NHG	*kaiser*		

The ancient oriental 'empires' (of Egypt, Assyria, Persia, etc.), as we now rightly call them, were expanded 'kingdoms', and their rulers retained the old title of 'king', in part amplified to 'great king', 'mighty king', or especially 'king of kings', the last adopted in the OPers. *xšāyaθiya xšāyaθiyānām*. In India, Açoka was still a *rājā*, and the Mogul rulers used the Persian title *šāh*. Skt. *samrāj-* 'supreme ruler' (freq. epithet of Indra) was not a political title.

The European notion of an 'empire' and a superior title 'emperor' is based on the Roman Empire and all the Eur. words, except the Greek, are derived from Latin, *imperātor* prevailing in the Romance and Celtic languages, *Caesar* in the Germanic and Balto-Slavic.

1. Lat. *imperātor*, fr. *imperāre* 'command' (18.36), hence lit. 'commander', in early use mostly a military term 'commander-in-chief, general', used by Augustus as part of his title (*imp. Caesar*), and eventually superseding *Caesar* as the main title. Cf. Pauly-Wissowa s.v. *imperator*. Hence the Romance words (OFr. *emperere* > ME *emperere*, NE *emperor;* Rum. *împărat*, pop. also 'king' and so Alb. *mbret*), W. *ymerawdwr*, Br. (with dissim.) *impalaer*, Lith. *imperatorius*, Russ. *imperator;* but MIr. *imper*, NIr. *impir(e)*, fr. Lat. *imperium* 'empire' (Pedersen 1.237. Vendryes, De. hib. voc. 147).

2. Lat. *Caesar*, cognomen and, from Augustus on, the imperial title. Hence (besides Grk. καῖσαρ) the Gmc. words, Goth. *kaisar*, OE *cāsere*, Du. *keizer* (MLG *keiser* > ON *keisari*, Dan. *kejser*, Sw. *kejsare*, Lett. *k'eizars*), OHG *keisar*, MHG *keiser*, NHG *kaiser*. Hence again, prob. through Goth. *kaisar*, the Slavic words, ChSl. *cěsarĭ* (but 'king' in the Gospels, where for the Roman emperor *kesarĭ*, transcription of καῖσαρ of the Grk. text, with ending of *cěsarĭ;* elsewhere *cěsarĭ* usual also for 'emperor'), Boh. *císař*, Pol. *cesarz* (> Lith. *ciesorius*), and (with shortening characteristic of titles), Bulg., SCr. *car*, Russ. *car'*. Falk-Torp 506. Feist 305. Berneker 126 f. Stender-Petersen 351 f.

Among the Slavs the *car* title was assumed by the Bulgarian Simeon ca. 923 A.D. (the earlier rulers bore the native Bulgarian, non-Slavic, title *khan*), by the Serbian Dušan in 1346 (in place of *kralj* 'king') and by the Russian Ivan IV in 1547 (the title of his predecessors was first *knjaz'* 'prince', then *velikij knjaz'*, generally rendered as 'grand duke'). Peter the Great substituted the western *imperator*, which remained the official title; while *car'* persisted as the popular term.

3. Grk. βασιλεύς 'king' was used also of the Roman 'emperor' (both uses in NT), and only as 'emperor' in Byzantine times. See 19.32.

Grk. καῖσαρ, fr. Lat. *Caesar*, is used of the Roman emperor (NT, inscriptions), but later, in accordance with later Roman use (Hadrian named his designated successor *Caesar*), of the appointed successor to the throne or a viceroy. In Byzantine times it is a common official title (cf. DuCange s.v.), but always subordinate to the βασιλεύς.

Grk. αὐτοκράτωρ, cpd. of αὐτός 'self' and -κράτωρ : κρατέω 'rule'; in class. times mostly adj. 'independent, absolute' (of rulers, etc.), then used to render Lat. *dictātor* and later *imperator* (often αὐτοκράτωρ καῖσαρ = Lat. *imperātor Caesar*). In Byz. writers frequent enough beside usual βασιλεύς, and the reg. NG word, since βασιλεύς is again 'king'.

Lat. *Augustus* as title appears also in Grk. Αὔγουστος or translated Σεβαστός, and Αὐγοῦστα was the usual Byz. title of the empress.

W.	*tywysog*	MHG	*vürste, prinze*		
Br.	*priñs*	NHG	*fürst, prinz*		

The title of 'prince' is mainly medieval and modern, and one of varied application, a generic term for 'ruler' (covering 'king', etc.), but especially the ruler of a small or vassal state, or member of royal family, or title of nobility ranking first below 'king' or in several countries below 'duke'. The title is also sometimes used with special reference to the heir to the throne, as Lat. *prīnceps* (after *Augustus*), NE *Prince of Wales* (which has a particular historical background), NHG *kronprinz*, etc., but this notion is more commonly expressed otherwise, as NG διάδοχος 'successor', Fr. *dauphin* (based on a personal name), or phrases with 'heir'. Cf. NED and Encycl. Brit. s.v. *prince*.

In earlier times the nearest equivalents would be words for 'king', which were often used where we should render 'prince' (so Grk. βασιλεύς, Lat. *rēx* with dim. *rēgulus*, Skt. *rājan-*, etc.), or words for 'ruler, leader' (so Grk. ἄρχων in the Bible commonly rendered 'prince'), or words for 'a noble' (as ON *ǫðlingr*, OE *æþeling*, etc.).

Lat. *prīnceps* is the source of the majority of the Eur. words, either directly or in translation (OHG *furisto*, NHG *fürst*, etc.). But the Slavic group (also Lith.) represents an early borrowing from the Gmc. word for 'king'.

1. Grk. ἄρχων 'ruler' (pple. of ἄρχω 'rule', 19.31), in various technical applications and freq. in the Bible, where it is rendered as 'prince' in modern versions (NE *prince*, NHG *fürst*, etc.). In Byz. writers it is the usual equivalent of the Slavic terms (below, 6).

NG (beside πρίγκιπας, below) βασιλόπουλο 'king's son', the pop. 'prince' of fairy tales.

2. Lat. *prīnceps*, fr. **prīmo-caps* cpd. of *prīmus* 'first' and *capere* 'take', hence as adj. 'taking first place, first, most distinguished' and as sb. 'principal person, chief', later 'ruler' (applied to the emperor, sometimes to the heir to the throne).

Hence NG πρίγκιψ, pop. πρίγκιπας; It., Sp. *principe*, Fr. *prince* (> Rum. *prinţ*, Br. *priñs*, ME, NE *prince*, etc., common to all modern Gmc. languages).

3. Ir., NIr. *flaith* 'ruler, prince' : Ir. *foln-* 'rule', etc. (19.31).

W. *gweledig* (obs.), MBr. *gloedic*, a kind of 'prince' or 'duke', deriv. of W. *gwlad*, etc. 'country'. Loth, RC 33.352 f.

4. OHG *furisto*, MHG *vürste*, NHG *fürst*, Du. *vorste* (MLG *vurste* > Dan. *fyrste*, Sw. *furste*), sb. fr. superl. adj. OHG *furist* 'first', etc. (13.33). Weigand-H. 1.603. Falk-Torp 286.

OHG *hēristo, hērōsto*, superl. of *hēr* 'excellent, distinguished, venerable' (NHG *hehr*) = OE *hār* 'gray, gray-haired, venerable' (NE *hoar*). Cf. OHG *hē(r)ro*, NHG *herr* 'master' (19.41).

Grk. ἄρχων in NT (see above, 1) is rendered in Goth. by *reiks* (loanword fr. Celtic, see 19.32); in OE by *ealdor* (lit. 'elder') and *ealdorman*.

5. Lith. *kunigaikštis* : *kunigas* 'priest, pastor' (secondary sense, as in Pol. *ksiądz*, formerly 'prince' and 'priest'), loanword fr. Gmc., OHG *kuni(n)g* 'king', etc. See below, 6.

6. ChSl. *kŭnęzĭ*, SCr. *knez*, Boh. *kníže*, Pol. *książę* (Boh. *kněz*, Pol. *ksiądz*, now only 'priest'), Russ. *knjaz'* (> Lett. *kn'azs*), early loanword fr. Gmc., OHG *kuni(n)g*, etc. 'king', but prob. reflecting an earlier less specific use of the latter (19.32). Berneker 663. Brückner 277. Stender-Petersen 200 ff.

19.352. Note on some other titles of nobility.

1. Duke. Lat. *dux* 'leader', esp. 'military leader, general'. Hence as title OFr. *ducs*, Fr. *duc* (> ME *duc*, NE *duke*), etc. In the Gmc. languages rendered in its old sense as 'army-leader' (cf. words for 'army' and 'lead', 20.15, 10.64), OE *heretoga*, OHG *her(i)zogo* (these not yet titles), NHG *herzog* (> Russ. *gercog*), Du. *hertog*, Dan. *hertug*, Sw. *hertig;* and so in Slavic, ChSl. *vojevoda* (fr. *vojĭ* 'army' and the root of *vedą, vesti* 'lead'), etc., of which SCr. *vojvoda* and Boh. *vévoda* are used for 'duke'. But Pol. *książę* 'prince' (19.35) is also used for 'duke', and not only Pol. *wielki książę*, but also Russ. *velikij knjaz'* for 'grand duke', (though Russ. *gercog* is the reg. word for a foreign duke).

2. Count. Lat. *comes*, gen. *-itis* 'companion' (*com-* and the root of *īre* 'go'), in late Lat. a title of various state officials. Hence OFr. *cunte, conte*, Anglo-Fr. *counte* (> NE *count*), etc.

The corresponding native English title is ME *eorl, erl*, NE *earl* (but the earl's wife is a *countess*), fr. The majority of the words for 'citizen' are derived from those for 'city' (19.15) and meant orig. 'city dweller', the political sense of 'citizen' (vs. 'alien, subject', etc.) being secondary. This use of Grk. πολίτης beside πόλις 'city' but also the 'city-state', and of Lat. *cīvis* beside *cīvitās* (though here the *cīvis* is the earlier) doubtless influenced the formation and use of the other Eur. words.

A few of the words are derived from verbs for 'dwell' and so meant orig. 'inhabitant'. One is derived from a word for 'community'.

1. Grk. πολίτης, and ἀστός (latter less common, and at Athens 'city dweller' with only civil rights in contrast to πολίτης), fr. πόλις and ἄστυ 'city' (19.15).

2. Lat. *cīvis*, whence *cīvitās* 'citizenry, state', late 'city' and Romance words for 'city' (in part obs., 19.15), whence again derivs. for 'citizen', It. *cittadino*, Fr.

citoyen, Sp. *ciudadano*, Rum. *cetăţean* : Goth. *heiwa-frauja* 'master of the house', OE *hīw-rǣden*, Lith *šaima*, etc. 'household, family' (2.82). Extension fr. 'member of the household' to 'member of the city or state'. Cf. *hostis* 'stranger' > 'enemy'. Walde-P. 1.359. Ernout-M. 191 b. Walde-H. 1.224.

3. Ir. *cathrar* (Sg 28a8, 33a10), NIr. *cathruightheoir*, fr. Ir. *cathir*, NIr. *cathair* 'city'.

NIr. *saorānach*, lit. 'freeman', fr. *saor* 'free' (19.44).

W. *dinesydd*, fr. *dinas* 'city'.

Br. *keodedour, keodedad*, derivs. of *keoded* 'cité', MBr. *queudet*, fr. Lat. *cīvitātem*. Loth, Mots lat. 149.

4. Goth. *baurgja* (= πολίτης Lk. 15.15, 19.14), ON *borgarmaðr* (with *maðr* 'man'), OE *burhsittend* (with pple. of *sittan* 'sit, dwell'), less usually *burhware* = Du. *burger* (MLG *borgere* > Dan. *borger*, Sw. *borgare*), OHG *burgāri*, MHG *burgære*, NHG *bürger*, formed with the suffix *-wari* (as in Germano-Lat. *Chasuarii*, etc.), fr. the older Gmc. word for 'city', Goth. *baurgs*, etc. (19.15). Falk-Torp 94. Kluge-G. 87. From the same source also ME *burgeis*, fr. OFr. *burgeis*, late Lat. *burgēnsis*. NED s.v. *burgess*.

OE *ceasterware, ceastergeware*, fr. *ceaster* 'city'. For the suffix, cf. above.

ME *citesein*, NE *citizen*, fr. Anglo-Fr. *citeseyn* beside OFr. *citean* (Fr. *citoyen*, above, 2). NED s.v. *citizen*.

5. Lith. *pilietis* (neolog.), Lett. *pilsuonis*, derivs. of Lith. *pilis* 'castle, fort', old 'city', Lett. *pils* 'castle, stronghold' (cf. Lett. *pilsēta* 'city', 19.15).

6. ChSl. *žiteljĭ* (= πολίτης Lk. 15.15), lit. 'inhabitant' : *žiti* 'live, dwell' (7.11).

ChSl. *graždaninŭ* (> Russ. *graždanin*), SCr. *građanin*, fr. ChSl *gradŭ*, etc. 'city' (19.15). Berneker 330.

Boh. *občan*, fr. *obec* 'community' = Pol. *obec* 'totality' (: ChSl. *obĭštĭ* 'common', etc., Meillet, Études 381).

Pol. *obywatel*, lit. 'inhabitant', fr. *obywać* 'live, inhabit' (7.11).

7. Skt. *pāura-* and *nāgara-* (both 'city dweller' without political sense), fr. *pura-* and *nagara-* 'city'.

Words for 'subject' (here, of course, in the political sense) are mostly adjectives, used also as nouns, meaning orig. 'put under' or (in Grk., followed in Goth.) 'obedient'. A few are from other sources, as through 'tenant' from 'hold' or 'repay', or through 'servant' from 'bind'.

1. Grk. ὑπήκοος, orig. 'obedient', but reg. word for 'subject' (adj. and sb.) : ἀκοή 'hearing', ἀκούω 'hear, listen to' (15.41). Boisacq 37.

2. Lat. *subiectus* (> Fr. *sujet*), pple. of *subicere* 'throw under', whence 'subject, subdue', cpd. of *iacere* 'throw'.

Under 'master' we have in mind especially 'master' vs. 'slave, servant', and in several of the words this was in fact the primary sense, as shown by the etymology (connection with words for 'house') or the actual use. But most of them have a wider scope, and it is not intended to restrict the group wholly to that special sense.

The semantic sources are diverse, as (besides the connection with 'house') 'powerful, chief, first, protector', etc.

Included in the list are several words which (like NE *lord*) were once in common use for 'master, lord' (cf. e.g. translations of NT, Lk. 12.43 ff., etc.), but are now mostly 'Lord' or titles like 'Sir' or 'Mr.'.

The eccl. use of words of this group, as 'Lord', goes back ultimately to the Jewish substitution of Hebr. *adōnāi* for the 'ineffable name *Yahweh*'. This substitute name was faithfully rendered in the LXX by κύριος, followed by Lat. *dominus* (> Rum. *Domn*, or *Dumnezeu*, fr. voc. *domine deus;* but It. *Signore*, Fr. *Seigneur*, Sp. *Señor*), Goth. *frauja*, OE *drihten* (not *hlāford*), OHG *truhtin* (not *hērro*, but NHG *Herr*), ChSl. *gospodĭ*, etc. Some became restricted to this use, as Rum. *Domn*, Lith. *Viešpats* (but also 'ruler'), SCr. *Gospod*, Russ. *Gospod'*, Boh. *Hospodin*.

Words of this group furnish also most of the modern Eur. terms corresponding to NE *Mr.* (*mister*, orig. *master*), as NG κύριος, It. *Signor*, Fr. *Monsieur*, Sp. *Señor*, Rum. *Domn*, NHG *Herr*, Du. *Heer*, Dan., Sw. *Hr.*, Lith. *Ponas*, Boh. *Pán*, Pol. *Pan*, Russ. *Gospodin*, etc.

There is some overlapping between 'slave' and 'servant' (19.43). A word for 'slave' may cover also or eventually denote simply 'servant' (cf. Lat. *servus* and its derivs.). Conversely some of the words listed under 'servant' applied to servants who were in fact slaves (as Lat. *famulus, ancilla*). For older periods there is no such sharp distinction as later, and the assignment of certain words (esp. some of the old Gmc.) to one or the other group is bound to be somewhat arbitrary.

Words for 'slave' are cognate with words for 'house, oppress, work, trouble, distress, quick', etc., while some are of wholly doubtful origin. The widespread modern Eur. word, NE *slave*, etc., was originally a 'Slav', the use of which for 'slave' goes back to Byzantine times when so many Slavs were taken captive and enslaved. Analogous is the use of OE *Wealh* 'Briton' for 'slave'. In general on words for 'slave' and 'servant', cf. Brugmann, IF 19.377 ff.

Most of the words for 'servant' have parallel forms for 'female servant', of which no notice is taken here. But a few distinctive terms for the latter are included (marked fem.), to which might be added NHG *magd*, Du. *meid*, etc. = NE *maid* also in part so used.

The words are often cognate with those for 'slave, serve, boy', but are also from diverse other sources. Besides those included in the list, the words for 'boy' and 'girl' (2.25, 2.26) are widely used, and often the most popular terms, for the male or female servant. So sometimes those for 'man' (2.1), as Lat. *homō* (*homō Quintī*, Cic., etc.; cf. deriv. OFr. *homage* > ME, NE *homage*), ON *maðr*, NE *man* (NED s.v., 10), etc.

'Free' is understood here in its primary social and political application to one who is not a slave and enjoys civil liberty. But most of the words have also many of the secondary uses characteristic of NE *free* (NED s.v. 1–32).

These adjectives are the sources of the nouns for 'freedom, liberty' (or conversely in Slavic) and the verbs for 'free, liberate'.

1. Grk. ἐλεύθερος, Lat. *līber* (> It. *libero*, Fr., Sp. *libre;* Rum. *liber* neolog.), Pael. *loufir* (cf. Fal. *loferta* 'liberta'), fr. **leudhero-*, prob. deriv. of the stem in OE *lēod*, OHG *liut* 'people, nation' (19.22), hence orig. 'belonging to the nation, native' (vs. 'captive' or 'slave'). Walde-P. 2.417. Ernout-M. 544 f. Walde-H. 1.791 f.

2. Rum. *slobod* (in modern lit. replaced by *liber*), fr. Slavic (below, 6).

MLat. *francus* (It., Sp. *franco*, Fr. *franc*, formerly used for 'free' vs. 'slave', now mostly 'free' in other senses), same word as the name MLat. *Francus*, etc. 'Frank'.

3. Ir. *sōir, saer*, NIr. *saor*, beside *dōir, daer* 'unfree' (cf. *sōir* et *dōir* Wb. 27c15), cpds. of *so-* 'good' (Skt. *su-*) and *do-* 'bad' (Skt. *dus-*), second part perh. **wiro-* 'man' (Ir. *fer*, etc.). Stokes 280.

W. *rhydd* : Goth. *freis*, etc. (below, 4).

Br. *frank* ('vast, open' and 'free', cf. *frankiz* 'freedom'), fr. Fr. *franc* (above, 2).

4. Goth. *freis*, OE *frēo*, etc., general Gmc. (but only cpd. in ON *frjāls* = *frī-hals* 'free-necked', cf. Goth. *freihals*, OE *frēols* 'freedom', etc.; NIcel. *frī*, Dan., Sw. *fri*, fr. MLG *vrī*, Falk-Torp 273) : Goth. *frijōn* 'love', Skt. *prī-* 'please', *priya-* 'dear', etc., also W. *rhydd* 'free'. Walde-P. 2.86 f. Feist 167 f. Kluge-G. 173. NED s.v. *free*.

5. Lith. *laisvas* : *leisti* 'let, permit' (19.47). Leskien, Ablaut 276, Bildung d. Nom. 344 f.

Lett. *svabads* (mostly 'loose, slack, tired', but also = *brīvs*), fr. Slavic, ChSl. *svobodĭ*, etc. (below, 6). Mühl.-Endz. 3.1139.

6. ChSl. *svobodĭ* (indecl.), SCr. *slobo-*

dan, Boh. *svobodný* (Pol. *swobodny* now mostly 'free' = 'at leisure', etc.), Russ. *svobodnyj*, fr. sb. ChSl. *svoboda* 'freedom', etc. : OPruss. *sups*, acc. *subban* 'self, own', Goth. *sibja*, OE *sib(b)* 'kinship, kin', etc., all fr. the pron. stem **s(w)o-*. Walde-P. 2.456. Trautmann 291. Brückner 528.

Pol. *wolny*, Russ. *vol'nyj* : ChSl. *volja* 'will' (cf. Pol. *niewolnik*, Russ. *nevol'nik* 'slave', 19.42).

7. Skt. *svādhīna-* : *svadhā-* 'peculiarity, custom', Grk. ἔθος 'custom', etc., fr. the pron. stem **s(w)o-* (cf. ChSl. *svobodĭ*, above, 6).

Verbs for 'command, order' are based on such diverse semantic sources as 'drive, urge, incite, intrust, arrange, put in order, point out, make known, announce, will', etc., all with acquired imperative force.

1. Grk. κελεύω, orig. 'urge, drive on' : κέλλω 'drive (a ship to land), put to shore', κέλης 'courser', Lat. *celer* 'swift', Skt. *kal-* 'drive', etc. Walde-P. 1.442. Boisacq 431.

Grk. προστάσσω, ἐπιτάσσω, cpds. of τάσσω 'arrange, appoint', esp. 'draw up (an army in battle order)'; similarly διατάσσω in class. Grk. chiefly in sense of simple verb 'appoint, draw up', but NG διατάζω and προστάζω the usual words for 'command'.

2. Lat. *iubēre*, prob. orig. 'set in motion, incite' (cf. Grk. κελεύω) : Lith. *judėti* 'move (tremblingly), be in motion', *judinti* 'move' (trans.), Pol. *judzić* 'excite, seduce', Skt. *yudh-* 'fight' (but *ud-yudh-* 'boil up, go off in anger'). Walde-P. 1.204. Ernout-M. 500. Walde-H. 1.725.

Lat. *imperāre*, cpd. of *parāre* 'prepare, procure'; semantic development 'prepare, arrange', whence 'put in order' and thence 'command' (cf. Grk. προστάσσω, etc., above, and It. *ordinare*, below). Ernout-M. 478. Walde-H. 1.683.

It. *comandare*, Fr. *commander*, Rum. *comanda* (neolog.), fr. MLat. *commandāre*, for *commendāre* 'intrust, commend to, recommend', cpd. of *mandāre* 'commit to one's charge, enjoin, command' (> Sp. *mandar*), fr. **mandhā-* (cf. The majority of the words for 'obey' are the same as, or connected with, words for 'hear' or 'listen'. Other semantic sources are 'be persuaded', 'follow', 'stand by'.

1. Grk. πείθομαι, also 'believe', lit. 'persuade oneself, be persuaded', mid. of πείθω 'persuade' : Lat. *fīdere* 'trust', *fīdus* 'faithful', etc. (16.65, 17.15).

Grk. ἀκούω 'hear' (15.41), but also 'listen to, obey', so already in Hom., and common in pop. NG; cpd. ὑπακούω 'listen to, give ear', class. also freq. 'obey' and reg. lit. NG in the latter sense.

2. Lat. *oboedīre* (> It. *obedire*, Fr. *obéir*, Sp. *obedecer*), cpd. of *audīre* 'hear' in an earlier form (15.41), but phonology still difficult. Ernout-M. 86, 693 f. Walde-H. 1.80. REW 6016.

Lat. *pārēre* 'appear, be present', whence 'be present at one's command, obey', perh. : Grk. (rare) πεπαρεῖν 'show'. Walde-P. 2.6. Ernout-M. 733.

Rum. *asculta*, fr. Lat. *auscultāre* 'listen' (15.42).

Many of the words for 'let, permit' coincide, or are cognate, with those for 'leave' (12.18) or 'let go, release' (11.34), that is, meant originally 'leave free to do'. Other sources are such notions as 'give a place to', 'suffer, endure', 'be well disposed to, trust'. For some special forms meaning 'is permitted, may', like Lat. impers. *licet*, see 9.96.

1. Grk. ἐάω, fr. *ἐϝάω (cf. ἔβασον· ἔασον and εὖα· ἔα Hesych.), etym. dub. Walde-P. 2.472. Boisacq 211.

Grk. ἐφίημι, cpd. of ἵημι 'send, throw' (10.25), hence 'send to, let go, give up' and also 'permit'.

Grk. ἐπιτρέπω, cpd. of τρέπω 'turn' (10.12), hence 'turn over to, intrust', and also 'permit' as reg. in NG.

NG ἀφίνω 'leave' (12.18), also pop. word for 'let, permit'.

2. Lat. *sinere*, earlier sense 'place', seen in *situs* 'placed' and the cpd. *pōnere* 'place' (12.12), but root connections dub. Walde-P. 2.461. Ernout-M. 945 f.

Lat. *permittere* (> It. *permettere*, Fr. *permettre*, Sp. *permitir*, Rum. *permite*; NE *permit*), cpd. of *mittere* 'send', orig. 'throw, let loose' (10.63), hence 'let go, intrust' and 'let, permit'.

Lat. *patī* 'suffer, endure' (cf. 16.31), also 'permit', as likewise Fr. *souffrir*, NE *suffer* (now arch. or dial. in this use, cf. NED).

It. *lasciare*, Fr. *laisser*, Sp. *dejar*, Rum. *lăsa*, all 'leave' (12.18) and 'let, permit'.

3. Ir. *lēicim*, NIr. *leigim* : Grk. λείπω 'leave', etc. (12.18).

Ir. *cetaigim*, NIr. *ceaduighim*, fr. *cet* 'permission,' abbr. of *lecet* (e.g. Ml. 69a23), this fr. Lat. *licet* or *licitum*. K. Meyer, Ber. Preuss. Akad. 1914. 939. Pokorny, Z. celt. Ph. 18.159.

Br. *lezel*, also 'leave', fr. Fr. *laisser* (12.18).

4. Goth. *lētan*, OE *lǣtan*, NE *let*, OHG *lāzan*, etc., general Gmc. 'leave' (12.18), and 'let, permit', with partial dominance of latter sense as in NE *let*, and esp. cpds. Dan. *tillade*, Sw. *tillåta*, Du. *toelaten*, NHG *zulassen*.

Goth. *uslaubjan*, ON *leyfa*, OE *lȳfan*, ME *leve* (cf. NE sb. *leave* 'permission' and vb. *leave* in U.S. locally = 'let, permit'), Du. *veroorloven*, OHG *irlouben*, MHG *erlouben*, NHG *erlauben* : Goth. *liufs* 'dear', OE *lufian* 'love', Skt. *lubh-* 'desire', etc. Sense 'permit', prob. through 'be well disposed to, trust'. Cf. the development of the same root in Goth. *galaubjan* 'trust, believe', NHG *glauben*, NE *believe*, etc. Walde-P. 2.419. Falk-Torp 656 f.

OE *þafian* (also 'submit to, endure'), perh. : Grk. τόπος 'place' (but no trace of a Gmc. cognate of this), with development as in NHG *gestatten* (below). Walde-P. 1.743.

5. Lith. *leisti*, pres. *leidžiu* 'let go, let loose' and 'let, permit' : Lett. *laist* 'let loose, let', Goth. *lētan* 'leave, let', etc. (**lēid-* beside **lēd-*). Walde-P. 2.395.

Lett. *l'aut*, *at-l'aut* : Lith. *liautis* 'cease', Goth. *lēwjan* 'give over, betray', all fr. a common notion of 'leave, give up'. Walde-P. 2.405. Mühl.-Endz. 2.533.

Lith. *duoti* 'give' (11.21) is also used for 'permit', likewise ChSl. *dati* (e.g. Gospels, Mk. 5.19, Lk. 4.41).

6. Lith. *pavelyti*, Lett. *atvēlēt*, ChSl. *povelěti*, SCr. *dozvoliti*, Boh. *dovoliti* (also *po-*), Pol. *pozwolić* (also *doz-*), Russ. *pozvolit'*, cpds. of Lith. *velyti* 'wish', ChSl. *velěti* 'order', etc. : Lat. *velle* 'wish', etc. Cf. NHG *bewilligen* 'grant, permit'.

ChSl. *ostaviti* 'leave' (12.18), also 'permit' (e.g. Mk. 24.43).

Boh. *nechati*, lit. 'not care, not mind', neg. cpd. of **chati* : SCr. *hayati* 'care, mind'. Berneker 382.

Russ. *razrešit'* 'resolve, solve' and 'permit', cpd. of *rešit'* 'resolve, solve, decide' (17.39).

7. Skt. *anu-jñā-*, cpd. of *jñā-* 'know, recognize', hence 'give recognition to, assent, permit'.

There seems to be no special Av. vb. for 'permit', but it may be expressed by the use of a modal form of the vb. denoting the action permitted, e.g. *kaṭ tā vastra hąmyūta* (infin.), lit. 'are the clothes to be used?' = 'is it permitted to use the clothes?' Barth. 1810.

Words for 'compel' are cognate with words for 'necessity, force, drive, press, bind'. But the notion may also be expressed by verbs for 'put, place' or 'make' in causative use, the latter being in fact the most common expression in NE colloquial speech (*make him stop*). In Indo-Iranian there is no distinctive verb for 'compel', which is rather expressed by the causative forms. In several modern Eur. languages there is a wealth of terms, with some differences of nuance (ranging from the strong 'force, compel' to the milder 'urge') or style, which are ignored here.

1. Grk. ἀναγκάζω, fr. ἀνάγκη 'necessity' (9.93).

Grk. βιάζω 'force', sometimes = 'compel', as freq. in NG, fr. βία 'force'.

2. Lat. *cōgere* 'drive together, collect, compress' and 'compel', cpd. of *agere* 'drive'. Ernout-M. 27.

Lat. *compellere* 'drive together, collect' hence also 'impel, compel' (> OFr. *compeller*, Sp. *compeler*, lit.), cpd. of *pellere* 'drive'. Ernout-M. 749.

Lat. *constringere* 'bind together, compress, restrain', sometimes 'compel' (> It. *costringere*, OFr. *constraindre*, Fr. *contraindre*, Sp. *costreñir;* Rum. *constrînge*, neolog. after Fr., It.), cpd. of *stringere* 'bind'. Ernout-M. 988. REW 2173.

Words for 'friend' are most commonly cognate with words for 'love' or 'dear'. Some mean also and more originally 'companion'. A curious Lith. popular term for 'friend' means properly 'bee-keeper'.

1. Grk. φίλος, orig. adj. 'dear' (16.28).

2. Lat. *amīcus* (> Romance words, but Rom. *amic* neolog.) : *amāre* 'love' (16.26).

Words for 'enemy', as the opposite of 'friend', are in several cases neg. cpds. of those for 'friend'; or are cognate with words for 'hate', parallel to 'friend' from 'loving'. Some are derived from words for 'against' and so had originally the milder sense of 'opponent, adversary'. Another semantic source is 'alien' or

'exile, outcast'. In a Balto-Slavic group of cognates 'enemy' interchanges with 'misery, miserable, slave, devil, murderer', all from a common pejorative 'wretch' or the like.

1. Grk. ἐχθρός, sb. use of adj. ἐχθρός 'hated, hateful' (so Hom.) and 'hating, hostile' (cf. also ἔχθρα, ἔχθος 'hate'), fr. *ἐξ-τρός, deriv. of ἐξ 'out, forth, from', and so orig. 'alien' or 'exile, outcast'. For suffix *-tro-* beside *-tero-*, cf. Skt. advs. like *tatra* 'there', *anyatra* 'elsewhere', etc., and Grk. ἀλλότριος 'belonging to another, foreign', sometimes 'hostile'. Schwyzer, Gr. Gram. 226. E. Hermann, Gött. Nachr. 1918 ff. (otherwise as to suffix). Walde-P. 1.116.

Grk. πολέμιος 'hostile' (fr. πόλεμος 'war') is also used as sb., esp. pl. οἱ πολέμιοι (also ἀντιπολέμιοι, ἀντιπόλεμοι) for 'enemy in war'. Similarly in lit. NG, where sg. πολέμιος is not restricted to 'enemy' in war.

2. Lat. *inimīcus* (> It. *nimico*, Fr. *ennemi*, Sp. *enemigo*), neg. cpd. of *amīcus* 'friend' (19.51).

Lat. *hostis*, orig. 'stranger' (19.55), then the reg. word for 'enemy' in war.

Words for 'companion' include derivs. of a pron. stem meaning 'one's own', of verbs for 'follow, attend', of adjs. for 'common', and various cpds. of a prefix for 'with'. Most of the last, and some others, originally denoted, as shown by the earliest use or the cognates, a more specific kind of companionship, as in travel, in military service ('having common rations'), in lodging (lit. 'roommate'), in business, in bringing up, etc. Thus NE *fellow* is from a compound of a word for 'property, money' and must have first denoted a 'business partner', while conversely a specialization is seen in the current use of NE *partner* in origin simple 'sharer'.

Certain words or groups covering both 'companion' and 'friend' have been discussed under the latter head (19.51), though the development was 'companion' > 'friend'.

1. Grk ἑταῖρος, for ἕταρος (rare), reformed after fem. ἑταίρα, orig. *ἕταιρα fr. *ἕταρια, prob. fr. refl. pron. stem **s(w)o-*, like Grk. ἔτης 'clansman, citizen', Lat *sodālis* 'companion', ChSl. *svatŭ* 'relative', *svobodĭ* 'free', Skt. *svaka-* 'relative', etc. Walde-P. 2.457. Boisacq 291.

Grk. ἧλιξ, Dor. ἇλιξ, esp. 'companion of the same age', fr. *σϝᾶλιξ, prob. fr. refl. pron. stem **swo-* in form **swā-* (cf. Lat. *tālis*, *quālis*). Walde-P. 2.455. Boisacq 320.

Grk. κοινωνός (also κοινών, Dor. κοινάν), fr. κοινός 'common' (19.64). Walde-P. 1.458. Boisacq 482.

Grk. σύντροφος, orig. 'one brought up together with' (: συντρέφω 'feed together', mid. 'be brought up together'), then esp. 'foster-brother', in NG 'companion'.

2. Lat. *socius*, fr. **sokʷ-yo-s* : Lat. *sequī*, etc. 'follow'. Walde-P. 2.476 f. Ernout-M. 949.

Lat. *comes* (*-itis*), fr. **com-it-*, cpd. of

Owing to their mutual relations, there is much interchange between 'stranger', 'guest', and 'host', especially in the large inherited group, the ultimate root connection of which is quite uncertain. But in such cases it is safe to say that the development was 'stranger' > 'guest' > 'host'.

Outside the inherited group, words for 'stranger' are mostly derived from words for 'from away, outside' or from words for 'country, region' or 'people, nation' with 'other' expressed or understood.

1. IE **ghosti-*. Walde-P. 1.640 f. Ernout-M. 462, 463. Walde-H. 1.660 f., 662 f.

Lat. *hostis*, arch. 'stranger', class. 'enemy', hence *hospes* gen. *hospitis* (**hosti-potis*, last member : Skt. *pati-* 'master', etc. 19.41), orig. 'host', by extension 'guest, stranger' (> It. *ospite*, OFr. *oste*, Fr. *hôte*, Sp. *huesped* 'host' and 'guest', Rum. *oaspe* 'guest'); Goth. *gasts* (renders ξένος but only as 'stranger'), ON *gestr*, OE *giest*, *gist*, ME *gest*, OHG, MHG *gast* 'stranger, guest' (NE *guest*, NHG *gast* 'guest'); ChSl. *gostĭ*, etc. general Slavic, only 'guest'.

Here possibly also Grk. ξένος, Ion. ξεῖνος, Corcyr. ξένϝος as **ghs-enwo-s*. Boisacq 677 f. Walde-H. 1.662 f.

2. Lat. *peregrīnus*, deriv. of *peregrī* 'abroad, away from home', cpd. of *per* 'through' and *ager* 'field, district'. Ernout-M. 22 f.

Lat. *advena* : *advenīre* 'come to, arrive'.

It. *forestiere*, fr. Prov. *forestier* id., deriv. of VLat. **forasticus* 'from the outside', fr. Lat. *foras* 'out of doors, forth, out'. REW 3432.

It. *straniero*, Fr. *étranger* (> Sp. *extranjero*), derivs. of It. *strano*, Fr. *étrange* 'strange', fr. Lat. *extrāneus* (mostly post-Aug.) 'external, strange, foreign', also sb. Rum. *străin*, prob. (not : group above, but) fr. ChSl. *stranĭnŭ* (below, 6). Puşcariu 1651. REW 3098.

3. Ir. *echtrann*, either native deriv. of *echtar* 'outside' (: Lat. *extrā*, etc.) influenced by Lat. *extrāneus*, or directly fr. the latter. Pedersen 2.257. Vendryes, De hib. voc. 137.

NIr. *duine iasachta*, lit. 'strange man'; *iasachta* 'strange, foreign', lit. 'loaned', fr. *iasacht* 'loan' (cf. Laws, Gloss. 468).

W. *dieithr*, fr. MW *dieithyr* 'outside', cpd. of OW *di* 'from' and *eithr* 'beyond' (now 'except, without') : Ir. *echtar*, etc. (cf. above).

W. *estron*, Br. *estren*, fr. Lat. *extrāneus* (above, 2). Loth, Mots lat. 165.

Br. *estranjour*, fr. OFr. *estrange*, Fr. *étranger* (above, 2).

Br. *diavesiad*, deriv. of *diavaez* 'outside', cpd. of *di-* (= OW *di*, cf. above), *a-* 'from, to' and *maez* 'field, plain' esp. in sense of 'country' vs. 'town' (19.13). Henry 95. Ernault, Glossaire 162.

Br. *divroad*, cpd. of *di-* (cf. above) and deriv. of *bro* 'country' (19.11) Cf. *broad* 'countryman'.

4. Goth. *gasts*, ON *gestr*, etc., general Gmc., above, 1.

Goth. *framaþeis*, OE *frem(e)de*, ME *fremde*, OHG *framadi*, MHG *vrem(e)de*, NHG *fremd*, Du. *vreemd*, MLG *vremede* (> Dan. *fremmed*), all adjs. 'strange, foreign', fr. NED s.v. *fremd*.

OE *cuma*, lit. 'a comer' : *cuman* 'come' (cf. Lat. *advena*, above, 2).

ME *strangere*, NE *stranger*, fr. OFr. *estrangier* (Fr. *étranger*, above, 2).

5. Lith. *svetimas* (adj. and sb.), Lett. *svešinieks*, beside Lith. *svečias* 'guest' (earlier also 'stranger'), Lett. *svešs* 'strange, foreign', prob. as orig. 'by oneself, apart', fr. the pron. stem **swo-* 'one's own' (cf. Grk. ἑκάς 'afar', fr. the same stem). Walde-P. 2.457. Mühl.-Endz. 3.1151, 1152.

6. ChSl. *stranĭnŭ*, SCr. *stranac* : ChSl. *strana* 'region' (19.41).

SCr. *tuđinac*, Boh. *cizinec*, Pol. *cudzoziemiec*, Russ. *čužoj*, fr. the adjs. SCr. *tud*, Boh. *cizí*, Pol. *cudzy*, Russ. *čužoj*, ChSl. *tuždĭ*, *štuždĭ* 'foreign, strange', fr. a Slavic **tjudjĭ* (by dissim. **tudjĭ*), fr. the Gmc., Goth. *þiuda* 'people, nation', etc. (19.22), with development 'Germanic' > 'foreign, strange'. Meillet, Études 175. Walde-P. 1.712. Stender-Petersen 187 f.

Pol. *obcy* (mostly adj.), prob. fr. *obec* in *w obec* 'in one's presence' = Boh. *obec* 'community' (fr. *ob* 'about'), but semantic development not clear. Brückner 369.

7. Skt. *vaideçika-*, *videçin-*, derivs. of *videça-* 'another country, foreign country', cpd. of *deça-* 'country' (19.11).

Most of the words for 'guest' are the same as, or cognate with, those once meaning also and more originally 'stranger', and included in the discussion of the latter. They have persisted more widely in the sense of 'guest'. The few others are (like NE *visitor* freq. = *guest*) based on expressions for 'visit, go visiting', these partly from 'go' or 'village'.

1. Words discussed under 'stranger' (19.55).

Grk. ξένος, Lat. *hospes* (> Romance words), OE *giest*, etc., general Gmc., ChSl. *gostĭ*, etc., general Slavic, Lith. *svečias*.

2. NG μουσαφίρης, Rum. *mosafir*, fr. Turk. *müsafir*, fr. Arab. *musāfir* 'voyager, guest'. Lokotsch 1510a.

3. Ir. *ōegi*, NIr. *aoighe*, perh. : Grk. οἴχομαι 'go away', Arm. *ej* 'descent', *ijamen* 'descend', cf. esp. *ijavor* 'guest'. Walde-P. 1.104. Pedersen 1.101.

W. *gwestai*, fr. *gwesta* 'visit' : *gwest* 'inn, lodging, feast', Ir. *feis* 'feast', etc. Walde-P. 1.308. Pedersen 1.80, 2.23.

Br. *ostiziad*, deriv. of *ostiz* 'host' (19.51).

4. Lett. *viesis*, fem. *viešn'a* = Lith. *viešnė* 'female guest'; cf. also vbs. Lith. *viešėti*, Lett. *viešuot* 'be on a visit, be a guest' : Lith. *vieš-pats* 'Lord, sovereign', Goth. *weihs*, Lat. *vīcus* 'village', etc. (19.16). Mühl.-Endz. 4.669 f. Walde-P. 1.231.

Lett. *ciemin'š*, fr. *ciems* 'village' (19.16). Cf. *ciema iet* 'go on a visit', like NHG dial. *ze dorfe gehen* (Grimm 2.1277). Mühl.-Endz. 1.393, 394.

5. Skt. *atithi-* lit. 'wanderer' : *at-* 'go, walk, wander'. Uhlenbeck 5.

'Host', as the correlative of 'guest', is sometimes expressed by the same word, but more often by a cpd. or deriv. as 'one who receives guests'. Other terms are from 'master of the house' used with a reference to his position as 'host', or (the Gmc. group) of doubtful source.

'Host' covered the public host 'innkeeper', and in some cases this has become the most familiar or even the only current use (shown in the list by parenthesis).

1. Grk. ξένος 'stranger' (19.55), 'guest', and sometimes 'host' (as Hom. Il. 15.532, NT Rom. 16.23), but for 'host' usually ξενοδόκος, later -δόχος, 'one who receives guests', cpd. with the root of δέκομαι, Att. δέχομαι 'receive'.

NG ξενοδόχος, now only 'innkeeper' (cf. ξενοδοχεῖον 'hotel'). For 'host' in social sense οἰκοδεσπότης, lit. 'master of the house'.

2. Lat. *hospes*, *-itis*, It. *ospite*, etc. 'host' and 'guest', see 19.55.

Rum. *gazdă*, fr. Hung. *gazda* 'master, landlord, innkeeper'. Tiktin 667.

3. Ir. (perh. nearest approach to 'host') *biatach*, lit. 'a victualer' ('a sort of public victualer . . . who was bound to entertain travellers and the chief's soldiers whenever they came that way', Joyce, Soc. Hist. 2.174) : *biathaim* 'feed, nourish'.

NIr. *ōstōir* 'innkeeper', fr. *ōsta* 'lodging, inn', this fr. ME *ooste*, *oste* id. (NED s.v. *host* sb.[3]). Otherwise 'host' expressed by *fear tighe* 'man of the home', or by some other phrase.

W. *lletywr* 'lodger, innkeeper' (also 'host' in wider sense in NT Rom. 16.23; but now?), cpd. of *llety* 'inn, lodging' and *gwr* 'man'. Other current W. word for social 'host'?

Br. *ostiz*, prob. fr. OFr. *ostisse*, *hostise* 'habitation, tenure d'hôtes'. Loth, Mots lat. 191.

4. Goth. *wairdus*, OHG, MHG, NHG *wirt*, OS *wert*, Du. *waard* (MLG *wert* > Dan. *wært*, Sw. *värd*), perh. : ON *verðr* 'meal', MHG *urte*, *ürte* 'bill, account', but root connection (as : OHG *bewarōn* 'keep', etc., or : OHG *(gi)werēn* 'grant, perform', etc.) wholly doubtful. Walde-P. 1.285. Falk-Torp 1371. Feist 545. Weigand-H. 2.1274. Kluge-G. 694.

ON *hūsbōndi* 'master of the house, husband', but freq. of the master of the house where a guest stays (cf. Fritzner s.v. 2).

ON *gestgjafi* (late and rare), cpd. of *gestr* 'guest' and last member : *gjǫf* 'gift'. Probably reflection of the custom of giving presents to departing guests (cf. Vigfusson, s.v.).

OE word for 'host'? In the Gospels Lk. 10.35 *læc* 'physician' substituted for 'host' (as Lk. 10.34 *lǣcehūs* 'hospital' instead of 'inn').

ME *oste*, *hoste* (rarely also 'guest'), NE *host*, fr. OFr. *(h)oste* (above, 2).

Du. *gastheer*, lit. 'guest lord'.

MHG, NHG *gastgeber*, orig. 'one who gives a banquet' (*gastmahl*).

5. Lith. *šeimininkas*, Lett. *saimnieks*, lit. 'master of the house' : Lith. *šeimyna*, *šeima*, Lett. *saimė* 'family' (2.82).

6. ChSl. *gostinĭnikŭ* (πανδοχεύς 'host' = 'innkeeper', Lk. 10.35), Boh. *hostitel* : ChSl. *gostĭ*, etc. 'guest' (19.56).

SCr. *domaćin*, lit. 'master of the house', fr. *dom* 'house'. Berneker 210.

Pol. *gospodarz* = SCr. *gospodar*, etc. 'master' (19.41). Berneker 335.

Russ. *chozjain* 'master' (19.41) and 'host'.

7. Skt. *gṛhastha-* 'householder, married Brahman conducting his own household', often used (Gṛhyasutras) with especial reference to his duties as 'host', similarly sometimes also *gṛhin-*, both fr. *gṛha-* 'house'.

Skt. *atithipati-*, lit. 'lord of guests' (but only AV 9.6 on the entertainment of guests).

Verbs for 'help' are based on such varied notions as 'go, come, or run to', 'stand by', 'bring with, support', 'take part', 'be able, avail', etc. Some were used first with reference to military aid. But for some of the most important words there is no helpful etymology.

Sometimes there is a differentiation between 'help' to gain something and 'help' out of difficulty (It. *aiutare*, Fr. *aider* vs. *soccorrere*, *secourir*), those with the latter nuance verging on 'save, rescue'.

Apart from the words listed, 'help' in a particular action may be expressed by cpds. with 'with' (Grk. συλ-λαμβάνω, συμ-πράσσω, συμ-μαχέω, etc.), and such words are sometimes used also for the more generic 'help'.

The use of NE *help* in the sense of 'prevent, avoid' (*I can't help laughing*) is a peculiar development (cf. NED s.v. 11) with which we are not concerned here.

1. Grk. βοηθέω, fr. βοāθοέω (attested in Dor.), deriv. of βοηθόος, cpd. of βοή 'cry, shout' in Hom. esp. 'battle-cry' and θοός 'quick, swift', hence in Hom. 'quick to the cry, hastening to battle', later 'helping' and 'helper'. Cf. βοη-δρόμος 'helping'. Walde-P. 1.834. Boisacq 125.

Grk. ὠφελέω 'help', esp. as 'be of serv-

Although 'hinder' and the conclusive or perfective 'prevent' are clearly differentiated in NE *hinder* vs. *prevent* (which are hardly associated in linguistic consciousness), they are more commonly expressed by the same word.

Most of the words originally denoted some more specific impeding or preventive action, e.g. 'fetter, lame, bind, confine, stand in the way, hold back, ward off, delay, mix' (hence 'disturb'), etc. Some mean literally 'come before' or 'be before', hence 'anticipate, forestall' and 'prevent'. The variety of expressions is so great that it is sometimes difficult to judge which are the most generic.

1. Grk. κωλύω, etym. dub., perh. fr. a **κῶλος* = σκῶλος 'stake' (cf. Lith. *kuolas* 'stake'), and orig. 'fasten' a domestic animal (but there is no trace of such literal meaning). Walde-P. 2.591. Boisacq 543.

Grk. ἐμποδίζω, orig. 'catch by the foot, fetter', with adj. ἐμπόδιος, adv. ἐμποδών, orig. 'under foot, in the way', cpds. of πούς, ποδός 'foot'.

Grk. ἐγκόπτω (cpd. of κόπτω 'cut, smite') is in late use 'interrupt, hinder' (NT, etc.).

2. Lat. *impedīre* (> It. *impedire*, Sp. *impedir;* latter restored form; OSp. *empecer* 'injure'), orig. 'fetter' (by the foot, then also 'entangle' by the horns, 'ensnare' by nets, etc.), deriv. of *pēs*, *pedis* 'foot'. Mostly replaced in VLat. by *impedicāre* (> OIt. *impedicare*, Fr. *empêcher*, Rum. *împiedeca*), fr. *pedica* 'fetter'. Ernout-M. 760. REW 4296, -98.

Lat. *obstāre* (> Fr. *ôter* 'remove, deprive'; deriv. *obstāculum* > It. *ostacolo*, OFr. *ostacle*, *obstacle* > ME, NE *obstacle*), lit. 'stand in the way of', cpd. of *stāre* 'stand' and *ob* as in adv. *obviam*, adj. *obvius* 'in the way'. Ernout-M. 982.

Lat. *prohibēre* 'hold back, hinder, prevent', also 'forbid', cpd. of *habēre* 'hold, have'. Ernout-M. 441.

Rum. *opri*, 'withhold, hinder, forbid', fr. Slavic, late ChSl. *oprěti*, SCr. *oprijeti*

'oppose' (cf. Boh., Pol. *odpor* 'resistance'), cpd. of ChSl. *p(ĭ)rěti sę* 'contend, dispute' (cf. *pĭrja* 'strife', 19.62). Tiktin 1091.

3. Ir. *derban* (3sg.), fr. **di-ro-ben-*, opposite of *torban* 'is of service, promotes', OIr. *dororban* 'proficit', fr. **to-ro-ben-*, cpd. of *ben-* 'be', used like Lat. *prō-sum, prōd-esse.* Pedersen 2.445. Somewhat otherwise Thurneysen, Gram. 529.

Ir. *baccaim*, NIr. *bacaim*, also and orig. 'hack, lame', fr. Ir. *bacc*, NIr. *bac* 'crook, hook, shackle', etc. = W. *bach* 'angle, corner', Br. *bac'h* 'crook, hook'. Walde-P. 2.105.

Ir. *coscaim* 'blame' and 'hinder', NIr. *coiscim* 'hinder, prevent, forbid', fr. *con-sech-*, cpd. of *sech-* = IE **sekʷ-* in words for 'point out' and 'say', Lat. *insece*, etc. (18.22). Pedersen 2.618.

NIr. *toirmeascaim* 'hinder, prevent, forbid', fr. Ir. *tairmesc-* in *tarmasca* 'disturb', *tairmescc* 'disturbance', cpd. of *mesc-* 'mix' (: Lat. *miscēre* 'mix', etc.). Pedersen 2.577, 612 ftn. Thurneysen, Gram. 531.

W. *rhwystro*, fr. *rhwystr* 'hindrance, obstacle' : Ir. *riastraim* 'distort', and prob. fr. **reigstro* : W. *rhym* 'bond, bound', fr. the root in Ir. *conriug* 'bind', Lat. *corrigia* 'strap', etc. Walde-P. 2.347 (without W. *rhwystro*, etc.). Pedersen 2.45 (1.87). Morris Jones 140.

W. *atal*, also and orig. 'withhold, stop, check', cpd. of *at-* 'back' and *dal-* 'hold' (11.15). Morris Jones, 186.

Br. *herzel, harzel*, fr. *harz* 'obstacle, limit', etym.? Henry 158.

Br. *mirout* 'guard, preserve' (11.24) and 'prevent'.

'keep back', fr. the adv. seen in Goth. *hindar*, OE *hinder*, OHG *hintar* 'behind'. Falk-Torp 406. NED s.v. *hinder*.

Dan. *hemme*, Sw. *hämme*, MHG, NHG *hemmen* 'obstruct, restrain, hinder' = ON *hemja* 'restrain', Salic Frank. *chamian* 'press', ME *hemme*, NE *hem* 'confine' (now mostly *hem in;* NED s.v. *hem* v.[1] 3) : OE *hem* 'border', OE, OFris. *ham*, LG *hamm* 'inclosed land, pasture, meadow', Lith. *kamuoti* 'press, oppress', etc. Walde-P. 1.388. Falk-Torp 396.

Dan. *forbygge*, Sw. *förebygga*, cpds. of *bygge, bygga* in their earlier sense of 'dwell' or 'be', hence 'forestall, prevent'.

Sw. *förekomma*, Du. *voorkomen*, lit. 'come before', hence 'forestall, prevent'.

NE *prevent*, in earlier use 'act beforehand, anticipate, forestall', fr. pple. of Lat. *praevenīre* 'come before, anticipate' and also 'prevent'. NED s.v.

NHG *vorbeugen*, lit. 'bend forward', hence 'avert, prevent'.

5. Words for 'custom' ('customs' of a people, etc.) are most commonly derived from words for 'one's own' or 'be accustomed to, use, usual' ('usual' in one case from 'known'). A few seem to be connected with words of emotional value (ChSl. *nravŭ*, perh. Lat. *mōs*), in which case they must have first denoted mental habits. Words for 'way, manner' (9.992), most of them not included in

this list, may also be used in the sense of 'custom', like NE *manners and customs* of a people, *folk-ways.*

1. IE **s(w)ĕdh-*, deriv. of the refl. pron. stem **s(w)o-* in Skt. *sva-* 'own', Grk. ὅς 'his, her', etc. Walde-P. 2.456. Falk-Torp 1230.

Grk. ἔθος (whence late adj. ἔθιμος 'customary' and sb. ἔθιμον, the usual NG word) and ἦθος (in pl. also 'accustomed places, haunts'; only so in Hom.); Goth. *sidus*, ON *siðr*, Dan. *sæd*, Sw. *sed*, OE *sidu*, Du. *zede*, OHG *situ*, MHG *site*, NHG *sitte*; Skt. *svadhā-* (Vedic, also 'one's own power, pleasure, share', etc.).

2. Grk. νόμος, in early use often 'custom', hence 'law' (21.11) : νέμω 'deal out, allot', Goth., etc. *niman* 'take'. Walde-P. 2.330. Boisacq 662 f.

Grk. δίκη, in Hom. 'way, custom, right', hence later 'lawsuit' (21.13) : δείκνῦμι 'point out', Skt. *diç-* 'point out', sb. *diç-* 'direction', etc. Walde-P. 1.776. Boisacq 170.

3. Lat. *mōs* (pl. *mōrēs* > Fr. *mœurs*), etym. dub.; possibly (with extension from mental habits) : Goth. *mōþs* 'anger', OE *mōd* 'mood', etc. Walde-P. 2.239. Ernout-M. 633 f.

Lat. *cōnsuētūdō* (> It. *costume*, Fr. *coutume*, Sp. *costumbre*), fr. *cōnsuēscere*, cpd. of *suēscere* 'become accustomed, be used to', prob. fr. the same root as Grk. ἔθος, etc. (above, 1). Walde-P. 2.456. Ernout-M. 997.

It., Sp. *usanza*, OFr. *usance*, fr. *usant-*, pple. stem of VLat. **ūsāre* (It. *usare*, Fr. *user*, etc.) for *ūtī* (past pple. *ūsus*) 'use' (9.243). REW 9093. Gamillscheg 875.

Fr. *usage*, deriv. of *us* (rare, only *les us et les coutumes*), Lat. *ūsus* 'use, exercise', also 'habit, custom' : *ūtī* 'use'. REW 9099. Gamillscheg 875.

Rum. *obiceiŭ*, fr. the Slavic, cf. ChSl. *obyčaj*, etc. (below, 7).

Rum. *nărav* (arch. or pop.; in modern lit. instead *moravurĭ* pl., re-formation after Lat. *mōrēs*), fr. Slavic, cf. ChSl. *nravŭ*, etc. (below, 7). Tiktin 1035.

4. Ir. *bēs*, NIr. *bēas*, perh. loanword fr. W. *moes* '(good) manners' (for **boes*) = Br. *boaz*, perh. orig. 'peculiarity, eccentricity' : Ir. *baes* 'foolishness', *baeth* 'simple', Gall. *bessu* 'more feritatis', but root connection dub. Pedersen 1.56, 540.

Ir. *gnās* = W. *(g)naws* 'nature, disposition' (> MIr., NIr. *nōs* 'custom') : Ir. *gnāth* 'usual, known' (in NIr. also sb. = *gnās*), W. *gnawd* 'customary' : Lat. *nōtus*, Grk. γνωτός 'known', etc. Pedersen 1.23, 48 f. Walde-P. 1.579.

W. *arfer*, also vb. 'to use, accustom', cpd. of the root **ber-* (IE **bher-*) 'carry' (only in cpds. in Britannic, W. *cymeryd* 'take', etc.). Walde-P. 2.472.

W. *defod*, MW *defawd*, orig.? Cf. *def* 'right, one's own' (in Evans and earlier editions of Spurrell).

Br. *giz*, fr. Fr. *guise* 'manner, way, fashion' (Gmc., OHG *wisa*, NHG *weise*, etc.). Henry 132.

5. Goth. *biuhti*, deriv. of *biuhts* 'accustomed', cpd. **bi-uhta-* : Lith. *j-unkti* 'become accustomed to', ChSl. *učiti* 'teach', Skt. *okas-* 'pleasure, dwelling-place', etc. Walde-P. 1.111. Feist 97.

ON *vani*, Sw. *vana* (Dan. *vane*, mostly 'habit'), in cpds. Dan. *sædvane*, Sw. *sedvänja* (for *sæd, sed*, cf. above, 1), with ablaut OE *gewuna*, OHG *giwona*, MHG *gewone, gewonheit* (Du. *gewoonte*, NHG *gewohnheit*, mostly 'habit'), fr. the adjs. ON *vanr*, OE *gewun*, OHG *giwon* 'accustomed, usual' : ON *una* 'be satisfied with', OHG *wonēn, wonōn* 'be used to, dwell, remain', etc., Skt. *van-* 'wish, desire, get, win', etc. Walde-P. 1.260. Falk-Torp 1350.

Dan. *skik* = Sw. *skick* '(good) condition, (good) form', fr. MLG *schik* 'form, proper condition' = MHG *schic* 'manner, opportunity' : MLG *schicken* 'bring into order, set up, send', MHG *schicken* 'cause, perform, equip, send', etc. (NHG *schicken*). Falk-Torp 993.

OE *þēaw*, ME *thew*, cf. OS *thau* 'custom', OHG *thau* 'discipline', perh. as 'observation' : Lat. *tuēri* 'observe, heed, protect', *tūtus* 'safe', Goth. *þiuþ* 'the good', ON *þȳðr* 'mild, friendly', etc. Walde-P. 1.706. NED s.v. *thew*, sb.[1].

Words for 'strife' may in part cover also 'armed strife', e.g. Grk. ἔρις in Homer, OHG *strīt* commonly and still NHG *streitaxt* 'battle-ax'. But for words in which the notion of violence is dominant, see under 'fight' and 'battle' (20.11, 20.12). Several of the words denoted primarily 'legal strife, litigation', for which see also 21.13.

Besides the words listed, themselves differing in nuance, there are many others, like NE *row* (now the common colloq. term), *brawl, wrangle, squabble*, Fr. *rire*, Rum. *sfordă* (fr. Slavic), NG τσάκωμα, etc.

1. Grk. ἔρις : ὄρνῦμι, ὀρῖνω 'rouse, stir up, incite', Lat. *orīrī* 'rise', Skt. *ṛ-* 'move', *sam-araṇa-* 'strife, battle' (20.12). Walde-P. 1.136 ff. Boisacq 280.

Grk. νεῖκος (mostly poet., but common prose word φιλονεικία 'love of strife, rivalry'; freq. v.l. -νῖκία as if fr. νίκη 'victory'), perh. : Lith. *apnikti* 'fall upon, befall', Lett. *apnikt* 'become bored'. Walde-P. 2.321. Boisacq 660.

NG μάλωμα, also 'scolding, reproof', fr. μαλώνω 'scold, reprove, quarrel', fr. *ὁμαλόω = ὁμαλίζω 'smooth out, make level', deriv. of ὁμαλός 'smooth, level'. Semantic development through 'correct, reprove' to 'scold, quarrel'. Hatzidakis, Einl. 155, Μεσ. 1.140 f.

NG καβγᾶς, SCr. *kavga*, fr. Turk. *kavga* id. Lokotsch 696. Berneker 495.

2. Lat. *līs*, gen. *lītis*, esp. 'a legal quarrel, lawsuit' (21.13) old form *stlīs*, etym. dub. Walde-P. 2.401. Ernout-M. 557. Walde-H. 1.813 f.

Words for 'conspiracy' are most commonly connected with those for 'swear' or 'oath', especially 'swear together', whence 'form a pact or confederacy by oath' and in a bad sense 'conspire against'. There is much semantic borrowing, especially in the case of the Gmc. group. Others are from 'breathe together' (here also both formal and semantic borrowing), 'talk together', 'deceit', with some isolated and partly doubtful sources.

1. From words for 'swear' (21.24) or 'oath' (21.25). Grk. συνωμοσία (: συνόμνῦμι); Lat. *coniūrātiō* (: *coniūrāre*), with the Romance words It. *congiura*, Fr. *conjuration* (> ME *conjuracion*), Sp. *conjuración;* Ir. *comlugae* (lit. 'joint oath', gl. *coniuratione* Ml. 44b5); ON *samsvarning*, Dan. *sammensværgelse*, Sw. *sammansvärjning*, Du. *samenzwering*, OHG *eidswartī* (lit. 'oath-swearing', gl. *coniuratio*), MHG *beswerunge*, NHG *verschwörung;* Lett. *sazvērestība* (: *sazvērēties* 'conspire', cpd. refl. of *zvērēt*, fr. MLG *sweren*); SCr. *urota* (: ChSl. *rota* 'oath').

2. Lat. *cōnspīrātiō* (> It. *cospiracione*, Fr. *conspiration* > ME *conspiracioun;* Sp. *conspiración*, Rum. *conspirațiune;* ME *conspiracie*, NE *conspiracy*), lit. 'a blowing or breathing together', whence 'unity of feeling, harmony' (cf. Grk. σύμπνοια 'agreement', συμπνοή, gl. *conspiratio*), and in bad sense 'conspiracy', fr. *conspīrāre* 'blow, breathe together, agree' and 'conspire', cpd. of *spīrāre* 'blow, breathe' (4.51).

Fr. *complot* (> Rum. *complot*, also It. *complotto*, Sp. *complot*, and more or less usual forms in Gmc., Dan. *komplot*, Sw. *komplott*, Du. *complot*, NHG *komplott*, NE *complot* freq. in 16th.-17th. cent.), earliest sense 'packed crowd', orig. dub., perh. back-formation fr. a **comp(e)loter* 'make into a ball', deriv. of *pelote* 'ball'. Gamillscheg 241 f. Bloch 1.164.

3. Ir. *cocur* 'whisper, secret talk, council' and 'conspiracy' (K. Meyer, Contrib. 408), NIr. in this sense also *cogar* or *cogar ceilge* with gen. of *cealg;* Dinneen, McKenna), vbl. n. of *concuiriur*, cpd. of *cuiriur* 'put, place,

throw'. Cf. W. *cynghor* 'council'. Pedersen 2.500, 501 Anm.

NIr. *cealg*, lit. 'deceit' (Ir. *celg*, 16.68), but also 'plot, conspiracy', also cpd. *coimh-chealg* with *comh-* 'con-'.

W. *cydfwriad*, cpd. of *cyd-* 'con-' and *bwriad* 'design, purpose, intention' (17.41).

Br. *iriénn*, also and orig. 'woof' (in weaving), cpd. of *lien* 'linen'. Cf. Fr. *trame* in similar use. Ernault, Dict. étym. 317.

Br. *kavailh*, prob. fr. Fr. *cabale* 'cabal'.

4. ON *samblāstr*, deriv. of *samblāsa* 'conspire', lit. 'blow together' (translations of Lat. *cōnspīrātiō, cōnspīrāre*).

OE *gecwidrǣden* (gl. *conspiratio*, also 'agreement'), and *gecwis* (gl. *conspiratio*), both : *gecweðan* 'say, speak, arrange, agree'; *rǣden* 'condition, stipulation'. Cf. Goth. *gaqiss* 'agreement'.

NE *plot*, same word as *plot* 'small surface' (*plot of land*) used also for 'plan, scheme', but as 'conspiracy' doubtless influenced by *complot* used only in this sense, and prob. itself also fr. Fr. *pelote* (above, 2). NED s.v. Weekly, Words Ancient and Modern 93 ff.

5. Lith. *sąmokslas*, cpd. of *są-* (*sam-, san-*) 'together, with' and *mokslas* 'knowledge, teaching'.

Lith. *suokalbis* : *su-si-kalbėti* 'discuss, confer', refl. cpd. of *kalbėti* 'speak'.

6. Boh. *spiknutí*, Pol. *spiknienie*, with vbs. Boh. *spiknouti se*, Pol. *spiknać się*, etc. (cf. also Boh. *pikel* 'intrigue'), root connection? Brückner 509 takes from **pik-* in the imitative group Boh. *pikati*, Pol. *pikać*, Russ. *pikat'* 'peep', etc. (Walde-P. 2.70), but without comment on the semantic development (through notion of a secret cabal? Russ. *pikat'* is used also like NE colloq. *don't peep* 'don't utter a sound').

Pol. *spisek*, fr. *spis* 'list, inventory, census' : *spisać* 'write up, make a list, register', etc., cpd. of *pisać* 'write'. Orig. 'list (of conspirators)'. Brückner 509.

Russ. *zagovor*, cpd. of *govor* 'rumor, jargon' = ChSl. *govorŭ* 'noise' (cf. Russ. *govorit'* 'speak', 18.21).

7. Skt. *kapaṭaprabandha-*, cpd. of *kapaṭa-* 'fraud, deceit, cheating' and *prabandha-* 'connection, band, tie'.

'Common' is understood here as 'belonging to two or more', the primary sense, from which are derived words for notions of still more definitely social import, as 'community', 'companion, partner', 'commonwealth', etc.

But various secondary uses such as 'public', 'general', 'frequent' (esp. in NE

common), and especially the derogatory 'common, vulgar, inferior', are 'common' (in sense here intended) to many of the words listed, and in some cases the old words have come to be used mainly or only in the derogatory sense (as NE *mean*, NHG *gemein*, Du. *gemeen*, Dan., Sw. *gemen*).

A cognate group, common to Italic and Germanic (strictly Goth. and West Gmc.), is derived from a root meaning 'change, exchange' mostly with a prefix for 'together'. Others are derived from expressions for 'together' (these in part from 'bind', 'heap', etc.) or various combinations with prefix for 'together'.

1. IE **moini-*, fr. the root **mei-* 'exchange' in Skt. *mayate*, Lett. *mit*, and with *t*-extension, Lat. *mūtāre*, etc. Walde-P. 2.240 f. Ernout-M. 642 f. Walde-H. 1.255. Feist 190 f.

Lat. *commūnis* (> Romance and ME, NE words), OLat. *comoinis*, Osc. *muiniku* (nom. sg. fem.), Goth *gamains*, OE *gemǣne*, ME *imene* (rare; ME *mene*, NE *mean* in secondary senses), OHG *gimeini*, MHG, NHG *gemein*, MLG *gemēn* (> Dan., Sw. *gemen*), Du. *gemeen* (all these now in derogatory sense; in older sense now NHG *gemeinsam* or *gemeinschaftlich*, Du. *gemeenschappelijk*, Sw. *gemensam*); cf. Lith. *mainas* 'exchange', Lat. *mūnus* 'service, office', etc.

2. Grk. *κοινός*, fr. **κομ-ιος* : Lat. *cum*, early *com* 'with'. Walde-P. 1.258. Boisacq 482.

3. Ir. *coitchenn*, NIr. *coitcheann*, cpd. of *com-* 'with' (: Lat. *cum*) and (?) the root of *techtaim* 'own, possess' (11.12). Pedersen 1.327 (without comment on the verbal root).

Br. *boutin*, fr. Fr. *butin* 'booty', through notion of 'common property'. Henry 41.

4. Goth. *gamains*, etc., above, 1.

ON *fēlags* in *til fēlags* 'in common' and cpds. like *fēlagsfē* 'common property', etc., gen. of *fēlag* 'partnership' (cf. *fēlagi* 'partner' late OE *fēolaga*, NE *fellow*), cpd. of *fē* 'property'. So Dan. *fælles*, fr. *fælligs*, gen. of *fællig* = ON *fēlag*. Falk-Torp 288.

ON *sameiginn, sameiginligr*, lit. 'having joint possession', fr. *sam-* 'together' and *eiga* 'own, possess'.

Sw. *gemensam*, see above, 1.

5. Lith. *bendras* (also as sb. 'partner, companion'), fr. IE **bhendh-* 'bind' in Goth. *bindan*, Skt. *bandh-*, etc. (9.16). Walde-P. 2.152.

Lett. *kuopejs, kuopīgs*, fr. *kuopa* 'heap', loc. adv. *kuopā* 'together, in common'. Mühl.-Endz. 2.344 f.

6. ChSl. *obĭštĭ* (SCr. *opći* obs. or dial.; Pol. *obcy* 'strange, foreign'), Russ. *obščij* (fr. ChSl.), fr. **obŭ-tjo-*, deriv. of *obŭ* 'about', formed like Skt. *apa-tya-, upa-tya*, etc. Hence also ChSl. *obĭštĭnŭ*, Boh. *obecný* (Pol. *obecny* 'present, at hand'). Brückner 369 f.

SCr. *zajednički*, fr. *zajedno* 'together, at the same place or time', lit. 'at one', fr. *jedan* 'one'.

Boh. *pospolný, společny* (through *spolek* 'union'), Pol. *spólny, wspólny*, fr. advs. Boh. *spol, pospol*, Pol. *społ, wspól* 'together', lit. Many of the terms for 'meet' are derivatives of, or phrases with, adverbs for 'face to face', 'against', 'in the way', or 'together'. Some are based on notions like 'hit', 'happen on, find', or the like. The source of the Gmc. group (NE *meet*, etc.) is obscure.

1. Grk. *ἀπαντάω, συναντάω*, cpds. of *ἀντάω*, also 'meet' (Hom. etc., but not Att.), fr. adv. *ἄντα* 'face to face', belonging with *ἀντί*, Skt. *anti*, Lat. *ante*, etc. Walde-P. 1.66 f. Boisacq 64.

NG (beside *ἀπαντῶ*, now also 'answer', and *συναντῶ*) pop. *ἀνταμώνω*, fr. adv. *ἀντάμα* 'together', Byz. and dial. *ἐντάμα*, this fr. *ἐν τῷ ἅμα* = *ἅμα* 'together'. Koraes, Ἄτακτα 2.124.

2. Lat. adv. *obviam* 'in the way', used reg. with vbs. (*īre, venīre*, etc.) for 'meet'.

Lat. *occurrere*, cpd. of *currere* 'run', partly 'run against, attack', etc., but also simply 'meet'. Cf. the ambiguous NE *I ran into* (= *collided with* or simply *met*).

It. *incontrare*, OFr. *encontrer* (> ME *encountre*, NE *encounter*), Fr. *rencontrer*, Sp. *encontrar*, fr. Lat. (*in*) *contra* 'against'. REW 4361. Gamillscheg 755.

Rum. *întîlni*, fr. Hung. *talalni* 'hit, come across, meet'. Tiktin 834.

3. Ir. *conriccim* (also 'reach'), cpd. of *riccim* 'come, reach' (cf. *do-iccim* 'come', 11.48).

NIr. *casaim* 'turn, twist' (: Ir. *cass* 'wreathed, twisted', etym. dub.; Walde-P. 1.450. Stokes 57) is used impersonally for 'meet' as *casadh fear liom* 'I met a man', etc. (Dinneen, McKenna). Also similar impers. phrases with *buailim* 'strike', *teagmhaim* 'happen', etc.

W. *cyfarfod*, cpd. of *cyf-* 'together', *ar* 'on, upon', and *bod* 'be'.

Br. *en em gavout*, refl. of *kavout* 'find' (11.32).

4. Goth. *gamōtjan*, ON *mœta*, Dan. *møde*, Sw. *möta*, OE *mētan*, ME *mete*, NE *meet*, Du. *ontmoeten*, outside root connections dub. Walde-P. 2.304. Feist 193 f.

OE *tōgēa(g)nes, ongēn*, etc. 'against' with vbs., used like and prob. modeled on the Lat. phrases with *obviam* (so always, not *mētan*, in the Gospels). Similarly OHG *ingegin* 'against' with vbs. (Otfr., Tat., etc.), but also vbl. deriv. of *gagan* 'against', OHG *begagenen* (esp. Notker), MHG *begegenen*, NHG *begegnen*.

NHG *treffen*, also and orig. 'hit' (OHG *treffan* 'strike, hit', OE *drepan* 'strike', etc., 9.21), now a pop. term for 'meet'. Paul, Deutsches Wtb. Hence Dan. *træffe*, Sw. *träffa* with same uses.

5. Lith. *sutikti* (also refl.), Lett. *satikt*, cpds. of Lith. *tikti* 'fit, suit', Lett. *tikt* 'please' (16.21).

Lett. *sastapt*, cpd., with *sa-* and refl. *s*, of *tapt* 'attain' also 'become' = Lith. *tapti* 'become' (9.92). Mühl.-Endz. 3.745.

6. ChSl. *sŭrěsti*, SCr. *sresti*, Russ. *vstretit'*, cpds. of the same root as in ChSl. *obrěsti* 'find' (11.32).

Boh. *potkati*, Pol. *(s)potkać*, cpds. of the root seen in ChSl. *potŭknąti* 'hit, prick', Pol. *tkać* 'thrust, stick', etc. (: Grk. *τύκος* 'hammer'). Walde-P. 2.615. Miklosich 368. Trautmann 331. Brückner 571.

7. Skt. *āsad-* 'reach, approach, happen on, meet', cpd. of *sad-* 'sit'.

19.71. Note on terms for members of a trade or profession. Most of the more important of these, or words from which they are readily supplied (as 'miller', fr. 'mill'), are included in various other chapters. Thus 'hunter' (3.79); 'herdsman' (3.18); 'farmer' (8.11); 'craftsman, artisan' (9.42); 'carpenter' (9.43); 'smith' (9.60); 'wagonmaker, cartwright, wheelwright' (mostly fr. 'carriage, wagon, cart', 10.75, but also in part generalized from one who makes special parts, as 'wheel' 10.76 or 'frame'; cf. NHG *wagner, radmacher, stellmacher*, Kretschmer, Wortgeogr. 485 f.); 'mason' (9.53); 'potter' (9.71); 'miner' ('mine', p. 608); 'cook' (5.21); 'baker' (mostly fr. 'bake', 5.24; or fr. 'bread', 5.51, as Grk. *ἀρτο-κόπος, -ποιός, -πώλης*, NG *ψωμᾶς*, Sp. *panadero*, Russ. *chlebnik*, etc.; Fr. *boulanger*, OFr. *boulengier*, dial. *boulenc*, fr. MLG *bolle* 'round bread'; fr. 'oven' 5.25, as It. *fornaio*, Sp. *hornero*, NG *φούρναρης*; Lat. *pistor*, orig. 'one who pounds the grain, miller'); 'butcher, (5.612); 'miller' (5.57), 'weaver' (6.33); 'tailor' (6.13), 'shoemaker, cobbler' (6.54); 'sailor' (10.82); 'soldier' (20.17), 'author, writer' (18.62); 'poet' (18.63).

But there seems to be no more appropriate chapter than this in which to include reference to a conspicuous female profession, that of the 'prostitute' (19.72).

For the 'prostitute' there is a wealth of terms, some the more official and legal like NE *prostitute*, some euphemistic (or originally so) like Fr. *courtisane*, NE *courtesan*, Fr. *fille de joie*, and the greatest variety of popular words, of which only the most important are listed here. These latter include words for 'dear one' (so prob. the Gmc. group, NE *whore*, etc.), 'woman, girl, bride', which came to be used in derogatory sense, and opprobrious epithets of diverse sources.

1. Grk. *πόρνη* : *πέρνημι* 'sell' (11.83), hence the female slave sold for prostitution. Walde-P. 2.40. Boisacq 805.

NG *πουτάνα*, fr. It. *puttana* (below, 2).

2. Lat. *meretrīx*, lit. 'one who earns wages' : *merēre* 'earn, gain'. Hence It. *meritrice* (learned form), and by dissim. *meletrix* (Lex Salica), OE *miltestre*, etc. Ernout-M. 609. REW 5523.

Lat. *scortum* 'skin, hide' (4.12), also 'prostitute'; cf. vulg. Fr. *peau*, NHG *balg*. Ernout-M. 909. Hammarström, Eranos 23.104 ff., Glotta 20.203.

Lat. *lupa*, properly 'she-wolf' (fem. to *lupus* 'wolf'). The sense 'prostitute' is preserved in the Romance languages Sp. *loba*, It. *lupa*, and esp. Fr. *louve* (cf. Benveniste, Mélanges Vendryes 55 f.). Ernout-M. 567.

Lat. *prōstitūta* (Plin.+), fem. of pass. pple. of *prōstituere* cpd. of *statuere* 'place', hence lit. 'place in front', in actual use 'expose publicly to prostitution, prostitute'. Hence It., Sp. *prostituta*, Fr. *prostituée*, NE *prostitute*, etc., now virtually an international Eur. official term, together with forms for the institution 'prostitution', e.g. NHG *prostituierte, prostitution*, Russ. *prostitutka, prostitucnja*, and other similar Gmc. and Slavic forms omitted in the list.

OFr. *pute*, Fr. *putain*, Sp. Prov. *puta*, Prov. *putana* (> It. *puttana*), prob. fr. fem. of VLat. **pūttus* (cf. OIt. *putto* 'boy', *putta* 'girl', Lat. *pūtus*, Ernout-M. 829), with derogatory use like that of NHG *dirne*, etc. Diez 259. REW 6890. Otherwise (fr. fem. of OFr. *put*, Lat. *putidus* 'stinking') Gamillscheg 726, Bloch 2.195.

Fr. *courtesane* (> NE *courtesan*), orig. 'woman of the court', in present sense since 16th cent. Wartburg 2.851. NED s.v. *courtesan*.

Sp. *ramera*, Port. *ramiera*, fem. to *ramero, ramiero* 'young bird of prey', lit. 'little branch', fr. *ramo* 'branch' (fr. Lat. *ramus* id.). REW 7035.

Rum. *curvă*, fr. Slavic (below, 6).

3. Ir. *mertrech*, NIr. *mēirdreach*, fr. Lat. *meretrix* (above, 2). Vendryes, De hib. voc. 155.

Ir. *stripach*, NIr. *striopach*, fr. Lat. *stuprum* 'dishonor, disgrace, debauchery' (with metathesis, cf. NE *strumpet*, below). Vendryes, De. hib .voc. 180.

W. *putain*, prob. fr. ME *putaine* (rather than directly fr. Fr. *putain*). Parry-Williams 173.

Br. *gast* = W. *gast* 'bitch', etym.? Loth, RC 36.166 (vs. Morris Jones 139).

Br. *vilgen*, deriv. of *vil* 'bad, ugly' (fr. Fr. *vil*). Henry 276.

4. Goth. *kalkjō* (or *kalki*; only dat. pl. *kalkjōm*), prob. a loanword, but source dub. Feist 307.

ON *hōra* (> OE *hōre*, ME *hore*, NE *whore*), Dan. *hore*, Sw. *hora*, Du. *hoer*, OHG *huora*, etc.; Goth. only masc. *hōrs* 'adulterer, fornicator', with vbs. The sense 'prostitute' could be from 'skin' as in the case of Lat. *scortum* (above), or (so Falk-Torp) through an intermediary 'vagina'. But cf. Hellquist 977 f.

OE *miltestre*, fr. Lat. *meretrīx* (above, 2).

ME, NE *strumpet* prob. fr. OFr. *strupe* beside *stupre* fr. Lat. *stuprum* (cf. NIr. *striopach*, above, 3). Skeat, Etym. Dict. s.v. Wyld, Univ. Eng. Dict. s.v.

ME *putaine*, fr. Fr. *putain* (above, 2).

NE *prostitute*, fr. Lat. *prostitūta* (above, 2).

NE *harlot*, only late ME in this sense, chiefly 'vagabond, beggar, rogue, etc.', fr. OFr. *herlot, (h)arlot* 'lad, knave, etc.' (widespread Romance word of dub. orig.). NED s.v.

Du. *deern*, NHG *dirne* 'girl, lass, wench', but commonly 'prostitute' : MHG *dierne*, OHG *diorna* 'girl, maidservant', deriv. of OHG *deo* 'slave', etc. (19.42). Weigand-H. 1.360. Kluge-G. 106 f.

NHG *metze*, fr. MHG *Metze, Mätze*, orig. pet name for *Mechthild, Mathilde*, but in MHG (14th. cent.) already 'girl' and 15th–16th cent. in present sense. Weigand-H. 2.177. Kluge-G. 389 f.

Verbs for 'fight' (understood here in the military sense, though the words are not so restricted) are most commonly based on the notion of striking, but a few on other forms of violent action including 'hair-pulling'.

1. Grk. *μάχομαι*, with *μάχη* 'battle', *μάχαιρα* 'knife', outside connections dub. Walde-P. 2.227. Boisacq 616, 1118.

Grk. *πολεμέω*, mostly 'make war', but also 'fight' and 'contend, quarrel', NG *πολεμῶ* 'fight, struggle', deriv. of *πόλεμος* 'war' (20.13), in early use also 'a fight, battle'.

2. Lat. *pugnāre* (> It. *pugnare*), orig. 'strike with the fist', but the most general term for 'fight', fr. *pugnus* 'fist'. Ernout-M. 821.

Lat. *proeliārī*, deriv. of *proelium* 'battle' (20.12).

It. *combattere*, Fr. *combattre*, Sp. *combatir*, Rum. *combate*, cpds. of It. *battere*, Fr. *battre*, Sp. *batir*, Rum. *bate* 'strike' (9.21).

Sp. *pelear*, orig. 'pull hair', deriv. of *pelo* 'hair' (Lat. *pilus*). REW 6508.

Rum. (*se*) *lupta* (= It. *lottare*, Fr. *lutter*, Sp. *luchar* 'struggle, wrestle', etc.), fr. Lat. *luctāre*, beside usual *luctārī* 'wrestle, contend' (orig. a gymnastic term) : Grk. *λυγίζω* 'bend, twist oneself'. Walde-P. 2.413. Ernout-M. 564. Walde-H. 1.826 f. REW 5148. Tiktin 934.

3. Ir. *fichim* : Goth. *weihan*, OE *wīgan*, etc. 'fight', Lat. *vincere* 'conquer, win', Lith. *veikti* 'act, work', etc. Walde-P. 1.232 f. Ernout-M. 1109. Feist 557.

Ir. *cathaigur*, deriv. of *cath* 'battle' (20.12).

NIr. *cōmhraicim*, deriv. of *cōmhrac* 'contest, fight', MIr. *comrac* 'encounter, meeting, combat', vbl. n. of *conriccim* 'meet' (19.65). Pedersen 2.556.

NIr. *troidim*, deriv. of *troid*, MIr. *trot* 'a fight, struggle', prob. : W. *trythu* 'swell', OE *þrūtian* 'swell' (with pride or anger), *strūtian* 'swell, struggle'. Walde-P. 2.634. Pedersen 1.160.

W. *ymllad*, cpd. of *ym-* with reciprocal or refl. force and *llad* 'kill, slay', earlier 'strike' (4.76).

Br. *en em ganna*, refl. of *kanna* 'strike' (9.21).

4. Goth. *weihan*, ON *vega*, OE *wīgan* (OHG pple. *wīgant, wīkant*), MHG *wīgen* : Ir. *fichim*, etc. (above, 3).

ON *berjask*, refl. of *berja* 'strike' (9.21).

Dan. *slaas*, Sw. *slåss*, refl. of *slaa, slå* 'strike' (9.21); similarly also NHG *sich schlagen*.

ME *kempe*, Du. *kampen* (MLG *kempen* > Dan. *kæmpe*, Sw. *kämpa*), NHG *kämpfen* (OE *campian*, OHG *champfan*, MHG *kempfen*, chiefly 'fight a duel'), derivs. of OE *camp* 'battle', MHG *kampf*, OHG *campf* 'duel', NHG *kampf* 'battle' (20.12).

The majority of the words for 'battle' are connected with the verbs for 'fight' (20.11) or with others for 'strike, beat', etc. Some are words for 'strife', used also for 'armed strife', and one group shows the development 'field' > 'battle-field' > 'battle'.

1. Grk. μάχη : μάχομαι 'fight' (20.11).

Grk. πόλεμος 'war' (20.13), in Hom. more freq. 'battle'.

2. Lat. *proelium*, perh. fr. **pro-voiliom*, fr. the root in Lith. *vyti, veju* 'pursue, chase', ChSl. *vojĭnŭ* 'soldier', Russ. *vojna* 'war', etc. Boisacq, Mélanges Pedersen 251 ff.

It. *battaglia* (> Rum. *bătălia*), Fr. *bataille*, Sp. *batalla* (Rum. *bătăie* in the older language only 'blow, beating', etc., but now used also like *bătălia* as 'battle'), fr. VLat. *battuālia*, deriv. of *battuere* 'beat' (9.21). REW 995.

Rum. *luptă* (fr. Lat. *lucta* 'wrestling, wrestling-match') is a general word for 'fight, struggle' or esp. 'wrestling-match', not usual for 'battle'. But cf. the corresponding Alb. *luftë* 'war'.

3. Ir. *cath*, W. *cad* (cf. Gall. *Catu-rīges*, etc.) : ON *Hǫðr*, and *Hǫð-* in cpd. names, OE *heaþu-* in *heaþubyrne* 'battle corslet', *heaþulind* 'war-linden' = 'shield', etc., OHG *Hadu-brand*, etc., MHG, NHG *hader* 'quarrel, strife', ChSl. *kotora* 'battle'. Walde-P. 1.339.

Ir. *āg* : Skt. *āji-* 'race, contest', *aj-* 'drive', etc. Pedersen 1.101. Walde-H. 1.24.

Ir. *gleo*, perh. fr. **gliwā-* : Skt. *jri-* 'spread out to, overpower'(?). Thurneysen, Z. celt. Ph. 20.364 ff.

Ir. *irgal*, NIr. *iorghail*, cpd. : *gal* 'bravery' (16.52). Pedersen 1.101, 358.

W. *brwydr* = Ir. *briathar* 'word', with W. development through 'battle of words'? But root connection and primary sense uncertain. Walde-P. 1.687, 2.194. Pedersen 2.45.

Br. *kann*, back-formation to *kanna* 'strike' (after Fr. *bataille* : *battre*?); similarly *emgann*, back-formation to *en em ganna* refl. 'fight'.

4. Goth. *waihjō*, ON *vīg*, OE, OHG *wīg*, MHG *wīc* : Goth. *weihan*, ON *vega*, etc. 'fight' (20.11).

ON *orrosta*, prob. as orig. 'unrest' cpd. of *or-* 'out' (Goth. *uz-*, etc.) and a form corresponding to OHG *rasta* 'rest, period of time', OE *ræst* 'rest, resting place', etc. Noreen, Altisland. Gram. 78.

ON *bardagi*, lit. 'battle-day', cpd. of *bar-* : *berjask* 'fight' (20.11) and *-dagi* : *dagr* 'day'. Vigfusson, s.v.

ON *hildr*, OE *hild*, OHG *hiltia* (all poet. or in proper names), prob. : Ir. *cellach* 'contention, strife', Ir., W. *coll* 'loss, injury', etc., fr. the root in Grk. κλάω 'break', Lith. *kalti* 'pound, hammer, forge', etc. Walde-P. 1.439. Falk-Torp 427 f.

Dan., Sw., Du. *slag*, also and orig. 'a blow' : Dan. *slaa*, Sw. *slå*, Du. *slaan* 'strike' (cf. Dan. *slaas*, Sw. *slåss* 'fight', 20.11).

OE *gefeoht*, ME *fihte*, NE *fight*, OHG *gifeht*, MHG *gevehte*, NHG *gefecht* : OE *feohtan*, OHG *fehtan* 'fight', etc. (20.11).

OE, ME *camp*, NHG *kampf* (but OHG *campf*, MHG *kampf*, chiefly 'duel'), fr. Lat. *campus* 'field' (whence 'battle-field' and finally 'battle'). NED s.v. *camp* sb. Weigand-H. 1.975.

ME *bataille*, NE *battle*, fr. Fr. *bataille* (above, 2).

OHG, MHG *strīt* (NHG *streit*), the most general word for any form of 'strife' (19.62), also including 'armed strife', as still in NHG *streitaxt* 'battle-ax'.

NHG *schlacht*, fr. MHG *slahte*, OHG *slahta* 'killing, slaughter' : OHG *slahan* 'strike', etc. (cf. Dan. *slag*, etc., above).

5. Lith. *kova*, Lett. *kauja*, fr. the root of Lith. *kauti*, Lett. *kaut* 'strike', refl. 'fight' (20.11).

Lith. *mušis* : *muštis* 'fight' (20.11).

6. ChSl. *kotora* (Supr., etc.) : Ir. *cath* (above, 3). Berneker 588.

ChSl. *ratĭ*, mostly 'war' (20.13), sometimes 'battle'.

ChSl. *bojĭ* (late), SCr., Boh. *boj*, etc. and SCr. *bitka*, Boh., Russ. *bitva*, Pol. *bitwa* : Slavic *biti* 'strike', refl. 'fight' (20.11). Berneker 68, 117.

Russ. *sraženie* : *sražat'sja* 'fight' (20.11).

7. Skt. *yuddha-, yudh-* : *yudh-* 'fight' (20.11).

Skt. *raṇa-*, Av. *rə̄na-*, and cpds. Skt. *samara-, samaraṇa-*, Av. *hamarəna-*, OPers. *hamarana-* : Skt. *ṛ-* 'rise, move', Grk. ὄρνυμι 'stir up, rouse', etc. Walde-P. 1.136.

Skt. *pṛtanā-*, Av. *pəšana-, pəšanā-* : Av. *parət-*, ChSl. *pĭrěti sę* 'fight', etc. (20.11). Walde-P. 2.42. Barth. 896 f.

'War' is a prolonged state of organized fighting, and the distinction from the single 'battle' is secondary and far from universal. Several of the words listed here were also in part more commonly used for 'battle', some in the same period (e.g. OE, OHG *wīg*, OE *gefeoht*, OHG *gifeht*), some only earlier (e.g. Grk. πόλεμος). One is a compound of the word for 'battle'. Others are from semantic sources similar to those for 'battle', and logically might equally well have denoted 'battle' (cf. e.g. ChSl. *branĭ* : *brati*).

1. Grk. πόλεμος (also πτόλεμος in Hom. and various dial.), in Hom. freq. 'battle', prob. : πάλλω 'shake, brandish' and in form esp. πελεμίζω 'shake, cause to tremble', pass. 'tremble', Goth. *us-filma* 'amazed', ON *felmtr* 'fright', *felmta* 'be frightened, tremble'. Walde-P. 2.52. Boisacq 762.

2. Lat. *bellum*, old *duellum*, etym. dub. (not : *duo* 'two'; sense 'duel' only for MLat. *duellum*, the archaic form revived and consciously associated with *duo*), perh. : Hom. δαΐ 'in battle' (*δαϝι), δαΐ-φρων 'tried in battle', δήϊος 'hostile', etc. Walde-P. 1.766. Walde-H. 1.100 f. Ernout-M. 107 ("origine inconnue").

It., Sp. *guerra*, Fr. *guerre*, fr. a Frank. form = OHG *werra* 'confusion, strife' (: *werran* 'confuse, entangle'). REW 9524a.

Rum. *războiu*, older 'battle', fr. Slavic, cf. ChSl. *razbojĭ* 'murder, robbery', *bojĭ* 'battle', etc. (20.12). Tiktin 1313.

3. Ir. *cocad*, NIr. *cogadh*, cpd. of *con-, co-* 'together' and *cath* 'battle' (20.12).

W. *rhyfel*, cpd. of intensive *rhy-* (**pro-*) and *bel* (arch.) 'tumult, havoc, war', beside *belu* 'make war, bicker', orig. 'prick, sting', cf. *belydd* 'gadfly', all prob. : Lith. *gelti* 'sting', Grk. βελόνη 'needle, point', Ir. *at-baill* 'dies', etc. (Walde-P. 1.689). The meaning is prob. influenced by Lat. *bellum*. Loth, Mots lat. 137. G. S. Lane, Language 7.278 f.

Br. *brezel* = Corn. *bresel* 'strife' (Ir. *Bresal*, W. *Com-bresel*, etc.), prob. fr. the root of Ir. *brissim* 'break'. Walde-P. 2.206. Pedersen 2.54, 668.

4. Goth. *wigana* (dat. sg. Lk. 14.31, written *wigā na* Cod. Arg., cf. Feist 562f.) beside *waihjō* 'battle', OE, OHG *wīg*, MHG *wīc* both 'war' and 'battle' (20.12).

ON *styrr* (gen. *styrjar*), lit. 'tumult', but also 'battle, war', in prose chiefly cpd. *styrjǫld* (with *ǫld* 'time, age') : OE *styrian* 'set in motion, stir, rouse', *gestyr* 'motion', etc. Falk-Torp 1194. Vigfusson 601.

ON *gunnr*, OE *gūþ*, OS *gūðea*, in cpds. *gūð-*, OHG *gund-* : Grk. θείνω 'strike, kill', φόνος 'murder', Ir. *gonim* 'wound, kill', Skt. *han-* 'strike, kill', etc. Walde-P. 1.680.

ON *strīð* (late in this sense, earlier chiefly 'woe, grief'), OHG, MHG *strīt*, general terms for 'strife' (19.62), but also armed strife 'battle, war', as freq. also Dan., Sw. *strid*, NHG *streit*.

OE *gewin* 'toil, labor', also 'struggle, contest' and 'war' (e.g. *Troiāna gewin* 'Trojan war') : *winnan* 'toil, labor, strive, fight' (20.11).

OE *gefeoht*, OHG *gifeht* 'battle' (20.12), also 'war'.

OE *orlege*, OS *orlag, orlogi*, MLG *orloge, orloch*, Du. *oorlog*, OHG *urliugi*, MHG *urliuge*, perh. as 'situation lacking oaths' (of peace) : Goth. *liuga* 'marriage', Ir. *luige*, W. *llu* 'oath', but in part confused with the Gmc. group for 'fate', OE *orlæg*, OS *orlag*, OHG *orlac*, etc. (fr. **legh-* 'lie'). Walde-P. 2.415, 425. Franck-v. W. 477. Falk-Torp 801.

Late OE *wyrre, werre*, ME *werre*, NE *war*, fr. Northeastern OFr. *werre* = Central OFr., NFr. *guerre* (above, 2). NED s.v.

Du. *krijg*, NHG *krieg*, but MLG *krich* (> Dan., Sw. *krig*) mostly 'strife', MHG *kriec* mostly 'exertion, opposition, enmity', etc., less often 'war', OHG *krīg* 'stubbornness, defiance' (cf. vb. NHG *kriegen* 'get', orig. 'strive', 11.16), prob. : Ir. *brīg* 'strength, worth', Grk. ὕβρις 'violence', βριαρός 'firm, strong'. Walde-P. 1.686. Falk-Torp 579. Weigand-H. 1.1151. Franck-v. W. 349 f.

5. Lith. *karas, karė*, Lett. *kar'š* : Lith. *karias*, OPruss. *kragis* (= *kargis*) 'army', Goth. *harjis* 'army', etc. (20.15).

6. ChSl. *branĭ* (reg. for πόλεμος in Gospels) : *brati* 'fight' (20.11). Berneker 74.

ChSl. *ratĭ* (Supr. freq., sometimes 'battle' but mostly = πόλεμος), SCr. *rat* (Russ. *rat'* formerly used for 'army' and 'war') : ChSl. *retĭ* 'strife, emulation', *retiti* 'contend' : Skt. *ṛ-* 'rise, move', Grk. ὄρνυμι 'stir up, rouse', etc. Cf. Skt. *raṇa-*, etc. battle' (20.13), fr. the same root. Walde-P. 1.139.

SCr. Russ. *vojna*, Pol. *wojna* (Boh. *vojna* now mostly in phrases like 'call to war', i.e. to military service), beside ChSl. *vojĭnŭ* (pl. *voji*) 'soldier, warrior : Lith. *veju, vyti* 'pursue, chase', Skt. *veti* 'pursues, strives after, drives, etc.', Av. *vayeiti* 'pursues', etc. Walde-P. 1.230. Brückner 629.

Boh. *válka* (Pol. *walka* 'fight, combat, struggle', WhRuss. *valka* 'battle, wood-cutting') : Boh. *váleti* 'make war', OPruss. *ūlint* 'fight', OE *wæl* 'battle-field, corpses of the slain', ON *valr* 'bodies of the slain', OHG *wuol* 'defeat, ruin, plague', etc. Walde-P. 1.304 f. Otherwise Brückner 599 (: ChSl. *valiti*, Lat. *volvere* 'turn', etc.).

7. Skt. *vigraha-* 'strife', sometimes 'war', fr. *vi-grabh-* 'stretch apart, separate, divide', and also 'fight, wage war'.

But in general for Indo-Iran., see words listed under 'battle'.

20.132. 'Enemy' in war. As noted in 19.52, most of the words for personal 'enemy' (vs. 'friend') cover the 'enemy' in war, but in some languages certain words are preferred in the latter sense. Thus Grk. πολέμιοι vs. ἐχθροί, Lat. *hostis* (orig. 'stranger', 19.55) vs. *inimīcus*, Russ. *neprijatel'* vs. *vrag*.

Words for 'peace' are based on such notions as 'stable condition, quiet', 'friendship', 'kinship' and 'agreement'. Brugmann, Ber. Sächs. Ges. 1916. no. 3.

1. Grk. εἰρήνη (dial. ἰράνα, etc.), etym.? Brugmann, op. cit. (fr. the root of ἀραρίσκω 'fit, join'). Kretschmer, Glotta 10.238. Debrunner, Gött. Gel. Anz. 1916.741 (pre-Greek origin).

2. Lat. *pāx* (> Romance words), fr. **pāk̂-* beside **pāĝ-* in *pangere* 'fasten, fix, join together', Grk. πήγνυμι 'fix, drive in', etc. Walde-P. 2.2. Ernout-M. 720.

3. Ir. *sīd, sīth*, NIr. *sīothchāin* (cpd. with *cāin* 'law, rule'), fr. **sēdo-*, beside W. *hedd* (poet.), deriv. *heddwch*, Corn. *hedh*, fr. **sedo-*, both prob. as orig. 'stable condition' fr. **sed-* 'sit'. Stokes 297 f. Loth, RC 36.162. Otherwise Walde-P. 2.462 (with refs.).

W. (obs.) *tanc, tangnef, tangnefedd* (cf. *Tancorix*, etc.), prob. : OE *þanc* 'satisfaction, pleasure', etc. Loth, RC 41.225.

Br. *peoc'h*, fr. Lat. *pāx*. Loth, Mots lat. 194.

4. Goth. *gawairþi*, cf. OHG *giwurt* 'liking', prob. fr. the root of Goth. *wairþan* 'become', with development through 'coming together, agreement'. Brugmann, op. cit. 13. Feist 209. Otherwise (: *wairþ* 'value, worth') Schrader, Reallex. 1.650 and others (refs. in Feist).

ON *friðr*, OE *friþ*, OHG *fridu*, etc., general Gmc. (Goth. only in the name *Friþa-reiks*) : Goth. *frijōn*, OE *frēon* 'love', Goth. *frijōnds*, OE *frēond* 'friend', Skt. *prī-* 'please', *priya-* 'dear', etc. Walde-P. 2.87. Falk-Torp 271 f.

OE *sib(b)*, OHG *sibba* (reg. for *pāx* in Tat.), properly 'kinship, kin' (2.81, 19.23), whence 'peace' as the normal condition among kin.

5. Lith. *taika* (neolog. in place of *pakajus*, formerly the usual word, fr. Pol. *pokój*) : *tikt* 'fit, suit, agree', *taikyti* 'mediate', *taikus* 'suitable, peaceful', *pataika* 'idleness' (Walde-P. 1.725, Leskien, Ablaut 287, etc.).

OLith. *mieras*, Lett. *miers* = ChSl. *mirŭ* (below, 6).

6. ChSl. *mirŭ* (also secondarily 'world', 1.1), SCr., Russ. *mir*, Boh. *mír* (Pol. *mir*, mostly replaced by *pokój*), *r*-formation fr. the same root as ChSl. *milŭ* 'pitiful', Russ. *mil* 'dear', Lith. *mielas* 'dear', *mylėti* 'love', Lat. *mītis* 'mild, gentle', etc. Walde-P. 2.244 Berneker 2.60 f.

Pol. *pokój* = Boh. *pokoj* 'quiet, rest, room', Russ. *pokoj* 'rest' : ChSl. *pokojĭ* 'rest', *po-kojiti* 'calm, put at rest', *po-čiti* 'rest', etc. Berneker 538 f.

7. Skt. *saṁdhi-*, lit. 'putting together, union, conjunction', whence 'accord compact, peace' : *saṁ-dhā-* 'put together'.

Av. *āxšti-*, NPers. *āšti*, prob. : *ā-(x)štā-* in caus. 'put in place, appoint', cpd. of *stā-* (*xštā-*) 'stand'. Brugmann, op. cit. 11. Barth. 311, 1602.

Words for 'army' are based upon such notions as 'armed' (force), 'training' (> 'military training, trained force'), 'enemy' ('hostile army' > 'army'), 'expedition' (> 'military expedition' > 'army'), 'camp' (through 'military camp'), and 'missile' (?). Several of the words, including a considerable cognate group, are used also in part for 'people, crowd', which may well be secondary (as in NE *host*), but the development 'people' > 'people in arms, army' is also possible. The French *armée* has been extensively borrowed all over Europe.

1. IE **kor-* in words for 'war', 'army', and 'people, crowd'. Walde-P. 1.462 f. Feist 247.

Here as 'army' Goth. *harjis*, ON *herr*, etc., general Gmc.; Lith. (*karias, karauna*) *kariuomenė* (now the preferred form; cf. NSB s.v. *armija*), Lett. *kar'š* (also 'war', hence for 'army' esp. *kar'a spēks*, with *spēks* 'strength, might' also sometimes alone 'army'), OPruss. *kragis* (= *kargis*); OPers. *kāra-* (also 'people, nation'), NPers. *kār-zār* 'battle-field' (Barth. 465); cf. Ir. *cuire* 'crowd, band', Grk. κοίρανος (*κόρι̯ανος) 'ruler, leader'.

2. Grk. στρατός, in form = Skt. *stṛta-* 'spread out, extended', vbl. adj. fr. the root **ster-* 'spread out' in Grk. στόρνυμι, Skt. *stṛ-*, Lat. *sternere*, etc. Development through 'crowd, people' (attested in Pind., Aesch., etc., and cf. Cret. στάρτος a division of the people); or through 'camp, encamped army' (cf. στρατόπεδον, Byz. φοσσᾶτον, Du. *leger*)? Hence also στρατιά 'army' and vb. στρατεύω 'serve as soldier, campaign', στράτευμα 'army', στρατιώτης 'soldier', στρατόπεδον 'camp', sometimes 'army'. Walde-P. 2.638 f. Boisacq 918.

Byz. φοσσᾶτον 'camp' and pop. word for 'army', fr. late Lat. *fossātum* 'ditch' (: *fossāre, fodere* 'dig'). Hence also OSp. *fousado*, OPort. *fossado*, Prov. *fosat* 'army' (REW 3461). Development through 'moat' > 'camp' (provided with a moat) > 'army'.

3. Lat. *exercitus* (> It. *esercito*, Sp. *ejército*, both lit. words in orig.), orig. 'training', abstract of *exercēre* 'pursue, practice, exercise' (cpd. of *arcēre* 'inclose, confine, hold off'), hence esp. 'military training' and in concrete sense 'body of trained men, army'. Ernout-M. 67 f.

Lat. *hostis* 'enemy' (orig. 'stranger' 19.55) was used in MLat. for 'military service, army' (whence Rum. *oaste*, and the older Romance terms OIt. *oste*, OFr. *ost*, Sp. *huesta*, Port. *hoste*, all obs. except Rum. *oaste*, and for this now pop. *oştire*, prop. 'campaign', fr. the deriv. vb. *oşti* 'go to war', and in lit. *armată*; cf. Tiktin 1068, 1098). Although the direct transition 'hostile army' to 'army' in general is, of course, possible, the more likely development was through use in

such phrases as *convenire in hostem, exire in hostem*, etc., where *in hostem* meant orig. 'against the enemy' but was easily construed 'into military service' and consequently 'into the army'. Buck, Cl. Ph. 14.12 f. Diez 229. REW 4201.

MLat. *armata* 'armed force', either land force or more commonly naval force (cf. Du Cange), fr. fem. sg. of Lat. *armātus* (pple. of *armāre* 'provide with arms', fr. *arma* 'arms, weapons', 20.21), and prob. abstracted fr. *armāta classis* (cf. *classis*, 20.16). Hence It. *armata* used of either 'army' or 'fleet', Sp., Port. *armada* 'fleet', Fr. *armée* 'army' (> Dan., Sw. *armé*, NHG *armee*, SCr., Russ. *armija*, etc.; Russ. > Lith. *armija*); Rum. *armată* (neolog.). Also OFr. > ME *armie*, NE *army*, but the early use was 'armed expedition' or 'armed force', either of sea or of land, sometimes 'fleet', and only later restricted to a land force (NED s.v. *army*).

4. Ir. *slūag* 'host, troop, army', NIr. *sluagh* (now as 'army' mostly replaced by *arm*, fr. NE *army*), W. *llu* (mostly 'host'), OCorn. *luu* : ChSl. *sluga* 'servant' (orig. coll. 'body of servants, household', as in Ir. *teglach*, W. *teulu* 'family', cpds. with Ir. *tech*, W. *ty* 'house'). Walde-P. 2.716. Pedersen 1.84.

W. *byddin*, in MW 'troop' : Ir. *buden* 'troop, band, quantity', etym. dub. Pedersen 1.363, 2.59. Thurneysen, Keltorom. 91.

Br. *arme*, fr. Fr. *armée* (above, 3).

5. Goth. *harjis*, etc., above, 1.

Dan., Sw. *armé*, NE *army*, NHG *armee*, fr. Fr. *armée* (above, 3).

OE *fierd* (*ferd, fyrd*), ME *ferd*, orig 'expedition' : OHG *fart*, ON *ferð* 'journey', etc., OE, OHG *faran*, ON *fara* 'travel', etc. NED s.v. *ferd*.

6. ChSl. *vojĭ* (Gospels, Supr., etc.), late *vojsko, vojska*, SCr. *vojska*, Boh., Russ. *vojsko*, Pol. *wojsko* : ChSl. *vojĭnŭ* 'soldier', SCr., Russ. *vojna* 'war', etc. (20.13).

But Russ. *vojsko* is now arch., or used in pl. for 'troops'; for the modern 'army' now replaced by *armija* (also familiar in other Slavic languages and in part perh. also more common as a technical term than the native words), fr. Fr. *armée*. Cf. also Boh. *armáda*, fr. Sp. *armada*, but in sense of 'army'.

7. Skt. *senā-*, Av. *haēnā-* (esp. 'daevic army, enemy'), OPers. *hainā-* ('hostile army'), prob. the same word as Skt. *senā-*, Av. *haēnā-* 'missile', beside Skt. *sāyaka-* 'intended for hurling', sb. 'missile, arrow', fr. a root meaning 'throw', ultimately the same as in the Eur. words for 'sow', Lat. *serere*, etc. (8.31). Walde-P. 2.459 ff. (with refs.).

Av. *spāda-, spāδa-*, OPers. *spāθmaidaya* loc. sg. 'in the army, on campaign' (NR b 30), NPers. *sipāh*, etym.? Barth. 1617.

The most widespread group of words for 'fleet' is one of Gmc. origin, derived from a verb meaning 'float'. The OE word passed into French and hence to the other Romance languages and by various paths to Lettic and Slavic.

Other words are from 'expedition' or 'class', or are derived from words for 'ship'.

Some of the words may cover also 'navy', that is, the whole naval force of a nation (as contrasted with 'fleet' as a naval unit corresponding to an 'army' as a land force), and NE *navy* was in its earlier use only 'fleet'. But generally there are other terms for 'navy', as Grk. simply νῆες 'ships' or the deriv. τὸ ναυτικόν (so also NG), It. *marina*, Fr. *marine* (> NHG *marine*, etc.) fr. the fem. of Lat. *marīnus*, deriv. of *mare* 'sea'.

1. Grk. στόλος, the most common word, but also general 'an expedition' (by land or sea) : στέλλω 'set in order, arrange, equip'.

2. Lat. *classis* 'summons to arms' (old and rare), 'class' (of citizens), sometimes 'land force, army' (early), but mostly 'navy', etym. dub. (: *calāre* 'call, summon'?). Walde-P. 1.444. Ernout-M. 193 f. Walde-H. 1.228.

NED), ME *flete*, NE *fleet* : OE *flēotan* 'float', ON *fljōta* 'float, flow' (10.34). Falk-Torp 224.

ON *skipastōll*, cpd. of *skip* 'ship' and *-stōll* based on MLat. *stolus*, Grk. στόλος (above, 1), cf. *stōlaherr* 'equipped army'. Falk-Torp 1556.

ME *navie* (NE *navy*), fr. OFr. *navie* 'fleet', VLat. **navia* deriv. of Lat. *nāvis* 'ship'. NED s.v.

5. Lith. *laivynas*, fr. *laivas* 'ship' (10.81).

Lett. *flote*, fr. NHG *flotte*.

6. SCr. *flota*, prob. fr. It. *flotta* (or

NHG *flotte*), Pol. *flota*, fr. NHG *flotte*, Russ. *flot*, prob. (in view of Peter the Great's study of shipbuilding in Holland) fr. Du. *vloot*.

Boh. *lod'stvo*, fr. *lod'* 'ship' (10.81).

7. The interpretation of OPers. *nāviyā* (Bh. 1.86) as nom. sg. meaning 'flotilla' is disputed and indeed in the context improbable. Cf. Kent, JAOS 62.270 f. But the form is just the one to be expected as an Indo-Iranian word for 'fleet', if there were one, that is, deriv. of the word for 'ship', Skt. *nāus*, etc.

The widespread group of Eur. words for 'soldier' comes from late Lat. derivs. of a word for 'soldiers' pay'. Others are derived from words for 'war' (NE *warrior*, NHG *krieger*, which are more comprehensive than 'soldier', are not included in the list; but some of the older words included are also more nearly 'warrior'), 'army', or 'fight'. A few were in origin 'young man', 'layman', or 'member of a crowd, band'.

1. Derivs. of Lat. *solidus*, the name of the gold coin which was the standard unit from the time of Constantine the Great. Hence *solidum* or *solidāta* 'soldier's pay', *solidāre* 'pay the soldiers' wages', and derivs. with various suffixes for 'soldier'.

2. Grk. στρατιώτης, deriv. of στρατός, στρατία 'army' (20.15).

'General' is understood here as the commander of an army, without regard to the more technical applications in modern military terminology. The modern international term comes from the adjective 'general', of Lat. orig., used substantively and finally specialized to military use.

The older terms are words meaning literally 'leader of an army' or simply 'leader', or 'head-man, chief'.

1. Lat. *generālis*, orig. 'related or belonging to a *genus* (sort)', later 'common, general', was borrowed in most of the Eur. languages in this sense. Fr. *général* as sb. came to mean esp. 'chief of a religious community (cf. MLat. *abbas generalis, magister generalis*), or of a group of military units' (*capitaine général*, 14th cent.), whence (in part through NHG) the common Eur. word.

2. Grk. στρατηγός, fr. στρατός 'army' and ἄγω 'lead'. The regular term (Archil.+), but not found in Homer, who has only the less technical ἡγεμών 'leader', applied to Agamemnon, Hector, etc., but also to many minor chiefs.

3. Lat. *dux* 'leader' in wide sense, but also esp. military, fr. *dūcere* 'lead'.

Lat. *imperātor* 'commander', esp. 'commander-in-chief, general', fr. *imperāre* 'command'.

4. Ir. *tōisech* (*catha*), lit. 'leader (of battle)', NIr. *taoiseach* = W. *tywysog* 'leader, prince', beside Ir. *tūus* 'beginning', W. *tywys* 'direction', prob. fr. **to-wid-t-*, deriv. of IE *weid-* 'see, know'. Walde-P. 1.255. Pedersen 1.308.

W. *cadfridog*, lit. 'battle-inciter', cpd. of *cad* 'battle' and *bridog*, deriv. of *brido* 'break out, erupt' also 'stir, incite' (Evans, s v.).

5. Goth. *kindins* (quotable only for ἡγεμών as 'governor'; also military term?), orig. 'head of a people or tribe' : ON *kind*, OE *cyn(n)* 'kin, people', Lat. *gēns, gentis* 'people, clan', etc. Cf. Goth. *þiudans* 'king' : *þiuda* 'nation'. Feist 311.

ON *hǫfðingi* 'chief' both political and military, for the latter esp. *hershǫfðingi* (*herr* 'army') : *hǫfuð* 'head'.

ON *hertogi*, OE *heretoga*, ME *heretoge*, OHG *her(i)zogo*, MHG *herzoge* (NHG *herzog* 'duke' as title), cpd. of ON *herr*, etc. 'army' and agent noun to Goth. *tiuhan* 'lead, draw', OE *tēon*, OHG *ziohan* 'draw' (cf. Lat. *dux* : *dūcere*, above, 3).

OE *lādþēow* (*lātteow*, etc.), the reg. rendering of *dux* in the Gospels, early ME *lattow*, cpd. of *lād* 'way, course, leading' and *þēow* 'servant'.

ME *marscal* (NE *marshal*), fr. OFr. *marescal*, fr. the Gmc., cf. OHG *marahscalh*, lit. 'horse-servant', whence in OFr. and Frankish-Latin usage (through 'master of horse') used as a title of dignity, and in a military sense loosely for 'commander, general' (in early ME possibly the best word for 'highest military officer'; cf. NED s.v. 3a).

OHG *leitid, leitido*, lit. 'leader', fr. *leiten* 'lead'. Regular for *dux* in Tat., but prob. mere semantic borrowing.

MHG *houbetman*, lit. 'head-man', used also for the 'chief military officer' (NHG *hauptmann* 'captain').

6. ChSl. *vojevoda* in Gospels renders ἡγεμών and στρατηγός (once simply transcribed *stratigŭ*), both only 'governor' in NT, and in general Slavic the word is an official title 'governor' or 'duke' (anglicized as *voivode, vaivode, waywode*, cf. NED s.v.). But in origin it was a military term, like NHG *herzog* 'duke' (above, 5), and a literal translation of Grk. στρατηγός—namely a cpd. of *vojĭ* 'army' (20.15, also pl. *voji* 'soldiers, troops' 20.17) and the root of *vedą, vesti, voditi* 'lead'.

7. Skt. *senāpati-*, cpd. of *senā-* 'army' and *pati-* 'lord, master'.

OPers. *maθišta-*, lit. 'greatest' (= Av. *masišta-*, superl. of *mas-*), but used as 'chief military officer', e.g. *Vidarna nāma Pārsa manā bandaka avamšām maθištam akunavam* "Vidarna, a Persian, my servant, him I made their chief".

20.19. Admiral. What is the all but universal modern Eur. title (the old Greek term has not yielded) is of Arabic origin. Arab. *amir-al-*, that is *amir* 'commander' (anglicized as *emir*) followed by the article, in phrases like *amir-al-mā* 'commander of the water', *amir-al-bahr* 'commander of the sea', was interpreted as an independent noun and was so adopted. There arose a great variety of forms, partly by association with words of Lat. origin (so MLat. *admiralis, admirabilis*, as if fr. Lat. *ad-mirārī* 'wonder at, admire'; hence the *d* in the most common current

form), partly by adoption of native suffixes (It. *ammiraglio*, OIt. also *almiraglio*, Sp. *almirante*, OFr. *amirand*, Lith. *admirolas*, etc.). NED s.v. *admiral*.

The older words, so far as quotable, were derivs. or phrases with words for 'ship' or 'fleet'. Thus Grk. ναύαρχος (so still NG), cpd. of ναῦς 'ship' and the root of ἄρχω 'lead, rule'; late also στολάρχης, cpd. of στόλος 'fleet'; Lat. *praefectus classis* 'commander of the fleet'. So also W. *llyngesydd*, fr. *llynges* 'fleet' with suffix *-ydd* (Pedersen 2.17).

Generic words for 'weapons, arms' come by specialization of 'implements' to 'implements of warfare', or of 'fittings' through 'defensive armor', or by generalization from missile or cutting weapons derived from verbs for 'throw' or 'cut'. Some are from verbs for 'strike' or 'fight'.

1. Grk. ὅπλον 'instrument, implement, weapon', pl. ὅπλα 'arms, weapons' : ἕπω (in cpds. ἀμφι-, δι-, ἐφ-, etc.) 'be busy about, look after, etc.' : Skt. *sap-* 'care for, attend to', Av. *hap-* 'hold, support'. Walde-P. 2.487. Boisacq 270, 707 f.

NG ἅρματα (pl.; sg. ἅρμα not used), fr. Lat. *arma* (below). G. Meyer, Neugr. Stud. 3.11.

2. Lat. *arma* (pl.; VLat. fem. sg. *arma* > Romance forms, all in pl. 'arms, weapons'. REW 650), sometimes defensive armor (vs. *tēla*), but mostly generic : Lat. *armus* 'upper arm, shoulder', Goth. *arms*, etc. 'arm' (orig. 'joint'), Lat. *artus, articulus* 'joint', Grk. ἁρμός 'joint', ἀραρίσκω 'join, fit'. Walde-P. 1.72. Ernout-M. 72 f. Walde-H. 1.67 f.

Lat. *tēla* 'missile weapons' (spear, etc.) and more generically 'offensive weapons' (sword, etc.), etym. dub. Walde-P. 1.717. Ernout-M. 1021.

3. Ir. *arm*, W. *arf* 'weapon', pl. *airm*, *arfau*, (arch. *eirf*) 'weapons', fr. Lat. *arma* (above). Vendryes, De hib. voc. 114. Loth, Mots lat. 134.

Br. *arm* 'arm, kitchen utensil', pl. *armou* 'weapons', fr. Fr. *arme*.

4. Goth. *wēpna* (pl., renders ὅπλα), ON *vāpn*, OHG *wāfan*, MHG *wāfen* (sg. and pl.), Dan. *vaaben* (pl.), Sw. *vapen* (sg. and pl.). OE *wǣpen*, ME *wepen* (sg. and coll., pl. 5. Lith. *ginklas* (sg.; pl. *ginklai*) : *ginu, ginti* 'defend', *genu, ginti* 'drive', Grk. θείνω 'strike', etc. Walde-P. 1.681.

Lett. *ieruocis* (sg. also 'tool, implement', pl. *ieruoci*) : *ruocis* 'handle', *ruoka*, Lith. *ranka* 'hand'. Cf. Lith. *įrankis* 'tool, means'. Trautmann 237. Mühl.-Endz. 2.60.

6. ChSl. *orąžĭje* (sg. 'sword', pl. *orąžĭja* = ὅπλα), SCr. *oružje*, (Boh. *oruží* arch.), Pol. *oręż*, Russ. *oružie* (sg. and coll.; cf. also *ruž'e* 'gun'), apparently fr. an otherwise unattested Slavic root *ręg-*, meaning? Miklosich 281. Brückner 381.

Boh. *zbraň* (sg.; pl. *zbraně*), Pol. *broń* (sg. and coll.) : ChSl. *branĭ* 'war', *brati* 'fight', etc. (20.11). Berneker 74.

7. Indo-Iranian words given in stem-form.

Skt. *āyudha-* (most generic word, cf. Macdonell-Keith 1.60), deriv. of *ā-yudh-* 'make war on, attack', cpd. of *yudh-* 'fight' (20.11).

Skt. *astra-*, perh. (as orig. 'missile') : *as-* 'throw'. Uhlenbeck 19. Walde-P. 1.134.

Skt. *çastra-*, mostly a cutting weapon 'knife, sword, dagger', fr. *ças-* 'cut'.

Av. *zaēna-*, and *zaya-*, with *zayan-* 'armed' : Skt. *heti-* 'missile', *hi-* 'urge, hurl', prob. also Ir. *gae*, OE *gār*, etc. 'spear' (20.26). Walde-P. 1.546. Barth. 1650, 1666. Walde-H. 1.576.

Av. *snaiθiš-* : *snaθ-* 'strike', Skt. *çnath-* 'pierce'. Walde-P. 1.402. Barth. 1628.

Av. *sōiδiš-* : *sid-*, Skt. *chid-* 'split'. Barth. 1577.

The 'club' was man's earliest weapon and continued to be one of the recognized weapons down into the historical period, or even to the present day among backward tribes or in rural feuds. It was mainly a striking, but in part also a hurling, weapon.

The words for 'club' are connected with 1) verbs for 'strike' (function), 2) words for 'wood' (material), and 3) words for rounded objects ('knob, knot, ball, lump, wart', etc.) with reference to the characteristic bulging head of a club.

1. Grk. ῥόπαλον, beside ῥαπίς 'rod', ῥάβδος 'rod, wand, staff', perh. : ῥέπω 'incline, bend down', Lith. *virpti* 'quiver', *varpa* 'ear of corn, spike', etc. Walde-P. 1.276 f. Boisacq 835 f.

Grk. κορύνη (Hom., Hdt.; cf. also the κορυνη-φόροι 'club-bearers' of Peisistratus), prob. : κόρυμβος, κορυφή 'top, head', etc. Boisacq 498.

Grk. ξύλον 'wood, piece of wood' (1.43), also 'club' (Hdt., so freq. ξύλα in NT, rendered 'staves'; cf. NG pop. ἔφαγε ξύλο 'got a beating'.

NG ματσούκα, loanword fr. some form of the Romance group, Rum. *măciucă*, Fr. *massue*, etc. (below, 2). G. Meyer, Neugr. Stud. 4.50 f.

2. Lat. *clāva* : *clāvus* usually 'nail' (9.50) but also 'excrescence' on the body or trees. Ernout-M. 194. Walde-H. 1.229.

Lat. *fūstis*, etym. dub., perh. : MHG, NHG *būsch* 'club, swelling', etc. Walde-P. 1.118, 127. Ernout-M. 405. Walde-H. 1.573.

It. *mazza* (Fr. *masse* 'mace, maul'; OFr. also *mace* > ME, NE *mace*), fr. VLat. **mattea;* Fr. *massue*, Rum. *măciucă* (cf. OE *mattuc, mattoc* 'mattock'), fr. VLat. **matteūca*, beside attested Lat. *mateola* a kind of 'mallet, maul' : ChSl. *motyka* 'hoe', Skt. *matya-* 'harrow'. Walde-P. 2.229. Walde-H. 2.49. REW 5425, 5426.

Port., Sp. *porra*, formed to Port. *porro* (cf. Lat. *clāva* : *clāvus*) = Sp. *puerro*, It. *porro* 'leek', fr. Lat. *porrum* id., with reference to the shape of the stalk with its thick base (cf. It. *porro*, Fr. *poireau* also 'wart'). REW 6670.

3. Ir. *lorg* (cf. Z. celt. Ph. 19.309 f.), NIr. *lorg, lorgaid* = OCorn. *lorch* 'staff' : ON *lurkr* 'club, cudgel' (or this fr. Celtic?), root connection? Walde-P. 2.443.

W. *clwb*, fr. NE *club*.

Br. *bataraz*, fr. Fr. *matras* (this fr. Gall. *matara, mataris* 'javelin, pike' in Caesar, etc.), with *b* fr. *baz* 'stick'. Henry 28. REW 5402.

4. Goth. *triu* (= OE *trēow* 'tree, wood', etc., 1.42) in pl. renders ξύλα 'clubs, staves' (above, 1).

ON *klumba, klubba* (> ME *clubbe*, NE *club*), ODan. and still Norw. *klubbe*, Sw. *klubba* : OE *clympre* 'lump of metal', LG *klump*, NE *clump*, and a widespread group of words applied to round objects, as Lat. *globus* 'ball, sphere', *glēba* 'lump of earth', etc. Walde-P. 1.616. Falk-Torp 537.

ON *kylfa*, Dan. *kølle*, OHG *kolbo*, MHG and early NHG *kolbe* (NHG *kolben* 'club, butt-end', etc.), fr. the same root as the preceding group. Walde-P. l.c. Weigand-H. 1.1093. Falk-Torp 560.

ON *rudda* (Norw. dial. *rudda* 'a pliant stick for whipping'; cf. also OE *rodd*, NE *rod*), etym. dub. Hellquist quoted by Falk, Altnordische Waffenkunde 126 (: ON *rydja* 'root out, get rid of'). Torp, Nynorsk 546 (perh. : ON *rōda*, OE *rōd* 'cross', OHG *ruota* 'rod', etc.).

OE *sāgol* (NE dial. *sowel*, cf. NED) : MHG *siegel* 'rung of a ladder', root connection dub. Walde-P. 2.475.

OE *cycgel*, ME *kuggel*, NE *cudgel* : MHG, NHG *kugel* 'ball', etc. Walde-P. 1.558. Falk-Torp 850.

Du. *knots* : OE *cnotta* 'knot', NE *knot*, also NE *knop, knob*, etc. Cf. NHG *knüttel* 'cudgel', deriv. of *knoten* 'knot'. Franck-v. W. 328.

MHG *kiule*, NHG *keule* : ON *kūla* 'swelling, boil', MHG *kūle* 'ball', NHG *kugel* 'ball', Skt. *gola-* 'ball', and many other words for round objects. Walde-P. 1.556. Falk-Torp 590, 591. Weigand-H. 1.1027.

5. Lith. *kuoka* ("apparently best word", Senn; see also NSB s.v.) = Lett. *kuoks* 'tree, piece of wood, stick'. Mühl.-Endz. 2.342.

Lith. *kūle* ("Keule, Streitkolben", NSB s.v.), fr. MHS *kūle* 'ball' and 'club'. Alminauskis 74.

Lett. *vāle* = Lith. *volė* 'cock' (of a keg, etc.) : Lith. *velti*, Lett. *velt* 'full' (cloth), Lat. *volvere* 'turn around', etc. Walde-P. 1.303. Mühl.-Endz. 4.497.

6. ChSl. *drŭkolĭ, drĭkolĭ* (despite the variant spelling *drĭ-* and OBoh. *dřkolna*) a cpd. or deriv. of *drŭ-* in *drŭva* 'wood', etc. Berneker 232 (adversely).

ChSl. *palica* (Supr. = ῥάβδος 'rod for punishment'), Boh. *palice*, Pol. *pałka* 'club' (but Russ. *palka*, SCr. *palica* 'stick, cane'; Pol., Russ. *palica* arch), root connection dub. Walde-P. 2.102. Brückner 391.

SCr. *buzdovan* (*buzdohan* obs.; Bulg. *buzdogan*, Pol. *buzdygan*, etc.), fr. Turk. *bozdogan* 'club'. Berneker 105. Lokotsch 333.

Boh. *obušek*, fr. cpd. of *bušiti* 'hammer, pound', beside *bouchati* 'bang, knock' = Russ. *buchat'* 'throw with a crash, strike', etc., of imitative origin. Berneker 97.

Russ. *bulava* (the pop. word; Pol. *buława* esp. 'hetman's staff'), prob. : OE *bȳl*, NHG *beule*, etc. 'swelling, boil'. Berneker 100. Brückner 48.

Russ. *dubyna*, fr. *dub* 'oak' = ChSl. *dąbŭ* 'tree'. Berneker 216.

7. A prob. Indo-Iranian word for 'club' (cf. Geiger, Ostiran. Kultur 444) is Skt. *vadha-, vadhar* (weapon of striking and hurling, esp. Indra's weapon), Av. *vadar-* (striking weapon) : Skt. *vadh-* 'smite, slay', Av. *vādaya-* 'repulse', Grk. ὠθέω 'thrust, push'. Walde-P. 1.254 f.

Skt. *gadā-*, Av. *gaδā-* (Barth. 488), etym.? Osthoff, Parerga 143.

Av. *vazra-* (Barth. 1392) = Skt. *vajra-* 'Indra's thunderbolt' : Skt. *vāja-* 'strength', OPers. *vazarka-* 'great', etc. Walde-P. 1.246 f.

Av. *dāru* 'piece of wood, trunk of a tree' (= Skt. *dāru* 'piece of wood', etc., cf. 1.43), also once 'club'. Barth. 738.

20.222. The nearest successor of the 'club' as a weapon is the 'battle-ax'. It was not a usual weapon of the Greeks (a few times in Homer) or the Romans, but an important one among the Celtic and Germanic tribes. Most of the terms are the same as those used for 'ax' as a tool (9.25), or in modern times made more specific by a compound or phrase with words for 'battle', 'war', or 'arms', as NE *battle-ax*, NHG *streit-axt*, NIr. *tuagh cogaidh*, W. *cad-fywall*, Fr. *hache d'armes*, Boh. *sekera válečná*, etc. Thus Grk. πέλεκυς and ἀξίνη (both as weapons in Hom., later esp. πέλεκυς), Lat. *secūris* and esp. *bipennis*, Ir. *biail* (Bauersfeld, op. cit. 343 f.), ON *øx* (Falk, op. cit. 104 ff.), OE *æx* (Keller, op. cit. 56 ff.), OHG *acchus* and *bīhal*, Slavic *sěkyra* (Niederle, op. cit. 2.286 ff.), Skt. *paraçu-*.

Occasionally an old word has survived only in the sense of 'battle-ax', as Russ. *sekira* (as tool replaced by *topor*), It. *azza* (prob. a by-form of *accia*, fr. Fr. *hache*).

A further development of the 'battle-ax' was the 'halberd', both in fact (a combination of a long-handled, double-headed ax, of the ax-adze type, and spearhead) and in name, orig. MHG *helmbarte* (LG, NHG *hellebarde*, It. *alabarde*, Fr. *hallebarde* > NE *haubert, halbert, halberd*), a cpd. of *barte* 'ax' (orig. 'beard', 9.25) with *helm* 'handle' (better than *helm* 'helmet'). Kluge-G. 244. REW 4101a. NED s.v. *halberd*. Cf. also Pol. *berdysz*, Russ. *berdyš*, likewise fr. MLG *barde* through a MLat. **bardūcium* (cf. **matteūca* > Fr. *massue* 'club'). Brückner 21.

Some of the words for 'sling' are connected with verbs for 'jerk' or 'wind, twist', some with nouns for 'leather' or 'strap'. An Irish-Welsh word denoted orig. the 'staff-sling'. Several are of obscure origin.

1. Grk. σφενδόνη, prob. : σφαδάζω 'jerk, struggle', σφεδανός 'violent, impetuous', Skt. *spand-* 'quiver, tremble, throb'. Walde-P. 2.664. Boisacq 926. But combined by others with Lat. *funda*, either as both loanwords fr. a common source (Ernout-M. 400), or as cognate fr. **(s-)bhend(h)-* : Goth. *bindan* 'bind', etc., and orig. 'bandage' (Cuny, BSL 37.1 ff.).

2. Lat. *funda* (> It. *fionda*, OFr. *fonde*, Sp. *honda;* Prov. *fronda*, Fr. *fronde* with unexplained *-r-*; REW 3577), etym. dub. Walde-H. 1.562 f. and above, 1.

Rum. *praştie*, fr. the Slavic, cf. ChSl. *prašta* (below, 6).

3. Ir. *tailm*, MBr, NBr. *talm* (now usually *batalm* with *baz* 'stick'), but W. *telm* 'snare, trap', perh. : Grk. τελαμών 'strap (for carrying arms), buckler', fr. the root in Grk. ταλάσσαι 'bear, endure', Lat. *tollere* 'raise, lift', etc. Walde-P. 1.739. Pedersen 1.169.

Ir. *taball*, NIr. *crann tabhaill* (*crann* 'tree, staff'), W. *ffon dafl* (*ffon* 'stick'), the same word as Ir. *taball* 'tablet', W. *taf(a)l* 'scales, balance', fr. Lat. *tabula* 'tablet'. It must have denoted orig. the 'staff-sling' (OE *stæf-liþere*, ON *staf-slǫngva*, Lat. *fustibalus*, described by Veget. 3.14). Vendryes, De hib. voc. 181. Bauersfeld, op. cit. 306 f.

4. ON *slǫngva* (*staf-, hand-slǫngva*), Dan. *slynge*, Sw. *slunga*, ME *slinge* (loanword fr. the Continent), NE *sling* (same word as *sling* for holding up objects), OHG *slinga*, MHG *slinge* (NHG *schlinge* 'noose, snare'), beside OHG *slengira*, MHG *slenger*, OS *slingira*, Du. *slinger* : ON *slyngva, slyngja* 'swing, twist, sling', OE *slingan* 'creep', OHG *slingan* 'swing, plait, wind', Lith. *slinkti* 'crawl, creep'. Walde-P. 2.714 f. Falk-Torp 1071. NED s.v. *sling*, sb.[1].

NHG *schleuder*, fr. MLG *slūder*, *slüter*, orig.? Kluge-G. 524. Weigand-H. 2.730.

5. Lith. *vilksnė, vilkstynė* (also *vilpšnė, vilpštynė*), fr. *vilkti* 'draw'. Leskien, Ablaut 354.

Lett. *linga* (also 'snare'), through Liv. *līnga*, fr. MLG *slinge* (above, 4). Mühl.-Endz. 2.471. Sehwers, Z. sl. Ph. 5.309.

6. ChSl. *prašta* (*praštĭnikŭ* 'slinger' Supr.), SCr. *praća*, Boh. *prak*, Pol. *proca*, Russ. *prašča* (ChSl. form; ORuss. *porokŭ* 'battering-ram'), fr. root of ChSl.

prati, porją 'split'. Meillet, Études 398. Brückner 437. Niederle, Antiquité slave 2.287 f.

7. Skt. *açan-* 'stone' (1.44) and likewise *adri-* 'stone' occur in RV as weapons of Indra (Zimmer, Altind. Leben 301, Macdonell-Keith), but there is no quotable word or evidence for a special instrument for throwing stones.

Av. *fradaxšanā-*, evidently fr. a *fradaxš-*, but no apparent relation to the known *daxš-* 'teach'. Barth. 981.

The derivation of words for 'bow' from verbs for 'bend' is, as to be expected, widespread. Other connections are with verbs for 'stretch, draw' or names of kinds of wood furnishing the material.

1. Grk. τόξον (dim. τοξάριον, NG pop. δοξάρι), in pl. also 'bow and arrows, arrows', etym. dub. The two possibilities, both involving some difficulty, are 1) connection with Lat. *taxus* 'yew', or 2) as orig. 'hewn, fashioned', deriv. fr. the root of τέκτων 'carpenter', Skt. *takṣ-* 'hew', etc. Walde-P. 1.717. Boisacq 975.

2. Lat. *arcus* (> Romance words) : Goth. *arhwazna*, ON *ǫr*, OE *earh*, NE *arrow* 'arrow', derivs. of a corresponding word for 'bow', all possibly connected with certain names of trees, woods, but uncertain. Walde-P. 1.81. Ernout-M. 69. Walde-H. 1.64.

A few of the words for 'arrow' are derivs. of those for 'bow', either through the medium of a verb 'shoot with the bow, shoot arrows', or directly as 'belonging with the bow'. For the association, cf. also the use of Grk. τόξον 'bow' in the plural for 'bow and arrows' or even 'arrows'.

But the majority are from the more generic notion of 'missile', from verbs for 'throw' or the like, or are connected with names of various sharp-pointed objects.

There is one small group common to Grk. and Indo-Iranian, besides the one for 'bow' or 'arrow' common to Lat. and Gmc. Loanwords are frequent.

1. Grk. ἰός (the oldest word, but only poet.) fr. *ἰσϝο-ς : Skt. *iṣu-*, Av. *išu-* 'arrow', fr. the root seen in Skt. *iṣ-* 'set in quick motion, swing, hit', etc. Walde-P. 1.107. Boisacq 378.

Grk. οἰστός, Hom. ὀϊστός (mostly poet.), etym. dub., perh. as ὀ-ισ-τό-ς fr. the same root as the preceding. Walde-P. 1.107. Brugmann, IF 29.231.

Grk. τόξευμα (the usual prose word), fr. τοξεύω 'shoot the bow', fr. τόξον 'bow'.

Grk. βέλος, a 'missile' of any sort but esp. an 'arrow' (so freq. in Hom., and the NG word) : βάλλω 'throw'. Walde-P. 1.689, 691. Boisacq 118.

2. Lat. *sagitta* (> It. *saetta*, OFr. *saete*, Sp. *saeta*, Rum. *săgeată*), prob. loanword (Etruscan?). Ernout-M. 886. REW 7508.

Besides the most generic words for 'spear', as a weapon of thrusting or throwing, there are numerous terms for special types (NE *lance, pike, javelin*, etc.), most of which are left unnoticed.

The words are partly based upon such notions as 'throw, thrust' or the like, 'sharp, pointed', and (orig. denoting the shaft) 'wood, spar'. But several are of obscure origin.

1. Grk. δόρυ 'tree-trunk, beam', etc., whence 'spear-shaft' and eventually 'spear' (the most common word in Hom.) : Skt. *dāru-* 'piece of wood, stake', Av. *dāru-* 'tree-trunk, piece of wood, club', Grk. δρῦς 'tree, oak', ChSl. *drŭva* 'wood', Goth. *triu* 'tree, wood', etc. (1.42). Walde-P. 1.804. Boisacq 197.

Grk. λόγχη (Hdt., not in Hom.), prob. fr. the same (Celtic) source as Lat. *lancea*. Boisacq 586. Walde-H. 1.757 f. Ernout-M. 521.

Grk. αἰχμή, prob. fr. *αἰκ-σμā- : Lat. *īcere* 'strike', Cypr. ἰκμαμένος 'wounded'. Walde-P. 1.7 f. Walde-H. 1.670. Boisacq 31.

Grk. ἔγχος (freq. in Hom. as 'spear'; later for other weapons), etym.? Walde-P. 1.608, 2.327. Boisacq 214.

Grk. ἄκων 'javelin' (Hom.+) : ἄκαινα 'spike, goad', ἀκίς 'pointed object', ἄκρος 'topmost', Lat. *ācer* 'sharp', etc. Walde-P. 1.20. Boisacq 32.

NG κοντάρι, fr. late Grk. κοντάριον, dim. of κοντός '(boat-)pole, pike, crutch, goad' (> Lat. *contus* 'pole' and 'pike' as weapon) : κεντέω 'sting, prick', W. *cethr* 'nail', Br. *kentr* 'spur', etc. Walde-P. 1.402. Boisacq 434.

2. Lat. *hasta* (> It., Sp. *asta*), Umbr. *hostatu* 'hastatos' : Ir. *gat* 'withe', Goth. *gazds* 'prick, sting', ON *gaddr* 'prick, point', OHG *gart* 'stimulus'. Walde-P. 1.541. Ernout-M. 445. Walde-H. 1.636.

Lat. *lancea* (> It. *lancia* [> Hung. *lancsa* > Rum. *lance*], Fr. *lance*, Sp. *lanza*), see under Grk. λόγχη, above, 1.

Lat. *pīlum*, the heavy javelin of the Roman infantry, orig. and earliest form much disputed. Thought by some to be the same word as *pīlum* 'pestle' and first applied to a more primitive club-like weapon. Kropatchek, Jahrb. d. deutsch. arch. Inst. 1908 86 f. Couissin, op. cit. 22 f.

OFr. *espieu*, Fr. *épieu* (now heavy spear for hunting boars, etc.), fr. a Frank. **speut* = OHG *spioz* (below, 4).

Rum. *suliță*, fr. Slavic, cf. ChSl. *sulica* (below, 6).

3. Ir. *gae* (*gāi*), W. *gwaew, gwayw* and (cpd. with *ffon* 'stick') *gwaywffon*, Br. *goaf*, Gall.-Lat. *gaesum*, Gallo-Grk. γαῖσον : ON *geirr*, OE *gār* 'spear', Grk. χαῖος 'shepherd's staff', prob. fr. the same root as Skt. *heti-* 'missile', Av. *zaēna-* 'weapon', Skt. *hi-* 'urge, hurl'. Walde-P. 1.528, 546. Pedersen 1.96. Walde-H. 1.575 f.

Ir. *sleg*, NIr. *sleagh*, perh. : Skt. *sṛj-* 'release, shoot, pour', MHG *selken* 'drip, sink' Ir. *selg* 'hunt' (fr. the releasing of the hunting dogs). Walde-P. 2.508. Pederson 1.100.

Some of the words for 'sword' are connected with verbs for 'cut, strike' or the like, and in one group the basic characteristic is the flat blade. But many are of obscure root connection, and loanwords are frequent.

1. Grk. ξίφος, prob. a loanword fr. the same source as Egypt. *sft* 'knife, sword'. Boisacq 679 with references. Myres, Who were the Greeks? 590.

Grk. ἄορ (poet., freq. in Hom.), the sword as hung on the belt : ἀείρω 'raise', pass. 'be suspended'. Solmsen, Untersuchungen 292.

Grk. μάχαιρα 'knife' (9.23), also used for a kind of sword, 'dagger', and 'saber', in NT reg. word for 'sword'.

NG σπαθί (the reg. pop. word; ξίφος lit., but official term in the army), fr. Grk. σπαθίον, dim. of σπάθη 'flat wooden blade, spattle, blade' (of an oar or sword, etc.) : OE *spadu* 'spade', etc. Walde-P. 2.653.

2. Lat. *gladius* (> OIt. *ghiado;* Fr. *glaive*, now arch., by blend with a Gallic form; REW 3773), early loanword fr. Celtic (Ir. *claideb*, etc., below, 3). Ernout-M. 423. Walde-H. 1.603 f.

Lat. *ēnsis* (old word, but only poet., in prose replaced by *gladius*) : Skt. *asi-* 'sword', root connection? Ernout-M. 302. Walde-H. 1.406.

Lat. *spatha* 'spattle', also 'sword' of the auxiliaries (Tac.), later reg. word for 'sword', displacing *gladius*, loanword fr. Grk. σπάθη (above, 1). Hence It. *spada* (> Rum. *spadă*), Fr. *épée*, Sp. *espada*. Couissin, op. cit. 489. REW 8128.

Rum. *sabie*, fr. the Slavic, cf. Bulg. *sab(i)ja*, SCr. *sablja*, Pol. *szabla*, etc. 'saber' (whence also NHG *sabel, säbel*, It. *sciabla*, Fr. *sabre* > NE *sabre*), prob. orig. fr. Hung. *száblya* (: *szab* 'cut'). Tiktin 1350. Kluge-G. 493.

3. Ir. *claideb*, NIr., Gael. *claidheamh* (hence with *mōr* 'great', NE *claymore*), W. *cleddyf*, Br. *kleze*, Corn. *clethe*, beside Lat. *gladius* (fr. Celtic) : Ir. *claidim*, W. *claddu* 'dig', Lat. *clādēs* 'damage, injury', Skt. *khaḍga-* 'sword', Lith. *kalti* 'strike', Grk. κλάω 'break', etc. Walde-P. 1.439. Walde-H. 1.603 f. (with refs. for Celtic).

Ir. *colg* (less common than *claideb* and denoting some special type of sword, Bauersfeld, op. cit. 339 ff.; also 'beard on grain, prickle') : W. *cola* 'beard (on grain)', *col* 'sting', *cala*, Br. *kalc'h* 'penis' perh. fr. a root **kel-* 'prick, stick' (or ultimately identical with **kel-* 'strike' in above group?). Walde-P. 1.435.

4. Goth. *hairus*, ON *hjǫrr*, OE *heoru*, OS *heru*, prob. fr. IE *(*s*)*ker-* in Grk. κείρω 'shear', OE *sceran* 'cut, shear', etc. (9.22). Walde-P. 2.576. Feist 235.

Goth. *mēki* (acc. sg.), ON *mækir*, OE *mēce* (loanword fr. ON?), OS *māki*, Crim.Goth. *mycha* 'ensis', orig. dub., perh. a loanword, but source unknown (cf. ChSl. *mečĭ*, below, 6). Feist 352 f.

ON *sverð*, OE *sweord*, etc., general Gmc. (except Goth.), etym. dub., perh. : OHG *sweran* 'cause or suffer pain', *swero*, *swer(a)do* 'pain', Ir. *serb* 'bitter', Av. *xᵛara-* 'wound' (Walde-P. 2.529), with orig. sense of root 'sting, cut'(?). W. Krogmann, KZ 59.204. Kluge-G. 552. Otherwise Falk-Torp 1214 (cf. also 1560).

ON *brandr*, OE *brand*, OHG *brant* 'burning, brand' were used (mostly poet.) for the 'blade of a sword' and 'sword'. Hence as 'sword' It. *brando*, OFr. *brant*. NED s.v. *brand*, sb. 8. REW 1273.

5. Lith. *kalavijas* : OPruss. *kalabian* id., Lat. *clāva* 'club', fr. the root in Lith. *kalti* 'strike', etc. (cf. Ir. *claideb*, above 3). Trautmann, Altpreuss. 351. (Walde-P. 1.437).

Lith. *kardas* (cf. NSB; formerly the usual word), fr. Pol. *kord*, cf. ChSl. *kor(ŭ)da* (below, 6).

Lett. *zuobens* : *zuobs* 'tooth', as 'cutting', or orig. actual sword with teeth. Mühl.-Endz. 4.756.

6. ChSl. *mečĭ*, etc., general Slavic, belongs in some way with Goth. *mēki*, etc. (above, 4), but not directly fr. the attested Gmc. form (for which one would expect ChSl. *měči*, etc.), perh. fr. the same unknown source. Berneker 2.29 f. Stender-Petersen 221 f., 507, Brückner 331.

Late ChSl. *kor(ŭ)da*, etc. (general Slavic, but no longer the usual word anywhere), fr. Pers. *kārd* = Av. *karəta-* (below, 7). Berneker 569. Brückner 256.

7. Skt. *asi-* (Av. *aṅhū-* 'sword' Barth. 110, but dub.) : Lat. *ēnsis* (above, 2).

Skt. *khaḍga-*, cf. W. *cleddyf* (above, 3).

Av. *karəta-* 'knife', as weapon 'dagger' or 'sword' (Darmesteter 'épée') : *karət-*, Skt. *kṛt-* 'cut'. Barth. 454.

20.28 GUN; CANNON

Grk.	Byz. τηλεβολίσκος, μολυβδοβόλος; τηλεβόλος, χωνεία, etc.	Dan.	*gevær, bøsse; kanon*	Lith.	*šaudyklė; patranka, kanuolė*

NE *gun* covers firearms from the heaviest naval or siege guns (but in technical use excluding mortars and howitzers) to the soldier's rifle or the sportsman's shotgun, and in current U.S. use even the gangster's revolver. In the other Eur. languages there is no such comprehensive word, but different terms for the small or hand gun of the soldier or sportsman (even these, sometimes differentiated) and the heavy naval guns or artillery pieces, for which also NE *cannon* was until recently the usual term, and will be used in the following for purposes of definition.

Although guns are attested for more than a century earlier, their use on a large scale is conspicuous in the siege of Constantinople (A.D. 1453), and the most detailed description of their construction, especially the famous monster cannon, is found in the historians of that siege, notably (as quoted in the following), Ducas, Phrantzes, Chalcondylas, Critobulus (the first three quoted from the Bonn edition, the last from Müller, Fragmenta historicorum Graecorum, Vol. V).

A primitive type of hand gun was probably the earliest gun made, but it was for some centuries relatively unimportant in contrast to the siege gun. Of the old names, some have remained the common terms, unaffected by the change of type (e.g. Fr. *fusil*), some are now used only or mainly for the shotgun (It. *schioppo*, Sp. *escopeta*, NHG *büchse*), and others have disappeared from use except with reference to earlier history, e.g. NE *hackbut*, (*h*)*arquebus* (= MLG *hakebusse*, MHG *hakenbühse*, lit. 'hook-gun'), *flintlock*, *musket* (orig. name of a bird), *carbine* (weapon of the *carabin*, for which see now Gamillscheg 184).

The words for 'gun' reflect their tubular form (from words for 'tube' or 'cylindrical box'), their action ('fire, throwing, shooting'), some special feature of the mechanism ('flint-lock', etc.), the sound of the explosion (MLat. *bombarda*, etc.), or they may be words for 'weapon, machine, piece, piece of work' used in specialized sense.

1. Byz. τηλεβόλος, in class. Grk. adj. 'shooting from afar', is the regular term for 'cannon' in Chalcond., e.g. 1.231 passim.

Byz. ἐλεβόλις, usual for 'cannon' in Phrantzes (e.g. p. 239), is apparently due to a confusion of the preceding (so regularly in cod. Par.) with the old ἑλέπολις (lit. 'city-taking') which was a siegetower (in this form so used and minutely described by Phrantzes, p. 244 f.).

Byz. χωνεία, orig. 'a casting' of metal is used by Critob. in this sense and for the barrel of the cannon, by Ducas for the 'cannon' itself (e.g. pp. 247, 248, 271, 273).

Byz. μηχανή 'machine' and σκευή 'apparatus' were both often used with especial reference to cannon. Critob. (1.30.8) remarks that there is no old name for this 'machine', unless one should call it ἑλέπολις or ἀφετήριον, but "all now living call it by the common name σκευή". Ducas also has σκευή and σκευαὶ πετροβόλοι (p. 266.3).

Reference to hand guns is to be seen in the dim. τηλεβολίσκος, ἐλεβολίσκος, τοὺς τουφάκας (Critob. 1.51.1, 4; fr. Turk., cf. NG τουφέκι, below), and μολυβδοβόλος (Ducas 266.18, 284.15, cf. βολίδας μολιβδίνας, Ducas p. 211.10).

NG πυροβόλον (the official army term for 'cannon'), neut. of πυροβόλος, orig. 'fire-throwing'.

NG pop. κανόνι, fr. It. *cannone* (below, 2).

NG ὅπλον 'weapon' (20.21) and official term for the soldier's rifle.

NG pop. τουφέκι (the common word for the old musket in klephtic songs, and now for the soldier's rifle or the shotgun), fr. Turk. *tüfek* 'gun' (cf. τοὺς τουφάκας in Critob., above).

2. MLat. *bombarda* (cf. Du Cange), It. *bombarda* (> Sp. *lombarda*, Fr. *bombarde* > ME *bombard*), all in early use for 'cannon', deriv. of Lat. *bombus* 'booming, humming', early loanword fr. Grk. βόμβος id. REW 1199.

It. *cannone* (> Sp. *cañon*, Fr. *canon* > NE *canon, cannon*), deriv., with augmentative suffix of Lat. *canna* 'reed, tube', loanword fr. Grk. κάννα 'reed'.

It. *fucile* (> Fr., Sp. *fusil*), fr. OIt. *focile* 'flint', deriv. of Lat. *focus* 'fire'. REW 3399.

It. *schioppo* (dim. *schioppetto* > Sp. *escopeta*), formerly any 'handgun', now 'shotgun', fr. Lat. *stloppus* 'sound made by snapping the cheek', imitative. REW 8270.

Rum. *pușcă*, fr. Slavic (below, 6).

Rum. *tun*, formerly 'thunder', hence 'cannon', fr. Lat. *tonus* 'sound'. Tiktin 1661 f. Pușcariu 1772.

3. NIr. *gunna*, W. *gwn* (also *gunna mōr, gwn mawr* 'great gun, cannon'), fr. ME *gonne, gunne* (below, 4). Parry-Williams 158.

W. *cyflegr* 'cannon' (cf. Evans s.v.), etym.?

NE *rifle* in earliest use the 'groove' in the gun barrel, fr. vb. *rifle* 'form the grooves', fr. LG *rifeln* id. : OE *gerifled* 'wrinkled' (NE obs. *rivel* 'wrinkle' sb. and vb.), etc. NED s.v. Falk-Torp 898.

MHG *bühse*, NHG *büchse* (as a kind of gun since 14th cent., still in local use), MLG *busse* (> Dan. *bøsse*, Sw. *bössa*), all also and orig. 'box' (as OHG *buhsa*, OE-NE *box*), esp. one of cylindrical shape (hence 'gun'), fr. MLat. *buxis*, Grk. πυξίς 'box'. Weigand-H. 1.300. Falk-Torp 129.

NHG *gewehr* (> Dan. *gevær*, Sw. *gevär*, Du. *geweer*), orig. 'defense' (: NHG *wehren* 'prevent, defend', etc.), hence 'defense weapon, weapon', finally specialized to 'gun'. Weigand-H. 1.717. Falk-Torp 305.

NHG *flinte* (17th cent.+, still in local use), fr. NE *flint*, borrowed at the time when the *flint-lock* was introduced. Weigand-H. 1.544.

NHG *geschütz*, formerly only coll. 'artillery', now also of the single cannon, coll. formation to *schütz* 'shot'. Weigand-H. 1.701.

5. Lith. *šaudyklė* (formerly only 'shuttle', neolog. for 'gun'), fr. *šaudyti* 'shoot'.

Lith. *kanuolė* (NSB; not in Kurschat or Lalis), fr. NHG dial. *kanol* = *kanone*. Alminauskis 62.

Lith. *patranka* (neolog. for 'cannon', given as preferred form by NSB s.v. *kanuolė*) : *patrankyti* 'strike, hit', *trenkti* 'strike, clash', etc. (Leskien, Ablaut 352).

Rum.	*praf, iarbă*	NHG	*pulver*		
NIr.	*pūdar*				
W.	*pylor, powdr*				
Br.	*poultr*				

Most of the words for 'gunpowder' are the same as those for 'powder' in general, which are the same as, or derived from, those for 'dust' (1.213). While they may be made more specific by compounds or phrases, like NE *gunpowder*, NHG *schiesspulver*, Fr. *poudre à fusil*, *à canon*, they are ordinarily used alone, their special application being clear from the context or the situation. But sometimes there is a choice between parallel forms for 'powder', e.g. for 'gunpowder'

always Sp. *pólvora* vs. *polvo*, Du. *kruit* vs. *kruid;* or definite specialization to 'gunpowder', as Russ. *poroch*.

A few are words for 'plant, herb' (8.53), which included medicinal herbs and spices and were applied to gunpowder from its resemblance to ground spices or medicaments.

1. Grk. βοτάνη 'herb, plant', Byz. 'gunpowder', e.g. Ducas pp. 211, 249, 266, Critob. 1.29, 30. Chalcond., p. 231.21 f. uses κόνις 'dust'.

NG lit. πυρῖτις, fr. πῦρ 'fire'.

NG μπαρούτι, fr. Turk. *barut*.

2. Lat. *pulvis*, gen. *pulveris* 'dust, powder' (1.213), in late MLat. 'gunpowder'. Hence It. *polvere*, OFr. *poldre*, *pouldre* (> Br. *poultr*), Fr. *poudre* (> ME *poudre*, NE *powder* > NIr. *pūdar*, W. *powdr*), Sp. *pólvora*, Rum. *pulbere* (not in common use), W. *pylor* (Loth, Mots lat. 196), NHG *pulver*. REW 6842.

Rum. *praf* 'dust, powder' and (*praf de puşcă*) 'gunpowder', fr. Slavic, SCr. *prah*, etc. (below, 5). Tiktin 1231.

Rum. *iarbă* 'herb, plant' (fr. Lat. *herba* id.), also (*iarbă de puşca*) 'gunpowder'. Tiktin 748 f.

3. MHG, MLG *krūt* 'plant, herb, spice' and 'gunpowder' (> Dan. *krudt*, Sw. *krut*), NHG *kraut* formerly used also for 'gunpowder', Du. *kruit* 'gunpowder' vs. *kruid* 'herb'. Falk-Torp 583. Hellquist 515. Weigand-H. 1142. Franck-v. W. 353.

4. Lith. *parakas*, fr. Russ. *poroch* (below, 5).

Lett. *bi(s)zāles* (pl.), cpd. of *bise* 'gun' and *zāle* 'plant, grass', semantic borrowing of MLG *büssenkrūt* (cf. 20.28 and above, 3). Mühl.-Endz. 1.300, 4.696.

5. SCr. *prah*, Boh. *prach*, Pol. *proch*, Russ. *poroch*, general Slavic for 'dust', as ChSl. *prachŭ* (1.213).

SCr. *barut*, like NG μπαρούτι, fr. Turk. *barut*.

20.31 ARMOR (Defensive)

Grk.	*ὅπλα, τεύχεα, πανοπλία*	Goth.	*sarwa*	Lith.	*šarvai, apsiginklavimas*

NIr.	*ēide (catha)*	OHG	*saro, gisarawi*	Av.	*varəθa-*
W.	*arfogaeth*	MHG	*harnas(ch), sar, geserwe*		
Br.	*harnez*	NHG	*rüstung, harnisch*		

Many of the words for 'weapons, arms' (20.21) cover both offensive and defensive arms. The latter may, of course, be expressed more specifically by the addition of 'defensive', 'of (or for) defense', e.g. Grk. ὅπλα ἀμυντικά, Fr. *armes défensives*, NHG *schutzwaffen*, Lett. *aissardzības ieroci*, SCr. *oružje za obranu*, Boh. *zbraně ochranně*, Pol. *broń odporna*. Such obvious phrases are not entered in the list. Apart from a few repeated from 20.21, those entered are such as correspond most nearly to NE *armor* in its historical uses.

Some of them may cover the whole military equipment but are used mostly of defensive armor. Some may cover all defensive arms including the shield,

others only the body-armor in the widest sense, 'breastplate, coat of mail, helmet', etc. These latter may result from a specialization of 'clothing' or an extension of 'breastplate' or the like (20.31).

In recent times, when the old defensive armor of the individual fighter has become obsolete, 'armor' is used for armored equipment, as of ships and vehicles.

In this sense NHG *panzer* (orig. 'breastplate', 20.32), e.g. *panzerwagen* 'tanks', *panzertruppen*, etc.

1. Grk. ὅπλα 'weapons, arms' (20.21) includes defensive arms. Hence, through vb. ὁπλίζω, ὁπλισμός, etc.

Grk. τεῦχος, but chiefly pl. τεύχεα ('arms', esp. defensive), prob. orig. 'implement' (like ὅπλον) : τεύχω 'make, prepare, produce, cause', etc. Boisacq 963.

Grk. πανοπλία 'full armor' (including offensive and defensive arms), deriv. of adj. πάνοπλος 'in full armor', cpd. of πᾶς 'all' and ὅπλα 'arms' (above).

Byz., NG ἀρματωσία (also 'armament, equipment'), deriv., through vb. ἀρματώνω of ἅρματα 'arms' (20.21).

2. Lat. *arma* 'weapons, arms' (20.21) includes and was prob. first 'defensive armor'. Hence, through vb. *armāre*, *armatūra* > It. *armatura*, Fr. *armure* (> Rum. *armură*), Sp. *armadura*. REW 653.

OFr. *herneis*, Fr. *harnais* (> It. *arnese*, Sp. *arnés*), now Fr. *harnois* arch. or lit. and distinguished from *harnais* 'harness'), fr. ON **her-nest* 'provisions for the army', cpd. of *herr* 'army', and *nest* 'provisions, viands'. REW 4119. Gamillscheg 509. Formerly taken as fr. Celtic cpd. of word for 'iron', Ir. *iarn*, etc. (so Falk-Torp 381, NED s.v. *harness;* still otherwise for second part Jenkins, Mod. Ph. 10.439).

Hence (directly or partly through MLG) ON *herneskja*, Dan. *harnisk*, Sw. *harnesk*, ME *harneis* (NE *harness*, now familiar only in the specialized sense, with reference to horses, etc.), Du. *harnas*, MHG *harnas(ch)*, NHG *harnisch*. Although these words are most commonly used of 'coat-of-mail, body-armor', they also have a wider scope, as originally.

3. Ir. *gaisced*, possibly late borrowing fr. W. *gwisgad* 'clothing' (6.12). Pedersen 2.4.

NIr. *ēide* (*catha*), lit. 'clothing (of war)', cf. Ir. *ētach*, NIr. *ēadach* 'clothes' (6.12).

W. *arfogaeth*, deriv. of *arfog* 'armed', fr. *arf* 'weapon' (20.21).

Br. *harnez*, prob. fr. Fr. *harnais*, *harnois*, but with change of suffix. Henry 157. Otherwise Thurneysen, Keltorom. 37 f.

4. Goth. *sarwa* (pl.; renders ὅπλα, πανοπλία), OE *searu* (also 'cunning'), OHG *saro*, *gisarawi*, MHG *sar*, *geserwe*, cf. ON *sørvi* 'necklace' (of pearls or precious stones), prob. : Lat. *serere* 'join, compose, contrive', Ir. *sreth* 'row, series', Grk. ὅρμος 'necklace', εἴρω 'fasten together in rows, string', etc. Walde-P. 2.500. Falk-Torp 960. Feist 411.

ON *herklæði*, OE *herewǣd*, both lit. 'army-clothes' (cf. 20.15, 6.12).

ON *herneskja*, ME *harneis*, NHG *harnisch*, etc., see under OFr. *herneis* (above, 2).

ME *armure*, NE *armor*, fr. OFr. *armure* (above, 2).

NHG *rüstung* ('equipment', esp. military; OHG *rustunga* 'tool'), Du. *uitrusting*, derivs. of NHG *rüsten*, Du. *rusten* 'arm, equip' (MLG *rusten* > Dan. *ruste*, Sw. *rusta*, whence *rustning*, in Sw. usually cpd. *vapenrustning*), OHG *rusten* 'prepare, adorn' = OE *hyrstan* 'decorate, ornament', cf. (pples.) ON *hroðinn* 'adorned', OE *gehroden* 'laden, adorned', prob. fr. the root in Lith. *krauti* 'pile up, pack, load', ChSl. *kryti* 'cover, hide', etc. Walde-P. 1.477. Falk-Torp 924.

5. Lith. *šarvai* (pl.) : OPruss. *sarwis* 'weapon', fr. Goth. *sarwa* (above, 4). Feist 411. Stender-Petersen 132.

Lith. *apsiginklavimas*, deriv. of *apsiginkluoti* 'arm oneself', refl. of *apginkluoti*, this fr. *ginklas* 'weapon' (20.21).

Lett. *brun'as* (orig. 'breastplate' as OPruss. *brunyos*, pl.), fr. (through Slavic?) Gmc., Goth. *brunjō*, OHG *brunia*, etc. (20.32). Mühl.-Endz. 1.340.

6. ChSl. *orąžĭja* 'weapons' (20.21), also renders πανοπλία Lk. 11.22.

SCr. *oklop*, mostly 'breastplate' (20.32).

Boh. *brněni*, Russ. *bronja* 'coat-of-mail', also and orig. 'breastplate', fr. Gmc. (20.32).

Pol. *zbroja* (Boh. *zbroj* 'arms, armor'), etym.? Miklosich 390. Brückner 648.

7. Skt. *āyudha-* 'arms' (20.21) includes defensive armor. Macdonell-Keith, 1.60.

Av. *varəθa-* (Yt. 13.26, 71 clearly 'defensive armor' vs. *snaiθiš-*), like *vārəθman-*, Skt. *varman-* 'body-armor, corslet' (20.32), fr. *var-* 'cover'.

Here are included the main words for armor protecting the trunk of the body, regardless of the changing material or form, ranging from the single front plate (as orig. NE *breastplate*) to the full corslet or coat-of-mail. A few of the words reflect simply the notion of 'covering, protection' and so would be equally applicable to all forms. But more are based upon either the material used or the part of the body protected, especially the breast, but in some cases originally the belly or the neck—such names being unaffected by subsequent changes of material or form.

1. Grk. θώρᾱξ ('corslet' Hom.; only secondarily the part covered 'trunk, chest'), perh. : Skt. *dhāraka-* 'receptacle' fr. IE **dher-* 'hold'. Walde-P. 1.858. Boisacq 361.

2. Lat. *lōrīca*, prob. deriv. of *lōrum* 'thong, strap'. Walde-H. 1.822. Otherwise, as loanword fr. unknown source, Ernout-M. 562.

Besides the commonest and most generic words for 'shield', some of the most important of those used less commonly or for special types are mentioned.

A recurring connection is that with words for 'board', properly applied to the wooden shield. Some of the terms orig. denoted some part of the shield as the boss or rim. The function of 'protection' is a rare source.

1. Grk. ἀσπίς, etym.? Walde-P. 1.50, 2.658. Boisacq 90.

Grk. σάκος : Skt. *tvac-*, *-tvacas-* 'skin, hide'. Walde-P. 1.747. Boisacq 849.

Grk. θυρεός, in Hom. 'stone placed against the door' (: θύρα 'door'), in late writers freq. 'oblong shield' and esp. for Lat. *scūtum*, vs. ἀσπίς = Lat. *clipeus*.

2. Lat. *scūtum* (> It. *scudo*, OFr. *escut*, Fr. *écu* now obs., Sp. *escudo*, Rum. *scut*), either fr. **skouto-m*, fr. the root **skeu-* 'cover' in Skt. *skāuti* 'covers', Grk. σκῦτος 'skin, hide', Lat. *obscūrus* 'dark, obscure', etc.; or fr. **skoito-m* : Ir. *sciath*, etc. 'shield' (below, 3). Walde-P. 2.543, 548. Ernout-M. 913.

Lat. *clipeus* (*clupeus*, *clipeum*), the round bronze shield, etym. dub., perh. loanword. Walde-P. 1.432. Ernout-M. 198. Walde-H. 1.235 f.

Fr. *bouclier*, OFr. *bocler* (> ME *bocler*, NE *buckler;* also It., Sp., MHG, Boh., Pol. forms, but mostly special 'small shield'; only in Fr. reg. for 'shield', replacing *écu*), orig. adj. with *escut* (above) 'shield having a boss', deriv. of *boucle* 'boss', fr. Lat. *buccula* 'cheek'. REW 1364. Gamillscheg 125. NED s.v. *buckler*.

W. *tarian*, fr. ME *targe* (below, 4). Parry-Williams 33.

4. Goth. *skildus*, ON *skjǫldr*, OE *scild*, etc., general Gmc., prob. as orig. a 'flat piece, board' (cf. *tenues tabulae* of the German shields, Tac. Ann. 2.14. and OE *bord* 'board', often 'shield') : Lith. *skiltis* 'slice', fr. the root in Lith. *skelti* 'split', ON *skilja* 'separate', Goth. *skilja* 'butcher', etc. Walde-P. 2.592. Falk-Torp 1006 f. Feist 432.

Other, less common or more special, Gmc. words.

ON *targa*, OE *targa*, *targe* (> OFr. *targe* > ME, NE *targe*, whence dim. *target*) = OHG *zarga* 'border'. Fr. *targe* also > NHG *tartsche* > Slavic forms, of which Pol. *tarcza* has become the reg. word for 'shield'. Walde-P. 1.807. NED s.v. *targe*. Brückner 565.

6. ChSl. *štitŭ*, etc., general Slavic (but Pol. *szczyt* now obs. in this sense) : Ir. *sciath*, etc. (above, 3). Brückner 546.

Pol. *tarcza*, see under ON *targa*, etc. (above, 4).

7. There is no reference to shields in Skt. or Av., only 'shield' in fig. sense 'protection', or 'corslet' (20.33).

20.35 FORTRESS

Grk.	*τεῖχος, φρούριον*	Goth.	....	Lith.	*tvirtovė*
NG	*φρούριο(ν), κάστρο*	ON	*borg*	Lett.	*cietuoksnis*

W.	*caer, castell*	MHG	*vestenunge, vestunge*		
Br.	*kreñvlec'h*	NHG	*festung*		

'Fortress' may be expressed by words that denoted also or originally the all-important 'wall', or an 'inclosed place', 'guard, shelter' or 'stronghold'. Most of the modern words are derived from those for 'strong' or 'firm', some of these involving borrowing either formal or semantic, the latter probable in the Balto-Slavic words, which seem to be modeled on NHG *festung* or the corresponding LG form.

1. Grk. τεῖχος 'wall' (7.27) is also the usual means of expressing 'fortress'. The city-walls, the κλυτὰ τείχεα of Troy, the μακρὰ τείχεα of Athens, were the fortress, and τεῖχος is frequently used where the sense is not strictly 'wall', but 'fortress' e.g. Hdt. 7.59, Thuc. 3.51, 3.85, etc. To fortify a place was to 'build walls, wall it in', τειχίζω (τὴν πόλιν ἐτείχισαν, ἐτειχίσθη 'Αταλάντη, Thuc. 1.93, 2.32), whence also ἐπιτειχίζω 'build fortifications against' and ἐπιτείχισμα 'frontier fortress'.

Grk. *φρούριον* (also 'garrison') : *φρουρός* 'guard' (fr. **προ-hoρος* : *ὁράω* 'watch, see', 15.51), vb. *φρουρέω* 'keep guard', etc.

Byz. *κάστρον*, NG *κάστρο*, fr. Lat. *castrum* (below, 2).

2. Lat. *castellum*, deriv. of *castrum*, rarely 'fortress', mostly in place-names or esp. pl. *castra* 'fortified camp', beside Umbr. *castruo* 'fundos', prob. as orig. a piece of land cut off, that is, laid out, fr. the same root as *castrāre* 'castrate', orig. 'cut' (3.14). Walde-P. 1.448. Ernout-M. 160. Walde-H. 1.180.

Hence the widespread Eur. words which in earlier periods denoted a fortress, as OFr. *castel*, ME *castel*, Ir. *caisel*, W. *castell*, but later a 'castle' even without fortifications, as Fr. *château*, NE *castle*. NED s.v. *castle*, sb. 3.

It. *fortezza*, Fr. *forteresse* (> ME, NE *fortress*, Rum. *fortăreaţă*), OFr. also *fortelece* (> Sp. *fortaleza*), in earliest use 'might', derivs. of Lat. *fortis* 'strong, mighty' (4.81), whence also in sb. use for 'fortress' Fr. (> NE) *fort*, Sp. *fuerte*. REW 3457.

3. Ir. *dūn* (Gall. *-dūnum* in place names, MW *din*) : OE *tūn* 'inclosed place' (NE *town*), OHG *zūn* 'hedge, fence', etc. (19.15). Walde-P. 1.778. Pedersen 1.50.

W. *cader* (cf. Evans s.v., not in Spurrell, now obs.?) and *caer*, prob. : Ir. *cathir* 'city' (see 19.15).

Br. *kreñvlec'h*, fr. *kreñv* 'strong' (4.81).

4. ON *borg*, OE, OHG *burg* 'fortified place', hence 'city' (Goth. *baurgs* reg. = *πόλις*), see under 'city' (19.15).

MHG *vestenunge*, MLG *vesteninge* (> Dan. *fæstning*, Sw. *fästning*), Du. *vesting*, MHG *vestunge*, NHG *festung*, fr. MHG *vesten* 'make fast', *veste* 'firm, fast'. Weigand-H. 1.524. Falk-Torp 289.

5. Lith. *tvirtovė* : *tvirtas* 'firm', ChSl. *tvrŭdŭ* 'firm, stable', etc., see under 'hard' (15.74).

Lett. *cietuoksnis*, fr. *ciets* 'hard, firm' (15.74). For suffix, cf. Leskien, Bildung d. Nom. 319.

6. ChSl. (late), Bulg. *gradište*, Boh. *hradiště*, Russ. *gorodišče*, old Slavic word for 'fortified place' (Niederle, op. cit. 2.299 ff.; but now used mostly of a ruined city or fortress), deriv., through vb., of ChSl. *gradŭ*, etc. 'city' (19.15).

SCr. *tvrđava*, Boh. *tvrz*, Pol. *twierdza*, fr. SCr. *tvrd*, etc. 'hard', orig. 'firm' (15.74).

Boh. *pevnost'*, fr. *pevný* 'firm' = Pol. *pewny* 'sure', both as orig. 'trustworthy' : ChSl. *upŭvati* 'trust', etc. Brückner 403.

Pol. *forteca*, fr. It. *fortezza* (above 2). Brückner 126.

Russ. *krepost'*, fr. *krepkij* 'firm, solid, strong' : ChSl. *krěpŭkŭ* 'strong' (4.81).

7. Skt. *pur-* (nom. sg. *pūr*) 'fortified place, stronghold' (cf. Macdonell-Keith 1.538 f.) : Grk. *πόλις* 'city', in early use also 'citadel', Lith. *pilis*, Lett. *pils* 'castle', see 19.15.

OPers. *didā-* : Skt. *dehī-*, Grk. *τεῖχος* 'wall', etc. (7.27).

The 'tower', which was primarily military, may conveniently be considered here. The majority of Eur. words go back, directly or indirectly, to Lat. *turris*.

1. Grk. *πύργος*, orig. dub., perh. fr. some Anatolian source. Boisacq 829. Feist 85 (with refs.).

Grk. *τύρσις*, *τύρρις*, prob. of Anatolian orig., perh. the word upon which *Τυρσηνός*, *Τυρρηνός* 'Etruscan' is based.

2. Lat. *turris* (Osc. *tiurri* 'turrim'), fr. Grk. *τύρρις* or the same source. Ernout-M. 1066.

Lat. *turris* > It., Sp. *torre*, OFr. *tor*, Fr. *tour* (> ME *toure*, NE *tower*, Ir. *tor*, *tur*, W. *twr*, Br. *tour*; so for Celtic Pedersen 1.238, but W. *twr* prob. through ME *toure*), OE *torr*, OHG *turri*.

MHG, MLG *torn*, *turn*, Du. *toren*, fr. an OFr. *torn* (cf. Fr. *tournelle* 'small tower'), a by-form or *tor*, *tour* by confusion with *torn*, *tour* 'turning lathe'. MHG *turm* (beside *turn*), NHG *turm*, with *m* for *n*, as in MHG *harm* beside *harn* 'urine', etc. Hence Lith. *turmas* ('tower' Kurschat; now dial. 'jail'), Pol. *turma* 'dungeon', Russ. *tjur'ma* 'prison, jail' (21.39). Franck-v. W. 703. Falk-Torp 1239. Weigand-H. 2.1089. Kluge-G. 635 (but OFr. *torn*, not fr. Lat. acc. *turrim*).

3. Goth. *kēlikn* (renders *πύργος*, also *ἀνώγεον* 'upper room'), fr. Gall *celicnon* 'tower', orig. and course of transmission dub. Feist 310 f. (full refs.).

OE *stēpel*, *stȳpel* (freq. for *turris*, as in Gospels, WSax. versions vs. *torr* Lindisf.; NE *steeple* now only of a church) : *stēap* 'high, lofty' (NE *steep*), *stūpian* 'bow', etc. Walde-P. 2.619. NED s.v. *steeple*.

4. Lith. *bokštas* (NSB, etc.), fr. Wh-Russ., Ukr. *bakšta* (Brückner, Sl. Fremdwörter 73), this: Boh. *bašta*, etc. 'bastion', Russ. *bašnja* 'tower', fr. It. *bastia* 'bastion'. Berneker 45.

Lith. *kuoras* (NSB, and the word used in the NT versions), prob. fr. NHG *chor* 'choir' in its special application to the 'choir-loft' (Paul, Deutsches Wtb. s.v.), Kurschat s.v. *koras*.

5. ChSl. *stlŭpŭ* (= *πύργος* Gospels, etc.; also 'column, pillar', as SCr. *stup*, Boh. *sloup*, Russ. *stolp*, *stolb*) : ON *stolpi*, etc. 'post', fr. *p-* and *b-* extensions of *stel-* 'set, place'. Walde-P. 2.646. Falk-Torp 1173.

ChSl. *synŭ* (freq. for *πύργος* in Supr.; also late *sunŭ*), fr. the root of *sŭpa*, *suti*, iter. *sypati* 'strew, pour', whence such derivs. as ChSl. *sŭpŭ* 'heap', Russ. *nasyp* 'heaped up earth, mound, dam', Pol. *wysyp* 'mound, terrace, etc.' Miklosich 334, 335. Brückner 524.

Boh. *věž*, Pol. *wieża* : ORuss. *veža* 'tower, hut, tent', late ChSl. *veža* 'cell, tent'(?), Slov. *veza* 'hall', fr. the root of ChSl. *vezą*, *vesti* 'carry'(?). 'Tower' fr. resemblance in shape to the (peaked) tent or hut. Brückner 619 f.

The majority of the words for 'victory' are derived from verbs for 'conquer, win', and these are cognate with others for 'strive, gain', 'compel', 'have power, be able', 'put down' (prob.). In some cases the nouns are earlier (so in Gmc., where verbs like NHG *siegen* are secondary), and these may be based on notions like 'power' or 'profit'.

Most of the common verbs for 'conquer' belong with nouns for 'victory' and are mentioned in the following. Among others may be noted ME *conquere*, NE *conquer*, fr. OFr. *conquerre*, fr. VLat. **conquaerere*, recomposition of Lat. *conquīrere* 'seek for', hence 'gain, acquire' (NED s.v.).

1. Grk. *νῑκη*, vb. *νῑκάω*, prob. through notion of 'put down' : Skt. *nīca-* 'low', ChSl. *nicĭ* 'prone', Skt. *ni* 'down', etc. Walde-P. 2.335.

2. Lat. *victōria* (> Romance words), through *victor*, fr. *vincere* 'conquer, win' : Ir. *fichim*, Goth. *weihan*, OE *wīgan*, etc. 'fight' (20.11).

Rum. *biruinţă* (usual word before the introduction of *victorie*, e.g. in NT), fr. *birui* 'conquer, master', this fr. Hung. *bir* 'be able, can'. Tiktin 193.

Rum. *izbîndă*, fr. vb. *izbîndi* 'fulfil, succeed, win', fr. Slav., cf. ChSl. *iz-byti*, pres. *iz-bądą* 'be free of, be saved, dispose of', cpd. of *byti* 'be'. Tiktin 864.

3. Ir. *būaid*, NIr. *buaidh*, W. *buddugoliaeth* (deriv. of *buddug-ol* 'victorious'; *budd* 'profit' = Ir. *būaid*), perh. : MLG *būte* 'booty' (> NHG *beute*), but disputed and root connection? Walde-P. 2.186. Pedersen 1.111.

Br. *gounid*, also and orig. 'profit, wage' : W. *gweini* 'serve', Ir. *fognīu* id., cpd. of **upo-* and the root in Ir. *gnīu* 'do'. Pedersen 1.104. Henry 139.

Br. *trec'h* ('victory' and adj. 'victorious', with vb. *trec'hi* 'conquer') also and orig. 'stronger' = W. *trech*, Ir. *tressa* 'stronger' (cf. Ir. *trēn*, 4.81). Pedersen 1.296.

The verbal notion 'to defeat' is virtually equivalent to 'be victorious over, conquer', and is generally expressed by the verbs mentioned in 20.41 (e.g. Grk. *νῑκάω*, Lat. *vincere*, in pass. regularly 'be defeated'), the nouns corresponding to which mean 'victory'. Such verbal expressions of defeat are more common than the use of a noun for 'defeat' vs. 'victory', and in some cases such a distinctive noun seems to be lacking or at least has not been found quotable.

Most of the nouns for 'defeat' are based on such notions as 'inferiority, destruction, disaster, loss, breaking, blow'.

1. Grk. *ἧσσα*, Att. *ἧττα* (also NG lit.), back-formation to *ἡσσάομαι* 'be inferior, be defeated', fr. *ἥσσων* 'inferior, weaker', comp. to adv. *ἦκα* 'slightly, gently', perh. : Lat. *sēgnis* 'slow, inactive'. Walde-P. 2.474. Boisacq 317. Wackernagel, KZ 30.299.

Grk. *σφάλμα* 'fault, error' (16.76), and *σύμπτωμα* 'mishap', are also used for a military 'defeat'.

2. Lat. *clādēs* 'destruction, disaster' and in military use 'defeat' : *-cellere* 'strike' in *per-cellere*, etc., Grk. *κλάω* 'break', Lith. *kalti* 'strike, beat', etc. Walde-P. 1.436 ff. Ernout-M. 171, 192. Walde-H. 1.225.

NHG *niederlage*, quotable as 'defeat' in 15th cent. (> Dan., Sw. *nederlag*), Du. *nederlaag* (sense 'defeat' prob. fr. NHG), in earlier use (MHG *niderlāge*, etc.) 'laying down, place of rest'. Development of 'defeat' fr. the 'laying-down of arms. Weigand-H. 2.298.

5. Lith. *pralaimėjimas*, fr. *pra-* in its sense of 'away, failing' and *laimėjimas* 'victory'.

Lett. *kaviens* 'a blow' and (Drawneek) 'defeat' : *kaut* 'strike'. But generally expressed verbally by *sakaut* 'beat' (the enemy), *sakauts* 'beaten, defeated'.

6. SCr. *poraz*, Boh. *porážka*, Pol. *porażka*, Russ. *poraženie*, fr. vb. ChSl. (SCr., etc.) *poraziti* 'strike, smite, beat', deriv. of SCr., Boh., Pol., Russ. *raz* 'blow'. Miklosich 273. Brückner 454.

7. Skt. *parājaya-*, fr. *parā-ji-* 'conquer, overcome', in pass. 'lose, be defeated', cpd. of *ji-* 'conquer'. Cf. *jaya-* 'victory' (20.41).

Skt. *parābhāva-* 'disappearance, humiliation' and 'defeat' (quotable in military sense?), fr. *parā-bhū-* 'disappear, perish', cf. *parābhūta-* 'defeated'.

Words for 'attack' are based on such notions as 'go after, fall upon, rush upon strike against, seize upon, apply oneself to'.

1. Grk. *προσβολή* : *προσβάλλω* 'strike against'.

Grk. *ἔφοδος* 'approach, access' and often military 'advance, attack', cpd. of *ἐπί* 'upon' and *ὁδός* 'way, road'.

Grk. *ἐπίθεσις* (in NG the usual term), fr. *ἐπιτίθεμαι* 'apply oneself to' and 'attack'.

2. Lat. *impetus*, fr. vb. *impetere* 'attack' (less common than sb.), cpd. of *petere* 'fall upon, attack' (also commonly 'seek', 11.31). Ernout-M. 763 f. Walde-H. 1.684.

It. *attacco* (> Fr. *attaque*, Sp. *ataque*, Rum. *atac*), fr. vb. *attaccare* 'make fast, attach' (= Fr. *attacher*), hence, first in phrases 'join battle' or 'apply oneself to', 'attack' (in this sense > Fr. *attaquer*, etc.), cpd. deriv. of word seen in OFr. *estache* 'stake', orig. Gmc. (OE *staca*, MLG *stake*, etc.). REW 8218. Gamillscheg 56, 828. NED s.v. *attack* and *attach*.

NIr. *ionnsaighe*, fr. *ionnsaighim*, Ir. *insaigim*, cpd. of *saigim* 'go after'. Pedersen 2.608.

W. *ymosodiad*, fr. vb. *ymosod* 'set upon, attack', cpd. of refl. prefix *ym-* and *gosod* 'put, place' (12.12), hence orig. 'set oneself to'.

Br. *stourm*, loanword fr. Gmc. (OE-NE *storm*, etc.). Henry 254.

4. ON *atsōkn*, fr. *sœkja* 'seek' (11.31), esp. 'go after, pursue, attack'.

OE *rǣs*, *on-rǣs* (also 'rush, onrush'), ME *rese* = ON *rās* 'running, race' (> NE *race*) : Grk. *ἐρωή* 'quick motion, rush', prob. also Skt. *rasa-* 'sap, juice', etc. Walde-P. 1.149 f. Falk-Torp 881. NED s.v. *rese*, sb.

ME *asaut*, *saut* (NE *assault*), fr. OFr. *asaut*, VLat. **ad-saltus*, recomposition of Lat. *ad-sultus*, like vb. **ad-salīre* (> OFr. *asalir*, ME, NE *assail*) for *adsilīre* 'leap upon', cpd. of *salīre* 'leap'.

NE *attack*, fr. Fr. *attaque* or fr. vb. *attack*, this fr. Fr. *attaquer* (above, 2).

OHG *anaging* (Otfr.; other more common words?), lit. 'a seeking after' : *gingēn* 'long for', etc.

MHG *anval*, NHG *anfall* (> Sw. *anfall*), Du. *aanval*, fr. vb. MHG *anvallen*, etc. 'fall upon, attack'.

NHG *angriff*, fr. MHG *angrif*, OHG *anagrif* 'handling, seizure, undertaking', fr. vb. OHG *ana-grīfan* 'lay hands on', NHG *angreifen* 'handle, seize' and 'attack'. Hence semantically Dan. *angreb*, with vb. *angribe* 'attack'.

5. Lith. *užpuolimas*, fr. *užpulti* 'fall upon, attack', cpd. of *pulti* 'fall' (10.23).

Lett. *uzbrukums*, fr. *uzbrukti* 'fall upon, attack', cpd. of *brukti* 'break off' (intr.) = Lith. *brukti* 'slip into, force into', etc. Mühl.-Endz. 4.319, 1.339.

6. ChSl. *napadenĭje*, SCr., Boh., Pol. *napad*, Boh. *napadení*, Russ. *napadenie*, etc., fr. vb. ChSl. *na-pasti*, etc. 'fall upon', cpd. of *pasti* 'fall' (10.23). These words are used mostly for a sudden attack, onset (like NHG *überfall*).

SCr. *navala* : *na-valiti* 'attack', orig. 'roll upon', cpd. of ChSl. *valiti*, etc. 'roll' (10.15).

Boh. *útok*, Pol. *atak*, Russ. *ataka*, loanwords fr. Fr. *attaque* (above, 2).

7. Skt. *abhiyoga-* (but more common in other senses), fr. *abhi-yuj-* 'attack', cpd. of *abhi-* 'against' and *yuj-* 'join'.

Av. *draoman-* : *dru-* 'run'. Barth. 770.

Many of the verbs for 'defend', from which the nouns listed here are derived, meant first 'ward off, avert' something from or for the object defended (construed accordingly), later 'defend' with person or place defended as the direct object. Some are from such notions as 'fight about, contend, stand behind', and 'protect' from 'shield'. A few are based upon 'answer for, represent or argue in court', that is, were first used with reference to legal defense.

1. Grk. *ἄμῡνα* (not in Hom., and condemned by the Atticists, the verbal expression being preferred; the usual NG term) beside the vb. *ἀμύνω* 'ward off, defend, aid' (object defended in gen. or dat.), etym. dub., perh. : *ἀμείνασθαι* 'pass over, surpass', Lat. *movēre* 'move', etc. (10.11). The nouns for 'retreat' are from verbs denoting 'draw back, step back, turn aside'. In the widespread Eur. group to which NE *retreat* belongs, the orig. literal sense 'withdrawal' is forgotten, and NE *withdrawal* is now a euphemistic substitute.

Prior to the rise of distinctive military terms for 'retreat' the notion was covered by words for 'flight', parallel with the verbs for 'flee' (10.51). So Hom. φύγαδε 'in flight', and in the older Gmc. languages and some others, there seem to have been no more distinctive terms.

1. Grk. ἀναχώρησις and ὑποχώρησις, fr. ἀνα-, ὑπο-χωρέω 'go back, draw back', cpds. of χωρέω 'make room for, draw back', deriv. of χῶρος 'place'.

2. Lat. *receptus*, fr. *se recipere* 'draw back, retreat', refl. of *recipere* 'take back', cpd. of *capere* 'take'.

Fr. *retraite* (OFr. also *retret*), Rum. *retragere*, fr. vbs. OFr. *retraire*, Rum. *retrage* (Rum. cpd. forms after Fr.), fr. Lat. *retrahere* 'draw back', cpd. of *trahere* 'draw' (9.33).

It. *retirata*, Sp. *retirada*, fr. vbs. *retirare, retirar* 'withdraw, retire' (Fr. *retirer*), cpds. of *tirare, tirar* 'draw' (9.33).

3. Ir. *teched* 'flight' (: *techim* 'flee') is virtually 'retreat', e.g. in M1.44a, 18, 19 ('in flight before their enemies').

NIr. *cūl*, W. *cil* 'back' (4.19), and 'retreat' through phrases like 'turn one's back'. So cpd. W. *encil*.

Br. *kizadenn, kizadeg*, derivs. of *kiz* 'backward movement'.

4. Goth. *þlauhs*, ON *flōtti*, OE *flēam*, OHG *flucht* 'flight' (: vbs. for 'flee', 10.51) would cover military 'retreat'.

ME *retret*, NE *retreat*, fr. OFr. *retret;* Dan. *retræte*, Sw. *reträtt*, fr. Fr. *retraite* (above, 2).

Du. *terugtocht*, NHG *rückzug*, cpds. of words for 'back' (Du. *terug* = NHG *zurück*), and 'march'.

5. Lith. *atsitraukimas*, fr. *at-si-traukti* 'draw back, withdraw', refl. cpd. of *traukti* 'draw' (9.33).

Lett. *atkāpšanas* (Drawneek; not in Mühl.-Endz.), fr. *at-kāpt* 'draw back', cpd. of *kāpt* 'mount'.

6. ChSl. *běstvo* (quotable only as 'flight'), fr. the root of *běžati, běgati* 'flee'.

SCr. *uzmak* : *uzmaći* 'draw back', cpd. of *uz-* 'back' and *maći* 'touch, move' (: Boh. *macati* 'touch, handle', etc., Berneker 2.1).

Boh. *ústup*, Russ. *otstuplenie* : vbs. Boh. *ustoupiti*, Russ. *otstupit'* 'step back, withdraw', cpds. of *stoupiti, stupit'* 'step .

Pol. *rejterada* (Russ. *retirada* formerly in use), fr. It. *retirata* (above, 2).

Pol. *odwrót* 'turn', also used for 'retreat' : *odwrócić* 'turn aside', cpd. of *wrócić* 'return' (: Lat. *vertere* 'turn', etc.).

7. Skt. *palāyana-* 'flight', fr. cpd. of *palā* = *parā* 'away' and *i-* 'go'.

20.46 SURRENDER (vb.)

Under 'surrender' preference is given here to the verbal expressions as more generally quotable than nouns. Most of these verbs are compounds of verbs for 'give' (11.21), meaning lit. 'give up, give over', etc., and of which the military use is only one of many and in fact for some of the languages (e.g. Goth., ChSl.) is not strictly quotable. A few are from 'yield' or through 'deliver' from 'set free'.

The nouns are mostly corresponding forms, but in some cases the usual verbs and nouns, though of the same semantic source, are not parallel, e.g. It. vb. *arrendere* (intr. *arrendersi*) but sbs. *dedizione* or *resa*, Fr. vbs. *(se) rendre* or *(se) livrer*, but sb. only *reddition*, not *livraison*.

1. Grk. παραδίδωμι, NG παραδίδω 'give over, transmit', also 'surrender', cpd. of δίδωμι 'give'. So sb. παράδοσις 'transmission, tradition', also 'surrender' (παράδοσις πόλεως, Thuc.).

2. Lat. *dēdere* (sb. *dēditiō* > It. *dedizione*), and less commonly in military sense *trādere, reddere* (VLat. **rendere* > It. *rendere*, now mostly *arrendere*, Fr. *rendre*, Sp. *rendir;* sbs. It. *resa*, Sp. *rendicion;* Fr. *reddition* re-formed fr. Lat. *redditiō*), cpds. of *dare* 'give'. Ernout-M. 277.

Rum. *preda* (sb. *predare*, old infin.), fr. Slavic, ChSl. *prědati*, SCr. *predati* 'give over' (below, 6). Tiktin 1240.

3. Ir. *giallaim*, NIr. *gēillim* 'obey' (19.46), also 'yield, surrender'.

W. *rhoddi i fyny*, vb. for 'give' (11.21) with *i fyny* 'up'.

Br. *daskori* (sb. *daskor*), cpd. of prefix *das-* and vb. cognate with Ir. *cuirim* 'put, place', etc. Pedersen 2.501. Henry 89.

4. Goth. *atgiban*, ON *gefa upp*, OE *āgifan*, OHG *irgeban*, MHG *ergeben*, NHG *übergeben*, Du. *overgeven*, Dan. *overgive* (semantic borrowing fr. NHG or LG), Sw. *uppgiva*, all cpds. of Gmc. word for 'give', but older forms not quotable in military sense.

Sw. *överlämna*, cpd. of *lämna* 'leave, deliver' : ON *lifna*, Goth. *aflifnan* 'be left over', ON *leifa*, OE *lǣfan*, etc. 'leave' (12.18).

ME *yelde* (NE *yield*), fr. OE *gieldan* 'pay, give back', etc. (11.65). NED s.v. *yield* vb. 14–16.

NE *surrender* (vb. and sb.), fr. OFr. *surrendre* (Anglo-Fr. *surrender*), cpd. of *rendre* (above, 2).

5. Lith. *paduoti*, refl. *pasiduoti* (NSB s.v.), Lett. *paduot*, refl. *paduoties*, cpd. of vb. for 'give'.

6. ChSl. *prědati* (reg. for παραδίδωμι, though not quotable in strictly military sense), SCr. *predati*, Boh. *vzdati*, Pol. *poddać*, Russ. *sdat'* (all with corresponding sbs.), cpds. of vb. for 'give'.

7. Skt. *parādā-* 'give up' (quotable in military sense?), cpd. of *dā-* 'give'.

Most of the words for 'captive, prisoner' (of war) are either from verbs for 'take, seize' (in Greek 'taken by the spear'), or are derivs. of nouns for 'prison' (21.39), in which the sense 'prisoner' as inmate of a prison has been extended to 'prisoner' as one captured in war.

In the case of NE *captive, prisoner*, the former, though given in first place, is now used with reference to earlier times or to those taken by brigands or savages, while in present-day warfare so many *prisoners* are taken. Similarly in the Fr., Sp., Rum. groups listed.

1. Grk. αἰχμάλωτος, lit. 'taken by the spear', cpd. of αἰχμή 'spear' (20.26) and vbl. adj. of ἁλίσκομαι, aor. ἥλων 'be taken, seized'.

2. Lat. *captīvus* (> OFr. *chetif*, now only in secondary sense and as 'captive' replaced by *captif* > Rum. *captiv;* Sp. *cautivo*), deriv. of *captus*, pple. of *capere* 'take' (11.13).

It. *prigioniero* (or *-e*), Fr. *prisonnier* (> Rum. *prizonier*), Sp. *prisionero*, deriv. of It. *prigione*, Fr. *prison*, Sp. *prisión* 'prison' (21.39).

3. Ir. *cimbid*, NIr. *cime* : Ir. *cimb* 'tribute', Gallo-Lat. *cambiāre* 'exchange' (12.93). Pedersen 1.45.

Ir. *brage* (K. Meyer, Contrib. 243 f.), NIr. *braighe* (also *brāighe*, as if fr. *brāgha* 'neck'), beside Ir. *braig* 'chain', prob. : Grk. βρόχος 'noose', etc. Walde-P. 2.272 f. Stokes 181.

NIr. *geimhleach*, fr. *geimheal* 'chain, bond' = MIr. *gemel* 'fetter' : Grk. γέντο 'fastened', etc. Walde-P. 1.572 f. Pedersen 1.95.

W. *carcharor*, fr. *carchar* 'prison, fetters', fr. Lat. **carcarem* for *carcerem*. Loth, Mots lat. 144.

Br. *prizoniad* (so Vallée and Ernault), deriv. of *prizon* 'prison' (fr. Fr.).

4. Goth. *frahunþans*, pple. of *frahinþan* 'take captive', beside *hunþs* 'captivity' : OE *(here-)hūþ*, OHG *heri-hunda* 'booty', Sw. *hinna* 'reach', prob. fr. a parallel form of the root in OE *hentan* 'pursue', *huntian* 'hunt', outside connections? Feist 161.

ON *haptr*, OE *hæft, hæftling*, OHG, MHG *haft* (also adj. 'taken, seized', NHG *-haft*), beside Goth. *hafts* 'taken, joined', pple. of root seen in Goth. *hafjan* 'raise', Lat. *capere* 'take', etc.

ON *fangi* (late), Dan. *fange*, Sw. *fånge* (these formed after MLG *vangene*), Du. *gevangene*, NHG *gefangener*, fr. vb. seen in Goth. *fahan*, NHG *fangen*, etc. 'seize, capture' (11.14). Walde-P. 2.2. Falk-Torp 204 f.

ME, NE *captive, prisoner*, fr. Fr.

5. Lith. *kalinys*, beside *kalėti* 'be in prison', *kalinti* 'put in prison', *kalėjimas* 'prison', etym. dub. Connection with the remote Skt. *kārā-* 'prison' (Walde-P. 1.356 after Zupitza) hardly convincing. Or through the medium of

'fetter(ed)' : Lith. *kalti, kalinėti* 'beat, hammer, forge'?

Lett. *gūsteknis*, fr. *gūstīt* 'seize, bind'. Mühl.-Endz. 1.686.

Lett. *cietumnieks* (only 'prisoner' as inmate of prison?), fr. *cietums* 'prison' (21.39).

6. ChSl. *plěnĭnikŭ* (> Russ. *plennik*, now more commonly *plennyj*), through *plěniti* 'take captive', fr. *plěnŭ* 'booty' (20.48).

SCr. *zarobljenik*, fr. *zarobiti* 'take captive', cpd. of *robiti* 'enslave, plunder', fr. *rob* 'slave' (19.42).

SCr. *sužanj*, etym.?

Boh. *zajatec*, Pol. *jeniec*, fr. vb. seen in ChSl. *jęti* 'take, seize' (11.13). Berneker 429. Brückner 206.

7. Skt. derivs. of *bandh-* 'bind, capture' (9.16), pple. *baddha-* 'captured', as *baddhaka-* (AV), *bandhana-stha-*, also (with *d*, as if Iran.) *bandin-, bandīkṛta-*. So Av., OPers. *basta-* (in form = Skt. *baddha-*) is prob. 'prisoner' rather than lit. 'bound'. So OPers. *basta* in Bh. 2, 13, 14 "I cut off his ears, nose, and tongue, and put out his eyes; he was held prisoner in my court". Av. *bastō-* Yt. 15.52 is translated 'prissonier' by Darmesteter.

Many of the words for 'booty' are from verbs for 'seize' or 'obtain', or are cognate with words for 'advantage, profit'. Several, denoting originally the arms (or clothing) stripped from the slain foe, are cognate with nouns for 'skin, hide' (or 'cloak') or verbs for 'strip off, tear off, flay, peel'.

1. Grk. λεία (Ion. ληΐη, Dor. λάια, Hom. ληΐς), fr. root of ἀπολαύω 'enjoy, take advantage of', Lat. *lucrum* 'gain, profit', Goth. *laun* 'reward, pay', ChSl. *loviti* 'hunt'. Walde-P. 2.379. Walde-H. 1.826.

Grk. λάφῦρα (pl.; sg. rare), fr. a byform of root of λαμβάνω 'take' (11.13; cf. Skt. *labh-* 'seize, take'). Walde-P. 2.385. Boisacq 561.

Grk. σκῦλα (pl.; sg. less frequent), esp. 'arms stripped off the slain foe' : σκύλος, σκῦτος 'hide', OE *hȳd* 'skin, hide', etc. (4.12). Walde-P. 2.547. Boisacq 880.

NG pop. πλιάτσικα (pl.), fr. a Balkan word seen in Bulg., SCr. *pljačka*, Alb. *plaçkë*, Turk. *plaçka*, Rum. *pleaşcă* 'booty', this group itself of Grk. origin, derivs. of NG πλακώνω 'flatten out, crush, overwhelm'. G. Meyer, Alb. Etym. Wtb. 344. P. Skok, Revue intern. des études balkaniques 2.31 ff.

2. Lat. *praeda* (> It. *preda*, Rum. *pradă;* OFr. *preie*, Fr. *proie* now only 'prey'), fr. **prai-heda* : *prae-hendere* 'seize, take'. Walde-P. 1.589. Ernout-M. 802. REW 6714.

Most of the nouns for 'ambush' are from verbs for 'sit' or 'lie' or 'watch', all through the notion of 'lying in wait for'. The group represented by NE *ambush* is derived from a word for 'woods', through a verb 'be in the woods', hence 'lie in wait for'.

1. Grk. ἐνέδρα (late also ἔνεδρον) : ἕδρα 'seat'.

NG pop. καρτέρι, back-formation fr. καρτερῶ 'wait for', fr. class. Grk. καρτερέω 'be steadfast, endure'.

2. Lat. *īnsidiae* : *sedēre* 'sit'. Ernout-M. 918. Walde-H. 1.703.

W.	*cyfraith*	MHG	*reht*		
Br.	*gwir (reiz)*	NHG	*recht*		

The 'law' in its general sense, the institution or body of laws (Lat. *iūs*), is in part expressed by the same words as those denoting a specific law (Lat. *lēx*), or by the plural or derivs. of the latter. More commonly, however, the two notions are expressed by different terms, though even then the distinction is not always rigidly maintained. Especially the plural of words for 'lēx' may be used collectively = 'iūs'.

The words for 'iūs' are mostly based on the notion of 'what is right', connected with adjectives for 'right' (these in part from 'straight, upright', 'true', or 'fitting'), or on 'usage, custom'. One is from 'memory' through 'tradition'. The Lat. *iūs* was in origin a term of religious cult, as indicated by its cognates, and the Indo-Iranian words covered primarily religious law. Other examples of the religious source of legal terms will be noted occasionally in this chapter.

1. Grk. νόμος, in earliest use 'usage, custom', hence 'law' in both senses : νέμω 'dispense, distribute, apportion'. Walde-P. 2.330. Boisacq 663.

NG νόμος mostly 'lēx'; for 'iūs' either

sg. νομική or neut. pl. νομικά (σπουδάζει νομικά 'studies law'), fr. adj. νομικός 'pertaining to the law, legal'.

2. Lat. *iūs* (OLat. *ious*), orig. a term of religious cult, perh. 'sacred formula' (cf. *iūrāre* 'swear') : Ved. *yōs* 'health!', Av. *yaož-dā-* 'make ritually pure', Ir. *huisse* (**ius-tios*) 'just'. Walde-P. 1.203. Ernout-M. 506 ff. Walde-H. 1.733.

As a legal term this is peculiar to Latin, not general Italic. The Oscan-Umbrian term is **medos*, seen in Umbr. *meřs, mers* 'ius', Osc. *meddíss*, an official title (formed like Lat. *iūdex*), *medicim* 'magistracy' (in form like Lat. *iūdicium*), etc. : Lat. *meditārī* 'think, reflect', Grk. μέδομαι 'give heed to', Ir. *midiur* 'judge', etc. Walde-P. 2.259. Ernout-M. 599. Walde-H. 2.56.

It. *diritto*, Fr. *droit*, Sp. *derecho*, Rum. *drept*, fr. Lat. *dīrēctus*, VLat. **dērēctus* 'straight' (12.73), whence through 'right' as sb. 'right way, law'. REW 2648. Wartburg 2.87 ff.

3. Ir. *dliged*, NIr. *dlighe(adh)*, also 'right, duty' : *dligim* 'have a right to, claim upon', Br. *dle*, W. *dyled* 'debt', etc. (11.64).

Ir. *cert*, sb. use of *cert* 'right' (16.73).

Words for a 'law' (Lat. *lēx*), so far as they are not the same as those discussed in 21.11, are most commonly derived from verbs for 'put, place, set, lay' (12.12), hence orig. what is 'laid down, established'. Other semantic sources are 'knowledge', 'collection'(?), and 'beginning, foundation'.

1. Grk. νόμος, see 12.11.

Grk. θεσμός, Dor. τεθμός (dial. also θεθμός, τέθμιον, etc.), an old word, applied to the laws of Draco and Solon and usual in archaic inscriptions of several dialects, fr. τίθημι 'put, place' (12.12) and esp. 'lay down (a law), establish'.

Grk. ῥήτρα (dial. ῥήτρη, ϝράτρα, ϝρήτα) 'covenant, treaty', also sometimes simply 'law', orig. a 'declaration', fr. the root of ἐρῶ 'will speak, say', etc. (18.21).

2. Lat. *lēx* (> Romance forms), general Italic term (cf. Osc. *ligud* 'lege', etc.), prob. : *legere* 'collect', but precise semantic development ('collection' or 'selection'?) uncertain. Ernout-M. 542 f. Walde-H. 1.789 f.

3. Ir. *recht, dliged*, W. *cyfraith*, see 12.11.

Ir. *cāin*, etym. dub. Pedersen 1.333 (after Zimmer, fr. Lat. *canōn* 'rule'). Stokes, KZ 37.255 (: Skt. *çās-* 'command, rule', 19.45). Vendryes, De hib. voc. 119.

OE *dōm*, ME *dome* 'judgment' (21.17), also freq. 'law'.

OHG *gisatzida*, MHG *gesetzede, gesetze*, NHG *gesetz* : OHG *sezzen*, NHG *setzen* 'put, place, set' (12.12).

5. Lith. *įstatymas, įstatai* : *įstatyti* 'set up, establish', cpd. of *statyti* 'cause to stand, set'.

Lett. *likums* 'what is laid down, command, law' : *likt* 'leave, let, put, place' (: Lith. *likti* 'be left, remain', Grk. λείπω 'leave', etc. 12.28), but also 'determine, command'. Mühl.-Endz. 2.467 ff., 470.

6. ChSl. *zakonŭ*, etc. general Slavic (but Pol. *zakon* now arch. or eccl., or 'order' of monks, knights), cpd. of Slavic *konŭ* (in Russ. *kon* 'beginning, series, order', Boh. *do-kona* 'to the end', etc.; cf. ChSl. *konĭcĭ* 'end' 12.35, 14.26, *načęti* 'begin' 14.25, etc.), hence orig. 'starting-point, original determination' or the like. Berneker 560. Brückner 643 f.

Pol. *ustawa* : *ustawić* 'set in order, arrange', *ustać* 'stop, stand', cpd. of *stać* 'stand'.

7. Skt. *dharma-*, see 12.11.

Skt. *vidhi-* properly 'injunction, command', fr. *vi-dhā-* 'determine, ordain, bestow, distribute', cpd. of *dhā-* 'put, place' (12.12).

Av., OPers. *dāta-* fr. *dā-* 'put, place' (= Skt. *dhā-*, above). Barth. 726 f.

Terms for 'lawsuit' are mostly legal specializations of notions like 'strife', 'cause, case', 'affair', 'pursuit', 'procedure', sometimes made more specific by compounding with words for 'law' (as in NE *lawsuit*). Some of the words for 'law, iūs' or 'judgment' or 'court' come also, through phrases like 'bring to judgment or court', to be used for 'lawsuit'.

1. Grk. δίκη, in Hom. 'way, custom, usage' (: δείκνῡμι, Skt. *diç-*, etc. 'point out, show', Skt. sb. *diç-* 'direction, region'), also 'order, right, judgment', hence in Attic and likewise in the other dialects the regular technical word for 'lawsuit'. Walde-P. 1.776. Boisacq 170.

Grk. γραφή 'writing', hence as law-term 'written indictment', in Attic law applied (as distinct from δίκη) to certain kinds of public suits.

Grk. κρίσις, κρῖμα 'judgment' (21.17) are sometimes used for its subject, the 'lawsuit' (e.g. κρίσις in Thuc., Plato, etc., κρῖμα in LXX, NT).

2. Lat. *līs, lītis* 'strife, quarrel' (19.62), esp. 'legal strife, lawsuit' (> lit. It., Sp. *lite*; Sp. *lid* 'contest, fight').

Lat. *causa* 'cause' (17.42), hence esp. 'cause for legal action, lawsuit'. Ernout-M. 166 f. Walde-H. 1.190.

Lat. *actiō*, lit. 'action', fr. *agere* 'drive, act, perform', etc., and in particular 'bring' a suit, 'plead' a case, and the like.

Lat. *rēs* 'thing, affair' (9.90), but also 'legal matter, suit'.

It. *processo*, Fr. *procès* (> Rum. *proces*), Sp. *proceso*, fr. Lat. *prōcessus* 'advance, progress' (fr. *prō-cēdere* 'go forward, advance'), MLat. 'lis, causa' (Du Cange), with specialization to 'legal procedure'.

OFr. *plaid* (> ME *plaid, plai*, NE *plea*), Sp. *pleito*, fr. Lat. *placitum* 'opinion, decision, decree', orig. 'what is pleasing' : *placēre* 'please'. REW 6561.

3. Ir. *acraidecht*, beside *acre* 'a suing' vbl. n. to *ad-gairim* 'proclaim, summon, cite', cpd. of *gairim* 'call' (18.41). Pedersen 2.533.

Ir. *toiched* (cf. Laws, Gloss. 733), vbl. n. to *do-saigim*, cpd. of *saigim* 'go after, claim'. Pedersen 2.610.

Ir. *caingen* ('business, affair', sometimes legal 'dispute'), etym. dub. Zupitza, KZ 36.71. Osthoff, IF 27.179 f.

NIr. *cūis* or esp. *cūis dlighidh*, W. *cyngaws* (cpd. *cyn-caws*), fr. Lat. *causa*. Loth, Mots lat. 157.

Br. *prosez*, fr. the Fr. *procès*.

Br. *breud* (esp. 'plea') : *barn*, Ir. *breth* 'judgment', etc. (21.17).

4. Goth. *staua* 'judgment' (21.17), also sometimes 'lawsuit' (Mt. 5.40, 1 Cor. 6.1). Cf. Grk. κρίσις, κρῖμα (above, 1).

ON *māl* (the usual word) = *māl* 'speech', OE *mæþel*, OHG *mahal* 'discourse, assembly' and esp. 'court' (21.15).

ON *sǫk* (also and esp. the 'charge, accusation'), Dan. *sag*, esp. *retssag* (with *ret* 'law'), OE *sacu*, OHG *sahha*, MHG *sache*, all belonging to the group meaning 'strife' (Goth. *sakjō*, etc. 19.62), with widespread special application to 'legal strife' and also, through 'subject of the dispute', to 'thing' (9.90).

ON *deild* 'share, part' (: Goth. *dails*, etc. 13.23), hence 'dealings' and esp. 'legal dealings, lawsuit'.

ME *seute, suite*, NE *suit* or more specifically *lawsuit*, fr. Anglo-Fr. *siwte, seute*, etc. (= OFr. *sieute, suitte*, Fr. *suite*), fr. **sequita*, fem. sg. of pple. of VLat. *sequere* = Lat. *sequī* 'follow' (10.52), whence also, through OFr., the vb. ME *sewen*, NE *sue*, with gradual specialization of 'pursuit' through legal 'prosecution'. NED s.v. *suit*, sb.

OHG, MHG *strīt* 'strife, quarrel' (19.62), and MHG *kriec* 'battle, war' (20.12, 20.13), both used also for 'legal strife'.

Sw. *rättegång*, Dan. *rettergang* 'legal procedure', also esp. Sw. 'lawsuit', formed after MLG *rechtgank* = NHG *rechtsgang*, lit. 'the course of law'. Hellquist 870.

Dan. *søgsmaal* (not in common use now), fr. *söge* 'seek, sue' and *maal* 'speech'.

Du. *rechtsgeding*, cpd. of *recht* 'law' and *-geding*, coll. to *ding* 'thing, affair' = OHG *ding*, etc. 'assembly, court' (21.15).

NHG *rechtshandel, gerichtshandel*, cpds. of *handel* 'business, affair' with *recht* 'law' (21.11) and *gericht* 'court' (21.15).

Dan., Du. *proces*, Sw. *process*, NHG *prozess* (now more common than native terms), also ME *process* (NED s.v., 7), fr. Fr. *procès* (above, 2).

5. Lith. *byla* 'talk, conversation' and 'lawsuit' (cf. NSB s.v.) : *byloti* 'litigate, sue', OLith. 'speak' (18.21).

Lith. *prova*, Lett. *prāva*, fr. Slavic *pravo* 'law' (21.11). Mühl.-Endz. 3.383.

6. ChSl. *sądŭ* 'judgment' (21.17) in Mt. 5.40 *sądŭ prijęti*, lit. 'take judgment' for κριθῆναι 'be judged', here 'take legal action, bring suit'. So Boh. *soud* 'judgment, court' and also 'lawsuit'.

SCr. *parnica, parba*, Boh. *pře* : ChSl. *sŭ-pĭrěti sę* 'strive, contend', *pĭrja* 'strife', etc. (19.62).

Russ. *tjažba* (formerly common, now unusual) = late ChSl. *tęžiba* 'strife' : ChSl. *tęžiti, tęgnąti*, Russ. *tjanut'* 'draw' (9.33). Miklosich 351.

SCr., Boh., Pol. *proces*, Russ. *process* (in part more common than the native terms), fr. Fr. *procès* (above, 2).

7. Skt. *vyavahāra-* 'conduct, action, business', also used for 'legal action', fr. *vi-ava-hṛ-* 'have intercourse with, behave, fight, etc.', cpd. of *hṛ-* 'carry, bring' (10.61).

Skt. *vivāda-* 'strife' (19.62), also 'legal strife'.

Av. *araθya-, arəθra-* : *arəθa-* 'matter, affair', Skt. *artha-* 'business, cause, aim, thing, etc.'. Barth. 196.

Words for 'lawyer' are commonly derivs. or cpds. of those for 'law'. But the most widespread modern Eur. term was in origin 'one summoned' (to assist). A few are based on 'answerer' (denoting at first the defending lawyer), 'one who speaks for', 'one who is sworn' (as agent), 'one who cares for, attends to'.

Some of the terms included in the list from older periods were applied to persons learned in the law, but only distantly corresponding to the modern lawyers.

1. Grk. ῥήτωρ 'speaker, orator' (: ἐρῶ, ἐρρήθην, etc. 'speak', 18.21) was the term always used of the great pleaders like Lysias and Demosthenes, who were, if also politicians, the nearest thing to professional lawyers in fact, though not in name.

Grk. νομικός, adj. 'pertaining to the law' (deriv. of νόμος 11.11), is also used as sb., often rendered 'lawyer', but mostly denoting one learned in the law (in NT 'one learned in the Mosaic law') rather than a practicing 'lawyer'.

Grk. νομοθέτης 'establisher of laws, lawgiver' was the term applied to the early founders of legal codes, like Zaleucus, Charondas, Lycurgus, Draco, etc.

Grk. συνήγορος (-ήγορος : ἀγορεύω 'speak in the assembly', 18.21) and σύνδικος (: δίκη 'lawsuit'), both orig. adjs. and with συν- denoting assistance, were terms for public advocates and also those who assisted a private individual in litigation. Cf. Bonner and Smith, Administration of Justice 2.8.

Late Grk. δικηγόρος, quotable fr. 6th cent. and the regular NG term, cpd. of δίκη 'lawsuit' (18.13), second part as in συνήγορος (above), but accent as in δημηγόρος.

2. Lat. *iūriscōnsultus*, phrase cpd. with gen. sg. of *iūs* 'law' (21.11) and *cōnsultus* 'experienced, skilled' (also used alone in legal sense), pple. of *cōnsulere* 'reflect, take counsel'.

Lat. *advocātus*, pple. of *advocāre* 'call, summon', hence 'one called' (to assist), esp. in legal matters, and in imperial times 'lawyer'. Hence the Romance words (in learned or semi-learned form, e.g. Fr. *avocat* vs. *avoué*; Rum. *advocat*, or *avocat* fr. Fr.) and similar words in Gmc. and Balto-Slavic (see list). NE *advocate* is the usual term in Scotland (NED s.v.).

Lat. *causidicus*, cpd. of *causa* 'lawsuit' (21.13) and root of *dīcere* 'say'.

3. Ir. *aigne* (nom. pl. *aigneda, aichneda*), beside *aignes* (*aidnes, aines*) 'pleading, arguing, questioning', etym.?

Ir. *fechem* 'litigant', either 'plaintiff' or 'defendant' (21.21), also sometimes his 'lawyer'. Laws, Gloss. 336 ff.

NIr. *dligheadōir* or *fear dlighe* 'man of law', fr. *dlighe(ad)* 'law' (21.11).

W. *cyfreithiwr*, fr. *cyfreithio* 'litigate', this fr. *cyfraith* 'law' (21.11).

W. *twrnai*, fr. ME *aturne* (NE *attorney*). Parry-Williams 154.

Br. *breutaer*, fr. *breutaat* 'plead' : *breud* 'plea, lawsuit' (21.13).

4. Goth. *witōdafasteis* (renders νομικός, for which see above, 1), cpd. of *witōþ* 'law' (21.12) and *-fasteis*, fr. **fasts* = OE *fæst*, OHG *festi* 'firm, fast', semantic development prob. through 'one who is fast (= well grounded) in the law'. Feist 570.

ON *lǫgmaðr*, commonest term in Iceland for one learned in law, lit. 'lawman', but also in Norway a particular official at the *thing*, the 'law speaker' (for which NIcel. *lögsögumaðr*). Cf. Vigfusson 405.

ON *mālafylgjumaðr, mālafylgismaðr*, used for one who takes up a case for another, lit. 'case-follower, prosecutor of the case', cpd. of *māl* 'lawsuit' (21.13) with *fylgja* 'follow' and *maðr* 'man'.

Dan. *sagfører*, cpd. of *sag* 'lawsuit' and *føre* 'bring, carry'.

Sw. *jurist* (like NE *jurist*, etc., but a more popular term), fr. MLat. *jurista* : *iūs, iūris* 'law' (21.11).

OE *ǣglēaw* and *lageglēaw* (e.g. in parallel versions of Lk. 7.30, 11.45), cpds. of *ǣ* and *lagu* 'law' (21.12) with *glēaw* 'wise' (17.21).

OE *rihtscrīfend* (gl. Lat. *iūriscōnsultus, iūrisperītus*), cpd. of *riht* 'law' and *scrīfend* pres. pple. of *scrīfan* 'prescribe, ordain, impose (punishment), shrive'.

ME *lawyere*, NE *lawyer*, fr. *law* (21.12).

ME *legist*, fr. Fr. *légiste*, MLat. *legista* : Lat. *lēx* 'law' (21.12).

NE *attorney*, short for *attorney-at-law* (technically = British *solicitor*, but in U.S. the general term preferred by lawyers themselves to the pop. *lawyer*), earlier 'deputy, agent', fr. ME *aturneye*, fr. *attorn* 'direct, dispose', this fr. OFr. *atorner*, cpd. of *a-* 'to' and *torner* 'turn'. NED s.v.

OHG *ēwa gilērter* and *fon theru ēwa gilērter* both render Lat. *lēgisperītus* in Tat. Similarly MHG *rehtlērer, rehtmeister, rehtwīser* for Lat. *lēgisdoctor, jūrista* (cf. Lexer, svv.), NHG *rechtsgelehrter*, Du. *rechtsgeleerde*.

OHG *furisprehho*, MHG *vürspreche, vürsprecher* (Swiss *fürsprech*), lit. 'one who speaks for, in behalf of someone'. Kluge-G. 474.

NHG *rechtsanwalt* and (like U.S. *attorney*) also simply *anwalt* = MHG *anwalte* 'deputy, agent' : *walten* 'have power, rule'.

5. Lith. *advocatas*, Lett. *advocats*, see above, 2.

6. ChSl. *zakonĭnikŭ* (renders νομικός, for which see above, 1), fr. *zakonŭ* 'law' (21.12).

SCr. *pravnik*, Boh. *právník*, Pol. *prawnik* (SCr. mostly 'one learned in the law, jurist'), fr. *pravo* 'law' (21.11).

SCr. *pravni zastupnik*, Boh. *právní zástupce*, lit. 'law-agent', phrases with *zastupnik, zástupce* 'agent, deputy' (: SCr. *zastupiti* 'represent', Boh. *zastupovati* 'take one's place, act as a substitute').

SCr. *odvjetnik*, fr. *odvjet* = ChSl. *otŭvětŭ* 'answer' (18.32).

Russ. *prisjažnyj poverennyj*, lit. 'sworn agent or trustee', fr. past pples. of *prisjagat'* 'swear, take oath' (21.24) and *poverit'* 'believe, trust'.

Russ. *strjapciy* (now obs. or arch.) : *strjapat'* 'look out for, arrange, prepare' (now esp. 'prepare food, cook'). Miklosich 326.

7. Skt. *dharmajña-* 'knowing the law', would be an appropriate term for a 'lawyer', but there is no evidence for such a class (only advisers of the king as judge, etc.) in the judicial procedure of ancient India.

Many of the words for a 'court' of law are connected with words for 'law', 'judge', and 'judgment', and in some cases the same forms are used for 'law' and 'court' or for 'judgment' and 'court', doubtless through the medium of phrases like 'go to law', 'summon to judgment'. Several are words for 'meeting, assembly', including or specialized to the judicial 'court'. The group represented by NE *court* is based on 'court' = 'yard', in which the development to 'royal court' and 'judicial court' took place first in France.

Many of the words listed are used also for the place where justice is administered (e.g. Grk. δικαστήριον, NE *court*, etc.), and in case of Fr. *tribunal*, etc., this sense is the earlier. Or the place is expressed more specifically by compounds, like NHG *gerichtshof*.

1. Grk. δικαστήριον, fr. δικαστής 'judge' (21.18).

2. Lat. *iūdicium*, also 'judgment', fr. *iūdex* 'judge' (21.18) of which the pl. *iūdicēs* is also equivalent to the 'court' (as the body).

It. *corte*, OFr. *cort, curt, court* (> ME, NE *court*), Fr. *cour*, Rum. *curte*, fr. Lat. *cohors, cohortis* 'court' = 'yard' (7.15). The application to a judicial 'court' developed earliest in France (later in It., quite modern in Rum.), through the 'royal court' where justice was dispensed (influence of Lat. *cūria*, in MLat. often used of eccl. and judicial courts, not necessary). It was the most general word for 'court' (as still in English) until the introduction of *tribunal*, after which it was used mainly of special higher courts. REW 2032. Wartburg 3.851 f. NED s.v. *court*.

It. *tribunale*, etc., fr. Lat. *tribūnal* 'the raised platform on which seats of magistrates were placed' (: *tribūnus* 'tribune', orig. 'magistrate of the tribe, *tribus*').

3. Ir. *airecht*, orig. 'assembly of nobles', fr. *aire* 'noble' (19.36).

NIr. *cūirt*, fr. ME, NE *court*.

W. *llys*, Br. *lez*, orig. 'castle, court' (of a noble) : Ir. *liss, less* 'fortified place' (further etym. dub.; Stokes 247, Walde-P. 2.99), judicial sense doubtless after French and English.

4. ON, OE *þing*, OHG *ding*, etc., in the older period the most general word for the popular assembly both for legislative and judicial purposes (cf. Norges Gamle Love 5.737 ff.; Liebermann, Gesetze der Angelsachsen 2.222, 449 f.) : Goth. *þeihs* 'time' (14.11), with development through 'appointed time'. Walde-P. 1.724 f. Falk-Torp 1263. Feist 494.

ON *dōmr* 'judgment' (21.17), also 'court'. So rarely OE *dōm*. Liebermann, op. cit. 2, 2.54. Bosworth-Toller Suppl. s.v.

ON *lǫgrētta* ('legislature' and 'court'), cpd. of *lǫg* 'law' and *-rētta* : *rētta* 'straighten, adjust, raise', *rēttr* 'law', etc. (21.11). On history of its uses, cf. Vigfusson 405, and Heusler, Das Strafrecht der Isländersagas, p. 24.

OE *riht*, MHG *reht*, Dan. *ret*, Sw. *rätt* 'law' (21.11), used also for 'court of law'. Hence collectives OHG *girihti*, MHG *(ge)rihte*, NHG *gericht*, and cpds. Du. *rechtbank, gerechtshof* (both orig. the place, like NHG *gerichtshof*, but extended to the body).

OE *gemōt*, ME *imōt, mōt, mote*, NE (obs.) *moot*, the most general word for assembly (: ON *mōt* 'meeting, assembly', Goth. *gamōtan* 'have room', etc.) and for the judicial assembly more usual than the general Gmc. *þing* (cf. Liebermann, op. cit. 2.94, 449), also OE *mōt* in cpds., *folc-mōt*, etc. NED s.v. *moot*, sb.[1].

OE *mæþel*, OHG *mahal*, also general 'assembly' and 'discourse' : Goth. *maþl* 'meeting place, market', ON *māl* 'speech, lawsuit, case', Gmc. **maþla-*, prob. fr. the same root as OE *gemōt*, etc. (above). From the Gmc., MLat. *mallum, mallus* 'court'. Walde-P. 2.304. Falk-Torp 685 f. Feist 349 f.

5. Lith. *teismas* (neolog. for *sudas*), Lett. *tiesa* 'truth' (as Lith. *tiesa*), 'right', but esp. 'court' (Mühl.-Endz. 4.212) : Lith. *teisė* 'law' (21.11), *teisus* 'right' (16.73), *tiesus* 'straight' (12.73), etc.

Lith. *sudas*, loanword fr. Slavic (below, 6). Brückner, Sl. Fremdwörter 139.

6. SCr., Russ. *sud*, Boh. *soud*, Pol. *sąd* = ChSl. *sądŭ* 'judgment' (21.18).

7. Skt. *adhikaraṇa-* (in many senses, but including 'court', for which also esp. *dharmādhikaraṇa*, cpd. with *dharma-* 'law'), fr. *adhi-kṛ-* 'place at the head, appoint'.

Br.	barn	NHG	urteilen, richten		

The words for 'judge' (vb.), 'judge' (sb.), and 'judgment' are in large measure parallel forms in a given language, but not always so. Thus, beside Grk. δικάζω and κρΐνω, the former more exclusively legal, only δικαστής (not κριτής) is the legal term for the 'judge', and only κρίσις for 'judgment'. Cf. also NHG *urteilen*, *urteil*, but still *richter* (not *urteiler*) for the 'judge'.

Most of the verbs for 'judge' are derived from words for 'judge' (sb.), 'judgment', 'law', or 'lawsuit'. Some come through 'decide' from 'separate, divide', 'reflect', 'draw out', or the like.

Besides Grk. κρΐνω, others of the usual verbs for 'decide' (cf. 21.162), like Lat. *dēcernere*, NHG *entscheiden*, though less distinctively legal terms, may, beside their more general applications, refer to the decision of a magistrate or official body.

Instead of 'judge', the judge may 'declare', 'pronounce', 'rule', etc.

1. Grk. δικάζω, fr. δίκη 'right, justice, lawsuit' (21.13).

Both δικάζω and κρΐνω 'decide' (21.162) are common legal terms, with a distinction not always maintained but especially clear in the Gortyn law-code, the former being used where the judge pronounces formal judgment according to the law and the evidence, the latter where he acts directly as arbiter in case of conflicting evidence.

2. Lat. *iūdicāre* (> Romance words), fr. *iūdex* 'judge' (21.18).

3. Ir. *midiur* : W. *meddu* 'possess, be able', Lat. *meditārī* 'think, reflect', Grk. μέδομαι 'give heed to', Umbr. *mers* 'ius' (21.11), etc. Walde-P. 2.259. Pedersen 2.580.

Ir. *breth*, *brith*, NIr. *breith* 'judgment' (21.17), in phrases Ir. *berim brith ar*, NIr. *beirim* (or *tugaim*) *breith ar* 'put judgment on'; also NIr. denom. *breathnuighim*.

W. *barnu*, Br. *barn* : W. *barn*, Br. *barn* 'judgment' (21.17).

4. Goth. *dōmjan*, ON *dœma*, OE *dēman*, etc., the older Gmc. words (OHG *tuomen* not the common term), fr. Goth. *dōms* 'judgment', etc. (21.17).

Goth. *stōjan* : *staua* 'judgment, lawsuit' (21.17).

ME *iuge*, NE *judge*, fr. Fr. *juger*, above, 2.

OHG *irteilen* (also *ubarteilen*), MHG *erteilen*, with sbs. OHG *urteil(i)*, OS *urdēli*, MDu. *ordeel*, Du. *oordeel*, whence vbs. MHG, NHG *urteilen*, Du. *oordeelen*, cpds. of *teilen*, etc. 'divide' : *teil*, etc. 'part' (13.23). Kluge-G. 646. Franck-v. W. 477.

OHG-NHG *rihten*, *richten*, fr. *reht*, *recht*, 'law' (21.11).

OHG *suonen* (NHG *sühnen* 'expiate,

atone'), fr. *suona* 'judgment, court, atonement' (21.17).

5. Lith. *teisti* (neolog. for *sudyti*) : *teisus* 'right' (16.73), *teisė* 'law' (21.11).

Lett. *tiesāt* : *tiesa* 'truth, right, judgment, court' (21.15). Mühl.-Endz. 4.214.

Lith. *spręsti*, Lett. *spriest*, both orig. 'span, stretch, measure' : Lith. *sprindys*, Lett. *sprīdis* 'span', with development through 'draw' (a conclusion). Mühl.-Endz. 3.1022 f.

Lith. *sudyti* (old; now replaced by the native words), Lett. *suodīt*, fr. Russ. *sudit'* (below, 6). Mühl.-Endz. 3.1135.

6. ChSl. *sąditi*, etc., general Slavic, fr. *sądŭ*, etc. 'judgment' (21.17), 'court' (21.15).

7. Skt. *nirṇī-* 'lead out, take away' (cpd. of *nī-* 'lead', 10.64), hence 'find out, decide'. Hence sb. *nirṇaya-* 'judgment', and *nirṇaya-* with *vad-* 'speak, say' or the like, prob. more common legal expression for vb. 'judge' than *nirṇī-*.

Av. *vī-či-* 'distinguish, decide' (but not quotable in strictly legal sense) = Skt. *vi-ci-* 'distinguish, investigate', cpd. of *ci-* 'notice, observe'. Barth. 441.

21.162. 'Decide'. Some of the verbs listed under 'judge' are used also for 'decide' in general. Conversely, the usual verbs for 'decide', while generally not legal terms, may, more or less frequently, refer to a legal decision. Hence some of these (not a full list) are noted here.

1. The most common development is through 'distinguish', fr. 'separate', this in part fr. 'cut' or 'split'.

Grk. κρΐνω, διακρΐνω, Lat. *dēcernere* : Grk. κείρω, OE *sceran* 'cut off, shear', Ir. *scaraim*, Lith. *skirti* 'separate', etc. Walde-P. 2.584. Ernout-M. 178 f. Walde-H. 1.205.

Lat. *dēcīdere* (> Romance words and, through Fr., NE *decide*), cpd. of *caedere* 'cut' (9.22).

NHG *entscheiden*, in MHG 'separate, distinguish', cpd. of *scheiden* 'separate' (12.23).

SCr. *odlučiti*, cpd. of *lučiti* 'separate' (12.23).

2. NG ἀποφασίζω, fr. ἀπόφασις 'decision', this fr. ἀποφαίνω 'make known, declare', cpd. of φαίνω 'show'.

3. NHG *bestimmen*, MLG *bestemmen* (> Dan. *bestemme*, Sw. *bestämme*), in earliest use 'vocally designate', hence best : *stimme* 'voice'. Weigand-H. 1.219. Paul, Deutsches Wtb. 77. Franck-v. W. 55. Otherwise (: OE *stefnan* 'regulate, fix') Falk-Torp 1157.

4. NHG *beschliessen*, *entschliessen*, Du. *beslissen*, Dan. *beslutte*, Sw. *besluta*, cpds. of vbs. for 'shut' (12.25), hence 'bring to a conclusion, decision'.

5. SCr. *riješiti*, Russ. *rešit'* 'solve' (17.39), also 'decide'. Cf. NE *resolve* beside *solve*.

6. Cpds. of vbs. for 'do, make' (9.11) may be used for 'decide' through the notion 'dispose of', as Dan. *afgøre*, Sw. *afgöra*, Du. *uitmachen*, NHG *ausmachen*.

Several of the words for 'judgment' are derived from the verbs for 'judge', while in others the converse relation holds. For those not derived from the verbs for 'judge', the sources are such as 'what is brought', 'what is set down, established', 'agreement', 'pronouncement', and 'law'.

1. Grk. κρίσις : κρΐνω 'decide, judge' (21.162).

2. Lat. *iūdicium*, fr. *iūdex* 'judge' (21.18). Hence It. *giudizio*, Sp. *juicio*; Fr. *jugement*, Rum. *judecată*, fr. the vbs. Fr. *juger*, Rum. *judeca* (21.16).

3. Ir. *breth* (also *brāth* 'doom'), NIr. *breith*, W. *barn*, *brawd*, Br. *barn*, *barnedigez*, all derivs. of the root of Ir. *berim*, Grk. φέρω, etc. 'bear, carry, bring', with specialization of 'bringing, what is brought'. Walde-P. 2.155. Pedersen 1.42, 51, 52.

Ir. *mess* (less common), vbl. n. to *miduir* 'judge' (21.16).

4. Goth. *staua* (reg. word for κρίσις; cf. also OHG *stūa-tago* 'day of judgment') : OE *stōw* 'place', etc. (12.11), with development through specialized 'place of judgment, court' > 'judgment'. Cf. MHG *stuol* 'seat, chair' in specialized uses including 'seat of the judge'. Walde-P. 2.608. Feist 451.

Goth. *dōms* (but only in Skeireins and here prob. with secondary sense 'fame, glory'), ON *dōmr*, Dan., Sw. *dom*, OE *dōm*, ME *dom* (NE *doom*), OHG *tuom* (usual word in Tat.), fr. the root of OE *dōn*, OHG *tuon* 'do', Grk. τίθημι, Skt. *dhā-* 'put, place', with semantic development through 'what is set down, established'. Walde-P. 1.828. Feist 122 f.

Dan. *kendelse*, fr. *kende* 'know' (17.17), in its use = *dømme* 'judge' (this use fr. that of MLG *kennen*). Falk-Torp 516.

ME *iugement*, NE *judgment*, fr. OFr. *jugement*.

ME *verdit*, NE *verdict* (as legal term properly the 'decision of a jury', but in U.S. sometimes used also of the judge's decision), fr. OFr. *verdit*, MLat. *veredictum* (whence later English spelling), lit. 'what is truly said' (Lat. *vērē dictum*). The legal use arose in England, hence Fr. *verdict*, It. *verdetto*, Russ. *verdict*. NED s.v. *verdict*. Gamillscheg 884.

OHG *urteil(i)*, *urteilī*, MHG *urteil(e)*, NHG *urteil*, Du. *oordeel* : OHG *irteilen*, etc. 'judge'. See 21.16. Here OE *ordāl* in special sense, revived in NE *ordeal* (NED s.v.).

OHG, MHG *reht* 'law' (21.11), also 'judgment'.

MHG *gerihte* 'court' (21.15), also 'judgment'. So NHG *gericht* in *das jüngste gericht*, but generally obs. in this sense.

OHG *suona*, also 'atonement' (MHG *suone*, *süene*, NHG *sühne* in this sense only) : ON *sōn* 'atonement' (in cpds.), MLG *swōne*, *sōn*, etc., outside connec-

tions dub. Walde-P. 2.452. Kluge-G. 606. Franck-v. W. 824.

5. Lith. *sprendimas*, Lett. *spriedums* : *spręsti*, *spriest* 'judge' (21.16).

6. ChSl. *sądŭ*, i.e. *są-dŭ*, cpd. of *są-* 'together', second part fr. weak grade of root in *děti*, Grk. τίθημι, Skt. *dhā-*, etc. 'put, place' (12.12). Cf. Skt. *sam-dhā-*, *sam-dhi-* 'union, agreement, compact', etc. The corresponding modern Slavic words (still used in phrases like 'day of judgment') are terms for the 'court' (21.15), but 'judgment' is expressed by the cpds. SCr. *presuda*, *osuda*, Boh. *rozsudek*. Walde-P. 1.827. Berneker 123. Brückner 483.

Pol. *wyrok* = Boh. *vyrok* 'declaration' (also sometimes 'judgment'), cpds. (like *prorok* 'prophet', etc.) of root in ChSl. *rešti*, *reką*, etc. 'say' (18.22).

Russ. *prigovor* : *govorit'* 'speak' (18.21).

7. Skt. *nirṇaya-*, fr. *nir-ṇī-* 'decide'. See 21.16.

Av. *ratu-* 'judge' (21.18), also sometimes 'judgment'. Barth. 1502.

Most of the nouns for 'judge' are derived from the verbs for 'judge' (21.16) or the nouns for 'judgment' (21.17). But conversely the Lat. noun for 'judge', a cpd. of the word for 'law', is the source of the others in the group. The numerous Skt. terms are of diverse origin.

1. Grk. δικαστής (at Athens mostly pl. δικασταί 'jurors', but sg. as 'judge' frequent in Gortynian law-code, etc.), fr. vb. δικάζω 'judge' (21.16).

2. Lat. *iūdex* (> It. *giudice*, Fr. *juge*, Sp. *juez*), cpd. of *iūs* 'law' (21.11) and *-dic-*, weak grade of the root in *dīcere* 'say', perh. in its earlier sense of 'point out' (cf. 18.22), as in *index* (nom. *-dex* for *-dix* after cpds. in *-fex*, *-ficis* : *facio*). Rum. *judecător* new deriv. of vb. *judeca* 'judge'.

3. Ir. *brithem*, NIr. *breitheamh*, W. *barnwr*, *brawdwr*, Br. *barner*, fr. verbs for 'judge'.

4. Goth. *staua* (masc. *n*-stem), fr. *staua* (fem. *ō*-stem) 'judgment'. Feist 451.

ON *dōmāri*, *dōmandi*, Dan. *dommer*, Sw. *domare*, OE *dēma*, *dōmere*, ME *demere* : ON *dōmr* 'judgment', *dœma* 'judge', etc.

6. ChSl. *sądĭji*, SCr. *sudija*, *sudac*, etc., general Slavic, fr. ChSl. *sądŭ*, etc. 'judgment, court'.

7. In ancient India the king exercised judicial functions, and the following terms denoted in the first instance the king's advisers in judicial matters. But they are generally rendered 'judge'. Cf. Jolly, Recht und Sitte 132 ff., where still other terms besides those noted here are mentioned.

Skt. *sabhya-* and *sabhā-sad-* (both common in Manu, Yajñ., etc.) deriv. and cpd. (with *sad-* 'sitting') of *sabhā-* 'assembly, court'.

Skt. *prāḍvivāka-* (Manu, etc.; cf. Jolly, op. cit. 133), cpd. of *prāç-* 'asking' (: *praç-*, *pracch-* 'ask', 18.31) and *vivāka-* 'one who gives judgment' (fr. *vi-vac-* 'announce, explain', cpd. of *vac-* 'speak, say', 18.21), thus combining the notions of investigation and judgment. Jolly, op. cit. 133.

Skt. *dharmādhikārin-*, *dharmādhikāraṇika-*, etc. (BR 3.894, but less common than the preceding), cpds. of *dharma-* 'law' and derivs. of *adhi-kṛ-* 'place at the head, appoint'.

Skt. *draṣṭar-* 'one who sees', also 'judge', fr. *dṛç-* 'see'.

Most of the terms for 'plaintiff' are derivs. (act. pples. used as sbs., or agent nouns) of the usual verbs for 'accuse' (21.31) or others meaning 'seek, demand, pursue, summon, complain, bring in', most of these also used as legal terms.

Some Irish terms for 'plaintiff' and 'defendant' involve the notion of 'debt'. In certain civil suits the 'debtor' and 'creditor' would be the 'defendant' and 'plaintiff' respectively. Cf. Lat. *reus* 'defendant', also 'debtor'.

1. Grk. ὁ διώκων, pres. act. pple. of διώκω 'pursue' (10.53), as legal term 'prosecute, bring suit against'.

Grk. ὁ ἐνάγων (late and NG), pres. act. pple. of ἐνάγω 'bring in' in its late legal use for 'bring into court, accuse'.

Grk. ἀντίδικος 'opponent in a suit', cpd. of ἀντί 'against' and -δικος : δίκη 'lawsuit' (21.13), occurs with special reference to the plaintiff and also to the defendant.

In the Gortyn law-code the plaintiff is called μεμφόμενος (pple. of μέμφομαι 'blame, censure') or ἄρχων τᾶς δίκας 'initiator of the suit'.

2. Lat. *petītor*, lit. 'seeker', fr. *petere* 'seek'.

Lat. *accusātor* 'accuser', fr. *accusāre* 'accuse'.

Lat. *actor* (> It. *attore* also legal term), fr. *agere* 'bring suit', cf. *actiō* 'lawsuit' (21.13).

It. *querelante*, pres. act. pple. of *querelare* 'bring suit against', fr. *querela* 'complaint, charge'.

Fr. *plaignant*, pres. act. pple. of *plaindre* 'pity', but in refl. *se plaindre* 'complain', esp. 'make a (legal) complaint'.

Fr. *demandeur*, Sp. *demandante*, fr. Fr. *demander*, Sp. *demandar* 'request, demand' (18.35).

Rum. *acuzator*, fr. *acuza* 'accuse'.

3. Ir. *līth* : *līim* 'accuse'.

Ir. *fechem* 'litigant', both 'defendant' and 'plaintiff' (for the latter esp. *fechem toicheda* or *tobaig*, lit. 'litigant of the suing' or 'of the collection'), orig. 'debtor' : *fiach* 'debt' (11.64). Laws, Gloss. 336 f.

NIr. *ēilightheoir*, fr. *ēilighim* 'demand, sue for', cf. Ir. *eiliugud* 'claim, accusation', *inlongat*, *eillgit* 'they claim', cpd. of *long-* 'lay, put' (only in cpds.) : Grk. λέχος 'couch', etc. Pedersen 2.570.

NIr. *agarthōir*, *agrathōir*, fr. *agraim*, Ir. *adgairim* 'claim, sue', cpd. of *gairim* 'call'. Pedersen 2.533.

W. *hawlblaid*, cpd. cf *hawl* 'demand, claim' and *plaid* 'side, party, faction'.

W. *achwynwr*, fr. *achwyn* 'complain, accuse'.

Br. *klemmer*, fr. *klemma* 'complain'.

4. ON *sōknari*, fr. *sōkn* 'prosecution' (= Goth. *sōkns*, OE *sōcn* 'investigation', fr. the same root as *sǫk*, OE *sacu*, etc. 'lawsuit'). Also *sakarāberi* (cf. OHG *sacebaro* in Lex Salica), cpd. of *sǫk* and form of *bera* 'bring'. Also *sōknaraðili*, *sakaraðili* with *aðili* 'chief' like *aðal-* in cpds. (Vigfusson 3).

Dan. *sagsøger*, cpd. of *sag* 'suit' and *søger*, fr. *søge* 'seek, resort to', as legal term 'sue'.

Dan. *klager*, fr. MLG (below).

Sw. *kärande*, fr. *kära* 'bring suit, prosecute' = ON *kæra* 'accuse' (21.31).

OE *tēond*, pres. pple. of *tēon* 'accuse'. Less commonly *wrēgend* and *onspreca*, *onsprecend*, fr. *wrēgan* and *onsprecan* 'accuse'.

ME *askere*, fr. *aske* 'ask, seek' (18.35).

ME *pleintif*, NE *plaintiff*, the same word as adj. *plaintive* fr. OFr. *plaintif* 'complaining, plaintive' (: *plaindre*, cf. above, Fr. *plaignant*). NED s.v. *plaintiff*.

OHG *sahhu* ('der ankläger' Grimm, Deutsche Rechtsaltertümer 2.488; where quotable? Graff has *sahhari* 'litigator') : *sahha* 'lawsuit' (21.13).

MHG, MLG *klager* (> Dan. *klager*), NHG *(an)kläger*, fr. MHG, NHG *klagen* 'complain, charge' (OHG *klagōn* 'complain'), NHG *anklagen* 'accuse'. Similarly Du. *(aan)klager*.

6. SCr. *tužitelj*, fr. *tužiti* 'complain, sue, accuse'.

Boh. *žalobce*, fr. *žaloba* 'complaint, charge', cf. *(ob)žalovati* 'sue, accuse'.

Pol. *skarżący*, fr. *(o)skarżyć* 'accuse'.

Pol. *powód* 'cause, occasion' (like Russ. *povod*), also 'plaintiff', orig. 'leading' : ChSl. *vedą*, *vesti* 'lead' (10.64). Brückner 433, 628.

Russ. *istec*, also 'creditor' : *istyj* 'true, genuine', ChSl. *istŭ* id. (16.66), with development 'real owner' > 'creditor' > 'plaintiff'.

7. Skt. *arthin-*, fr. *artha-* 'object, matter, thing' (9.90), hence lit. 'having to do with a certain matter', as 'plaintiff', with *praty-arthin*, 'defendant', e.g. Manu 8.79, Yājñ. 2.6, 7.

Skt. *vādin-* 'speaking' (fr. *vad-* 'speak', 18.21), hence 'one who speaks for, represents', as 'plaintiff', with *prativādin-* 'defendant', e.g. Yājñ. 2.73.

Skt. *abhiyoktar-*, agent noun fr. *abhiyuj-* 'attack', as legal term 'charge, accuse' (21.31), hence 'plaintiff', e.g. Manu 8.58, Yājñ. 2.95.

Most of the terms for 'defendant' are from either 1) act. pples. or agent-nouns fr. verbs for 'defend', 'answer', in one case 'flee' = 'be prosecuted', or 2) pass. pples. of verbs for 'accuse' (21.31), 'summon', 'demand' and in such cases often parallel to the active forms as 'plaintiff', as Sp. *demandado* vs. *demandante*, NHG *beklagter* vs. *kläger*, etc.

In a few cases the word for a 'criminal, culprit', that is, the guilty defendant, came to be used also for 'defendant' in general. Conversely Lat. *reus* 'defendant' came to be used mostly of the one guilty, 'criminal, culprit', as in It., Sp. *reo* (cf. also Rum. *rău* 'bad').

For Grk. ἀντίδικος and Ir. *fechem* used of either 'defendant' or 'plaintiff', see under latter (21.21).

1. Grk. ὁ φεύγων, pres. act. pple. of φεύγω 'flee' (10.51), as law term 'be prosecuted'.

NG ἐναγόμενος, pres. pass. pple. vs. pres. act. pple. ἐνάγων 'plaintiff' (21.21).

NG κατηγορούμενος, pres. pass. pple. of κατηγορῶ 'accuse'.

2. Lat. *reus* (> It., Sp. *reo* 'culprit'), prob. fr. **rēyos*, old gen. to *rēs* (Skt. *rās*, gen. *rāyas*) 'legal matter, lawsuit' (21.13); *reus est* lit. 'he is of the lawsuit'. Thurneysen, IF 14.131. Sturtevant, TAPA 71.573 ff.

Words for 'witness' are derived from verbs for 'know, recognize, see, remember, or declare'. A few are based on 'third person', or 'outsider', or just 'people', through the common inference of 'not party to the suit'.

Words for 'testify' and 'testimony' are generally parallel forms, mostly derived from those for 'witness', as Grk. μαρτυρέω, μαρτυρία, Lat. *testificārī*, *testimōnium*, Goth. *weitwōdjan*, *weitwodei*, ChSl. *sŭvědětelĭstovati*, *sŭvědětelĭstvo*. The Lith. current nouns are derived from the verb, but the latter is ultimately based on a noun for 'witness'.

In several cases the words for 'testi-

mony' came to be used also, and then mainly, for the personal 'witness', as Fr. témoin, NE witness.

1. Derivatives of IE *weid- 'see' (15.51) and 'know' (17.17). Walde-P. 1.236 ff. Feist 560.

Ir. fiadu, acc. fiadna (Laws, Gloss. 356), NIr. fiadhnēidh; Goth. weitwōþs (perf. act. pple.), ON vitni, Dan. vidne, Sw. vittne, OE gewita, (ge)witnes, ME witnesse, NE witness (ON, OE also and orig. 'testimony' and so still NE, esp. bear witness), OHG giwizzo; ChSl. sŭvědětelĭ (prefix sŭ-), Russ. svidetel', SCr. svjedok, Boh. svědek, Pol. świadek.

2. Grk. μάρτυς, gen. -υρος (nom. also μάρτυρ, Hom. μάρτυρος), NG μάρτυρας : μέριμνα 'care', Lat. memor 'mindful of', Skt. smṛ- 'remember', etc. Prob. based on *μαρ-τυ- (IE -tu- suffix in abstracts, etc.) orig. 'testimony'. Walde-P. 2.689. Boisacq 612.

3. Lat. testis, lit. 'the third' (= Ir. triss 'third'), fr. *tristi- : trēs 'three'. Cf. Osc. trstus 'testēs' (fr. *tris-to-), tristaamentud 'testāmentō'. Hence testimōnium 'testimony' > It. (learned) testimonio, Fr. témoin (both with shift fr. 'testimony' > 'witness'), and vb. testificārī 'testify', VLat. -āre > OSp. testiguar with deriv. Sp. testigo 'witness'. Walde-P. 1.755. MHG geziuc, geziuge, late ziuc, NHG zeuge (in MHG also 'testimony', for which NHG zeugnis), Du. getuige (MDu. getūgh 'testimony') : OHG geziugōn 'explain, declare' (orig. 'bring out'), OHG ziohan 'pull, draw, bring' (9.33). Formation and early usage indicate the development 'testimony' > 'witness'. Weigand-H. 2.1321. Kluge-G. 709. Franck-v. W. 192.

OHG urcundo (reg. for testis in Tat.), beside urcundī 'testimonium' (NHG urkunde 'document' and in some phrases 'evidence') : OHG ircennen, NHG erkennen 'recognize, perceive', etc. Kluge-G. 645 (without urcundo).

6. Lith. liudininkas (also liuditojas), beside liudyti 'bear witness, testify', based on a loanword fr. Russ. ljudi 'people' quotable in ORuss. as 'witnesses'. Brückner, KZ 46.223.

Lett. liecinieks, lit. 'one who is superfluous, an outsider, a hireling' : lieks 'superfluous, extra' and 'false'. Mühl.-Endz. 2.492, 496.

7. Skt. sākṣin- : sākṣāt 'with the eye, clearly', fr. sa- 'with' and akṣa-, reg. at end of cpds. for akṣi- 'eye'.

Verbs for 'swear' include a deriv. of the word for 'law', words for 'speak' which have been specialized in legal sense, 'touch' (through practice of touching an object in taking the oath), and 'curse' (through 'curse oneself' if the statement be not true; cf. NE colloq. *I'll be damned if it isn't so*). Some are of obscure origin.

'Swear' may also be expressed by phrases with words for 'oath' (21.25), like NE take oath, Fr. prêter serment, NHG eid ablegen (leisten), NG παίρνω ὅρκο.

1. Grk. ὄμνυμι, NG lit. ὀμνύω : Skt. am- 'swear' in imperat. amīṣva, etc. (Aufrecht, Rh. Mus. 40.160), but further identity of this am- with am- 'injure', etc. dub. Walde-P. 1.178. Boisacq 701.

Grk. ὁρκίζω 'administer an oath', whence rare ὁρκιζόμενος 'the one sworn', but NG ὁρκίζομαι usual word for 'swear'.

2. Lat. iūrāre (> Romance forms), fr. iūs 'law' (21.11). Ernout-M. 506 f. Walde-H. 1.733. REW 4630.

3. Ir. tongu, W. tyngu, Br. toui, Corn. toy, outside connections dub. Pedersen 1.106, 2.652 f.

NIr. beirim (or tugaim) mionna 'bring oath', cf. mionna 'oath' (21.25).

5. Lith. prisiekti, cpd. of siekti 'reach with the hand, swear' (Leskien, Ablaut 282), with the same semantic development as in, and perh. influenced by, Slavic (Pol. przysięgać, etc., below). Trautmann 252.

Lett. zvērēt, fr. MLG sweren. Mühl.-Endz. 4.772.

6. ChSl. klęti sę, SCr. zakleti se, Pol. kląć się, Russ. kljast'sja, refl. forms of ChSl. klęti, etc. 'curse' (22.24), with development through 'curse oneself' (if the statement be not true). Berneker 525 f. Otherwise Brückner 232.

SCr. priseći, Boh. přísahati, Pol. przysięgać, Russ. prisjagat' : ChSl. prisęgą, prisęšti 'touch' (15.71). 'Swear' from touching the object on which the oath was taken. Miklosich 291. Brückner 490. Trautmann 252.

7. Skt. çap- 'curse' (22.24), usually mid. 'swear', with development as in ChSl. klęti sę, etc. (above, 6).

Many of the words for 'oath' are derivs. of the verbs for 'swear' (21.24). But the Grk., Celtic, and Gmc. groups are quite unrelated to the verbs. These words are mostly of uncertain semantic origin, but the case of NIr. mionn in which 'oath' is based on the 'relics' upon which the oath is taken shows that some special place or object in connection with taking the oath must be taken into account as a source (cf. also 'touch' > 'swear' in the Slavic verbs).

1. Grk. ὅρκος (sometimes also the object by which one swears) : ἕρκος 'inclosure, wall, fence', etc., with development through 'what constrains one' (to the truth) or perh. orig. a sacred 'inclosure' in which the oath was taken. Walde-P. 2.502. Boisacq 713.

2. Lat. iūs iūrandum, lit. 'right, law to be sworn', i.e. the formula used in taking oath, phrase cpd. of iūs 'right, law' and fut. pass. pple. of iūrāre 'swear'. From iūrāre also late Lat. iūrāmentum > It. giuramento, Sp. juramento, Rum. jurămînt. Ernout-M. 506. Walde-H. 1.733. REW 4629.

Fr. serment, fr. Lat. sacrāmentum 'pledge, oath of allegiance, military oath', fr. sacrāre 'make holy, consecrate' (: sacer 'holy'). REW 7492.

3. Ir. luge, W. llw, Br. le : Goth. liuga 'marriage', liugan 'marry', OHG urliugi 'war' (i.e. 'condition without oaths'). Gmc.-Celtic group for 'solemn promise' or 'oath', without further known connections. Walde-P. 2.415. Pedersen 1.69.

Ir. ōeth, cf. below, Goth. aiþs, etc.

NIr. mionn, orig. 'a sign, diadem' (so OIr. mind), whence 'relic, reliquary', then the 'oath' (taken upon the holy relics of saints, etc.). Cf. phrase beirim mionna, lit. 'bring relics' = 'take an oath, swear'.

4. Goth. aiþs, OE āþ, OHG eid, etc., general Gmc., Ir. ōeth (rare), W. anudon 'false oath', Gmc.-Celtic word of dub. etym. Walde-P. 1.103. Falk-Torp 179. Feist 29.

NHG schwur, as simplex only early NHG, OHG only eidswuor and MHG meinswuor 'false oath' : schwören, etc. 'swear' (21.24). Kluge-G. 554.

5. Lith. priesaika (neolog. in place of loanword prisiega), formed fr. prisiekti 'swear' (21.24).

Lett. zvērs, usually pl. zvēri, and zvērējums : zvērēt 'swear' (21.24). Mühl.-Endz. 4.772.

6. ChSl. klętva (also 'curse'), SCr. zakletva (kletva 'curse'), Russ. kljatva : ChSl. klęti 'curse', refl. 'swear' (21.24). Berneker 525.

ChSl. prisęga (late), SCr. prisega, Boh. přísaha, Pol. przysięga, Russ. prisjaga : SCr. priseći, etc. 'swear' (21.24).

7. Skt. çapatha-, also 'curse' : çap- 'curse', mid. 'swear' (21.24).

Br.	tamall	NHG	anklagen, beschuldigen		

Words for 'accuse' are partly derived from nouns for 'cause' or 'fault, guilt', partly from verbs meaning primarily 'speak against', 'summon', or 'complain'.

1. Grk. κατηγορέω (the usual term; also κατήγορος 'accuser', κατηγορία 'accusation'; so still NG), cpd. of κατά 'against' and a form parallel to ἀγορεύω 'speak in the assembly, harangue' and simply 'speak' (18.21).

Grk. ἐγκαλέω 'bring a charge, charge something (acc.) against (dat.)', cpd. of καλέω 'call' (18.41) also a legal term for 'summon'.

Grk. αἰτιάομαι 'accuse, censure, allege' (but not a usual legal term), fr. αἰτία 'cause, guilt' (16.76, 17.42).

In the archaic inscriptions of Elis 'accuse' is expressed by κατιαραίω in form = Att. καθιερεύω 'consecrate' but here prob. with the adversative force of κατά and so orig. 'make impious, charge with impiety', in any case illustrating the religious background of legal procedure.

2. Lat. accūsāre (> Romance words; Rum. acuza neolog.), fr. *ad-causāre : causa 'cause' (17.42), also 'lawsuit' (21.13).

3. Ir. līim : Goth. laian (pret. lailō) 'abuse, revile', Lith. loti 'bark', etc. Walde-P. 2.376. Pedersen 1.147.

Ir. ad-ness- and to-ad-ness-, cpds. of ness- seen in other cpds. meaning 'trample on, bruise' and 'disdain, condemn', with 'trample on' primary sense, and so perh. fr. *ni-stā-, cpd. of IE *stā- 'stand'. Walde-P. 2.603. Pedersen 2.583 f. Thurneysen, Gram. 523.

Ir. eiligim, with sb. eiliugud 'accusation' (Laws, Gloss. 293). NIr. ēilighim : Ir. 3sg. in-loing 'claims', orig. 'puts in' : Grk. λέχος 'couch', etc. Pedersen 2.570.

W. cyhuddo (MW kuhud 'accusation, complaint') : Ir. consāidim 'stir up strife', cossāitim 'complain, accuse', cossāit, NIr. casaoid 'accusation, complaint' (Ir. forms in Pedersen 2.605 f., K. Meyer, Contrib. 480, 498; no mention of W. forms). Evans, Welsh Dict. s.v. Lewis, Gloss. of Med. Welsh Law s.v. kuhud (p. 95).

Br. tamall, also sb. 'blame, accusation' (16.78), root connection?

4. Goth. wrōhjan, OE wrēgan (ME bewreye 'expose, reveal', as NE arch. bewray), OHG ruogen, MHG ruegen (NHG rügen 'reprove, denounce'), OS wrōgian (ON rægja 'slander, defame'), fr. sb. Goth. wrōhs 'accusation', beside OE, OS wrōht 'accusation, quarrel', MHG ruoge, ruege 'accusation, plaint', ON rōg 'slander, strife', root connection dub. Walde-P. 1.318. Feist 575.

ON kæra (with or without ā and acc., also with acc. 'plead a case', kæra māl), with sb. kæra 'plaint, dispute' : ON kọr 'sick-bed', Goth. kara, OE cearu 'care, sorrow', OHG kara 'lamentation', etc. (16.14). Falk-Torp 520. Hellquist 547.

OE tēon, betēon (reg. words in the Laws, not wrēgan), OHG zīhan, MHG zīhen (NHG zeihen) = Goth. gateihan 'announce, make known' : Grk. δείκνυμι 'point out', Lat. dīcere 'say', etc. (18.22).

OE onsprecan, cpd. of sprecan 'speak' (18.21).

ME, NE accuse, fr. Fr. accuser (OFr. acuser, ME earliest spelling acuse), Lat. accūsāre (above, 2).

Du. aanklagen, NHG anklagen (> Dan. anklage, Sw. anklaga), cpds. of Du., NHG klagen 'complain, lament'.

OHG sculdigōn, MHG (be)schuldigen, NHG beschuldigen, Du. beschuldigen (hence semantically Dan. beskylde, Sw. beskylla), derivs., through OHG sculdig, NHG schuldig, etc. 'guilty, culpable', of OHG sculd, etc. 'fault, guilt' (16.76).

5. Lith. (ap)kaltinti : kaltė 'guilt, blame' (16.76).

Lith. (ap)skųsti (so in the NT versions, and still in use; NSB), with skundas 'complaint, accusation' : skauda 'it hurts', skaudus 'painful', Grk. σκυδμαίνω, σκύζομαι 'be angry'. Walde-P. 2.554. Leskien, Ablaut 308.

Lett. (ap)sūdzēt, perh. : Lith. sugti 'howl, whine', saugti 'sound'. Mühl.-Endz. 3.1130 f.

6. ChSl. (vŭz)glagolati (na), less commonly rešti (na), both vbs. for 'speak, say' (18.21, 18.22) with prep. na 'on, at, against', and so literal translations of κατηγορέω (Jagić, Entstehungsgesch. 325).

ChSl. vaditi (na) : Skt. vad- 'speak', Lith. vadinti 'call, name', etc. (18.21).

SCr. (op)tužiti, also and orig. 'complain' : tuga 'complaint, sorrow', ChSl. tąga 'distress', tąžiti 'be in distress', etc. (16.32). Miklosich 350.

Boh. obžalovati (Russ. obžalovat' 'complain', in legal use 'complain of, protest' a judgment) : ChSl. žalovati 'grieve, mourn', Boh. žal 'grief', etc. (16.32).

Boh. obviniti, Pol. obwinić, Russ. obvinit' : ChSl., Boh., Russ. vina, Pol. wina 'fault, guilt' (16.76).

Pol. oskarżyć, fr. skarga 'complaint, accusation' : ChSl. skrŭgati 'gnash' (the teeth), skrŭžetŭ 'gnashing' (Walde-P. 1.416). Brückner 493, 652. Miklosich 298, 303.

Fr.	condamner	OE	fordēman	Boh.	odsuditi
Sp.	condenar	ME	condem(p)ne	Pol.	skazać, osądzić

NIr.	beirim breith ar	OHG	firtuomen	Av.	par-
W.	condemnio	MHG	vertüemen, verteilen		
Br.	barn	NHG	verurteilen		

'Condemn' is most commonly expressed by compounds of the verbs for 'judge' with an adversative or perfective prefix, or by the simple verbs, the context ('against' or mention of the penalty) showing that the judgment is adverse. The Lat. word, which is the source of the Romance terms and our condemn, is derived from a noun for 'damage', with development through 'make pay damages'.

Other semantic sources are 'blame', 'trample on', 'submerge', and simply 'point out, declare'.

1. Grk. καταδικάζω, κατακρίνω, cpds. of κατά 'against' and δικάζω and κρίνω 'judge' (21.16).

2. Lat. damnāre and cpd. condemnāre (hence, or fr. re-formed *con-damnāre, the Romance words), deriv. of damnum 'damage, loss' (11.74) and in legal language 'damages', hence the vb. orig. 'inflict loss upon, make one pay damages'. Ernout-M. 252. Walde-H. 1.322.

3. Ir. com-ness- 'trample on', and 'condemn', cpd. of ness- as in ad-ness-, to-ad-ness- 'accuse', etc. (21.31).

NIr. usually simply beirim breith ar 'judge' (21.16), e.g. beirim breith chum bāis air 'I condemn him to death'.

W. condemnio, fr. NE condemn.

Br. barn 'judge' (21.16) used also for 'condemn', e.g. barn d'ar maro 'condemn to death' (cf. Vallée s.v. condamner).

4. Goth. afdōmjan, OE fordēman, OHG firtuomen, MHG vertüemen, cpds. of Goth. dōmjan, OE dēman, OHG tuomen 'judge' (21.16) and partly also (esp. OE) 'condemn'; ON dæma, Dan. dømme, Sw. döma both 'judge' and 'condemn' (ON fyrirdæma mostly 'curse, damn').

Goth. ga-wargjan (with sb. wargiþa 'condemnation') : OE wiergan 'curse', etc. (22.24).

ME condempne, condemne, NE condemn, ME damne, dampne (NE damn), fr. OFr. condem(p)ner (beside condam(p)ner), dam(p)ner, Lat. condemnāre, damnāre (above, 2). NED s.vv.

MHG verteilen (with dat. of pers. and acc. of penalty, or absolute with acc. of person), lit. 'distribute, share', cpd. of teilen 'divide'.

MHG (late), NHG verurteilen, Du. veroordeelen, cpd. of urteilen, oordeelen 'judge' (21.16).

5. Lith. nuteisti, Lett. nuotiesāt, Lith. nusudyti (Kurschat, Lalis; not in NSB), Lett. nuosuodīt, perfect. cpds. of verbs for 'judge' (21.16).

Lith. nusmerkti (NSB), pasmerkti, cpds. of smerkti 'submerge, plunge'.

6. ChSl. osąditi, etc., general Slavic (but Pol. osądzić less usual than skazać), perfect. cpds. of ChSl. sąditi, etc. 'judge' (21.16).

Pol. skazać = Russ. skazat' 'say', etc., orig. 'point out' (18.22).

7. Skt. nind- 'blame' (16.18), used also as legal term 'condemn' (e.g. Manu 8.19).

Av. par- (cf. also parəta-, pəša- in cpds. 'condemned, forfeit', pāra- 'fault, guilt'), prob. the same root as in par-, aipi-par- 'pay off' (a penalty), this : Lat. pār, paris 'equal', or : par-, IE *pel- 'fill'?. Walde-P. 2.40. Barth. 849, 850.

Verbs for 'convict' are based on such notions as 'take, catch' (a natural and frequent nontechnical expression, but only in Greek the reg. legal term), 'conquer, prevail, overcome', 'prove', 'bear witness', 'confront', etc. Some words for 'condemn' or 'accuse' are also used for 'convict'. The use of the Lat. convincere, mainly 'convict' but also 'prove' and later 'convince', has fostered some interchange of 'convince' and 'convict' elsewhere.

'Convict' is also frequently expressed by phrases made up of words for 'prove', 'declare, pronounce', 'judge', or 'find' with those for 'guilty' (21.35), e.g. Fr. déclarer coupable, Rum. găsi vinovat (găsi 'find', both words fr. Slavic), Br. kavout kablus, ON dæma sekan, NE find guilty, NHG für schuldig erklären, Lith. apreikšti kaltu, Russ. priznat' vinovnym, etc. W. euogfarnu and euogbrofi are similar phrase cpds. of euog 'guilty' with barnu 'judge' and profi 'prove'.

Such phrases are the usual expressions in several languages, and in some others may perhaps be more common than the simple verbs entered in the list. They require no further comment.

1. Grk. αἱρέω 'seize, take, catch' (11.13) is the reg. legal term for 'convict', not only in Attic, but elsewhere, e.g. in the Gortyn law-code αἴ κα αἰλεθῇ 'if one is caught', i.e. 'convicted'.

Grk. ἐλέγχω, in Hom. 'treat with contempt', later 'examine', 'prove', also 'convict' (Hdt.+ and so in part in the NT), perh. : Lett. langāt 'treat with contempt, call names', further connections? Walde-P. 2.436. Boisacq 240. Mühl.-Endz. 2.420.

2. Lat. convincere, cpd. of vincere 'conquer, prevail' (20.41). Cf. Osc. eizeic (loc. sg.) vincter = Lat. eius (or in eo) convincitur. The Romance derivs. mean 'convince' in common use, but are also used for 'convict', esp. in the pples. It. convinto, Fr. convaincu, Sp. convicto 'convicted, guilty'.

Lat. arguere 'declare, assert', but esp. 'censure, accuse', late also 'convict', orig. 'make clear' : Grk. ἀργός, Skt. arjuna- 'shining, white', Grk. ἄργυρος, Lat. argentum 'silver', etc. Walde-P. 1.82 f. Ernout-M. 71 f. Walde-H. 1.66 f. This verb is the Vulgate rendering of ἐλέγχω including the passages where the meaning is 'convict', and this has affected other versions, e.g. in Jn. 8.46 OE āscūnian (mostly 'shun, detest'), NE argue in a version of 1582 (cf. NED s.v.).

It. condannare, Fr. condamner, Sp. condenar 'condemn' (21.32) are also sometimes used where the sense is 'convict'.

3. Ir. cintach 'guilty' with vb., used for 'convict' (quotable?).

NIr. daoraim, fr. daor 'enslaved,

guilty', opp. of saor 'free' and prob. formed directly as a pendant to saoraim 'acquit' (21.34).

4. Goth. gasakan (rendering ἐλέγχω, including the sense 'convict', as Jn. 8.46), cpd. of sakan 'contend, reproach' (cf. sakjō 'strife', 19.62).

Dan. overbevise, Sw. överbevisa 'convince' and 'convict', cpds. of Dan. bevise, Sw. bewisa 'prove', fr. MLG bewisen = NHG beweisen 'prove'. Falk-Torp 66.

OE oferstǣlan 'confute' and 'convict', cpd. of stǣlan 'impute (a crime to), charge' : on-stāl 'charge, accusation', stellan 'set, place', etc.

ME, NE convict, fr. pple. of Lat. convincere (above, 2).

NE convince was formerly also used not only as 'convince', but also as 'convict' (NED s.v. 4).

OHG giwinnan, MHG gewinnen 'gain, acquire, overcome' (: NE win, etc.) were also used for 'convict', like and prob. influenced by Lat. convincere.

OHG dwingan 'press, oppress' (NHG zwingen 'compel', 19.48), also 'convict' (thwingan Tat. for Vulgate arguere).

NHG überführen, since late 16th cent. 'convict' and for a time also 'convince' (now überzeugen), fr. überführen 'lead across, transport' (cpd. of führen 'lead', 10.64). Semantic development through 'bring over' to one's side by arguments, or through 'bring in' witnesses, or still more specifically through 'lead by' the corpse of the slain (with allusion to a popular belief that the corpse bleeds in the presence of the murderer)? Paul, Deutsches Wtb. 559. Weigand-H. 2.1096.

5. Lith. and Lett. now apparently have only the phrases 'declare guilty'. In the Lith. NT versions kaltinti 'accuse' (21.31) is used for 'convict', e.g. Jn. 8.46, following Luther's zeihen. The Lett. version has pierādīt 'prove'.

6. ChSl. obličiti (in Gospels renders ἐλέγχω, including Jn. 8.46), fr. lice 'face', hence orig. 'bring face to face, confront'. Cf. Russ. obličit' 'convince, denounce', also 'convict' (of a lie, etc.) but not a legal term (for which priznat' vinovnym 'recognize as guilty').

SCr. dokazati 'prove', sometimes 'convince' and 'convict', cpd. of kazati 'say', orig. 'point out, show' (18.22). More commonly (?) the phrase proglasiti krivim 'pronounce guilty'.

Boh. usvědčiti 'bear witness, prove', also 'convince' and 'convict', fr. svědek 'witness' (21.23).

Pol. przekonać 'convince' and 'convict', in early use 'finish, dispose of' (cf. Linde s.v.), cpd. of konać : koniec 'end' (14.26).

7. Skt. vibhāvaya- (caus. of vi-bhū- 'come into existence, appear', cpd. of bhū- 'become, be') 'make appear, prove' is also sometimes 'convict' (Yajñ. 2.20, Minor Narāda 1.9.5).

Cf. Skt. dṛṣṭa-doṣa-, lit. 'having one's sin seen', hence 'detected' or 'convicted' (e.g. Manu 8.64).

Most of the words for 'acquit' in a legal sense are the same as, or cpds. of, those for 'release' (11.34). Some are based on words for 'free', or 'justify', or the notion may be expressed by phrases 'pronounce innocent'. In several cases words for 'release' have been entered in the list, inclosed in parentheses, by which is meant that quotable examples for the legal 'acquit' have not been found.

1. Grk. ἀπολύω 'release' (11.34) and 'acquit'.

NG ἀθῳώνω, fr. ἀθῷος 'innocent' (21.36).

NG ἀπαλλάσσω 'release' (as in class. Grk., 11.34) and 'acquit'.

Br.	*kablus*	NHG	*schuldig*		

Most of the words for 'guilty' are obvious derivs. of those for 'guilt', which are among those discussed with 'fault' (16.76). Only the few others require further comment.

1. Grk. ἔνοχος, orig. 'held in, bound by' (: ἐνέχω 'hold in'), hence as legal term 'liable to' the laws, etc., whence also 'liable to' a certain penalty or to the penalty for a certain crime, and so 'guilty', becoming the usual word (rather than αἴτιος) from Hellenistic times (e.g. NT) to the present.

2. Lat. *sōns, sontis* (most commonly sb. 'guilty person', but also adj.), orig. pres. pple. of *esse* 'be', hence 'actual', like Skt. *satya-* 'true', etc. (16.66). Cf. esp. the cognate ON *sannr* 'true' and sometimes 'guilty'. Walde-P. 1.160 f. Ernout-M. 957.

Lat. *reus* 'defendant' (21.22) was used more often than not of the guilty party and eventually restricted to this sense. Hence It., Sp. *reo* sb. and adj.

3. W. *euog*, fr. MW *geuawc* 'false', this fr. *geu, gau* 'false' : Ir. *gāu*, etc. 'lie' (16.67). Lewis-Pedersen 130. Morris Jones 188.

Br. *kablus*, fr. a late Lat. *cavillōsus*, deriv. of *cavilla* 'jeering, railery'. For sense cf. Corn. *cably* 'calumniate, incriminate'. Loth, Mots lat. 141.

4. Goth. *skula* (also 'debtor'), though not fr. the noun, like OE *scyldig*, etc., is fr. the same underlying verb, Goth. *skulan* 'owe'.

ON *sannr* 'true' and 'guilty' : Lat. *sōns* (above, 2).

Most of the words for 'innocent' are simply neg. cpds. of those for 'guilty' (21.35). Only the few others need comment. It is a widespread phenomenon that the words for 'innocent', apart from their legal use, develop, through 'harmless, guileless', a disparaging sense 'credulous, naïve, simple, foolish'.

1. Grk. ἀθῷος, neg. cpd., second part : θωά, Ion. θω(ι)ή 'penalty', fine (21.38).

2. Lat. *innocēns, -entis* (> Romance words and ME, NE forms), lit. 'not injuring, harmless', neg. cpd. of pres. pple. of *nocēre* 'harm, injure' (11.28).

3. Goth. *swikns* (mostly for ἁγνός 'pure, chaste', once for ὅσιος 'holy'; for ἀθῷος in Mt. 27.4, the passage Mt. 27.24 being lacking), ON *sykn* : OE *(ge)swicn* 'cleansing, clearance from a charge', root connection? Feist 467. Falk-Torp 1233, 1562.

Br.	*poan*	NHG	*strafe*		

Among the words for 'penalty' or legal 'punishment' an important group is based on a root the primary sense of which was probably 'repay, requite' (either good or evil), whence the derivs. denoted, on the one hand, the 'penalty', and on the other 'reward, price, honor'. Cf. the double force, according to the context, of words like NE *requital* and *retribution* (the latter now felt as return for evil, but formerly also return for good, 'reward'; NED s.v.).

Just as Lat. *animadvertere* 'turn the mind to, observe, notice' came to be used in a pregnant sense 'censure, punish', so several of the words for 'penalty' come from verbs meaning 'point out, show'.

A recurring relationship between 'education' and 'punishment' is illustrated,

with all the stages quotable, by Grk. παιδεύω 'rear a child' (: παῖς, παιδός 'child'), 'educate', 'correct, discipline', and finally 'chastise, punish', whence, through the noun παίδευσις, the reg. Rum. word for 'penalty'. Cf. also NHG *zucht* 'rearing, breeding' (of cattle, plants, etc.), 'education', 'discipline', and esp. *züchtigen* 'censure' and 'chastise, punish'; Skt. *çās-* 'teach' (17.23) and 'censure, punish' (cf. NE colloq. threatening *I'll teach you*).

A shift from 'ask, question' through 'examine, investigate' to a resulting 'punish' is seen in the OPers. verb for 'punish' (below, 8).

A word for the 'rod' may, as the symbol, be used for 'punishment', not merely parental but covering any legal 'penalty' (Boh. *trest*, Skt. *daṇḍa-*, below, 7, 8). In the Avesta the most common penalty is so many 'blows with the horse-goad', etc.

In words reflecting the 'rod', the primary application was obviously to corporal punishment. In some others the verbal 'censure, blame' seems to be earlier. Still others (ON *refsing*, NHG *strafe*) may, on the basis of their cognates, have developed in either of these two ways or both together.

In one case the development has been from 'judgment' through 'legal condemnation'.

Verbs for 'punish' are mostly parallel with the nouns listed, either derived from them, as Lat. *pūnire*, fr. *poena*, or conversely. But there are also others unrelated, as Lat. *animadvertere* (cf. above), OPers. *pars-* (below, 8), Grk. κολάζω (orig. 'check' : κόλος 'docked', hence κόλασις late 'punishment, damnation, hell'), Lat. *castīgāre* (fr. *castus* 'pure') 'correct, blame, chastise, punish' (> Fr. *châtier*, Sp. *castigar*, with back-formation *castigo* 'punishment' but not a legal term), Skt. *çās-* (cf. above).

1. Derivs. of *k^wei-*, seen in Grk. τῑνω (fut. τείσω, aor. ἔτεισα) 'pay (a debt, esp. a penalty), atone for', Skt. *ci-* (pres. mid. *cayate*) 'avenge, punish', Av. *či-* (redupl. pres. subj. *čikayaṯ; kāy-* Barth.) 'pay, atone for' (perh. ultimately the same root as in Skt. *ci-* 'notice, observe, honor', ChSl. *čayati* 'expect, hope', with development like that in Lat. *animadvertere*). From the sense of 'pay for, requite' (in good or bad sense) was derived a group of nouns denoting either 'penalty' or 'reward, honor, price'. Walde-P. 1.508 f.

Grk. ποινή (> Lat. *poena*, etc., see below), τῑμή (see below); Av. *čiϑā-* and *kaēnā-*; cf. Lith. *kaina*, ChSl. *cěna* 'price' (11.88).

2. Grk. ποινή (above, 1), occurring mainly in poetry, is sometimes simply 'return, recompense' including 'reward', but mostly 'penalty', esp. recompense for the slain, either 'wergeld' or 'vengeance'. The word plays no role in Attic legal writings or in the legal inscriptions of the dialects. Yet the Doric ποινά must have been current in Magna Graecia when the Lat. *poena* was borrowed. It has been revived in NG as the main legal term.

Grk. τῑμή, mostly 'honor' or 'value, price', rarely 'penalty'. Hence (through cpd. adj. τῑμᾰ-ορος) τῑμωρία 'vengeance, punishment'.

Grk. ζημία 'loss, damage' (11.74) is also the usual Attic term for 'penalty, fine', whence ζημιόω 'penalize, fine', these being also the most widespread terms in the dialects (mostly with reference to fines).

3. Lat. *poena*, an early loanword fr. Grk. ποινά, was, in contrast to its Grk. source, the persistent legal term and also

a popular word for 'punishment' in general and in late use 'suffering, pain'. Hence the double sense, 'penalty' vs. 'pain' or 'grief', in its derivatives, It., Sp. *pena*, Fr. *peine*, Ir. *pian*, W. *poen*, Br. *poan*, ME *peine* (fr. Fr.; NE *pain* in older sense now only in phrases like *on pain of death*), MHG *pīn, pīne* (both senses, that of 'penalty' reintroduced; OHG *pīna* only 'affliction, distress'), Russ. *penja* 'fine'. From Lat. adj. *poenālis* 'penal' was formed MLat. *poenālitās*, whence NE *penalty.*

Hence also the vb. *pūnīre* 'punish' (> It. *punire*, Fr. *punir*, the latter through the *puniss-* forms > ME *punisse, punisshe*, etc., NE *punish*) and new derivs. like late Lat. *pūnitiō* (> It. *punizione*, Fr. *punition*), OFr. *puni(s)sement* (> ME *ponissement, punysshement*, NE *punishment*, this group being used mostly for 'punishment' in the broader, non-legal, sense).

Lat. *damnum* 'damage, loss' (11.74) is also used for 'penalty'.

Lat. *noxa* 'injury, guilt' (16.76) is also in late use 'penalty'.

Rum. *pedeapsă*, in earliest use also 'education', fr. Grk. παίδευσις (in late pronunciation = -εψις) 'education', NG παίδεψι 'punishment', which shared in the development attested for the vb. παιδεύω, namely 'educate' > 'correct, discipline' > 'chastise, punish' (LXX, NT, e.g. Lk. 23.16).

4. Ir. *smacht* 'authority, control', also a kind of 'penalty' or 'fine' (Laws, Gloss. 665 f.), etym.? Cf. NIr. *cuirim smacht ar* 'punish' (lit. 'put control on').

Ir. *dīgal* 'vengeance, retribution, punishment' (cf. e.g. Thes. 1.55.26, 29, 31), vbl.n. to *dofichim* 'avenge, punish' (cpd. of *fichim* 'fight'), but in form : Ir. *gal* 'bravery' (16.52). Pedersen 1.101, 2.25, 521.

NIr. *pionōs* (given by McKenna for 'penalty', and so Gael. *peanas;* in Dinneen 'penance, worry'), fr. *pian*, formerly 'penalty' (above, 3) now only 'pain'.

NIr. *smachtbhann* ('penalty' Dinneen), cpd. of *smacht* (above) with *bann* 'bond'.

W. *cosb* = Ir. *cosc* 'correcting, chastising', vbl. n. of *coscaim* 'check, correct', cpd. (*con-sech-*) of the root in Grk. ἔννεπε, Lat. *inseque* 'relate, tell', OE *secgan* 'say', etc., IE *sek^w-* (18.22). Walde-P. 2.478. Pedersen 2.619 ff.

5. Goth. *balweins* 'punishment, torment' (but not legal 'penalty', for which nothing is quotable) : *balwa-wesei* 'wickedness', OE *bealo* 'evil, wickedness', etc. Feist 79.

ON *refsing*, fr. *refsa* 'punish' (Dan. *revse* 'chastise, punish') = OE *refsan, repsan*, OHG *refsen*, etc. 'reprove, blame' : Lat. *rapere* 'seize, carry off', Skt. *rapas-* 'bodily defect, injury', etc. Walde-P. 2.369 f. Falk-Torp 894 f.

ON *vīti*, OE *wīte* (ME, NE dial. *wite, wyte* 'blame, reproach', NED s.v.), OHG *wīzi*, fr. the root **weid-* in words for 'see' and 'know'. Cf. OE *wītan*, OHG *(far)-wīzan* 'impute the guilt, blame', Goth. *fra-weitan* 'avenge', and the parallel semantic development in Lat. *animadvertere.*

MHG *strāfe*, NHG *strafe*, MLG *straffe* (> Dan. *straf*, Sw. *straff*), Du. *straf*, beside vb. MHG *strāfen*, etc. 'blame, censure, punish', prob. as orig. 'treat severely' (physically, verbally, or both?) : MHG *straf*, NHG *straff* 'tense, severe'. Falk-Torp 1176. Franck-v. W. 673.

6. Lith. *bauda, bausmė*, fr. *bausti* 'punish' (but refl. *baustis* 'prepare oneself, intend') : *budėti* 'be awake', Skt. *budh-* 'be awake, notice', etc., with development as in Lat. *animadvertere*, etc.

Lett. *suods*, fr. ORuss. *sud* 'legal condemnation', orig. 'court' and 'judgment' (21.15, 21.17). Mühl.-Endz. 3.1136.

7. ChSl. *(po)kaznĭ*, SCr. *kazan*, Russ.

nakazanie, fr. ChSl. *kazati*, etc. 'point out, show' (cf. SCr. *kazati*, Russ. *skazat'* 'say', 18.22). Cf. ChSl. *pokazati* rendering παιδεύω 'chastise' Lk. 23.16, 22, *nakazanĭje* 'admonition' (Supr.), etc. Berneker 496 f.

Boh. *trest* (masc.) : *trest'* (fem.) 'reed, cane' (whence also 'juice pressed out, extract, essence', etc.), Pol. *treść* 'pith, essence, contents', ChSl. *trŭstĭ* 'reed'. Cf. OPol. *tres(t)kać* 'chastise, torment, punish' (Linde s.v.). Development through the 'rod' of punishment, as in Skt. *daṇḍa-*. Prob. through vb. *trestiti* ('use the rod' >) 'punish', whence back-formation *trest.* Brückner 576.

Boh. *pokuta* = Pol. *pokuta* 'penance', formerly 'guilt' and 'punishment' : ChSl. *sŭ-kątati* (Supr.) rendering καταστέλλω 'restrain, appease, quiet' (Russ. *kutat'* 'wrap up, envelop', etc.), with development through 'appeasement'. Berneker 601 f. Brückner 428.

Pol., Russ. *kara* = SCr. *kar* 'scolding', Boh. *kara* 'censure' : ChSl. *u-korŭ* 'insult', SCr. *u-kor, prije-kor, po-kor* 'blame', vbs. ChSl. *(u)koriti* 'insult, slander', SCr. *koriti* 'blame', etc. (16.78). Berneker 487 f., 578 f.

8. Skt. *daṇḍa-* 'rod, staff' (etym.? Walde-P. 1.810), hence in various symbolic uses (e.g. 'power'), but esp. as the reg. legal term for 'penalty' of any kind.

Av. *čiϑā-, kaēnā-*, above, 1.

In OPers. the regular verb for 'punish' is *pars-*, *fras-* (e.g. *parsāmiy* 'I punish', *avam ufrasatam aparsam* 'him well punished I punished', i.e. 'punished severely') = Av. *pərəs-*, *fras-*, Skt. *pṛcch-*, *pracch-* 'ask' (18.31).

The words listed under 'penalty' (21.37) are comprehensive, covering the 'fine' in money or other property. Most of them are in fact, for the earlier periods, those commonly employed when the reference is to a 'fine', e.g. Grk. ζημία (Lat. *poena* in XII Tables, but not commonly), OE *wīte*, Skt. *daṇḍa-*, Av. *čiϑā-*. Or they may be made more specific by the addition of words for 'money', like NHG *geldstrafe, strafgeld*, Lith. *piniginė bausmė*, Pol. *kara pieniężna*, etc. Such words are repeated in this list, but need no further comment.

But there are also special words for 'fine', as follows.

1. Grk. Att. θωά (IG 1^2.114.42; but unknown in Att. authors, where reg. ζημία), Hom. θωή, Ion. θωιή, θωυή, fr. the root of τίθημι 'place, put' (with the ō-grade as in θωμός 'heap', OE *dōms* 'judgment'), and so orig. the 'set' amount. Hence the more widely quotable vbs. for 'pay a fine', pass. 'be fined',

θωάω (early Att., Locr., Delph.), Cret. θωαίω, El. θωάδδω. Walde-P. 1.829. Boisacq 360.

Grk. πρόστῑμον ('penalty' Hipp.), freq. as 'fine' from 3d cent. B.C. and the usual NG word : τῑμή (21.37).

2. Lat. *multa* (early *molta*, Osc. acc. sg. *moltam*, Umbr. gen. sg. *motar*), etym. dub., perh. fr. **molktā* either as orig. 'appeasement' : *mulcēre* 'stroke, soothe, appease', or as orig. 'injury' : *mulcāre* 'beat, injure', Skt. *mṛc-* 'hurt, injure', pple. *mṛktá-* 'hurt', etc. Hence (learned words) It., Sp. *multa*, OFr. *multe* (> NE *mult*), and, through a medieval spelling *mulcta*, OFr. *mulcte*, NE *mulct*, Dan. *mulkt.* Walde-P. 2.297. Several of the words for 'prison' are derived from verbs for 'seize' or 'guard' and denoted at first the act or state of 'imprisonment', hence also its place, the 'prison'. Others are connected with words for 'bond', 'shut in', 'hook, corner', 'cage', 'tower', 'dark', 'hard' (through 'hard situation'), and 'grief' (through 'place of grief'). A few, including one of the most important, are of obscure origin.

1. Grk. εἱρκτή, fr. εἵργω 'shut in'.

Grk. δεσμωτήριον, beside δεσμώτης 'prisoner', fr. δεσμός 'bond' (9.17).

Grk. φυλακή 'guarding, keeping', hence 'custody, imprisonment' and 'prison' (usual word in NT and in NG), fr. φύλαξ 'watcher, guardian', φυλάσσω 'watch, guard, preserve' (11.24).

2. Lat. *carcer* (> It. *carcere*, OFr. *chartre*, Sp. *cárcel*), late *carcar* (> Ir. *carcar*, W. *carchar*, Goth. *karkara*, etc.), used also for the barrier or starting place in the race course and earliest sense prob. Boh. *žalář*, fr. *žal* 'grief, sorrow' (16.32).

Russ. *tjur'ma*, fr. NHG *turm* 'tower' or more precisely in form fr. the verb *türmen* once used for 'put in prison' (cf. Paul, Deutsches Wtb. s.v.). The association between 'tower' and 'prison' was once widespread (cf. esp. the *Tower of London*), but this seems to be the only case in which it has yielded the regular word for 'prison'.

Russ. *ostrog* 'fortified place' and 'prison', fr. the root of ChSl. *strěšti*, *strěgą* 'guard'.

7. Skt. *kārā-* (also *kārāgṛha-*, *kārāgārā-*, cpds. with *gṛha-* and *agāra-* 'house'), etym.? See under Lith. *kalinys* 'prisoner' (20.47).

'Crime' is intended to cover the usual generic words for a serious offense against the law, without regard to such technical legal distinctions as those in NE *felony* vs. *misdemeanor*, Fr. *délit* (or *crime*) vs. *contravention*, NHG *verbrechen* vs. *vergehen*, etc.

Most of the words are based on such notions as 'injustice, wrong', 'evil deed' (in part from simple 'deed'), 'crookedness', 'transgression', 'breaking, breach', 'fault, guilt, flaw'. These were originally, and in part remained, more comprehensive than 'crime', applying equally to offenses against religion and against morals. The Goth. and ChSl. words listed are not actually quotable in the legal sense, but render the Grk. word which does also include 'crime'. In Indo-Iranian, where the law was mainly one of religion, there is no real distinction between 'crime' and 'sin'.

In a few cases a legal word for 'accusation, charge' (in part from 'judgment') has come to denote the subject of the charge, the 'crime' itself.

1. Grk. *ἀδικία*, *ἀδίκημα*, both lit. 'injustice, wrong', fr. *ἄδικος* 'unjust, wrongdoing' : *δίκη* 'right, justice, lawsuit' (21.13).

Grk. *ἔγκλημα* 'accusation, charge' (fr. *ἐγκαλέω* 'bring a charge, accuse', 21.31), hence the subject of the charge, 'crime'

(this sense perh. in some pap. passages, but could still be 'charge'), so reg. in NG.

2. Lat. *facinus* 'deed' (good or bad)', but esp. 'evil deed, crime' : *facere* 'do, make'. Ernout-M. 323.

Lat. *scelus* 'evil deed, crime', prob. : Grk. *σκολιός* 'crooked' (12.74), also in moral sense 'unjust'. Walde-P. 2.598. Ernout-M. 904 ("sans correspondant").

Lat. *crīmen*, prob. orig. 'decision' (like Grk. *κρῖμα*), but in actual use 'charge, accusation', later (Cic.) 'crime' : *cernere* 'separate, distinguish, discern', *dēcernere* 'decide', Grk. *κρῖνω* 'judge, decide' (21.16). Ernout-M. 179. Otherwise (as orig. 'charge' : OHG *scrīan* 'cry', etc.) Walde-H. 1.291. Hence It. *crimine*, Fr. *crime* (> ME, NE *crime*), Sp. *crimen*, Rum. *crimă* (neolog. fr. Fr.).

Lat. *dēlictum* 'fault, offense, transgression', fr. *dēlinquere* 'commit a fault', orig. 'leave undone', cpd. of *linquere* 'leave' (12.18). Hence the much stronger It. *delitto*, Fr. *délit*, Sp. *delito*. These are, in fact, more commonly employed as the generic words for 'crime' than those of the preceding group (Fr. *crime*, etc., or both indiscriminately by some writers), e.g. in discussions of the history of law or Greek or Roman law. But in the technical language of the penal codes there may be a distinction. Thus It. *reato* (fr. *reo* 'culprit, criminal') is the comprehensive term for any breach of the law, the *reati* being classified, formerly as *crimini*, *delitti*, *contravenzioni*, now as *delitti* vs. *contravenzioni*. Fr. *délit* may also denote an offense intermediate between *crime* and *contravention*.

Rum. *vină* 'fault, guilt' (16.76), also 'crime'. Tiktin 1742.

3. Ir. *cin*, NIr. *cion* (also *cionnta*) 'fault, guilt' (16.76), also 'crime'.

W. *trosedd*, lit. 'transgression', fr. *tros* 'over, across' (= Lat. *trāns*). Cf. *traws* 'adverse, perverse, wicked'.

Br. *torfed*, fr. OFr. *tortfait*, *torfet* 'misdeed, forfeit' (Godefroy 7.754). Henry 266.

4. Goth. *inwindiþa*, reg. for *ἀδικία*, beside adj. *inwinds* 'unjust' : OE *inwid* 'guile, wickedness', ON *vindr* 'slanting, twisted', root connection disputed but prob. : Goth. *bi-windan* 'turn', NE *wind*, etc., with strengthening prefix *in-*. Walde-P. 1.261. Feist 296.

Goth. *missadēþs* (renders *παράβασις*, *παράπτωμα*), OE *misdǣd*, ME *misdede* (NE *misdeed*), Du. *misdaad*, OHG *missitāt*, MHG *missetāt* (NHG *missetat*), all except Du. *misdaad* now used chiefly for 'misdeed, transgression' in moral sense, a use common also from the earliest times, as shown by the Gothic.

ON *glœpr*, with *glōpr* 'fool' : *glap* 'hallucination, flaw', *glepja* 'confuse', root connection dub. Walde-P. 1.626. Falk-Torp 325.

ON *sǫk* 'accusation, charge' and 'lawsuit' (21.13), also the subject of the charge, 'crime'.

ON *afbrigð*, properly a 'deviation, transgression', fr. *bregða af* 'deviate from, disregard' (*bregða* 'move quickly, draw a sword, break off', etc.).

Dan. *forbrydelse*, Sw. *förbrytelse*, translations of NHG *verbrechen* (: Dan. *bryde*, Sw. *bryta* 'break'). Falk-Torp 254.

Sw. *brott*, lit. 'a break, breach', cf. NIcel. *afbrot* 'trespass, sin', ON *lǫgbrot* 'violation of the law' : Sw. *bryta*, etc. 'break' (cf. above).

OE *mān*, OHG *mein* (also 'wickedness, sinful deed, falsehood', in cpds. OE *māndǣd*, MHG *meintāt* 'evil deed, sin, crime') : ON *mein* 'harm, disease, sore', sb. use of adj. OE *mān* 'wicked', OHG *mein* 'false', these (through 'changed, deceptive') : Lith. *mainas* 'exchange', Goth. *gamains* 'common', etc. Walde-P. 2.241. Falk-Torp 713.

OE *firen*, OHG, OS *firina* : ON *firn*

pl. 'something shocking, abomination', Goth. *fairina* 'guilt, blame', all prob. orig. 'transgression'. See Goth. *fairina*, 16.76.

ME, NE *crime*, fr. Fr. *crime* (above, 2).

NHG *verbrechen*, substantivized infin. = MHG *verbrechen* 'break to pieces, destroy'. Kluge-G. 648.

5. Lith. *nusikaltimas* (NSB, etc.), fr. *nusikalsti* 'commit an offense or crime' : *kaltinti* 'accuse' (21.31), *kaltas* 'guilty' (21.35), *kaltė* 'guilt, blame' (16.76).

Lett. *nuoziegums* : *nuoziegties* 'commit a sin, crime', Lith. *nusižengti* 'make a mistake', cpd. of *žengti* 'step' (Lett. *ziegt* = *nuoziegties* but not now popular), with development through 'transgress'. Mühl.-Endz. 4.471.

6. ChSl. *nepravĭda* (Gospels, Supr. for *ἀδικία*, *ἀδίκημα*), neg. cpd. of *pravĭda* 'right, righteousness' : *pravŭ* 'straight', hence 'right', *pravo* 'law' (21.11).

SCr. *zločin*, *zločinstvo*, Boh. *zločin*, cpds. of Slavic *zŭlŭ* 'bad' (16.72) and SCr., Boh. *činiti* 'do, make' (9.11).

Pol. *zbrodnia*, fr. *z* 'from' and *bród* 'ford', orig. 'deviation from the ford', that is, 'from the right way', parallel to *zdrożny* 'culpable, criminal, wicked', fr. *z* and *droga* 'way, road'. Berneker 1.87. Brückner 648.

Russ. *prestuplenie* = ChSl. *prěstąplĭjenĭje* 'transgression', fr. *prěstąpiti* 'transgress', cpd. of *stąpiti* 'tread, step'.

7. Of the numerous Skt. words which might serve for 'crime' (or 'sin', which was the same thing) the most important in the lawbooks seems to be *pātaka-* (with cpds. *ati-*, *mahā-*, etc. for different gradations), for which see 16.75.

For other Skt. and Av. words see under 'sin' (16.75) and 'fault, guilt' (16.76), also Jolly, Recht und Sitte 115.

'Murder' in primitive society was not a public 'crime' but an offense for which vengeance or blood-money was exacted by the victim's kinsmen. Such was still the situation in Homeric times and among all the peoples of IE speech in the earliest period. Only later did 'murder' come to be recognized as a public matter to be dealt with in the laws (even in the Gortyn code and the fragments of the Roman XII Tables there is nothing about murder), and it was still generally not distinguished verbally from justifiable 'killing'.

That is, with few exceptions, the words are derived from verbs for 'kill' and generally denoted simply 'killing', whether in battle or accident or criminal 'murder'. But the Gmc. group (NE *murder*, NHG *mord*, etc.), though etymologically 'death', denoted from the earliest times some sort of highly rep-

rehensible (in ON often esp. secret) killing.

A few of the words are of quite different origin, namely, derived from those for 'murderer' and this from 'red-handed' (W.), 'secret' (Lett.), 'enemy' (Boh.), and, if one includes Fr. *assassin*, etc., 'hashish-eater'.

1. Grk. *φόνος*, fr. the root of *ἔπεφνον*, *πέφαμαι* 'kill', *θείνω* 'strike', Skt. *han-* 'strike, kill', etc. (4.76). The word covered any 'killing' (in battle, etc.) but was the regular term for 'murder', in Attic classified as *φόνος ἑκούσιος* vs. *φόνος ἀκούσιος* 'voluntary' vs. 'involuntary murder'. NG pop. also *τὸ φονικό*, neut. of *φονικός* 'murderous'.

2. Lat. *caedēs*, most frequently 'slaughter' in battle, but also 'murder', fr. *caedere* 'strike, beat, kill' (4.76).

Lat. *nex* 'violent death' (4.75), used also for 'murder'.

Lat. *parricīda* (early nom. *-as*), generally defined as 'murderer of a near relative' (and so *parricīdium* 'murder' defined in the same way), but without such restriction in an early law quoted by Festus (*si qui hominem liberum dolo sciens morti duit, parricidas esto*) and sometimes later (*parricida civium* Cic.), prob. the earliest distinctive term for 'murderer'; cpd. of *-cīda* : *caedere* 'kill', first part much disputed but perh. : Skt. *puruṣa-* 'man', so that the whole word would be parallel to Grk. *ἀνδρο-φόνος*. Ernout-M. 733 f. Wackernagel, Gnomon 6.449 f., 458. Believed by the Romans to be from **patr-cīda*, it gave rise to *mātricīda*, *frātricīda*, etc.

Lat. *homicīda* 'murderer' (Cic.), formed like and prob. directly to *parricīda*, with first part fr. *homō* 'man'. This and the parallel *homicīdium* (post-Cic.) became henceforth the usual words and the source of the similar It., Fr., Sp. and NE forms (but Fr., NE *homicide* only as more comprehensive than *meurtre*, *murder*).

It. *assassinio*, Fr. *assassinat* (> Rum. *asasinat*), Sp. *asesinato* (also usually somewhat more special than 'murder', like NE *assassination*), fr. Fr. *assassin* (> It. *assassino* > Sp. *asesino*) 'murderer', this fr. an Arab. word meaning lit. 'hashish-eaters' but applied to a certain sect. REW 4071. NED s.v. *assassin*.

Fr. *meurtre*, fr. Gmc. (below, 4). REW 5753.

Rum. *omor*, back-formation to *omori* 'kill' (4.76).

3. Ir. *marbad*, lit. 'slaying', vbl. n. to *marbaim* 'kill' (4.76), NIr. *mharbhadh*, but esp. *dūnmharbhadh*, lit. 'man murder' (*duine* 'man').

W. *llofruddiaeth*, through vb. *llofruddio* 'murder', fr. *llofrudd* 'murderer', lit. 'red-handed', cpd. of *llof-* (in cpds. and derivs. = *llaw*) 'hand' and *rhudd* 'red'.

Br. *laz* (also *lazerez*, *lazidigez*), *drouk-laz* (cpd. with *drouk-* 'bad, evil'), fr. *laza* 'kill' (4.76), *drouk-laza* vb. 'murder'.

Br. *muntr*, fr. Fr. *meurtre* (with dissim.).

4. Goth. *maurþr*, OE *morþor* and *morþ*, ME *mordre*, NE *murder*, ON *morð*, OHG *mord*, etc., general Gmc. : Lat. *mors*, *mortis* 'death', *mortuus* 'dead', *morī* 'die', etc., the widespread group for 'die, dead, death' (4.75), with general Gmc. specialization, prob. through 'violent death' (like Lat. *nex*).

ON *vīg* (legal term for 'manslaughter' vs. *morð* 'murder') : *vega* 'fight' (20.11) and 'kill'.

ON *manndrāp*, OE *mannsliht*, OHG, MHG *manslaht*, all lit. 'manslaughter' (ON *drepa*, OE *slēan*, OHG *slahan* 'strike, kill', 4.76) and frequent legal terms for 'homicide', more comprehensive than ON *morð*, etc.

5. Lith. *žmogžudystė* (NT and still

best word), deriv. cpd. of *žmogus* 'man' and *žudyti* 'kill' (4.76).

Lett. *slepkavība*, fr. *slepkava* 'murderer, bandit' : *sleps* 'secret, hidden', *slēpt*, Lith. *slėpti* 'hide', etc. Mühl.-Endz. 3.926, 930.

6. ChSl. *ubijĭstvo* (Gospels, Supr.), *ubojĭ* (Supr.), SCr. *ubistvo*, Pol. *zabójstwo*, Russ. *ubijstvo*, all fr. the root in ChSl. *biti* 'strike', *ubiti* 'kill' (4.76).

Boh. *vražda* = ChSl. *vražĭda*, Russ. *vražda* 'enmity, hate' : Boh. *vrah* 'murderer' = ChSl. *vragŭ* 'enemy' (19.52).

Pol. *mord*, fr. NHG *mord* (above).

7. Skt. *vadha-* 'killing' in general, often the 'death-penalty, capital punishment', but also 'murder' (e.g. Manu 11.127) : *vadh-* 'smite, kill' (4.76).

Av. *jənərā-* 'killing, murder'(?) : *jan-* 'kill' (4.76). Barth. 607 f.

Several of the words listed are derived from verbs used for sexual intercourse (e.g. 'lie', 'play', 'love'), or from words for 'whore', and these denoted any kind of illicit sexual intercourse without distinction between 'adultery' and 'fornication'.

The more distinctive words are mostly based on such notions as 'breach of marriage', 'relations with strange women', or (Lat. *adulterium*, etc.) 'corruption'.

1. Grk. *μοιχεία*, with *μοιχός* 'adulterer', whence vbs. *μοιχάω*, *μοιχεύω*, prob. fr. the root of *ὀμείχω* (*ὀμῑχέω*), Lat. *mingere*, Skt. *mih-*, etc. 'make water' (4.65)—despite the semantic incongruity. One must assume that a sense 'debauch' started from such vulgar phrases as that in Catullus 67.30 (*qui ipse sui gnati minxerit in gremium*) and that *μοιχός* as orig. 'debaucher' was used esp. for the 'adulterer'. For this last cf. Goth. *hōrs* 'fornicator' (*πόρνος*) and 'adulterer' (*μοιχός*) and the double use of Goth. *hōrinassus*, ON *hōr*, etc. (below, 4).

2. Lat. *adulterium*, with *adulter* 'adulterer', etc., fr. *adulterāre* 'alter, falsify, corrupt' (: *alter* 'other'), then, through phrases like *adulterāre mātrōnās*, 'commit adultery'. Hence OIt. *avoltero*, OFr. *a(v)ulterie* (> Br. *avoultriez*), *avoutire*, *avoutrie* (> ME *avoutrie*), and the later (re-formed fr. the Lat.) It., Sp. *adulterio*, Fr. *adultère* (> Rum. *adulter*, hence also *adulteriŭ*), NE *adultery*; also, through *adaltair* 'adulterer', Ir. *adaltras*, *adaltrach*, NIr. *adhaltrannas*. Ernout-M. 35. Walde-H. 1.15. REW 207. Vendryes, De hib. voc. 110. NED s.v. *adultery*.

3. Ir. and Br. words, above, 2.

W. *godineb* ('adultery' and 'fornication'), fr. the root seen in Ir. *goithim* 'futuo' (4.67). Pedersen 2.34. Stokes 113.

4. Goth. *kalkinassus* (renders both *μοιχεία* and *πορνεία* 'fornication'), deriv., through vb. **kalkinōn*, of *kalkjō* 'whore' (19.72).

Goth. *hōrinassus* (likewise for both *μοιχεία* and *πορνεία*), deriv., through vb. *hōrinōn*, of word for 'whore' seen in ON *hōra*, etc. (19.72. Goth. only masc. *hōrs*). Here likewise ON *hōr*, Dan., Sw. *hor*, OHG *huor*, *huar*, *huora*, MHG *huor*, *huore*, all used for illicit intercourse, whether 'adultery' or 'fornication' (e.g. OHG *huar* Otfr. 'adultery', *huor* Tat. 'fornication').

OE *ǣwbryce*, MHG *ēbruch*, NHG *ehebruch*, Dan. *ægteskabsbrud*, Sw. *äktensbrott*, Du. *echtbreuk*, all lit. 'breach of marriage', cpds. of words for 'marriage' (orig. 'law' whence 'legal married state', 2.34) and derivs. of vbs. for 'break' (9.26).

OHG *ubarhīwī* (only Tat. 120.1, 2 = Jn. 8.3.4, where Otfr. has *huar*), cpd. of *ubar* 'over, beyond' and *hīwī* 'married state, matrimony' : *hīwan* 'marry', etc. (2.33).

OHG *uorligirī* (pl. Tat. 84.9 = *adulteria*), fr. *furligan* 'commit adultery' (so reg. in Tat.) = OE *forlicgan* 'commit fornication', cpds. of OHG *liggen*, OE *licgan* 'lie'.

ME *avoutrie*, NE *adultery*, see above, 2.

Du. *overspel*, cpd. of *over* 'over, beyond' and *spel* 'play' in its vulgar sense of 'coition'. Franck-v. W. 483 f.

5. Lith. *svetmoterystė* (or *-ybė*), with *svetmoterius* 'adulterer', lit. 'one who has to do with strange women', cpd. of *svet-* (cf. *svetimas* 'strange, stranger', *svečias* 'guest'; formerly also 'stranger', 19.55) and *moteris* 'woman' (2.22).

Lett. *laulības pārkāpšana*, phrase with gen. of *laulība* 'marriage' (2.34) and deriv. of *pārkāpt* 'overstep, transgress' (Mühl.-Endz. 3.160), hence lit. 'transgression of marriage'.

6. ChSl. *prěljubodějanĭje* (beside *ljubodějanĭje* 'fornication' and *ljubodějica* 'whore'; cf. Jagić, Entstehungsgesch. 360), SCr. *preljub*, Russ. *preljubodejanie*, fr. *liubiti* 'love' (16.26), here in its sexual sense.

Boh. *cizološtví*, Pol. *cudzołostwo*, fr. vbs. *cizoložiti*, *cudzołożyć* 'commit adultery', cpds. of *cizí*, *cudzy* 'strange' (see under 'stranger', 19.55) with *o*-grade forms of root in vbs. for 'lie' (12.14); hence orig. 'lie with strange (women)'.

7. Skt. *pāradārya-*, fr. *paradāra-* 'wife of another'.

Skt. *samgrahaṇa-* 'seizing' (fr. *grah-* 'seize'), also with or without preceding *strī-* 'woman', 'adultery' or 'fornication'. BR s.v. Jolly, Recht und Sitte 128 ("Ehebruch").

Skt. *vyabhicāra-* 'going astray, misdeed' and sometimes esp. 'unfaithfulness' to husband, fr. *vy-abhi-car-* 'commit a misdeed', cf. *abhi-car-* often esp. 'be unfaithful' to husband.

Most of the terms for 'rape' are words denoting 'force, violence' or 'compulsion', with the notion of sexual relations either expressed or, more commonly, left to be understood. Cf. the current use (at least in U.S.) of NE *assault* and *attack* = *rape*.

A few are more general terms for 'shameful act' or 'defilement', which include, but are not restricted to, 'rape'. In NE *rape* the criminal sense here intended is secondary to that of forcible abduction.

1. Grk. *ὕβρις* 'violence, insolence, outrage', as law term 'assault' in wide sense, but esp. 'rape', etym. dub., perh. *ὕ-βρις* cpd. of *ὑ-* (= Skt. *ud* 'up, out'), second part : *βαρύς* 'heavy', etc. (15.81) with development through the notion of 'putting forth one's whole weight'? Walde-P. 1.686. Boisacq 997.

Grk. *βιασμός* 'violence' and esp. 'rape' (Menander+) : *βιάω*, *βιάζω* 'constrain', *βία* 'violence, force', Skt. *jī-* 'conquer', etc. Walde-P. 1.666 f. Boisacq 119.

In the Gortyn code 'rape' is specifically expressed by verbal phrases consisting of *κάρτει* 'by force' with either *οἴφω* 'have sexual intercourse' (4.67) or mid. of *δαμάζω* 'overcome'.

2. Lat. *stuprum* 'disgrace' (only ante-class.), in class. period 'shameful act', always with reference to sexual relations, such as 'debauchery, adultery, incest, rape' (hence as 'rape' It. *stupro*, Sp. *estupro*) : *stupēre* 'be struck senseless, be stunned, astonished', Grk. *τύπτω* 'strike', etc., with prob. development through 'act which shocks one, shocking act'. Walde-P. 2.619 (with less prob. view of semantic development). Ernout-M. 991.

Lat. *raptus* (: *rapere* 'carry off') and likewise It. *ratto*, Fr. *rapt*, Sp. *rapto*, are used for 'rape' = 'abduction' ("rape of the Sabine women", etc.), but not (or only very rarely) for 'rape' as intended here.

Fr. *viol* (> Rum. *viol*, neolog.), back-formation to *violer* 'violate', fr. Lat. *violāre* 'violate, outrage', deriv. of *vīs* 'force, strength'.

The Rum. vb. for 'rape' is *silui*, fr. Slavic (below, 6).

3. Ir. *forcur* (reg. word, cf. Thurneysen, Irisches Recht, p. 37), prob. vbl. n. to unattested **for-curiur* 'put upon' (cf. *curi-* and cpds. in Pedersen 2.498 ff.), cf. W. *guorcher* gl. *summitas inferni*. I. Williams, BBCS 3.259.

Ir. *sleith* (Laws, Gloss. 663), vbl. n. to *tle-n-* 'carry off, steal'. Pedersen 2.649.

Ir. also *lānamnas ēcne* 'cohabitation by force' (Laws, Gloss. 288, 522), and so commonly NIr. simply *ēigean* 'force', also 'rape' (cf. Ir. *ēcen* 'necessity', 9.93).

W. *trais* 'oppression, force, violence' and 'rape' (MW *treys* 'rape, abduction', etc.), etym. dub., perh. : Ir. *tress* 'battle, skirmish'. Loth, RC 36.168 (vs. Morris Jones 142).

Br. *gwalladur* (Vallée s.v. *viol*), through vb. *gwalla* 'harm, violate', fr. *gwall* 'bad, evil' (16.72).

4. ON *kvenna-nām* (*konu-nām*, *-tak*), lit. 'taking of women'. For vb. 'rape' reg. *taka konu nauðga* (with adj. *nauðigr* 'forced, unwilling'), hence late sb. *nauðgan* 'compulsion, rape'.

Dan. *voldtægt*, Sw. *våldtägt*, lit. 'taking by force', fr. Dan. *vold*, Sw. *våld* 'force, might' and *tage*, *taga* 'take'.

OE *nīedhǣmed*, cpd. of *nīed* (*nēad*, etc.) 'compulsion, necessity' (9.93) and *hǣmed* 'sexual intercourse' (: vb. *hǣman*, 4.67).

ME, NE *rape*, fr. Anglo-Fr. *raap*, *rap(e)*, back-formation to *raper*, Lat. *rapere* 'carry off by force'. NED s.v. *rape* sb. Also *ravishing*, *ravishment*, fr. vb. *ravish*, OFr. *ravir* (*raviss-*), VLat. **rapīre* = Lat. *rapere*. NED s.vv. In

this group the sense of 'rape' as here intended is secondary and rare in ME.

Du. *verkrachting*, lit. 'violation', with vb. *verkrachten* 'violate (a law, etc.), rape', fr. *kracht* 'force, power, strength' (4.81).

OHG, MHG *nōtnumft*, lit. 'compulsory taking' (*nōt* 'necessity' and *neman* 'take'); MHG *nōt-twanc* (: *twingen* 'compel').

MHG *nōtzoc* (with vb. *nōtzogen*, OHG *nōtzogōn*), NHG *nōtzucht* (back-formation fr. MHG vb. *nōt-zühten*), last member : OHG *ziohan*, NHG *ziehen* 'pull, draw' (9.33). Kluge-G. 420. Weigand-H. 2.314.

5. Lith. *išanavimas*, also 'botching, bungling, dishonoring', with vb. *išanuoti* 'botch, bungle, dishonor, rape' : *anuoti* 'do, act' (also vulg. 'have sexual intercourse', Lalis).

Lith. *iššaginimas*, with vb. *iššaginti* (= *išanuoti*) : *žaginti*, *žagti* 'pollute, defile, debauch'.

Lett. (apparently only) *varas darbs*, lit. 'deed of violence', cf. *varas darbu* (*pie sievietes*) *darīt* 'do a deed of violence (to a woman)' = 'rape'. Mühl.-Endz. 4.475 (col. 1).

6. SCr. *silovanje*, Russ. *iznasilovanie*, with vbs. SCr. *silovati*, Russ. *iznasilovat'* : ChSl., SCr., Russ. *sila* 'strength, force' (4.81).

Boh. *násilné smilstvo*, phrase consisting of *násilné* 'violent' (: *sila* 'force, strength') and *smilstvo* 'illicit intercourse, whoring', beside *smilný* 'lecherous' : Lith. *smilus* 'sweet-toothed, loving dainties'. Brückner 503. Cf. the shift from gluttony to sexual debauchery in NE *lecher*, *lecherous*, *lechery* (ME *lechur*, fr. OFr. *lecheur* : Fr. *lêcher* 'lick', etc.; NED s.vv.).

Pol. *zgwałcenie*, with vb. *zgwałcić*, fr. *gwałt* 'violence, outrage', fr. NHG *gewalt* 'power, force'.

7. Skt. *dūṣaṇa-* 'corruption, defilement', also esp. 'defilement' of a woman (but without distinction between rape and seduction), fr. *duṣ-* 'be corrupted, defiled' (fr. prefix *duṣ-* 'bad').

All the words for 'theft' are cognate with those for 'steal' or 'thief', both combined in Du. *diefstal*, NHG *diebstahl*. The relation is so obvious, by reference to the lists for 'steal (11.56) and 'thief' (11.57), that no further comment on the etymology is needed.

NG *κλοπή* is still the legal term, beside pop. *κλεψιά* and *κλέψιμο*, new formations fr. the verb.

The NE legal term *larceny* comes, through Fr., fr. Lat. *lātrōcinium* 'robbery', for which, and in general for 'robbery' vs. 'larceny,' see words for 'robber' (11.58).

Words for 'arson' are connected with those for 'burn' (11.84) or 'fire' (11.81), or both together (Grk. *πυρ-καϊά*). Many of them cover 'burning, conflagration' in general. The criminal application might be brought out by expressions for 'evil', 'caused', 'intentional' or the like, but this would not be necessary in legal language, where only 'arson' could be meant (e.g. Grk. *γραφὴ πυρκαϊᾶς*).

1. Grk. *πυρκαϊά*, in Hom. 'funeral pyre', in general 'conflagration', in law 'arson', cpd. of *πῦρ* 'fire' and sb. : *καίω* 'burn'.

Grk. *ἐμπρησμός* 'burning', in NG the reg. word for 'arson', fr. *πίπρημι* 'burn'.

2. Lat. *incendium* (> Romance words) 'burning', including 'arson' (cf. Cic. *domus ardēbat nōn fortuitō, sed oblātō incendiō*), fr. *incendere* 'set fire to, burn'.

3. Ir. *loscad* (or esp. *loscad comraite* 'intentional burning'; cf. Laws, Gloss. 541), W. *llosg, llosgiad*, fr. Ir. *loscim*, W. *llosgi* 'burn'.

NIr. *dōghadh*, fr. *dōighim* 'burn'.

Dan., Sw. *mordbrand*, MHG *mort-brand*, NHG *mordbrand*, cpd. of *brand* 'burning' with *mord* 'murder', hence orig. 'murderous burning, burning for purpose of killing enemies', as frequently ON *brenna*.

OE *bærnet* 'burning', also 'arson', fr. *bærnan* 'burn'. Cf. also *blæsere* (fr. *blæse* 'flame, blaze') used for the 'incendiary' in Laws of Aethelstan.

NE *arson* (*arsoun* in ME period quotable only in laws written in French and there qualified, as *arsoun feloniousement fait*), fr. OFr. *arson, arsun* 'burning', fr. late Lat. *arsiō, -ōnis* id. : *ardēre* 'burn'. NED s.v.

OHG, MHG *brant* 'burning', including 'arson', fr. *brennan* 'burn'. Hence NHG *brandstiftung* (in first occurrence with *muthwillige* 'wanton'), cpd. with deriv. of *stiften* 'cause, make'. Similarly Du. *brandstichting*.

5. Lith. *padegimas*, fr. *padegti* 'set on fire', cpd. of *degti* 'burn'.

Lett. *uguns pielikšana* (Drawneek; *uguns likšana* Ullmann; Mühl-Endz. only *uguni pielikt* 'brand stiften'), gen. of *uguns* 'fire' and deriv. of *pielikt* 'put on' (Mühl.-Endz. 3.267) and modeled on NHG *brandstiftung*.

6. SCr. *zapaljenje*, Pol. *podpalenie*, fr. SCr. *zapaliti*, Pol. *podpalić* 'set fire to', cpds. of SCr. *paliti*, Pol. *palić* 'burn'.

Boh. *žhařství*, fr. *žhař* 'incendiary', this fr. root of Boh. *hořeti*, ChSl. *gorěti* 'burn' (cf. *žar* 'heat, glow', *požar* 'conflagration').

Russ. *podžog*, fr. *podžeč*, *podžigat'* 'set fire to', cpd. of *žeč'* = ChSl. *žesti, žegą* 'burn'.

7. There seems to be no reference to 'arson' in the Indo-Iranian sources.

'Religion' involves a belief in supernatural powers, the desire to stand well with them, and practices devoted to this end. 'A religion' denotes a particular body of such beliefs and practices. In its early phases, as still among primitive peoples and with survivals among those of IE speech, it consisted of crude 'superstition' (22.41).

The most common semantic source of 'religion' is 'belief, faith', but a few are based on 'worship', 'service of god', or 'insight'.

1. There is no distinctive early Grk. word for 'religion'. One may note *θεογονία* 'genealogy of the gods, mythology'; *εὐσέβεια* 'piety' (toward gods or parents, also 'loyalty'), fr. *εὐσεβής* 'pious, religious, holy' : *σέβομαι* 'feel awe, revere, worship' (22.16); *τὰ θεῖα* 'acts of the gods' and sometimes 'divine

matters, religion', neut. pl. of *θεῖος* 'divine, holy', fr. *θεός* 'god' (22.12).

Grk. *θρησκεία* 'religious worship', in pl. 'religious rites' (Hdt.+), the reg. word for 'religion' in LXX, NT, and down to the present day (cf. *θρήσκω, θράσκω* 'understand, remember' Hesych.), etym. dub., perh. fr. the root **dher-* in Skt. *dhṛ-* 'hold, support', *dharma-* 'usage, right, law', etc. (cf. below, 7). Walde-P. 1.857. Boisacq 340, 350.

2. Lat. *religiō* (> the widespread modern Eur. word), etym. disputed from ancient times to the present, whether : *legere* 'collect, select' or : *ligāre* 'bind'; both equally possible phonetically, but the former preferable on the semantic side. The presumably earlier, and certainly well attested, sense was 'scruple, doubt, hesitation', which may well come from a 'repeated (*re-*) mental collecting, selecting, consideration'. Hence 'awe of the supernatural' and eventually 'religion' in the current sense. Warde Fowler, Trans. Third International Congress for the History of Religions 2.169 ff. W. Otto, Archiv für Religionswissenschaft 12.533 ff., 14.406 ff. Ernout-M. 858 f. Walde-H. 1.352 f.

3. Ir. *cretem*, NIr. *creideamh*, Br. *kredenn*, all properly 'belief, faith', fr. Ir. *cretim*, Br. *kredi* 'believe' (17.15).

Ir. *iress*, NIr. *iris*, properly 'belief, faith', fr. cpd. of preverb *air-* (: Grk. *περί*) and **stā-* 'stand'. Cf. Pahl. *parast* 'worshiper', of like origin. Pedersen 1.91. Pokorny, Z. celt. Ph. 9.444 ff. Thurneysen, KZ 48.72 f. Vendryes, MSL 20.266 f.

Ir. *crābud*, NIr. *crābhadh*, W. *crefydd*, *creddyf*, prob. : Skt. *vi-çrambhate* 'trusts'. Pedersen 1.492. Vendryes, MSL 20.266.

4. ON *trūa* 'belief, faith', also in religious sense, fr. *trūa* 'believe' (17.15).

OE *gelēafa*, OHG *gilouba*, MHG *g(e)loube* 'belief, faith' also in religious sense, fr. the corresponding vbs. for 'believe' (17.15).

ME *feith*, NE *faith* 'belief, faith', also 'religion' (NED s.v. 4), fr. OFr. *feid*, Lat. *fidēs* 'faith'.

Du. *godsdienst*, lit. 'service of god' = NHG *gottesdienst* 'divine service', but now the usual term for religion.

5. Lith. *tikyba, tikėjimas*, Lett. *ticība* 'belief, faith, religion', fr. Lith. *tikėti*, Lett. *ticēt* 'believe' (17.15). Mühl.-Endz. 4.180 f.

6. ChSl. *věra* ('faith' and in Supr. sometimes for *εὐσέβεια* and *θρησκεία*), SCr. *vjera*, Boh. *víra*, Russ. *vera*, all orig. 'belief, faith' (cf. 17.15).

Boh. *náboženství*, fr. adjs. *nábožensky*, *nábožny* 'religious, pious', orig. 'following after god', cpds. of *na* 'after' and derivs. of *bůh* (ChSl. *bogŭ*) 'god'.

7. There is no distinctive Skt. word for 'religion'. It is best covered by *dharma-* (Ved. *dharman-*) 'what is established, law, usage, right conduct' (for such was religion in India), deriv. of *dhṛ-* 'hold, support'. Walde-P. 1.856 ff.

Skt. *mārga-* 'way' (10.71) is used for the 'right way of life', the 'Buddhist way', etc.

Av. *daēnā-* (distinctive and frequent; NPers. *dīn*), prob., as orig. 'insight', fr. *dī-* 'see, look at, observe' (15.52). Walde-P. 1.832. Geldner, BB 15.261. Hübschmann, KZ 27.101. (Barth. 666 doubtful.)

For 'god' there is a group of cognates common to Italic, Celtic, Baltic, and Indo-Iranian (traces in Gmc., but not the usual word for 'god'), related to words for 'sky', 'day' and the widespread 'Sky-god', all from the notion of 'bright, shining'. A smaller group, common to Slavic and Iranian, is based on the notion of 'one who dispenses, gracious'. The other words are of disputed etymology.

The old words for a pagan 'god' were generally retained for the Christian 'God'. But a few forms are used only in the former sense.

For the biblical 'Lord', see 19.41.

1. IE **deiwo-s* in words for 'god', beside **dyew- *diw-* in words for 'sky' (1.51), 'day' (14.31), and the personified Grk. *Ζεύς*, gen. *Διός*, Lat. *Iuppiter* (earlier *Iūpiter*, fr. voc. = Grk. *Ζεῦ πάτερ*), gen. *Iovis*, early *Diovis*, Skt. *dyāus*, all with the common notion of 'bright, shining' and representing an extension of a simpler **dei-* seen in Skt. *dīdeti* 'shines', etc. Walde-P. 1.772 ff. Ernout-M. 263 f. Walde-H. 1.345 f. Grace Sturtevant Hopkins, IE **deiwos* and related words (exhaustive semantic study of the group, but with needless doubt of the underlying notion of 'bright').

OLat. *deiuos*, Lat. *deus* (> It. *dio*, Fr. *dieu*, Sp. *dios*; Rum. *zău* interj., *zeu* 'pagan god'; but for Christian God *dumnezeu*, fr. Lat. voc. *domine deus* 'Lord God'), Osc. fem. dat. sg. *deívaí*; Ir. *dia*, W. *duw*, Br. *doue*; ON *tīvar* (pl.; cf. 2. ChSl. *bogŭ*, etc., general Slavic (perh. early loanword fr. Iran. through the Scythians; cf. the Slavic word for 'dog', 3.61), Av. *baγa-*, OPers. *baga-* : Skt. *bhaga-* 'dispenser, gracious lord', *bhaj-* 'divide, distribute, share', Grk. aor. *φαγεῖν* ('partake of' >) 'eat'. Walde-P. 2.127 f. Berneker 66 f. Barth. 922.

3. Grk. *θεός*, fr. **θεσός* (cf. *θέσφατος* 'spoken by god, ordained'), but root connection much disputed and still dub. Perh. best (but difficulties) : Lat. (*diēs*) *fēstus* 'holiday', *fēriae* 'holidays', Osc. *fíísnam*, Lat. *fānum* (**fas-no-*) 'shrine', fr. **dhēs-*, **dhəs-*, prob. an extension of **dhē-* 'put' in its frequently attested religious application. Walde-P. 1.867. Boisacq 339 f. Prellwitz, Festschrift Bezzenberger 121 ff. Walde-H. 1.454. Mrs. Hopkins, op. cit. 81 ff., rejects all the proposed IE etymologies and suggests that, like some of the names of the Greek gods, so *θεός* itself is a loanword from pre-Greek sources.

4. Goth. *guþ* (pl. *guda*), ON *goð, guð*, OE *god*, etc., general Gmc., orig. neut. and fr. **ghu-to-m*, neut. of pple. of **ĝheu-*

in Skt. *havate*, Av. *zavaiti*, ChSl. *zovetŭ* 'calls' (18.41), hence orig. 'what is invoked'; or, less probably, fr. **ĝheu-* in Skt. *hu-* 'pour an oblation, make an offering', Grk. *χέω* 'pour', etc. Walde-P. 1.530. Falk-Torp 359. Feist 228.

ON *āss* (runic inscr. *ansuR*), OE *ōs* (OHG *ans-* in proper names; Goth. Latinized acc. pl. *ansis*), used only of the old pagan gods, etym. dub.; taken by some as orig. 'spirit' fr. **ans-* an extension of **an-* 'breathe' (4.51); now more commonly as the same word as ON *āss* 'pole, beam' (Goth. *ans* 'mote'), with reference to the primitive worship of poles. Falk-Torp 9, 1429. Feist 52.

5. Skt. *sura-*, abstracted fr. *asura-* (as if *a-sura-*) after this had come to mean 'evil spirit' vs. earlier sense 'spiritual, beneficent spirit' (in RV freq. epithet of the gods, esp. Varuṇa; = Av. *ahura-* mostly in *Ahurō Mazdå*), prob. *asu-ra-*, fr. *asu-* 'breath of life, life'. Uhlenbeck 18, 338.

'Temples' were unknown in the earliest times among most of the peoples of IE speech, who were still in the stage of more primitive worship, associated with hilltops, sacred stones, trees, or wooden pillars.

Many of the words for 'temple' are from 'dwelling, house' (with 'god' expressed or understood) or 'holy place', derived from adjs. for 'holy'. But the Latin *templum*, which furnished the most widespread Eur. word, was orig. a technical augural term.

1. Grk. *νᾱός* (Ion. *νηός*, Att. *νεώς*, but the *νᾱός* of most dialects common in the *κοινή* and reg. NG), Aeol. *ναῦος*, Lac. *νᾱϝός*, fr. **νασϝός* : *ναίω* 'dwell' (**νασιω*, cf. aor. *ἔνασσα*), hence orig. 'dwelling' (of the gods). Walde-P. 2.335. Boisacq 656. Otherwise, but improbably, Schrader, Reallex. 2.518 f.

Grk. *ἱερόν* 'holy place, shrine', and frequently 'temple', neut. of *ἱερός* 'holy' (22.19).

2. Lat. *templum* (hence the Romance, Celtic, and most of the Gmc. words), orig. 'the space in the heavens marked out by the augur', then 'consecrated place, sanctuary' and 'temple', fr. **tem-* in Grk. *τέμνω* 'cut' (9.22), *τέμενος* 'sacred precinct' (for Lat. *p*, cf. *exemplum*, fr. **exemlom* : *eximere*); or fr. *temp-* in Lith. *tempti* 'stretch' (9.32), Lat. *tempus* 'time'. Walde-P. 1.722. Ernout-M. 1023 f.

Lat. *aedēs* : Grk. *αἴθω* 'light up, kindle', mid. 'burn, blaze', Lat. *aestus* 'heat', etc. (1.85), hence orig. the 'sacred fire' and peculiarly applicable to the *aedēs Vestae*. Ernout-M. 15 f. Walde-H. 1.15.

3. Goth. *alhs*, OE *alh, ealh* (rare), OS *alah* (OHG *Alah-* in proper names), prob. : Lith. *alkas* 'sacred grove', and

further as orig. 'place of refuge' (cf. OE *ealh-stede* in this sense) : OE *ealgian* 'defend', Grk. *ἀλέξω*, aor. *ἄλαλκα* 'ward off'. Walde-P. 1.89 f. Feist 36 f.

Goth. *gudhūs* (once for *ἱερόν*) 'house of god'.

ON *hof* = OHG *hof* 'courtyard' (7.15).

ON *vē* 'shrine, temple' (also 'house, home') : Goth. *weihs*, OHG *wīh* 'holy' (22.19), OE *wēoh, wīh* 'idol' (22.37). Walde-P. 1.232. Falk-Torp 1376.

OE *hearh* 'shrine, temple' (mostly heathen) and 'idol' = OHG *haruc* 'sacred grove', ON *hǫrgr* 'pile of stones' as heathen shrine, outside connections dub. Walde-P. 1.31. Falk-Torp 418 f.

4. Lith. *dievnamis*, Lett. *dievnams* (or *dieva nams*), lit. 'house of god', cpd. of words for 'god' and 'house' (7.12).

5. ChSl. *crŭky* 'church' (22.21), also used for *νᾱός* and *ἱερόν* (so reg. in Gospels).

ChSl. *chramŭ* 'house' (7.12), only late 'temple', but in latter sense (also sometimes for 'church') SCr. *hram*, Boh. *chrám*, Russ. *chram* (fr. ChSl.). Berneker 397.

Pol. *świątynia*, fr. *święty* 'holy' (22.19). Brückner 537.

Pol. *kościół* 'church' (22.21) is used for 'temple' in the Bible.

6. There were no temples in Vedic times. Later names are the following.

Skt. *cāitya-* 'funeral monument', 'sacred tree', and 'shrine, temple', deriv. of *citā-* 'funeral pile', fem. of *cita-*, pple. of *ci-* 'arrange, pile up'.

Skt. *stūpa-*, in RV 'tuft of hair on top of head, top of head', later used for the dome-like structure over relics of Buddha, hence virtually Buddhist 'shrine, temple', etym.?

Skt. *devagṛha-* and *devālaya-*, cpds. of *deva-* 'god' with *gṛha-* 'house' and *ālaya-* 'dwelling' (*laya-* 'rest, dwelling', fr. *lī-* 'cling to').

There is no reference to temples in the Avesta, and, according to Herodotus, the Persians had no temples. OPers. *āyadana-* is 'place of worship', the nature of which is unknown, fr. *yad-* 'worship' (22.16). Barth. 332.

Most of the Eur. words for 'altar' are derived from one of the two Lat. words, both of which seem to have first denoted an altar for burnt-offerings. In Greek a 'step' became 'platform' and 'altar'.

There are a few other words, meaning literally 'place of sacrifice' or 'holy table'.

1. Grk. *βωμός* (in Hom. also 'raised platform' and 'base of a statue'), orig. a 'step', like *βῆμα*, Dor. *βᾶμα* 'step, platform', fr. the root of *ἔβην*, Dor. *ἔβᾱν*,

aor. of *βαίνω* 'step, walk' (IE **gʷā-* beside **gʷem-*, 10.47). Walde-P. 1.677. Boisacq 138.

Grk. *θυσιαστήριον* (usual word in LXX and NT), fr. *θυσιάζω* 'sacrifice', fr. sb. *θυσία* 'sacrifice' (22.15).

2. Lat. *āra*, OLat. *āsa* (Osc. loc. sg. *aasai*, Umbr. *asam-e* 'ad aram', etc.), fr. a root **ās-* 'burn, glow' (?) seen in Lat. *ārēre* 'be dry', *āridus* 'dry', *ardēre* 'burn, blaze', Skt. *āsa-* 'ashes, dust', Goth. *azgō*, OE *asce*, etc. 'ashes'. Ernout-M. 65, 70. Walde-H. 1.61, 65, 848.

Lat. *altāria*, pl. (later sg. *altāre* > Romance, Celtic, Gmc., and Balto-Slavic forms), sometimes 'burnt-offerings', but mostly 'high altar' (more splendid than *āra*), prob. : *adolēre* 'burn', but in popular feeling fr. *altus* 'high'. Walde-P. 1.88. Ernout-M. 38. Walde-H. 1.32, 845.

3. Goth. *hunslastaþs* (reg. for *θυσιαστήριον*), cpd. of *hunsl* 'sacrifice' (22.15) and *staþs* 'place'.

ON (beside *altari* for Christian altar) *stallr* 'block, pedestal of heathen statues' and so a sort of heathen 'altar' = OE *steall*, OHG *stal* 'standing place, stall', etc. Walde-P. 2.644. Falk-Torp 1147.

Cf. also ON *hǫrgr* 'pile of stones', a sort of 'stone altar' = OE *hearh* 'shrine, temple' (22.13).

OE (*altar* rare) *wēobud* (*-bud, -bod, -bed, wīgbed*, etc.), ME *weved*, cpd. of *wēoh-, wīh-* 'holy' (as sb. 'idol') : Goth. *weihs* 'holy', etc. (22.19) and *bēod* 'table' (7.44). NED s.v. *weved*.

4. Lith. *aukuras* (neolog. for 'heathen altar'), formed after *ugniakuras* 'fire-place' fr. *auka* 'offering, sacrifice' (22.15). Fraenkel, Z. sl. Ph. 6.89.

5. SCr. *žrtvenik*, Russ. *žertvennik*, used for a pagan 'altar' in distinction from the altar of the church (which in the Orthodox Church is really the whole chancel), fr. *žrtva, žertva* 'offering, sacrifice' (22.15).

Nouns for 'sacrifice', derived from the corresponding verbs (or in some cases conversely), are cognate with verbs for 'bring to' (hence 'offer'), 'worship', 'praise', or 'dedicate', with words for 'holy', and in some cases, as in origin 'burnt-offerings', with words for 'smoke, seethe, boil'.

Besides the most generic words, a few are noted which refer only to an 'animal sacrifice, victim'.

1. Grk. *θυσία* (also *θῦμα* less common) : *θύω* 'make a sacrifice' (in Hom. mostly a burnt-offering), this ultimately fr. the same root as *θύω* 'rage, seethe', *θῡμός* 'spirit, courage, anger', Lat. *fūmus*, Skt.

dhūma-, etc. 'smoke', all with basic notion of 'agitation'. Grk. θυσία orig. 'burnt-offering', though by no means so restricted in actual use. Walde-P. 1.837. Boisacq 360.

Grk. ἱερεῖον 'animal sacrifice', fr. ἱερός 'holy' (22.19).

2. Lat. *sacrificium* (> Romance words, etc.), with vb. *sacrificāre* 'make a sacrifice', cpd. of *sacer* 'holy, sacred' (22.19) and *facere* 'make'.

Lat. *victima* 'animal sacrifice', prob. : Umbr. *eveietu* 'voveto', Goth. *weihs* 'holy', etc. (22.19). Walde-P. 1.232. Ernout-M. 1102 f.

Lat. *hostia* 'animal sacrifice', etym. dub. Ernout-M. 462. Walde-H. 1.661 f.

Rum. *jertfă* (old word, before introduction of *sacrificiŭ*), fr. Slavic, SCr. *žrtva*, etc. (below, 6). Tiktin 870.

3. Ir. *idbart* (*edbart*), NIr. *iodhbairt*, vbl. n. of *adopuir* (3sg.) 'makes a sacrifice', cpd. of *berim* 'bear, carry'. Here also W. *aberth* and Br. *aberz* (Vallée s.v. *sacrifice;* not in Ernault; only *sakrifiz* in Le Gonidec, Ostervald NT, etc.). Pedersen 2.468, 472.

Verbs for 'worship' are most commonly connected with verbs for 'pray', or based on some gesture of homage ('kiss' or 'bow'), or are verbs for 'honor', which when used with 'god' or the like are intensified to 'worship'. Other scattered sources are 'shrink from, feel awe of', 'love', 'cultivate', 'heed', 'humble oneself'. On the history of Grk. προσκυνέω and Lat. *adōrāre*, cf. B. M. Marti, Language 12.272 ff.

1. Grk. σέβομαι 'feel awe of', sometimes 'fear', commonly 'revere, worship', as orig. 'shrink from' : Skt. *tyaj-* 'leave, abandon, shun'. Walde-P. 1.746. Boisacq 857.

Grk. προσκυνέω, cpd. of κυνέω 'kiss' (16.28) and orig. denoting a gesture of homage, NG προσκυνῶ 'worship' and 'salute' (σέβομαι mostly 'revere, respect').

2. Lat. *venerārī*, deriv. of *venus* 'love, charm' (16.26). Walde-P. 1.259. Ernout-M. 1083.

Lat. *adōrāre* (stronger than *venerārī;* hence the Romance words, but Rum. *adora* neolog. fr. Fr.), orig. 'speak to', then 'pray to' and 'worship', cpd. of *ōrāre* 'plead', esp. 'pray' (22.17). Ernout-M. 714.

Lat. *colere* 'inhabit, frequent, cultivate' (cf. *incolere* 7.11), frequently with forms of *deus*, etc. 'honor, worship'. Ernout-M. 205.

Rum. *slavi* 'glorify' (fr. Slavic, ChSl. *slaviti* beside *slava* 'glory', 16.37), formerly also 'worship'. Tiktin 1438 ff.

3. Ir. *adraim*, NIr. *adhraim*, W. *addoli*, Br. *azeuli*, fr. Lat. *adōrāre* (above, 2). Pedersen 1.206, 207, 2.450. Vendryes, De hib. voc. 110. Loth, Mots lat. 130.

4. Goth. *inweitan* (reg. for προσκυνέω, once for ἀσπάζομαι 'salute'), cpd. of **weitan* = OE *wītan* 'see to, heed, guard, blame', OHG *wīzzan* 'notice, heed', fr. the same root as Goth., OE *witan* 'know'. Walde-P. 1.238. Feist 167.

Goth. *blōtan* (= σέβομαι Mk. 7.7, λατρεύω 'serve' Lk. 2.37; as sb. *guþ blōtan* θεοσέβεια; *guþblōstreis* θεοσεβής), ON *blōta* 'worship' and 'sacrifice' = OE *blōtan*, OHG *bluozan* 'sacrifice', outside connection dub., perh. : Lat. *flāmen* 'priest' (22.18). OE *gebiddan*, OHG *betōn*, MHG, NHG *anbeten*, Du. *aanbidden*, Dan. *tilbede*, Sw. *tillbedja*, all words for 'pray' (22.17) used also, alone or in cpds., for 'worship'.

OE *ge-ēaþmēdan* 'humble' and 'worship' (latter freq. in Gospels), fr. *ēaþmēd* 'humility', *ēaþmōd* 'humble' (= OHG *ōdmuoti* 'humble'), cpd. of *ēaþe* 'easy' (9.96) and *mōd* 'mood, feeling' (= Goth. *mōþs* 'anger' 16.42).

OE *weorþian* 'value, honor' and 'worship' (*worþian* reg. for 'worship' in Lindisf. Gospels), fr. *weorþ* 'value, worth' (11.87).

ME *worschip* (etc., numerous spellings), NE *worship*, fr. sb. of like form, this fr. OE *weorþscipe* 'esteem, honor, high rank', cpd. of *weorþ* 'value, worth'. NED s.v. *worship.*

NHG *verehren*, intensive cpd. of *ehren* 'honor' (OHG *ērōn*, MHG *ēren*, fr. sb. OHG *ēra* 'honor', 16.46), hence 'greatly honor' and with 'god' or the like virtually 'worship'. Similarly Du. *vereeren.*

5. Lith. *garbinti* 'honor' and 'worship' : *garbė* 'honor' (16.46).

Lith. *melsti* 'pray' (22.17), also usual for 'worship' in NT versions.

Lith. *pasikluonoti* (often 'worship' in Trowitsch NT; now only in literal sense 'bow to' or 'salute'), cpd. of *kluonotis* 'bow', fr. Pol. *kłaniać się* id. Brückner, Sl. Fremdwörter 94.

Lett. *pielūgt*, cpd. of *lūgt* 'pray' (22.17). Mühl.-Endz. 269.

6. ChSl. *klaněti sę*, *pokloniti sę* (reg. in Gospels for προσκυνέω), Boh. *klaněti se*, Russ. *poklonjat'sja*, all lit. 'bow (to)' : ChSl. *kloniti* 'bow', etym. dub. Berneker 509, 522 f.

ChSl. *čisti* (reg. for τιμάω, but also σέβομαι), SCr. (*po*)*štovati*, Boh. *ctíti*, Pol. *czcić*, all also and orig. 'honor' : ChSl. *čĭstĭ*, etc. sb. 'honor' (16.46).

Pol. *wielbić*, orig. 'make much of, magnify', hence 'glorify, worship', fr. *wiele* 'much' (13.15).

7. Skt. *yaj-*, Av. *yaz-*, OPers. *yad-* (cf. e.g. Daiva inscr. 39 f. *yadāyā paruvam daivā ayadiy avadā adam auramazdām ayadaiy* 'where formerly the daivas were worshiped, there I worshiped Auramazda') : Grk. ἅγιος 'holy', ἅζομαι 'stand in awe of'. Walde-P. 1.195. Barth. 1274 ff.

Many of the words for 'pray' are the same as, or cognate with, those for 'ask, request', discussed in 18.35. Some are cognate with verbs for 'seek' or 'long for'. Some seem to rest on the notion of 'speak' in a formal manner. One considerable group comes (through 'propitiate') from 'soften'.

Words for 'call upon, invoke', mostly like those for 'call' (18.41), are often virtually 'pray to'.

1. Grk. εὔχομαι (sbs. εὐχή, εὐχωλή) and cpds. ἐπ-, κατ-, προσ-(προσ- reg. in NT and NG) : Av. *aoj-* in *aoxta*, *aogədā* (Gathas) 'spoke, said', Skt. *ohate* 'notices, listens for', and (**wegʷh-* beside **eugʷh-*) Skt. *vāghat-* 'one who makes offerings', Lat. *vovēre* 'vow', Umbr. *vufetes* 'votis'. Walde-P. 1.110. Ernout-M. 1135.

Grk. ἀράομαι, fr. ἀρά 'prayer' (*ἀρϝά shown by Arc. κάταρϝος 'accursed'), prob. : Lat. *ōrāre* 'pray, plead' (see below, 2).

2. Lat. *precārī* (late *precāre* > It. *pregare*, OFr. *preier*, Fr. *prier*, OSp. *pregar*), with sb. *prex*, *precis*, mostly pl. *precēs*, fr. the same root as Lat. *poscere*, ChSl. *prositi* 'ask for', Goth. *fraihnan*, Skt. *pracch-*, *praç-* 'ask', etc., (18.31, 18.35). Walde-P. 2.49. Ernout-M. 795. REW 6733.

Lat. *ōrāre* 'plead' (Osc. *urust* 'oraverit' likewise a legal term), but mostly 'pray' (> It. *orare*, OFr. *orer*, Sp., Port. *orar*, of which only the last is the usual word for 'pray'; Rum. *ura* 'bless'), prob. (not fr. *ōs* 'mouth', in which case Osc. *urust* would be a loanword, not in itself difficult), with a common notion of 'speak formally' : Grk. ἀράομαι 'pray', ἀρύω 'say, shout' (only Hesych.), Russ. *orat'* 'cry out, bawl', Skt. *āryanti* 'they praise' (dub., cf. Oldenberg, Rigveda, Textkrit. und exeget. Noten p. 97), Arm. *uranam* 'deny'. Walde-P. 1.182. Ernout-M. 714.

Rum. *ruga* 'ask for', but mostly 'pray', with sb. *rugă* 'prayer', fr. Lat. *rogāre* 'ask' (18.31, 18.35).

3. Ir. *guidim* 'ask for', mostly 'pray', NIr. *guidhim*, W. *gweddio*, with sbs. Ir. *guide*, NIr. *guidhe*, W. *gweddi* 'prayer' : Grk. ποθέω 'long for, regret', θέσσασθαι, Av., OPers. *jad-* 'pray for, beseech', Lith. *gedauti* 'long for', *gedėti* 'mourn', etc. Walde-P. 1.673. Pedersen 1.108, 2.550 f.

Br. *pedi* (or *pidi*), fr. Lat. *petere* 'seek'. Loth, Mots lat. 194.

4. Goth. *bidjan*, ON *biðja*, Dan. *bede*, Sw. *bedja*, OE *biddan*, ME *bidde*, Du. *bidden*, the same words as those for 'ask, request' (18.35). But differentiated OHG *betōn*, MHG, NHG *beten* 'pray', fr. sb. OHG *beta* = Goth. *bida* 'prayer'. Weigand-H. 1.221 f.

ME *preye*, NE *pray*, fr. OFr. *preier* (above, 2).

5. Of the words for 'priest', some are those used for the pagan priest, a few of which were retained in the Christian Church. More are terms arising in the Christian Church, which are used also when referring to a pagan priest.

Some are derived from words for 'holy', 'god', 'sacrifice', or 'invoke'. The most widespread Eur. group goes back to a Greek word for 'elder'; some others, likewise orig. terms of respect, to a child's word for 'father', or to a word denoting 'one of noble birth' which developed to 'king' or 'prince' and also, through 'master, lord', to 'priest'.

1. Grk. ἱερεύς, fr. ἱερός 'holy' (22.19). Also ἱεροθύτης, cpd. with deriv. of θύω 'sacrifice'.

NG παπᾶς, fr. Byz. παπᾶς title of a bishop (as eccl. Lat. *pāpa*), fr. Grk. πάππας (Hom.), later πάπας child's word for 'father'.

2. Lat. *sacerdōs*, *-ōtis* (> It., Sp. *sacerdote*), fr. **sakro-dō-t-*, cpd. of *sacer* 'holy' (22.19) and a form of the root **dhē-* in Lat. *facere* 'do, make', etc. Ernout-M. 883. Walde-H. 1.442.

OFr. *prestre*, Fr. *prêtre* (Sp. *preste* now only in a specialized application), fr. eccl. Lat. *presbyter*, eccl. Grk. πρεσβύτερος 'elder' of the church, orig. comp. of πρέσβυς 'old man'; It. *prete*, Rum. *preot*, fr. a late Lat. by-form *praebyter* (as if : *praebēre* 'grant'). REW 6740.

Rum. *popă*, fr. Grk. through Slavic (cf. below, 6).

3. Ir. *drui* (gen. *druad*) 'druid', name of the old pagan priest, cpd. of **dru-* seen in words for 'tree, firm, true', etc. and **wid-* 'know'. Walde-P. 2.805. Pedersen 1.61, 175. Thurneysen, Z. celt. Ph. 16.276 f.

Ir. *sacart*, NIr. *sagart*, fr. Lat. *sacerdōs.* Vendryes, De. hib. voc. 172.

Ir. *cruimther*, OW *premter*, fr. late Lat. *praebyter* (above, 2). Pedersen 1.198, 235, 287. Vendryes, De hib. voc. 132.

W. *offeiriad*, fr. MW *offeren* 'mass', fr. MLat. *offerenda* 'offerings, oblation'. Loth, Mots lat. 191.

Br. *beleg*, MBr. *baelec*, fr. **baclācos* 'one carrying the pastoral staff', fr. Lat. *baculum*, *baculus* (> W. *bagl*) 'staff'. Henry 30. Loth, Mots lat. 136. Ernault, Dict. étym. s.v. *baelec.*

4. Goth. *gudja*, ON *goði* (the old pagan priest vs. the Christian *prestr*), fr. Goth. *guþ*, ON *goð* 'god', but perh. through an underlying root notion of 'invoke' (cf. 22.12) and so orig. 'invoker'. Feist 224.

OE *sacerd*, fr. Lat. *sacerdōs* (above, 2).

OE *prēost* (> ON *prestr*), ME *preste*, NE *priest*, Dan. *præst*, Sw. *präst*, OHG *priestar* (rare), MHG, NHG, MLG, Du. *priester*, all (partly through OFr. *prestre*) fr. Lat. *presbyter* (above, 2). Falk-Torp 848. NED s.v. *priest.*

OHG, MHG *ēwart*, lit. 'guardian of the law', cpd. of *ēwa* 'law' (21.12) and *wart* 'guardian'. Weigand-H. 2.472.

5. Lith. *kunigas* (used for either Catholic priest or Lutheran pastor) = Lett. *kungs* 'master, lord', ChSl. *kŭnęzĭ* 'prince', etc. (19.35), fr. a Gmc. **kuningas* = OHG *kuning*, etc. ('king', orig. 'one of noble birth' (19.32). Specialization of 'noble, master, lord' to 'priest', as in Boh. *kněz*, Pol. *ksiądz* (below, 6). Cf. also NE *Domine*, *Dominie* (fr. Lat. voc. *domine* 'lord') applied to the clergy, and NE *parson*, orig. 'person' of note. Berneker 663. Stender-Petersen 199 ff.

Lett. *priesteris*, fr. MLG *priester* (above, 4).

6. ChSl. *ierejĭ* (so reg. in Gospels), fr. Grk. ἱερεύς. For the following native words, cf. Jagić, Entstehungsgesch. 309.

ChSl. *čistitel'ĭ* (Supr.), fr. *čisti* 'honor, revere, worship' (22.16).

ChSl. *žĭrĭcĭ* (Supr. freq.), fr. *žrŭti* 'sacrifice' (22.15).

ChSl. *svęštenikŭ* (late), SCr. *svećenik*, Russ. *svjaščennik*, fr. ChSl. *svętŭ*, etc. 'holy' (22.19).

ChSl. *popŭ* (reg. in Euchol.), *pop* in all modern Slavic languages popular term, sometimes disrespectful, fr. Grk. πάπας (cf. Byz. παπᾶς, above, 1). Miklosich 258. Brückner 430. Stender-Petersen 428 f.

Boh. *kněz*, Pol. *ksiądz*, earlier 'prince' (19.35), Brückner 277.

7. Skt. *ṛtvij-* (most generic word), cpd. of *ṛtu-* 'right time' and weak form of *yaj-* 'worship' (22.16).

Skt. *hotar-*, Av. *zaotar-*, fr. the root seen in Skt. *hu-* 'pour an oblation, make an offering', Grk. χέω 'pour', etc., and that in Skt. *havate*, Av. *zavaiti*, ChSl. *zovetŭ* 'calls upon, invokes', both notions blended in the priest who worships with hymns and sacrifice. Barth. 1653. Oldenberg, Religion des Veda 386. Macdonell-Keith 1.112 ff.

Av. *āθravan-*, *aθaurun-* (main word) = Skt. *atharvan-* 'fire- and soma-priest', fr. the word attested in Av. *ātar-* (nom. *ātarš*, gen. *āθrō*) 'fire', despite the difficulty of the Skt. *th* (Av. *θ* easily fr. forms like *āθrō*). Walde-P. 1.42. Barth. 66. Uhlenbeck 6.

22.182. 'Clergyman, minister, parson', etc. The Eur. words listed in 22.18 are used for the 'priest' in the Roman Catholic and Greek Orthodox Churches. NE *priest* is also used in the Anglican Church (cf. NED s.v. 2b), Dan. *præst*, Sw. *präst* are generic 'clergyman', and Lith. *kunigas* is the usual term for the Lutheran 'parson' as well as the Catholic 'priest'.

But for the most part other terms are preferred in the Protestant Church, of which the following may be noted.

NE *clergyman*, deriv. of *clergy*, fr. OFr. *clergie* in use = *clergié* (Fr. *clergé*), fr. eccl. Lat. *clēricātus*, fr. *clēricus* 'cleric', fr. Grk. κληρικός, fr. κλῆρος 'lot, inheritance', in eccl. Grk. 'clerical office' and coll. 'clergy'. NED s.vv. *clergy* and *cleric.*

NHG *geistlicher*, Du. *geestelijke*, Dan. *gejstlig*, fr. NHG *geist*, etc. 'spirit' (16.11).

NE *minister*, orig. 'servant' (fr. Lat. *minister* id.), hence in specialized use *minister* of the church, etc. (now prob. the most usual term except in the Anglican Church, where also formerly common). NED s.v.

NE *parson* (now mostly in rural communities or even there old-fashioned, where *parsonage* may be still in common use), same word as *person* (fr. Lat. *persōna* 'mask, person'), from which it became differentiated in both sense and form (normal phonetic development as

in *heart*, old *sarvant*, etc. vs. spelling-pronunciation in *person*). NED s.v.

NHG *pfarrer*, fr. *pfarre*, OHG *pfarra* 'parish', this : OHG *pfarrik*, OE *pearroc* 'inclosure', but taken as the equivalent of late eccl. Lat. *parochia* (source of NE *parrish*, etc.), earlier *paroecia*, fr. Grk. παροικία 'diocese, parish' in eccl. use, earlier 'sojourning', fr. πάροικος 'dwelling near, neighboring'. Weigand-H. 2.404. Kluge-G. 439. NED s.v. *parrock.*

NE, NHG, Dan., Sw. *pastor*, Du. *pastoor*, orig. 'shepherd' (fr. Lat. *pāstor* id.). Similarly Du. *herder* 'shepherd' and 'pastor'.

NE *preacher*, NHG *prediger*, Du. *predikant*, fr. the vbs. for 'preach' (22.22).

Lett. *mācītājs* = Lith. *mokytojis* 'teacher' (17.27). Mühl.-Endz. 2.576.

22.183. 'Monk'. Grk. μοναχός 'alone, solitary' (: μόνος 'alone', 13.33) was used in early Christian times as a sb. for the solitary 'hermit' and then for 'monk' as now understood. Hence, mostly through Lat. *monachus* (or in part VLat. **monicus*), nearly all the Eur. words. NED s.v. *monk.* REW 5654. Kluge-G. 397. Berneker 2.75.

But Grk. γέρων 'old man' was a popular term, e.g. in Jo. Moschus regularly, rarely μοναχός. Hence also καλόγηρος (cpd. with καλός 'good'), now the pop. NG καλόγερος with fem. καλόγρηα 'nun', whence also Rum. *călugăr* with fem. *călugăriţa*, and SCr. *kaluđer* with fem. *kaluđerica.*

Lith. *vienuolis* (with fem. *vienuolė*), deriv. of *vienas* 'one', is a neolog. in place of *minykas* (latter in Kurschat, Lalis; not in NSB).

In Brahmanic India there were hermits, ascetics, sages, etc., but communities of monks and nuns are characteristic of Buddhism. The Pali name for 'monk' was *bhikku* = Skt. *bhikṣu-* 'beggar, religious mendicant', whence fem. *bhikkunī* 'nun'.

22.184. 'Nun'. There is much more variety in words for 'nun' than in those for 'monk'.

1. Several are feminine forms corresponding to the words for 'monk', as Grk. μονάστρια, μοναχή, Lat. *monacha*, It. *monaca*, Sp. *monja*, ChSl. *monachija*, etc.; NG καλόγρηα, Rum. *călugăriţa*, SCr. *kaluđerica;* Lith. *vienuolė.*

2. The principal other group is late Lat. *nonna* (*nonnus* 'monk' also occurs), whence Fr. *nonne* and the general Gmc. words. Used also for 'nurse', this was originally an infantile term of endearment like Grk. νέννος, νάννας 'uncle', νάννα 'aunt', It. *nonno*, *nonna* 'grandfather, grandmother', etc. Ernout-M. 676. NED s.v. *nun.*

3. It. *religiosa*, Fr. *religieuse*, fem. sb. of adj. for 'religious'.

4. NIr. *bean riaghalta*, lit. 'regulated woman', *bean* 'woman' and *riaghalta* : *riaghal* 'rule'. Cf. Ir. *manaig riagalta* 'monk' (Laws, Gloss. 613).

5. W. *llean*, Br. *leanez*, Corn. *laines*, derivs. of words for 'oath, vow', W. *llw*, Br. *le* (21.25).

6. SCr. *duvna*, fr. earlier *dumna*, fr. Lat. *domina* 'mistress'. Rječnik Akad. 2.886, 907.

7. Boh. *jeptiška*, fr. late Lat. *abbatissa* 'abbess'. Gebauer 1.97.

Words for 'holy, sacred' are from diverse sources, and in the majority of them the ultimate root connection is doubtful.

1. Grk. ἱερός (dial. ἰαρός, ἰαρός, ἶρος), etym. much disputed; perh. fr. a pre-Greek form going with Etrusc. *aesar* 'god', Osc. *aisusis* 'sacrificiis', Umbr. *esono-* 'sacer', etc.; or (with rejection of the view that words of different origin are merged in ἱερός) : Skt. *iṣira-* 'vigorous, lively' with development in Greek through 'powerful, supernatural'. Boisacq 368. Schulze, Quaest. Epic. 210 ff. Kretschmer, Glotta 11.278 ff. Walde-H. 1.718. Duchesne-Guillemin, Mélanges Boisacq 1.333 ff.

Grk. ἅγιος, beside ἁγνός (only latter in Hom.) and vb. ἅζομαι 'stand in awe of' : Skt. *yaj-*, Av. *yaz-* 'worship' (22.16). Walde-P. 1.195. Boisacq 7.

Grk. ὅσιος (differentiated in use from the preceding, 'sanctioned by divine law' and even contrasted in phrases like ἱερὰ καὶ ὅσια 'things sacred and profane'), etym. dub., perh. : ἐτεός 'true', ἐτάζω 'examine', etc. Walde-P. 1.161. Boisacq 721.

In Christian terminology ἅγιος became the main word (like Lat. *sănctus* vs. *sacer*), hence also in names of Saints. NG ἱερός and ὅσιος are lit., current in certain phrases.

2. Lat. *sacer* (> It., Sp. *sacro*, Rum. *sacru*, learned forms), Osc. σακορο 'sacra', *sakrím* 'hostiam', Umbr. *sacra* 'sacras', *sacris* 'hostiis', etc. (Italic stems *sakro-* and *sakri-*, with numerous derivs.); hence vb. *sacrāre*, pple. *sacrātus* (> Fr. *sacré*), and fr. the same root *sancīre*, pple. *sānctus* (> It., Sp. *santo*, Fr. *saint;* Rum. *sînt* in names of holidays, Tiktin 1432), Osc. *saahtúm* 'sanctum', Umbr. *sahatam* 'sanctam', a distinctive Italic group, without any clear outside connections. Walde-P. 2.448. Ernout-M. 882 ff.

Rum. *sfînt*, fr. Slavic, cf. ChSl. *svętŭ*, etc. (below, 5).

3. Ir. *nōib*, *nōeb*, *noem*, NIr. *naomh* (sb. 'a saint'), whence *naomhtha* (lit. 'saint-ed') : OPers. *naiba-* 'good' (16.71).

W. *sanctaidd*, learned borrowing fr. Lat. *sanctus* with W. suffix *-aidd* added.

Br. *santel*, adj. deriv. of *sant* 'a saint', fr. Lat. *sānctus*. Loth, Mots lat. 205.

Br. *sakr*, learned borrowing fr. Lat. *sacer.*

4. Goth. *weihs* (reg. for ἅγιος), OHG *wīh* (Otfr., etc., but only *heilag* in Tat., Notker, etc.), MHG *wīch* (mostly in names of holidays; NHG *weih-* in *weihnacht* 'Christmas', etc.), OE *wēoh-* in *wēobud* 'altar' 22.14, beside sb. *wēoh* 'idol', ON *vē* 'temple' (22.13), prob. : Lat. *victima* 'animal sacrifice', Umbr. *eveietu* 'voveto', but further root connections dub. Walde-P. 1.232. Falk-Torp 1376. Feist 557 f.

Goth. *hailags* (but only in neut. *heilag* 'dedicated' in a runic inscription), ON

heilagr, OE *hālig*, OHG *heilag*, etc., general Gmc., fr. Goth. *hails*, ON *heill*, OE *hāl*, OHG *heil* 'in good health, sound, uninjured' (4.83), with semantic development through 'inviolate' or possibly 'bringing well-being'. Falk-Torp 396. Feist 232. NED s.v. *holy*.

ME *sacrid*, NE *sacred*, orig. pple. of *sacre* 'consecrate', fr. OFr. *sacrer* id., Lat. *sacrāre*, with history parallel to that of Fr. *sacré* (above, 2). NED s.v.

5. Lith. *šventas*, OPruss. *swints*, Lett. *svēts* (Lett. and perh. OPruss. forms fr. Slavic), ChSl. *svętŭ*, etc. general Slavic, Av. *spənta-*, all fr. **k̂wento-*, deriv. of a *k̂wen-* attested in Lett. *svinēt* 'celebrate', Av. *spanyah-*, *spəništa-* 'holier, holiest', *spānah-* 'holiness', prob. Goth. *hunsl* 'sacrifice' (22.15), but further root connections dub. Walde-P. 1.471. Barth. 1619 ff.

6. There is no quite distinctive Skt. word for 'holy', but the following sometimes have this sense.

Skt. *puṇya-* (etym.?) 'fortunate, pleasant, good', also 'pure' and 'holy', esp. in cpds. as *puṇya-bhū-* 'holy land', *puṇya-sthāna-* 'holy place'.

Skt. *tīrthaka-*, fr. *tīrtha-* 'passage, ford' (: *tṛ-* 'pass over, cross') and 'place of pilgrimage'.

Much more common is the sb. *muni-* 'holy man, saint, seer, ascetic' (but in RV 'impulse'), etym.?

22.21 CHURCH

(Both as the Body, Community, and as the Building except as noted, a for former, b for latter)

Grk.	(late) ἐκκλησία; κυριακόν (b)	Goth.	*aikklēsjō* (a)	Lith.	*bažnyčia*
NG	ἐκκλησία	ON	*kirkja*	Lett.	*baznīca*

Br.	*iliz*	NHG	*kirche*		

With a few exceptions the same words cover 'church' both as the body, community, and as the building. But in all such cases one of these applications was the earlier, with subsequent extension to the other.

There are two main groups. In one, the Grk. ἐκκλησία, the old term for a political assembly, came to be used for the Christian 'church' as a body, later as a building, and was adopted in Latin and through Latin in the Romance and Celtic languages of western Europe.

In the other group, Grk. κυριακόν 'Lord's house', in general less common than ἐκκλησία but a familiar name of the church (as building) in various regions, was adopted, prob. through an unattested Gothic form, in the Gmc. and Slavic languages, and then used also for the church as a body, like and very likely influenced by Lat. *ecclesia* in both senses. This adoption of the less usual Grk. term has been much discussed and often brought into connection with the spread of Arianism. But this is disputed and

unnecessary. We need only conclude that the churches which first impressed the Goths (or other Gmc. peoples in the East) bore this name, as did, we know, many in Constantinople and Asia Minor. Kretschmer KZ 39.541 ff. (but against derivation through a pop. κυρικόν, cf. Streitberg, Gesch. d. idg. Sprachwissenschaft 2.2.95). NED s.v. *church*. Stender-Petersen 424 ff. A. Pompen, Donum nat. Schrijnen 516 ff.

The few other words denoted orig. the church as a building.

The old words for 'temple' (22.13) were not generally retained to designate the Christian 'church', but (unlike those for 'god') were rejected as pointing to pagan worship. None of them furnished the usual word for 'church', but some have come into use in this sense also (not included in the list). Thus NG ναός may be used as a generic term for 'place of worship' of any religion, and occurs in legal terminology (νόμος περὶ ἐνοριακῶν ναῶν) and many names of churches (ναὸς τοῦ ἁγίου Νικολάου, etc.); NIr. *teampall* is frequently 'church', formerly only Protestant; It. *tempio*, Sp. *templo*, Fr. *temple* sometimes 'church', esp. Protestant; NE *temple* sometimes 'church' (NED s.v. 2); so ChSl. *chramŭ*, SCr. *hram*, Boh. *chrám*, Russ. *chram*.

1. Grk. ἐκκλησία 'assembly' (: ἐκκαλέω 'call, summon', ἐκκλητός 'selected'), the common political term, then in LXX the Jewish 'congregation', in NT also and usually the community of Christians, the 'church' as a body; later (ca. 300 A.D.) the 'church' as a building (e.g. Eus. οἶκος τῆς ἐκκλησίας and simply ἐκκλησία). Hence Goth. *aikklēsjō* (in NT as body, in Calendar as building), Lat. *ecclēsia* (both senses), and therefrom the Romance (except Rum.) and Celtic words (for Br. *iliz*, cf. Loth, Mots lat. 163).

2. Grk. κυριακόν (sc. δῶμα) quotable as 'Lord's house, church' 300 A.D.+, neut. of κυριακός, fr. κύριος 'master, Lord' (19.41). Hence, prob. through an unattested Goth. form, OE *cir(i)ce* (> ON *kirkja*), OHG *chirihha, kirihha*, etc., and the Slavic words, ChSl. *crŭky*, SCr. *crkva*, Boh. *církev* (as body), Pol. *cerkiew* (now only 'Greek church'), Russ. *cerkov'*. Cf. references above.

The parallel late Lat. *dominicum*, though quotable as 'church', was short lived, in contrast to the persistent *dominica* or *dominicus* 'Lord's day, Sunday', like Grk. κυριακή (14.52).

3. Lat. *basilica*, fr. Grk. βασιλική, fem. of βασιλικός 'royal', but used (first with στοά, then alone) for a certain type of building, and later applied to the early Christian churches of this form. Hence Rum. *biserică*, also Alb., Vegliot and Rhaeto-Roman words for 'church' (Fr. *basoche* in a quite different sense), and according to the evidence of Christian inscriptions *basilica* was once current over a much wider area. REW 972. Wartburg 1.270. Bartoli, Le tre basilche di Ragusa e la coppia *basilica* ed *ecclesia* (Dubrovnik, Vol. II).

4. Lith. *bažnyčia*, Lett. *baznīca*, fr. Pol., Russ. *božnica* (Russ. 'chapel, small church', Pol. now 'synagogue') deriv., through adj. like ChSl. *božĭ*, of the word for 'god'. Brückner, Sl. Fremdwörter 71, 167. Mühl.-Endz. 1.369.

5. Boh. *kostel* 'church' as building (> Pol. *kościoł* 'church' in both senses; also Russ. *kostel* for Catholic church), fr. Lat. *castellum* 'fortress' and at first applied to a type of medieval fortified church, the existence of which is well attested. Cf. e.g. Sebastian, German Fortified Churches in Transylvania, Antiquity 6(1932).301 ff. Berneker 582. Brückner 260.

22.22 PREACH

Grk.	κηρύσσω (εὐαγγελίζομαι)	Goth.	*mērjan*	Lith.	*pamokslą sakyti*

'Preach' is expressed by verbs for 'proclaim, announce' (most of these connected with verbs for 'say', or through 'make known' with verbs for 'know'), which became partly or wholly specialized to religious terms.

Most of the nouns for 'sermon' are parallel forms, derived from the verbs, like Grk. κήρυγμα, NHG *predigt*, etc. But Lat. *sermō* 'discourse' was 'religious discourse' in eccl. writers, and so a rival of *praedicātiō*, persisting beside the latter in Romance languages and the usual term in NE *sermon* vs. vb. *preach*. A few of the verbs for 'preach' are, conversely, derived from nouns for 'sermon'.

1. Grk. κηρύσσω 'summon, proclaim, announce' (fr. κῆρυξ 'herald'), hence 'preach' NT+ (NG in ττ form).

Grk. εὐαγγελίζομαι 'bring good tidings' (fr. εὐ-άγγελος : ἀγγέλλω 'announce'), in NT 'preach the gospel, preach' (but much less common than κηρύσσω).

2. Lat. *praedicāre* 'proclaim' (cpd. of the root in *dīcere* 'say'), in eccl. Lat. 'preach'. Hence the Romance (but Rum. *predica* neolog.) and most of the Celtic and Gmc. words.

Rum. *propovedui*, fr. Slavic, cf. ChSl. *propovědati*, etc. (below, 6).

3. Ir. *pridchim*, Br. *prezeg*, fr. Lat. *praedicāre*. Vendryes, De hib. voc. 168. Loth, Mots lat. 199.

NIr. *seanmōirim*, fr. *seanmōin*, MIr. *senmōin*, *sermōin* 'sermon', fr. Lat. *sermō*, *-ōnis*, with *n* for *r* by assim. or pop. etym. Vendryes, De hib. voc. 177.

W. *pregethu*, fr. *pregeth* 'sermon', fr. Lat. *praeceptum* 'precept'. Loth, Mots lat. 198.

4. Goth. *mērjan* = OHG *māren* 'proclaim', fr. **mēri-* in Goth. *waila-mēreis* 'praiseworthy', ON *mǣrr*, OE *mǣre*, OHG *māri* 'famous', with development of verb through 'make known'. Walde-P. 2.238. Feist 355.

OE *bodian*, *bodig(e)an* 'announce' and reg. word for 'preach' (*predician* rare; NE *bode* 'portend') = ON *boða* 'announce, command', fr. OE *bod*, ON *boð* 'command, message', beside OE *boda*, ON *boði*, OHG *boto*, NHG *bote*, etc. 'messenger', all fr. the root of OE *bēodan* (pple. *boden*), ON *bjōða*, OHG *biotan*, etc. 'offer, announce, command' (19.45). Walde-P. 2.147. NED s.v. *bode*.

All the other Gmc. words are fr. Lat. *praedicāre*, most of them directly, but NE *preach* through Fr. (above, 2).

5. Lith. *apsakyti* 'relate, describe' and formerly 'preach' (reg. word in Trowitsch NT; Kurschat *apsakyti* and *kozoni sakyti*, with *kozonis* 'sermon' fr. Pol. *kazanie*), cpd. of *sakyti* 'say' (18.22).

Lith. *pamokslas*, now the reg. word for 'sermon', formerly 'teaching' : *mokyti*

'teach' (17.25). Hence now *pamokslą sakyti* 'preach'.

Lett. *sludināt* (reg. word in Lett. NT), orig. 'make known', caus. of *sludēt* 'spread as news, be heard of', fr. the root **k̂leu-* in words for 'hear, be heard' (15.41). Mühl.-Endz. 3.940 f.

Lett. *spredik'uot*, fr. *spredikis*, *predikis* 'sermon', fr. MLG *predikie* 'sermon'. Mühl.-Endz. 3.1016, 385.

6. ChSl. *propovědati* (with the SCr. and Russ. forms), cpd. of *povědati* 'announce, relate' (cf. *pověděti* also 'say', 18.22), orig. 'make known', cpd. of *věděti* 'know' (17.17).

Boh. *kázati*, Pol. *kazać* = ChSl. *kazati* 'show, admonish', SCr. *kazati*, Russ. *skazat'* 'say' (18.22), with specialization to 'preach'. Berneker 497.

Most of the words for 'bless' are from either 'speak well of' or 'make the sign of the cross'. But the English *bless* comes through 'consecrate' from the word for 'blood'.

1. Grk. εὐλογέω 'speak well of, praise', in LXX, NT+ 'bless', fr. εὐ- 'well' and λόγος 'speech, word'.

2. Lat. eccl. *benedīcere* (in class. Lat. *bene dīcere* 'speak well, speak well of, praise'), fr. *bene* 'well' and *dīcere* 'say'. Hence It. *benedire*, Fr. *bénir*, Sp. *bendecir;* Rum. *binecuvînta* similar cpd. with *cuvînta* 'speak' (18.21), now more common than old *blagoslovi* fr. Slavic (below, 6). REW 1029. Tiktin 190, 197.

3. Ir. *bendachaim*, NIr. *beannuighim*, fr. Lat. *benedīcere* (but independent borrowings); hence also Br. *binniga*, W. (arch.) *bendigo;* but W. *bendithio* (usual word now), fr. *bendith* 'blessing, benediction', fr. Lat. *benedictiō*. Vendryes, De hib. voc. 116. Loth, Mots lat. 137 f.

4. Goth. *þiuþjan*, fr. *þiuþ* 'the good' (16.71). Feist 498.

OE *blōedsian*, *blētsian* (> ON *bleza*, NIcel. *blessa*), in earliest use also 'consecrate', deriv. of OE *blōd* 'blood'. Hence ME *blesse*, NE *bless*. NED s.v. *bless*, vb.[1].

OE *segnian*, *sēnian*, OHG *seganōn*, MHG *segen(en)*, *sēnen*, NHG *segnen*, Du. *zegenen* (Dan. *signe*, Sw. *signa*, but now as 'bless' mostly), Dan. *velsigne*, Sw. *välsigna* with *vel*, *väl* 'well', all orig. 'make the sign of the cross' (OE *segnian* mostly in this sense), fr. Lat. *signāre*, deriv. of *signum* 'sign', eccl. esp. 'sign of the cross'. Falk-Torp 963 f. Weigand-H. 2.834.

5. Lith. *(pa)laiminti*, fr. *laimė*, *palaima* 'good fortune' (16.17).

Lith. *žegnoti* (the old word), fr. Pol. *żegnać* (below, 6). Brückner, Sl. Fremdwörter 157.

Lett. *svetīt* (also 'celebrate'), fr. Russ.

svjatit' 'hallow, consecrate' (cf. *svjatoj* 'holy' 22.19). Mühl.-Endz. 3.1155.

6. ChSl. *blagosloviti*, etc., general Slavic, cpd. of *blagŭ* 'good' (16.71) with deriv. of *slovo* 'word' (18.26, reg. for λόγος), and so an exact translation of Grk. εὐλογέω. Berneker 69.

Boh. *žehnati*, Pol. *żegnać*, fr. NHG *segnen* (above, 4). Brückner 664.

7. Skt. *svasti-* 'well-being (*su-asti-*), good fortune', is used in phrases (with *dhā-* 'place', *kṛ-* 'make', etc.) which are virtually equivalent to 'bless', e.g. *svasti* . . . . *dadhātu naḥ* (RV), *svasti* . . . . *naḥ kṛṇotu* (AV) 'may . . . . bless us'.

Skt. *mañgala-* 'good fortune, happiness' and the wish for such, 'benediction, blessing' : *mañju-* 'beautiful, charming', Grk. μάγγανον 'means of charming'. Walde-P. 2.233.

Av. *frī-*, *ā-frī-* 'propitiate', sometimes virtually 'bless' (Yt. 13.50, V. 22.5, both rendered 'bénir' by Darmesteter) : Skt. *prī-* 'please', *priya-* 'dear'. So sb. *ā-frī-* (in cpds.) and *āfrīti-* 'blessing' or 'curse', cf. Skt. *āprī-* name of a special kind of invocation. Barth. 330, 1016 f.

One group of words for 'curse' is the exact pendant, in form as well as sense, of those for 'bless', namely the eccl. Lat. *maledīcere* with its descendants, orig. 'speak ill of' vs. *benedīcere*, orig. 'speak well of'. The Grk. word means literally 'pray against', and the class. Lat. word is an opposite of 'consecrate'. But some nouns for 'prayer' or 'blessing' may themselves be used also for a 'curse' (cf. Grk. ἀρά, εὐχωλή, Av. *āfrī-*, below).

Other verbs are based on 'say away, reject', or 'forbid', or are derivs. of words for 'misfortune, evil' with the notion of 'invoke' implicit in the verb. A few are connected with words for 'howl, bark' or 'sound, noise', with development through some such notion as 'howl at, shout at' > 'revile'.

1. Grk. καταράομαι, fr. deriv. of ἀρά 'prayer' (22.17) with κατά 'against'. But ἀρά itself is frequently used also for a 'curse'. Similarly εὐχωλή 'prayer, vow' is used as 'imprecation, curse' in an Arcadian inscription (Schwyzer, Dial. Gr. Exempla 661.24).

2. Lat. *exsecrārī*, *-āre* (> It. *esecrare*, Fr. *exécrer*, etc. 'abhor, detest', but not the words for 'curse'), cpd. of *sacrāre* 'consecrate' (fr. *sacer* 'holy', 22.19) with *ex-* in its negating force. Ernout-M. 883.

Lat. eccl. *maledīcere* (in class. Lat. *male dīcere* 'speak ill of, abuse'), fr. *male* 'ill' and *dīcere* 'say'. Hence It. *maledire*, Fr. *maudire*, Sp. *maldecir*. REW 5258.

Rum. *blestema*, fr. VLat. **blastēmāre* (> OFr. *blasmer* 'reproach, blame', etc.)

= eccl. Lat. *blasphēmāre*, fr. Grk. βλασφημέω 'speak ill of, slander, blaspheme', with cons. dissim. already in colloquial Grk. (cf. NG pop. βλαστημῶ). REW 1155. Wartburg 1.403.

3. Ir. *maldachaim*, Br. *milliga*, W. (arch.) *melligo*, fr. Lat. *maledīcere*, but NIr. *malluighim* (older *mallachdaim*), W. *melltithio*, derivs. of Ir. *maldacht*, W. *melltith* (*melldith*), fr. Lat. *maledictiō* (whence also Br. *malloz* 'a curse'). Vendryes, De hib. voc. 153. Loth, Mots lat. 186.

4. Goth. *fraqiþan* (in one case 'reject', but reg. 'curse'), cpd. of *qiþan* 'say' and *fra-* 'forth, away'.

Goth. *unþiuþjan* (once), neg. cpd. of *þiuþjan* 'bless' (22.23).

ON *bǫlva*, fr. *bǫl* 'misfortune' = OE *bealu* 'evil, woe' (NE *bale*), etc. Falk-Torp 46.

ON *banna* 'forbid' (18.38), also 'curse' (cf. Fritzner, s.v.), and in latter sense now Dan. *forbande*, Sw. *förbanna*.

OE *wiergan* (*wirgan*), OHG *furwergit* 'maledictus' (Tat.) : Goth. *gawargjan* 'condemn', *wargiþa* 'condemnation' (= OE *wiergþu* 'curse'), OE *wearg*, OHG *warg* 'villain, criminal', ON *vargr* 'wolf, thief, robber', prob. fr. the same root as OE *wyrgan*, OHG *wurgan* 'strangle'. Walde-P. 1.273. Falk-Torp 1354. Feist 325, 551.

OE *cursian* (late), ME, NE *curse*, fr. sb. OE *curs* (also late, but earlier and more frequent than the vb.), generally regarded as of unknown origin (so NED s.v.), but plausibly explained by Weekley, Etym. Dict., as orig. 'wrath' (cf. earliest quotation *Goddes curs*), fr. an OFr. *curuz* = *corroz* 'anger, wrath' (Fr. *courroux* 16.42). Cf. the development of Grk. ὀργή 'wrath' (16.42), through 'wrath of god' in NG pop. phrase νὰ τὸν πάρῃ ἡ ὀργή, virtually = 'curse him!'

OHG *fluochōn*, MHG *vluochen*, NHG *verfluchen*, Du. *vervloeken* (NHG *fluchen*, Du. *vloeken* now 'curse, swear' = 'use bad language') : OE *flōcan* 'clap the hands', OS *for flōcan* 'curse', Goth. *flōkan* 'lament' : Lat. *plangere* 'strike, lament', Grk. πληγή 'blow', etc., with development of 'beat the breast' > 'lament' and 'curse'. Walde-P. 2.92. Falk-Torp 239. Weigand-H. 1.561.

NHG *verwünschen*, cpd. of *wünschen* 'wish', with *ver-* as in *ver-achten* 'despise', etc., but esp. influenced by the early pop. use of *wunsch* as denoting some magical power. Paul, Deutsches Wtb. s.v. *wunsch*.

5. Lith. *keikti*, *prakeikti*, etym.?

Lett. *lādēt*, esp. *nuolādēt*, fr. *lāt* 'howl, bark' and 'revile' : Lith. *lōti*, ChSl. *lajati*, Lat. *lātrāre* 'howl, bark', Goth. *lailōun* 'they reviled'. Walde-P. 2.376. Berneker 686 f. Mühl.-Endz. 2.435 f., 442, 808 f.

6. ChSl. *klęti*, *proklęti* (*klęti sę* also 'swear'), SCr. *prokleti*, Boh. *proklíti*, Pol. *przekląć*, Russ. *(pro)kljast'*, with iter. ChSl. *proklinati*, etc. and sbs. ChSl. *klętva*, etc., etym. dub. Berneker 525. Brückner 232 (: ChSl. *kloniti* 'incline, bow').

7. Skt. *çap-* (also 'swear'), with sb. *çāpa-* 'curse', prob. : *çabda-* 'sound, noise' (15.44).

Av. *zav-* 'call, invoke' (18.41) may be 'curse', and *āfrī-* (in cpds.), *āfrīti-* denote 'blessing' or 'curse' (cf. 22.23). Cf. Y. 11.1 *θrāyō haiθim ašavanō āfrivačaŋhō zavainti*, . . . *gāuš zaotārəm zavaiti* 'three truly righteous creatures with maledictions curse, . . . the ox curses the priest'. Barth. 1667.

Most of the words for 'baptize' are such as meant originally 'dip'. But the Greek word in its specialized eccl. sense was adopted in eccl. Latin and hence in the Romance and Celtic languages, as well as later English, while in most of the Gmc. languages native words for 'dip' were used for 'baptize'.

Other semantic sources are 'cleanse, purify', 'consecrate', and 'christianize', of which baptism was the outward symbol.

1. Grk. βαπτίζω, orig. 'dip', like βάπτω (see under 'dye', 6.40). Hence eccl. Lat. *baptizāre* (often *baptidiāre*), the Romance words (OFr. *ba(p)toier* beside *ba(p)tisier*, Fr. *baptiser;* REW 939, Wartburg 1.241 f.), the Celtic (but Ir. *baitsim*, NIr. *baistim* through the sb. *baithis*, fr. Lat. *baptisma;* Pedersen 1.237, Vendryes, De hib. voc. 115), and (through OFr. *baptisier*) ME *baptise*, NE *baptize*.

2. Lat. *tingere* 'moisten, dye' was used by some eccl. writers for 'baptize', as translation of Grk. βαπτίζω.

3. Goth. *daupjan* (ON *deyfa*, *deypa* only 'dip'), Dan. *døbe*, Sw. *döpa*, OE *dīepan* ('dip', but Anglian *dēpan* also 'baptize'; so also *dyppan* from weak grade), OHG, MHG *toufen*, NHG *taufen*, Du. *doopen*, all orig. 'dip', caus. deriv. of Goth. *diups*, etc. 'deep' (12.67). Except in ON and OE, the orig. sense has been displaced by the secondary. Walde-P. 1.847 f. Falk-Torp 175 f. Feist 117. Kluge-G. 614. NED s.vv. *depe* and *dip*.

ON *kristna* 'christianize' and 'baptize', OE *cristnian* 'christianize', ME *christen* 'baptize', NE *christen* (now esp. in connection with naming a child), derivs. of the word for 'Christ', with development fr. 'christianize' to 'baptize' as the symbol of conversion. NED s.v. *christen*, vb.

4. Lith. *krikštyti*, Lett. *kristīt*, fr. Slavic (below, 5). Brückner, Sl. Fremdwörter 97, 175. Mühl.-Endz. 2.281.

5. ChSl. *krŭstiti*, etc., general Slavic, fr. ChSl. *krŭstŭ*, etc. 'cross', this fr. Gmc. form for 'Christ' (12.77). Semantically the verb does not necessarily come through 'make the sign of the cross', but may be from the earlier sense of *krŭstŭ* as 'Christ' and so have the same development, through 'christianize', as ME *cristen*, etc. (above, 3). Br.	*iun(i)*	NHG	*fasten*		

Among the verbs for 'fast' in the religious application here intended, only the Grk. word is clearly derived from a noun with the literal sense of 'not eating'. The Lat. word is from an adj. which, though of doubtful etymology, means 'fasting, hungry' without religious connotation, and the W. word is connected with one for a 'meal'. In the others there is no original relation to 'eat' or 'food'.

The largest group, to which NE *fast* belongs, comes from the notion 'hold fast, keep, observe', and the use for 'go without food' without reference to the religious observance, though quotable in English from the earliest times (cf. NED s.v. *fast*, vb.[2]) and common to the modern Gmc. and Slavic languages, is secondary.

1. Grk. νηστεύω, fr. νῆστις 'not eating, fasting', cpd. of neg. prefix νη- or *νε- and *ἔστις, fr. the root of ἔδω 'eat' (5.11). Schwyzer, Gr. Gram. 431.

2. Lat. (eccl.) *iēiūnāre* (> Fr. *jeûner*, Sp. *ayunar*, ORum. [and dial.] *ajuna;* with *dis-* > It. *digiunare*), fr. *iēiūnus* 'fasting' (*iāiūnus* Plaut.), etym. dub. Ernout-M. 472. Walde-H. 1.674 f. REW 4581.

4. Goth. *fastan* (also 'keep, observe'), ON *fasta*, OE *fæstan*, OHG *fastēn*, etc., general Gmc., fr. adj. seen in OE *fæst*, OHG *fasti*, etc. 'firm', with development through 'hold fast, keep, observe', as attested in the Gothic uses, and parallel to the late use of Lat. *observāre* 'observe' as 'abstain from' (Vulgate) or 'fast' (Isid.). Nearly all the Eur. words for 'heaven', as the abode of the gods and the blessed, are such as orig. denoted the 'sky', most of them still so used, though there is occasional differentiation. Most of the Indo-Iranian terms are of quite different origin, expressions meaning literally 'abode of Yama', 'world of the gods', 'house of praise', 'best world', etc.

1. Words for 'sky' used also for 'heaven', see. 1.51. A few of the old words are now used only or mainly in the latter sense, as NIr. *neamh*, W. *nef*. Or there may be differentiation of parallel forms, as MLG *hemmel* 'heaven' vs. *heven* 'sky', NE *heaven* vs. pl. *heavens* = *sky*, conversely Lett. *debess* 'sky' vs. pl. *debesis* 'heaven'. Furthermore, in the sense 'heaven' the pl. form is much more common than the sg. in the Grk. NT (Blass-Debrunner 141), and this is generally followed in the Vulgate, Goth., OE, OHG (Tat.), ChSl. and often in later versions (in English pl. Wyclif, sg. Tyndale).

2. Ir. *rīched*, fr. **rīgo-sedo-* or **rīgi-sedo-* lit. 'king's seat'. K. Meyer, Ber. Preuss. Akad. 1913.955. Pokorny, Z. celt. Ph. 10.199.

Words for 'hell' are based on such notions as 'place below', 'place of hiding', 'unseen' (?), 'punishment', 'house of the lie, worst world', etc. The burning 'pitch' of hell, so vividly portrayed by Christian writers, has furnished (through MHG) the regular words for 'hell' in several of the Balto-Slavic languages.

1. Grk. *ᾅδης* (Hom. *'Αΐδης*, gen. *'Αΐδος*, proper name and place of the departed spirits; in LXX reg. for the Hebr. *Šeol*), etym. much disputed, e.g. fr. **ἀ-ϝιδ-* 'unseen' (ancients and Schulze, Quaest. Ep. 468, Schwyzer, Gr. Gram. 266), or fr. **αἰϝιδ-* : Lat. *saevus* 'fierce' (Wackernagel, Walde-P. 2.445, etc.).

Grk. *γέεννα* (LXX, NT, taken over as *gehenna* in Vulgate and elsewhere), fr. a Hebr. word, orig. name of a valley where children were thrown to Moloch. NED s.v. *Gehenna*.

Grk. *κόλασις* 'chastisement' (: *κολάζω* 'chastise, punish', 21.37), hence NG pop. 'damnation' and 'hell'.

2. Lat. *inferna* (neut. pl., Tac.+), eccl. Lat. *infernus*, later *infernum* (> It. *inferno*, Fr. *enfer*, Sp. *infierno*), fr. adj. *infernus* 'belonging to the underworld' (epithet of Pluto, etc.), deriv. of *inferus* 'below, underground' (cf. *inferī* 'inhabitants of the lower world, the dead') : Goth. *undar*, etc. 'under'. Walde-P. 1.323. Ernout-M. 487. Walde-H. 1.698. REW 4397.

'hell-punishment', then its place and so equivalent to the simple *hel* (in ON Christian terminology usual vs. *hel* for the pagan *hel*, but only a less common variant in OE, OHG, MHG). Falk-Torp 393.

5. Lith. *pekla* (Lett. *pekle* 'abyss', sometimes 'hell', with final *e*, fr. *elle*), fr. WhRuss. or Ukr. *peklo* (below, 6). Brückner, Sl. Fremdwörter 117, 180. Mühl.-Endz. 3.193.

All the Eur. words for 'angel' come from the Grk. word meaning orig. 'messenger'. The Indo-Iranian words considered here are only such as may loosely (Skt.) or more closely (Av.) be rendered 'angel'.

1. Grk. *ἄγγελος* 'messenger' (orig. dub., Walde-P. 1.65. Boisacq 6), hence later (LXX) 'angel'. Hence all the Eur. words, mostly through Lat. *angelus* (Lett. fr. MLG; Lith. *aniolas*, fr. Pol.).

2. Skt. *āditya-*, fr. *aditi-* the personified 'infinity', is used in the plural of the seven deities of the heavens, but including the highest, so only very loosely to be compared with 'angels'.

Av. *yazata-*, lit. 'to be worshiped, worshipful' (fr. *yaz-* 'worship', 22.16) is used in the plural for a large group of holy beings subordinate to Ahura Mazda, and so may well be rendered 'angels'. Highest of these are the *aməšă spənta* 'immortal holy ones' (*aməša-* = Skt. *amṛta-* 'immortal', *spənta-* 'holy', 22.19), approximately 'archangels'. Jackson, Grd. iran. Phil. 2.632 ff., 640 ff.

Most of the usual Eur. words for 'devil' come from a Grk. word meaning orig. 'slanderous, a slanderer'.

Besides this group, the Hebr. *šātān*, orig. 'adversary', though rendered by *διάβολος* in the LXX, is adopted in the NT as *Σατανᾶς*, hence the familiar *Satan* or the like in most Eur. languages, but less generic than 'devil'.

Words for 'dragon' and 'enemy' are also used for 'devil'.

1. Grk. *διάβολος* 'slanderous, a slanderer' (: *διαβάλλω* 'slander', orig. 'throw across', cpd. of *βάλλω* 'throw'), later (LXX+) 'devil'. Hence the widespread Eur. forms, mostly through Lat. *diabolus*. The diphthong of OHG *tiufal*, etc. is possibly due to pop. association with *tiuf* 'deep' (Frings, Don. Nat. Schrijnen 486). There are some popular short forms, as Boh. *d'as* beside *d'ábel*. REW 2622. Pedersen 1.201. Falk-Torp 144. Berneker 199. NED s.v. *devil*.

2. Rum. *drac*, pop. vs. eccl. *diavol*, fr. Lat. *dracō* 'dragon'. Same development in Alb. *dreq* beside *djall*, Fr. dial. *drac*, and MDu. *drake*. Cf. NT, Rev. 12.9 *ὁ δράκων ὁ μέγας, ὁ ὄφις ὁ ἀρχαῖος, ὁ καλούμενος Διάβολος καὶ ὁ Σατανᾶς* (similarly Rev. 20.2); Av. *ažim dahākəm . . . . yam drujim* 'the dragon Dahaka, the lie'. REW 2759. Tiktin 567. Wartburg 1.150.

3. Goth. *unhulþa*, see Goth. *unhulþō* 'demon' (22.35).

ON *fjāndi*, OE *fēond*, OHG *fīant* 'enemy' (19.52) were often used for the 'arch-enemy, the devil'.

4. Lith. *velnias* (older *velinas*, *velnas*), Lett. *velns* : Lith. *vėlė*, Lett. *velis* 'spirit of the dead, ghost' (22.45). Mühl.-Endz. 4.532 f.

5. SCr. *vrag* = ChSl. *vragŭ* 'enemy', etc. (19.52).

Boh. *čert*, Pol. *czart*, Russ. *čort*, etym. dub. Berneker 172. Brückner 73.

6. Of the Skt. words for 'evil spirit, demon' (22.35) there seems to be none which can be singled out as particularly appropriate for 'devil'.

Av. *aŋra- mainyu-*, the personified 'evil spirit' (*aŋra-* 16.72, *mainyu-* 16.11), the 'demon of demons' (*daēvanąm daēvō*, Vd. 19.1), clearly the Zoroastrian 'devil'.

Among the words for 'demon' a widespread Eur. group goes back to a Grk. word which in classical times denoted one's good or evil genius and only later had the definitely bad sense of 'evil spirit'.

Others are connected with words for 'hostile', 'adversary', 'frightful', 'injury', etc. In some cases 'evil spirit' is the common term. The Iranian words reflect the fall of the old Aryan gods to the role of demons under the Zoroastrian reform.

But frequently the words for 'devil' (22.34) are used also to cover the lesser devils or 'demons'. In the NT Grk. *διάβολος*, always sg. 'the devil, Satan', and *δαίμων* or *δαιμόνιον* 'demon' are kept apart, and this distinction was followed in the Vulgate. But in the English and German versions, from the earliest to the present, the words for 'devil' have been used also in the latter sense (e.g. Mt. 9.34 *devils* in King James and Revised, *teufel* in Luther), and similarly (through Luther) in the Lith. and Lett. versions. Cf. NED s.v. *demon*.

1. Grk. *δαίμων*, in Hom. 'divine power', hence power that controls one's fate, one's good or evil genius, but eccl. (NT+) 'evil spirit, demon', prob. : *δαίομαι* 'distribute, allot'. Walde-P. 1.763. Boisacq 162. Hence, or fr. *δαιμόνιον*, eccl. Lat. *daemon*, *daemonium*, and the widespread Eur. forms.

2. W. *cythraul*, orig. 'adversary' = *cythrawl* 'contrary', fr. Lat. *contrārius*. Pedersen 1.234. Loth, Mots lat. 158.

Br. *aerouant*, fr. *aer* 'serpent' (3.77).

3. Goth. *unhulþō* (usual for *δαιμόνιον*; also *unhulþa*, but this mostly for *διάβολος*), OE *unholda* (rare), OHG *unholdo*, also fem. *unholda* (both rare), MHG *unholde*, NHG *unhold* : adj. OE, OHG *unhold* 'hostile', neg. cpd. of Goth. *hulþs*, OE, OHG *hold* 'merciful, gracious', this prob. : OE *heald*, OHG *hald* 'leaning forward, inclined'. Walde-P. 1.430. Feist 274. Weigand-H. 2.1118.

Goth. *skōhsl*, prob. : Ir. *scāl* 'supernatural being, specter' (22.45), perh. (as 'wandering' spirit?) fr. the root of Goth. *skēwjan* 'wander', Ir. *scuchim* 'depart, disappear'. Walde-P. 2.557. Feist 434.

ON *djǫfull*, OE *dēoful*, OHG *tiufal*, etc. 'devil' (22.34), used also for 'demon' (and so still in NE, NHG, Du., Dan. versions of NT).

4. Lith. *velnias*, Lett. *velns* 'devil' (22.34), also 'demon'.

5. ChSl. *běsŭ* (reg. for *δαιμόνιον*), SCr. *bijes* (but mostly 'rage'), Boh. *běs*, Pol. *bies*, Russ. *bes* (only ChSl. and Russ. the usual words) : Lith. *baisa* 'fright', *baisus* 'frightful' beside *baimė* 'fear', etc. (16.53). Berneker 56.

SCr. *zloduh*, Boh. *zlý duch*, Pol. *zly duch* 'evil spirit' (16.72, 16.11), now apparently the best words (but words for 'devil' in NT versions).

6. Skt. *rakṣas-* (most usual term for 'demon', but also 'injury') : Av. *rašah-* 'injury', *raš-* 'injure', prob. Grk. *ἐρέχθω* 'rend, break'. Walde-P. 2.362. Barth. 1516.

Skt. *asura-*, orig. 'spiritual, beneficent spirit' and epithet of the gods (see 22.12), then (already sometimes in RV, commonly in AV and the Brahmanas) 'evil spirit, demon'.

Skt. *piçāca-*, used of a special class of demons : *piçuna-* 'slanderous, wicked', Lith. *piktas* 'bad', etc. (16.72). Walde-P. 2.10. Uhlenbeck 167.

Most of the words for 'pagan, heathen' are either formal or semantic borrowings from Grk. or Lat. eccl. terms.

A few words for 'idolater' (in general these are formal or semantic borrowings from Grk.; cf. NG below) which serve also for 'heathen' are included.

1. Grk. *ἔθνη*, pl. of *ἔθνος* 'people, nation' (19.22), was used by Jewish writers (LXX, NT) with special reference to the non-Jewish nations, 'heathen' from their point of view. Hence the similar use of words for 'nations' in the other versions, as Lat. *gentēs*, Goth. *þiudōs*, OE *þeoda*, OHG *diota*, ChSl. *języci*. Deriv. *ἐθνικός*, properly 'national', but in NT 'heathen'. Similarly Lat. *ethnicus* or *gentīlis*.

Grk. *Ἕλληνες* 'Greeks' was used in the NT (e.g. Jn. 7.35) in the same way as *ἔθνη* (and in other versions often rendered by the same words), and so in Christian writers often 'heathen'. (Hence its long disuse as a national name, revived in modern times.)

Grk. eccl. *εἰδωλολάτρης* (NT) 'idol-worshiper, idolater' (cpd. of *εἴδωλον* 'image' and agent noun : *λατρεύω* 'serve,

worship'), besides being the source of the widespread terms for 'idolater', may also serve for 'heathen' in NG, where *ἐθνικός* is restored to its original sense of 'national' (but still pl. *ἐθνικοί* 'heathen' eccl.).

2. Lat. eccl. *gentēs*, *gentīlis*, see above, 1.

Lat. eccl. *pāgānus* (Tertullian, Augustine, etc.), fr. *pāgus* 'country district' (19.14). But the familiar old explanation, namely that the old beliefs survived longer in the country, has been shown to be chronologically untenable. The term came to be used for 'civilian' vs. 'soldier' (*mīlitēs et pāgānī*), and the early Christians, who called themselves soldiers of Christ, accordingly applied it to those not so enrolled. NED vol. VII, add. (last p. of Preface). Weekley, Words ancient and modern 76 ff. This word became the most common one and is the source of the widespread group (Romance, Celtic, English, in part Balto-Slavic, and everywhere familiar).

3. Ir. *genti* (pl.), fr. Lat. *gentēs* (above, 2). Pedersen 1.223. Vendryes, De hib. voc, 163.

Ir. *pāgān* (whence NIr. *pāgānach*), W., Br. *pagan*, fr. Lat. *pāgānus* (above, 2).

4. Goth. *haiþnō* (nom. sg. fem. Mk. 7.26 = *'Ελληνίς* = *mulier gentīlis* Vulgate; otherwise *þiudōs*, pl., see below), ON *heiðinn* (adj.; sb. expressed by added *maðr* 'man') or *heiðingi*, OE *hǣþen*, OHG *heidan*, etc., general Gmc., deriv. of word seen in Goth. *haiþi*, ON *heiðr*, OE *hǣþ* 'field, heath', and so orig. 'uncultivated person, barbarian' (cf. Goth. *haiþiwisks* 'wild'). Influence of Lat. *pāgānus*? A different view, held by several scholars (Goth. fr. Grk. *ἔθνη*) is more difficult. Feist 238 (with full refs.). NED s.v. *heathen*.

Goth. *þiudōs* (also *þai þiudō* 'those of the nations' = *ἐθνικοί* Mt. 6.7), OE *þeoda*, OHG *diota*, see above, 1.

ME *paygane* (rare), NE *pagan*, fr. Lat. *pāgānus* (above, 2).

5. Lith. *pagonis*, *pagonas*, Lett. *pagāns*, OPruss. *poganans* (acc. pl.), fr. Lat. *pāgānus* through Slavic (below, 6). Brückner, Sl. Fremdwörter 113, 178. Mühl.-Endz. 3.28 f.

Lith. *stabmeldys*, orig. 'idolater', used also for 'heathen', cpd. of *stabas* 'idol' (22.37) and agent noun of *melsti* 'pray' (22.17).

6. ChSl. *języci*, pl. of *językŭ* 'nation' (19.22), is used like Grk. *ἔθνη* in sense noted above. Hence deriv. *językŭnikŭ* = *ἐθνικός* (Gospels Mt. 6.7, 18.17), Russ. *jazyčnik*.

The most widespread group of words for 'idol' comes from a Greek word for 'image' which was used in Jewish and Christian writers specifically for 'image of a false god', hence also 'false god' without special notion of the image. Conversely, a considerable group (Gmc.) is derived from words for 'god', as 'false god', hence also 'image of a false god', the latter sense also expressed more specifically by cpds. with words for 'image' (as NHG *götzenbild* beside *götze*). Other terms reflect certain objects or places of pagan worship, as 'post, block' ('pillar cult', cf. Tylor, Primitive Culture 2.160 ff., 215 ff., Schrader, Reallex. 2.182 f., Meringer, IF 21.296 ff.) or 'grove'. One means literally 'carved god', probably in imitation of the biblical 'graven image'.

1. Grk. *εἴδωλον* (: *εἶδος* 'form, shape', *εἶδον* 'saw', Lat. *vidēre* 'see', etc.) 'phantom' (Hom.), 'image' (reflected in a mirror or water, or in the mind), hence in Jewish and Christian writings 'image of a false god'. Hence Lat. *īdōlum*, first in earlier Grk. sense, but eccl. 'idol', whence again the widespread Eur. forms. But OFr. *idle*, *idele* (> ME *ydele*), fr. late *īdolum* resulting from retention of the Grk. accent.

2. Celtic forms, except W., fr. Lat. *īdōlum*. Vendryes, De. hib. voc. 146.

W. *eilun* (also 'image', but reg. word for 'idol' in W. Bible), perh. cpd. of *eil* 'second' and *llun* 'shape'. Pedersen 2.59.

W. *delw* ('image', also 'idol') : Ir. *delb* 'form'. Pedersen 1.64.

3. OE, MLG, Du. *afgod* (MLG > Dan. *afgud*, Sw. *avgud*, whence for the image also Dan. *afgudsbillede*, Sw. *avgudabild*, cpds. with words for 'image'), OHG, MHG *abgot*, cpds. of *af*, *ab* 'away' and *god*, *got* 'god', hence orig. 'false god'. Cf. Goth. *afguþs* 'godless, impious', *afgudei* 'impiety' ('idol' does not occur in the texts surviving in Gothic). Falk-Torp 13. Weigand-H. 1.10.

ON *skur(ð)goð*, lit. 'carved god' (cf. the biblical 'graven image'), cpd. of *skurð* : *skurðr* 'carving', *skera* 'cut, carve', and *goð* 'god'.

OE *wēoh*, *wīh* : Goth. *weihs* 'holy', etc. (22.19). As orig. 'holy image' (like ON *vē* 'holy place, temple') in pagan times, it became eccl. 'idol'.

OE *hearh* 'shrine, temple' (22.13), also 'idol'.

ME *ydele*, ME, NE *idol*, above, 1.

NHG *götze*, dimin. of *gott* 'god', first applied to statues of the saints; as 'false god, idol' since Luther, who used it where *götzenbild* is now preferred (*die götzen ihrer götter*). Weigand-H. 1.753. Kluge-G. 213.

4. Lith. *stabas* (old for 'idol', and revived in place of the borrowed *balvonas*, with derivs., as *stabmeldys* 'idolater, heathen'), also and orig. 'post, stake' :

stabyti 'stop', Skt. *stabh-* 'support, prop', etc. Walde-P. 2.625.

Lith. *balvonas* (reg. word for 'idol' in Trowitsch and Kurschat NT versions), fr. Pol. *bałwan* 'idol' (below, 5).

Lett. *elks* with sense of 'idol' abstracted fr. phrase *elka dievs* (so reg. for 'idol' in Lett. NT), lit. 'god of the grove' (*elka* gen. sg. : Lith. *elkas, alkas* 'sacred grove'). Mühl.-Endz. 1.567.

5. ChSl. *kumirŭ* (> SCr., Russ. *kumir*), etym.? Berneker 644.

SCr., Russ. *idol*, fr. Lat. *īdōlum* (above, 1).

Boh. *modla* = Pol. *modła* 'prayer' (OPol. also 'idol') : ChSl. *moliti sę*, etc. 'pray' (22.17). 'Idol' through '(pagan) object of prayer'. Berneker 2.65. Brückner 343.

Pol. *bałwan*, also and orig. 'block, post' = Boh. *bolvan* 'block, clod, lump', ORuss. *bolvan* 'block, post, idol, altar', etc., loanword fr. some Asiatic form. Development of 'idol' through the sacred 'block, pillar' of pagan worship. Berneker 41. Brückner 13.

Boh. *bůžek*, Pol. *bożek*, derivs. of words for 'god' (22.12), prob. influenced by NHG *götze*.

6. Skt. *pratimā-* 'image, statue' (9.83), applied to images of the gods, hardly has any reference to false gods in ancient times, but is used for 'idol' in a modern Skt. translation of the NT.

Much of what we regard as superstition was once, and still is among many peoples, an integral part of religious cult; and at best the line between 'religion' and 'superstition' is a variable one according to time and place. But a distinction was made even in pagan times. Theophrastus (Charact. 28) expounds it, and Cicero (Nat. deorum 2.28.71) remarks that not only the philosophers but also *nostri maiores superstitionem a religione separaverunt.*

The Grk. word means 'fear of supernatural power' in good or bad sense, the latter becoming dominant. The semantic history of Lat. *superstitiō* is disputed (but see below). Most of the other terms are cpds. of words for 'belief' with words for 'perverse, vain, bad' or prefixes having pejorative force. A few are based on 'what is beyond (the normal), abnormal'. Development through 'survival (of older beliefs)' has been assumed in certain cases, but in all these it is doubtful.

1. Grk. *δεισιδαιμονία* lit. 'fear of supernatural power', used in good or bad sense (for latter cf. Theophr. Charact.

28 with Jebb's comment), fr. adj. *δεισιδαίμων* 'pious' and 'superstitious', cpd. of *δεισι-* : *δείδω* 'fear', sbs. *δέος, δεῖμα* (16.53), and *δαίμων* 'divine power', later 'demon' (22.35).

2. Lat. *superstitiō* (> Romance words), fr. *superstāre* 'stand over'. Semantic development disputed, prob. not 'survival' (this sense in *superstes*, only late in vb.), perh. best fr. 'standing over' through 'wonder, astonishment, awe'. Cf. Lith. *stebėtis* 'be astonished', orig. 'be stiff, rigid', and some other words for 'wonder' based on similar notions (16.15). NED s.v. *superstition.* Ernout-M. 983 (not clear as to semantic history). W. Otto, Archiv für Religionswissenschaft 12.548 ff.

3. Ir. word for 'superstition'?

4. ON *hindrvitni*, cpd. of *hindri* 'hinder, latter' and *vitni* 'witness', orig. 'knowledge'. Semantically prob. not through 'survival of old beliefs' (as Falk-Torp 807), but through sense seen in vb. *hindra* 'hinder, be wrong'.

Dan. *overtro*, Sw. *övertro*, cpd. of *over, över* 'over' and *tro* 'belief', like ODu. *overgeloof*, prob. as 'what is beyond, contrary to true belief' (rather than 'surviving belief', as Falk-Torp). Falk-Torp 807. Franck-V. W. 65. Hellquist 1473.

Sw. *vantro* (Dan. *vantro* formerly also 'superstition', now 'disbelief'), cpd. of *van-* 'mis-' (= OE, OHG *wan-*, cf. NE *wanton*, NHG *wahnsinn*, etc.) and *tro* 'belief'. Falk-Torp 1348. Hellquist 1307.

Early NHG also *missglaube* (Luther; but MHG *missegloube* 'mistrust') and *afterglaube*, cpd. with *after* 'after' but here in its pejorative sense (cf. MHG *aftergloube* 'perfidia' and Weigand-H. 1.27).

5. Lith. *niektikystė* (NSB, Lalis), cpd. of neg. *niek-* (: *niekas* 'no one, nothing') and deriv. of *tikėti* 'believe'.

Under 'magic' it is intended to group the more generic terms covering magical art and practices, omitting those for more specific forms such as 'incantation, charm, spell', etc. (some of these noted in the discussion).

Most of the words for the male 'magician' belong to the same etymological groups (but NE *wizard*, orig. 'wise man'), likewise some of those for 'witch' (22.43).

A widespread Eur. group comes from Grk. derivs. of the name of the Persian priests, the Magi, who were regarded as magicians. Similarly, the Ir. words are from the name of the old Celtic priests, the druids. Specialization of 'act' to 'magical act, magic' is frequent. 'Singing' may be specialized, as in the large groups represented by NE *incantation, enchant* (: Lat. *canere* 'sing'), *charm* (of which the magical sense is the earlier; through Fr., fr. Lat. *carmen* 'song'), Grk. *ἀοιδή* 'song' sometimes, and cpd. *ἐπαοιδή* regularly, 'enchantment, spell'. A 'wailer' may become a 'wizard' (Grk. *γόης*, below). A 'saying' may become a 'spell' (cf. NED s.v. *spell* sb.). To 'call' may become 'bewitch' (Lith. *žavėti*, Lett. *zavēt* : Skt. *havate* 'calls', etc., 18.41). Some of the terms are connected with the use of 'drugs'. Many words for 'witch' have derivs. denoting 'witchcraft, sorcery'. Other occasional semantic sources are 'wisdom', 'black art', 'lots, oracles', 'sign' or 'document' (> 'magic formula'), 'whirlwind, whirlpool' (as if supernatural), etc. Cf. Osthoff, Allerhand Zauber etymologisch beleuchtet, BB 24.109 ff., 177 ff.

1. Grk. *μαγεία, μαγευτική* (sc. *τέχνη*), *μαγικὴ τέχνη*, derivs. of *Μάγοι*, orig. name

of a Median tribe, then the Persian 'priests' (Hdt.+; OPers. nom. sg. *maguš*), who in Greek popular belief were associated with magical practices (perh. only because of their, to the Greeks, strange rites; no factual warrant in native Iranian sources; cf. also Aristot. *τὴν δὲ γοητικὴν μαγείαν οὐδ' ἔγνωσαν* and E. Meyer, Geschichte des Altertums 4².1.117). NG *μαγεία*, and neut. pl. *μάγεια* and *μαγικά*.

Grk. *φαρμακεία* 'giving of drugs', also esp. 'poisoning' and 'witchcraft', fr. *φάρμακον* 'drug, poison, spell' (4.88). Cf. also Lith. *burti* 'bewitch' (below, 5).

Most of the words for the male 'magician, sorcerer' are connected with those for 'magic, witchcraft' (22.42). Many of those for the female 'witch' are the corresponding feminine forms. But the 'witch', more persistent and often with more malevolent connotation in folklore, is also often expressed by words for which corresponding masculine forms are lacking (e.g. Lat. *striga*, NHG *hexe*, Lith., Lett. *ragana*) or have become obsolete (OE masc. *wicca*, fem. *wicce;* NE *witch* now only fem., except dial.; masc. supplied by *wizard*, orig. 'wise man').

Apart from those belonging to the groups discussed in 22.42, several of the words must have originally denoted the female 'diviner, seer, soothsayer', being connected with words for 'divine' or verbs for 'see', 'know', or 'foretell'. Scattered semantic sources are 'woman-druid', 'spell-woman', 'night-owl', 'spider's web', 'murmurer' (of spells), 'hedge-ghost' (?).

Words for 'witch' are also used as opprobrious terms without special reference to magical practice—more rarely of an enticing, bewitching young woman, as sometimes NG *μάγισσα*, NE *witch*, NHG *zauberin* (but not *hexe*).

Br.	*korrigez, boudig*	NHG	*fee*		

'Fairy' is introduced here as the opposite of 'witch', which is true of the most familiar current use of NE *fairy*, Fr. *fée*, etc. But actually the words listed denoted beings with magical powers for both good and evil, sometimes more impish or malevolent than otherwise. The typical good 'fairy' seems to have established herself in medieval Germanic folklore.

Many of the words are of obscure origin, but the principal known source is 'fate'.

1. Nearest to 'fairies' in ancient Greek folklore were the 'nymphs', with their various special classes, 'water-nymphs, tree-nymphs, mountain-nymphs'.

Grk. *νύμφη* 'bride' (: Lat. *nūbere* 'marry'), 'young maiden', and 'nymph'.

Grk. *μοῖρα* 'fate' : *μόρος* 'fate', *μέρος* 'part, share', etc. (13.23). NG also 'fate', but in folklore esp. in pl. the good 'fairies' who appear at the birth of a child and assign its fate. (Cf. e.g. Pernot, Recueil de textes en grec usuel, p. 50).

2. Lat. *nympha* 'nymph' (fr. Grk. *νύμφη* id.), also the nearest approach to 'fairy'.

Lat. *fāta*, neut. pl. of *fātum* 'prophetic declaration, fate' (: *fārī* 'speak'), becoming VLat. sg. > It. *fata*, Fr. *fée*, Sp. *hada*, and through Fr. the widespread Eur. words. REW 279. Wartburg 3.432 f.

Rum. *zînă* (also spelled *zină*) = OIt. *jana*, OFr. *gene* 'witch', fr. Lat. *Diana.* The pagan goddess of the woodlands

survived thus in later folklore. REW 2624. Tiktin 1822. Wartburg 3.66.

Rum. *ursitoare* (used like NG μοῖρα, above, 1), fr. vb. *ursi* 'determine one's fate', this fr. NG ὁρίζω 'determine' (orig. 'bound'). Tiktin 1698 f.

3. Ir. *sīde*, NIr. *sīdhe* (pl.) 'fairy creatures' : *sīd*, NIr. *sīodh* 'mound, knoll', esp. as 'abode of the fairies' (etym.?). Hence sg. fem. *ben sīde* (*ben* 'woman'), NIr. *bean sīdhe* (> NE *banshee*, cf. NED s.v.), NIr. also *sīdhbhean*, *sīobhra*, etc. (McKenna).

W. *tylwyth teg* (pl.), lit. 'beautiful family' (*tylwyth* 'household, family', *teg* 'beautiful'). Cf. Rhys, Celtic Folklore 82 ff.

Br. *korrigez*, fem. of *korrig*, dim. of *korr* 'dwarf' (**korso-* : Lat. *curtus* 'mutilated, short', etc.).

Br. *boudig* 'witch' or 'fairy', see 42.43.

4. Nearest to 'fairies' in early Gmc. folklore were the 'elves', dwarfed beings with magical powers, generally impish if not malevolent. They are, at least in part, the antecedents of the more beneficent medieval fairies. Cf. NED s.v. *elf*.

ON *ālfr*, OE *ælf*, ME *elfe*, NE *elf* (> NHG *elf*, fem. *elfe*), Dan. *alf*, Sw. *älfa* (OHG *alp* 'nightmare'), etym. dub., perh. : Skt. *ṛbhu-*, a name given to three semidivine craftsmen (or even less convincingly : Lat. *albus* 'white'). Walde-P. 1.93. Falk-Torp 22. Kluge-G. 12. Weigand-H. 1.43.

ME, NE *fay* (now arch. or poet.), Dan., Sw. *fe*, Du. *fee*, MHG *feie*, NHG *fee*, fr. OFr. *faie*, Fr. *fée* (above, 2).

ME *fairie*, NE *fairy*, in earliest use 'fairy-land' or 'fairy-folk' (fr. OFr. *fairie* id., deriv. of *faie*), then displacing the simple *fay*. NED s.v.

5. Lith. *laumė*, Lett. *lauma*, a kind of 'fairy', but more often impish or malevolent than beneficent, etym. dub., perh. : ChSl. *loviti* 'seize, catch'. Mühl.-Endz. 2.428 f. Solmsen, KZ 34.553 f.

6. In Slavic folklore the nearest approach to 'fairy' would be the *vila* or the *rusalka*, both used of a sort of nymph, but often malevolent. Cf. Niederle, Manuel de l'antiquité slave, 2.132 ff. (with refs.).

SCr., Bulg., Boh. *vila* (Pol. *wiła* 'buffoon') : Lith. *vilti*, Lett. *vilt* 'deceive' (outside connections dub.; Mühl.-Endz. 4.596), and/or Russ. *viljat'* 'run about', Boh. *viliti* 'fornicate', etc. Brückner 622. Niederle, op. cit. 133 f.

SCr., Bulg., Russ. *rusalka* (Russ. > Pol. *rusałka*, lit.), formed fr. the name of the festival, late ChSl. *rusalija*, etc., fr. MLat. *rōsālia*, Byz. ρουσάλια, lit. 'rose-festival'. Brückner 469. Niederle, loc. cit.

Pol. *boginka* (also *bogunka*), dim. of *bogini* 'goddess'. Brückner 34.

Russ. *feja*, fr. Fr. *fée* (above, 2).

7. There seem to be no fairies or anything like them in early Indo-Iranian mythology. But cf. AV *pairikā-* with its later development (22.43).

Most of the words for 'soul, spirit' (16.11) are also used with reference to the supernatural spirits, but these are not repeated here, with the exception of NE *ghost*, in which this sense has become the dominant one.

The most common development is through the notion of 'appearance' (cf. the specialization of NE *apparition* vs. *appearance*) in words derived from verbs for 'see, appear, shine'. Other sources are 'likeness', 'fright', 'darkness', 'enticement' and 'returning' (i.e. from the dead). The use of 'shade' in this sense, common in Homer, has been widely imitated in poetry.

1. Grk. σκιά 'shade, shadow' (1.63), poet. for 'ghost, phantom'. Imitated in the similar use of Lat. *umbra*, NE *shade*, etc.

Grk. φάντασμα (also φάσμα), lit. 'appearance, apparition' : φαίνομαι 'appear'.

NG pop. στοιχειό, fr. στοιχεῖον 'element' (: στείχω 'walk, march', στίχος 'row, line', etc.), in Byz. sometimes a kind of guardian spirit. The eccl. use of στοιχεῖα τοῦ κόσμου (NT Col. 2.8, 20, Gal. 4.3, 9) as 'cosmic powers' furnishes the connecting link. Sophocles s.v. στοιχεῖον. Moulton-Milligan 591.

2. Lat. *mānēs* (pl.) : *mānus* 'good'. Ernout-M. 587. Walde-H. 2.27.

Lat. *lārva* (early *lārua*) : *Lār*, pl. *Lārēs*, this of Etruscan orig.(?). Ernout-M. 524 f. Walde-H. 1.762 f., 766.

Lat. *phantasma*, fr. Grk. φάντασμα (above, 1). Hence It. *fantas(i)ma*. But Prov. *fantauma*, Fr. *fantôme* (> Rum. *fantomă*), apparently fr. a Grk. dial. by-form φάνταγμα, parallel to Dor. ψᾶφιγμα = ψήφισμα and indicated by modern Lesb. φάδαμα (cf. πρᾶγμα > πρᾶμα). The OFr. spelling *fantosme* (also found in ME) will then be due to *fantasme*, which also occurs. REW 6460. Kretschmer, Der heutige lesbische Dialekt 461.

It. *spettro*, Fr. *spectre* (> INE *specter*, Rum. *spectru*), Sp. *espectro*, fr. Lat. *spectrum* 'appearance, image' (: *specere* 'perceive, look').

Fr. *revenant*, sb. use of adj. *revenant* 'returning', as of one returning from the other world.

Rum. *stafie*, fr. NG στοιχειό (above, 1). Cf. Alb. *stihī*, fr. same source. Tiktin 1482. G. Meyer, Alb. Etym. Wtb. 393.

3. Ir. *scāl* 'supernatural being, specter' (also rendered as 'giant, hero'), NIr. *scāil* 'reflection, image', also 'ghost' (Dinneen), prob. : Goth. *skōhsl* 'demon' (22.35). M. A. O'Brien, Eriu 11.89 f. Otherwise Pedersen 1.76.

NIr. *samhail* 'likeness, image' (Ir. *samail* id. : Lat. *similis* 'like', etc.), also 'ghost, specter'. Similarly Br. *semeilh* (Van.).

W. *bwgan* (arch. *bwg*), beside *bwgwl* 'threat', arch. 'fear', also NE *bogle*, *bogy*, NHG *bögge*, *böggel-mann*, all terms for 'goblins', etc., ultimate source dub. Cf. NED s.v. *bogle*.

W. *drychiolaeth*, fr. *drych* 'sight, appearance, aspect' = Ir. *drech* 'face' : Grk. δέρκομαι 'see', etc. Cf. NE *apparition*, etc.

Br. *bugelnoz*, cpd. of *bugel* 'child' (2.25, 2.27) and *noz* 'night' (14.42).

Pol. *widmo*, Russ. *prividenie* : ChSl. *viděti* 'see' (15.51).

7. Skt. *pitaras* 'fathers', also used for the spirits of one's ancestors.

Skt. *preta-* 'dead' (pple. *pra-ita-* 'gone forth, departed'), also 'spirit of the dead, ghost'.

Skt. *bhūta-* 'a being' (: *bhū-* 'become, be'), often a supernatural being, a kind of 'ghost' (cf. BR s.v.).

Av. *fravaši-*, in pl. in part like Lat. *mānēs*, see. 22.46.

22.46. Guardian spirit. Most of the words for 'soul, spirit' (16.11) are also used with reference to a mystical spirit of the living and dead, and, among many peoples, of inanimate things ('animism'). But there are also a few other words which are used specifically in this sense.

1. Grk. δαίμων in its usual class. use, later 'evil spirit, demon'. See 22.35.

2. Lat. *genius*, through the notion of 'creative' : *gignere* 'beget, bear', *genus* 'birth', etc. Ernout-M. 398 f. Walde-H. 1.591.

Av. *fravaši-*, mostly in pl., the Fravashis, guardian spirits of the faithful before birth, during life and after death, fr. **fra-varti-*, this prob. fr. root *var-*, IE **wer-* 'cover, guard, protect' (Walde-P. 1.280 ff.). Barth. 992 ff.

A few of the words for 'omen' are based upon words for 'bird', and so must have first applied specifically to omens taken from the flight of birds. Several mean primarily 'foretelling, foreboding', or 'warning'. Some are connected with words for 'well, healthy, sound' or 'increase, further', and so must have originally denoted good omens.

Words for 'sign' (12.94) are often used for 'wonder sign, portent, omen', and in many languages these (in some cases one of the several parallel forms) are the usual terms for 'omen'.

1. Grk. οἰωνός 'bird of prey, bird of omen' and 'omen', etym. dub. Walde-P. 1.21, 107. Boisacq 694 f. Walde-H. 1.84.

Grk. ὄρνις 'bird' (3.64), also 'omen'.

Grk. σημεῖον 'sign' (12.94), also 'omen' (Soph.+).

2. Lat. *ōmen*, etym. dub. Ernout-M. 702. Stolz-Leumann, Lat. Gram. 113 ftn.

Lat. *augurium*, the 'taking of omens' and the 'omen' itself (> It. *augurio*, Fr. *augure*, Sp. *agüero*, Rum. neolog. *augur*), based on the personal *augur* 'augur, diviner', this prob. not a cpd. of *avis* 'bird', but fr. **augos* (cf. *augustus*) : *augēre* 'increase, further', with transfer fr.

the abstract and applied at first to the person observing favorable omens. Ernout-M. 89. Walde-H. 1.83. REW 785.

Lat. *auspicium* (> It., Sp. *auspicio*, Fr. *auspice*) 'divination from birds' and sometimes the 'omen', with the personal *auspex*, cpd. of *avis* 'bird' (3.64) and the root of *specere* 'look, observe' (15.51). Ernout-M. 91. Walde-H. 1.87.

It., Sp. *presagio*, Fr. *présage*, fr. Lat. *praesāgium* 'foreboding' (but not used for 'omen'), fr. *prae-sāgīre* 'perceive beforehand'. Ernout-M. 887.

Rum. *prevestire*, fr. *prevesti* 'prophecy', cpd. of *vesti* 'announce' (fr. Slavic, cf. 18.43).

3. Ir. *cēl*, loanword fr. Britannic, OW *coilou* (pl.) gl. *auspiciis*, W. *coel* 'omen, portent', but usually cpd. *ar-goel* (*ar-* 'on-, for-', but also merely intensive), as orig. a 'good omen' : Goth. *hails*, ON *heill*, OE *hāl*, ChSl. *cělŭ* 'well, in good health' (4.83). Cf. ON *heill* 'omen'. Walde-P. 1.329. Pedersen 1.57.

NIr. *tuar* = Ir. *tūar* 'creation, preparation, attainment', etc. (Gael. 'appearance, hue, merit'), vbl. n. of *do-ferim* (*duferthar*, gl. *conditur*) 'establish' (: OHG *gi-werēn* 'grant', Pedersen 2.518). K. Meyer, Ber. Preuss. Akad. 1918. 628.

Br. *diougan* ('prediction, sign, omen'), fr. cpd. of *kana* 'sing'. Pedersen 2.481. Henry 99.

4. Goth. *taikns*, OE *tāc(e)n*, ME, NE *token*, OHG *zeihhan*, MHG, NHG *zeichen*, all words for 'sign' (12.94), used also for 'wonder, miracle' and 'sign of the future, omen', in this last sense NE *token* now obs., and NHG *zeichen*, Du. *teeken* mostly replaced by *vorzeichen*, *voorteeken*. For such early Gmc. use, cf. the early loanword Finn. *taika* 'omen' and 'magic'. Karsten, Kluge Festschrift 65 ff. Kluge-G. 706.

ON *heill*, OE *hǣl* 'health, good luck' and (orig. good) 'omen' : adj. *heill*, Goth. *hails*, etc. 'well, in good health' (4.83).

ON *furða* 'strange thing, wonder' and often 'omen', fr. **for-riða* lit. 'one who rides before'. Falk-Torp 268.

Dan. *varsel* 'warning' and 'omen', fr. *vare* 'guard', refl. 'beware of'. Falk-Torp 1353.

Sw. *förebud*, also and orig. 'foreboding', cpd. of *bud* 'command, message' (: vb. *bjuda* 'command', 19.45).

Dan., NE, NHG *omen*, fr. Lat. *ōmen* (above, 2).

5. Lith. *ženklas*, Lett. *zīme* 'sign' (12.94) and 'omen'.

6. ChSl. *znamenĭje*, SCr. *znamenje*, Boh. *znamení* 'sign' (12.94) and 'omen'.

Pol. *wróżba*, fr. *wróżyć* 'foretell' = late ChSl. *vražiti* 'tell fortunes', etc. Brückner 632.

Russ. *predznamenovanie*, fr. *predznamenovati* 'take omens, foretell', fr. *pred* 'before' and *znamenie* 'sign' (12.94).

7. Skt. *lakṣaṇa-* 'sign' (12.94), also 'favorable sign, omen'. Cf. *sulakṣaṇa-* adj. 'provided with a favorable sign'.

Concluding note.—I have said in the Preface: "The specialist in any given language will always find facts of pertinent interest to supply." How often, even for my own language, have alternative terms come to mind, too late for mention even if worth while. However, I shall not *start* (=*begin*, but not in 14.25) to make a list of "additions and corrections", which might have no end.

Linguistics/Reference

Originally published in 1949 and appearing now for the first time in a paperbound edition, Buck's *Dictionary* remains an indispensable tool for diachronic analysis of the Indo-European languages. Arranged according to the meaning of words, the work contains more than 1,000 groupings of synonyms from the principal Indo-European languages. Buck first tabulates the words describing a particular concept and then discusses their etymological and semantic history, tracing changes in meaning of the root words as well as presenting cases indicating which of the older forms have been replaced by expressions of colloquial or foreign origin.

"It is certainly impossible to imagine all the uses to which this monumental work has been put. Many scholars have no doubt used it as an etymological dictionary of those languages for which no such work is available. Others have welcomed it as a vast and reliable repertory of semantic changes of all sorts. Not a few have been glad to find in it a kind of *Wörter und Sachen* history of Indo-European as a whole. When compared with more recent treatments of the vocabulary of Indo-European, it stands out as far more objective and less likely to induce its readers to indulge in exciting but highly subjective speculations."
—André Martinet, Ecole Pratique des Hautes Etudes

"With interest in Indo-European studies running high, the reissue of Buck's *Dictionary* is especially timely. This enduring arrangement of synonyms by semantic class provides an indispensable fund of information on the Indo-European cultural lexicon. It remains an important and relevant research tool in our understanding of the Indo-European language family and its individual members."
—Philip Baldi, Pennsylvania State University

"An unrevised reprint of a reference work that continues to fill a widespread scholarly need. Etymological dictionaries typically trace the development and continuity of lexemes through languages and language families. This work, instead, is the only repertory for a major language family of the replacements and discontinuities of lexemes within salient semantic notions of interest for a wide variety of fields."
—Eric P. Hamp, University of Chicago

"Buck's *Dictionary* is a real treasure house: a treasure house of words, word origins, expressions, and ideas in most of the great languages of the Indo-European family from India to Iceland and from their earliest attestation down to the present day. The work is the monument of a great American scholar, one with a vision of the scope of language and word history that transcends the narrow individual philologies. Buck had 'the Indo-European touch.' It is high time that we have again in print, and this time in affordable paperback, Buck's 'modest contribution' to the history of ideas."
—Calvert Watkins, professor of linguistics and classics, Harvard University, and the author of *The American Heritage Dictionary of Indo-European Roots*

CARL DARLING BUCK (1866–1955) was the Martin A. Ryerson Distinguished Service Professor Emeritus of Comparative Philology at the University of Chicago.
